2008 - 2013 Residency Training, Radiation Oncology, British Columbia Cancer Agency, University of British Columbia, Vancouver, British Columbia, Canada

Qualifications, Certifications and Licenses
2014 - present Certificate of Registration for Independent Medical Practice, College of Physicians and Surgeons of Ontario, Toronto, Ontario, Canada, License / Membership #: 101253
2013 - present Fellow, Royal College of Physicians and Surgeons of Canada, Ottawa, Ontario, Canada
2009 - present Licentiate – Parts 1 & 2, Medical Council of Canada
2013 - 2014 Certificate of Registration for Postgraduate Education, College of Physicians and Surgeons of Ontario, Toronto, Ontario, Canada, License / Membership #: 101253
2008 - 2013 Certificate of Registration for Postgraduate Education, College of Physicians and Surgeons
2. EMPLOYMENT

Current Appointments

2014 Nov 3 - present  Assistant Professor, Radiation Oncology, University of Toronto, Toronto, Ontario, Canada
2014 Nov 3 - present  Radiation Oncologist, Department of Radiation Oncology, Sunnybrook Odette Cancer Centre, Toronto, Ontario, Canada

3. HONOURS AND CAREER AWARDS

Distinctions and Research Awards

LOCAL
Received

2012  7th Annual Dr. Peter Poon Memorial Radiation Oncology Research Award, University of British Columbia, Vancouver, British Columbia, Canada. (Research Award)
Excellence in producing a peer-review manuscript. Total Amount: 500 CAD

2005  Canadian Institute of Health Research Health Professional Student Research Scholarship, McGill University, Montreal, Quebec, Canada. (Research Award)
Excellence in producing a medical scientific proposal. Total Amount: 4,200 CAD

2004  Dean's Honor's List, Medical Preparatory Program, McGill University, Montreal, Quebec, Canada. (Distinction)
To students in the Medical Preparatory Program with the highest academic standing.

2003  J. W. McConnell Entrance Scholarship, McGill University, Montreal, Quebec, Canada. (Distinction)
To the incoming pre-med student with high academic standing. Total Amount: 500 CAD

2003  McGill Certificate of Merit, McGill University, Montreal, Quebec, Canada. (Distinction)
Based on academic standing.

4. PROFESSIONAL AFFILIATIONS AND ACTIVITIES

Professional Associations

2014 Nov - present  Member, Ontario Medical Association, 1228691
2013 - present  Member, College of Physicians & Surgeons of Ontario
2010 - present  Member, American Society of Therapeutic Radiology and Oncology (ASTRO)
2009 - present  Member, Canadian Medical Protective Association (CMPA)
2008 - present  Member, Canadian Association of Radiation Oncology (CARO)
2008 - 2013  Member, British Columbia Medical Association (BCMA)
2008 - 2013  Member, Canadian Medical Association
2008 - 2013  Member, College of Physicians & Surgeons of British Columbia

2009 - 2013 H&N Liaison. Advanced Technology Integration Steering Committee (ATIC) Head and Neck
C. Academic Profile

1. RESEARCH STATEMENTS

2001 Jul - present
Research Focus.
The scope of my research activities is highlighted in my Creative Professional Activity (CPA) profile. My major research streams include:
3. Prospective evaluation of IMRT for anal canal cancers.
4. Collaborative research evaluating liver stereotactic body radiation therapy (SBRT) and conformal/IMRT/IGRT for upper GI cancers.

2. TEACHING PHILOSOPHY

My teaching philosophy has remained constant but the spectrum of teaching avenues and opportunities have evolved in my teaching career. I am actively involved undergraduate, postgraduate teaching, Continuing Medical Education and Professional (Faculty) Development.

I have modelled a teaching approach emphasizing the following principles:
1. Rigorous application of radiation treatment planning principles in a technically advanced and complex radiation oncology environment.
2. Translation of anatomic and cancer route of spread knowledge from a previous 2-dimensional era to the current 3-dimensional planning and treatment era.
3. Translation of evidence-based guidelines into clinical practice.
4. Incorporation of best practice models and standards into clinical practice.
5. Quality and safety.

My resident teaching effectiveness evaluations have highlighted my content expertise but I place significant emphasis on knowledge translation of complex radiation oncology principles into actual clinical practice. Because my clinical practice has been regarded as technically complex by radiation oncology residents and my practice style has been perceived to be very rigorous and detailed, I have typically worked with PGY5's and senior PGY4s. I value the opportunity to work with our excellent residents and I have won numerous teaching and mentorship awards. I am currently a Royal College of Canada specialty certification examiner for Radiation Oncology.

Over the past 2-3 academic years, I have been asked by the University of Toronto, Department of Radiation Oncology resident training leadership to work with more junior residents since the experience on my service emphasizes practice standards and radiation planning skills development. I have been tasked to help junior residents transition between...
learner to expert as this is inherently a challenging transition.

My principle-based teaching extends well to the CME and Professional Development environment in line with my Creative Professional Activity profile. CME and Professional Development has become a major focus of my teaching career. I have been active locally, nationally and internationally in lecturing/presenting, teaching administration and meeting/program development activities.

3. CREATIVE PROFESSIONAL ACTIVITIES STATEMENT

Over the past decade, the landscape of radiation oncology has changed with tremendous advancements in technical radiation therapeutics including intensity-modulated radiation therapy (IMRT) and image-guided radiation therapy (IGRT). Implementing and evaluating these technologies in an environment of quality and standardization of practice has been a major focus of my Creative Professional Activities in both of my disease sites, H&N and GI.

2000 Feb

E. Publications

1. MOST SIGNIFICANT PUBLICATIONS

   This paper is the first report of our prospective evaluation of IMRT for anal and perianal cancers. While the patient numbers may seem modest, this is the largest prospective cohort of IMRT for anal canal cancer patients with quality of life outcomes and dosimetric evaluation to our knowledge. This database now contains more than 100 patients. This first report is the culmination of the implementation of a comprehensive multidisciplinary anal canal IMRT program at the Princess Margaret with standard institutional practices including treatment guidelines, contouring and planning nomenclature, contouring guidelines, dose prescriptions, dose-volume criteria for IMRT plan evaluation, daily cone beam CT scan image guidance and peer review quality assurance. I led the development and implementation of all aspects of our anal canal IMRT program.

   Radiation dose-sparing of midline lower neck normal organs of risk (larynx, pharynx and esophagus) is an important goal of H&N IMRT planning attempting to limit acute and late swallowing toxicity. However, midline lower neck dose-sparing is extremely challenging in actual practice. This paper reports an audit in oropharynx cancer patients evaluating dosimetric compliance to our institutional lower neck normal organs at risk IMRT dose-volume planning criteria. A novel clinically applicable model is applied to evaluate and predict the success of normal tissue radiation dose-sparing. For this paper, I supervised a radiation therapist (L. Morley, Principle Author) and a radiation therapy student (S. Tang).

   Preventing and treating perineural invasion and spread is a major challenge in the radiotherapy management of head and neck cancers particularly salivary gland cancers. This paper addresses this challenge with a radiation oncology perspective of application to radiation therapy planning.

   This paper represents the first RTOG (now NRG) H&N clinical trial to evaluate a molecular targeted agent in combination with IMRT for nasopharynx cancer. I was a Radiation Oncology Co-Chair (development of the radiation therapy component and expert peer reviewer of radiation treatment plans).

This paper was a state-of-the-art review of the clinical importance of cancer cell repopulation as it applies to radiation therapy and systemic therapy. With respect to radiation oncology, the implementation of intensity-modulated radiation therapy (IMRT) required a re-evaluation of “standard” dose-fractionation schedules given the emergence of non-standard fraction sizes in clinical practice with IMRT. Overcoming cancer cell repopulation is a fundamental principle of all radiation dose-fractionation regimens. According to Google Scholar, this paper has been cited 320 times.

I. Creative Professional Activities

1. CONTRIBUTIONS TO THE DEVELOPMENT OF PROFESSIONAL PRACTICES

2001 Jul 1 - present  
**GOAL:** TO IMPROVE HEAD AND NECK (H&N) CANCER OUTCOMES THROUGH THE IMPLEMENTATION OF HIGH QUALITY RADIATION THERAPY STANDARDS AND STANDARDIZATION OF PRACTICE.  
My goal is to improve H&N cancer outcomes by standardizing radiation therapy practices and improving the quality of radiation therapy delivery for patients with H&N cancer. Radiation therapy is often the primary curative treatment modality for H&N mucosal cancers. Over the past 10 years, there has been a tremendous change in the technical landscape of radiation therapy with the development and implementation of intensity-modulated radiation therapy (IMRT) and image-guided radiation therapy (IGRT). There is level 1 evidence demonstrating the importance of IMRT for H&N cancers. The implementation of these advanced technologies has required new quality assurance and system management processes. Unwanted variations in practice have been shown in phase II and III H&N clinical trials to compromise locoregional control and disease-free survival. Standardization of practice is one approach to limiting unwanted variation.

My creative professional activity (CPA) in this area has been to provide clinical, research, education and thought leadership to promote high quality H&N radiation therapy in an advanced technical environment.
As a member of the Princess Margaret Cancer Centre, Radiation Medicine Program (RMP) H&N Site Group, I played a prominent and leadership role in the development and implementation of many of our now well established H&N IMRT practice standards. Two practice changing examples are: 1) I developed a standardized H&N nomenclature system for radiation targets and normal organs-at-risk with our lead physicist (Dr. Stephen Breen) and our Site Group Leader at that time (Dr. Brian O'Sullivan). This system is integral to the way we plan and deliver radiation therapy. I led the implementation of this new system and I audited and reported our compliance. 2) I developed our institutional IMRT planning dose-volume constraint guidelines and I facilitated the implementation these guidelines by obtaining consensus support from our large H&N team. Impact: I have audited and reported our institutional outcomes in some H&N subsites. Taken together with other institutional audits, our institutional H&N cancer control outcomes are excellent. The development of our H&N IMRT program led the implementation of H&N IMRT in Ontario.

Automatic computer generation or delineation of normal organs and neck lymph node regions (autosegmentation) is a technology that may limit unwanted variation in clinical practice. I was the principle clinical investigator in a Princess Margaret Cancer Centre radiation physics autosegmentation project (PI - Dr. David Jaffray, radiation physics) in partnership with Philips Research. This research contributed to the development of a now commercially available autosegmentation software platform for H&N radiation therapy planning (SPICE, Philips Pinnacle v.9.6 planning system - trademark).

I have been a strong advocate for implementation of best practices and standardization of practice leading to a number of collaborative activities and leadership opportunities. I am currently a member of the Cancer Care Ontario (CCO), Cancer Imaging Program Synoptic Radiology Reporting Clinical Expert Panel. I was invited to co-lead of the CCO Radiation Therapy Program (RTP), H&N Community of Practice (CoP) working toward the development of best practice recommendations for H&N radiation medicine in Ontario. One of my first actions was to advocate for an executive team that reflected the 3 core disciplines of radiation medicine: radiation oncology; radiation physics; and radiation therapy. As standardization of practice is inherently a collaborative process, I have championed interdisciplinary and multidisciplinary collaboration as a core value to promoting quality of care for cancer patients. The H&N CoP general membership is comprised of representatives of the 3 core disciplines of radiation medicine from each of the 10 cancer centres treating H&N cancer patients with radiation therapy. Impact: The H&N CoP was the first RTP disease site CoP and is regarded as a successful model of collaboration among CCO cancer centres. The H&N CoP general membership selected the development of a provincial H&N nomenclature system and H&N IMRT dose-volume constraints as the first two provincial initiatives undertaken. Our Princess Margaret H&N nomenclature system was acknowledged as the foundation of the provincial nomenclature recommendation document. The RTP H&N CoP productivity output includes the development of recommendation documents that are available on the CCO website, successful collaborative meetings, development of a H&N CoP knowledge sharing and collaborative website, regular reporting to RTP leadership (I represent the H&N CoP leadership team at these meetings), a Canadian Organization of Medical Physicists (COMP) project gallery and an American Society of Clinical Oncology (ASCO) poster presentation. The recommendation documents demonstrate effective province wide collaboration in the radiotherapy management of H&N cancer.

My career trajectory in the promotion of H&N IMRT quality and standards extends to clinical trials research. The major North American radiation oncology clinical trials cooperative group is NRG Oncology (formerly Radiation Therapy Oncology Group, RTOG). I was invited to be the H&N Disease Site Liaison for the NRG Radiation Oncology Working Group. In my NRG H&N Liaison role, I am involved in the development of radiotherapy quality standards for NRG H&N clinical trials. I am also a member of the NRG Oncology Head and Neck Cancer Committee (formerly Steering Committee). I am the Radiation Oncology Co-Chair of 2 RTOG
trials, RTOG 0615 and RTOG 1008 evaluating H&N IMRT with system therapies in two disease specific subsites, nasopharynx cancer and salivary gland cancer respectively. I have contributed to the literature in these two disease subsites by institutional audit and presentations, peer reviewed publications and book chapters. As well, I was the expert radiation oncology quality assurance reviewer for RTOG 0615 and I am currently the expert reviewer for RTOG 1008. I was an expert reviewer for the “HEADSTART” trial, conducted jointly by the Trans-Tasman Radiation Oncology Group (TROG) and Sanofi-Aventis [Phase III randomized trial of concomitant radiation, cisplatin and tirapazamine (SR259075) versus concomitant radiation and cisplatin in patients with advanced head and neck cancer].

Impact: I have played a leadership role in the promotion of H&N IMRT quality and radiation therapy standards for major North American radiation oncology clinical trials.

As a result of my leadership in our institutional implementation of H&N IMRT and my reputation as an effective collaborator, I have been invited to 6 CCO cancer centres to facilitate their IMRT implementation as content expert (e.g. CCO coaching IMRT program) and to speak about IMRT implementation and radiation therapy quality. I have lectured widely on topics relevant to this CPA stream. A major focus of my teaching is Continuing Medical Education (CME) and faculty development. I have demonstrated a strong commitment to knowledge transfer through trainee teaching and CME by my record of collaboration in course development (including educational funding), consistent teaching efforts, teaching effectiveness scores and teaching/mentorship awards.

Impact: I have actively and collaboratively promoted the implementation of quality H&N IMRT programs provincially, nationally and internationally.

As further evidence of my credible leadership, I have successfully applied for a peer reviewed H&N cancer provincial leadership position. I have accepted the new CCO position of Ontario Head and Neck Cancers Lead. This position will start in February, 2015. I will be the provincial multidisciplinary H&N Disease Site Leader with a disease site portfolio that will include all H&N mucosal cancers and thyroid cancers. Among my responsibilities, I will be leading the development of clinical care disease pathways and overseeing CCO activities related to H&N and thyroid cancers.

2001 Jul 1 - present

**GOAL: TO IMPROVE GASTROINTESTINAL (GI) CANCER OUTCOMES THROUGH THE IMPLEMENTATION OF HIGH QUALITY RADIATION THERAPY STANDARDS AND STANDARDIZATION OF PRACTICE.**

My goal is to better define practice standards in an era of advanced radiation therapeutics for the adjuvant treatment of rectal adenocarcinomas and primary treatment of anal canal squamous cell cancers. The role of conformal radiation therapy or intensity-modulated radiation therapy (IMRT) is less well defined in the pelvis. Hence, there is an ongoing need to develop and evaluate effective processes and advanced technological standards in the context of our current understanding of radiation dose-fractionation and classical radiation biology. Parallel to my efforts in H&N cancer, my lower GI CPA extends from my institutional GI leadership activities to international consensus and best practice contributions in the management of rectal and anal canal cancers.

I developed and implemented our current comprehensive anal canal IMRT program through protocol and policy development including: the creation of a lower GI nomenclature system for radiation targets and organs-at-risk; multidisciplinary training sessions; treatment policies and guidelines; and leadership of quality assurance rounds. I led the development of a research ethics board (REB) approved prospective anal canal IMRT database. Our initial evaluation was recently published demonstrating excellent disease and quality of life outcomes.

Impact: To our knowledge, ours is the largest published prospective evaluation of IMRT in the treatment of anal canal cancer in the literature with quality of life and radiation dosimetric correlation. Since our initial evaluation, we have accrued more than 100 patients with this rare disease. The development of our peer reviewed database will enable us to evaluate a larger cohort and we plan to publish longer term outcomes including patterns of failure and
late toxicity. Currently, there is no publication of late toxicity with pelvic IMRT in this disease.

I was the only Canadian radiation oncologist invited to be an expert panel member in the development on the RTOG Contouring Consensus Guidelines for Elective Clinical Target Volumes for Conformal Therapy in Anorectal Cancer: An RTOG Consensus Panel Contouring Atlas. This Atlas is available online and in published format. The RTOG Atlases are regarded as high impact guidelines that are widely used as standard guides for practicing radiation oncologists inside and outside of clinical trials. As recognition of my content expertise, I was invited to be an Anal Cancer Scientific Session discussant at the 2014 American Society for Radiation Oncology (ASTRO) Annual Meeting held Sept 15, 2014 in San Francisco, California, United States. ASTRO is the most prominent North American radiation oncology society.

Further to my institutional leadership in rectal cancer radiotherapy management, I wrote the Canadian pelvic radiotherapy standards for the National Cancer Institute of Canada (NCIC) CTG CO.16/MRC CR07: A randomised trial comparing pre-operative radiotherapy and selective post-operative chemoradiotherapy in rectal cancer together with my British Columbia radiation oncology colleague, Dr. John Hay. I was recently invited to join the ASTRO Working Group - Best Practice Statement on Rectal Cancer. An ASTRO Best Practice publication (Appropriate Customization of Radiation Therapy for Stage II and III Rectal Cancer: An ASTRO Best Practice Statement) is near submission.

Parallel to my teaching, CME and professional development efforts in my H&N CPA stream, I have also lectured and presented widely in my lower GI CPA stream. This year, I am chair of the organization committee for (M)ultidisciplinary (A)nnual (G)astrointestinal (C)ancer (MAGIC) Update held annually in Toronto. The event is accredited by the Office of Continuing Education and Professional Development (CEPD), Faculty of Medicine, University of Toronto.

Impact: I am regarded as an international content expert in pelvic radiotherapy and I have influenced international practice standards.

2. EXEMPLARY PROFESSIONAL PRACTICE

2001 Jul 1 - present COLLABORATIVE RESEARCH, PROGRAM DEVELOPMENT and EDUCATION in SUPPORT of LEADING UPPER GI SUBSPECIALITY PROGRAMS.
My clinical, academic and teaching contributions include upper GI subsites (e.g. liver stereotactic body radiation therapy (SBRT) and upper GI malignancies) that are not my main areas of clinical and research focus. However, my contributions extend beyond expectations of my Site Group membership and clinical practice. I have been very committed to collaborative clinical research and education in my roles as content expert and Princess Margaret Cancer Centre, Radiation Medicine Program (RMP) GI Site Group Physician Leader. I have supported our programs locally, nationally and internationally. I was recently invited as an expert consultant in the development of an International Atomic Energy Agency (IAEA) liver stereotactic radiotherapy randomized clinic trial as another example of my radiotherapy quality expertise contribution to clinical trials.

As the RMP GI Site Group Physician Leader, I oversaw or actively led the implementation of state-of-the-art radiation therapy technologies for the GI Site Group including 4-dimensional (4D) CT scanning, 3D image guidance, 4D image guidance, motion management technologies (ABC, abdominal compression), magnetic resonance simulation/fusion, IMRT and most recently volumetric-modulated arc therapy (VMAT). These technologies are fundamental to our research programs and our ability to deliver leading edge and world class upper GI radiation therapy. My co-authorship on several high impact institutional publications support my effective research collaboration.
Curriculum Vitae

Normand Laperriere
MD

A. Date Curriculum Vitae is Prepared: 2016 July 28

B. Biographical Information

Primary Office

1. EDUCATION

Degrees
1974 Sep - 1978 Jun MD, Medicine, Faculty of, University of Toronto, Toronto, Ontario, Canada
1972 Sep - 1974 Apr BSc, Science, Faculty of, Western University, London, Ontario, Canada

Postgraduate, Research and Specialty Training
2008 Oct - 2009 May UHN- Rotman Leadership Development Program, University of Toronto Rotman School of Management Executive Programs, University Health Network, Toronto, Ontario, Canada
1980 Jul - 1984 Jun Resident (PGY1-4), Radiation Oncology, University of Toronto, Toronto, Ontario, Canada
1978 Jul - 1980 Jun Resident (PGY1-2), Family Medicine, University of Toronto, Toronto, Ontario, Canada

Qualifications, Certifications and Licenses
1978 Jul - present Licence CPS, College of Physicians and Surgeons of Ontario, Canada
2009 Oct FRANZCR(Hon), Honorary Fellow, Royal Australian and New Zealand College of Radiology
1984 Dec FRCPC, Fellow, Radiation Oncology, Royal College of Physicians and Surgeons of Canada, Canada
1984 Nov C.S.P.Q., Certification, Radiotherapy, Province of Quebec, Canada
1984 Jul - 1985 Licence CPS, Collège des médecins du Québec, Canada
1984 Jun D.A.B.R., Certification, Therapeutic Radiology, American Board of Radiology, United States
1980 May Certificant, C.C.F.P. College of Family Physicians of Canada (The), Canada
1978 Jun License (LMCC), Medical Council of Canada, Canada
2. EMPLOYMENT

Current Appointments

2011 Jul - present  Professor, Radiation Oncology, University of Toronto, Toronto, Ontario, Canada
1998 Jan - present  Active Staff, Division of Hematology/Oncology, The Hospital for Sick Children, Toronto, Ontario, Canada
1992 Jul - present  Active Staff, Division of Neurosurgery, Toronto Western Hospital/UHN, Toronto, Ontario, Canada
1985 Nov - present  Staff Radiation Oncologist, Princess Margaret Hospital, Toronto, Ontario, Canada

Previous Appointments

CONSULTING
1985 Nov - 1997 Dec  Consultant, Division of Hematology/Oncology, The Hospital for Sick Children, Toronto, Ontario, Canada

HOSPITAL
1984 Jul - 1985 Oct  Staff Radiation Oncologist, Montreal General Hospital, Royal Victoria Hospital, Jewish General Hospital, Montreal, Quebec, Canada

UNIVERSITY - RANK
1999 Jul - 2011 Jun  Associate Professor, Radiation Oncology, University of Toronto, Toronto, Ontario, Canada
1989 Jul - 1999 Jun  Assistant Professor, Radiation Oncology, University of Toronto, Toronto, Ontario, Canada
1985 Nov - 1989 Jun  Lecturer, Radiation Oncology, University of Toronto, Toronto, Ontario, Canada
1984 Jul - 1985 Oct  Assistant Professor, Radiation Oncology, McGill University, Montreal, Quebec, Canada

3. HONOURS AND CAREER AWARDS

Distinctions and Research Awards

INTERNATIONAL
Received
2011 Oct  D'Angio Lecture, 43rd Congress of the International Society of Paediatric Oncology (SIOP), Aukland, New Zealand. (Distinction)
               Advances in Photon Radiation Therapy for Pediatric Tumours: New Opportunities and Lessons Learned.
2009 Oct - 2009 Nov  The 2009 Carestream Professorship, Royal Australian and New Zealand College of Radiology. (Distinction)
2009 Oct  FRANZCR(Hon), Honorary Fellow, Royal Australian and New Zealand College of Radiology. (Distinction)
1992 Nov  Mahaley Award, Congress of Neurological Surgeons, United States. (Research Award)
Teaching and Education Awards

LOCAL

Received

2008  **Best Radiation Medicine Rounds for 2007/2008**, Dept of Radiation Oncology, Faculty of Medicine, Princess Margaret Hospital, Canada. (Postgraduate MD)

2008  **Postgraduate Advocacy and Mentorship Award, Department of Radiation Oncology**, Dept of Radiation Oncology, Faculty of Medicine, University of Toronto, Canada. (Postgraduate MD)

2006  **Mentorship Award, Radiation Medicine Program**, Dept of Radiation Oncology, Faculty of Medicine, Princess Margaret Hospital, Toronto, Ontario, Canada. (Postgraduate MD, Clinical Fellow)

2005  **Best Clinical Teacher, Radiation Medicine Program**, Dept of Radiation Oncology, Faculty of Medicine, Princess Margaret Hospital, Canada. (Postgraduate MD)

2005  **Postgraduate Advocacy and Mentorship Award, Department of Radiation Oncology**, Dept of Radiation Oncology, Faculty of Medicine, University of Toronto, Canada. (Postgraduate MD)

2001  **Residents’ Award for Excellence in Clinical Teaching**, Dept of Radiation Oncology, Faculty of Medicine, University of Toronto, Canada. (Postgraduate MD)

Student/Trainee Awards

NATIONAL

Received

1999 Sep  **Second prize (the Nucletron Award)**, Supervisor, Awardee Name: Andrew Loblaw (Postgraduate Trainee, Department of Radiation Oncology). Canadian Association of Radiation Oncology’s Resident Research Award Competition, Canada

For his project, “A population-based study of malignant spinal cord compression”.

4. PROFESSIONAL AFFILIATIONS AND ACTIVITIES

Professional Associations

  - **Member**, American Society for Therapeutic Radiology and Oncology
  - **Member**, Canadian Association of Radiation Oncologists
  - **Member**, Canadian Brain Tumour Consortium
  - **Member**, Canadian Medical Association
  - **Member**, European Society for Radiotherapy and Oncology
  - **Member**, Fellow of The Royal College of Physicians and Surgeons of Canada
  - **Member**, Joint Section on Tumors, American Association of Neurological Surgeons and Congress of Neurological Surgeons
  - **Member**, Ontario/Canadian Medical Association
Administrative Activities

INTERNATIONAL

15th International Symposium on Pediatric Neuro-Oncology
2012 Jun Member, Organizing Committee, Toronto, Ontario.

International Brain Tumour Research and Therapy Meeting
2010 - 2012 Member, Local Organizing Committee

Pediatric Radiation Oncology Society (PROS) Annual Meeting
2014 Oct Member, Local Organiser, Organizing and Scientific Committee, Toronto.

SIOP Annual Meeting
2014 Oct Member, Local Organizing Committee, Toronto.

Society of Neuro-Oncology
2012 - 2014 Member, Local Organizing Committee

The 19th International Brain Tumour Research and Therapy Conference
2012 Jun Member, Organizing Committee, Niagara Falls, Ontario.

NATIONAL

11th Biennial Canadian Neuro-Oncology Meeting
2004 May Member, Organizing committee, Toronto.

13th Biennial Canadian Neuro-Oncology Meeting
2008 May Member, Organizing committee, Banff.

Brain Tumour Foundation of Canada
2008 Participant, Think Tank
One day Think Tank for members of board. London, Ontario.

Canadian Association of Medical Radiation Technologists

Canadian Brain Tumour Consortium
2004 - present Vice Chair
2000 - present Founding Member of Board

Fifth Canadian Neuro-Oncology Meeting
1992 Jun Member, Organising Committee, Deerhurst, Ontario.
Normand LAPERRIERE

National Cancer Institute of Canada
1993 - 1995 Chair, Site Specific Advisory Group for Brain Tumours of the Canadian Committee on Cancer Staging

National Cancer Institute of Canada/Clinical Trials Group
1995 - 2000 Member, Executive, Central Nervous Site

Royal College of Physicians and Surgeons of Canada
1993 - 2003 Member, Examination Board in Radiation Oncology

The College of Physicians and Surgeons of Ontario
2000 - present Member, Advisory Committee on Radiation Oncology

PROVINCIAL / REGIONAL

Other Organizations
2014 Apr Co-Director, Personalized High Precision Radiotherapy for Brain Tumours, Toronto.
1988 Member, Task Force for the establishment of a French language community health center in Toronto

Cancer Care Ontario
2004 - present Co-Chair, Neurologic Disease Site Group, Evidence Based Program
1998 - 2004 Member, Neurologic Disease Site Group, Evidence Based Program

Centre Medico-Social Communautaire Inc.
1989 - 1991 Founding Member of Board, Toronto, Ontario. a french language community health center.

Pediatric Oncology Group of Ontario Aftercare Education
2007 Jan Member, Organising committee, Toronto.

Provincial Pediatric Oncology Planning
2004 Jul - 2005 May Member, 2010 Steering Committee
2004 - 2005 Chair, Radiotherapy committee

Radiation Therapy Oncology Group (RTOG)
1997 - 2005 Member, Brain Tumour Committee

LOCAL

Other Organizations
1992 - present Leader, Department of Radiation Oncology Central Nervous System Site Group
1998 - 2009 Director, Adult Aftercare Program for survivors of Pediatric Malignancies
1997 - 2004 Leader, Central Nervous System Quality Management Team
1995 - 1996 Member, Medical Advisory Committee (MAC)
1994 - 2005 Leader, Central Nervous System Accreditation Team
1994 - 1995 Member, Transition Management Team
1993  Member, Rules & Regulations Review Committee
1992 - 1993  Team leader, Continuous Quality Improvement demonstration project: Patient waiting in Testicular Cancer clinic
1992 - 1993  Member, Medical Advisory Committee (MAC)
1991 - 1992  Secretary, Medical Advisory Committee (MAC)
1990  Member, CT selection committee
1990  Member, Imaging user group
1989 - 1993  Chair, Ambulatory Care Committee
1989 - 1991  Member, Comprehensive Cancer Center ad hoc planning group
1989  Member, Clinical Organisation and Planning Committee
1988 - 1989  Member, Medical Advisory Committee (MAC)
1987 - 1990  Member, Executive, Medical Staff Association

Princess Margaret Hospital
2000 - present  Member, Cancer Committee
1996 - present  Leader, Central Nervous System Site Group
2008 - 2009  Chair, Cancer Committee
2008 - 2009  Member, Advisory Committee on Oncology
2008 - 2009  Member, Cancer Program Medical Leadership Committee
1995 - 1996  President, Medical Staff Association
1995 - 1996  Member, Board of OCI/PMH
1991 - 1994  Member, OCI/PMH Family Canvas Committee, Capital Campaign
1986 - 1994  Member, Radiation Protection Committee

University Health Network
2008 - 2009  Member, Medical Advisory Committee

University of Toronto
2010 - present  Member, Teaching Effectiveness Committee, Department of Radiation Oncology, Faculty of Medicine, Dept of Radiation Oncology
1989  Member, Search committee, for the Head of the Interdepartmental Division of Oncology, Faculty of Medicine, Dept of Radiation Oncology
1988  Member, Ad hoc committee on academic affairs for the Department of Radiation Oncology, Faculty of Medicine, Dept of Radiation Oncology
1987 - 1990  Functional Program Liaison Coordinator, Rehabilitation Medicine
1987 - 1990  Secretary, Department of Radiation Oncology, Faculty of Medicine, Dept of Radiation Oncology

E. Presentations and Special Lectures

1. INTERNATIONAL

Invited Lectures and Presentations

2014 May Evolution of the Role of Radiotherapy in the Management of Pediatric Brain Tumours. 3rd Annual Meeting of the Pan Arab Society of Paediatric Oncology International Congress in Pediatric Neuro-Oncology. Annaba, Algeria.

2014 May Re-irradiation for Pediatric Brain Tumours. 3rd Annual Meeting of the Pan Arab Society of Paediatric Oncology International Congress in Pediatric Neuro-Oncology. Annaba, Algeria.

2013 May Radiation Therapy for Pediatric Craniopharyngiomas. Pediatric Neuro-Oncology Basic and Translational Research Conference. Fort Lauderdale, United States.

2011 Feb Image Guided Photon IMRT for Skull Base Chordomas and Chondrosarcomas. 21st North American Skull
Base Society Meeting. Phoenix, United States.

2010 Oct  The Role of Temodal with Radiation in Malignant Gliomas. Shanghai Brain Tumour Interest Group. Shanghai, China.

2009  State of the Art in Radiation Treatment of High Grade Gliomas. Turkish Multidisciplinary Neurooncology Symposium. Istanbul, Turkey.

2009  Effect of Radiation Treatment on Non-Involved Brain. 36th Annual Meeting of the Clinical Oncology Society of Australia. Gold Coast, Australia.
Normand LAPERRIERE

2009 Radiation for Brain Metastases. 36th Annual Meeting of the Clinical Oncology Society of Australia. Gold Coast, Australia.

2009 Radiation Oncology and National Cancer Institute of Canada (NCIC) Portfolio of CNS Trials. Cooperative Trials Group for Neuro-Oncology (COGNO) 2nd Annual Scientific Meeting. Gold Coast, Australia.

2009 Visiting Professor. The Management of Brain Metastases. Carestream Professor, the Combined Scientific Meeting of the Royal Australian and New Zealand College of Radiologists (RANZCR). Brisbane, Australia. Including the Faculty of Radiation Oncology (FRO), The Australian Institute of Radiography (AIR) and the Australasian College of Physical Scientists & Engineers in Medicine (ACPSEM).

2009 Visiting Professor. Temozolomide in Gliomas: current state of the art. Carestream Professor, the Combined Scientific Meeting of the Royal Australian and New Zealand College of Radiologists (RANZCR). Brisbane, Australia. Including the Faculty of Radiation Oncology (FRO), The Australian Institute of Radiography (AIR) and the Australasian College of Physical Scientists & Engineers in Medicine (ACPSEM).

2009 Visiting Professor. NCIC/EORTC/TROG Trial: Glioma in the Elderley. Carestream Professor, the Combined Scientific Meeting of the Royal Australian and New Zealand College of Radiologists (RANZCR). Brisbane, Australia. Including the Faculty of Radiation Oncology (FRO), The Australian Institute of Radiography (AIR) and the Australasian College of Physical Scientists & Engineers in Medicine (ACPSEM).

2009 Visiting Professor. Radiation Therapy for Malignant Gliomas: an Evidence Based Review. Carestream Professor, Department of Radiation Oncology, Mater Hospital Brisbane. Brisbane, Australia.

2009 Visiting Professor. Overview of CNS radiotherapy: Gliomas and Metastases. Department of Radiation Oncology, Townville Hospital. Townsville, Australia.

2009 Visiting Professor. Management of Brain Metastases. Department of Radiation Oncology, Royal Brisbane and Women’s Hospital and Royal Brisbane Children’s Hospital. Brisbane, Australia.

2009 Visiting Professor. Management of Pediatric Brain Tumours: Pilocytic Astrocytomas, Medulloblastomas, Ependymomas. Department of Radiation Oncology, Royal Brisbane and Women’s Hospital and Royal Brisbane Children’s Hospital. Brisbane, Australia.

2009 Visiting Professor. Management of Brain Metastases. Department of Radiation Oncology, Westmead Hospital. Sydney, Australia.

2009 Visiting Professor. Management of Brain Metastases. Department of Radiation Oncology, Liverpool Hospital. Sydney, Australia.

2009 Visiting Professor. Craniopharyngiomas, Medulloblastomas, Ependymomas. Department of Radiation Oncology, Auckland Hospital and Children’s Hospital. Auckland, New Zealand.

2008 Strategies for Treatment and New Frontiers in Elderly Patients with GBM. IVth International Conference on Future Trends in the Treatment of Brain Tumors. Bologna, Italy.

2008 Update on EORT-NCIC 4 Year Results. Current Trends in the Management of Malignant Gliomas II. Rio de Janeiro, Brazil.

2008 Pseudoprogression in High Grade Glioma after Radiotherapy and Temozolomide: is it an Issue? Perspectives in Central Nervous System Malignancies. Warsaw, Poland.

2006  Glioblastoma: Recent Advances and Future Studies. 7th Annual Turkish Radiation Oncology Congress. Fethiye, Turkey.

2006  Pseudoprogession in Malignant Gliomas: Possible Value of Newer MRI Techniques. Department of Radiation Oncology, University of Tehran. Iran, Islamic Republic of.

2005  Case Presentation: Brain Metastases. 3rd International Conference on Future Trends in the Treatment of Brain Tumors. Padua, Italy.

2005  Randomized Study of Temozolomide and Radiation Therapy in Elderly Patients with Glioblastoma: an NCIC CTG/EORTC Study. Satellite Meeting at the Second Quadrennial Meeting of the World Federation of NeuroOncology and the Sixth Meeting of the European Association for NeuroOncology. Edingburgh, United Kingdom.

2005  Experimental MRI Sequences in the Assessment of Patients with Glioblastoma Multiforme: Proposal for a Prospective Study in 30 Patients. Satellite meeting at the Second Quadrennial Meeting of the World Federation of NeuroOncology and the Sixth Meeting of the European Association for NeuroOncology. Edingburgh, United Kingdom.

2005  NCIC/EORTC Study in Elderly Patients with High Grade Glioma. Temozolomide International Research
2004 Evidence Based Guidelines for Radiation in Malignant Gliomas. World Federation of Neurosurgical Societies, Tumor Section Meeting. Jaipur, India.

2004 Role of Radiation in Adult Neuro-Oncology. World Federation of Neurosurgical Societies, Tumor Section Meeting. Jaipur, India.

2004 Evidence Based Guidelines for Radiation in Adult Low Grade Gliomas. World Federation of Neurosurgical Societies, Tumor Section Meeting. Jaipur, India.

2004 Simplified Approach to Classification and Indications for RT in Paediatric Brain Stem Gliomas. World Federation of Neurosurgical Societies, Tumor Section Meeting. Jaipur, India.

2004 Evidence Based Guidelines for Radiation in Malignant and Low Grade Gliomas. World Federation of Neurosurgical Societies, Tumor Section Meeting, Satellite Conference. Kolkata, India.

2001 Low Grade Gliomas: The Case for Early Radiotherapy. Second International Clinic of Neurological Surgery. New Delhi, India.

2008 - 2009  CBCF Physician Fellowship Award, Canadian Breast Cancer Foundation, Canada. (Distinction)  
Total Amount: 107,250

2007 - 2009  EIRR 21st Award, Excellence in Radiation Research Program, Canada. (Distinction)  
(CIHR funded Research Training Program). Total Amount: 28,500

2001  Ivan Smith Memorial Studentship, Canadian Cancer Society, Canada. (Distinction)

LOCAL

Received

2005  WJ Simpson Resident Research Award, Department of Radiation Oncology, University of Toronto, Toronto, Ontario, Canada. (Research Award)

Teaching and Education Awards

LOCAL

Received

2015 Oct  Post Graduate Teaching Award, Dept of Radiation Oncology, Faculty of Medicine, University of Toronto, Toronto, Ontario, Canada

Nominated

2007 Mar  2007 PAIRO Trust Fund Resident Teaching Award, Dept of Radiation Oncology, Faculty of Medicine, University of Toronto, Toronto, Ontario, Canada. (Postgraduate MD)

4. PROFESSIONAL AFFILIATIONS AND ACTIVITIES

Professional Associations

2008 - present  American Institute of Ultrasound in Medicine (AIUM)
Administrative Activities

PROVINCIAL / REGIONAL

Cancer Care Ontario (CCO)
2014 - present Breast Pathway, Toronto, Ontario, Canada.
2013 Nov 22 - present Program in Evidence Based Care - Head and Neck Disease Site Group, Ontario, Canada.
2015 Dec Systemic Therapy in the Curative Treatment of Head and Neck Squamous Cell Cancer - DSG reviewer, Toronto, Ontario, Canada.

College of Physicians and Surgeons of Ontario (CPSO)
2013 Aug 12 - 2013 Nov 5 CPSO Peer Assessor - Radiation Oncology, Ontario, Canada.

LOCAL

NRG Oncology
2014 Aug 7 - present NSABP Site Representative, Toronto, Ontario, Canada.

Odette Cancer Centre, Radiation Oncology
2013 Jul 1 - present Head and Neck Disease Site Group Lead, Toronto, Ontario, Canada.

Odette Cancer Centre, Sunnybrook Health Sciences Centre
2013 May 9 - present Concurrent Therapy Advisory Committee, Toronto, Ontario, Canada.
2013 Jan 1 - 2013 Dec 30 Radiation Planning Redesign Committee, Toronto, Ontario, Canada.

Sunnybrook Health Sciences Centre, SRI

University of Toronto
2002 - 2005 Resident Rep, Post-Graduate Medical Education Committee, Faculty of Medicine, Dept of Radiation Oncology, Postgraduate MD

2013 Canadian Breast Cancer Foundation, CBCF-PNWT Region’s 2013 Breast Cancer Research Grant Competition, Number of Reviews: 1
C. Research Funding

1. GRANTS, CONTRACTS AND CLINICAL TRIALS

PEER-REVIEWED GRANTS

FUNDED

2014 Feb - 2019 Jan

The major goal of the project is to translate MRI-controlled HT mediated drug delivery into the clinic.

2013 Feb - 2015 Feb

2012 Jul - 2015 Jun

2008 Jul - 2010 Jun

2008 Jul - 2009 Jun

NON-PEER-REVIEWED GRANTS

FUNDED

2016 - present

Principal Site Investigator. NRG HN002: A randomized phase II trial for patients with p16
positive, non-smoking associated, locoregionally advanced oropharyngeal cancer (head and neck disease site group). [Clinical Trials]

2016 - present  Principal Site Investigator. A phase II randomized trial of radiation fractionation schedules for once-a-day accelerated partial breast irradiation (OPAR) (breast disease site group). [Clinical Trials]

CURRICULUM VITAE

JD (Jidong) Lian, MSc, MD, FRCPC
Tel: 905-813-1100 Ext. 5127
Email: jlian@cvh.on.ca

QUALIFICATION:
2007-2008 Assistant Professor (Adjunct), University of Western Ontario
July 2006 FRCPC, Canada
1991-1994 M.Sc, Department of Oncology, University of Alberta, Canada
1979-1984 M.D., Second Military Medical University, Shanghai, China
October 2002 Qualifying Examination, Medical Council of Canada
October 1999 Clinical Skills Assessment and ECFMG, USA
March 1999 USMLE (United States Medical Licensing Examination)

LICENSE AND CERTIFICATE:
August 2007 Radiation Oncology (Registration No. 87473), Ontario, Canada
2003-2004 Physician Extender (Registration No. S10238), Alberta, Canada
October 2002 LMCC Registration (Registration No. 92550), MCC, Canada
November 1999 ECFMG Certificate (Certificate No. 0-588-660-1), USA

CLINICAL EXPERIENCE:
December 2008 Radiation Oncologist, Peel Regional Cancer Centre, Canada
2007-2008 Radiation Oncologist, Windsor Regional Cancer Centre, Canada
2006-2007 Fellow in Radiation Oncology, Cross Cancer Institute, Canada
2001-2006 Resident in Radiation Oncology, University of Alberta, Canada
2000-2001 Resident in Neuropathology, University of Calgary, Canada
1988-1989  Neurologist in Neurology, No.401 Hospital, China
1986-1987  Resident in Neurology, No.401 Hospital, China
1984-1985  Resident in Internal Medicine, No.401 Hospital, China

RESEARCH EXPERIENCE:

2006-2007  Clinical Research Fellow in Radiation Oncology, Cross Cancer Institute, Canada
           Research area: gynecologic and lung cancers using IMRT-based Technique

1999-2000  Clinical Research Fellow in neuromuscular diseases, Division of Neurology, University of Alberta, Canada
           Research Area: cell death and protection

1994-1999  Technologist and Lab Supervisor, Neuromuscular Diseases Laboratory, Division of Neurology, University of Alberta Hospitals

1991-1994  MSc Student, Department of Medicine, University of Alberta
           MSc thesis: Platelet Activation by Collagen

TEACHING EXPERIENCE:

2007-2008  Preceptor for the rotating 3rd year medical students from the University of Western Ontario and radiation therapy students from the University of Toronto

December 2008 Involvement in teaching medical residents and radiation therapy students from the University of Toronto

PRESENTATION:  Assessment of extended–field radiotherapy for stage IIIIC endometrial cancer using 3DCRT, IMRT and helical tomotherapy. CARO 2007, Toronto

Platelet activation by immobilized collagen involves integrin and is responsive to mechanical force. American Society of Hematology Thirty-fourth Annual Meeting, 1992, San Diego

JOURNAL REVIEWER:

Since May 2008  Reviewer for Radiotherapy & Oncology
 COMMITTEE:
Since Dec. 2008 IMRT Working Group, Peel Regional Cancer Centre
2007-2008 Research Committee, Windsor Regional Cancer Centre (WRCC)
Quality Assurance, WRCC
IMRT study group (protocol development), WRC

 PUBLICATION:

**ABSTRACT:**

1) Tak Hing, Patricia Tai, Avi Assouline, Edward Yu, **Jidong Lian**, Tong Zhu, Joseph Kurian, Cyrus Chargari, Claude Krzisch. Clinical/Disease sites : Other tumour sites (*ESTRO 29, 2010*)

**CLINICAL TRIALS:**

I have been involving in the RAPID study since March 2008

I participated in the following clinical trials at the WRCC in 2007-2008:

1. CUOG/OCOG trial: A randomized comparison of immediate versus deferred androgen deprivation therapy using goserelin for recurrent prostate cancer after radical radiotherapy (ELAAT).
2. NCIC CTG PR.11: A phase III study of active surveillance therapy against radical treatment in patients diagnosed with favorable risk prostate cancer (START).
3. NCIC CTG SC 20: A phase III international randomized trial of single versus multiple fractions for re-irradiation of painful bone metastases.

**PROJECT AND GRANT APPLICATION:**

1. Retrospective analysis of factors influencing the outcome in breast cancer patients without adjuvant treatments (2008)
   - J. Lian, Radiation Oncologist, Windsor Regional Cancer Centre
   - C. Hamm, Medical Oncologist, Windsor Regional Cancer Centre
   - Julie Durocher, Manager to HIS, Windsor Regional Cancer Centre
   - **Funded:** $23,000

2. Proposal for summer student research project (2008)
   - C. Hamm, Medical Oncologist, Windsor Regional Cancer Centre
   - J. Lian, Radiation Oncologist, Windsor Regional Cancer Centre
   - S. Kanjeekal, Medical Oncologist, Windsor Regional Cancer Centre
   - Y. Alam, Medical Oncologist, Windsor Regional Cancer Centre
   - D. Sicheri, Medical Oncologist, Windsor Regional Cancer Centre
   - C. Springer, Radiation Oncologist, Windsor Regional Cancer Centre
   - K. Schneider, Radiation Oncologist, Windsor Regional Cancer Centre
   - **Funded:** $10,000

**AWARD:**

1991-1994   Graduate Scholarship
Department of Medicine, University of Alberta, Canada
August 1988    Second-Prize winner in National Epidemiological Study of Neurological Diseases, Department of Health, China
1979-1984    First-Class Student Award in each university year

**PROFESSIONAL AFFILIATION:**

August 2007    College of Physicians and Surgeons of Ontario
2001 - Present    Canadian Association of Radiation Oncologists
2001 - Present    American Society for Therapeutic Radiology and Oncology
2001 - Present    American College of Radiology
2000 - 2007    College of Physicians and Surgeons of Alberta
2000 - 2008    Canadian Medical Association
1986 - 1989    Chinese Neurology Association

1. EDUCATION

Degrees
1980 MD, University of Toronto, Canada

Postgraduate, Research and Specialty Training
1987 - 1988 Hyperthermia Research Fellow, Stanford University Medical Center, United States
1983 - 1986 Resident 4-6, Radiation Oncology, Princess Margaret Hospital, Canada
1980 - 1983 Intern – R3, Internal Medicine, University of Toronto, Canada

Qualifications, Certifications and Licenses
1986 FRCPC, Radiation Oncology, Royal College of Physicians and Surgeons of Canada, Canada
1984 FRCPC, Internal Medicine, Royal College of Physicians and Surgeons of Canada, Canada
1980 College of Physicians and Surgeons of Ontario, Canada

2. EMPLOYMENT

Current Appointments
2012 Aug - present Chief, Radiation Medicine Program, Princess Margaret Cancer Centre
2012 Aug - present Head, Department of Radiation Oncology, University Health Network
2012 Jul - present Chair, Radiation Oncology, University of Toronto, Canada
2002 - present Professor, Radiation Oncology, University of Toronto, Canada
2002 - present Professor, Medical Biophysics, University of Toronto, Canada
2002 - present Professor, Otolaryngology, University of Toronto, Canada
1992 - present Senior Scientist, Ontario Cancer Institute, Canada
1988 - present Staff Radiation Oncologist, Princess Margaret Cancer Centre, Canada
Previous Appointments

CONSULTING
1994 - 1996 Consultant Staff, Wellesley Hospital, Canada

RESEARCH
2005 - 2010 Head, Division of Applied Molecular Oncology, Division of Applied Molecular Oncology, Ontario Cancer Institute, Canada

UNIVERSITY - CROSS APPOINTMENT
1996 - 2002 Associate Professor, Medical Biophysics, University of Toronto, Canada
1995 - 1996 Assistant Professor, Medical Biophysics, University of Toronto, Canada

UNIVERSITY - RANK
1996 - 2002 Associate Professor, Radiation Oncology, University of Toronto, Canada
1988 - 1996 Assistant Professor, Radiation Oncology, University of Toronto, Canada

3. HONOURS AND CAREER AWARDS

Distinctions and Research Awards

INTERNATIONAL

Received

2016 Ted Phillips Distinguished Speaker, University of California San Francisco. (Distinction)
Incorporating Genomics Information in Personalized Radiation Medicine.

2014 Dolly Huang Memorial Lecture, 10th Asia Pacific Multidisciplinary Meeting for Cancer Research. (Distinction)
Novel Insights into NPC Biology via the micro-RNA Lens.

2013 2013 Best of ASTRO Award, American Society for Radiation Oncology. (Research Award)

2012 Women of Action 2012, Israel Cancer Research Fund. (Research Award)

2012 Vical Award for Most Innovative Abstract, 9th International Conference for Cancer Gene Therapy, San Diego, California, United States. (Research Award)

1987 Gordon E. Richards Fellowship, Stanford University Medical Center, United States. (Research Award)

NATIONAL

Received

2013 2013 Best Abstract in Science and Applied Technology, 27th CARO Annual Scientific Meeting. (Research Award)

2012 Focus on Science, Women in Cancer Research. (Distinction)

2012 Gordon Richards Lecturer 2012, Canadian Association of Radiation Oncologists (CARO), Canada. (Research Award)

2009 Award for Best Abstract in Science and Applied Technology, Canadian Association of Radiation Oncologists, Quebec City, Quebec, Canada. (Research Award)

1984 Second Prize, Radiation Oncology Congress Award Competition, Canadian Association of Radiologists, Canada. (Distinction)
“Primary Lymphoma of the Breast”.

“Primary Lymphoma of the Breast”.
PROVINCIAL / REGIONAL

Received

1980  K.J.R. Wightman Award, Dana-Farber Cancer Institute, Canada. (Distinction)

LOCAL

Received

2012 - 2017  Elia Chair in Head & Neck Cancer Research (Re-appointment), University of Toronto & Princess Margaret Cancer Centre, Canada. (Distinction)
Joint Research Chair.

2012  Successful Mentor, WinC. (Distinction)

2011  Most Influential Research Publication, Radiation Medicine Program, Princess Margaret Cancer Centre. (Research Award)

2001 - 2012  Elia Chair in Head & Neck Cancer Research, University of Toronto & Princess Margaret Cancer Centre, Canada. (Distinction)
Joint Research Chair.

1977 - 1978  Physicians' Services Incorporated Scholarship, Toronto Western Hospital, Canada.
(Distinction)

Teaching and Education Awards

LOCAL

Received

1985  Teaching bursary, Faculty of Medicine, Princess Margaret Hospital, Canada

4. PROFESSIONAL AFFILIATIONS AND ACTIVITIES

Professional Associations

American Association for Cancer Research
American Society of Gene Therapy
American Society of Therapeutic Radiology and Oncology
Canadian Association of Radiation Oncologists
Canadian Medical Association
North American Hyperthermia Society

Administrative Activities

INTERNATIONAL

American Head and Neck Society

2016 - 2017  Member, 9th International Conference on Head & Neck Cancer
Chinese University of Hong Kong – NPC
2012 - present  Member, Advisory Board

National Cancer Institute
2010  Member, Tumor Biology & Imaging (TB&I) Task Force
2005 - 2007  Member, Subcommittee D
2003  Member, Special Emphasis Panel
2003  Member, US Site Visit Review of P01 Re-submission Henry Ford Health Sciences Center, Dr. Svend Freytag Molecular Gene and Radiation Therapies for Cancer
2002  Member, US Site Visit Review of MD Anderson Cancer Center, Dr. Kiang Ang Extension of Radiotherapy Research
2002  Member, US TJU P01 Re-review
2002  Member, US Site Visit Team at Henry Ford Health Sciences Center, Dr. Svend Freytag Molecular Gene and Radiation Therapies for Cancer
2001  Member, US Site Visit Team at Thomas Jefferson University, Dr. Dennis Leeper Modification of Hyperthermia Response
2001  Member, US Site Visit Team at Georgetown University, Dr. Rupert K. Schmidt-Ullrich Molecular Radiation Oncology Clinical Trials Consortium
2001  Member, Reporting Team to Parent Committee D, Washington, District of Columbia.
2000  Member, US Site Visit Team at Duke University, Dr. Mark Dewhirst Investigations into Hyperthermia and Gene Therapy

National Institutes of Health
2010  Member, Head and Neck Steering Committee
2003  Invited participant, NIH-sponsored workshop on Radiology Education and Training

North American Hyperthermia Society Meeting
2001  Member, Scientific Organizing Committee, Puerto Rico.

Oak Ridge Associated Universities
2015  Member, Florida Department of Health’s Biomedical Research Programs

University of Pennsylvania
2012 - present  Member, Advisory Board; Research Training Program

NATIONAL

Canadian Breast Cancer Foundation
2000 - 2003  Chair, Professional advisory Committee of the Ontario Chapter
1999 - 2000  Vice Chair, MAC of the Ontario Chapter
1998 - 1999  Member, Medical Advisory Board of the Ontario Chapter
1995 - 1998  Member, Medical Advisory Board

Canadian Cancer Society
2005  Member, Terry Fox Program Project Review Team Dr. P Brodt: The IGF System: From Biology to Therapy
2004  Member, Terry Fox Program Project Review Team Dr. J Bell: Oncolytic Virus Consortium
National Cancer Institute of Canada
2006 - 2012 Member, Advisory Committee on Research (ACOR)

PROVINCIAL / REGIONAL
Ontario Cancer Institute
2008 - 2012 Chair, Appointments Committee

LOCAL
Princess Margaret Hospital
1992 - 1998 Member, In-Patient Care Sub-committee of the Medical Advisory Committee

University Health Network
2015 - present Co-Chair, Delegated Order Sets, Medical Acts Committee
2015 - 2017 Vice Chair, Medical Advisory Board

University of Toronto
2008 - 2012 Member, Executive of UT-Department of Radiation Oncology, Faculty of Medicine, Department of Radiation Oncology
2008 - 2011 Member, Decanal Promotions Committee, Faculty of Medicine
2008 - 2010 Member, Executive of the Medical Biophysics Graduate Division, Faculty of Medicine, Dept of Medical Biophysics
2005 Chair, East-West Symposium on Nasopharyngeal Carcinoma 2005 Combined with the Wharton Day, Toronto, Canada.
2005 Chair, Breast Cancer Symposium 2005; Advances in Breast Cancer: Molecularly targeted therapies, Faculty of Medicine, Dept of Radiation Oncology, Continuing Education
1997 - 1999 Member, Promotion Committee, Faculty of Pharmacy, Faculty of Medicine, Dept of Pharmaceutical Sciences
1994 - 2005 Director, University of Toronto Fellowship Program, Faculty of Medicine

C. Academic Profile

1. RESEARCH STATEMENTS

My research focuses on several aspects of translational molecular oncology, including the development of biomarkers for head and neck cancers, identification and development of novel anti-cancer therapeutics, and stem cell regenerative therapy. Over the years, we have continued to seek a greater understanding of the determinants of human cancer development and progression, with an overall objective to identify clinically useful biomarkers, as well as potential novel therapeutic targets. We have also extensively evaluated the role of micro-RNAs (miRNAs) in human cancers using global miRNA profiling of FFPE tissues. We profiled several different tumour types, seeking potential prognostic
signatures, including cervix, head & neck squamous cell carcinoma (HNSCC), breast, soft-tissue sarcomas, and nasopharyngeal carcinoma (NPC). Importantly, candidate signatures have been validated for the latter two malignancies. Furthermore, using a siRNA high throughput screen, we identified uroporphyrinogen decarboxylase (UROD) as a novel radiosensitizing target, mediated through generation of reactive oxygen species (ROS), by exploiting the iron dysregulation in human cancers. Targeting UROD appears to sensitize a broad spectrum of human cancer models, as well as also chemo-sensitizing. Based on this research, we were granted 3 national and international Patents. Additionally, we will continue to investigate more potent novel synthetic UROD inhibitors, with a number of promising candidates that warrant further validation. Our future studies will also focus on further defining the head & neck cancer (HNC) landscape, which is continually evolving. The two most pressing issues in HNSCC management relate to: a) HPV-positive oropharyngeal carcinoma (OPC); and b) oral cavity squamous cell carcinoma (OSCC). We plan to continue investigating additional molecular signatures that might inform on how to further improve patient stratification, prognosis and outcome. Lastly, our studies also focus on a major clinical issue with radiation therapy, radiation fibrosis, which is an irreversible scarring of normal tissues that can result in significant functional morbidity. We are interested in understanding how adipose-derived stem cells may aid in tissue regeneration after treatment with ionizing radiation.

D. Research Funding

1. GRANTS, CONTRACTS AND CLINICAL TRIALS

PEER-REVIEWED GRANTS

Funded

Mitigating Radiation Therapy Side-Effects.

Investigations of Cancer Therapy.

Investigations of Molecular Cancer Therapy.

Issues Relevant to Breast Cancer.

2007 - 2008  **Principal Investigator.** Quest for the “stem cell” in nasopharyngeal carcinoma. Canadian Institutes of Health Research (CIHR). Collaborator(s): Alajez N, Bastianutto C. 110,553 CAD.
2007

2016 Jan 11 **Invited Speaker.** Invited speaker at a Ride to Conquer Cancer fundraising event. Ride to Conquer Cancer. Toronto, Ontario, Canada.

2014 Apr **Speaker.** The Why’s and How’s of Academic Promotion. Department of Radiation Oncology, University of Toronto. Toronto, Ontario, Canada.

2014 Apr **Speaker.** TRCP Radiation Oncology Update. Cancer Care Ontario - Toronto Regional Cancer Program Steering Committee. Toronto, Ontario, Canada.

2010 Nov 23 Invited Speaker. Biology of HNC; HPV & OPC. Amgen Preceptorship, PMH. Toronto, Ontario, Canada.

2010 Feb 5 Invited Speaker. UROD – a novel radiosensitizing target for HNC. OCI Faculty Seminar. Toronto, Ontario, Canada.

2010 Jan 7 Invited Speaker. HPV and Micro-RNAs in HNC. PMH Combined DMO/DRO Rounds. Toronto, Ontario, Canada.

2009 May  Invited Speaker. HSC Trafficking in Response to RT. PMH/OCI Breast Retreat. Toronto, Ontario, Canada.

2009 May  Invited Speaker. HPV Determination in OPC. NCIC-CTG Spring Meeting. Toronto, Ontario, Canada.

2006 Apr 6 Invited Speaker. HTP screens for discovering novel cancer therapeutic compounds. City-Wide Chemical and High Throughput Biology rounds, University of Toronto. Toronto, Ontario, Canada.

2004 Jun 10 Organizer and Debater. This House Believes that by 2014, Molecular Pathology will be Used for the management of head & neck cancer patients. 2nd Annual Elia Research Afternoon in Head & Neck Cancer. Toronto, Ontario, Canada.

2004 Apr Invited Lecturer. Why the Liu lab has not yet won the war on cancer. Radiation Medicine Program Rounds. Toronto, Ontario, Canada.

2002 Apr Invited Lecturer. Onto the Road to Cure for Nasopharyngeal Cancer Gene Therapy. Faculty of Pharmacy, University of Toronto. Toronto, Ontario, Canada.

1999 Jun  **Invited Speaker.** From the Bench to the Bedside and Back: Predictive Factors in Cancer Therapy. UT-DRO Course - Future Directions in Radiation Oncology. Toronto, Ontario, Canada.

1989 Nov  **Workshop Speaker.** HIV Infections - What We Need to Know. University of Toronto, Mt. Sinai Hospital. Toronto, Ontario, Canada.

### Presented Abstracts

1996 Jul 28 Inhibition of Na+/H+ antiport function is not the sole mechanism for enhanced thermal sensitivity induced by Amiloride. Canadian Association of Radiation Oncologists. Toronto, Ontario, Canada. Liu F-F, Diep K, Hill RP. September 14 - 17, 1994, pp 701.

Lectures and Other Presentations

2014 May Invited Speaker. Partners in Care: Continuing to enhance a seamless connection with Primary Care and the Princess Margaret Cancer Centre. Princess Margaret Cancer Centre - ELLICSR. Toronto, Ontario, Canada. (Continuing Education).

2011 May Invited Speaker. PMHF Behind-the-Scenes. Toronto, Ontario, Canada. (Continuing Education).

2009 Nov Invited Speaker. PMH Foundation Team Meeting. Toronto, Ontario, Canada. (Continuing Education).

Session Moderator

H. Research Supervision

1. PRIMARY OR CO-SUPERVISION

Graduate Education

2013 - present  Primary Supervisor. PhD. Xiao Zhao MD. Investigating the use of adipocyte-derived stem cells to repair radiation injury.
2010 - 2012  Primary Supervisor. MSc. Ronald Wu. c-met inhibition in HNC.
1998 - 2000  Primary Supervisor. MSc. Laura Weinrib. Cisplatin chemotherapy combined with p53 gene therapy for NPC.

Postdoctoral Research Fellow (PhD)

2014  Primary Supervisor. Jeff Bruce. Analysis of genome-scale data sets from molecular profiling experiments of cancer patient samples.

2010 - 2012  Primary Supervisor. Takashi Kawanaka MD. micro-RNAs in cervix cancer.

2007 - 2010  Primary Supervisor. Hisayuki Kato MD. Molecular therapies for HNSCC.

2004 - 2005  Primary Supervisor. Joe Martin MD. Molecular therapies for HNSCC.

2. OTHER SUPERVISION

Graduate Education

Thesis Committee Member

2016 - present  MSc. Meghan Lambie. 'Mimicking a Radiosensitivity Signature using Pharmaceuticals in Squamous Cell Carcinomas.'

2016 - present  MSc. Anna Pan. PTCHD4 as a potential modifier of Li-Fraumeni Syndrome.

2008 - present  PhD. Keira Pereira. HNC stem cells & their niches. Collaborator(s): co-supervisor Laurie Ailles.

2012 - 2014  MSc. Elina Korpela. Targeting the Angiopoietin-1/Tie2 pathway to decrease normal tissue damage in radiotherapy.

2011 - 2014  MSc. Daria Taiakina. The effects of hypoxia on mitotic centrosome function and genetic instability in prostate cancer.

2010 - 2013  MSc. Badr Idsaid. miR-605 as a novel genetic modifier in Li-Fraumeni Syndrome.

3. HONOURS AND CAREER AWARDS

Distinctions and Research Awards

INTERNATIONAL

Received

2009 ASCO Young Investigator Award, American Society of Clinical Oncology. (Research Award)
48 awarded internationally. Total Amount: 50,000 CAD

NATIONAL

Received

2014 Movember Rising Star Award, Prostate Cancer Canada. (Research Award)
2011 Clinician-Scientist Award, Prostate Cancer Canada. (Research Award)
Total Amount: 150,000 CAD

2009 Canadian Research Award for Specialty Residents - Division of Medicine, Royal College of Physicians and Surgeons of Canada. (Research Award)
1 awarded per year in Canada. Total Amount: 2,000 CAD

2009 NCIC Dorothy J. Lamont Fellowship Award, National Cancer Institute of Canada. (Research Award)
Highest-ranking fellow in Post-MD Research competition. Total Amount: 5,000 CAD

2009 Terry Fox Foundation Post-MD Research Fellowship, National Cancer Institute of Canada. (Research Award)
10 awarded across Canada. Total Amount: 46,250 CAD

1999 Cancer Research Studentship, Cancer Research Society Inc. (Research Award)
$15,050/yr for 3 yr; 14 awarded across Canada. Total Amount: 45,150 CAD

1999 Doctoral Research (Biomedical) Award, Medical Research Council of Canada. (Research Award)
$19,030/yr for 3 yr; 122 awarded across Canada. Total Amount: 57,090 CAD

1999 Student Travel Award, National Cancer Institute of Canada. (Distinction)
Total Amount: 1,500 CAD

1999 Terry Fox Research Studentship, National Cancer Institute of Canada. (Research Award)
$21,000/yr for 3 yr; 14 awarded across Canada. Total Amount: 63,000 CAD

PROVINCIAL / REGIONAL

Received

2015 Early Researcher Award, Ministry of Research and Innovation. (Research Award)
2011 OICR Early Stage Career Investigator Award, Ontario Institute for Cancer Research. (Research Award)
Total Amount: 65,000 CAD
4. PROFESSIONAL AFFILIATIONS AND ACTIVITIES

Professional Associations

2015 - present  Full Active Member, Canadian Urological Oncology Group (CUOG)
2008 - present  Active Member, American Society of Clinical Oncology (ASCO)

C. Academic Profile

1. RESEARCH STATEMENTS

Improving radiotherapy outcomes for cancer patients through biology and biomarkers. Radiotherapy is a major treatment modality for prostate cancer patients, however despite delivery of a high dose of radiation, up to one-third of patients will recur following treatment. Patients who develop locally recurrent disease are at significant risk of subsequently developing distant metastases, and have a poor prognosis, highlighting the importance of elucidating mediators of cancer radioresistance.

To address this important clinical problem, my laboratory generated radiation resistant cancer models and discovered that they possess an aggressive phenotype that mimics the clinical scenario. We are investigating the role of microRNA in promoting this phenotype, since they are known to possess pleotropic oncogenic effects by targeting multiple downstream gene targets. My laboratory has identified and is elucidating the mechanism of several candidate microRNA that are involved in mediating cellular response to radiation. Translational relevance is provided by the finding that these microRNA may serve as novel targets to sensitize tumor cells to radiation treatment. Additionally, pre-treatment microRNA expression levels may serve as predictive biomarkers to identify which patients’ tumors may respond better to radiation treatment. To this end, we are investigating microRNA profiling of patient biofluids to identify potential predictive signatures that can be used to improve clinical decision making.

**E. Publications**

1. **MOST SIGNIFICANT PUBLICATIONS**

   *This topical review highlights the current insights on the major ways that microRNA may contribute to tumour radiation response and whether their levels reflect treatment success. We conclude by applying the potential framework of future roles of miR in personalised radiotherapy using prostate cancer clinical management as an example.*

   *The prostaglandin E2 (PGE2) pathway promotes tumor progression and is implicated in recurrence following radiotherapy. We demonstrated that miR-620 contributes to radiation resistance in cancer cells by targeting HPGD, which is a key regulator of PGE2 metabolism. Our results led us to propose a novel model regulating cancer radiation resistance: miR-620 targets HPGD, resulting in accumulation of HPGD’s substrate, PGE2, and signaling by PGE2 through the EP2 receptor results in cancer radiation resistance. Furthermore, we demonstrated that specific blockade of the EP2 receptor had therapeutic efficacy in reversing radioresistance. Specific inhibitors of PGE2 signaling such as EP2 antagonists may be desirable, since they may potentially limit or avoid side-effects seen with cyclooxygenase-2 (COX-2).*

   *Most cancer patients are treated with radiotherapy, but the treatment can also damage the surrounding normal tissue. Acute skin damage from cancer radiotherapy diminishes patients’ quality of life, yet effective biological interventions for this damage are lacking. Protecting microvascular endothelial cells from irradiation-induced perturbations is emerging as a targeted damage-reduction strategy. We discovered that administration of a vascular modifying agent reduces acute skin radiation damage in mice. This radiation protection approach may have clinical impact for cancer radiotherapy patients by reducing the severity of their acute skin radiation damage.*

Radiation resistance poses a major clinical challenge in cancer treatment, but little is known about how microRNA may regulate this phenomenon. In this study, we used a novel approach to identify functionally relevant microRNA: next-generation sequencing and an unbiased comparison of microRNA expression in prostate cancer cells rendered resistant to fractionated radiation treatment. We detected the enrichment of microRNA-95 in radiation resistant cells, and performed in vitro and in vivo characterization experiments. This seminal publication identified the little-studied microRNA-95 as a major mediator of radiation resistance in tumors, and elucidated that the sphingosine-1-phosphate (S1P) signaling pathway is specifically targeted by microRNA-95. Additionally, we demonstrated that resistance was reversed with a clinically approved inhibitor of S1P signaling.

My research detailed for the first time that blockade of the DLL4-Notch pathway with a blocking DLL4 antibody can be used advantageously when given after radiation treatment to promote ineffective tumor vasculature function, extreme tumor hypoxia (low oxygen levels), and profound tumor cell death. This novel strategy greatly improved the efficacy of radiotherapy, meaning that the same dose of radiation worked much better in preventing tumor regrowth in different types of tumors, indicating the broad relevance of this treatment strategy. A patent based upon these findings (combination of DLL4 antibody with radiotherapy) has been awarded to my co-investigators and I. The ultimate goal will be to translate the findings from this novel research to an early phase clinical trial in a range of cancer patients undergoing radiotherapy.

1. INTERNATIONAL

Invited Lectures and Presentations

2016 Invited Lecturer. MicroRNA and prostate cancer therapy response. 31st ESTRO Meeting on Clinical and Experimental Research in Radiation Oncology. France. Presenter(s): Liu SK.

2016 Invited Lecturer. MicroRNA and tumor radioresistance. International Summit on Biomarkers and Therapeutic Advances in Radiation Oncology. Quebec, Canada. Presenter(s): Liu SK.

2013 Invited Lecturer. MicroRNA and tumor radiation response. 28th ESTRO Meeting on Clinical and Experimental Research in Radiation Oncology (CERRO). France. Presenter(s): Liu SK.

1998 Invited Lecturer. Gads, a novel SH3-SH2-SH3 adaptor protein is associated with SLP-76 and TCR zeta-chain in activated T cells. 4th Annual Tyrosine Phosphorylation and Cell Signaling meeting. La Jolla, United States. Liu SK and McGlade CJ.

Presented Abstracts

2007 Poster Presentation. A novel poly(ADP-ribose) polymerase inhibitor, ABT-888, radiosensitizes malignant human cell lines under oxia and hypoxia. 10th International Wolfsberg Meeting on Molecular Radiation Biology/Oncology. Ermatigen, Switzerland. Liu S (Principal Author), Coackley C, Bristow RG.

2007 Poster Presentation. A novel poly(ADP-ribose) polymerase inhibitor, ABT-888, radiosensitizes malignant human cell lines under oxia and hypoxia. American Society for Therapeutic Radiology and Oncology (ASTRO) 49th Annual Meeting. Los Angeles, California, United States. Liu S (Principal Author), Coackley C, Bristow RG.
Stanley K. LIU

1999 **Poster Presentation.** Characterization of the adaptor protein Gads in hematopoietic signalling pathways. Oncogenes & Growth Control meeting. La Jolla, United States. **Liu S** (Principal Author), and McGlade CJ.

**Presented and Published Abstracts**

2016 Sep 26 **ePoster presentation.** Serum exosomal microRNAs (miRNAs) as non-invasive biomarkers to guide post-operative radiotherapy in prostate cancer (PCa) patients treated with radical prostatectomy (RP). American Society for Radiation Oncology (ASTRO). Boston, Massachusetts, United States. Presenter(s): Fotouhi Ghiam A. (Trainee Presentation)

2016 Sep 26 **Oral presentation.** The biological role and clinical significance of long non-coding RNA urothelial carcinoma associated 1 (UCA1) in prostate cancer (PCa). American Society for Radiation Oncology (ASTRO). Boston, Massachusetts, United States. Presenter(s): Fotouhi Ghiam A. (Trainee Presentation)

**2. NATIONAL**

**Invited Lectures and Presentations**

2016 **Invited Lecturer.** Tumor microenvironment and radiotherapy. McGill Molecular & Clinical Radiobiology Workshop. Quebec, Canada.

2015 **Invited Lecturer.** Normal tissue radiotoxicity; Tumor microenvironment and radiotherapy. McGill Molecular & Clinical Radiobiology Workshop. Quebec, Canada.

2014 **Invited Lecturer.** MicroRNA 330-3p and tumor radiation response. Canadian Association of Radiation Oncology (CARO). St. John’s, Newfoundland and Labrador, Canada. Presenter(s): **Liu SK**.

2012 **Invited Lecturer.** Investigational biomarkers for tumors vasculature response to therapy. Canadian Association of Radiation Oncologists (CARO) 2012 Annual Scientific Meeting. Ottawa, Ontario, Canada.
2011

**Invited Lecturer.** Inhibition ofDll4-Notch signaling enhances tumor response to radiation. CARO (Canadian Association of Radiation Oncology) 25 Annual Scientific Meeting. Winnipeg, Manitoba, Canada. **Liu SK**, Bham S, Fokas E, Beech J, Cho S, Im J, Muschel R, Harris AL.

2008

**Invited Lecturer.** A novel poly(ADP-ribose) polymerase inhibitor, ABT-888, radiosensitizes malignant human cell lines under hypoxia. McGill Cancer Centre, McGill University. Montreal, Quebec, Canada. **Liu SK**, Coackley C, Krause M, Jalali F, Chan N, Bristow RG.

2007

**Invited Lecturer.** A novel poly(ADP-ribose) polymerase inhibitor, ABT-888, radiosensitizes malignant human cell lines under oxia and hypoxia. Canadian Prostate Cancer BioNet Annual Meeting. Montreal, Quebec, Canada. **Liu SK**, Coackley C, Bristow RG.

2007

**Invited Lecturer.** A novel poly(ADP-ribose) polymerase inhibitor, ABT-888, radiosensitizes malignant human cell lines under oxia and hypoxia. Department of Oncology, University of Alberta. Edmonton, Alberta, Canada. **Liu SK**, Coackley C, Bristow RG.

**Presented Abstracts**

2007

**Poster Presentation.** A novel poly(ADP-ribose) polymerase inhibitor, ABT-888, radiosensitizes malignant human cell lines under oxia and hypoxia. Canadian Association of Radiation Oncology (CARO). Toronto, Ontario, Canada. **Liu S** (Principal Author), Coackley C, Bristow RG.

2007

**Poster Presentation.** A novel poly(ADP-ribose) polymerase inhibitor, ABT-888, radiosensitizes malignant human cell lines under oxia and hypoxia. Canadian Prostate Cancer Research Initiative (CPCRI). Toronto, Canada. **Liu S** (Principal Author), Coackley C, Bristow RG.

2002

**Poster Presentation.** Assessing the Informational Needs of Prostate Cancer Patients: A Pilot Study. Canadian Association of Radiation Oncologists (CARO) 16th Annual Scientific Meeting. Toronto, Canada. **Liu S** (Principal Author), Gospodarowicz M, Friedman A, Nyhof-Young J.

2002

**Presented and Published Abstracts**

2016 Sep

**Poster presentation.** Serum exosomal microRNAs (miRNAs) as non-invasive biomarkers to guide post-operative radiotherapy in prostate cancer (PCa) patients treated with radical prostatectomy (RP). Canadian Association of Radiation Oncology (CARO). Banff, Alberta, Canada. Presenter(s): Fotouhi-Ghiam A. (Trainee Presentation)

*Publication Details:*
Fotouhi Ghiam A, Vesprini D, Taeb S, Jahangiri S, Huang X, Ray J, Hoey C, Loblaw DA, Fokas E, **Liu S**. Serum exosomal microRNAs (miRNAs) as non-invasive biomarkers to guide post-operative radiotherapy in prostate cancer (PCa) patients treated with radical prostatectomy (RP). Radiother Oncol. 2016. **Senior Responsible Author.**

2016 Sep

**Oral presentation.** The biological role and clinical significance of long non-coding RNA urothelial carcinoma associated 1 (UCA1) in prostate cancer (PCa). Canadian Association of Radiation Oncology (CARO). Banff, Alberta, Canada. Presenter(s): Fotouhi Ghiam A. (Trainee Presentation)

*Publication Details:*
Media Appearances

3. PROVINCIAL / REGIONAL

Invited Lectures and Presentations

Presented Abstracts

2011  **Poster Presentation.** Inhibition of Dll4-Notch signalling in tumor and vasculature enhances the response to radiation. Ontario Institute for Cancer Research (OICR) 4th Annual Scientific Meeting. Alliston, Ontario, Canada. **Liu S** (Principal Author), Bham S, Fokas E, Im J, Muschel R, Harris AL.

4. LOCAL

Invited Lectures and Presentations

2013  **Invited Lecturer.** Urinary biomarkers for prostate cancer. Odette Cancer Centre Genitourinary Research Rounds. Toronto, Ontario, Canada. Presenter(s): **Liu SK**.

2013  **Invited Speaker.** MicroRNA Biology and Translation: In the lab and beyond? Sunnybrook Research Institute Biology Seminar Lunch and Learn Series. Toronto, Ontario, Canada. Presenter(s): **Liu SK**.

2013  **Invited Speaker.** Tackling Aggressive Prostate Cancer: from the lab to the clinic. Prostate Canada Cancer Network - Orillia Awareness Group. Orillia, Ontario, Canada. Presenter(s): **Liu SK**.

2013  **Invited Lecturer.** MicroRNA Biology and Biomarkers in Prostate Cancer. University of Toronto - University of Sao Paulo Joint Oncology Conference. Ontario, Canada. Presenter(s): **Liu, SK**.

2012  **Invited Lecturer.** Enhancing tumor radiation response - how to kill more cancer cells with less. Department of Medical Biophysics summer research lecture series, Princess Margaret Hospital. Toronto, Ontario, Canada. Presenter(s): **Liu SK**.

2012  **Invited Lecturer.** Enhancing tumor radiation response – how to kill more cancer cells with less. Department of Medical Biophysics Annual Retreat. Orillia, Ontario, Canada. Presenter(s): **Liu SK**.

2011  **Invited Lecturer.** Inhibition of Dll4-Notch signaling in tumor and vasculature enhances the response to radiation. Radiation Oncology Research Rounds, Sunnybrook Health Sciences Centre. Toronto, Ontario. **Liu SK**, Bham S, Fokas E, Im J, Muschel R, Harris AL.

2011  **Invited Lecturer.** Inhibition of Dll4-Notch signaling enhances tumor response to radiation. Department of Radiation Oncology rounds, University of Toronto. Toronto, Ontario, Canada. **Liu SK**, Bham S, Fokas E, Beech J, Cho S, Im J, Muschel R, Harris AL.

2011  **Invited Lecturer.** Microbubble contrast ultrasound to monitor in vivo tumor perfusion in response to Notch

2007

**Invited Lecturer.** A novel poly(ADP-ribose) polymerase inhibitor, ABT-888, radiosensitizes malignant human cell lines under oxia and hypoxia. Annual Department of Radiation Oncology (DRO) Research Day. Toronto, Ontario, Canada. Liu SK, Coackley C, Bristow RG.

**Presented Abstracts**

2011

**Poster Presentation.** PEA 3 is a potential downstream target of Notch signalling. IMS Summer Research Program Day. Toronto, Ontario, Canada. Lin C, Taeb S, Harris A, Liu SK.

1999

**Poster Presentation.** The adaptor protein Gads is implicated in coupling the tyrosine-phosphorylation of Hematopoietic Progenitor Kinase-1 with T cell receptor activation. Hospital for Sick Children Research Institute Retreat. Toronto, Canada. Liu S (Principal Author), Smith CA, Arnold R, Kiefer F, McGlade CJ.

**Presented and Published Abstracts**

2016 Apr 22

*Publication Details:*

2016 Apr 22

**Poster presentation.** microRNA-198 targets Wnt signaling to regulate prostate cancer aggression. UT-DRO Annual Research Day. Toronto, Ontario, Canada. Presenter(s): Ray J. (Trainee Presentation)

*Publication Details:*

**H. Research Supervision**

1. PRIMARY OR CO-SUPERVISION

**Undergraduate Education**

2015 May - 2015 Aug

2015 Jan - 2015 Aug

2014 May - 2014 Dec

**Primary Supervisor.** B. Sc. Ivan Cadonic. Supervisee Position: Co-op research student, Supervisee Institution: University of Waterloo. PGE2 and radiation resistance.

2014 May - 2014 Aug

2013 May - 2013 Sep

**Primary Supervisor.** B. Sc. Gurkeet Lalli. Supervisee Position: Summer research student, Supervisee Institution: Western University. microRNA and radiation response.

**Graduate Education**

2015 Jan - present | **Primary Supervisor.** MSc. Jessica Ray, Medical Biophysics. Supervisee Institution: University of Toronto. *The role of miR-198 in prostate cancer progression.*

2015 Jan - present | **Primary Supervisor.** MSc. Christianne Hoey, Medical Biophysics. Supervisee Institution: University of Toronto. *miR-106a as a mediator of prostate cancer aggression and therapy resistance.* Awards: Queen Elizabeth II Graduate Scholarship ($15,000).

2012 Jan - 2014 Jun | **Primary Supervisor.** MSc. Elina Korpela. Supervisee Institution: University of Toronto. *Targeting the Angiopoietin-1/Tie2 Axis to Decrease Normal Tissue Damage During Cancer Radiotherapy.* Awards: Queen Elizabeth II Grad Scholarships in Science and Technology, Jan-Dec 2012, $15,000; Paul Starita Graduate Student Fellowship, Sep 2012–Aug 2013, $6,000; Scace Grad Fellowship in Prostate CA Research, Sep 2012–Aug 2013, $6,000; Frederick Banthing and Charles Best Canada Grad Scholarships Master’s Award, CIHR, Sep 2012–Aug 2013, $17,500; Best Oral Presentation Award, James Lepock Memorial Student Research Symposium, May 2013, $150; Richard P. Hill Award for Academic Excellence, June 2013, $200.

**Undergraduate MD**

2012 Jul - present | **Primary Supervisor.** Aruz Mesci. Supervisee Position: CREMS Research Scholar, Supervisee Institution: University of Toronto. *PEA3 as a pro-metastatic factor in colorectal cancer.* Awards: Clinician Investigator Trainee Association of Canada (CITAC) Annual Meeting and Conference Travel Award $2,000.

**Postgraduate MD**

2015 Jul - present | **Primary Supervisor.** Clinical Fellow. Alireza Fotouhi. Supervisee Institution: University of Toronto. *Serum exosomal microRNAs as non-invasive biomarkers to guide therapy or surveillance for Prostate Cancer.* Awards: CARO Fellowship Award $80,000 (only 1 awarded across Canada), 2015-2016 Postgraduate Awards UofT Faculty of Medicine (Heidi Sternbach, Chisholm Memorial, Timeposters and Joseph M. West Family).

**Postdoctoral Research Fellow (PhD)**

**Other**

Curriculum Vitae

Douglas Andrew Burr Loblaw

A. Date Curriculum Vitae is Prepared: 2016 May 6

B. Biographical Information

Primary Office
Sunnybrook Health Sciences Centre
Odette Cancer Centre
2075 Bayview Avenue
Toronto, Ontario, Canada
M4N 3M5

Telephone 416-480-4806
Fax 416-480-6002
Email andrew.loblaw@sunnybrook.ca

1. EDUCATION

Degrees
2010 - 2011 OMA Physician Leadership Development Program, Schulich School of Business, York University, Toronto, Ontario, Canada
2008 - 2009 Sunnybrook-Schulich Advanced Leadership Development Program, Schulich School of Business, York University, Toronto, Ontario, Canada
1996 - 2002 MSc, Health Policy Measurement and Evaluation, University of Toronto, Toronto, Ontario, Canada
1991 - 1994 MD, Queen’s University, Kingston, Ontario, Canada
1987 - 1991 BSc, Physics, The University of British Columbia, Vancouver, British Columbia, Canada

Postgraduate, Research and Specialty Training
1996 - 2002 Clinical Investigator Program, University of Toronto, Toronto, Ontario, Canada
1995 - 2000 Princess Margaret Hospital / Toronto Sunnybrook Regional Cancer Centre, Radiation Oncology, University of Toronto, Toronto, Ontario, Canada
1991 - 1993 Summer Research Student, Department of Medical Biophysics, BC Cancer Research Centre, Vancouver, British Columbia, Canada

Qualifications, Certifications and Licenses
2000 FRCPC, Radiation Oncology, Royal College of Physicians and Surgeons of Canada, Canada

2. EMPLOYMENT

Current Appointments
2014 Jul 1 - present Professor, Health Policy, Management and Evaluation, University of Toronto, Toronto, Ontario, Canada
2014 Jul 2 - present  Professor, Radiation Oncology, University of Toronto, Toronto, Ontario, Canada
2013 Jul - present  Courtesy Staff, Medicine, Rouge Valley Health System, Toronto, Ontario, Canada
2008 - present  Scientist, Sunnybrook Research Institute, Toronto, Ontario, Canada
2007 - present  Courtesy Staff, Department of Surgery, North York General Hospital, Toronto, Ontario, Canada
2000 - present  Active Staff, Radiation Oncology, Odette Cancer Centre, Toronto, Ontario, Canada
2000 - present  Active Staff, Radiation Oncology, Sunnybrook Health Sciences Centre, Toronto, Ontario, Canada

Previous Appointments

HOSPITAL
2002 - 2008  Associate Scientist, Sunnybrook Research Institute, Toronto, Ontario, Canada

UNIVERSITY - CROSS APPOINTMENT
2008 - 2014 May  Associate Professor, Health Policy, Management and Evaluation, University of Toronto, Toronto, Ontario, Canada

UNIVERSITY - RANK
2007 Jul - 2014 May  Associate Professor, Radiation Oncology, University of Toronto, Toronto, Ontario, Canada
2000 - 2007  Assistant Professor, Radiation Oncology, University of Toronto, Toronto, Ontario, Canada

3. HONOURS AND CAREER AWARDS

Distinctions and Research Awards

INTERNATIONAL
Received

2009  Frank Ellis Medal, Royal College of Radiologists, United Kingdom. (Research Award)
2008  Clinician Scientist Award, Ontario Association of Radiation Oncology, Canada. (Research Award)
2007  Fellowship Award, CUOG/AstraZeneca. (Research Award)
Awarded for proposal: ‘The Role of Bound Prostate Specific Antigen in Predicting Risk of Progression in the Active Surveillance Population with Low Risk Localized Prostate Cancer’.

2003  Award of Merit, American Society of Clinical Oncology, United States. (Research Award)
Awarded for scientific paper: “Hormones may break their bones: is there an increased risk of fracture in men with prostate cancer treated with androgen ablation”.

1998  Award of Merit, American Society of Clinical Oncology, United States. (Research Award)
Awarded for scientific paper: “Development and testing of a new visit-specific patient satisfaction questionnaire: the Princess Margaret Hospital Satisfaction with Doctor Questionnaire (PMH/PSQ-MD)".

NATIONAL
Received

1999  Resident Lecture Award (Nucletron), Canadian Association of Radiation Oncology, Canada. (Research Award)
Awarded for scientific paper: “A population based study of malignant spinal cord compression”.

1994  Award of Merit, Canadian Cancer Society, Canada. (Research Award)
Awarded for outstanding achievement related to Cancer Research.
PROVINCIAL / REGIONAL

Received

1993  
**A. Maxwell Evans Award for Cancer Research**, BC Cancer Agency, Canada. (Research Award)  
*Awarded to top medical applicant to BC Summer Studentship.*

1992  
**J. M. Warren Award for Cancer Research**, BC Cancer Agency, Canada. (Research Award)  
*Awarded to top applicant to BC Summer Studentship.*

1987  
**Scholarship**, Government of British Columbia, Canada. (Distinction)

LOCAL

Received

2014 Jul - 2015 Jun  
**Excellence in Research Leadership**, University of Toronto Department of Radiation Oncology. (Research Award)

1995  
**Aesculapian Award**, Queen’s University, Canada. (Distinction)  
*Awarded for invaluable service to the Queen’s medical school community over M.D. training.*

1995  
**Michael Brown Memorial Award in Oncology**, Queen’s University, Canada. (Distinction)  
*Top Medical Student in Oncology.*

1993  
**Aesculapian Society Award of Merit**, Queen’s University, Canada. (Distinction)  
*Awarded for outstanding service to the society (Queen’s medical student council) during term in office.*

1992  
**Athletic Letter**, Queen’s University, Canada. (Distinction)

1991  
**Deans Honour List**, The University of British Columbia, Canada. (Distinction)

1991  
**Science Scholar**, The University of British Columbia, Canada. (Distinction)  
*One of top 10 in Faculty of Science.*

1991  
**Volkoff Scholarship in Science**, The University of British Columbia, Canada. (Distinction)

1990  
**Charles and Jane Banks Scholarship**, The University of British Columbia, Canada. (Distinction)

1989  
**Carl and Elsie Halterman Scholarship**, The University of British Columbia, Canada. (Distinction)

1987  
**Entrance Scholarship**, The University of British Columbia, Canada. (Distinction)

Student/Trainee Awards

INTERNATIONAL

Received

2016 Jun  
**NOYCIA**, Awardee Name: Joelle Helou. Novartis Oncology Young Canadian Investigator Awards, United States  
*Total Amount: 5,000 USD*

2013 Feb  
**Conquer Cancer Foundation Merit Awards**, Oncology, Primary Author, Awardee Name: Suneil Jain. Conquer Cancer Foundation, United States  
*Total Amount: 1,000 USD*

2004 Jul - 2005 Jun  
**Award of Merit**, Primary Author, Awardee Name: Hanna Carolan. American Society of Clinical Oncology, United States  
*Total Amount: 1,000 USD*
NATIONAL

Received

2009 Jul - 2010 Jun  Travel Award, Primary Author, Awardee Name: Harvey Quon. Canadian Radiation Oncology Foundation
  Total Amount: 2,500 CAD

2009  Award. Genitourinary Cancer Symposium
  Awarded for scientific paper: “Prospective study of pelvic radiotherapy with concomitant hypofractionated accelerated IMRT boost for localized high-risk prostate cancer: Acute and late toxicities”.

2009  First Annual Flims Grant. Canadian Radiation Oncology Foundation, Canada

2009  Research Award. CUOG-AZ, Canada
  Awarded for grant: “Matched control analysis of salvage prostatectomy versus salvage radiotherapy for T1-2 low or intermediate risk prostate cancer”.

2006 Jul - 2007 Jun  CUOG-AstraZeneca Fellowship Award, Primary Author, Awardee Name: Colin Tang. Canadian Urology Oncology Group
  Total Amount: 5,000 CAD

PROVINCIAL / REGIONAL

Received

2013 Jan - 2013 Dec  2013 Applied Health Sciences Co-op Student of the Year. Supervisor, Awardee Name: Perakaa Sethukavalan. University of Waterloo, Ontario, Canada

LOCAL

Received

2013 Jul - 2014 Jun  Summer Student Program Poster Competition, 3rd Prize Evaluative Clinical Sciences, Primary Author, Awardee Name: Perakaa Sethukavalan. Sunnybrook Research Institute
  Total Amount: 200 CAD

2012 Aug - 2013 Jul  SRI poster competition, 3rd place, Supervisor, Awardee Name: Perakaa Sethukavalan. Sunnybrook Research Institute, Toronto, Ontario, Canada
  Research award for summer student for “Improved Wait Time Intervals for Prostate Cancer Patients in a Multi-Disciplinary Rapid Diagnostic Unit Compared to a Community-Based Referral Pattern”.

4. PROFESSIONAL AFFILIATIONS AND ACTIVITIES

Professional Associations

  Member, American Society of Clinical Oncology
  Member, Canadian Association of Radiation Oncologists
  Member, Canadian Medical Association
  Member, Canadian Urologic Association
  Member, Canadian Urologic Oncology Group
  Member, Ontario Medical Association
Administrative Activities

INTERNATIONAL

Agency for Healthcare Research and Quality
2006 Apr - present  **Member**, Technical Expert Panel, Comparison of Local Therapies for Clinically Localized Prostate Cancer, United States.

American Society of Clinical Oncology
2012 Oct - present  **Co-Chair**, Genitourinary Guidelines Advisory Group, United States.
2004 - present  **Member**, Expert Panel, Management of Androgen-Resistant Recurrent or Metastatic Prostate Cancer, Health Services Committee, United States.
2004 - 2013  **Co-Chair**, Expert Panel, Management of Androgen-Resistant Recurrent or Metastatic Prostate Cancer, Health Services Committee, United States.
2002 - 2007  **Member**, Methodology Subcommittee, Health Services Committee
2002 - 2006  **Chair**, Writing Committee, Health Services Committee, United States.  
*Management of Androgen-Sensitive Recurrent or Metastatic Prostate Cancer.*
2002 - 2005  **Member**, Health Services Committee

AstraZeneca
2006 - 2007  **Member**, Global Speaking Bureau
2006  **Faculty**, Futurology 2006, Hamburg, Germany.

NATIONAL

Canadian Association of Radiation Oncology
2004 - 2007  **Co-Chair**, Symptom Control Research (SCORE) Awards
2003 - 2007  **Co-Chair**, Spinal Cord Compression Research Initiative
2003 - 2007  **Member**, Symptom Control Advisory Committee

Canadian Prostate Cancer Research Foundation
2004 Nov - 2005 Mar  **Member**, Scientific and Medical Advisory Committee

Canadian Urologic Oncology Group
2007 - present  **Member**, Executive, Canada.

Medical Career Services, Incorporated
2004 - 2013  **Co-Founder**, Ontario, Canada.
2004 - 2013  **Secretary**, Ontario, Canada.

National Cancer Institute of Canada
2007 - present  **Executive**, Genitourinary Site Group, Canada.
2007 - present  **Co-Chair**, Early Prostate Cancer Disease Oriented Group, Genitourinary Site Group, Canada.
2004 - present  **TSRCC Representative**, Genitourinary Site Group, Canada.
2003 - present  **Member**, Advanced Prostate Cancer Disease Oriented Group, Genitourinary Site Group, Canada.
2001 - present  **Member**, Early Prostate Cancer Disease Oriented Group, Genitourinary Site Group, Canada.
2003 - 2009 Co-Chair, Spinal Cord Compression Research Initiative

Prostate Cancer Canada
2012 Nov - present Member, Health Education Review Committee, Canada.
2009 Sep - 2012 Oct Member, Public and Patient Education Committee, Canada.

PROVINCIAL / REGIONAL

AstraZeneca
2010 Oct 6 Co-Organizer, New Insights 2010
2010 Oct 6 Co-Founder, New Insights 2010
2010 Oct 6 Co-Chair, New Insights 2010
Forty community and academic Urologists, Radiation and Medical Oncologists attended from around Ontario. Three hour event, 4 speakers, 20 hours of planning; $10,000 educational grant obtained from AstraZeneca to run event.

2010 Apr 7 Co-Organizer, GU Conversations, Mississauga.
2010 Apr 7 Co-Chair, GU Conversations, Mississauga.
Fifty Radiation Oncologists and community Urologists attended from around Ontario. Three hour event, 3 speakers, 20 hours of planning; $12,000 educational grant obtained from AstraZeneca to run event.

2009 Oct 6 Co-Organizer, New Insights into Old Controversies in Prostate Cancer

C. Academic Profile

1. RESEARCH STATEMENTS

Improving outcomes for men with prostate cancer.

2. CREATIVE PROFESSIONAL ACTIVITIES STATEMENT

1: Professional Interests
My research and clinical interest is to improve the outcomes of men with prostate cancer through the design and conduct of clinical trials and on the generation of clinical practice guidelines.
Using my formal training and expertise in clinical trial design, conduct and analysis, I have been awarded a number of grants investigating new radiotherapy techniques and hormonal maneuvers. The main thrust of my research was to document the feasibility, tolerability and efficacy of stereotactic ablative radiotherapy (SABR) using standard linear accelerators. Our group is among a few internationally who have been recognized for this paradigm-changing work. Since my last promotion, I am the PI or co-PI on 8 prospective clinical trials: 6 of which have peer-reviewed grants supporting them, 2 of them are randomized controlled trials and one of these is being performed in a multicentre study context.

The foundation of evidence-based medicine is the systematic review and the resultant clinical practice guideline (CPG). The latter is the clinical application of the data on a given topic and is represents the product most likely to represent the truth. As such, these CPGs are widely disseminated and are used for funding decisions and audits of quality of care. Since my last promotion, I have been invited to co-chair both Cancer Care Ontario’s Program in Evidence-Based Care Genitourinary Group and the American Society of Clinical Oncology’s Genitourinary Guidelines Advisory Group. I continue to lead guidelines for the management of androgen-sensitive prostate cancer, management of castrate-resistant prostate cancer and management of malignant spinal cord compression, of which prostate cancer patients are at greatest risk.

2: Impact
Our group has shown that 5 treatments of SABR can be iso-effective and iso-toxic compared to 38 treatments of external beam radiation for low-risk prostate cancer patients. Furthermore, we’ve shown that 33 fewer visits are more convenient for patients, save almost $2,000 in out-of-pocket costs, increase radiotherapy throughput by 7-fold and decrease per patient departmental costs by 80%. As a result, I have been awarded more peer-reviewed funding to further study and refine these approaches, including a national, multicentre, phase 2 randomized study; I have been invited to lead an international consortium on prostate SABR; and I have received various national and international speaking invitations to share our work and vision.

These guidelines have been published in high impact peer-reviewed journals and have led to setting and changing practice standards internationally. The work has been widely cited in top-named journals; I have been invited to speak, join committees and Editorial boards nationally and internationally. Furthermore, I have taken the lead on new questions arising from the work to further strengthen the evidence addressing these topics. An example of this is the multicentre, randomized study of early versus late androgen deprivation therapy (ELAAT). An example where a guideline in which I was senior author has a significant impact on patient and healthcare outcomes was the recent Cancer Care Ontario guideline on the use of low-dose rate brachytherapy. This conclusions of this guideline led to a Cancer Care Ontario funding decision, allow patients with intermediate-risk disease to have access to this highly effective (97% 5-year biochemical control) with only one outpatient treatment (compared to 16-39 treatments).

D. Research Funding

1. GRANTS, CONTRACTS AND CLINICAL TRIALS
PEER-REVIEWED GRANTS

FUNDDED

2016 Jul - 2020 Jun  Co-Principal Investigator. A phase III multi-centre open-label randomized controlled trial of multi-parametric magnetic resonance imaging (MRI)-targeted biopsy compared to systematic trans-rectal ultrasound (TRUS) guided biopsy for the diagnosis of prostate cancer in men without prior biopsy. Prostate Cancer Canada. Translation Acceleration Grant. PI: Klotz, L. Collaborator(s): Haider, M (co-PI), Loblaw, A (co-PI), Milot L, Earle C. 1,500,000 CAD. [Clinical Trials]

2016 Jul - 2017 Jun  Co-Principal Investigator. A phase III multi-centre open-label randomized controlled trial of
multi-parametric magnetic resonance imaging (MRI)-targeted biopsy compared to systematic trans-rectal ultrasound (TRUS) guided biopsy for the diagnosis of prostate cancer in men without prior biopsy. OICR. Clinical Trial Initiative. PI: Klotz, L. Collaborator(s): Haider, M (co-PI), Loblaw, A (co-PI), Milot L, Earle C. 519,399 CAD. [Clinical Trials]

Phase 1/2 study.

Phase 1/2 study.

Phase 2 single institutional study.

Phase 2 study.

Phase 2 study.

Phase 2 study.

phase 2 multicentre study of SBRT for high risk prostate patients.

2013 Jun - 2020 Jun  Co-Principal Investigator. A Randomized Phase II Trial of High Dose-Rate Brachytherapy as Monotherapy in Low and Intermediate Risk Prostate Cancer. abbvie-ACURA Award. PI: Morton, Gerard. Collaborator(s): Loblaw, Andrew; Chung, Hans; Cheung, Patrick, Ravi, Ananth; Nam, Robert. 30,000 CAD. [Clinical Trials]

2011 - 2013  Principal Investigator. Nomogram predicting the 7-year biochemical disease free survival after external beam radiation therapy (EBRT) and androgen deprivation therapy (ADT) for high risk prostate cancer patients. CASARIA. Collaborator(s): D’Souza N, Loblaw DA (SRA), Cheung P, Kattan M. 12,000 CAD. [Grants]

2010 - 2011 **Principal Investigator.** Assessing the Radiosensitizing Capacity of Capsaicin. RACZER. Award. Collaborator(s): Loblaw DA (CPI), Venkatesawaran V, Klotz L, Venier N, Colquhoun A, Fleshner N. 25,500 CAD. [Grants]

2010 - 2011 **Co-Investigator.** Integration of MRI into Prostate Radiotherapy. Motorcycle Ride for Dad. Collaborator(s): Chu W, Loblaw DA (C), Cheung P, Quon H, Haider M, Stanicz G, Cunningham C. 39,000 CAD. [Grants]

2009 - 2010 **Principal Investigator.** Matched control-analysis of salvage prostatectomy (SP) versus salvage radiotherapy (SRT) for T1 or T2 low or intermediate risk prostate cancer. CUOG. Research Award. Collaborator(s): Quon H, Loblaw DA (SRA). 12,500 CAD. [Grants]

2009 **Principal Investigator.** Matched control-analysis of salvage prostatectomy (SP) versus salvage radiotherapy (SRT) for T1 or T2 low or intermediate risk prostate cancer. Canadian Radiation Oncology Foundation. Fellowship Grant. Collaborator(s): Quon H, Loblaw DA (SRA). 5,000 CAD. [Grants]

2007 - 2008 **Principal Investigator.** The role of bound prostate specific antigen in predicting risk of progression in the active surveillance population with low risk localized prostate cancer. CUOG-AstraZeneca. Fellowship Award. Collaborator(s): Tang C, Loblaw DA (SRA), Klotz L. 9,940 CAD. [Grants]

E. Publications

1. MOST SIGNIFICANT PUBLICATIONS

   Based on a systematic review of the literature led by Dr. Loblaw, this clinical practice guideline makes recommendations on the use of systemic therapies for men with castrate resistant prostate cancer. This will help refine current practice and set practice standards in North America and globally.

   This reports our group’s 5-year prospective phase I/II experience with stereotactic ablative radiotherapy for low-risk prostate cancer. It is the only series to only use standard linear accelerators and one of the largest and longest series reported to date of SABR for prostate cancer. 12 citations (Google Scholar Aug 2014).

Evidence-based medicine lies in the centre of high-quality provision of care. However, there are many areas where there exists uncertainty and limited evidence where traditional systematic reviews of the literature cannot be performed. This methodologic paper describes ASCO’s development of guidelines on topics for which limited evidence is available by using a formal consensus process. 17 citations (Google Scholar Aug 2014).

This reports our group’s early phase I/II experience with stereotactic ablative radiotherapy for low-risk prostate cancer. It is the only series to only use standard linear accelerators and one of the largest and longest series reported to date of SABR for prostate cancer. 45 citations (Google Scholar Aug 2014).

This work systematically identified, collected and synthesized the evidence on the initial use of androgen deprivation for defined groups of men with prostate cancer. This refined current practice, particularly surrounding the issue of bicalutamide combined androgen blockade and the timing of androgen deprivation therapy for the disease population. 336 citations (Google Scholar Aug 2014).

This work systematically identified, collected and synthesized the evidence on the management of malignant spinal cord compression. This is an update of one of the first evidence-based guidelines produced on this topic (created by the author) and further refined current practices, particularly surrounding the role of surgery versus radiotherapy. 240 citations (Google Scholar Mar 2015).

This work systematically identified, collected and synthesized the evidence on the initial use of androgen deprivation for defined groups of men with prostate cancer. This refined current practices but also identified gaps in research knowledge to focus future research efforts. 182 citations (Google Scholar Mar 2015).

This was the first population-based study of malignant spinal cord compression (MSCC) published. This work reported the risk of MSCC in the last five years of life and set the stage for risk-based interventions to prevent the neurologic sequelae of MSCC. 193 citations (Google Scholar Mar 2015).

This was the first outpatient satisfaction with physician questionnaire. It was short, clear and demonstrated strong reliability and validity testing. 88 Citations (Google Scholar Mar 2015).

This work systematically identified, collected and synthesized the evidence on the management of malignant spinal cord compression. This was the first evidence-based guideline of malignant spinal cord compression (MSCC) published in the literature. Google Scholar (Mar 2015): 356 citations.

H. Creative Professional Activities

1. PROFESSIONAL INNOVATION AND CREATIVE EXCELLENCE

2013 Jul 1 - present  Improving Outcomes through Clinical Trials for Men with Prostate Cancer. Using my formal training and expertise in clinical trial design, conduct and analysis, I have been awarded a number of research grants investigating new radiotherapy techniques and hormonal maneuvers. The main thrust of my research work was to document the feasibility, tolerability and efficacy of stereotactic ablative radiotherapy (SABR) using standard linear accelerators. Our group is among a few internationally who have been recognized for this paradigm-changing work. Since my last promotion, I am the PI or co-PI on 8 prospective clinical trials: 6 of which have peer-reviewed grants supporting them, 2 of them are randomized controlled trials and one of these is being performed in a multicentre study context. We’ve shown that 5 treatments of SABR can be iso-effective and iso-toxic compared to 38 treatments of external beam radiation for low-risk prostate cancer patients. Furthermore, our group has shown that 33 fewer visits is more convenient for patients, saves that almost $2,000 in out-of-pocket costs, increases radiotherapy throughput by 7-fold and decreases per patient departmental costs by 80%. As a result, I have been awarded more peer-reviewed funding to further study and refine these approaches, including a national, multicentre, phase 2 randomized study; I have been invited to lead an international consortium on prostate SBRT; and I have received various national and international speaking invitations to share our work and vision.

2000 Aug - 2007 Jun  Medical Career Guidance Summary. Career selection is the single most stressful factor in medical students’ lives. Despite this, there was no nationally available career guidance program to address the students’ needs. When I moved to Toronto in 1995 to begin my residency, I co-founded the Medical Advancement Steering Committee (MASC), to address an unmet need for career guidance for the University of Toronto medical students. My Office of Student Affairs colleagues and I hired a project coordinator to develop a University of Toronto guide that was published in 1998 after securing sponsorship from the Canadian Medical Association and MD Management.
My role continued after I became Staff at the Toronto Sunnybrook Regional Cancer Center (now Odette Cancer Centre). Responding to numerous emails and verbal requests for the University of Toronto guide, MASC hired a series of project coordinators to develop a handbook that address the career needs of Canadian medical students. Included in the work were focus groups with students to identify their specific needs; developing and administering questionnaires for Program Directors about aspects of candidates that were highest regarded; engaging and coordinating a legion of medical student volunteers to write the specific book chapters on every direct entry residency program available in Canada; partnering with CaRMS to reproduce vital match statistics and Program Director Surveys; and performing exit interviews with graduating medical students on strategies they found most valuable in the CaRMS Match. In February 2001, we released the second edition of Taking Control of Your Future Medical Career, again with sponsorship from the CMA and MD Management.

MASC provided a copy to every English-speaking senior medical student in Canada distributed by the Canadian Federation of Medical Students (CFMS) and have sold over 1500 additional copies of the 2nd edition. As a result, I have been invited to present at the 2002 and 2003 Ontario Medical Student Weekends as well as at several universities.

I gained approval to survey Ontario Postgraduate Medical Residency Directors in 2003, hired a student to perform the work and oversaw data collection and analysis.

In 2004, two medical residents and I incorporated Medical Career Services, Inc (MCSI), on which I currently serve on the Board of Directors as Secretary and Director of Research. The objectives of MCSI are to produce high-quality research required for medical student career decision-making; to disseminate this data through lectures, web and print-based media; to provide consultation to medical schools on career decision-making resources and programs; and to liaise with financial partners and students to augment student financial knowledge and security.

MCSI partnered with RBC Insurance to produce the 3rd edition. I was Editor-in-Chief of this edition of which 2000 copies were printed in January 2005. Significant improvements were made to this edition in terms of layout, graphics, content and comprehensiveness of data. Most notable is that all Residency Program data were reviewed and approved by the respective Program Directors and their Postgraduate Medical Education Deans. Again, a copy was provided free to every English-speaking senior medical student in Canada distributed by CFMS representatives and all additional copies have been sold, some to students from the United States, Israel and Saudi Arabia.

I stepped down as Editor-in-Chief for the 4th edition, but remained on the Editorial Board. Data was updated and most significantly this edition was published in English and French in August 2006. A free copy has been provided to every senior medical student in Canada. Sales of the other copies are ongoing.

A website (www.medcareerservices.com) has been developed (currently under construction) and a national speaking series on career and financial planning for medical students has been established.

2. CONTRIBUTIONS TO THE DEVELOPMENT OF PROFESSIONAL PRACTICES

2013 Jul - present Improving the Quality of Care for Prostate Cancer.

The foundation of evidence-based medicine is the systematic review and the resultant clinical practice guideline (CPG). The latter is the clinical application of the data on a given topic and is represents the product most likely to represent the truth. As such, these CPGs are widely disseminated and are used for funding decisions and audits of quality of care. Since my last promotion, I have been invited to co-chair both CancerCare Ontario’s Program in Evidence-Based Care Genitourinary Group and the American Society of Clinical Oncology’s Genitourinary Guidelines Advisory Group. I continue to lead guidelines for the management of androgen-sensitive prostate cancer, management of castrate-resistant prostate cancer and management of malignant spinal cord compression, of which prostate cancer patients are at greatest risk.

These guidelines have been published in peer-reviewed journals of international stature and
have led to setting and changing practice standards internationally. The work has been widely cited in top-named journals; I have been invited to speak, join committees and Editorial boards nationally and internationally. Furthermore, I have taken the lead on new research questions arising from the work to further strengthen the evidence addressing these topics. An example of this is the multicentre, randomized study of early versus late androgen deprivation therapy (ELAAT). An example where a guideline in which I was senior author has a significant impact on patient and healthcare outcomes was the recent CancerCare Ontario guideline on the use of low-dose rate brachytherapy. This conclusions of this guideline led to a CancerCare Ontario funding decision, allow patients with intermediate-risk disease to have access to this highly effective (97% 5-year biochemical control) with only one outpatient treatment (compared to 16-39 treatments).

CURRICULUM VITAE
THOMAS S. MCGOWAN MD MBA FRCPC

June 6, 2012
Name: **McGowan, Stanley, Thomas**

Title: Chief of Radiation Oncology  
Carlo Fidani Peel Regional Cancer Centre  
Credit Valley Hospital

Address: 2200 Eglinton Avenue West  
4th floor Administration  
Mississauga, ON L5M 2N1  
Phone 905-813-1100 x5000  
Fax 905-813-3962

E-mail: tmcgowan@cvh.on.ca

DOB: Nov. 20, 1960

**ADMINISTRATION POSITIONS**

July 2007 to Present  
Clinical and IS Consultant  
Pathology Checklist Reporting Project-Cancer Care Ontario  
Stage Capture Project Leadership Team-Cancer Care Ontario

April, 2005 to June 2007  
Clinical Lead  
Pathology Checklist Reporting Project-Cancer Care Ontario  
Stage Capture Project Leadership Team-Cancer Care Ontario

January, 2004 to Present  
Head of Radiation  
Credit Valley Hospital

September, 2003 to January 2004  
Head Clinical Programs  
Director, Analytic Unit  
Cancer Care Ontario

January, 2001 to June 2003  
President, Medical Director and Founder  
Canadian Radiation Oncology Services

Staff Radiation Oncologist  
Princess Margaret Hospital

April, 2000 - January 2001  
Executive Vice-president  
Cancer Care Ontario

January 1998 - March, 2000  
Coordinator Radiation Treatment  
Cancer Care Ontario
DEGREES, DIPLOMAS, LICENSURE
1995  MBA, University of Toronto
1991  Fellow, Royal College of Physicians of Canada (Radiation Oncology)
1987  General License State of Georgia
1986  General License Province of Ontario
1985  MD, Queen’s University, Kingston, Ontario
1982  BSc, Queen’s University, Kingston, Ontario

POSTGRADUATE TRAINING/EXPERIENCE
Radiation Oncology  1990 – 1991  Chief Resident in Radiation Oncology, University of Toronto, Radiation Oncology Training Program
1988-1990  Resident in Radiation Oncology, University of Toronto
General Practice  1986-1988  General Practice, Locums, Ontario and Quebec
Internal Medicine  1985-1986  Internship, Montreal General Hospital, McGill University, Montreal, Quebec

COURSES TAKEN
August, 1998  Medical Informatics A – American College of Physician Executives
A two day course on information technology as it applies to healthcare.
August, 1998  Financial Decision Making – American College of Physician Executives
A four day course on financial analysis and decision making as it applies to healthcare.

UNIVERSITY AND HOSPITAL APPOINTMENTS
University  1991- 1999  Lecturer
Department of Radiation Oncology,
Faculty of Medicine, University of Toronto
1996 - 1999  Lecturer (Cross appointed)
Department of Health Administration
Faculty of Medicine, University of Toronto

1999 – Present Assistant Professor (Cross appointed)  
Department of Radiation Oncology  
Department of Health Administration  
Faculty of Medicine, University of Toronto

**Hospital**  
May, 2004-Present  
Chief, Staff Radiation Oncologist, Credit Valley Hospital

May, 04  June 05  Grand River Regional Cancer Centre, Staff Radiation Oncologist

Sept, 2004-Present  
Staff Radiation Oncologist, Trillium Health Centre

Jan, 2005-Present  
Staff Radiation Oncologist, William Osler Health Centre, Mississauga Site

March, 2001 - Sept, 2003  
Staff Radiation Oncologist, Canadian Radiation Oncology Services - Consultant Radiation Oncologist, Toronto – SunnyBrook Regional Cancer Centre, SunnyBrook and Women’s Health Science Centre

March, 2001-2006  
Consultant Radiation Oncologist, Princess Margaret Hospital

October 1991 - Mar 01  
Staff Radiation Oncologist, Department of Radiation Oncology, Princess Margaret Hospital (1991 – March 2001)

1991-1999  
Consultant Radiation Oncologist, Marvelle Koffler Breast Centre, Mount Sinai Hospital

**ADMINISTRATION/COMMITTEE WORK**

**Departmental**  
July 04 – present  
Chair, DRO Executive Committee

July 04 – present  
Chair, DRO Staff Committee

July 04 – present  
Chair, Peel Radiation Oncologists, Executive

2004 – present  
Member, PRCC Radiation Therapy technical Policy group
2004 – present Member, PRCC Executive Committee

2004 – present R.O. Rep, PRCC Radiation safety and monitoring Committee

1994 - 1995 Member at large, Partnership Executive, Radiation Oncologists

**Hospital**

Feb 04 – present Head, PRCC Department of Radiation Oncology

2004 – 2005 Member, Grand River Cancer Centre IMRT Committee

2004 – present Member, PRCC IM/IT Committee

Nov 96 – May 99 Chair, Radiation Services Quality Management Committee (PMH)

Jan 98 – Sept. 98 Chair, Cancer Committee, PMH
Vice-chair, TTH MAC
Member, Board of Directors, TTH
Member, Standing Committee on Oncology, TTH
Member, TTH Board Quality Subcommittee
Member, Joint University Hospital Relations Committee, TTH

Aug. 97 – Dec. 97 Chair, PMH Medical Advisory Committee (MAC)
Vice-chair, The Toronto Hospital (TTH) MAC
Member, Board of Directors, TTH/PMH
Member, Standing Committee on Oncology, TTH/PMH
Member, TTH Board Quality Subcommittee
Member, Joint University Hospital Relations Committee, TTH

Jan. 97 - July 97 President, PMH Medical Staff Association,
Member, Board of Directors PMH

July 96 - May 97 Chair, Radiation Services Accreditation Team (PMH)
Member, Hospital Accreditation Planning Committee (PMH)

July 96 - Nov 96 Member, Radiation Services Quality Management Committee (PMH)

Jan. 95 - Dec. 96 Vice President, Medical Staff Association (PMH)
Member, Medical Advisory Committee (PMH)
<table>

American College of Physician Executives

**EDITORIAL BOARD, PEER REVIEW**

2007 Invited to peer review a paper submitted for publication. 
Radiotherapy & Oncology, Journal of the European Society for 
Therapeutic Radiology and Oncology

**LECTURES GIVEN**

*Invited Speaker*
Speaker, Winter COMP School, “Improving Quality in Clinical Practice”, Whistler, B.C., 

Speaker, Varian Medical Systems, “Upgrade Readiness: Preparing your Center”, Las Vegas, 

Speaker, Varian Medical Systems, “Radiation Oncology in a Paperless Environment”, Montreal, 
Quebec, January 20, 2010.

Speaker, Varian Medical Systems, “Radiation Oncology in a Paperless Environment”, 
Minneapolis, Minnesota, April 23, 2009

Speaker, Sanofi-Aventis, to The Departments of Medical and Radiation Oncology, and Urology of
The Credit Valley Hospital, “A discussion on the DART/NCICCTG PR.12 Study”, (Neoadjuvant Docetaxel and Androgen Suppression plus Radiation Therapy vs Androgen Suppression alone plus Radiation Therapy for High Risk Localized Adenocarcinoma of the Prostate).

Speaker, Webinar for VARIAN, Information Management in a Paperless Environment, January 18, 2008

Up-regulation of the Humanism in Science, A lecture series offered by the University of Toronto Department of Radiation Oncology as part of the EIRR21, Transdisciplinary Training Program. Leadership in Collaborative Groups, Oct 19, 2004 through May 10, 2005.

Capacity and Resource Constraints in the Delivery of Radiation in Ontario, Ontario Radiation Oncology Genito-urinary site group annual retreat, September 1999.

Informatics at Cancer Care Ontario, Community Oncologists of Metro Toronto Annual Retreat, July 1999.

Cancer Care Ontario and the Funding of Cancer Services How to Balance Cost, Access and the Availability of All Treatment Options for Patients with Prostate Cancer Cost Challenges and Conflicts in Cancer Care, Continuing Education Program, Faculty of Medicine, University of Toronto, June 1999.

Remuneration Models in Radiation Oncology, Ontario Medical Association Section of Radiation Oncology Symposium, May 1999.

Radiation Oncology in Ontario, Ontario Hospital Association Conference on Cancer Care Ontario, Toronto Ontario, February 1999.

Principles of Radiation Therapy, Preceptorship program at Mount Sinai Hospital, Toronto,

**Cost and Value Considerations in Treatment Verification**
Refresher course, "Translating Physics into Clinical Practice" University of Toronto, Department of Radiation Oncology, November 1996.

**Conservative Management of Multiple Invasive Foci of Breast Cancer,** Interdepartmental Division of Oncology Breast Cancer Rounds, University of Toronto, Faculty of Medicine, December 1995.

**Potential Benefits of Conformal Therapy,** Refresher course, "Selected Topics in Radiation Oncology", University of Toronto, Department of Radiation Oncology, May 1992.

**LECTURES GIVEN**

Credit Valley Hospital, Presentation to Physicians and other Medical Personnel, Topics in Prostate Cancer Management from the Perspective of Radiation Oncology, January 2009
Windsor Regional Hospital, April 2007.
Grand River Hospital, May 2007.
Princess Margaret Hospital/University Health Network, June 2007.
Credit Valley Hospital, Presentations to Clinical and Administrative staff: The Current Status, and Future Direction of Cancer Care Ontario’s Stage Capture Project, July 2007.
Kingston General Hospital, April 2007.
Thunder Bay Regional Hospital, April 2007.

Credit Valley Hospital, Presentations to Clinical and Administrative staff: Update from the Provincial Pathology Checklist Reporting Project and 2007 Indicator Results, April 2007.

**Health Sector Strategy and Organization,** Joseph L. Rotman School of Management (MBA) University of Toronto, October 12, 2006, October 01, 2007.

**Principals of Radiation Oncology,** Teaching to medical oncologists, and residents, 2000 to 2003.

**Accreditation, and Quality Management in Radiation Services at Princess Margaret Hospital** Department of Radiation Oncology Rounds, University of Toronto, Department of Radiation Oncology, April 1997.
Quality Assurance in Radiation Oncology, Department of Radiation Oncology Rounds
University of Toronto, Department of Radiation Oncology, March 1996.

Risk Factors for Lawsuits in Breast Cancer, Princess Margaret Hospital, Breast Cancer Rounds,
May 1994.

Multi-Leaf Collimators and Portal Imaging, Department of Radiation Oncology Rounds
University of Toronto, Department of Radiation Oncology, February 1993.

Review of the Hormonal Management of Prostate Cancer, Princess Margaret Hospital, Genito-

PANEL DISCUSSION PARTICIPANT
Graduate Department of Health, Policy, Management and Evaluation, University of
Toronto, January 8, 2004 Expert panelist – HAD5020: Canada’s Health System and Health
Policy II

The 3rd HEALNet Annual General Meeting, Toronto, November 1997
Panel discussion – Using Information to Increase Health Care Organizations’ Performance

Profits and Patients, Annual Round Table Discussion, Canadian HealthCare Manager,
Toronto, Published April 2002, http://www.chmonline.ca/

Research Grants

Currently Funded as Principle Investigator
Benjaafar N, Da Motta N, Glenn GW, Mahantshetty U, McGowan TS, Sarria G, Van Wijk L,
Zubizaretta E. Optimizing treatment of cervix cancer using radiotherapy and analysis of virally
associated cellular resistance, (Study E.3.30.24)Cervix(4-arm randomized trial testing chemo-
radiation plus HDR brachytherapy for survival, toxicity and tumour markers, multi-national
study. International Atomic Energy Association (IAEA). USD $300,000.00.

Previously Funded as Co-Investigator
Patient-centred cancer care at Princess Margaret Hospital. Philanthropic Gift, $500,000.00,

CLINICAL TRIALS

Feb 2009 A National “Patterns of Care” Study in Prostate Cancer Radiation Therapy, Feb
10, 2009 to Feb 9, 2010.

June 2007 Social, Prognostic and Therapeutic Factors Association with Breast Cancer
June 2005 Nursing and Oncologist Survey, “Meeting the Needs of the Cancer Patients and Families: Today and Tomorrow: Oncology Nurse Demographics and Clinical Role Functions. Patients selected by Dr. T. McGowan for survey/interview by Toronto Sunnybrook team.

Nov. 2004 Harnessing consumerism in Health and Healthcare: User tracking and analysis of publicly reported cancer treatment wait lists. Patients selected by Dr. T. McGowan for survey/interview by Toronto Sunnybrook team.

Education

Undergraduate Education
1965 – 1969 Queen’s University of Belfast
Distinctions: Prize Exams in Surgery and Pathology

Postgraduate Medical Training
1969 – 1970 Royal Victoria Hospital, Belfast

Biographical Information

Degrees
1969 M.B., B.Ch., B.A.O. QUB
1974 M.D. (by Thesis) QUB
1977 F.R.C.S.E. Edinburgh
1982 F.F.R., R.C.S.I. Dublin
1988 F.R.C.P. (C) Ottawa, Canada

Appointments
1969 – 1970 House Officer (Pre-Registration)
Royal Victoria Hospital, Belfast
1970 – 1973 Research Fellow, Department of Pathology, QUB.
1973 – 1979 Northern Ireland Surgical Rotation
1979 – 1984 Northern Ireland Radiotherapy Centre
Residency Program in Radiation Therapy
1984 – 1985 Consultant Radiotherapist
Derby Royal Infirmary, Derbyshire, England.
1985 – 1991 Radiation Oncologist
Ontario Cancer Treatment and Research Foundation/TBRCC
Director of the School of Radiotherapy.
1991 – present Radiation Oncologist, Princess Margaret Hospital, Toronto
Assistant Professor, University of Toronto

Professional Affiliations and Activities
1994 – present Senior Editor, Current Oncology
2004 – present Member, University Health Network (UHN) Research Ethics Board
(Princess Margaret Hospital)
Publications

Thesis
M.D. Thesis, Queen's University, Belfast, 1974.
"Studies in the Aetiology and Morbid Anatomy of Congenital Heart Defects" (induced by radiation therapy and temperature variations in the developing chick embryo).

1. EDUCATION

Degrees
1993 - 1996 May MD, Dept of Medicine, The University of Calgary, Calgary, Alberta, Canada
1990 - 1993 Biochemistry, microbiology and immunology, University of Ottawa, Ottawa, Ontario, Canada

Postgraduate, Research and Specialty Training
2001 - 2003 Research Fellow PGY6-7, Radiation Oncology, Radiation Oncology Branch, National Cancer Institute, National Institutes for Health, Department of Health and Human Services, Bethesda, Maryland, United States
2000 - 2001 Resident PGY4-5, Radiation Oncology, Cross Cancer Institute, University of Alberta, Edmonton, Alberta, Canada
1996 - 2000 Resident PGY1-4, Radiation Oncology, The University of Manitoba, Winnipeg, Manitoba, Canada

Qualifications, Certifications and Licenses
2004 - present License, College of Physicians and Surgeons of Ontario, 74547
2001 - present Certification, Radiation Oncology, American Board of Radiology, United States, 48567
2001 - present Fellow (FRCPC), Radiation Oncology, Royal College of Physicians and Surgeons of Canada, 528438
2011 - 2012 Telemedicine Consultation License, College of Physicians and Surgeons of Newfoundland and Labrador
2002 - 2005 License, Maryland Board of Physicians, D0059048
2001 Fellow, Radio-oncologie, College des Medecins du Quebec
2000 - 2001 License, College of Physicians and Surgeons of Alberta
2000 Certification, United States Medical Licensing Examinations, United States
2. EMPLOYMENT

Current Appointments

2012 Nov - present  Affiliated Faculty, TECHNA Institute for the Advancement of Technology for Health, Toronto, Ontario, Canada
2009 - present  Associate Professor, Radiation Oncology, University of Toronto
2006 - present  Associate Member, Institute of Medical Science, University of Toronto
2004 - present  Clinician Scientist, Radiation Medicine Program, Princess Margaret Hospital

Previous Appointments

HOSPITAL
2003 - 2004  Staff Clinician, National Cancer Institute, National Institutes of Health, Department of Health and Human Services, United States

UNIVERSITY - RANK
2004 - 2009  Assistant Professor, Radiation Oncology, University of Toronto

WORK INTERRUPTIONS
2011 Jul - 2012 Jan  Maternity Leave, Radiation Medicine Program, University of Toronto, Princess Margaret Hospital, Ontario, Canada

3. HONOURS AND CAREER AWARDS

Distinctions and Research Awards

INTERNATIONAL
Received

2010  Judith Stitt Best Papers Award, American Brachytherapy Society (ABS). (Research Award)

2009  Transactions on Biomedical Engineering (TBME) best paper award for most citations in the last 5 years, IEEE Engineering in Medicine and Biology Society. (Research Award)

2005  International Travel Grant, American Society for Therapeutic Radiation Oncology. (Distinction)
Cynthia MéNARD

2003 Outstanding Clinical Scholar-in-Training Award, American Association for Cancer Research - GlaxoSmithKline. (Research Award)
For: Radiation alters serum proteomic patterns.

NATIONAL Received

2007 - 2012 New Investigator Award, Canadian Institutes of Health Research. (Research Award)
For: Individualized therapy for patients with prostate cancer by integrating interventional MRI in the radiotherapy planning process.

2004 Fellows Award for Research Excellence, National Institutes for Health. (Research Award)
For: Radiation alters serum proteomic patterns.

2001 - 2003 Translational Research Award, National Cancer Institute - American Society for Therapeutic Radiation Oncology. (Research Award)
For: Magnetic resonance and molecular profiling of prostate cancer.

2000 First Prize, Resident Research Podium Presentation, Canadian Association of Radiation Oncology. (Research Award)
For: Proton Magnetic Resonance Spectroscopy of Prostate Biopsies after RT.

1993 Science Scholarship, National Research Council Canada. (Distinction)

1990 - 1992 Scholarship of Canada for Science. (Distinction)

LOCAL Received

2008 Most Influential Research Publication - Radiation Medicine Program, Princess Margaret Hospital. (Research Award)

2006 Outstanding Research Potential Award, Department of Radiation Oncology, University of Toronto. (Distinction)

2003 Technology Transfer Award, National Cancer Institute - Center for Cancer Research. (Distinction)

2000 RJS and Ada Maude Wright Memorial Prize in Radiation Oncology, University of Alberta. (Distinction)

1996 Sandoz Prize in Medicine, The University of Calgary. (Distinction)
For achievement in Radiation Oncology.

1990 - 1992 Excellence Scholarship, University of Ottawa. (Distinction)

Teaching Awards

LOCAL Received

2009 Best Radiation Medicine Program Rounds, Dept of Radiation Oncology, Faculty of Medicine, Princess Margaret Hospital
For: iMRI Sim-Ending an Era of Radiation Therapy Blind to Prostate Cancer.

2006 Best Radiation Medicine Program Rounds, Dept of Radiation Oncology, Faculty of Medicine, Princess Margaret Hospital

2003 Teacher of the Year Award, Association of Residents in Radiation Oncology. (Postgraduate MD)
For teaching at: Resident Training Program, National Cancer Institute - Radiation Oncology
4. PROFESSIONAL AFFILIATIONS AND ACTIVITIES

Professional Associations

- **Member**, American Brachytherapy Society
- **Member**, American Society for Therapeutic Radiology and Oncology
- **Member**, Canadian Association for Radiation Oncology
- **Member**, Canadian Urologic Oncology Group
- **Member**, European Society for Therapeutic Radiology and Oncology
- **Member**, International Society for Magnetic Resonance in Medicine

Administrative Activities

INTERNATIONAL

**European Society for Therapeutic Radiation Oncology**
- 2010 Jul - present  
  MRI for Physicists Course (Annual), Faculty of Medicine, Dept of Radiation Oncology, Faculty Development

**AdMeTech Foundation**
- 2010  
  **Member**, Advisory Committee
- 2008  
  **Member**, Program Committee

NATIONAL

**Other Organizations**
- 2011 Jul - present  
  NaF MITNEC Study Executive Committee, Canada.

**Alberta Radiosurgery Center**
- 2007  
  **Program External Reviewer**, External Review, Alberta, Canada.

**Canadian Association of Radiation Oncology / Canadian Organization of Medical Physicists**
- 2007  
  **Chair**, Pre-conference Symposium, Faculty of Medicine, Dept of Radiation Oncology, Canada.

PROVINCIAL / REGIONAL

**Cancer Care Ontario**
- 2008  
  **Member**, MRI Simulator Advisory

LOCAL

**Radiation Medicine Program**
- 2011 - present  
  Interventional Radiotherapy Process Committee, Toronto, Ontario, Canada.
Princess Margaret Hospital
2010 - present Imaging Committee, Radiation Medicine Program, Toronto, Canada.

University of Toronto
2008 - present Member, Residency Competency Examination Committee, Faculty of Medicine, Dept of Radiation Oncology, Postgraduate MD, Ontario, Canada.

KEY OPINION LEADERS MEETING
2010 Aug Participant. Clinical Indications for MRI Linac. Elekta, Netherlands

C. Academic Profile

1. RESEARCH STATEMENTS

STATEMENT OF SCHOLARLY AND PROFESSIONAL ACTIVITY.
The primary focus of my scholarly activity is to better individualize radiation therapy through
the development, validation, and clinical application of magnetic resonance imaging
techniques to radiation treatment planning, response assessment, and treatment adaptation.
I have specifically invested my efforts to improving radiotherapy to the brain and for prostate
cancer.

Improving Radiotherapy with MRI.
The role of magnetic resonance imaging in radiation oncology has long been expected to
bring improvements in targeting and assessment of radiation therapy. While the rationale
for these benefits draws upon the quality of MR images in depicting unique spatial and
biological characteristics of tissue targets for radiotherapy, the conversion of these perceived
benefits into robust and routine use of this modality in radiation oncology has been slow and
fragmented. This is in part due to complexities in the science and clinical practice of MRI,
and requires a focused dedicated effort for judicious integration in radiation oncology.

My activities in this newly emerging fields range from leadership in policy and infrastructure
development, to the design and oversight of educational programs, and finally to a body of
research which addresses unmet clinical needs in radiotherapy. Examples of such unmet
needs include: defining the target for radiotherapy after prostatectomy, characterizing organ
motion for radiotherapy planning, validating the spatial integrity of MRI-defined radiotherapy
targets, developing registration techniques for integration of MR images in radiotherapy,
validating MRI measures of tumor hypoxia, quantifying user uncertainties in MRI target
delineation, and exploring early MRI metrics of tissue response to radiotherapy.

Interventional MRI for Prostate Cancer.
This work is focused, first and foremost, on a pressing need to better tailor therapeutic
interventions for individual patients with prostate cancer. An ability to visualize the spatial
extent and biological profile of cancers within the prostate gland may address issues of
biopsy sampling error, enable appropriate patient selection for local therapy, guide local
therapy to the disease rather than to the entire prostate gland, and provide a non-invasive means of monitoring progression or response to therapy. To address this need, I have implemented a clinical and research program to develop and test novel techniques in interventional MRI.

Interventional MRI techniques specifically aim to precisely guide needles for biopsy and therapy into specific areas of suspected cancer burden within the prostate gland during the MRI examination. The program includes investigations in technical development, and well as clinical testing of both technical performance and clinical performance of MRI-guided prostate biopsy and MRI-guided prostate brachytherapy.

D. Research Funding

2006 - 2007 **Associate Director**, Residency Training Program, Faculty of Medicine, Dept of Radiation Oncology, Postgraduate MD

**Member**, DRO Executive Committee

### Other Research and Professional Activities

#### RESEARCH PROJECT

**2012 Feb**

Retrospective analysis of radiosurgery for brainstem metastases.

**2011 Jun**

1200-36 BIBW 2992 with or without daily temozolomide in the treatment of patients with recurrent malignant glioma.

**2011 May**

**Co-Investigator.** A Phase II Study of PX-866 in patients with Glioblastoma Multiforme at time of first relapse or progression. Collaborator(s): PI: Mason W, Laperriere N, Sahgal A, Co-In Millar BA, Williams L.

**2008 Jul**

**2008**

A proposal to investigate the relationship between treatment complications and radiosurgery dose-volume histograms (DVH_s) in patients with brain metastases treated with the Perfexion Radiosurgery System. Collaborator(s): PI: Sahgal A, Millar BA.

**2006 Oct**

*Pilot study with Phase I & II in development.*

**2005 - 2007**

*Sponsor: Canadian Brain Tumour Consortium.*

Neurocognitive late effects in adult survivors of childhood acute lymphoblastic leukaemia (ALL). Collaborator(s): Edelstein K, Hodgson D, Laperriere N, Millar BA, Nathan P, Spiegler B.

---

### STUDIES

**2010 Feb 4**

**Collaborator.** Phase III trial on Concurrent and Adjuvant Temozolomide chemotherapy in non-1p/19q deleted anaplastic glioma. The CANTON Intergroup trial. Collaborator(s): PI: Mason, Col’: Laperriere N, Menard C, Sahgal A, Millar BA.

*Protocol Number: CEC.1.*

**2010 Jan 14**

**Collaborator.** A Phase I study of Mk-0752, a Notch Inhibitor, in Patients with Metastatic or Locally Advanced Breast Cancer and Other Solid Tumors. Collaborator(s): PI: Mason, Col’: Laperriere N, Menard C, Sahgal A, Millar BA.

*Protocol Number: MK-0752-014.*
2009 Dec 18 **Collaborator.** A randomized, double blind, placebo controlled, multicenter Phase III trial of bevacizumab, temozolomide and radiotherapy, followed by bevacizumab and temozolomide versus placebo, temozolomide and radiotherapy followed by placebo and temozolomide in patients with newly diagnosed glioblastoma. Collaborator(s): PI: Mason, Col': Laperriere N, Menard C, Sahgal A, Millar BA.  
*Protocol Number: BO21990.*

2009 Oct 9 **Collaborator.** BIBW 2992 with or without daily temozolomide in the treatment of patients with recurrent malignant glioma. Collaborator(s): PI: Mason, Col': Laperriere N, Menard C, Sahgal A, Millar BA.  
*Protocol Number: BI 1200.36.*

2009 Sep 14 **Collaborator.** A Phase I Study Evaluating the Safety, Tolerability and Pharmacokinetics of ABT-888 in Combination with WBRT in Subjects with Brain Metastases. Collaborator(s): PI: Dr. Brade. Col: Millar BA.  
*ABT-888.*

2008 Aug 30 **Collaborator.** Hypofractionated and Adaptive Stereotactic Radiotherapy (HFA-SRT) for Large-Burden Oligometastases to the Brain. Collaborator(s): PI: Dr. Menard. Col: Millar BA.  
*No protocol #.*

2008 Aug 6 **Collaborator.** Evaluating the feasibility and clinical impact of telemedicine for consultation and follow up in patients referred for palliative radiotherapy. Collaborator(s): PI: Dr. Wong. Col: Millar BA.  
*No protocol #. Protocol submitted to Ethic board for approval.*

2007 Oct 1 **Collaborator.** A Randomized Phase III Study of Temozolomide and Short-Course Radiation Versus Short-Course Radiation Alone in the Treatment of Newly Diagnosed Glioblastoma Multiforme in Elderly Patients. Collaborator(s): PI: Menard C. Col’s: Laperriere N, Mason, Sahgal A, Millar BA.  
*Protocol Number: CE.6.*

2007 Aug 23 **Collaborator.** Phase III Randomized Trial of Whole Brain RT in Addition to Radiosurgery in Patients with 1-3 Cerebral Mets. Collaborator(s): PI: Dr. Menard Col: Millar BA.  
*N0574.*

2007 May 22 **Collaborator.** Treatment of Patients with Newly Diagnosed Medulloblastoma, Supratentorial Primitive Neuroectodermal Tumor, or Atypical Teratoid Rhabdoid Tumor. Collaborator(s): PI: Dr. Laperriere Col: Millar BA.  
*PEDS: (Sick Kids study). protocol #SJMB03.*

*Protocol number: CE.5.*

**Collaborator.** A Phase 2 Non-Comparative Randomized Open-Label Study of Multiple Regimens of Single-Agent XL184 in Subjects with Grade IV Astrocytic Tumors in First or Second Relapse. Collaborator(s): PI: Mason, Col': Laperriere N, Menard C, Sahgal A, Millar BA.  
*Protocol Number: XL184-205. Not Opened.*

**Principal Investigator.** Construction and Testing of A Symptom Checklist for Patients with Brain Metastases. Collaborator(s): PI: Millar BA.  
*Protocol number: 06-0016-CE.*

**Principal Investigator.** Reevaluating the Feasibility and Clinical Impact of Telemedicine for Consultation and Follow Up in Patients Referred for Palliative Radiotherapy. Collaborator(s): PI: Millar BA.  
*Protocol number: 08-0579-BE.*
C. Research Funding

1. GRANTS, CONTRACTS AND CLINICAL TRIALS

PEER-REVIEWED GRANTS

Funded

2013 Jul - 2014 Jun  

2011 Jul - 2014 Jun  
**Collaborator.** Feasibility of a prospective, randomized trials comparing surgery versus radiosurgery for the treatment of single brain metastases. Department of Neurosurgery, Toronto Western Hospital. REB #: 10-0486-C. PI: Zadeh, G. Collaborator(s): Menard C, Bernstein M, Laperriere N, Millar BA, Chung C. 32,500 CAD. [Clinical Trials]

2007 Jul - 2015 Jun  
**Collaborator.** A randomized phase III study of temozolomide and short-course radiation versus short-course radiation alone in the treatment of newly diagnosed glioblastoma multiforme in elderly patients. National Cancer Institute of Canada (NCIC). PI: Chung, C. Collaborator(s): Mason W, Millar BA, Laperriere N. 203,000 CAD. [Clinical Trials]

Non-Peer-Reviewed Grants

Funded

2010 Jul - present  
**Collaborator.** Discovery of biomarkers to guide individualized therapy in patients with brain metastasis receiving radiotherapy. 10-0743-C. PI: Menard, C. Collaborator(s): Chung C (Co-I), Zadeh G (Co-I), Bernstein M (Coll), Laperriere N (Coll), Millar BA (Coll), Bristow R (Coll), Camphausen K (Coll), Foltz W (Coll), Damyanovich A (Coll), Stanescu T (Coll), Cho Y-B (Coll), Ruschin M (Coll), Kucharzyk W (Coll). [Clinical Trials]

2013 Jul - 2018 Jun  
**Collaborator.** A double-blind, placebo-controlled, randomized, Phase IIIb trial evaluating the efficacy and safety of standard of care (SOC) +/- continuous bevacizumab treatment following progression of disease in patients with glioblastoma after first (1st)-line treatment with radiotherapy, temozolomide and bevacizumab. PI: Mason, W. Collaborator(s): Laperriere N, Millar BA. [Clinical Trials]

2. OTHER SUPERVISION

Undergraduate Education

Clinical

2008 May - 2008 Jun MRS students.
2008 - 2009 Seven Student’s attended clinics (Total 63 hours. Overall teaching score 4.4).
2004 - 2006 Ambulatory Care clinical teaching for University of Toronto and elective medical students. Supervisee Institution: University of Toronto.
1999 - 2001 5th year medical students. Clinical Skills and Oncology teaching (1.5-2 hours every 3 months for 6 students). Supervisee Institution: Weston Park Hospital, University of Sheffield.
1993 - 1995 3rd year medical students. Clinical skills teaching (2 hours/week for 8-10 students). Supervisee Institution: Ninewell Hospital, University of Dundee.

Undergraduate MD

Didactic

2011 Jun CNS Lecture to Physics residents, PMH U of T (Invited).
2010 May Women in Medicine Event, Toronto (Invited).
2000 - 2001 Endocrine Tumours and CNS Tumours (2 hours/year to 6 therapy students). Supervisee Institution: Undergraduate Radiographers, School of Radiology (Therapeutic), University of Hallam, Sheffield.

Continuing Education

Clinical

2002 - 2003 Management of CNS and Paediatric Tumours (2 hours/year to 3 University of Toronto Radiation Oncology residents (ad hoc)).

Clinical Research Fellow (MD)

Didactic

2011 Jun CNS Session to Physics Residents (June 20, 2011).
2008 Radiotherapy Student - CNS clinic.
2003 Management of Paediatric Brain Tumours (1.5 hours to 10 University of Toronto radiation oncology residents).
1999 - 2001 Management of Thyroid Malignancies (one hour every six months to 8 Senior House
Barbara-Ann McLellan MILLAR

Officers).

1. EDUCATION

Degrees
1987 MD, Queen’s University at Kingston, Ontario
1983 BASc, Electrical Engineering, University of Waterloo, Waterloo, Ontario

Postgraduate, Research and Specialty Training
2010 Leadership Development for Physicians in Academic Health Centers. Harvard School of
Public Health, Harvard University
2006 UHN-Rotman Leadership Development Program, Joseph L. Rotman School of Management,
University of Toronto
1989 - 1992 Resident, Radiation Oncology, University of Toronto, Toronto, Ontario
1988 - 1989 Resident, Internal Medicine, Western University, London, Ontario
1987 - 1988 Intern, Internal Medicine, Queen’s University at Kingston, Ontario

Qualifications, Certifications and Licenses
1992 Fellow, Radiation Oncology, Royal College of Physicians and Surgeons of Canada
1989 Licentiate, Medical Council of Canada

2. EMPLOYMENT

Current Appointments
2012 - present Full Member, Institute of Medical Science, University of Toronto
2009 - present Professor, Department of Radiation Oncology, University of Toronto
2004 - present Clinician Scientist, Princess Margaret Cancer Centre and University Health Network,
Toronto, Ontario
Previous Appointments

HOSPITAL
1998 - 2004 Staff Physician, Department of Radiation Oncology, Princess Margaret Hospital and University Health Network, Toronto, Ontario
1992 - 1998 Staff Physician, Department of Radiation Oncology, Princess Margaret Hospital, Toronto, Ontario

UNIVERSITY
2002 - 2011 Associate Member, Institute of Medical Science, University of Toronto
1991 - 1992 Chief Resident, Radiation Oncology, University of Toronto

UNIVERSITY - RANK
2002 - 2009 Associate Professor, Radiation Oncology, University of Toronto
1995 - 2002 Assistant Professor, Radiation Oncology, University of Toronto
1992 - 1995 Lecturer, Radiation Oncology, University of Toronto

3. HONOURS AND CAREER AWARDS

Distinctions and Research Awards

NATIONAL

Received
2015 Gordon Richards Lecture, Targeting Cancer at the Biology Technology Interface, Canadian Association of Radiation Oncology (CARO). (Distinction)
Award for outstanding contributions in the field of radiation oncology.

LOCAL

Received
2015 Research Leadership Award, University of Toronto, Department of Radiation Oncology.
(Distinction)
Distinction.
2012 Sustained Excellence in Research Award, University of Toronto, Department of Radiation Oncology. (Distinction)
2011 Postgraduate Advocacy and Mentorship Award, University of Toronto, Department of Radiation Oncology.
(Distinction)
2005 Research Leadership Award, University of Toronto, Department of Radiation Oncology.
(Distinction)
1991 W.J. Simpson Award, University of Toronto, Department of Radiation Oncology.
(Distinction)
For academic excellence in resident research.
1983 Murata Erie Award, University of Waterloo. (Distinction)
For academic excellence in electronics.
1980 - 1981 Research Scholarship for Academic Standing, University of Waterloo. (Distinction)

Teaching and Education Awards

LOCAL

Received
2009  **Postgraduate Medical Education Award**, University of Toronto, Department of Radiation Oncology. (Postgraduate MD, Core Program)  
*For excellence in research supervision.*

2004  **Postgraduate Medical Education Award**, University of Toronto, Department of Radiation Oncology. (Postgraduate MD, Core Program)  
*For excellence in research supervision.*

1996  **Residents’ Award for Excellence in Resident Teaching**, University of Toronto, Department of Radiation Oncology. (Postgraduate MD, Core Program)

4. PROFESSIONAL AFFILIATIONS AND ACTIVITIES

**Professional Associations**

- American Society for Clinical Oncology (ASCO)
- American Society for Radiation Oncology (ASTRO)
- Canadian Association of Radiation Oncology (CARO)
- Canadian Medical Association (CMA)
- European Society of Therapeutic Radiology and Oncology (ESTRO)
- Ontario Medical Association (OMA)
- Radiation Research Society (RRS)
- Royal College of Physicians and Surgeons of Canada (RCPSC)

**Administrative Activities**

**INTERNATIONAL**

12th International Tumor Microenvironment Meeting  
2010  **Member**, Organizing Committee

National Institutes of Health  
2010 - 2014  **Member**, Bladder Cancer Task Force  
2010 - 2014  **Member**, External Advisory Group, Memorial Sloan Kettering Cancer Center, New York.  
*NIH P01 Program Project: “Tumor Hypoxia Imaging: Laboratory and Clinical Studies”.*

Radiation Therapy Oncology Group (RTOG)  
2000 - 2004  **Principal Investigator**  
*Responsible for the co-ordination of RTOG studies activated at Princess Margaret Hospital.*

Union for International Cancer Control (UICC)  
2013 - present  **Member**, Global Task Force for Radiotherapy in Cancer Control (GTFRCC) Secretariat.  
*GTFRCC is an initiative of the Union for International Cancer Control (UICC) with a mandate to develop an investment framework aimed at closing the gap between the availability of radiotherapy in low and middle income countries (LMICs) and developed nations.*

World Congress of Brachytherapy  
2016  **Member**, Gynecology Scientific Committee
Michael Frederick MILOSEVIC

NATIONAL

Accreditation Canada
2014 - 2015 Member, Accreditation Canada Radiotherapy/Cancer Care and Oncology Services Standards Working Group

Canadian Association of Provincial Cancer Agencies (CAPCA) and Canadian Partnership Against Cancer (CPAC)
2016 Member, Scientific Organizing Committee, Canadian Cancer Conference: Innovative Approaches to High Value Cancer Care in Canada
2007 - 2009 Member, Human Resources Joint Committee for the Cancer Workforce
2007 - 2009 Member, Cancer Workforce Scoping Study Steering Committee

Canadian Association of Radiation Oncology (CARO)
2009 - 2010 Past-President, Canadian Association of Radiation Oncology
2007 - 2009 President, Canadian Association of Radiation Oncology
2007 - 2008 Chair, CARO-Elekta Research Fellowship Competition
2005 - 2007 President-Elect, Canadian Association of Radiation Oncology
2003 - 2005 Chair, Manpower Committee
2001 - 2005 Member, Manpower Committee

Canadian Institute for Health Information (CIHI)
2014 - present National System for Incident Reporting Advisory Group

Canadian Medical Association
2008 Aug Delegate to General Council, Annual General Meeting, Montreal.
2006 Aug Delegate to General Council, Annual General Meeting, Charlottetown.

Canadian Partnership for Quality Radiotherapy (CPQR)
2010 - present Chair, CPQR Steering Committee

Canadian Strategy for Cancer Control (CSCC) and Canadian Association of Provincial Cancer Agencies (CAPCA)
2003 - 2005 Member, Human Resources Action Group (HRAG)

Fields Institute for Research in Mathematical Science
2006 - 2014 Member, Scientific Advisory Committee, Centre for Mathematical Medicine

Kidney Cancer Canada
2009 - 2014 Member, Medical Advisory Board

National Cancer Institute of Canada/Clinical Trials Group
2007 - 2008 Co-Chair, Grant Panel E - Biophysics, Imaging and Radiobiology
Michael Frederick MILOSEVIC

Prostate Cancer Alliance of Canada
1997 - 2001  Member

*Canadian Association of Radiation Oncologists representative. The Prostate Cancer Alliance of Cancer is a multidisciplinary organization with the mandate of providing a forum for information sharing and co-operation among organizations working in the prostate cancer field.*

PROVINCIAL / REGIONAL

Cancer Care Ontario (CCO)
2014 - present  Co-Chair, CCO Radiation Treatment Community of Practice - Gynecological Cancers
2014 - 2015  Co-Chair, CCO Cervical Cancer Pathway Working Group
2014  Member, CCO Ontario Cancer Plan IV Safety Working Group
2009 - 2012  Member, CCO Radiation Treatment Quality and Safety Committee
2009 - 2012  Member, CCO Radiation Oncology Program Advisory Committee

Health Quality Ontario (HQO)

Ontario Association of Radiation Oncologists (OARO)
2010 - 2014  Chair, Clinician Scientist Advisory Committee

University of Waterloo
2006 - present  Member, Biomechanical Research Group, Department of Applied Mathematics, Waterloo, Ontario.

LOCAL

Princess Margaret Hospital
2012 - present  Director, Research and Quality Committee, Radiation Medicine Program
2009 - present  Co-Chair, Quality Committee, Radiation Medicine Program
2009 - present  Member, Steering Committee, Radiation Medicine Program
2002 - present  Chair, Research Committee, Radiation Medicine Program
1997 - present  Group Leader, Gynecologic Oncology Site
2013  Co-Chair, 4th Annual Ontario Cancer Institute (OCI) Retreat
2009 - 2012  Associate Director, Radiation Medicine Program
2003 - 2012  Member, Senior Advisory Committee, Department of Radiation Oncology
2003 - 2012  Member, Senior Advisory Committee, Department of Radiation Oncology
2002 - 2012  Director of Research, Radiation Medicine Program
2000  Chair, Radiation Oncology Partners
1999  Treasurer, Radiation Oncology Partners
1998  Member, Inpatient Care Committee, Department of Radiation Oncology
1998  Member, Strategic Planning Committee, Department of Radiation Oncology
1993 - 1995  Member, Executive Committee, Radiation Oncology Partners
1992 - 1995  Member, Anti-Microbial Subcommittee, Pharmacy and Therapeutics Committee

University Health Network
Michael Frederick MILOSEVIC

2009 - present  Co-Chair, Radiation Treatment Radiation Safety Committee
2009 - present  Member, Cancer Program Quality Committee
2005 - present  Member, STTARR Executive Management Committee

The STTARR Research Program and the STTARR Innovation Centre at UHN, integrate molecular, cellular, animal and patient imaging with precision radiation research in a manner conducive to the rapid translation of novel treatment strategies from the laboratory to clinical evaluation.

2005 - present  Director, STTARR Core III
1999 - 2003  Member, Radiation Treatment Radiation Safety Committee
1999 - 2003  Member, Brachytherapy Radiation Safety Group
1999 - 2003  Member, External Beam Radiation Safety Group
1999 - 2003  Member, Oncology Ethics Review Board

University of Toronto
2005 - present  Key Mentor, Excellence in Radiation Research for the 21st Century (EIRR21), CIHR Research Training Program, Faculty of Medicine, Department of Radiation Oncology, Toronto.

2011 May  Co-Chair, Organizing Committee, IMRT Insights: On Target, On Track, Faculty of Medicine, Department of Radiation Oncology, Continuing Education, Toronto, Ontario.
2010 Jun  Co-Chair, Organizing Committee, IMRT Insights: Transforming Practice through Collaboration, Faculty of Medicine, Department of Radiation Oncology, Continuing Education, Toronto, Ontario.
2009 Jun  Member, Organizing Committee, Target Insight III, Faculty of Medicine, Department of Radiation Oncology, Continuing Education, Toronto, Ontario.
2006  Chair, Department of Radiation Oncology Search Committee
2005 - 2012  Member, Post-Graduate Education Committee, Faculty of Medicine, Department of Radiation Oncology, Postgraduate MD
2003 - 2012  Member, Department of Radiation Oncology Fellowship Management Committee
2002 - 2012  Member, Department of Radiation Oncology Research Committee
1999  Chair, Department of Radiation Oncology Search Committee

1. GRANTS, CONTRACTS AND CLINICAL TRIALS

PEER-REVIEWED GRANTS

Funded

2016

Precis: The objective of this grant is to develop a pre-clinical assay for late intestinal radiation toxicity to facilitate the safe clinical translation of new combined treatment approaches with radiation and new molecular therapeutics.

2015 - 2020

Co-Investigator. Integrative Systems-Level Imaging (ISLI), Canadian Foundation for Innovation (CFI) and Ontario Research Fund (ORF). PI: Jaffray, D. Collaborator(s): Joshua A; Jurisica J; Mikulis D; Milosevic M; Murphy K; Rogalla P; Valliant J; Wilson B; Wouters B. 5,734,904 CAD. [Grants]

Precis: Many of the diseases with the greatest impact on the Canadian health care system are united by basic underlying processes: inflammation is a key component in cancer, cardiovascular disease and arthritis, while microvascular perfusion and tissue oxygenation impact cancer care and neuroscience studies. An image-based understanding and ability to
measure pharmacokinetics and drug delivery will thus impact numerous therapeutic approaches. The aim of this grant is to develop tools and methods to non-invasively image and quantify these important determinants of disease and treatment outcomes. $ CAD over 5 years.

2014 - 2019

Précis: The main objectives are to expedite the evaluation of novel anti-cancer agents in patients and characterize the effects of these new agents on their targets using clinically relevant biochemical, pathological, immunological, molecular, and/or imaging markers of biologic response. $351,397 USD annually for 5 years.

2014 - 2019

**Principal Investigator.** A research pipeline for hypoxia-directed precision cancer medicine. Project 4: Hypoxia-induced activation of bone marrow derived myeloid cells in human cancer. Terry Fox New Frontiers Program Project Grant. 6,688,975 CAD. [Grants]

Précis: The goal of this program is to improve patient outcome by targeting hypoxia in cancer through a translational pipeline spanning the research continuum from basic biology to clinical trials with short, medium and long-term goals for implementing hypoxia-directed personalized medicine strategies. Total: $1,337,795 annually for 5 years. Project 4: $178,291 annually for 5 years.

2014 - 2019

**Collaborator.** Image-based quantitative assessment of tumor hypoxia. Canadian Institute for Health Research (CIHR) and US National Cancer Institute (NCI). PI: D Jaffray. 1,923,621 CAD. [Grants]

Précis: The main objective is to establish standardized methods for quantitating hypoxia in human tumors using DCE CT/MR and PET imaging. $384,724 CAD annually for 5 years.

2014 - 2017

**Co-Investigator and Steering Committee Member.** Radiation oncology peer review: A national quality improvement initiative. Canadian Partnership Against Cancer (CPAC). PI: M Brundage. 746,120 CAD. [Grants]

This grant will accelerate the upstage of radiation treatment peer review across Canada and improve the overall quality and safety of care provide to patients. $308,736 year 1, $241,992 year 2, $195,392 year 3.

2013 - 2018

**Co-Investigator.** PANTHER: Prostate Cancer Canada program project in targeting aggressive and lethal cancers. Project 4: Radioresistance and cell plasticity. Prostate Cancer Canada. Movember Team Grant. PI: R Bristow. 5,000,000 CAD. [Grants]

Précis: A joint grant between the Princess Margaret Cancer Centre and the Vancouver Prostate Centre to develop novel therapeutics targeting treatment resistance in aggressive prostate cancer. Program Lead: R Buttyan.

2013 - 2016

**Co-Applicant.** Improving quality and patient safety in radiation therapy by integrating multi-disciplinary criteria into an artificial intelligence systems. Canadian Institute for Health Research (CIHR) and Natural Sciences and Engineering Research Council of Canada (NSERC) Collaborative Health Research Program (CHRP). PI: T Purdie. Collaborator(s): D Aleman, JP Bissonnette, S Breen, T Craig, D Letournea, C McIntosh, M Sharpe. 651,060 CAD. [Grants]

This objective of this grant is to develop artificial intelligence systems for early detection of anomalies in radiotherapy treatment planning. $217,020 annually for 3 years.

2013 - 2016

This objective of this grant is to explore the heat activated release of cisplatin from liposomes
as a means of improving the effectiveness of radiotherapy to treat cervical cancer. $109,495 annually for 3 years.

**2012 - 2017**

**Principal Investigator.** Canadian Partnership for Quality in Radiotherapy. Canadian Partnership Against Cancer (CPAC). 1,186,110 CAD. [Grants]

This grant will support the universal availability of high quality and safe radiotherapy across Canada through sustainable system performance improvement and the development of consensus-based guidelines and indicators to aid in radiation treatment program development and evaluation. $237,222 annually for 5 years.

**2012 - 2015**

**Principal Investigator.** Clinician Scientist Award. Ontario Association of Radiation Oncologists (OARO). 255,000 CAD. [Grants]

This peer-reviewed award provides personal salary support for research to offset clinical activity. $85,000 annually for 3 years.

**2012 - 2013**

**Principal Investigator.** Targeting the Hedgehog pathway as a strategy to overcoming resistance to chemoradiation in cervical cancer. Astra Zeneca Inc. RAZCER Research Award. Collaborator(s): H MacKay, RP Hill. 22,700 CAD. [Grants]

This project will explore the importance of Hedgehog signaling in cervical cancer, and the potential role of Hedgehog inhibition as a modulator of radiation response.

**2011 - 2015**

**Co-Investigator.** Translational team award for high impact clinical trials. Ontario Institute for Cancer Research (OICR). Translational Team Award. Collaborator(s): A Oza. 1,000,000 CAD. [Grants]

The objective of this award is to build translational research capacity for high impact clinical trials at UHN, including support for the clinical translation of bioluminescence imaging of tumor metabolism. $250,000 annually for 4 years.

**2011 - 2014**

**Co-Investigator.** Tumor targeted radiotherapy for prostate cancer. Canadian Cancer Society. PI: C Menard. Collaborator(s): T Craig, K Brock, T Stanesbcu, W Foltz, T van der Kwast, R Bristow, M Haider, C Catton. 744,000 CAD. [Grants]

The objective of this study is to examine the feasibility of MR-guided tumor targeted radiotherapy for prostate cancer in relation to technical performance, tumor control and toxicity. $248,000 annually for 3 years.

**2011 - 2012**

**Co-Investigator.** Hypoxia imaging in patients with high-risk localized prostate cancer using [18F]FAZA PET and MRI. Canadian Association of Radiation Oncologists (CARO). Abbott-CARO Uro-Oncologic Radiation Award (ACURA). PI: C Menard. 20,000 CAD. [Grants]

This study will determine to what extent [18F]FAZA PET of the prostate gland can resolve inter- and intra-patient variability in uptake consistent with hypoxia related signatures measured on multi-parametric MRI and biopsy.

**2010 - 2014**

The objective of this award is to understanding how exposure to hypoxia affects the ability of tumour cells to resist treatment and to metastasize. $149,828 annually for 4 years.

**2009 - 2014**

**Co-Principal Investigator.** Hypoxia in human tumours: clinical and experimental studies. Canadian Institutes of Health Research (CIHR). Terry Fox New Frontiers Program Project Grant. Collaborator(s): B Wouters, R Bristow, A Fyles, D Jaffray, R Bristow. 4,986,500 CAD. [Grants]

The objective of this award is to investigate the role that hypoxia and the tumor microenvironment play in tumor progression and resistance to treatment. Total $997,300
annually for 5 years, Project 1 $274,000 annually, Project 2 $280,500 annually, Project 4 $197,000 annually.

2009 - 2014  
Co-Applicant. Adapting to hypoxia in cancer through the unfolded protein response.  
The objective of this award is to investigate the role that the unfolded protein response and autophagy play in cellular response to hypoxia. $189,900 annually for 5 years.

2009 - 2014  
The objective of this award is to foster research training of clinicians and scientists in the radiation medicine sciences. $390,000 annually for 5 years.

2009 - 2012  
Co-Investigator. Robotic positioning for image-guided surgery and radiation therapy.  
Canada Foundation for Innovation (CFI). Collaborator(s): D Jaffray. 16,030,169 CAD. [Grants]  
This is an infrastructure award to support the development of a fully integrated MR-guided radiation therapy suite (both external beam and brachytherapy) for precision dose targeting and intervention.

2009 - 2012  
To determine CGH array biomarkers of prostate cancer radiotherapy response. $193,282 annually for 3 years.

2008 - 2013  
The main objectives of this Cooperative Agreement Award are to expedite the evaluation of novel anti-cancer agents in patients and characterize the effects of these new agents on their targets using clinically relevant biochemical, pathological, immunological, molecular, and/or imaging markers of biologic response. $628,383 USD annually for 5 years.

2008  
This project will evaluate multiparametric MRI against established in vivo methods (Pimonidazole/ polarographic electrodes) to obtain spatially correlated measures of hypoxia in prostate cancer.

2007 - 2010  
This award focuses on theoretical mathematical modeling of the dynamics of anti-angiogenic treatment in combination with radiotherapy and/or chemotherapy. Model validation and refinement will incorporate pre-clinical and clinical imaging and histologic analyses. $142,973 annually for 3 years.

2007 - 2009  
This infrastructure award is to build a research environment to explore cancer survivorship, including the long-term consequences of cancer and its treatment.

2006 - 2011
The objective of this collaboration is to investigate combinations of radiotherapy and novel biologically-targeted treatments using both clinical and correlative molecular endpoints. $1,495,000 USD annually for 5 years.

2005 - 2008
The goal of this award is to test the hypothesis that clinical integration of diagnostic and interventional MRI can be optimized with supine positioning, and will enable the spatial delineation and biological characterization of local prostate cancer persistence following radiotherapy. $98,200 USD annually for 3 years.

2005 - 2006

2004 - 2009
The objective of this award is to investigate the role that hypoxia and the tumor microenvironment play in tumor progression and resistance to treatment. $1,187,000 annually for 5 years total, $156,700 annually for Project 1, $277,000 annually for Project 5.

2004 - 2007
Co-Principal Applicant. STTARR - Spatio-Temporal Targeting and Amplification of Radiation Response. Canada Foundation for Innovation (CFI). Collaborator(s): R Bristow, D Jaffray. 9,824,217 CAD. [Grants]
This was an infrastructure award to support the development of a state-of-the-art Canadian facility for investigating the dynamics of tumour biology and precision image-guided radiotherapy at the molecular, animal and human levels, with rapid translation of information among these three domains.

2004 - 2007
An infrastructure award to support enhanced imaging-based approaches to furthering the application of radiation therapy in cancer. The award includes enhanced capacity for imaging isotope production, and other facilities for testing new therapeutic modalities through imaging and intervention in small animals, including a dedicated animal surgical suite.

2004
The objective of this award was to develop detailed knowledge of pelvic lymph node distribution in men with prostate cancer using a novel lymph node imaging agent, as a guide
to targeted lymph node irradiation.

2004

2003 - 2005

$76,300 annually for 3 years.

2002

2001 - 2003

$66,000 USD annually for 3 years.

2001 - 2003

$63,000 USD annually for 3 years.

2001

Principal Investigator. A clinical study of the effect of recombinant human erythropoetin (rHuEPO) on tumor oxygenation in prostate cancer. Anemia Institute for Research Education. Collaborator(s): C Parker, P Warde, A Toi, J Sweet. 39,000 CAD. [Grants]

2000

2000

1999 - 2004

Project 3 (Multi-modality treatment in patients with high risk cervix cancer). $583,600 annually for 5 years total, $181,600 annually for Project 3.

1996 - 1999

$373,600 annually for 3 years total.
1995

Co-Principal Investigator. Predictive assays in cervix cancer: assessment of hypoxia, interstitial fluid pressure and GSH levels. Princess Margaret Hospital Foundation (The). Collaborator(s): A. Fyles (Co-PI), D. Hedley, R. Hill. 45,460 CAD. [Grants]

1993

Principal Investigator. Development of a technique to measure interstitial fluid pressure in human tumours. Princess Margaret Hospital Foundation (The). 18,260 CAD. [Grants]

NON-PEER-REVIEWED GRANTS

FUNDED

2010 - 2012

Principal Investigator. Canadian Partnership for Quality Radiotherapy (CPQR). Canadian Partnership Against Cancer (CPAC). 200,000 CAD. [Grants]

CPQR is an alliance among the national professional associations involved in the delivery of radiation treatment in Canada (Canadian Association of Radiation Oncology - CARO, Canadian Organization of Medical Physicists - COMP, Canadian Association of Medical Radiation Technologists – CAMRT), together with the Canadian Partnership Against Cancer – CPAC, for the purpose of assuring the availability of high-quality radiation treatment across the country. $100,000 annually for 2 years.

2007 - 2011

Principal Investigator. Phase I/II Study of Sorafenib and Palliative Radiotherapy in Patients with Advanced Renal Cell Carcinoma and Symptomatic Bony Metastases. Bayer Canada Inc. 750,000 CAD. [Industrial Grants]

The objective of this award is to evaluate the antiangiogenic drug sorafenib as an adjunct to palliative radiotherapy in patients with bone metastases from renal cell carcinoma. The study incorporates both clinical and biologic endpoints. $114,000 annually for 2 years.

2005 - 2007

Principal Investigator. Biologically-Targeted, Image-Guided Radiotherapy for Cervix Cancer. Princess Margaret Hospital Foundation (The). Giovanni and Concetta Guglietti Family Cancer Fund. 750,000 CAD. [Grants]

The objective of this award is to investigate novel strategies for using high-precision, image-guided radiotherapy to treat women with cervix cancer, through a combination of anatomic and biologic tumor targeting. $250,000 annually for 3 years.

1999 - 2002

$50,000 annually for 3 years.

Principal Investigator. Predictive assays in cervix cancer: Assessment of hypoxia, interstitial fluid pressure and tissue and plasma biomarkers of hypoxia (Accruing). [Clinical Trials]

Principal Investigator. A phase I/II study of cisplatin and radiation in combination with sorafenib in cervical cancer (Analysis). [Clinical Trials]

Principal Investigator. A phase I/II study of sorafenib and palliative radiotherapy in patients with advanced renal cell carcinoma and symptomatic bony metastases (Analysis). [Clinical Trials]

Principal Investigator. Implementation of optimized magnetic resonance image-guided intra-uterine brachytherapy in cervical cancer (Analysis). [Clinical Trials]

Principal Investigator. Hypoxia and clinical outcome after radiotherapy for invasive bladder
cancer (Analysis). [Clinical Trials]

**Principal Investigator.** A feasibility study of hypoxia imaging in patients with cervix cancer using positron emission tomography (PET) with 18F-fluoroazomycin arabinoside (18F-FAZA) (Accruing). [Clinical Trials]

**Principal Investigator.** A feasibility study of hypoxia imaging in patients with prostate cancer using positron emission tomography (PET) with 18F-fluoroazomycin arabinoside (18F-FAZA) (Accruing). [Clinical Trials]

1. INTERNATIONAL

Invited Lectures and Presentations

2015 The hypoxia ‘driver phenotype’ in human cancers. Manchester Academic Health Science Centre, Manchester University, and the Christie Hospital NHS Trust. Manchester, United Kingdom.

2015 Image guided biological targeting of human cancers. Taiwan Joint Cancer Conference. Taipei, Taiwan, Province Of China.

2015 MR guided brachytherapy for cervical cancer. Taiwan Joint Cancer Conference. Taipei, Taiwan, Province Of China.

2015 The hypoxia ‘driver phenotype’ in prostate cancer. Coffey-Holden Prostate Cancer Academy Meeting. La Jolla, California.

2014 From opportunity to action: Motivating global radiotherapy investment. UICC Global Task Force on Radiotherapy for Cancer Control (GTFRCC). UICC World Cancer Conference. Melbourne, Australia.

2013 Quality and safety in radiation medicine: European and Canadian Perspectives. CARO ESTRO Symposium. Joint Annual Scientific Meeting of the Canadian Association of Radiation Oncology (CARO) and Canadian Organization of Medical Physicists (COMP). Montreal, Quebec.

2013 Programmatic requirements for radiotherapy. UICC Global Task Force on Radiotherapy for Cancer
Control (GTFRCC). Amsterdam, Netherlands.

2013  PhD Defense Opponent: Tord Hompland, Functional magnetic resonance imaging of the microenvironment and microenvironment associated metastatic potential of tumors. Radiation Biology and Tumor Physiology Group, Department of Radiation Biology, Institute for Cancer Research, The Norwegian Radium Hospital, Oslo University Hospital. Norway.

2011  Target volume changes during PDR brachytherapy for cervix cancer. 3D GYN GEC ESTRO Meeting, University of Aarhus. Aarhus, Denmark.

2011  Dynamic contrast enhanced CT and MR in cervix cancer. 3D GYN GEC ESTRO Meeting, University of Aarhus. Aarhus, Denmark.

2008 Radiation oncology in Canada: Waiting and workload. Liverpool Hospital Cancer Therapy Centre. Sydney, Australia.

2008 Angiogenesis and hypoxia in prostate cancer: Relevance to radiotherapy and biological treatment targeting. 59th Annual Scientific Meeting of the Royal Australian and New Zealand College of Radiologists (RANZCR). Adelaide, Australia.

2008 Contouring for post-prostatectomy radiotherapy. 59th Annual Scientific Meeting of the Royal Australian and New Zealand College of Radiologists (RANZCR). Adelaide, Australia.

2007 Clinical trials of angiogenesis inhibitors and radiation. International Advisory Board on Drugs and Radiotherapy - Pfizer. New York, United States.

2007 Adapting to change in cervix cancer. Department of Radiation Oncology, University of California. San Diego, California.

2006 Prostate cancer hypoxia in patients and the impact of androgen withdrawal: Implications for disease progression and radiation response. Department of Defence Innovative Minds in Prostate Cancer Today (IMPaCT) Meeting. Atlanta, Georgia.

2005 Interstitial fluid pressure (IFP) and vascular targeting with ZD6126. The Tumor Microenvironment: Hypoxia, Angiogenesis and Vasculature. 9th International Workshop. Oxford, United Kingdom.
Michael Frederick MILOSEVIC

2004  Prostate cancer hypoxia correlates with poor patient outcome following treatment with radiotherapy. 46th Annual Meeting of the American Society for Therapeutic Radiology and Oncology. Atlanta, Georgia.

2001  Performance of a cervix cancer prognostic index that includes hypoxia. The Tumor Microenvironment and its Impact on Cancer Therapies. 7th International Workshop. Lake Lanier, Georgia, United States.

2001  Prostate cancer is hypoxic. 48th Annual Meeting of the Radiation Research Society. San Juan, Puerto Rico.

2001  Measurement of acute toxicity of combined weekly cisplatin and radiation therapy for cancer of the cervix. 43nd Annual Meeting of the American Society for Therapeutic Radiology and Oncology. San Francisco, California.

2001  A polarographic electrode study of tumor oxygenation in localized prostate cancer. 43nd Annual Meeting of the American Society for Therapeutic Radiology and Oncology. San Francisco, California.

2000  Tumor size and oxygenation are independent predictors of nodal and metastatic disease in patients with newly diagnosed cervix cancer. 42nd Annual Meeting of the American Society for Therapeutic Radiology and Oncology. Boston, Massachusetts.

1999  The relationship between IFP, oxygen tension, and survival following radiation in cervix cancer. 11th International Congress of Radiation Research. Dublin, Ireland.
Michael Frederick MILOSEVIC

1997 Interstitial fluid pressure measurements in lymph node metastases from head and neck cancers. 11th Annual Scientific Meeting of the Canadian Association of Radiation Oncologists. Vancouver, British Columbia.

1995 The measurement of interstitial fluid pressure in cervix cancer. 43rd Annual Meeting of the Radiation Research Society. San Jose, California.

Presented Abstracts

2014 A national system for incident reporting in radiation therapy: Development of a taxonomy and severity

Near misses reflect different failure modes than actual incidents in the field of radiation therapy. 2nd ESTRO Forum. Geneva, Switzerland. Lam C, Muraj Z, Man K, Milosevic M.

Michael Frederick MILOSEVIC

Cuartero J, Mackay H, Milosevic M, Murphy J, Kamel-Reid S, Pintilie M, Clarke B.

Media Appearances

2. NATIONAL

Invited Lectures and Presentations

2015 The hypoxia 'driver phenotype' in prostate cancer. Annual meeting of the Association des radio-oncologues du Québec (AROQ). Montreal, Quebec.

2015 Radiation Incident Reporting in Canada: Current State and Future Direction. Association quebecoise des physician(ne)s medicaux cliniques. Montreal, Quebec, Canada.
Michael Frederick MILOSEVIC

2011  Canadian Partnership for Quality Radiotherapy. Quality and Safety in Radiation Oncology, COMP Winter School. Mont Tremblant, Quebec.

2011  Canadian Partnership for Quality Radiotherapy, Canadian Association of Provincial Cancer Agencies (CAPCA) Board Meeting.

2011  Bladder cancer, Resident Refresher Course. 25th Annual Scientific Meeting of the Canadian Association of Radiation Oncology. Winnipeg, Manitoba.

2011  A phase I/II study of the angiogenesis inhibitor sorafenib in cervix cancer patients treated with radiotherapy. 25th Annual Scientific Meeting of the Canadian Association of Radiation Oncology. Winnipeg, Manitoba.

2009  Hypoxia and Angiogenesis in Human Tumors: Challenges and Opportunities. McGill University Department of Oncology. Montreal, Quebec.

2009  Radiation oncology in Canada: Savour the present but look to the future. Presidential address, 23rd Annual Scientific Meeting of the Canadian Association of Radiation Oncology. Quebec City, Quebec.

2009  Prostate cancer hypoxia and early biochemical failure after radiotherapy. Presented as one of the top eight peer-reviewed papers at the 23rd Annual Scientific Meeting of the Canadian Association of Radiation Oncology. Quebec City, Quebec.

2008 Imaging tumor vasculature and hypoxia in radiation oncology. 22nd Annual Scientific Meeting of the Canadian Association of Radiation Oncology (CARO). Montreal, Quebec.

2006 Hypoxia and Angiogenesis in Cervix Cancer: Mature Results of a Prospective Study. Presented as one of the top five peer-reviewed papers at the 20th Annual Scientific Meeting of the Canadian Association of Radiation Oncologists. Calgary, Alberta.

2004 Prostate cancer hypoxia adversely influences outcome following treatment with radiotherapy. 18th Annual Scientific Meeting of the Canadian Association of Radiation Oncologists. Halifax, Nova Scotia.

2001 Measurement of acute toxicity of combined weekly cisplatin and radiation therapy for cancer of the cervix. 15th Annual Meeting of the Canadian Association of Radiation Oncologists. Quebec City, Quebec.

1998  Movement of the tumour and uterus with change in the position of patients undergoing radiotherapy for cervix cancer. 12th Annual Scientific Meeting of the Canadian Association of Radiation Oncologists. Toronto, Ontario.

1995  Carcinoma of the female urethra-results of primary radiotherapy. 9th Annual Scientific Meeting of the Canadian Association of Radiation Oncologists. Montreal, Quebec.

1991  The significance of malignant peritoneal cytology in stage I endometrial carcinoma: A meta-analysis. 5th Annual Scientific Meeting of the Canadian Association of Radiation Oncologists. Quebec City, Quebec.

Presented Abstracts

2015  Plerixafor inhibits myeloid cell recruitment and improves the radiocurability of cervical cancer. 29th Annual Meeting of the Canadian Association of Radiation Oncology (CARO). Kelowna, Canada. Presenter(s): Chaudary N, Pintilie M, Hill RP, Milosevic M.

2015  Metformin use is associated with lower cervical cancer-specific mortality. 29th Annual Meeting of the Canadian Association of Radiation Oncology (CARO). Kelowna, Canada. Presenter(s): Han K, Pintilie M, Lipscombe L, Lega I, Milosevic M, Fyles A.

2014 Impact of image registration surrogates on the PTV geometry for bladder radiotherapy. 28th Annual Scientific Meeting of the Canadian Association of Radiation Oncology (CARO). St. John’s, Newfoundland and Labrador. Kong V, Rosewall T, Craig T, Milosevic M, Bristow R, Chan S, Chung P.

2013 Phase I/II study of palliative radiation and sorafenib for patients with metastatic renal cell carcinoma and painful bone metastases. CARO Annual Scientific Meeting 2013. Montreal, Quebec. Han K, Leung E, Cho

2013 Identifying important radiotherapy error trends through the use of a structured incident taxonomy. CARO Annual Scientific Meeting 2013. Montreal, Quebec. Lam C, Muraj Z, Man K, Milosevic M.

2011 Plan conformity and effective PTV margin in patients receiving whole pelvis IMRT for gynecologic cancer. CARO Annual Scientific Meeting 2011. Winnipeg, Manitoba. Lam TKM, Cho YB, Yan J, Fyles A, Milosevic M.

Media Appearances

2011 Mar 16 Health-related effects of radiation exposure from nuclear power plant damage in Japan. CBC News Network.

2011 Mar 15 Health-related effects of radiation exposure from nuclear power plant damage in Japan. CBC National News.

3. PROVINCIAL / REGIONAL

Invited Lectures and Presentations

2015 Interstitial fluid pressure and drug delivery in cancer. Centre for Pharmaceutical Oncology, Leslie Dan Faculty of Pharmacy UofT. Toronto, Ontario, Canada.

2013 Prostate cancer hypoxia to guide personalized medicine. 4th Annual OCI Retreat. Huntsville, Ontario.

2013 Targeting the tumor microenvironment during radiotherapy. 4th Annual OCI Retreat. Huntsville, Ontario.

1992 The role of adjuvant pelvic radiotherapy in stage I and II endometrial cancer. 6th Annual Scientific Meeting of the Canadian Association of Radiation Oncologists. Ottawa, Ontario.

Media Appearances

4. LOCAL

Invited Lectures and Presentations

2016 Canadian community practice CARO. ESTRO-CARO Teaching Course on Image-Guided cervix radiotherapy – with a special focus on adaptive brachytherapy. Toronto, Ontario, Canada.

2016 Clinical approaches to target hypoxia. Radiobiology Course. Princess Margaret Cancer Center. Ontario, Canada.

2011 Canadian Partnership for Quality Radiotherapy. RTi3. Department of Radiation Oncology Continuing Medical Education, University of Toronto. Toronto, Ontario. (Continuing Education).

Michael Frederick MILOSEVIC

2006  Vascular targeting to improve radiation response: Panacea or peril? Target Insight II: Innovative Strategies for Target Definition to Enhance the Therapeutic Ratio, Department of Radiation Oncology Continuing Medical Education, University of Toronto. Toronto, Ontario. (Continuing Education).

2001  Tumor hypoxia: Where do we go from here? Target Insight: Innovative Strategies to Improve Target Definition in Radiation Oncology, Department of Radiation Oncology Continuing Medical Education, University of Toronto. Toronto, Ontario. (Continuing Education).

Media Appearances

F. Research Supervision

1. PRIMARY OR CO-SUPERVISION

Undergraduate Education

2011  Co-Supervisor. B. Sc. S Mahon. Communicating clinical information in IGRT practice to facilitate an individualized approach to online image matching guidelines in gynecological sites.

Graduate Education

Undergraduate MD

Postdoctoral Research Fellow (PhD)

2. OTHER SUPERVISION

Undergraduate Education

2010 - 2012  R Glicksman, Summer Student. Audit of cervix and prostate cancer hypoxia databases.

2010  J Detsky, Summer Student. FAZA PET imaging of hypoxia in cervix cancer.

2005 - 2006  E Leung, Memorial University. Time response of IFP pressure recording as a predictor of interstitial permeability and elasticity.

Graduate Education

Thesis Committee Member

2014 - present  S Ekdawi. Imaging to track the intratumoral distribution of liposomes for drug delivery.
2010 - present  J Stewart. Spatially modulated dose delivery for small animal radiotherapy.
2010 - 2014  S Stapleton. Predicting the transport of leptomeninges in solid tumors.
2009 - 2014  M Velec. Deformable registration and dose accumulation using 4D CBCT for liver SBRT.

Undergraduate MD

2003  M Joshi. Increasing accrual to clinical trials.

Postgraduate MD

Clinical Research Fellow (MD)

2012  K Han. A prospective pilot study of the utility of dynamic contrast-enhanced magnetic resonance imaging (DCE-MRI), diffusion-weighted MRI (DWI), and fluorodeoxyglucose positron emission tomography (FDG PET) imaging in brachytherapy for cervical cancer. Awards: Recipient of a CIHR-Terry Fox Foundation EIRR21 Research Training Program scholarship ($30,000 CAD), the CARO-Elekta Research Fellowship ($75,000 CAD) and an RSNA Research and Education award ($50,000 USD) for her fellowship project.
2011  P Wong. Treatment outcome of patients with uterine leiomyosarcoma.
2011  M Yap. PET imaging of tumor hypoxia.
2010  L Walsh. Treatment outcome of patients with cervix cancer following radiotherapy.
2009 A Li. MR-guided brachytherapy for cervix cancer.
2009 F Huang. IMRT as an alternative to brachytherapy for cervix cancer.
2001 C Doll. Tumor microenvironment in cervix cancer.
2001 C Parker. Hypoxia in prostate cancer.

1. EDUCATION

Degrees
1985 MB, BCh, Medicine, National University of Ireland, Dublin, Ireland
1985 BAO, Medicine, National University of Ireland, Dublin, Ireland

Postgraduate, Research and Specialty Training
1993 - 1994 Fellow, Radiation Oncology, University of Toronto, Toronto, Ontario, Canada
1989 - 1992 Clinical Oncology Training Program, St Luke’s Hospital, Dublin, Ireland
1987 - 1988 Residency, Internal Medicine, University College Galway, Dublin, Ireland
1986 - 1987 Residency, Internal Medicine, University College Cork, Cork, Ireland
1985 - 1986 Internship, Internal Medicine, University College Cork, Cork, Ireland

Qualifications, Certifications and Licenses
1994 Fellow, Radiation Oncology, Royal College of Physicians and Surgeons of Canada, Canada
1994 Certification, College of Physicians and Surgeons of Ontario, Ontario, Canada, License / Membership #: 66201
1992 Fellow of the Faculty of Radiologists, Clinical Oncology, Royal College of Surgeons in Ireland, Ireland
1988 Member, Internal Medicine, Royal College of Physicians of Ireland, Ireland

2. EMPLOYMENT

Current Appointments
2015 Feb - present Consultant Oncologist, Oncology, The Scarborough Hospital, Toronto, Ontario, Canada
Gerard Christopher MORTON

2011 - present  Associate Professor, Radiation Oncology, Faculty of Medicine, University of Toronto, Toronto, Ontario, Canada
2007 - present  Staff, Dept of Surgery, North York General Hospital, Toronto, Ontario, Canada
1995 - present  Radiation Oncologist, Odette Cancer Centre, Sunnybrook Health Sciences Centre, Toronto, Ontario, Canada

Previous Appointments

HOSPITAL
2013 Feb - 2015  Head - Radiation Oncology, Radiation Oncology, Simcoe Muskoka Regional Cancer Program (SMRCP), Barrie, Ontario, Canada

UNIVERSITY - RANK
1996 - 2011  Assistant Professor, Radiation Oncology, Faculty of Medicine, University of Toronto, Toronto, Ontario, Canada
1995 - 1996  Lecturer, Radiation Oncology, Faculty of Medicine, University of Toronto, Toronto, Ontario, Canada

3. HONOURS AND CAREER AWARDS

Teaching and Education Awards

LOCAL
Received
2010 - 2011  Best Academic Half-Day, Dept of Radiation Oncology, Faculty of Medicine, University of Toronto, Toronto, Ontario, Canada
2010  Best Guest Lecture, Dept of Radiation Oncology, Faculty of Medicine, Medical Radiation Sciences Program, University of Toronto, Toronto, Ontario, Canada

4. PROFESSIONAL AFFILIATIONS AND ACTIVITIES

Professional Associations

1997 - present  American Brachytherapy Society
1997 - present  Canadian Brachytherapy Group
1994 - present  American Society for Therapeutic Radiology and Oncology
1993 - present  Canadian Association of Radiation Oncology
1993 - present  Canadian Medical Association
1993 - present  European Society of Therapeutic Radiation Oncology
1993 - present  Ontario Medical Association
2014  Member, American Brachytherapy Society Education Task Force
2014  Associate Editor, Brachytherapy
2014  Chair, Royal College of Physicians & Surgeons of Canada - AFC Brachytherapy Working Group
Gerard Christopher MORTON

Administrative Activities

INTERNATIONAL

American Brachytherapy Society
2011 - 2013  **Member**, Board of Directors

American Society of Clinical Oncology
2012 - present  **Member**, Hormone therapy for prostate cancer consensus panel

Radiation Therapy Oncology Group
2004 - present  **Principal Investigator**, Centre Principal Investigator
(Ontario Representative).

NATIONAL

Canadian Association of Radiation Oncologists
2015 - present  **Ontario Director**, Board of Canadian Association of Radiation Oncologists, Ontario, Canada.
2009  **Member**, Annual Scientific Meeting, Organizing Committee, Ontario, Canada.
2005 - 2011  **Chair**, ACURA Advisory Board
2001  **Chair**, RADIANT Program, Canada.

Canadian Brachytherapy Group
2008 - 2010  **President**, Canadian Brachytherapy Group

Genito-Urinary Radiation Oncologists of Canada (GUROC)
2001 - present  **Member**, Steering Committee

Royal College of Physicians and Surgeons of Canada
2014 - present  **Chair**, Brachytherapy AFC Committee, Faculty of Medicine, Dept of Radiation Oncology, Ontario, Canada.
2010 - present  **Member**, Radiation Oncology Specialty Committee, Canada.
(Onatario Representative).
2014  AFC Brachytherapy Working Group, Faculty of Medicine, Dept of Radiation Oncology, Radiation Oncology, Ontario, Canada.
2001 - 2006  **Member**, Examination Board in Radiation Oncology

PROVINCIAL / REGIONAL

Cancer Care Ontario
2010 - present  **Member**, Prostate Disease Pathway Management Initiative, Ontario, Canada.
2009  **Member**, Models of Care of Steering Committee, Ontario, Canada.
2007 - 2009  **Chair**, Program in Evidence Based Care: Image Guided HDR Brachytherapy for Cervical Cancer, Ontario, Canada.

College of Physicians and Surgeons of Ontario

Ontario Association of Radiation Oncologists
Gerard Christopher MORTON

2008 - 2012  Chair, Ontario Association of Radiation Oncologists

Ontario Medical Association
2009  Chair, Section of Radiation Oncology

Simcoe-Muskoka Regional Cancer Program
2013 - 2014  Regional Lead, Radiation Oncology, Ontario, Canada.

LOCAL

Odette Cancer Centre
2004 - 2010  Co-Chair, Genito-Urinary Site Group, Toronto, Ontario, Canada.
                          Radiation Oncology.
2003 - 2012  Head, Brachytherapy Program, Toronto, Ontario, Canada.
                          Radiation Oncology.

Sunnybrook Health Sciences Centre
2003 - 2009  Member, Research Ethics Board, Toronto, Ontario, Canada.

University of Toronto
1996 - 2000  Member, Oncology II Research Ethics Board, Toronto, Ontario, Canada.

1. GRANTS, CONTRACTS AND CLINICAL TRIALS

PEER-REVIEWED GRANTS

FUNDED
2013 Jul - 2013 Dec  Principal Investigator. A Randomized Phase II Trial of High Dose-Rate Brachytherapy as Monotherapy in Low and Intermediate Risk Prostate Cancer. CARO-ACURA award. 30,000 CAD

### NON-PEER-REVIEWED GRANTS

#### FUNDED

**2013**

**Principal Investigator.** RTOG 0815: A Phase III Prospective Randomized Trial of Dose-Escalated Radiotherapy With or Without Short-Term Androgen Deprivation Therapy for Patients With Intermediate-Risk Prostate Cancer RT. [Clinical Trials]

**2013**

**Principal Investigator.** RTOG 0924. Androgen Deprivation Therapy and High Dose Radiotherapy With or Without Whole-Pelvic Radiotherapy in Unfavorable Intermediate or Favorable High Risk Prostate Cancer: A Phase III Randomized Trial. [Clinical Trials]

**2013**

**Principal Investigator.** RTOG 0526. A Prospective Phase II Trial of Transperineal Ultrasound Guided Brachytherapy for Locally Recurrent Prostate Adenocarcinoma Following External Beam Radiotherapy. [Clinical Trials]

**2009**

**2007**

**Principal Investigator.** Single Fraction HDR Brachytherapy with Hypofractionated External Beam Radiotherapy in intermediate Risk Prostate Cancer – late toxicity and efficacy. Motorcycle Ride for Dad. Collaborator(s): Loblaw DA, Sankreacha R, Gardner S. 60,000. [Grants]

**2000 - 2001**

**Principal Investigator.** A Phase 2 Study of High Dose-Rate Brachytherapy combined with external beam radiotherapy and androgen blockade in locally advanced carcinoma of the prostate. Astra-Zeneca. Collaborator(s): Keller B. 60,000. [Grants]

**Principal Investigator.** ASCENDE-RT. A randomized phase III study comparing androgen suppression and pelvic EBRT followed by a high dose 3-d conformal boost versus androgen suppression and pelvic EBRT followed by a 125iodine brachytherapy implant boost for subjects with intermediate and high risk localized prostate cancer. BC Cancer Agency. [Clinical Trials]

**Principal Investigator.** Multi-Institution Phase II study of high dose-rate brachytherapy for intermediate risk prostate cancer. ACURA Award. [Clinical Trials]

**Principal Investigator.** One-arm, multi-center, international prospective study to assess the safety and efficacy of BioProtect biodegradable implantable balloon in prostate cancer subjects undergoing radiotherapy. BioProtect Inc. [Clinical Trials]

**Principal Investigator.** Phase II study: Neoadjuvant docetaxel followed by salvage RT plys 2-year hormone therapy for residual or recurrent prostate adenocarcinoma following radical prostatectomy (Docetaxel Prostate). Sanofi-Aventis Inc. [Clinical Trials]

**Principal Investigator.** A phase I/II study of single fraction high dose-rate (HDR) brachytherapy and hypofractionated external beam radiotherapy in intermediate risk carcinoma of the prostate. ACURA and Motorcycle Ride for Dad Awards. [Clinical Trials]

E. Presentations and Special Lectures

1. INTERNATIONAL

Invited Lectures and Presentations

2016 Jun 28 Invited Speaker. World Congress of Brachytherapy. San Francisco, California, United States.

2016 Jan 23 Invited Speaker. NRG Oncology Semi Annual Meeting. Atlanta, Georgia, United States.

2015 Nov 7 Invited Speaker. MRI to improve efficacy and reduce toxicity with Prostate HDR for High Risk Disease/Role of MRI in Prostate Brachytherapy. MD Anderson/ American Brachytherapy Society Conference. Houston, Texas, United States.

2014  **Invited Speaker.** Salvage HDR after previous external beam radiotherapy. American Brachytherapy Society Prostate Brachytherapy School. Chicago, Illinois, United States. Presenter(s): Dr. **Gerard Morton.**

2014  **Invited Speaker.** Prostate HDR Brachytherapy comes of age. University of Rochester. Rochester, New York, United States. Presenter(s): Dr. **Gerard Morton.**

2014  **Visiting Professor.** Department of Radiation Oncology, University of Rochester. Rochester, New York, United States.

2013 Apr  **Invited Speaker.** The latest advancements in prostate HDR brachytherapy. Elekta Web Education Program. United States.

2012  **Invited Lecturer.** How can we best use HDR brachytherapy to treat intermediate and high risk prostate cancer? UK and Ireland Prostate Brachytherapy Group. Leeds, United Kingdom.

2010  Brachytherapy Contouring Workshop. Annual Scientific meeting of the American Brachytherapy Society. Atlanta, Georgia, United States.

2008  Practical Workshop on Prostate High Dose-Rate Brachytherapy. World Congress of Brachytherapy. Boston, Massachusetts, United States.

2008  Salvage Options for Recurrent Prostate Cancer. The Radiotherapy Group of New South Wales Meeting. Sydney, Australia.

2005  HDR Brachytherapy of Prostate Cancer: Technical and Clinical Aspects. Micro-and Mini-Dosimetry and
International Prostate Cancer Treatment Workshops, Centre for Medical Radiation Physics, University of Wollongong. Wollongong, Australia.

2005  **Visiting Professor.** Dept of Radiation Oncology and Urology, St George Hospital. Sidney, Australia.

Presented Abstracts

2013  **Collaborator.** Concomitant Hypofractionated IMRT Boost for High-Risk Prostate Cancer: 5 Year Results. Presenter(s): .

2013  **Senior Responsible Author.** Does Prostate Biopsy after HDR Brachytherapy Have Any Clinical Significance?.

2013  Comparison of Biochemical and Toxicity Outcomes From a Contemporaneous Cohort Study of Low-Risk Prostate Cancer Treated With Different Radiation Techniques.

2011  Quality of life after pelvic radiotherapy with hypofractionated IMRT boost and long-term hormone therapy for locally advanced prostate cancer. American Society of Clinical Oncology 2011 Genito-Urinary Cancer

2010 Long-term results of an RTOG phase II trial (00-19) of external beam radiation therapy combined with permanent source brachytherapy for intermediate risk clinically localized adenocarcinoma of the prostate. American Society for Therapeutic Radiology and Oncology (ASTRO) Annual Meeting. San Diego, California, United States.

2008 Acute toxicity of single fraction HDR brachytherapy with hypofractionated external beam radiotherapy in intermediate risk prostate cancer. World Congress of Brachytherapy. Boston, Massachusetts, United States.

2007 A multicentre phase II study of high dose-rate brachytherapy boost in combination with external beam

2003 Impact Of New Software Tool In Treatment Planning For Prostate High-Dose Rate (HDR) Brachyth. 45th American Association of Physicists in Medicine (AAPM) Annual Meeting. San Diego, California, United States.

2003 An investigation of reoxygenation in high risk prostate cancer following high dose-rate (HDR) brachytherapy. European Society for Therapeutic Radiology and Oncology (ESTRO) Annual Meeting. Copenhagen, Denmark.

2001 How does histologic grade change over time on repeat biopsy in untreated, favorable grade localized prostate cancer. American Society for Therapeutic Radiology and Oncology (ASTRO) Annual Meeting. San Francisco, California, United States.

2001 Salvage radiotherapy for rising PSA or clinically palpable local recurrence following radical prostatectomy. American Society for Therapeutic Radiology and Oncology (ASTRO) Annual Meeting. San Francisco, California, United States.

2. NATIONAL

Invited Lectures and Presentations

2013  Invited Speaker. High dose rate brachytherapy to optimize dose delivery for prostate cancer. GU Radiation Oncologists of Canada. Montreal, Quebec, Canada.

2013  Invited Speaker. HDR Brachytherapy Research at Sunnybrook, doing more with less. Best of ACURA, Annual Scientific Meeting of the Canadian Association of Radiation Oncologists. Montreal, Quebec, Canada.

2008  High Dose-Rate Brachytherapy for Prostate Cancer. Nucletron Essentials in Brachytherapy Workshop. Quebec City, Quebec, Canada.

2006  Visiting Professor. Dept of Radiation Oncology, Memorial University of Newfoundland. St John’s, Newfoundland and Labrador, Canada.

2005  Prostate Contouring Workshop. Issues and Controversies in Prostate Cancer. Mont Tremblant, Quebec, Canada.
2005  Minimising acute effects of treatment: changing perspectives and challenges. Radiation Medicine Program, University of Toronto. King City, Ontario, Canada.

2001  Canadian Consensus on Prostate Cancer. Congress on Uro-Oncology. Ixtapa, Mexico.

2001  Visiting Professor. Cross Cancer Institute, Dept of Radiation Oncology, University of Edmonton. Edmonton, Alberta, Canada.

Presented Abstracts

2010 Acute and late toxicity of pelvic radiotherapy and concomitant hypofractionated IMRT boost combined with hormonal therapy for high risk prostate cancer. Canadian Association of Radiation Oncologists (CARO) Annual Scientific Meeting. Vancouver, British Columbia, Canada.

2009 Active surveillance with selected delayed intervention for localized prostate cancer: outcomes after thirteen years of follow-up. Canadian Association of Radiation Oncologists (CARO) Annual Scientific Meeting. Quebec City, Quebec, Canada.

2009 Can high dose-rate brachytherapy be given as a single fraction when used as a boost with external beam radiotherapy (EBRT) to treat prostate cancer? A comparison of two fractionation schedules. Canadian Association of Radiation Oncologists (CARO) Annual Scientific Meeting. Quebec City, Quebec, Canada.

2009 Prospective study evaluating salvage radiotherapy plus 2-year androgen suppression for post-radical prostatectomy patients with PSA relapse. Canadian Association of Radiation Oncologists (CARO) Annual Scientific Meeting. Quebec City, Quebec, Canada.

2007 Comparing Gleason Scores (GS) between initial and follow-up biopsy in untreated low to intermediate grade clinically localised prostate adenocarcinoma. Canadian Association of Radiation Oncology – Canadian Organization of Medical Physicists (CARO-COMP) Joint Annual Scientific Meeting. Toronto, Ontario, Canada.

2007 How does prostate high dose-rate (HDR) brachytherapy combined with supplemental external beam affect patients’ Quality of Life? Results from a Prospective Canadian Multicentre Study. Canadian Association of Radiation Oncology – Canadian Organization of Medical Physicists (CARO-COMP) Joint Annual Scientific Meeting. Toronto, Ontario, Canada.

2006 Quality of life after combined postoperative salvage radiotherapy and androgen suppression for recurrent adenocarcinoma of the prostate. Canadian Association of Radiation Oncology (CARO) Annual Scientific Meeting. Calgary, Alberta, Canada.

2006 Comparative study of dosimetry between high dose-rate and permanent prostate implant brachytherapies in patients with prostate adenocarcinoma. Canadian Association of Radiation Oncology (CARO) Annual Scientific Meeting. Calgary, Alberta, Canada.

2006 Prospective assessment of genitourinary and gastrointestinal toxicity of post-operative radiotherapy to the prostate bed following radical prostatectomy for pathologic T3 and/or positive surgical margins. Canadian Association of Radiation Oncology (CARO) Annual Scientific Meeting. Calgary, Alberta, Canada.
2006 Interfraction motion measured using 3D ultrasound and gold seed localization. Canadian Association of Radiation Oncology (CARO) Annual Scientific Meeting. Calgary, Alberta, Canada.

2006 A 3D imaging technique for brachytherapy planning and treatment in a single high dose-rate radiation operating suite. Canadian Association of Radiation Oncology (CARO) Annual Scientific Meeting. Calgary, Alberta, Canada.

2004 A dosimetric comparison of high dose-rate (HDR) and low dose-rate (LDR) prostate brachytherapy. Canadian Association of Radiation Oncology (CARO) Annual Scientific Meeting. Halifax, Nova Scotia, Canada.

2003 Hypofractionated IMRT boost for prostate carcinoma with on-line targeting of the prostate gland: patient specific PTV margins and acute toxicity results. Canadian Association of Radiation Oncology (CARO) Annual Scientific Meeting. Montreal, Quebec, Canada.

2003 Dosimetric comparison of 125I and 103Pd for breast permanent implant as an adjuvant technique. Canadian Association of Radiation Oncology (CARO) Annual Scientific Meeting. Montreal, Quebec, Canada.

2003 Inefficacy of salvage radiotherapy for clinically isolated local recurrence of prostate adenocarcinoma at the prostate bed following radical prostatectomy. Canadian Association of Radiation Oncology (CARO) Annual Scientific Meeting. Montreal, Quebec, Canada.

2003 Uterine perforation detection during selectron insertion with routine pelvic CT. Canadian Association of Radiation Oncology (CARO) Annual Scientific Meeting. Montreal, Quebec, Canada.

2003 High dose-rate (HDR) brachytherapy boost for high risk localized prostate cancer: feasibility and analysis of acute toxicity. Canadian Association of Radiation Oncology (CARO) Annual Scientific Meeting. Montreal, Quebec, Canada.

2003 Is there a progression of histologic grade from radical prostatectomy to local recurrence in patients with clinically isolated local recurrence following RP? Canadian Association of Radiation Oncology (CARO) Annual Scientific Meeting. Montreal, Quebec, Canada.

2003 An investigation of the effects of high dose-rate brachytherapy on prostate cancer oxygenation. Canadian Association of Radiation Oncology (CARO) Annual Scientific Meeting. Montreal, Quebec, Canada.

2003 PSA doubling time (PSADT) of untreated, clinically localized low to intermediate grade prostate adenocarcinoma. Canadian Association of Radiation Oncology (CARO) Annual Scientific Meeting. Montreal, Quebec, Canada.

2002 Role of serial bone scans for the follow-up of low to intermediate grade clinically localized prostate cancer managed with a watchful observation protocol. Canadian Association of Radiation Oncology (CARO) Annual Scientific Meeting. Toronto, Ontario, Canada.

2002 Change in Gleason Score on repeat biopsy in untreated low to intermediate grade, clinically localised prostate adenocarcinoma. Canadian Association of Radiation Oncology (CARO) Annual Scientific Meeting. Toronto, Ontario, Canada.

2002 Efficacy of post-operative adjuvant radiotherapy (RT) for pathological T3 and/or positive resection margin prostate carcinoma with undetectable post-operative PSA following radical prostatectomy. Canadian Association of Radiation Oncology (CARO) Annual Scientific Meeting. Toronto, Ontario, Canada.

2002 Assessment of prostate cancer microvasculature using dynamic magnetic resonance imaging. Canadian Association of Radiation Oncology (CARO) Annual Scientific Meeting. Toronto, Ontario, Canada.

2000 PSA doubling time of prostate carcinoma managed with watchful observation alone. Canadian Association of Radiation Oncology (CARO) Annual Scientific Meeting. Edmonton, Alberta, Canada.

2000 How does histologic grade change over time in untreated localized prostate cancer? Canadian Association of Radiation Oncology (CARO) Annual Scientific Meeting. Edmonton, Alberta, Canada.

1999 Dosimetric effect of post implant prostate swelling. Canadian Association of Radiation Oncology (CARO) Annual Scientific Meeting. Montreal, Quebec, Canada.

1999 Watchful observation of asymptomatic favourable grade prostate carcinoma with selective delayed intervention based on PSA, histologic and/or clinical progression. Canadian Association of Radiation Oncology (CARO) Annual Scientific Meeting. Montreal, Quebec, Canada.

1996 Whole abdominal radiotherapy alone or preceded by 2 cycles of cisplatin in the post-operative management of ovarian cancer, with chemotherapy at time of relapse. Canadian Association of Radiation Oncology (CARO) Annual Scientific Meeting. Halifax, Nova Scotia, Canada.

3. PROVINCIAL / REGIONAL

Invited Lectures and Presentations

2015 Nov 11 **Distinguished Speaker.** Meeting the Growing Need for Prostate Brachytherapy. Credit Valley Regional Cancer Centre. Toronto, Ontario, Canada.

2014 **Invited Lecturer.** Why Androgen Deprivation and Radiation for Prostate Cancer? Royal Victoria Hospital.
Gerard Christopher MORTON

Barrie, Ontario, Canada. Presented at evening symposium to oncology nurses, , Ontario.

2013 **Invited Lecturer.** Prostate HDR Brachytherapy: what, why and how? Queens University, Kingston. Ontario, Canada.

2011 Prostate HDR Brachytherapy Workshop. GUROC meeting. Toronto, Ontario, Canada.

2010 **Visiting Professor.** Dept of Radiation Oncology, Northern Ontario School of Medicine. Thunder Bay, Ontario, Canada.

2010 High Dose-Rate Brachytherapy for Prostate Cancer. Grand Rounds, Durham Regional Cancer Centre. Oshawa, Ontario, Canada.

2010 Clinical Trials. Canadian Prostate Cancer Network. Toronto, Ontario, Canada.

2009 How we find better treatment through research. Annual Summit, Motorcycle Ride for Dad. Ottawa, Ontario, Canada.

2008 Brachytherapy for Prostate Cancer. Interdisciplinary Uro-Oncology Rounds. Surrey, British Columbia, Canada.

2007 Prostate Brachytherapy: Permanent Seed or HDR Monotherapy? Oncology Grand Rounds, McGill University Health Centre, Montreal General Hospital. Montreal, Quebec, Canada.

2007 All you Need to Know about your Prostate. Kiwanis Club. Toronto, Ontario, Canada.

2006 **Visiting Professor.** North Eastern Ontario Regional Cancer Centre, Dept of Radiation Oncology. St John’s, Ontario, Canada.
2005 Visiting Professor. Hamilton Regional Cancer Centre, Dept of Radiation Oncology, McMaster University. Hamilton, Ontario, Canada.

2002 Prostate Brachytherapy – the ABCs. Medical Grand Rounds, University of Saskatchewan. Saskatoon, Saskatchewan, Canada.

2002 Prostate Brachytherapy – is it worth the trouble? Interdisciplinary Oncology Rounds, University of Saskatchewan. Saskatoon, Saskatchewan, Canada.

2002 Update on Prostate Brachytherapy. Regional Uro-Oncology Meeting. Huntsville, Ontario, Canada.

2001 Prostate Brachytherapy in Early Stage Prostate Cancer. Oncology Grand Rounds, Queens University. Kingston, Ontario, Canada.

Media Appearances

2008 Apr 30 Ride for Dad Funds Important Research. The Ottawa Citizen. Ottawa, Ontario, Canada.

1. INNOVATIONS AND DEVELOPMENT IN TEACHING AND EDUCATION

2014 Jul - present  AFC Diploma in Brachytherapy, Faculty Development, Royal College Physicians & Surgeons of Canada, Royal College of Physicians & Surgeons of Canada
Development of National Training course in Brachytherapy with Royal College Diploma Certification.

G. Research Supervision

1. PRIMARY OR CO-SUPERVISION

Undergraduate MD

2016 Mar - 2016 Apr  Primary Supervisor. Medical Student. Robert Murphy, Medical Science. Analysis of Outcome measures after Prostate Cancer Treatment - Chart Review.
Postgraduate MD

2013  

2009  
**Primary Supervisor.** Clinical Fellow. G Tsang. *Prospective study of changes in health-related quality of life following single fraction HDR brachytherapy.*

2008  
**Primary Supervisor.** Clinical Fellow. A Kamran. *Prospective study of acute toxicity of single fraction HDR brachytherapy.*

2007  
**Primary Supervisor.** H Soliman. *Modeling study of tolerance to HDR catheter displacement in HDR prostate brachytherapy.*

2007  
**Primary Supervisor.** R Holly. *Use of in-room cone-beam CT scan to correct for catheter displacement in prostate HDR brachytherapy.*

2007  
**Primary Supervisor.** R Holly. *Use of megavoltage cone-beam planning for patients undergoing HDR prostate brachytherapy and hip prostheses.*

2007  
**Primary Supervisor.** S Myrehaug. *Use of megavoltage cone-beam planning for patients undergoing HDR prostate brachytherapy and hip prostheses.*

2005  
**Primary Supervisor.** Clinical Fellow. T Lim. *Digital tomosynthesis for on-line image guidance of prostate cancer.*

2005  
**Primary Supervisor.** Clinical Fellow. T Lim. *Multicentre phase II clinical trial of prostate HDR brachytherapy in prostate cancer.*

2004  
**Primary Supervisor.** Y Wang. *Comparison of HDR and permanent seed dosimetry.*

2004  
**Primary Supervisor.** Clinical Fellow. M Pearse. *Prospective study of 3D ultrasound for on-line image guidance during prostate radiotherapy.*

2003  
**Primary Supervisor.** A Al Hebshi. *Dosimetric comparison of LDR and HDR prostate brachytherapy.*

2002  
**Primary Supervisor.** Clinical Fellow. B Yap. *A prospective study of changes in prostate hypoxia following high dose-rate brachytherapy.*

1996 - 1997  
**Primary Supervisor.** L Dawson. *Prospective study of target position variability throughout prostate radiotherapy.*

1996  
**Primary Supervisor.** L Dawson. *Fulminant hepatic failure associated with bicalutamide.*

1996  
**Primary Supervisor.** E Chow. *Fulminant hepatic failure associated with bicalutamide.*

Continuing Education

2013  
**Primary Supervisor.** Radiation Therapist. L D’Allimonte. *Significance of biopsy findings following HDR brachytherapy.*

Clinical Research Fellow (MD)

2015 Jul - 2016 Jun  

2014  

2014  
Curriculum Vitae

Sten Myrehaug
B.Sc., MD, FRCPC

A. Date Curriculum Vitae is Prepared: 2016 August 11

B. Biographical Information

Primary Office
Department of Radiation Oncology
Odette Cancer Centre, Sunnybrook Health Sciences Centre
2075 Bayview Avenue
Toronto, Ontario, Canada

1. EDUCATION

Degrees
2001 - 2005 MD, Special Training in Research, Medicine and Dentistry, University of Alberta
1997 - 2001 BSc with Distinction, Faculty of Science, University of Alberta

Postgraduate, Research and Specialty Training
2010 - 2011 Clinical Research Fellowship, Radiation Oncology Branch, National Cancer Institute, National Institutes of Health

Qualifications, Certifications and Licenses
FRCPC, Radiation Oncology, Royal College of Physicians and Surgeons of Canada

2. EMPLOYMENT

Current Appointments
2015 Jul - present Assistant Professor, Radiation Oncology, University of Toronto

3. HONOURS AND CAREER AWARDS

Distinctions and Research Awards

INTERNATIONAL
Received
2004 Gold Humanism Honor Society Award, Arthur P. Gold Foundation. (Distinction)

NATIONAL
Received
1997 Governor-General’s Academic Medal, Governor General of Canada (Camrose Composite High School). (Distinction)

LOCAL
Received
2005 Dianne Dompe Memorial Scholarship, University of Alberta, Faculty of Medicine and Dentistry. (Distinction)
2004 - 2005 Dean’s Honour Roll, University of Alberta, Faculty of Medicine and Dentistry. (Distinction)
2002 Jason Lang Scholarship, University of Alberta, Faculty of Medicine and Dentistry. (Distinction)
1997 - 2001 Dean’s Honour Roll, University of Alberta, Faculty of Science. (Distinction)
1997 Entrance Scholarship, University of Alberta, Faculty of Science. (Distinction)

4. PROFESSIONAL AFFILIATIONS AND ACTIVITIES

Professional Associations

Member, American Society of Radiation Oncology
Member, AOSpine
Member, Arthur P. Gold Foundation Gold Humanism Honor Society
Member, Canadian Association of Radiation Oncology
Member, Society for Neuro-Oncology

Administrative Activities

NATIONAL
Canadian Cancer Society Research Institute
2015 - present QA Lead - SC-24 Clinical Trials
2011 - 2015 Durham Regional Cancer Centre Representative, NCIC-CTG

LOCAL
Durham Regional Cancer Centre
2011 - 2015 Clinical Trials Lead, Department of Radiation Oncology
2001 - 2015 Member, CNS Program Development

University of Toronto
2009 - 2010 Chief Resident, Department of Radiation Oncology
2007 - 2008 Senior Resident, Odette Cancer Centre, Department of Radiation Oncology

EDUCATION

Degrees
1970 - 1976 M.B., B.CH., B.A.O. National University of Ireland at University College, Dublin, Ireland
1964 - 1970 Clongowes Wood Jesuit College, Naas, County Kildare, Ireland
1961 - 1964 Immaculate Heart of Mary School, Scarsdale, New York, United States
1960 - 1961 St. Killian’s German Preparatory School, Dublin, Ireland
1956 - 1960 L’Ecole Francaise de Berne, Switzerland

Postgraduate, Research and Specialty Training

1983 - 1984 Clinical Fellow, Radiation Oncology, Department of Radiation Oncology, Princess Margaret Hospital, Toronto, Canada
1982 - 1983 Chief Resident, Radiation Oncology, Department of Radiation Oncology, Princess Margaret Hospital, Toronto, Canada
1980 - 1982 Resident, Radiation Oncology, Department of Radiation Oncology, Princess Margaret Hospital, Toronto, Canada
1979 - 1980 Clinical Fellow, Medical Oncology, Princess Margaret Hospital, Toronto, Canada
1977 - 1979 Resident, Internal Medicine and Medical Oncology, St. Vincent’s University Hospital, Dublin, Ireland
1977 Jan - 1977 Jun Internship, Surgery, St. Vincent’s University Hospital, Dublin, Ireland
1976 Jul - 1976 Dec Internship, Medicine, St. Vincent’s University Hospital, Dublin, Ireland

Qualifications, Certifications and Licenses

2008 FFRRCSI (Hon) Honorary Fellow, Faculty of Radiologists, Royal College of Surgeons in Ireland, Ireland
1999 F.R.C.P.I, Fellow, Internal Medicine, Royal College of Physicians in Ireland, Ireland
1984 F.R.C.P.C. Radiation Oncology, Royal College of Physicians and Surgeons of Canada, Canada
1984 Diploma, American Board of Radiation Oncology, United States
1983 C.S.P.Q., Certified Specialist, Radiation Oncology, Province of Quebec, Canada
1978 M.R.C.P.I., Member, Internal Medicine, Royal College of Physicians in Ireland, Ireland
2. EMPLOYMENT

Current Appointments

2007 – Present  Clinician-Scientist, Ontario Association of Radiation Oncologist, Canada
2008 - Present  Leader, Head and Neck Site Team, Princess Margaret Hospital, University Health Network, Toronto, Canada
2005 - Present  Associate Member, Graduate Faculty, Institute of Medical Science, University of Toronto, Canada
2002 - Present  Professor, Department of Radiation Oncology, University of Toronto, Canada
2001 – Present  Clinician-Scientist, Ontario Cancer Institute, University Health Network, Toronto, Canada
1999 - Present  Bartley-Smith/Wharton Chair, Radiation Oncology, Princess Margaret Hospital, University of Toronto, Canada
1991 Jan - present  Head, Sarcoma Site Group, Department of Radiation Oncology, Princess Margaret Hospital, Toronto, Canada
1985 - Present  Radiation Oncologist, Department of Radiation Oncology, Princess Margaret Hospital, Toronto, Canada

Previous Appointments

HOSPITAL

2001 - 2012  Associate Director, Strategy and Planning, Radiation Medicine Program, Princess Margaret Hospital, Toronto, Canada
2001 - 2002  Head, IMRT Clinical Implementation, Radiation Medicine Program, Princess Margaret Hospital, Toronto, Canada
1999 - 2008  Head, Sarcoma Site Team, Princess Margaret Hospital, University Health Network, Toronto, Canada
1995 - 2006  Head, Head and Neck Site Group, Department of Radiation Oncology, Princess Margaret Hospital, Toronto, Canada
1984 - 1985  Active Staff Member, Department of Radiation Oncology, Montreal General Hospital, Montreal, Canada
1984 - 1985  Active Staff Member, Department of Radiation Oncology, Royal Victoria Hospital, Montreal, Canada
1984 - 1985  Active Staff Member, Department of Radiation Oncology, Jewish General Hospital, Montreal, Canada
1984 - 1985  Consultant Member, Radiation Oncology, Queen Elizabeth Hospital, Montreal, Canada
1984 - 1985  Consultant Member, Radiation Oncology, St. Mary’s Hospital, Montreal, Canada
1984 - 1985  Consultant Member, Radiation Oncology, Reddy Memorial Hospital, Montreal, Canada
1984 - 1985  Consultant Member, Radiation Oncology, Montreal Children’s Hospital, Montreal, Canada
1984 - 1985  Active Staff Member, Division of Medical Oncology, Department of Internal Medicine, Montreal General Hospital, Montreal, Canada

UNIVERSITY - CROSS APPOINTMENT

2005 - Present  Professor, Department of Otolaryngology / Head & Neck Surgery, University of Toronto, Canada
1984 - 1985  Assistant Professor, McGill Cancer Centre, McGill University, Montreal, Canada

UNIVERSITY - RANK

1995 - 2002  Associate Professor, Department of Radiation Oncology, University of Toronto, Canada
3. HONOURS AND CAREER AWARDS

Distinctions and Research Awards

INTERNATIONAL

2014  **2014 Best of ASTRO Award** for “Refining UICC TNM Stage and Prognostic Groups for HPV-Related Oropharyngeal Carcinomas” which offers to most relevant and highly influential abstracts from American Society for Therapeutic Radiology and Oncology (ASTRO) Annual Meeting, USA. (PI)

2014  **The Roentgen Ray Lecturer**, “Examining our report card: Have we answered all the questions about local management of soft tissue sarcoma?” Fox Chase Cancer Center. Philadelphia, USA, May 1, 2014. (Distinction)

2013  **2013 Best of ASTRO Award** for “The Changing Profile of Outcome in Long Term Follow-Up of a Randomized Trial for Locally Advanced Head and Neck Cancer” which offers to most relevant and highly influential abstracts from American Society for Therapeutic Radiology and Oncology (ASTRO) Annual Meeting, USA.

2012  **PA Shah Oration, Foundation for Head and Neck Oncology of India**, India, Invited plenary lecture from an internationally recognized Head and Neck Oncologist at the annual meeting of the Foundation for Head and Neck Oncology, with life-time membership of the Foundation bestowed. October 2012

2010  **ARRO Best of ASTRO award** for “Outcome of radiotherapy alone in HPV associated oropharyngeal cancer”. American Society for Therapeutic Radiology and Oncology (ASTRO) 52nd Annual Meeting, San Diego, California, USA.

2008  **Honorary Fellow of the Faculty of Radiologists**, Royal College of Surgeons in Ireland, Ireland. (Distinction) (FFRRCSt,Hons).

2007  **Ira Spiro Distinguished Memorial Lecturer and Professor**, Harvard Medical School, Department of Radiation Oncology, Massachusetts General Hospital

2007  **Fellow of the American Society of Therapeutic Radiology and Oncology (FASTRO)**, United States. (Distinction)

**FASTRO designation is based upon meritorious service to ASTRO and to the field of radiation oncology including leadership/service, research, patient care and education**

2006  **Gilbert Fletcher Distinguished Professor and Memorial Lecturer**, University of Texas, MD Anderson Cancer Center, United States. (Distinction)

2005  **Juan Del Regato Gold Medal Recipient and Lecturer**, Juan Del Regato Foundation. (Distinction)

*Since 1977 the del Regato Foundation has sponsored annual lectures by distinguished members of the radiation oncology community from throughout the world.*

2005  **Knight Fellowship and Memorial Lecturer**, Queensland Cancer Fund. (Distinction)

“To bring to Queensland, Australia, an internationally known lecturer in the field of Clinical Cancer Management, from overseas (or from interstate if a suitable person is available) every second year”.
2005 Presidential Citation of the American Head and Neck Society, United States. (Distinction)

2004 Annual Oration in Radiation Oncology, Award of Honor, Radiological Society of North America, United States. (Distinction)

Invited plenary lecture from an internationally recognized Radiation Oncologist at the annual meeting of RSNA.

2004 John H. Wineman Visiting Professorship, University of Michigan, United States. (Distinction)

2004 The Outstanding Presentations at ASTRO 2004 award, invited by the Radiological Society of North America (RSNA). Five year results of a randomized Phase III trial (SR-2) of pre-operative vs post-operative radiotherapy in extremity soft tissue sarcoma.

1999 – 2000 President, Connective Tissue Oncology Society. (Distinction)

The only fully multidisciplinary international society in the world devoted to the advancement of knowledge and research in sarcoma. The membership comprises leading sarcoma specialists throughout the world.

NATIONAL

2016 Distinguished Visiting Professorship, Arnie Charbonneau Cancer Institute/Tom Baker Cancer Centre, Calgary, Alberta, Canada. (Distinction)

The plenary speaker of Atlantic Radiotherapy Forum, attended by Radiation oncologists, radiation therapists, and physicists from all 4 Atlantic Provinces. (Distinction)

2004 Best Paper in Clinical and Population-based Oncology, Canadian Association of Radiation Oncologists, Canada. (Distinction)

2002 Gordon Richards Lecturer, Canadian Association of Radiation Oncologists (CARO), Canada. (Distinction)

Annual Plenary (highlight) at CARO: endowed lecture by an internationally recognized Canadian radiation oncologist in memory of Professor Gordon Richards, founder of the Canadian Association of Radiologists.

1998 Order of Merit, National Cancer Institute of Canada, Canada. (Distinction)

For activities as Chair of the Canadian Committee on Cancer staging.

1996 Margaret and Norman Gosse Professorship, Canadian Cancer Society and Faculty of Medicine, Dalhousie University, Halifax, Canada. (Distinction)

LOCAL

2013 Research Leadership Award, Dept of Radiation Oncology, Faculty of Medicine, University of Toronto, Canada.

2007 – present Clinician Scientist, Ontario Association of Radiation Oncologists (OARO)

To promote excellence and build capacity in radiation medicine research in Ontario by providing partial base salary support to highly qualified, academically motivated radiation oncologists with independent research programs supported by external peer-reviewed funding, or the potential to develop independent research programs with peer-reviewed funding.

1999 - present Bartley-Smith/Wharton Chair in Radiation Oncology, University of Toronto, Canada. (Distinction)

Responsibility for Academic Leadership in Head and Neck Oncology in the Department of Radiation
Oncology at the Princess Margaret Hospital, a University of Toronto Teaching Hospital. Award includes use of $2,000,000 endowed fund for Research under the control of the Chair. Total Amount: 2,000,000 CAD

2006
**Award for Sustained Excellence in Research, Department of Radiation Oncology**, University of Toronto, Canada. (Research Award)

2003
**Best Annual Research Performance, Department of Radiation Oncology**, University of Toronto, Canada. (Distinction)

Inaugural award of the University of Toronto.

1973 - 1974
**Honours: Fourth Place in Class**, University College, Ireland. (Research Award)

**Third Year Medical Honours: Awarded University Scholarship Prize**.

1973
**Honours: Awarded University Scholarship Prize**, University College, Ireland

1973
**Recommended for publication**, University College, Ireland. (Research Award)

**Third Year Medical Examination: Paper submitted for examination Recommended for publication by University College Dublin Department of Pathology. Based on observations in Nigeria, West Africa Resulting Publication: O’Sullivan, B and McLaughlin, H.: “Burkitt’s Lymphoma – A Review”, J. Irish Medical Assoc. (1975), 68, 247-254.**

1970 - 1971
**Honours; Third place in class**, University College, Ireland. (Research Award)

**Pre-Medical Year, Awarded University Scholarship Prize**.

**Teaching Awards**

**INTERNATIONAL**

2015
**2015 Best of ASTRO Award** for “Risk Stratification for Relapse in Human Papillomavirus–Unrelated Oropharyngeal Carcinoma Treated With Definitive Radiation Therapy with or without chemotherapy” which offers to most relevant and highly influential abstracts from American Society for Therapeutic Radiology and Oncology (ASTRO) Annual Meeting, San Antonio, USA. (as the research supervisor of award recipient Shao Hui Huang)

2015
**2015 ICHNO Press Release** for "'Cure' is a realistic goal in HPV-related oropharyngeal cancer with oligometastasis” was selected for one of the two most relevant and highly influential abstracts from 5th ICHNO (International Conference on Innovative Approaches in Head & Neck Oncology), Nice, France. (as the research supervisor of award recipient Shao Hui Huang)

2014
**2014 Best of ASTRO Award** for “Potential Cure in Oropharyngeal Cancer with Oligo-Metastasis” which offers to most relevant and highly influential abstracts from American Society for Therapeutic Radiology and Oncology (ASTRO) Annual Meeting, San Francisco, USA. (as the research supervisor of award recipient Shao Hui Huang)

2011 May
**ESTRO Best Poster Award**, European Society of Therapeutic Oncology (ESTRO) 2011, London, United Kingdom. (as the research supervisor of award recipient Shao Hui Huang)

2010 Feb
**ASTRO/ASCO/AHNS Abstract Award**, 2010 Multidisciplinary Head and Neck Cancer Symposium, Chandler, USA (as the research supervisor of award recipient Shao Hui Huang)

2010
**ARRO Best of ASTRO award** for “Phase II study of intensity modulated radiation therapy for lower limb soft tissue sarcoma”. American Society for Therapeutic Radiology and Oncology, San Diego, USA (as the research supervisor of award recipient Colleen Dickie)

2009
**ARRO Best of ASTRO award** for “The relationship between location recurrence and radiotherapy treatment volume for soft tissue sarcoma treated with external beam radiotherapy and function preservation surgery”. American Society for Therapeutic Radiology and Oncology, San Diego, USA (as the research supervisor of award recipient Colleen Dickie)

2008 – present  American Society of Clinical Oncology
1995 - present  Founding Member, Connective Tissue Oncology Society
1988 - present  Founding Member, Canadian Association of Radiation Oncologists
1988 - present  European Society for Radiotherapy and Oncology
Administrative Activities

INTERNATIONAL

ICRU

2014 - present  **Member**, International Commission on Radiation Units & Measurements (ICRU)

US National Cancer Institute

2014 – present  **Chair** of Radiation Oncology and **Co-Chair**, Head and Neck Steering Committee

2006 - 2013  **Member**, Head and Neck Steering Committee

Union for International Cancer Control

2014 – present  **Member**, Global Task Force on Radiotherapy for Cancer Control (GTRFC)

2004 - present  **Coordinator**, Prognostic Factor Advisory groups, Prognostic factors Committee, Geneva, Switzerland.

2004 - present  **Coordinator**, Annual Meeting UICC TNM Committee, Prognostic Factor Advisory groups, Geneva, Switzerland.

*Statutory three-year term.*

1995 - 1998  **Member**, Annual Meeting UICC TNM Committee

1993 - 1997  **Member**, American Joint Committee on Cancer Staging, Task Force For Soft Tissue Sarcoma for the Fifth Edition of the TNM Staging System

1993  **International Co-ordinator**, Nasopharyngeal Stage Classification Revision  
*Revision (Appointee by official request of the UICC/TNM Project Committee and the AJCC for the planned Fifth Revision of the TNM Staging System). Task completed with approval of world-wide revision 12 January, 1995 (AJCC) and May 2, 1995 (UICC)*

American Joint Committee on Cancer (AJCC)

1999 - present  **UICC Representative**, Task Force for Bone Tumors for the 6th Edition of TNM

Center for Nasopharyngeal Cancer Research (NPC) Cancer Research (CNPCR)

2009 - present  **Member**, International Advisory Board, Hong Kong, China.  
*Under the aegis of the Area of Excellence (AoE) scheme.*
Advisory Board of Meta-Analysis of Chemotherapy in Nasopharyngeal Cancer
2010 – present Member, Steering Committee, Meta-analysis of Chemotherapy in Nasopharyngeal Cancer, Department of Statistics, Institut Gustave Roussy, Paris, France

Trinity College, Dublin
2010 – Present External Examiner and Curriculum Development, for BSc Discipline of Radiation Therapy. Trinity College, Dublin, Europe’s foremost program initiated by Mary Coffey from ESTRO

American College of Surgeons
2006 - 2009 UICC Representative, Commission on Cancer
2002 – 2006 Member, Sarcoma Committee

Sarcoma Alliance
2002 - present Member, Medical Advisory Board, United States.

Connective Tissue Oncology Society
1996 - present Member, Membership Committee
1996 - present Member, Board of Directors
1996 - present Member, Executive Committee
2000 Judge, Young Investigator Award at Annual Meeting
1999 Oct 24 - 2000 President, Membership Committee
1997 Nov - 1998 Nov Secretary, Executive Committee
By election of the members of the Society. In Milan, Italy (one year appointment).
1996 Oct - 1997 Oct Treasurer, Executive Committee
By election of the members of the Society. In Toronto, Canada (one year appointment).
1996 Oct Local Co-ordinator, Annual Scientific Meeting, Toronto.
1994 Sep Member, Founding Committee, Boston, Massachusetts. (Multidisciplinary society to further communication between clinicians and scientists interested in sarcomas. First President: Dr. Herman Suit, Harvard University)

American Society of Radiation Oncology (ASTRO), the American Society of Clinical Oncology (ASCO), and the American Society of Head and Neck Surgery (AHNS)
2016 Feb Member, Program Committee, Fifth Multidisciplinary Head and Neck Cancer Symposium
2014 Feb Member, Program Committee, Fourth Multidisciplinary Head and Neck Cancer Symposium
2010 Feb Member, Program Committee, Second Multidisciplinary Head and Neck Cancer Symposium
2007 Jan Member, Program Committee, First Multidisciplinary Head and Neck Cancer Symposium
American Society of Therapeutic Radiology and Oncology (ASTRO)

2004 - 2007  Member, Scientific Program Committee, Annual Meeting
2003 - 2004  Member, Scientific Program Committee, Annual Meeting

European Head and Neck Society (EHNS) and European Society of Therapeutic Radiology and Oncology (ESTRO)

2009 Feb  Member, Second Program Committee for the International Meeting on Innovative Approaches in Head and Neck Oncology (ICHNO)
2007 Feb 22 - 2007 Feb 24  Member, Program Committee, First International Meeting on Innovative Approaches in Head and Neck Oncology (ICHNO)
2007 Feb 22 - 2007 Feb 24  Invited Faculty, First International Meeting on Innovative Approaches in Head and Neck Oncology, Barcelona (ICHNO)

American College of Surgery Oncology Group

2004 - 2006  Co-Chair, Sarcoma Site Committee (Co-Chair, with Dr Peter Pisters)

American Society of Clinical Oncology (ASCO)

2003  Chairman, Sarcoma Program Committee for the Annual Scientific Meeting
2001 - 2003  Member, Scientific Program Committee, Sarcoma Committee
Specific Appointment by invitation to the Sarcoma Sub-committee.
Consultant, By invitation to the Scientific Program Sub-Committee for the 2001 ASTRO Annual Meeting

ECCO - ESMO - ESTRO European Cancer Congress (ECCO)

2012-2013  Chair, Sarcoma Program Committee for the Annual Scientific Meeting

TROG/NCIC CTG

2002 - 2006  Chairman, Independent Data Management Committee, Collaborative trial (TROG 03.01 / NCIC CTG ES 2) Trial in esophageal cancer

The Hong Kong Nasopharyngeal Study Group

2006 - 2012  Chairman, Data Safety Monitoring Committee of NPC-0501, Hong Kong
Randomized trial to evaluate the therapeutic gain by changing the chemo-radiotherapy from concurrent-adjuvant to induction-concurrent sequence, and the radiotherapy from conventional to accelerated fractionation for advanced nasopharyngeal carcinoma.

Interim Data Monitoring Committee (IDMC)

2004 May  External Reviewer, EORTC study 62961
National Cancer Centre, Singapore

Participated in Research and Administrative Seminars and Multidisciplinary Tumor Conferences at the National Cancer Centre, Singapore General Hospital, Tam Tock Seng Hospital; KK Hospital, and the National University Hospital.

2006 Feb 2 - 2006 Feb 9  Reviewer, Department of Radiation Oncology, Singapore.  
Participated in Research and Administrative Seminars and Multidisciplinary Tumor Conferences at the National Cancer Centre, Singapore General Hospital, Tam Tock Seng Hospital; KK Hospital, and the National University Hospital.

Lent V Workshop on Late Toxicity Metrics and Working Standards

2004 May 20  Representative of ACOSOG, NCIC CTG, and CARO, Annual Meeting UICC TNM Committee, Prognostic Factor Advisory groups, Rochester, New York.

2004 May 20  Member, Annual Meeting UICC TNM Committee, Prognostic Factor Advisory groups, Rochester, New York. *(Chaired by A Trotti and S Bentzen).*

Medical Research Council

2004 May  External Reviewer, VORTEX: A randomised trial of dose and volume of post-operative radiotherapy given to adult patients with extremity soft tissue sarcoma, United Kingdom.

National Institutes for Health

2003  Sub-Committee Chair, Progress Review Group (PRG), Sarcoma Round Table Discussion, National Cancer Institute

2003  Chair, Sub-Committee, Progress Review Group (PRG), Sarcoma Organ Site, National Cancer Institute

2002 Apr 14 - 2002 Apr 16  Member, Late effects Criteria and applications workshop, St Petersburg, Florida.

1998 Nov  Member, Sarcoma Strategy-Planning Meeting of the Cancer Therapy Evaluation Program, National Cancer Institute, Vancouver, Canada.

1996 Oct  Member, Sarcoma Strategy-Planning Meeting of the Cancer Therapy Evaluation Program, National Cancer Institute, Bethesda, Maryland.

LENT IV: Late effects Criteria and applications workshop

*Co-Chair (Clinical aspects) with A. Davis for Topic Focus Group.*

2002 Apr 14 - 2002 Apr 16  Member, Site Committee: Sarcoma/ Musculoskeletal, St Petersburg, Florida.

Sarcoma Disease Site Group

2002 Apr  Associate Leader, Sarcoma Site, Commission on Cancer  
*Representing American Society of Therapeutic Radiology and Oncology (ASTRO)*

International Society for Radiation Oncology

2001 Feb  Member, International Advisory Committee: For the International Congress of Radiation Oncology,
American Board of Radiology

2000 - 2001  **Guest Examiner**, Head and Neck and Skin Oncology Section (Radiation Oncology)
**By Invitation.**

1996 - 1997  **Guest Examiner**, Head and Neck and Skin Oncology Section (Radiation Oncology)
**By Invitation.**

Multidisciplinary Sarcoma Symposium

1993  **Member**, Boca Raton, Florida.
*Led to the formation of the Connective Tissue Oncology Society.*

University of Bergen, Norway

2009 – 2013  **Thesis Defense Committee Member** for PhD (Nina Louise Jebsen), University of Bergen, Norway

Other Organizations

2011  **Member**, International Advisory Board
*Areas of Excellence Scheme of the Government of China for the University of Hong Kong Program in Nasopharyngeal Cancer Translational Research.*

2005 Dec  **Member**, Trial Management Committee for the TRACE, San Francisco.
*(Tirapazamine, Radiation and Cis-Platin Evaluation) EFC5512 Study, a second industry sponsored FDA registration trial to confirm the anticipated results of “Headstart” (EFC4690).*

2005 May  **Member**, Trial Management Committee for the TRACE, Orlando.
*(Tirapazamine, Radiation and Cis-Platin Evaluation) EFC5512 Study, a second industry sponsored FDA registration trial to confirm the anticipated results of “Headstart” (EFC4690).*

2004 Dec  **Member**, Trial Management Committee for the TRACE, Nice, France.
*(Tirapazamine, Radiation and Cis-Platin Evaluation) EFC5512 Study, a second industry sponsored FDA registration trial to confirm the anticipated results of “Headstart” (EFC4690).*

*(EFC4690 Phase III randomized trial of concomitant radiation, cisplatin, and tirapazamine (SR259075) versus concomitant radiation and cisplatin in patients with advanced head and neck cancer). This is an industry sponsored FDA phase III randomized registration trial that evaluates the role of the hypoxic cell cytotoxin, Tirapazamine in the management of locally advanced head and neck cancer. The trial is open in 88 centres world-wide and on four continents. *(Anticipated accrual complete in April 2005 with target of 850 patients). Numerous Meetings (San Francisco, Vancouver, Copenhagen, New Orleans, Nice).*

2002 - 2004  **Member**, Radiotherapy quality assurance and hands on radiotherapy data evaluation for the HeadStart (EFC4690) Study in collaboration with the Quality Assurance Review Center (QARC), Providence, Rhode Island.
*Required numerous site meetings in Providence.*

1999 Sep  **Member**, Conference on Prognostic Factors and staging in Cancer Management: Contribution of Artificial Neural Networks and Other Statistical Methods, Arlington, Virginia.
NATIONAL

National Cancer Institute of Canada/Clinical Trials Group

2006 - present  Co-Chair, Head and Neck Site Group Working Group
Co-Chair (with Dr R Gilbert).

1987 - present  National Representative, Radiation Oncology, an Executive Committee of the Canadian Sarcoma
Group Reporting

1994 Jul - 1996  Member, Quality Assurance Committee, Kingston.

Canadian Sarcoma Group

1997 - present  Member, Executive Committee and Simultaneous member of the NCIC CTG Executive of the Sarcoma
Disease Site Committee

2000 - present  Co-Chairman, Subcommittee on Local Management the NCIC CTG Executive of the Sarcoma Disease
Site Committee
Co-Chairman (with R. Turcotte, University of Montreal).

2000 Feb 26 - 2000 Feb 27  Member, Organising Committee for the Third National Workshop of the Canadian Sarcoma Group
“Sarcomas: Molecular markers to therapeutics”

Other Organizations

1996 - present  Member, Canadian Soft Tissue Sarcoma Bank Research Committee
(To review scientific applications from investigators for access to tissue for research).

1997 Jun  Member, Workshop Planning Committee for Workshop “National Initiative to Improve Cancer
Survival Information”, Ottawa, Canada.

1997 Apr  Chairman, Organizing Committee for the Workshop “Canadian Leadership Consultation on Cancer
Staging”, National Cancer Institute of Canada (NCIC)
Final report (primary author: O’Sullivan B) of the Leadership Consultation on Cancer Staging in
Canada has been approved by the Advisory Committee on Cancer Staging, the Association of
Provincial Cancer Agencies, and the Canadian Council on Health Services Accreditation and has been
endorsed by the Board of the NCIC. Approved recommendation requires all cancer programs in
Canada to record and centrally report the TNM stage on every cancer patient.

1997 Feb  Representative of the Canadian Association of Radiation Oncologists, Meeting of the Planning
Group for a Coalition for the Framework for Cancer Surveillance in Canada

National Cancer Institute of Canada

1996 Nov  Member, NCIC Workshop on Surveillance Systems for Cancer Control in Canada, Kananaskis, Alberta.

1995 Nov  Member, NCIC Organising Committee, Workshop on the Pathologist’s Role in the Staging of Cancer,
Toronto.
A workshop sponsored by the National Cancer Institute of Canada and the Laboratory Centre for
Disease Control).

1995 - 1998  Chairman, Canadian Committee on Cancer Staging (CCCS), The Subcommittee on Staging of the
Advisory Committee on Cancer Control

1992 - 2001  Chairman, Site Specific Advisory Group for Head and Neck tumors of the Canadian Committee on
Cancer Staging

1992 - 2001  Chairman, Site Specific Advisory Group for Bone and Soft Tissue tumors of the Canadian Committee
Brian O’SULLIVAN: CV (July 1’2016)

on Cancer Staging

1992 - 1998  **Member**, Canadian Committee on Cancer Staging (CCCS), reporting to the Advisory Committee on Cancer Control

1991  **Member**, Canadian ad hoc TNM stage classification Committee

**22nd Annual Meeting of the Eastern Great Lakes Head and Neck Oncology Association**

1998 Nov 7  **Scientific Program Chair**, Toronto, Canada.

1998 Nov 7  **President**, Toronto, Canada.

*Sponsored by the Continuing Education Department, Faculty of Medicine, University of Toronto for AMA Category I credits and MOCOMP credits of the Royal College of Physicians and Surgeons of Canada.*

**Health Canada**

1997 Jun  **Member**, Workshop on “National Initiative to Improve Cancer Survival Information”, Ottawa.

**Royal College of Physicians and Surgeons of Canada**

1992 - 1994  **Member (ex-officio)**, Specialty Committee on Radiation Oncology) as *Chief Examiner for the specialty of Radiation Oncology*.

1992 - 1994  **Chairman**, Conjoint English and French Radiation Oncology Examination Board (*Statutory 3-year term appointment*).

1990 - 1994  **Member**, Board of Examiners in Radiation Oncology

1990 - 1993  **Local Co-ordinator**, Royal College Examination in Radiation Oncology

**PROVINCIAL / REGIONAL**

**Ontario Cancer Institute /Princess Margaret Hospital**

2001 - present  **Member**, Radiation Medicine Steering Committee

1998 - present  **Member**, Radiation Medicine Program Senior Advisory Committee

2004 - 2006  **Chairman**, Super Team I (Head and Neck and Central Nervous System), Radiation Medicine Program (*multidisciplinary team comprising radiation oncology, radiation therapy, and medical physics*).

**Province of Ontario**

2012 - present  **Project Lead**, E-Outcome Head & Neck Project, Cancer Care Ontario

2000 - present  **Representative of the Princess Margaret Hospital**, Radiation Waiting List Working Group, Faculty of Medicine, Department of Radiation Oncology

*A collaborative initiative of the Ontario Ministry of Health, The Institute for Clinical Evaluative Sciences (ICES, Ontario), the Princess Margaret Hospital, Toronto, and Cancer Care Ontario.*

1997 - present  **Member**, Ontario Cancer Treatment Practice Guidelines Initiatives, Sarcoma Disease Site Group, Cancer Care Ontario
LOCAL

Princess Margaret Hospital

2011  Member, Ambulatory Care Redesign Committee, Oncology

2011 - 2012  Chair, Strategic Planning Committee, Radiation Medicine Program, 5-year plan

2007 - 2008  Chair, Strategic Planning Committee, Princess Margaret Hospital Oncology Program, 5-year plan

2007 - 2008  Chair, Strategic Planning Committee

Oncology Program, 5 year plan.

2002 - 2003  Chair, Strategic Planning Committee, Radiation Medicine Program, 5-year plan

2001 - 2006  Chairman, Strategic Planning Working Group, Radiation Medicine Program

1999 - 2003  Member, Cancer Registry Committee

1992 - 1995  Representative Ambulatory Care Committee, Standing Committee of the Medical Advisory Committee

1989 - 1990  Coordinator/Liaison Officer, Radiation Services, Standing Committee of the Medical Advisory Committee

(A position created during the 1989/1990 Ontario provincial RT workload crisis to monitor statistics and to assist the Chief of the Department of Radiation Oncology in the management of radiotherapy workload).

1989 - 1990  Member, Task Force to assess recruitment and retention of Radiation Technologists, Standing Committee of the Medical Advisory Committee

University of Toronto

2002 - 2004  Member, Academic Promotions Committee, Faculty of Medicine, Dept of Radiation Oncology

2001 - 2004  Member, Decanal Promotions Committee, Faculty of Medicine

1996 - 2000  Member, Research Fellowship Selection Committee, Faculty of Medicine, Dept of Radiation Oncology

C. Research Funding

1. GRANTS, CONTRACTS AND CLINICAL TRIALS

PEER-REVIEWED GRANTS

FUNDED

2008 - 2010 Co-Investigator. The Ontario Clinical Practice Guideline #5-6a: the impact on physicians, practice and patients. National Cancer Institute of Canada (NCIC). CCS(Ontario Division). PI: Hall, S. Collaborators: Investigators: Groome P (Queens University, Kingston Ontario), O’Sullivan B (Princess Margaret Hospital, University of Toronto), Irish J (Princess Margaret Hospital, University of Toronto), Gilbert R (Princess Margaret Hospital, University of Toronto), Gregg R (Queens University, Kingston Ontario),
Meyer R (Queens University, Kingston Ontario). 300,000 CAD. [Grants].

2005 - 2008

*Competitive funding for development and testing of promising new cancer therapies from the Government of Ontario.*

2004 - 2007

**Principal Investigator.** Early detection, treatment variations and treatment delay in cancers of the oral cavity. Canadian Institutes of Health Research (CIHR). Collaborators: Principal investigators: Browman George P (McMaster University, Hamilton), Hall Stephen F (Queens’ University, Kingston), Irish Jonathan (University of Toronto), Mackillop William J (Queens’ University, Kingston), **O’Sullivan Brian** (University of Toronto). 520,596 CAD. [Grants].

2003 - 2006

**Co-Investigator.** New Measures for quantifying soft tissue fibrosis. Canadian Institutes of Health Research (CIHR). ITM - 66113. PI: Davis A. Collaborators: **O’Sullivan B** (University of Toronto), Bell RS (University of Toronto), Hill RP (University of Toronto), Lee P (University of Toronto), Levin W (University of Toronto), McCready D (University of Toronto), Wunder J (University of Toronto). 298,263 CAD. [Grants].

2001 Jan - 2006

**Co-Investigator.** Interdisciplinary health research team in musculoskeletal neoplasia. Canadian Institutes of Health Research (CIHR). 84031. PI: Bell RS. Collaborators: Davis AM (University of Toronto), Bramwell V (University of Western Ontario), Hill R (University of Toronto), Malkin D (University of Toronto), Andrulis I (University of Toronto), Wunder JS (University of Toronto), Kandel R (University of Toronto), Alman B (University of Toronto), **O’Sullivan B** (University of Toronto), Greenberg M (University of Toronto), Turcotte R (University of Montreal), Masri B (University of British Columbia). 5,997,985 CAD. [Grants].

2000 Jan

2000 Jan

**Co-Investigator.** The process and outcomes of care for soft tissue sarcoma of the extremities. Canadian Institutes of Health Research (CIHR). MOP - 43912. PI: Paszat L. Collaborators: **O’Sullivan B** (University of Toronto), Bell R (University of Toronto), Groome P (Queens’ University, Kingston), Mackillop W (Queens’ University, Kingston), Bramwell V (University of Western Ontario), Austin P (Institute for Clinical Evaluative Sciences). 216,439 CAD. [Grants].

1999 - 2002

*A collaborative study involving radiation biology (Hill RP), radiation oncology (O’Sullivan B), surgical oncology (Bell R) and cellular transplantation therapy (A. Keating) at the Ontario Cancer Institute / Princess Margaret Hospital, University of Toronto.*

Collaborators include experts in head and neck and limb surgery (Gullane P, Wunder J, Bell R, Neligan P), clinical and experimental radiation oncology (O’Sullivan B and Waldron J) and cellular transplantation techniques developed from bone marrow transplantation adapted to mesenchymal cell therapy (Keating A, medical and hematology oncology). Other collaborators on this Grant include expertise in interpretation of mesenchymal tissue and wound pathology (Kandel R), vascularity of healing tissue (Pang C), the use of viral transfection to provide markers for tracking transplanted cells (Sandhu K) and the development of valid instruments for measuring relevant clinical outcomes following surgery and radiotherapy (Davis A).

1999 - 2001

1996 - 1999

1993 Oct
Principal Investigator. A Phase III study of pre-operative external beam radiotherapy compared to post-operative external beam radiotherapy in the local management of curable extremity soft tissue sarcoma. National Cancer Institute of Canada (NCIC). Clinical Trials Group. SR 2. [Grants]

Trial Committee: Brian O’Sullivan (Chair), Aileen Davis, Robert Bell, Karen Goddard, Robert Turcotte, Pierre Chabot. $300,000 as per case funding.

1992 - 1999
Collaborator. Sarcoma Tumour Bank/Correlative Clinical Database. National Cancer Institute of Canada (NCIC). PI: Andrulis, IL and Bramwell, V. Collaborators: Dr. B. O’Sullivan (Radiation Oncologist), other Surgical Oncologists, and Basic Scientists. 855,000 CAD. [Grants]
Award $120,000 Annual and $15,000 Equipment.

1990 - 1993
Contract Grant to Patterns of Fractionation Study Group, American College of Radiology.

2014 Sep

2014 May  **Invited Speaker.** Examining our report card: Have we answered all the questions about local management of soft tissue sarcoma? The Roentgen Ray Lecturer. Fox Chase Cancer Center. Philadelphia, USA, May 1, 2014.

2014 Mar  **Invited Speaker.** Perspectives in de-escalating non-surgical management of oropharyngeal cancer: Danish Society for Head and Neck Oncology Annual Scientific Meeting. Copenhagen, Dan mark, March 7, 2014.

2013 Nov  **Invited Speaker.** The challenges in addressing the West’s fastest emerging cancer: HPV-related oropharyngeal carcinoma. 22nd Asia Pacific Cancer Conference, Oct 31-Nov 2, 2013, Tianjin, China.

2013 Oct  **Invited Speaker.** Treatment de-intensification in HPV/P16+ H&N cancer is justified in a subset of patients. Controversies in Head and Neck Oncology Symposium. Oct 19, 2013, Berlin, Germany.

2013 Oct  **Invited Speaker.** The Ongoing Search for Optimal Multimodality Therapy for NPC. Hong Kong Nasopharyngeal Cancer Symposium. Oct 16, 2013 Hong Kong, China.

2013 Jun  **Invited Speaker (Abstract discussant).** HPV/p16 topics in head and neck cancer. ASCO 2013, June 2, 2013, Chicago, USA.
2013 May  

2013 Apr  
**Invited Speaker.** Redefining the role of TNM in the era of HPV, hypoxia markers and other non-anatomic prognostic and predictive factors. 2nd ESTRO Forum, Geneva, April 20, 2013.

2013 Mar  
**Invited Speaker.** The Enigma of Distant Metastases in HPV-driven Oropharyngeal cancer. Cancer Center Grand Round. Department of Radiation Oncology, University of Pennsylvania, USA

2013 Mar  
**Invited Speaker:** Optimizing Multidisciplinary Local Management of Extremity Soft Tissue Sarcoma. Radiation Oncology Conference. Department of Radiation Oncology, University of Pennsylvania, USA

2012 Dec  
**Keynote Speaker:** Meet the professor. 34th AROIICON 2012. Kolkata, India.

2012 Dec  
**Invited Speaker.** Quality Assurance Programme in Head & Neck Cancers. 34th AROIICON 2012. Kolkata, India.

2012 Nov  

2012 Oct  
**Course Director:** Radiotherapy workshop: Adaptive radiotherapy and contouring. Indian Federation of Head & Neck Oncology. Ahmedabad, India

2012 Oct  
**Keynote Speaker.** Dr. P.A. Shah Oration: Challenges in minimizing morbidity after radiotherapy. Indian Federation of Head & Neck Oncology. Ahmedabad, India

2012 Oct  
**Facilitator.** Oral Cancer Panel Discussion. IFHNOS 2012 World tour 12th National Conference of FHNO October 1-31 Global Continuing Education program.

2012 Oct  
**Facilitator.** Treatment of the Neck Panel Discussion. IFHNOS 2012 World tour 12th National Conference of FHNO October 1-31 Global Continuing Education program.

2012 Oct  
**Lecturer.** Radiation Therapy. IFHNOS 2012 World tour 12th National Conference of FHNO October 1-31 Global Continuing Education program.

2012 Oct  
**Facilitator.** Salivary Tumors- Chair:Regional Expert. IFHNOS 2012 World tour 12th National Conference of FHNO October 1-31 Global Continuing Education program.

2012 Oct  
**Lecturer.** Radiation Therapy for Laryngeal Function Preservation. IFHNOS 2012 World tour 12th National Conference of FHNO October 1-31 Global Continuing Education program.

2012 Oct  
**Facilitator.** Stump the Faculty. IFHNOS 2012 World tour 12th National Conference of FHNO October 1-31 Global Continuing Education program.

2012 Oct  
**Facilitator.** Skull base Surgery. IFHNOS 2012 World tour 12th National Conference of FHNO October 1-31 Global Continuing Education program.

2012 Aug  
**Speaker.** Cancer Stage: A Neglected Cornerstone of Cancer Control. Cancer Staging in 2022. UICC World Cancer Congress. Montreal, Quebec, Canada.

2012 May  
**Invited Speaker.** HPV positive vs HPV negative oropharyngeal carcinoma: deescalating vs intensified treatment. ESTRO Conference. Barcelona, Spain.

2012 Apr  
**Invited Speaker.** Optimizing multidisciplinary Local Management of Extremity Soft Tissue sarcoma. Harvard University. Massachusetts, United States. Massachusetts General Hospital.

2012 Apr  

2012 Mar  
**Invited Speaker.** How Should We Manage Patients With Loco-regionally Advanced Head & Neck Cancer Who Are Not Suitable for Chemo-radiotherapy? AROI-ASTRO Conference, Tata Memorial Centre. Mumbai, India.

2012 Mar  
**Invited Speaker.** Radiological Anatomy & Target Delineation in the Neck. AROI-ASTRO Conference, Tata Memorial Centre. Mumbai, India.

2012 Mar  
**Invited Speaker.** Protocol Compliance and Plan Quality in H&N, Interactive Case Discussion Session. AROI-ASTRO
2012 Mar  
**Invited Speaker.** ICTR-PHE 2012 conference. Geneva. Visiting professor for a meeting to update the guidelines on nodal target volume delineation and to develop new guidelines for OAR delineation in the H&N area.

2012 Jan  

2012 Jan  

2011 Nov 6  
**Invited Speaker.** Management of the neck: With definitive non-operative treatment. NCI Head and Neck Cancer Steering Committee Clinical Trials Planning Meeting on Transoral Resection of Pharynx Cancer. Arlington, Virginia. **O’Sullivan B.**

2011 Nov  
**Invited Speaker.** Options for Improving Outcome in Laryngeal Cancer. Current Concepts in Head and Neck Cancer Combined Meeting of the Head and Neck Cancer Groups. Toronto. **O’Sullivan B.** Current Concepts in Head and Neck Cancer Combined Meeting of the Head and Neck Cancer Groups from Princess Margaret Hospital, Toronto, MD Anderson Cancer Center, Houston, and Memorial Sloan-Kettering Cancer Center, New York, MaRS Discovery District Auditorium.

2011 Sep 10  
**Invited Speaker.** Best quality evidence for improving the UICC TNM: balancing the science with the achievable. The First Symposium on Cancer Staging and Prognostication in China. Hong Kong, China. **O’Sullivan B.**

2011 Sep 9  

2011 Jun 22  
**Invited Speaker.** The current state of physical/spatial and molecular targeting in the treatment of nasopharyngeal carcinoma. 5th International Symposium on Nasopharyngeal Carcinoma. Penang, Malaysia. **O’Sullivan B.**

2011 May 9  
**Invited Speaker.** How should we manage patients with loco-regionally advanced head and neck cancer who are not suitable for chemo-radiotherapy. 2011 Annual Meeting, European Society for Therapeutic Radiology and Oncology (ESTRO). London, United Kingdom. **O’Sullivan B.**

2011 Feb 20  

2011 Feb 19  

2011 Feb  
**Invited Speaker.** Excellent Identical Outcomes for Radiation Alone vs Chemoradiation in Minimal Smoking HPV (+) N0-N2C Oropharynx Cancer Patients. ICHNO Conference. Barcelona. **O’Sullivan B.**

2010 Dec 10  
**Invited Speaker.** The NPC TNM stage classification of the UICC (and AJCC): Historical, Current, and Future Perspectives. 6th Chinese National Conference on Nasopharyngeal Cancer, 2010 Asia-Pacific Nasopharyngeal Cancer Congress. Fuzhou, China. **O’Sullivan B.**

2010 Nov 19  
**Invited Speaker.** An Update on Clinical Treatment of NPC. The Areas of Excellence Scheme Research Symposium, The Center for Nasopharyngeal Carcinoma Research, The University of Hong Kong. Hong Kong, China. **O’Sullivan B.**

2010 Nov 17  
**Invited Speaker.** Quality Control and Audit for Management of Head and Neck Cancers. Hong Kong Nasopharyngeal Cancer Study Group Training Seminar. Hong Kong, China. **O’Sullivan B.**

2010 Nov  
**Keynote Speaker.** Hong Kong Head and Neck Group and “Area of Excellence” Visiting Professor, University of Hong Kong. Hong Kong, China.

2010 Sep 16  
**Invited Speaker.** Enigmas and challenges in the diagnosis and treatment of HPV-related oropharyngeal cancer. 29th Annual Meeting of the European Society of Therapeutic Oncology (ESTRO). Barcelona, Spain. **O’Sullivan B.**

2010 Aug 21  
**Invited Speaker.** Taxonomy and Application of Cancer classifications. Session: Staging and Prognosis in Cancer, UICC World Cancer Congress. Shenzhen, China. **O’Sullivan B.**

2010 Jun 18  
**Invited Speaker.** Radiation Oncology of Head and Neck Cancer: the state, and reality, of the science. 4th World

2008 Dec 4 Invited Speaker. Lessons learnt from experience of conducting clinical trials – how to ensure successful completion and quality control. Scientific Symposium on Clinical Trials for Nasopharyngeal Cancer - The Hong Kong Nasopharyngeal Cancer Study Group and Central Coordination Committee (Clinical Oncology) Hong Kong Hospital Authority. O’Sullivan B.

Colombiano de Cancerología. Cali, Colombia. O’Sullivan B.

2008 Sep 26 Keynote Speaker. An Introduction to IMRT in Head & Neck Cancer. Symposium on New Technology in Radiation Oncology. Annual Scientific Meeting of the Faculty of Radiologists, Royal College of Surgeons in Ireland. Dublin, Ireland. O’Sullivan B.

2008 Sep 26 Plenary Lecturer. Diagnostic & Therapeutic Radiology in the Multidisciplinary Management of Soft Tissue Sarcomas. The Honorary Fellow’s Lecture to the Faculty of Radiologists, Annual Scientific Meeting of the Faculty of Radiologists, Royal College of Surgeons in Ireland. Dublin, Ireland. O’Sullivan B.

2008 Sep 25 Invited Speaker. NPC: Head and Neck’s most unusual mucosal cancer. Saint Lukes Hospital Visiting Professor Lecture. Dublin, Ireland. O’Sullivan B.

2008 Mar 13 Keynote Lecturer: Spanish Sarcoma Group – Aula Magna de la Casa de Convalescencia del Hospital Santa Creu y
2008 Mar 1  **Keynote Speaker.** “The Irish Cancer Society Lecturer” and Visiting Professor, Irish Association for Cancer Research. Newcastle, County Down, Northern Ireland, United Kingdom.

2008 Mar 1  **Invited Speaker.** The management of head and neck cancer in the era of Molecular Oncology. Irish Cancer Society Lecture, Irish Association for Cancer Research. Newcastle, County Down, Northern Ireland. O’Sullivan B.

2008 Feb 15  **Invited Speaker.** Opportunities to optimize the local management of soft tissue sarcoma. Department of Radiation Medicine, University of Wisconsin. Madison. O’Sullivan B.

2008 Feb 15  **Invited Speaker.** NPC: Head and Neck’s most unusual mucosal cancer. Department of Radiation Medicine, University of Wisconsin. Madison. O’Sullivan B.

2007 Dec 14  **Invited Speaker.** The changing management of oropharyngeal cancer. Queen Mary Hospital, University of Hong Kong. O’Sullivan B.

2007 Dec 12  **Invited Speaker.** The local management of soft tissue sarcoma. Queen Mary Hospital, University of Hong Kong. O’Sullivan B.

2007 Dec 12  **Keynote Speaker.** Staging and Prognostic Factors in NPC: from Ho to the UICC and AJCC. Inaugural Visiting Professorship Lecture, Department of Clinical Oncology, University of Hong Kong, Queen Mary Hospital. O’Sullivan B.

2007 Dec 11  **Invited Speaker.** Molecular Targeting in Head and Neck SCC: observations, challenges, and opportunities. Address to the Hong Kong Head and Neck Society, Excelsior Hotel. Hong Kong, China. O’Sullivan B.

2007 Oct  **Invited Speaker.** Multidisciplinary Collaborative Approaches for Planning and Delivery of Radiotherapy for Soft Tissue Sarcoma. 49th Annual Meeting of the American Society of Therapeutic Radiology and Oncology. Los Angeles, California. O’Sullivan B.

2007 Jul 31  **Invited Speaker.** Evolving tools for Guidance in decision making, treatment delivery and post treatment surveillance in the management of NPC. East-West Symposium on Nasopharyngeal Carcinoma, Twin Waters Resort. Sunshine Coast, Queensland, Australia. O’Sullivan B.

2007 Jul 31  **Round Table Discussant.** Intricacies of RT technique and delivery of NPC. East-West Symposium on Nasopharyngeal Carcinoma, Twin Waters Resort. Sunshine Coast, Queensland, Australia. O’Sullivan B. with Drs June Corry, Anne Lee, and Joseph Wee.

2007 Jul 27  **Invited Speaker.** Management Dilemmas of Incurable/Recurrent Head and Neck Cancer. 9th Annual Scientific Meeting of the Australia New Zealand Head and Neck Society. Brisbane, Australia. O’Sullivan B.

2007 Apr 9  **Invited Speaker.** Soft Tissue Sarcoma: no longer one disease scenario. Ira J Spiro Distinguished Memorial Lecturer, Ether Dome, Massachusetts General Hospital, Harvard Medical School. O’Sullivan B.

2006 Jun 5  Visiting Professor. Melbourne University Peter MacCallum Cancer Centre.

2006 May 19  Invited Speaker. Cancer Institute of New South Wales Plenary Lecturer, Trans Tasman Radiation Oncology Group (TROG), 18th Annual Meeting. NCIC current activities; future directions and potential collaborations. Lindeman Island, Queensland, Australia. O’Sullivan B.

2006 Feb 17  Invited Speaker. IMRT approaches in soft tissue sarcoma: opportunities and challenges. University of Texas MD Anderson Cancer Center 4th International Target Delineation Symposium for IMRT/#D CRT Treatment Planning. O’Sullivan B.

2006 Feb 8  

2006 Feb 7  

2006 Feb 7  
**Invited Speaker.** Host, tumor and environmental prognostic factors in cancer. Health Manpower Development Plan Visiting Expert in Radiation Oncology, Ministry of Health, National Cancer Centre. Singapore. O’Sullivan B.

2006 Feb 2  
**Invited Speaker.** Soft tissue sarcoma: no longer one disease, perspectives for radiation oncology”. Varian Lecture, Health Manpower Development Plan Visiting Expert in Radiation Oncology, Ministry of Health, 4 Seasons Hotel. Singapore. O’Sullivan B.

2006 Feb 2  

2006 Feb  
**Invited Speaker.** Audience Interactive ‘ASTRO’ Educational course on soft tissue sarcoma. Elekta lecture, Health Manpower Development Plan Visiting Expert in Radiation Oncology, Ministry of Health, Grant Hyatt Hotel. Singapore. O’Sullivan B.

2006 Jan 11  
**Keynote Speaker.** Refining the local management of soft tissue sarcoma. Department of Radiation Oncology Resident Teaching Rounds, Gilbert Fletcher Distinguished Professor, University of Texas, MD Anderson Cancer Center. Houston, Texas. O’Sullivan B.

2006 Jan 11  
**Keynote Speaker.** Realising the optimum from fractionated radiotherapy in HNSCC: evidence and challenges. Gilbert Fletcher Distinguished Lectureship, Department of Radiation Oncology, University of Texas, MD Anderson Cancer Center. Houston, Texas. O’Sullivan B.

2006 May  
**Invited Speaker.** Cancer Institute of New South Wales, Trans Tasman Radiation Oncology Group (TROG). Queensland, Australia. O’Sullivan B

2005 Dec 14  
**Invited Speaker.** Refining the local management of soft tissue sarcoma. Surgical Oncology Grand Rounds, Department of Surgical Oncology, Roswell Park Cancer Institute. Buffalo, New York. O’Sullivan B.

2005 Dec 12  
**Invited Speaker.** State University of New York, Department of Surgical Oncology and Department of Radiation Oncology, Roswell Park Cancer Institute. December 12-14th 2005.

2005 Dec 12  
**Invited Speaker.** Department of Surgical Oncology and Department of Radiation Oncology, Roswell Park Cancer Institute. Buffalo, New York. December 12-14th 2005.

2005 Nov 18  
**Invited Speaker.** Contemporary radiotherapy approaches in soft tissue sarcoma. Symposium: Multidisciplinary Management of Soft Tissue Tumors, at the 32nd Annual Scientific Meeting of the Clinical Oncological Society of Australia (COSA). Brisbane, Australia. O’Sullivan B.

2005 Nov 17  
**Invited Speaker.** The UICC Approach to Prognostic Factor Classification. Symposium: Staging and Prognosis, at the 32nd Annual Scientific Meeting of the Clinical Oncological Society of Australia (COSA). Brisbane, Australia. O’Sullivan B.

2005 Nov 17  
**Invited Speaker.** Overcoming geographic barriers: the Ontario Experience. Symposium: Overcoming geographic barriers, at the 32nd Annual Scientific Meeting of the Clinical Oncological Society of Australia (COSA). Brisbane, Australia. O’Sullivan B.

2005 Nov 14  
**Invited Speaker.** Sarcomas: inspirational disease and model for cancer care. Charles and Mary Knight Memorial Lecture, Queensland Cancer Fund. Brisbane, Australia. O’Sullivan B.

2005 Nov 11  
**Visiting Professor.** James Cook University School of Medicine, North Queensland Cancer Research Forum. Townsville, Queensland, Australia.
2005 Nov 11  **Invited Speaker.** Clinical research in sarcoma. North Queensland Cancer Research Forum, James Cook University School of Medicine. Townsville, Queensland, Australia. *O'Sullivan B.*

2005 Oct 8  **Invited Speaker.** Interactive “Refresher Course” on soft tissue sarcomas. 56th Annual Scientific Meeting, of the Royal Australian and New Zealand College of Radiologists (RANZCR). Sydney, Australia. *O'Sullivan B.*

2005 Oct 7  **Invited Speaker.** Contouring Workshop for the Quality Assurance Review Center (QARC) IMRT benchmark head and neck case. 56th Annual Scientific Meeting, of the Royal Australian and New Zealand College of Radiologists (RANZCR). Sydney, Australia. *O'Sullivan B.* with Peters L.

2005 Oct 6  **Invited Speaker.** The management of head and neck cancer in the era of image guidance. Keynote address to the Royal Australian and New Zealand College of Radiologists (RANZCR), 56th Annual Scientific Meeting. Sydney, Australia. *O'Sullivan B.*

2005 Jun 17  **Invited Speaker.** Challenges in International Trials in Nasopharyngeal Carcinoma: ways for improving quality assurance. UICC East-West Symposium on Nasopharyngeal Cancer. *O'Sullivan B.*

2005 May 24  **Invited Speaker.** The Management of Sarcoma of the Head and Neck. 43rd Annual Meeting of the American Society of Neuroradiologists. *O'Sullivan B.*

2005 Apr  **Invited Speaker.** Soft tissue sarcoma. American Society for Therapeutic Radiology and Oncology (ASTRO) School of Radiation Oncology 2005 Spring Refresher Course. Chicago, Illinois. *O'Sullivan B.*

2005 Apr  **Invited Speaker.** Radiation oncology controversies and new approaches in the management of skull base tumors. 16th Annual Meeting of the North American Skull Base Society. *O'Sullivan B.*

2005 Feb 26  **Keynote Speaker.** The management of nasopharyngeal carcinoma in the era of image guidance. 35th Annual Radiation Oncology Clinical Research Seminar, University of Florida. *O'Sullivan B.*

2004 Feb 12  **2nd Annual John H. Wineman Visiting Professor and Lecturer.** What is the best method of irradiating soft tissue sarcoma following the Canadian trial? Department of Radiation Oncology, University of Michigan. *O'Sullivan B.*

2004  **Keynote Speaker.** Radiotherapy in the management of soft tissue sarcomas: when and which volume to which dose? Department of Radiation Oncology and the Radiobiology Laboratory, St-Luc University Hospital. Brussels, Belgium. *O’Sullivan B.*
2004  
**Invited Speaker.** “Meet the Professor Luncheon”. Annual Meeting of the American Society of Therapeutic Radiology and Oncology. Invitation from the Radiation Oncology Residents and President of ASTRO.

2003 Oct  
**Invited Speaker.** Soft Tissue Sarcoma Teaching (Refresher) Course. 45th Annual Meeting of the American Society for Therapeutic Radiology and Oncology. Salt Lake City, Utah. **O’Sullivan B.** and Alektiar K.

2003 Jul  
**Invited Speaker.** Soft Tissue Sarcoma. Oncology Rounds, Emory University. Atlanta, Georgia. **O’Sullivan B.**

2003 Jun  

2003 Feb  
**Visiting Professor.** Staging of Nasopharyngeal Carcinoma – North American perspectives. UICC International Congress on Nasopharyngeal Carcinoma. Hong Kong. **O’Sullivan B.**

2003  
**Invited Speaker.** “Meet the Professor Luncheon”. Annual Meeting of the American Society of Therapeutic Radiology and Oncology. Invitation from the Radiation Oncology Residents and President of ASTRO.

2002 Nov  
**Visiting Professor.** Yale University. New Haven, Connecticut.

2002 Nov  
**O’Sullivan B.** Soft Tissue Sarcoma. Oncology Rounds and Visiting Professor, Yale University. New Haven, Connecticut.

2002 Oct  
**Co-moderator and Speaker.** Sarcoma Panel. 44th Annual Meeting of the American Society for Therapeutic Radiology and Oncology. New Orleans, Louisiana. **O’Sullivan B.** and Petersen I.

2002 Sep 17  

2002 Jul 3  

2002 Jul 2  
**Invited Speaker.** External beam radiotherapy in soft tissue sarcoma. Panel “Soft tissue sarcoma” at 18th UICC International Cancer Congress. Oslo, Norway. **O’Sullivan B.**

2002 Jun 17  

2002 Jun 17  

2002 May 10  
**Invited Speaker.** Balancing radiotherapy efficacy and morbidity in soft tissue sarcoma. Harvard University. Boston, United States. **O’Sullivan B.**

2002 May 10  
**Invited Speaker.** Harvard University, Department of Radiation Oncology, Dana Farber Cancer Center. Boston, Massachusetts, United States.

2002 Apr 18  

2001 Nov 9  
**Invited International Faculty and Speaker.** Radiotherapy options in soft tissue sarcomas of the head and neck. 3rd Annual Scientific Meeting of the Australian & New Zealand Head and Neck Society. Melbourne, Australia. **O’Sullivan B.** November 9th-10th, 2001.

2001 Nov 9  
**Invited International Faculty and Speaker.** Anaemia as a prognostic factor in cancer. 3rd Annual Scientific Meeting of the Australian & New Zealand Head and Neck Society. Melbourne, Australia. **O’Sullivan B.** November 9th-10th, 2001.

2001 Nov 9  
**Invited International Faculty and Speaker.** Perspectives on organ preservation in the management of carcinoma of the larynx. 3rd Annual Scientific Meeting of the Australian & New Zealand Head and Neck Society. Melbourne, Australia. **O’Sullivan B.** November 9th-10th, 2001.

2001 Apr  Invited Speaker. What are the new questions in the radiotherapy of soft tissue sarcomas. 25th Anniversary Meeting of the EORTC Soft tissue and Bone Sarcoma Group. Aarhus, Denmark. O’Sullivan B.

2001 Invited Speaker. “Meet the Professor Luncheon”. Annual Meeting of the American Society of therapeutic Radiology and Oncology. Invitation from the Radiation Oncology Residents and President of ASTRO.

2000 Oct  
**Visiting Professor.** Department of Orthopaedics, University of Berne, Switzerland.

2000 Aug  
**Invited Panelist (speaker).** Panel on the Management of Advanced Larynx Cancer. 5th International Conference on Head and Neck Cancer. San Francisco. **O'Sullivan B.**

2000 Feb  
**Visiting Professor and Speaker.** Pre-operative vs Post-operative radiotherapy in Soft tissue Sarcoma — results of the SR2 Trial. Department of Surgery, MD Anderson Cancer Center, University of Texas. **O'Sullivan B.**

2000 Feb  
**Visiting Professor.** University of Texas, Department of Surgery, MD Anderson Cancer Center.

1999 Oct  
**Invited Speaker.** Skin Carcinomas: Radiobiologic Principles, Radiotherapeutic Techniques and Clinical Management. ASTRO Refresher Course. 41st Annual Meeting of the American Society for Therapeutic Radiology and Oncology. San Antonio, Texas. **O'Sullivan B, Tsang R.**

1998 Oct 25  

1998 Oct 25  
**Invited Discussant and Moderator.** Poster Discussion Session – Head and Neck. 40th Annual Meeting of the American Society for Therapeutic Radiology and Oncology. Phoenix, Arizona. **O'Sullivan B, Harrison LB.**

1998 Jun 23  

1998 Feb  
**Invited Speaker.** The UICC Staging Classification of Carcinoma of the Nasopharynx. UICC Workshop on Nasopharyngeal Carcinoma. Singapore. **O'Sullivan B.**

1998 Feb  
**Invited Speaker.** Principles of Altered Fractionation in Head and Neck Cancer. UICC Workshop on Nasopharyngeal Carcinoma. Singapore. **O'Sullivan B.**

1997 Oct  
**Invited Panelist.** The New TNM Staging Classification of Carcinoma of the Nasopharynx in panel “Nasopharyngeal Carcinoma: Recent Advances in Staging and Treatment”. 39th Annual Meeting of the American Society for Therapeutic Radiology and Oncology. Orlando, Florida. **O'Sullivan B.**

1997 Jul  
**Invited Speaker.** Treatment of Laryngeal Cancer: International perspectives, approaches and outcomes. 46th Annual Meeting / 37th Voice Institute of the International Association of Laryngectomees. **O'Sullivan, B.**

1997 May 2  

1997 May 2  
**Keynote Speaker.** University of Berne, Klinik fur Radio-oncologie, UniversitatsSpital. Zurich, Switzerland.

1996 Dec  
**Invited Speaker.** The management and prevention of xerostomia in head and neck radiotherapy. Emory University. Atlanta, Georgia. **O'Sullivan B.**

1995 Sep  
**Invited Speaker.** Discussion of Pre-op vs. Post-op Radiotherapy in Soft Tissue Sarcoma / Update on Canadian Sarcoma Group Activities. First Scientific Meeting of the Connective Tissue Oncology Society. Boston, Massachusetts. **O'Sullivan, B.**

1995 Apr 28  
**Invited Speaker.** Laryngeal Cancer: are experts expert and do they design ethical studies. Meeting in honour of Professor William Duncan on the occasion of his retirement, Edinburgh University. Scotland. **O'Sullivan B.**

1994 Feb  
**Invited Speaker.** What factors affect specialists’ opinions on the management of advanced laryngeal cancer: results of an international survey of patterns of care. Symposium on Advanced Larynx Cancer, Second World Congress on Larynx Cancer. Sydney, Australia. **O'Sullivan, B.**

1994 Feb  
**Invited Speaker.** Outcome following radiotherapy in verrucous carcinoma of the larynx. Symposium on verrucous cancer of the larynx, Second World Congress on Larynx Cancer. Sydney, Australia. **O'Sullivan B.**

1993 Oct  

1990 Sep 13  Invited Speaker. Ethical Dilemmas in handling Patient Backlogs in Radiotherapy Practice. Division of Radiation Oncology, Christchurch Hospital. Christchurch, New Zealand. O’Sullivan, B.

1990 Sep 11  Keynote Speaker. Approach to the management of Head and Neck Cancer. Head and Neck Seminar, Department of Oncology, Faculty of Medicine, University of Otago. Christchurch, New Zealand. O’Sullivan, B.

2. NATIONAL
Invited Lectures and Presentations

2011 Oct 20 Invited Speaker. HPV-Associated Oropharyngeal Carcinoma: How should we address the Westerwer World’s fastest growing cancer? Oncology Grand Rounds, Royal Victoria Hospital (McGill University). Montreal, Quebec.

2007 Dec 6  **Invited Speaker.** Reaffirming the role of Pre-operative Radiotherapy in the management of Soft Tissue Sarcoma. Vancouver Cancer Centre, Radiation Oncology Rounds, University of British Columbia. O’Sullivan B.

2004  **Facilitator.** Contouring head and neck cancer. Workshop on IMRT target definition for head and neck cancer, Canadian Association of Radiation Oncologists (CARO). Halifax. O’Sullivan B. Workshop coordinated and chaired by Dr John Kim, PMH.

2002 Jul 31  **Invited Speaker.** Concurrent Chemotherapy and radiotherapy in the management of head and neck cancer. North and South American Investigators Meeting, Tirapazamine Study (Headstart). Vancouver, Canada. O’Sullivan B.

2002  **Invited Speaker.** IMRT in Head and Neck Cancer. The Royal College of Physicians and Surgeons of Canada Lecturer at the 26th Annual Meeting of the Eastern Great Lakes Head and Neck Oncology Association. O’Sullivan B.

2000 Feb  **Invited Speaker.** Loco-regional Control in soft tissue sarcomas – Canadian (NCIC-CTG SR2) and Toronto Experience. Third National Workshop of the Canadian Sarcoma Group “Sarcomas: Molecular Markers to Therapeutics”. O’Sullivan B.

1999  **Invited Speaker.** Performing at the Specialty Exams: suggestions from a former Chief Examiner. Canadian Association of Radiation Oncology, Residents section. O’Sullivan B.

1996 Nov  **Invited Speaker.** The multidisciplinary controversies in laryngeal carcinoma. Faculty of Medicine, Dalhousie University. Halifax, Nova Scotia, Canada. O’Sullivan B.

1996 Nov  **Invited Speaker.** Unknown Primary in Head and Neck Oncology. Department of Radiation Oncology, Dalhousie University. O’Sullivan B.

1996 Nov  **Invited Speaker.** Treatment of Carcinoma of the Oropharynx. Department of Medicine, Dalhousie University. O’Sullivan B.

1996 | **Invited Speaker.** What factors affect specialists’ recommendations for the treatment of laryngeal cancer? Annual Margaret and Norman Gosse Lecturer in Cancer, Canadian Cancer Society, and Faculty of Medicine, Dalhousie University. Halifax, Nova Scotia. O’Sullivan B. Public Lecture to the Canadian Cancer Society.

1993 Sep 12 | **Chairman and Speaker.** Symposium: Advances in Diagnosis and Treatment of Soft Tissue Sarcoma. Canadian Association of Radiation Oncologists, Royal College of Physicians and Surgeons of Canada. Vancouver. O’Sullivan, B.

### 3. PROVINCIAL / REGIONAL

2014 Jan 23 | **Invited Speaker.** Clinical Trial in Head and Neck Cancer. Cancer Care Ontario Head and Neck Community of Practice, CCO Offices, Toronto. O’Sullivan B.

2010 Dec 16 | **Invited Speaker.** A model for a Provincial Prospective Outcomes Database. Cancer Care Ontario Head and Neck Community of Practice, CCO Offices. Toronto. O’Sullivan B.

2004 Apr 21 | **Speaker and Co-Chair.** Local Management of soft tissue sarcoma: what approach following SR2? Oncology Rounds, Queens University. Kingston. O’Sullivan B.

1995 Feb 16 | **Invited Speaker.** The management of laryngeal cancer. Oncology Grand Rounds, Queen’s University. Kingston, Ontario, Canada. O’Sullivan B.

1994 Jan | **Invited Speaker.** Topic: Standards of treatment “Factors influencing the choice of treatment, and the outcome of treatment in Larynx Cancer in Ontario during the past decade”. Ontario Cancer Treatment and Research
4. LOCAL
Invited Lectures and Presentations

2013 Apr  Invited Speaker. Assembling the Jigsaw Puzzle: Understanding the Behavior of HPV-positive Oropharyngeal Cancer. HN Translational Research Meeting, April 30, 2013

2003 Sep  Course subcommittee Chair. The role of radiotherapy in soft tissue sarcoma. 3rd Princess Margaret Hospital Oncology Course, University of Toronto. O’Sullivan B.

1999 Jun  Invited Speaker. Conformal therapy. Keynote Address, Future Directions in Radiation Oncology University of Toronto, Faculty of Medicine Continuing Education Course. O’Sullivan B. (Continuing Education).
F. Research Supervision

GRADUATE STUDENT

Stephanie Shaw, PhD (2011-2014)
Department of Speech Language Pathology, Faculty of Medicine, University of Toronto, PhD Thesis Co-supervision

Nina Louise Jebsen, PhD (2008-2013)
University of Bergen, Bergen, Norway, 1st opponent of PhD Thesis Defense Committee

Colleen Dickie, MSc (2007-2010)
Department of Radiation Therapy, Faculty of Health, Social Care & Education, Anglia Ruskin University, Cambridge, United Kingdom

Anthony Griffin, MSc (2003-2006)
Institute of Medical Science, Faculty of Medicine, University of Toronto, MSc Thesis Co-supervision, 2006

Jolie Ringash, MSc (1996-1999)
Master’s of Science (Clinical Epidemiology), University of Toronto, Toronto, Ontario, MSc Thesis Co-supervision

POSTGRADUATE MD

2016 Apr-June Primary Supervisor, Dr. Francesca Caparrottie, Clinical Fellow
2016 Jan – Mar Primary Supervisor, Dr. Salam Billan
2015 Oct – Dec Primary Supervisor, Dr. Anupam Rishi
2015 July – Sept Primary Supervisor, Dr. Francesca Caparrottie, Clinical Fellow
2015 May – June Primary Supervisor, Dr. Shrinivas Rathod, Clinical Fellow
2015 Jan – April Primary Supervisor, Dr. Satiavani Ramasamy, Clinical Fellow
2014 Oct – Dec Primary Supervisor, Dr. Iibrihim Atean, Clinical Fellow
2014 July – Sept Primary Supervisor, Dr. Shrinivas Rathod, Clinical Fellow
2014 May – June Primary Supervisor, Dr. Issa Mohamad, Clinical Fellow
2013 – 2014 Nov – Apr Primary Supervisor, Dr. Irene Karam, Clinical Fellow
2013 July – Oct Primary Supervisor, Dr. Eric Tran, Clinical Fellow
2013 June Primary Supervisor, Dr. Felipe Rey, Clinical Fellow
2013 Mar - May Primary Supervisor, Dr. Matthew Mason, Clinical Fellow
2012 Oct - 2013 Feb Primary Supervisor, Dr. Felipe Rey, Clinical Fellow
2012 Jul - 2012 Oct Primary Supervisor, Dr. Salil Vengalil, Clinical Fellow
2012 Mar - 2012 Apr Primary Supervisor, Dr. Ameen Al-Omair, Clinical Fellow
2011 Dec - 2012 Mar Primary Supervisor, Dr. Isabelle Gauthier, Clinical Fellow
2011 Sep - 2011 Dec  Primary Supervisor, Dr. Gary Mok. Clinical Fellow
2011 Aug - 2011 Sep  Primary Supervisor, Dr. Jeppe Friborg. Clinical Fellow
2011 Jan - 2011 Jul  Primary Supervisor, Dr. Albert Tiong. Clinical Fellow
2010 Dec            Primary Supervisor, Dr. Karen Chu. Clinical Fellow
2010 Jul - 2010 Nov Primary Supervisor, Dr. Meredith Johnston. Clinical Fellow
2010 May - 2010 Oct Primary Supervisor, Dr. Fionnuala Houghton. Clinical Fellow
2010 Jan - 2010 Apr Primary Supervisor, Dr. Pranshu Mohindra. Clinical Fellow
2009 Jul - 2009 Sep  Primary Supervisor, Dr. Ashok Nikapota. Clinical Fellow
2009 Jan - 2009 Jun Primary Supervisor, Dr. Indranil Mallick. Clinical Fellow
2008 Nov - 2008 Dec Primary Supervisor, Dr. Christian Stevens. Clinical Fellow
2008 Jul - 2008 Oct Primary Supervisor, Dr. Yongjin Wang. Clinical Fellow
2006 Jul - 2007 Jun Primary Supervisor, Dr. David Hwang. Clinical Fellow
2004 Jul – 2005 Jun Primary Supervisor, Dr. Shiroma Disilva. Clinical Fellow
2003 Jul – 2004 Jun Primary Supervisor, Dr. Gabrielle Studer. Clinical Fellow
2002 Jul – 2003 Jun Primary Supervisor, Dr. Ian Ward. Clinical Fellow
2001 Jul – 2002 Jun Primary Supervisor, Dr. Jerome Coffey. Clinical Fellow
2000 Jul – 2001 Jun Primary Supervisor, Dr. Pippa Riddle. Clinical Fellow
1999 Jul – 2000 Jun Primary Supervisor, Dr. Momo Tin. Clinical Fellow

1. EDUCATION

Degrees
1997 MSc, Public Health School, University of Michigan
1980 MD, McMaster University
1977 BA, University of Toronto

Postgraduate, Research and Specialty Training
1982 - 1985 Radiation Oncology, McMaster University
1980 - 1982 Internal Medicine, McMaster University

Qualifications, Certifications and Licenses
1988 General License, The College of Physicians and Surgeons of Ontario
1986 Fellow, Royal College of Physicians and Surgeons of Canada
1985 Therapeutic Radiology, American Board of Radiology
1985 Radiation Oncology, College of Physicians of Quebec
1985 Radiation Oncology, Royal College of Physicians and Surgeons of Canada

2. EMPLOYMENT

Current Appointments
2009 Jan 1 - present Associate Professor, Department of Epidemiology, Dalla Lana School of Public Health, University of Toronto
2006 Sep 1 - present Senior Scientist, Institute for Clinical Evaluative Sciences
2003 Apr 1 - present Associate Professor, Radiation Oncology, University of Toronto
2003 Apr 1 - present  Associate Professor, Health Policy, Management and Evaluation, University of Toronto
2000 - present  Radiation Oncologist, Sunnybrook Health Sciences Centre, Toronto

Previous Appointments

HOSPITAL
1995 - 2000  Radiation Oncologist, Kingston General Hospital
1988 - 1995  Oncologist, Metropolitan General Hospital, Windsor
1985 - 1988  Radiation Oncologist, Montreal General Hospital & Montreal Children’s Hospital

RESEARCH
2000 - 2006  Scientist, Institute for Clinical Evaluative Sciences

UNIVERSITY
1995 Sep 1 - 2000 Jan 31  Assistant Professor, Radiation Oncology, Faculty of Medicine, Queen’s University at Kingston
1995 Sep 1 - 2000 Jan 31  Assistant Professor, Community Health and Epidemiology, Queen’s University at Kingston

UNIVERSITY - CROSS APPOINTMENT
2000 Feb 1 - 2003 Mar 31  Assistant Professor, Health Policy, Management and Evaluation, University of Toronto

UNIVERSITY - RANK
2000 Feb 1 - 2003 Mar 31  Assistant Professor, Radiation Oncology, University of Toronto

3. HONOURS AND CAREER AWARDS

Distinctions and Research Awards

PROVINCIAL / REGIONAL
Received

2005 Jan - 2010  Clinician Scientist Salary Award, Ontario Ministry of Health and Long Term Care, Ontario, Canada. (Research Award)
Amount of $201,000.00 awarded annually. Total Amount: 1,809,000 CAD

1999 Jul - 2004 Jun  Career Scientist - 5 Year Salary support, Renewable, Ontario Ministry of Health and Long Term Care, Ontario, Canada. (Research Award)
Amount awarded over five (5) years. Total Amount: 300,000 CAD

4. PROFESSIONAL AFFILIATIONS AND ACTIVITIES

Administrative Activities

INTERNATIONAL
National Cancer Institute
2000 - 2004  Member, Prospective Data Collection and Research Review Panel, United States.
NATIONAL

National Cancer Institute of Canada
2000 - 2004  **Member**, Research Proposal Review Panel L (Health Promotion and Health Services Research)

Royal College of Physicians and Surgeons of Canada
1992 - 1995  **Member**, Examining Board in Radiation Oncology

PROVINCIAL / REGIONAL

Cancer Care Ontario
2008 - 2013  **Member**, Clinical Advisory Committee, Ontario Cervix Cancer Screening Program
2007 - 2009  **Member**, Clinical Advisory Committee, Ontario Colon Screening Program
2007 - 2008  **Member**, Technical Working Group for Colorectal Cancer Screening
2004 - 2009  **Member**, Ontario Task Force on Large Bowel Endoscopic Services
2002 - 2004  **Member**, Screening Research Committee
2002 - 2003  **Member**, Surgical Oncology Outcomes Task Force
2002 - 2003  **Member**, Breast Cancer Surgery Quality Indicators Panel
2001 - 2003  **Member**, Division of Preventive Oncology Management Committee
1991 - 1995  **Chair**, Radiation Treatment Program Committee

LOCAL

Institute for Clinical Evaluative Sciences
2000 - present  **Member**, Cancer Program
2003 - 2004  **Chair**, Cancer Theme Group
2002 - 2004  **Member**, Diagnostic Testing Committee
2002 - 2003  **Chair**, Education Committee, Faculty of Medicine, Dept of Radiation Oncology
2000 - 2004  **Member**, Positron Emission Tomography (PET) Committee

Odette Cancer Centre
2014 - present  **Member**, Haematology Site Group
2000 - 2013  **Member**, Breast Cancer Site group, Toronto, Ontario.

Sunnybrook Health Sciences Centre
2011 - 2013  **Member**, Research Ethics Board
2000 - 2003  **Member**, Health Information Committee

University of Toronto
2007 - present  **Member**, Health Sciences Research Ethics Board

Peer Review Activities

GRANT REVIEWS

Reviewer
2008 - 2016  Canadian Institutes of Health Research
C. Research Funding

1. GRANTS, CONTRACTS AND CLINICAL TRIALS

PEER-REVIEWED GRANTS

Funded

In high density First Nations (FN) or Metis communities, to understand health policy factors that impact cancer screening; to assess community readiness and the health system’s capacity for the delivery of cancer screening; to work with regional partners and FN and Metis communities to learn from and compare locally administered tailored cancer screening interventions and then develop a comprehensive action plan to improve cancer screening for FN and Metis communities.

The main goal is to examine the modeled outcomes and cost effectiveness in Ontario of a high risk lung cancer screening program, to assess the reactions and perceptions of many stakeholder groups, map screening processes in focus groups, develop a pilot plan and produce a business case to support funding of a single site pilot.

J, Keller B, Rakovitch E. 448,340 CAD. [Grants]

Collaborator(s): Co-Investigators: Barkun A, Rabeneck L, Paszat L, Hilsden R, Joseph L.

2004 Jul - 2005 Jun  **Co-Investigator.** Quality indicators for end-of-life breast cancer care: testing the use of

**Role:** This grant proposal was written and submitted during Dr. Hodgson’s two-year Linton Fellowship under mentorship of Dr. Paszat.

**Role:** Co-investigator and Instigator of study concept and design originally as part of a group grant proposal led by Dr. Paszat.

**Role:** Health Services Research Co-Investigator, and Acting Principal Investigator during absence of Dr. Benk throughout 2002-2004.

**Role:** Health Services Research Co-Investigator, and Member of Thesis Committee for Dr. E. Rakovitch.

PEER-REVIEWED GRANTS

FUNDED

2014 Jun - 2014 Aug Principal Applicant. Is there an abscopal effect in early stage lung cancer treated with stereotactic body radiotherapy? Comprehensive Research Experience for Medical Students (CREMS). PI: Poon, Ian. Collaborator(s): Tjong, M. 2,500 CAD. [Grants] The therapeutic benefit of stereotactic body radiotherapy (SBRT) in early stage lung cancer has been largely based on its’ cytocidal effect combined with the recent ability to selectively target the primary tumour.

2001  **Principal Investigator.** A study evaluating mucosal toxicity in head and neck cancer patients undergoing radical radiation with or without concurrent chemotherapy. Hamilton Regional Cancer Centre Foundation. Research Grant. Collaborator(s): Wright J, Hodson I, Sathya J, Sagar S, Browman G. 12,000 CAD. [Grants]

**NON-PEER-REVIEWED GRANTS**

**FUNDED**

2014 - present  **Co-Principal Investigator.** Consortium for Oligometastases Research (CORE). Elekta AB. PI: Sahgal, Arjun. 157,700 CAD. [Industrial Grants]

*Developing oligometastases international database and research consortium.*
D. Publications

1. MOST SIGNIFICANT PUBLICATIONS

   This study describes the patient perspective on their potential difficulties enrolling patients into de-escalation studies in HPV positive head and neck cancer because their primary concern is surviving their cancer first over reducing toxicities.

   This interesting pilot work showed that microscopic tumour extension in oral tongue cancer may be less common that previously thought using a pathological whole specimen methodology that will also serve as the gold standard (through a three-dimensional tumour reconstruction) to compare the accuracy of imaging modalities. This work was partly supported by the Ontario Institute of Cancer Research (OICR).

   This work demonstrates that novel features, such as PET and CT texture, are able to distinguish between cancerous and normal tissue with high accuracy. Not only does the use of these features improve segmentation, outperforming standard thresholding methods, but their success suggests that there is more information present in PET-CT than is available through SUV and CT density. These results motivate our current work to investigate a) how to further standardize and improve PET-CT segmentation, and b) To further investigate novel PET-CT features for treatment response and quantification of cancer.

   This paper is a retrospective comparison of the dosimetric improvements seen with inverse planned intensity modulated therapy over a simple forward planned intensity modulated treatment in NPC. Unlike other dosimetric studies that compare different planning methods, this study uniquely reviewed the dosimetric data of patients treated with the two different planning methods. The results (published in an internationally read journal) show that although there are dosimetric advantages to inverse planning in locally advanced NPC forward planned IMRT is a very reasonable and effective method of planning and treatment in countries with limited resources.

This work represents the only lymph node atlas that incorporates the anatomic variation of head and neck cancer patients to create a lymph node clinical target volume. Unlike the consensus documents from co-operative groups, the research methodology is performed in a way that meets the specific needs of the radiation oncologist. Over 500 T2 weighted MR images were fused using easily recognizable axial imaging landmarks.

Stratford, Ontario

1997 – 2001  
Courtesy Staff  
Sarnia General Hospital  
220 North Mitton Street  
Sarnia, Ontario

AWARDS, HONOURS & FELLOWSHIPS

November 1998  
Chair, GU Multidisciplinary Team Accreditation Standards

2002  
Department of Radiation Oncology, Certificate of Merit for Outstanding participation in clinical trials
CONTINUING EDUCATION

Conference Attendance & Professional Development

2011 Image Guided Liver Radiotherapy, PMH, October 27-28 2011, Toronto, ON.

2009 Genitourinary Cancers Symposium, American Society of Clinical Oncology, (ASCO), Feb 26-28, 2009, Orlando FL.

2009 New Insights 2009, The Royal College of Physicians and Surgeons of Canada (CPSO), Certification Program, October 6, 2009, Toronto, ON.

2004, 2008 HDR and LDR Brachytherapy Techniques for Oncologists Fall Uro-oncology Retreat, UWO, 1997

1997 American Society for Therapeutic Radiation Oncology (ASTRO)

1998 European Society for Therapeutic Radiation Oncology (ESTRO)

1999 National Cancer Institute of Canada (NCIC) Issues and Controversies in Prostate Cancer

1999 National Cancer Institute of Canada (NCIC) European Society for Therapeutic Radiation Oncology (ESTRO) Issues and Controversies in Prostate Cancer Communication Workshop (Breast Cancer Patients), UWO

1999, 2003 American Society for Therapeutic Radiation Oncology (ASTRO)
2000
Issues and Controversies in Prostate Cancer, Radiation Therapy Oncology Group (RTOG), Montreal, March 15-19
Canadian Urological Association, Kelowna, June
ESTRO Conference, Istanbul, September 19-23

2001
Radiation Therapy Oncology Group (RTOG)
Tampa, Florida, February 8-11
National Cancer Institute of Canada, April
Biostatistics Workshop, London Regional Cancer Centre
London, Ontario July 17
Evolving Issues in Oncology
Ontario GU Radiation Oncology Retreat, October 12-14
Uro-Oncology Fall Retreat, UWO
ESTRO Conference, Lisbon, October 21-25
American Society for Therapeutic Radiation Oncology (ASTRO), November 4-8

2002
National Cancer Institute of Canada (NCIC), April
ESTRO Conference, Prague, September 17-21
Prostate Cancer Radiotherapy 2002, Montreal, QC, December 5-7

2003
Radiation Therapy Oncology Group (RTOG), Montreal, PQ, June
1st Annual Conference on Current Problems in Urology, Banff, Alberta, April 10-13
3rd International Prostate Cancer Congress
Bermuda, July 17-20

Multi Disciplinary Tumour Boards, Mississauga, ON, Credit Valley Hospital.

Oncology Grand Rounds, Mississauga, ON, Credit Valley Hospital.

2007

February 14-16, 2008
May 1, 2008

ASCO+ASTRO 2008 Genitourinary Cancers Symposium, “Role of Hormonal Therapy in Prostate Cancer”.

June 12, 2008

Toronto Breast Cancer Symposium, Metro Toronto Convention Centre, Toronto, ON.

September 22-25, 2008

ASTRO-Boston Convention and Exhibition Centre, Boston, MA, “50 Years of Learning, Caring and Collaboration in the Treatment of Cancer Patients.”

October 1, 2008

Princess Margaret Hospital 50th Anniversary Gynae Day, University of Toronto, Toronto, ON.

Continuing Education attended

June 10-11, 2004

Faculty of Medicine, University of Toronto Continuing Education, Toronto, Ontario “Controversies in the etiology, detection and treatment of breast Cancer: 2004”

October 26, 2007

Regional Oncology Educational Day: Novotel Hotel, Mississauga, ON

2007

The 2nd Ontario Thoracic Cancer conference 2007, Niagara-on-the-Lake, ON.

SCHOLARLY AND PROFESSIONAL ACTIVITIES

Professional Society Memberships/Offices held

Member College Physicians and Surgeons of Ontario
Member Canadian Medical Protective Association
Member Ontario Medical Association
Member American Society of Therapeutic Radiation Oncology (ASTRO)
Member Canadian Association of Radiation Oncologists (CARO)

Visiting Professorships

1998 Guest Lecturer, University of Toronto
Cross appointment with the University of Toronto

Roles in Conferences

1993 – 1995 Continuing Medical Education (Oncology)
Organizer/Presenter of “Annual Cancer Symposium”  
Faculty of Medicine, University of Western Ontario, London

October 26, 2007  
Regional Oncology Educational Day: Novotel Hotel, Mississauga, ON, “Long Term Follow-up of the Cancer Patient”, Presented to nurses, pharmacists, primary care, palliative care and specialty physicians, and the public.

Service to Community

See list of invited presentations

COMMITTEE MEMBERSHIPS

University

1993 – 1995  
Organizer/Presenter  
Continuing Medical Education Oncology Symposium, University of Western Ontario

Department of Oncology Medical Staff Committee

Departmental (Internal)

June 2004 – February 2007  
RO Associate Group – Ad Hoc Billing Review Committee

2002  
60th Anniversary of Cobalt at London Regional Cancer Centre, French Language Video

2001 – February 2007  
Member, Radiation Oncology Associate Group, London Regional Cancer Centre

1992  
Member, HDR Brachytherapy Subcommittee

1993 – 1994  
Member, Simulator Selection Committee

1994 – 1995  
Equipment (LINAC) Selection Committee and Users Group Representative

1994  
Quality Assurance for Radiotherapy (LRCC)

1998  
Member, Environmental Committee (LRCC)
1998

GU Representative for London Regional Cancer Centre

Hospital, Research, Community (External)

2002

Medical Associates Provincial Representative

1999 – 2002

NCIC – Genitourinary Committee

1994 – 1995

Ontario Cancer Treatment & Research Foundation Planning
User Group for Community Cancer Centres Accreditation Process

TRAINEE SUPERVISION

The following is a sampling of the numbers of students taught each year. Details are not available to me prior to 2001.

Dec 3, 2001 to March 3, 2002
Sujana Movva
Joan Dafoe
Jaime Blackwood
Fawaz Siddigi
Chen Lin Yung
Wendy Lai
Raffeala Profiti
Marijana Drandic
Chee Yeow Tan
Ajana Macbride
Jeff Tanguay
Karmdeep Guram
Shoba Sujana Kumar
Abeer Syal
Haren Treasurer
Batya Grundland
Chris McLean

March 3, 2002 – June 2, 2002
Guido Hockman
Darren Cargill
Charles Cho
Charles Scott
Loredana DiSanto
Anna Mayer
Laura Snell
Nirit Bernhard
Heather Cox
Erin Norriw  
Namita Gill  
Jason Ashley  
Paul Engels  
Allison Suk  
Kim Gilmour  
George Kim  
Laurie Dusseault  
Phebe Gray  
Kavi Chatoorgoon  

June 3, 2002 to Sept. 2002  
Hashmat Khan  
Omer Chaudhary  
Mark Baumgartner  
Eric Davenport  
Radu Butan  
Mae Chiang  
Zishan Allibhai  
Jordan Cuthbert  
Darrin Payne  
Haley Bos  
Anita Mody  
Geoff Bellingham  
Jessica Wylie  
Lisa Biersack  
Farrah Kassam  
Erin Lovett  
Abdel Lawendy  
Jasper Yuen  
Tuhina Biswas  
Tiffany Wells  
Cyrus Hsia  
Arthur Cheung  
Matei Andreoiu  
Ben Shore  
Sameen Uddin  
Varsha Thakur  
Kirsten Grabowska
    Sebastian Rodrigues-Elizalde
    Justin Jagger
    Peter Mack
    Arthur Cheung
    Karmdeep Guram
    Leslie Morvay
    Scott Hamilton
    Chinedu Onochie
    Gary Peysar
    Mike Roman
    Edward Wong
    Patrick Sullivan
    Blayne Welk
    David McAlduff
    Cyrus Hsia
    Jasper Yuen
    Scott Millington
    Robert Arntfield
    Chris Chu
    Susan Scarrow
    Chris Ryerson
    Kristen Jones
    Mark Mastsos
    Anne Martin
    Julie Hogan
    Maryanne Rockx
    Shachar Sade
    Monka Winnicki
    Rahim Ladak
    Andrew Touw

December 2002 – March 2003  Yaniv Berliner
    Alison MacLeod
    Nowell Fine
    George Condrut
    Jeffrey Goldstein
    Kalesha Hack
    Ann Tan
    Mae Chiang
    Peter Chang
    Megan Milliken
    Rishi Narine
    Vikas Agarwal
    David Mula
Gabriel Chan
Rebecca Herman
Eva Kogan
Neely Bakshi
Tania Principi
Shannon Dunlop
Noor Ladhani
Katherine Enright
Amanda Selk

Raymond Lim
CONTRIBUTIONS TO TEACHING AND EDUCATION

Teaching Portfolio

2000 – 2001

S.C.O.P.E. Supportive Care in Oncology Partnership and Education
An Adult Based Learning Model with Realistic Learning Goals and Objectives, Identifying Meaningful Outcomes Involving Community Nurses and Pharmacists
This included evaluation of learning

1992 – 2003

Clinical Instruction
Ongoing Clinical Instruction Lectures, Case Evaluation for Radiation Oncology Residents, Urology Residents, Gynecology Residents
2000 – Present

4th Year Clinical Elective Students and Clinical Clerks and Supervisor for Clinical Clerks, Radiation Oncology and Urology Residents. Annual Core Oncology Lectures in Gynecology and Urology. Lectures in Gynecological Malignancy for Gyn-Oncology Residents

Overall Educational Responsibilities

1. Supervision and teaching of residents rotating on service (breast, gynecological and urological)
2. Participation in resident rounds/quality assurance/Grand Rounds
3. Participation in mock orals and written Board Examination preparation
4. Individual teaching sessions at a resident’s request
5. Teaching of off-service residents rotating through Radiation Oncology
6. Teaching of affiliated staff (i.e. in-service for radiation therapy technicians)
7. Participation in Medical School Oncology Lecture Series
8. Teaching CORE Oncology Lectures (Gynecological Cancer)

Instruction Objectives

For the Instructor:

1. Offers process of clearly conceptualizing content, teaching methodology and evolution with focus on expected outcome
2. Provides methods of communicating ideas and expectations to students and other instructors
3. Offers a process for planning sequential knowledge, skills and attitude

For the Student:

1. Logical frame of reference indicating what will be done and what will be tested
2. Afford a clear understanding of what the instructor expects of them
3. Allows an opportunity for self-evaluation

Radiation Oncology Residents Completing Clinical Rotations (2-3 months duration)

Post-graduate teaching – Radiation Oncology

July 2000 – June 2001  P. Leco
July 2001 – June 2002  P. Leco, A. Chan, E. Brecevic

Post-graduate teaching – Urology

1997  G. Peers
1998  P. Luke
1999  J. Riddell, J. Izawa
2000  S. Pualter
2001  M. al-Omar
2002  B. Vukula

1. EDUCATION

Degrees
1998 - 2004 MSc, Clinical Epidemiology, Health Policy, Management and Evaluation, University of Toronto
1985 - 1989 MD, Dept of Medicine, University of Toronto
1982 - 1984 BSc, Mathematics, Arts and Science, University of Toronto

Postgraduate, Research and Specialty Training
1995 - 1997 Research Fellow, Center for Radiological Research, Columbia University, NY, New York, Supervisor(s): Dr. Eric Hall
1992 - 1995 Residency, Radiation Oncology, Department of Radiation Oncology, University of Toronto
1989 - 1990 Residency, Internal Medicine, Department of Medicine, University of Toronto

Qualifications, Certifications and Licenses
1997 License, New York
1996 Certification, Radiation Oncology, American Board of Radiology
1995 Fellow, Royal College of Physicians and Surgeons of Canada
1990 License, College of Physicians and Surgeons of Ontario
1989 Licentiate, Medical Council of Canada
2. EMPLOYMENT

Current Appointments

2013 Apr - present Consultant, Surgery, North York General Hospital, Toronto, Ontario, Canada
2013 - present Senior Scientist, Sunnybrook Research Institute (SRI), Toronto, Ontario
Evaluative Clinical Sciences
2008 - present Adjunct Scientist, Institute for Clinical Evaluative Sciences, Toronto, Ontario
2007 - present Associate Professor, Radiation Oncology, University of Toronto, Toronto, Ontario
2007 - present Associate Professor, Health Policy, Management and Evaluation, University of Toronto, Toronto, Ontario
1997 - present Active Staff, Odette Cancer Centre, Department of Radiation Oncology, Sunnybrook Health Sciences Centre, Toronto, Ontario

Previous Appointments

CONSULTING
2011 - 2012 Consultant, General Division, Department of Medicine, The Scarborough Hospital, Scarborough, Ontario

RESEARCH
2004 - 2012 Clinician Scientist, Sunnybrook Research Institute (SRI), Toronto, Ontario
Evaluative Clinical Sciences

UNIVERSITY - CROSS APPOINTMENT
2006 - 2007 Assistant Professor, Health Policy, Management and Evaluation, University of Toronto, Toronto, Ontario

UNIVERSITY - RANK
1999 - 2007 Assistant Professor, Radiation Oncology, University of Toronto, Toronto, Ontario
1997 - 1999 Lecturer, Radiation Oncology, University of Toronto, Toronto, Ontario

3. HONOURS AND CAREER AWARDS

Distinctions and Research Awards

INTERNATIONAL

Received

1995 RSNA/Siemens Medical System Research Fellow Scholarship, Columbia University. (Research Award) Center for Radiological Research.

1995 Young Oncologist Travel Award, American Radium Society. (Distinction) “The Effect of Mitomycin C on the Development of Late Bowel Toxicity Following Chemoradiation for Locally Advanced Carcinoma of the Cervix”. Supervisor: Dr. A. Fyles.

LOCAL

Received

2011 Feb - present LC Campbell Chair in Breast Cancer Research, Sunnybrook Research Institute, Toronto,
Ontario. (Peer Reviewed Research Award)

2014 Sep - 2015 Sep **Sunnybrook Team Awards**, Sunnybrook Health Sciences Centre. (Sunnybrook Team Awards; Louise Temerty Breast Cancer Centre team)

*Demonstrating exceptional teamwork and collaboration that has resulted in excellence in our work with valuable contributions to the mission and vision of Sunnybrook.*

2012 **Rose Award**, Sunnybrook Foundation, Ontario, Canada. (Distinction)

2007 **Research Leadership Award**, University of Toronto. (Distinction)

*Department of Radiation Oncology.*

1986 **Medical Research Council Summer Scholarship**, University of Toronto. (Distinction)

*Supervisor: Dr. K.I. Pritchard.*

1985 **Honours List**, University of Toronto. (Distinction)

1985 **Scarborough College General In-Course Scholarship**, University of Toronto. (Distinction)

*Faculty of Arts and Sciences.*

**Teaching and Education Awards**

**LOCAL**

Received

2015 **Residents Award for Excellence in Clinical Teaching**, Dept of Radiation Oncology, Faculty of Medicine, University of Toronto. (Postgraduate MD, Core Program)

2009 **Postgraduate Advocacy and Mentorship Award**, Dept of Radiation Oncology, Faculty of Medicine, University of Toronto. (Postgraduate MD)

2004 **Postgraduate Classroom Teaching Award**, Dept of Radiation Oncology, Faculty of Medicine, University of Toronto. (Postgraduate MD)

**Student/Trainee Awards**

**INTERNATIONAL**

Received

2010 **Fellowship Award**, Awardee Name: Iwa Kong. Australia and Asia Pacific Clinical Oncology Research Development (ACORD) Workshop

**NATIONAL**

Received

2009 **Scholarship**, Awardee Name: Iwa Kong. Canadian Institutes of Health Research

*The Terry Fox Foundation Strategic Training Initiative for Excellence in Radiation Research for the 21st Century (EIRR21).*

**4. PROFESSIONAL AFFILIATIONS AND ACTIVITIES**

**Professional Associations**

2001 - present American Society of Clinical Oncology (ASCO)

1997 - present American College of Radiology
1997 - present  American Society of Therapeutic Radiology and Oncology
1997 - present  Canadian Association of Radiation Oncologists (CARO)
1990 - present  Medical Council of Canada
1989 - present  Ontario Medical Association

Administrative Activities

INTERNATIONAL

National Cancer Institute
2007  **Member**, DCIS: Strategies to Integrate Tumor Biology and Population Science (Working Group)

NATIONAL

Canadian Breast Cancer Research Alliance
2004 - 2006  **Member**, DEX Grants Review Panel

National Cancer Institute of Canada/Clinical Trials Group
2015 - present  **Member**, Breast Disease Site Executive Committee
2004  **Member**, Health Promotion and Health Services Grant Panel
2004  **Member**, Grants Panel
2001 - 2006  **Member**, Breast Site Group Executive Committee

LOCAL

Odette Cancer Centre
2013 Apr - present  **Medical Director**, Louise Temerty Breast Cancer Centre
2013 - present  **Chair**, Breast Site Group

Sunnybrook Health Sciences Centre
2012 - 2013  Search Committee, Head of Radiation Oncology

Toronto-Sunnybrook Regional Cancer Centre
2011 - present  **Member**, Rapid Diagnostic Unit Steering Committee
2011 - present  **Member**, Plastic Surgeon Search Committee
2002 - present  **Member**, Radiation Oncology Associates
2004 - 2006  **Secretary**, Radiation Oncology Associates
2002 - 2003  **Member**, Strategic Planning Committee
2001  **Member**, Search Committee, Head of Radiation Oncology
1999 - 2002  **Member**, Clinical Trials Committee

University of Toronto
Eileen RAKOVITCH

2009 - present
Excellence in Radiation Research for the 21st Century Mentor (CIRR), CIHR Training Program in Radiation Medicine, Ontario, Canada.

2009
Resident Selection Committee

2009
**Member**, Resident Selection Committee, Faculty of Medicine, Dept of Radiation Oncology, Postgraduate MD

2003 - 2006
**Member**, Breast Symposium Organizing Committee, Faculty of Medicine, Dept of Medicine, Continuing Education

2001 - 2004
**Member**, Executive Committee, Faculty of Medicine, Dept of Radiation Oncology

2000 - 2004
**Member**, Resident Selection Committee, Faculty of Medicine, Dept of Radiation Oncology, Postgraduate MD

1999 - 2004
**Member**, Research Advisory Committee, Faculty of Medicine, Dept of Radiation Oncology

1998 - 2004
**Member**, Postgraduate Education Committee, Faculty of Medicine, Dept of Radiation Oncology, Postgraduate MD

**Peer Review Activities**

**GRANT REVIEWS**

**External Grant Reviewer**

2015 Nov
KWF Kankerbestrijding, Dutch Cancer Society, Preventing over treatment of low grade Ductal Carcinoma In Situ of the breast by replacing intensive treatment for active surveillance

**PEER-REVIEWED GRANTS**

**FUNDED**

2016 Apr - 2019 Mar

2014 Jul - 2019 Jul
**Co-Investigator.** The Prostate Cancer Program Project in Rapid Development of Novel Diagnostic Markers for Early Prostate Cancer (PRONTO). Prostate Cancer Canada. Movember Team Grant. PI: Bartlett J. Collaborator(s): Berman D (Co-PI), Buttyan R (Co-PI), Earle C (Co-PI), Loblaw A (Co-PI), Bauman G, Boutros P, Finelli A, Lapointe J, Park P,

2013 Jul - 2015 Jun
1) Molecular Progression of DCIS to Invasive/Recurrent Disease
2) Predictive Biomarkers of Invasion in DCIS
3) Imaging of Ductal Carcinoma in Situ.

2012 - 2015

2011 - 2016

2011 - 2016

2011 - 2014
Strategic Plan Initiative, Ductal Carcinoma In Situ Project, Sunnybrook Research Institute (SPI-DCIS-SRI).

2010 - 2014

2010 - 2013

2010 - 2013

2010 - 2011

2009 - 2011
Co-Investigator. A survivorship question: Does surveillance mammography after the treatment of unilateral primary breast cancer reduce the odds of dying from breast cancer?

2007 - 2013

2007 - 2011

2006 - 2010

2005 - 2008

2005 - 2007

2004 - 2007

2004 - 2007

2003 - 2006

2002 - 2005

2002 - 2004

1. EDUCATION

Degrees
1958 Sep - 1962 Jun PhD, Biophysics, Yale University, Connecticut, United States, Supervisor: Prof. Franklin Hutchinson
1954 Sep - 1958 Jun BSc, Bachelor of Science (Honors), Physics, Brown University, Rhode Island, United States, Supervisor: Prof. Phillip J. Bray

Postgraduate, Research and Specialty Training
1962 Jun - 1965 Jun Postdoctoral Fellow, Physics, Ontario Cancer Institute, Ontario, Canada, Supervisor: Prof. H.E. Johns

2. EMPLOYMENT

Current Appointments
2000 Nov - present Professor Emeritus, Medical Biophysics and Radiation Oncology, University of Toronto, Toronto, Ontario, Canada
2000 Nov - present Research Scientist Retired, Research and Teaching, Princess Margaret Cancer Center, Toronto, Ontario, Canada
Previous Appointments

RESEARCH
1996 Jul - 1997 Apr  Acting Division Head, Ontario Cancer Institute, Ontario, Canada
1992 Jun - 1995 Jun  Co-Chair/Research, OCI/PMH Capital Campaign (Part-time), Ontario Cancer Institute, Ontario, Canada
1989 Jan - 2000 Oct  Research Scientist, Ontario Cancer Institute, Ontario, Canada
1965 Jun - 1989 Jan  Physicist, Physics, Ontario Cancer Institute, Toronto, Ontario, Canada
1962 Jun - 1965 Jun  Postdoctoral student, Ontario Cancer Institute, Ontario, Canada

Helped build, test and use a large grating type ultraviolet light monochromator for biological studies.

UNIVERSITY
1998 Jun - 2000 Jun  Chair, Faculty Full-time Committee, University of Toronto, Toronto, Ontario, Canada
1992 Jun - 1994 Jun  Chair, Dean’s Fund Committee, University of Toronto, Toronto, Ontario, Canada
1986 Jun - 1987 Jan  Acting Chair, Medical Biophysics, University of Toronto, Toronto, Ontario, Canada
1981 Jun - 1986 Jun  Graduate Coordinator, Medical Biophysics, University of Toronto, Toronto, Ontario, Canada
1975 Jun - 1978 Jun  Graduate Secretary, Medical Biophysics, University of Toronto, Toronto, Ontario, Canada

UNIVERSITY - RANK
1979 Jan - 2000 Oct  Full Professor, Medical Biophysics, University of Toronto, Toronto, Ontario, Canada
1974 Jan - 1979 Jan  Associate Professor, Medical Biophysics, University of Toronto, Toronto, Ontario, Canada
1965 Jun - 1974 Jan  Assistant Professor, Medical Biophysics, University of Toronto, Toronto, Ontario, Canada

3. HONOURS AND CAREER AWARDS

Teaching and Education Awards

LOCAL
Received
2012 Sep - 2012 Dec  Classroom Teaching Award 2012, Dept of Radiation Oncology, Faculty of Medicine. (Undergraduate Education)
2010 Sep - 2010 Dec  Classroom Teaching Award 2010, Dept of Radiation Oncology, Faculty of Medicine. (Undergraduate Education)
2007 Sep - 2007 Dec  Classroom Teaching Award 2007, Dept of Radiation Oncology, Faculty of Medicine, Department of Radiation Oncology/Michener Institute. (Undergraduate Education)

4. PROFESSIONAL AFFILIATIONS AND ACTIVITIES

Professional Associations
1995 Apr - present  Member (currently Emeritus), American Association for Cancer Research
1969 Apr - present  Member (currently Emeritus), Radiation Research Society
1962 Apr - present  Member, Sigma Xi
Administrative Activities

INTERNATIONAL
United States Department of Defense – Breast Cancer Grant Review Panel
2010 Sept – 2012 Aug  Member, panel

International Congress of Radiation Research
1986 Apr - 1991 Sep  Chair, Local Arrangements Committee

International Journal of Radiation Oncology- Biology-Physics
1990 Apr - 2003 Mar  Member Editorial Board

NCI
1987 Apr - 1988 Mar  Member, Ad Hoc Reviewer Committee, United States.

NATIONAL
Cancer Research Society
1996 Apr - 1998 Mar  Member, Grants Panel Committee

National Cancer Institute of Canada
1982 Apr - 1983 Mar  Member, Grant Panel D, Canada.
1976 Apr - 1980 Apr  Member, Grant Panel D, Canada.

Radiation Research Society
1980 Apr - 1983 Mar  Member, Council
1980 Apr - 1981 Mar  Member, Membership Committee
1978 Apr - 1981 Apr  Member, Editorial Committee

Medical Research Council
1999 Apr - 2002 Mar  Member, Cancer B Committee
Ad Hoc Reviewer.

Medical Research Council
1989 Apr - 1993 Mar  Member, Grants Panel, Cancer

Radiation Research
1991 Apr - 1992 Mar  Member, Editorial Committee
Associate Editor (Acting).

Radiation Research Society
1992 Apr - 1993 Mar  Member, Program Committee
1987 Apr - 1993 Mar  Member, Finance Committee
1979 Apr – 1981 Mar  Member, Education and Training Committee
Andrew Michael RAUTH

University of Toronto
1992 Apr - 1993 Mar  Member, Basic Sciences Review Committee, Toronto, Ontario, Canada.
1991 Apr - 1994 Mar  Member, Faculty Research Grants Committee, Toronto, Ontario, Canada.
1990 Apr - 1991 Mar  Member, Degree Committee, Division IV, Graduate School, Toronto, Ontario, Canada.
1968 Jan - 2016 Jun  Chair, Graduate Examination Activities, Toronto, Ontario, Canada.

THESIS PROJECT

C. Academic Profile

1. RESEARCH STATEMENTS

1957 Sept. - present  Key Theory / Methodology: Applying the quantitation and experimental testing of theory of the physical sciences to problems in the biological sciences.

Research Interests: My current research interests have been in the areas of hypoxic cell radiosensitizers, bioreductively activated drugs, hypoxic cell toxins, mechanisms of drug action, micro-particle and nano-particle drug delivery systems, oxygen measurements and in vitro and in vivo drug testing and radiation biology. I have been involved for the last fourteen years in developing and teaching the Radiation Biology and Radioprotection Course for Radiation Therapists in the Joint Program for Radiation Therapist Training of the Michener Institute and the University of Toronto.
Research Experience Summary: 1. The determination of the average energy loss per inelastic event (60 +/- 10 ev) for 20 kev electrons passing through thin films of materials of low atomic number. 2. Early evidence for DNA repair systems for UV damage in mammalian cells using caffeine. 3. Demonstration of hypoxic cell-specific radio-sensitization of KHT solid mouse tumors in vivo using metronidazole. 4. Demonstration of the toxicity of a pure nitrosoimidazole (1-CH3–2-nitrosoimidazole) towards mammalian cells in vitro. 5. Demonstration that cells with low DT-diaphorase activity are mitomycin C-resistant and that this loss of activity is due to a specific point mutation (bp609 C/T). 6. Present research interests focus on nanoparticle carriers for the delivery and release of cancer chemotherapeutic agents, e.g. doxorubicin and mitomycin C, to primary and metastatic tumors e.g. breast tumors, brain tumors and prostate tumors. Recently interest has focused on the ability of MnO2 particles to modify the tumor microenvironment.

Fields of Application: Biomedical Aspects of Human Health

Disciplines Trained In: Physics

Areas of Research: Breast Cancer

Research Specialization Keywords: bio-reductive drugs, carcinogenesis, hypoxic cell toxins, in vitro cell culture, in vivo studies, mechanism of drug action, oxygen measurements, radiation sensitizers, radiobiology, tumor biology, nanoparticles

Research Disciplines: Biology and Related Sciences.

D. Research Funding

1. GRANTS, CONTRACTS AND CLINICAL TRIALS

PEER-REVIEWED GRANTS

FUNDED

Operating Grant. Funding Competitive?: Yes.

Operating Grant. Funding Competitive?: Yes.

Funding Competitive?: Yes.

Innovation Grant. Funding Competitive?: Yes.
2009 Jun - 2013 Jun  **Co-Investigator.** Targeted nanoparticle carriers for drug combination therapy of breast cancer. Canadian Institutes of Health Research (CIHR). Collaborator(s): Da Costa R; Wu XY; Rauth, AM. 356,770 CAD. [Grants]
*CIHR/CBCRA, Operating. Grant. Funding Competitive?: Yes.*

*Operating Grant. Funding Competitive?: Yes.*

2006 Jun – 2008 Jun  **Co-Investigator** Biodegradable nanoparticles for targeted drug delivery to lymphatic metastatic cancer cells. CIHR (High Risk Seed Grant) 150,00 CAD Operating Grant

2002 Jun - 2005 Jun  **Co-Investigator.** Regional delivery of antineoplastic and chemosensitizing agents by polymeric microspheres (CIHR) 293,824 CAD [Grants] Operating Grant.

*Operating Grant.*

*MRC MA-14354 3 year grant extended to complete. Operating Grant.*

*Terry Fox Program Operating Grant one year extension.*

1997 Apr - 1997 Dec  **Principal Applicant.** Radiation Sensitizers and Bioreductive Drugs. MRC MA-2234 Terminal award. [Grants]
*Operating Grant (in vitro studies).*

*Terry Fox Program Operating Grant.*

*Operating Grant.*

1995 Apr - 1998 Mar  **Principal Applicant.** Radiation Sensitizers and Bioreductive Drugs. MRC MA-2234 Terminal award. [Grants]
*Operating Grant (in vitro studies).*

1994 Apr - 1997 Mar  **Principal Applicant.** Radiation Sensitizers and Bioreductive Drugs. MRC MA-2234. [Grants]
*Operating Grant (in vitro studies).*

1994 Apr - 1997 Mar  **Principal Applicant.** Radiation Sensitizers and Bioreductive Drugs. National Cancer Institute. [Grants]
*Operating Grant (in vitro studies).*

*Operating Grant.*

1977 Apr - 1978 Mar  Principal Applicant. Radiation Sensitizers and Bioreductive Drugs. MRC MA-2234. [Grants]
Operating Grant (in vitro studies).

Curriculum Vitae

Dr. Sarah Jane Rauth

BSc(Hons), MSc, MD.
BIOGRAPHICAL INFORMATION:

Name: Sarah Jane Rauth

Birth Date: July 15, 1969

Birth Place: Toronto, Ontario, Canada

Citizenship: Canadian/American

Business Address: Department of Radiation Oncology, Princess Margaret Hospital, 610 University Avenue, Toronto, Ontario. M5G 2M9

Business Phone: (416) 946-2131

Home Address: 21 Dale Ave. #819
Toronto, Ontario
M4W 1K3

Home Phone: (647) 343-7479

E-Mail: sarah.rauth@rmp.uhn.on.ca

EDUCATION:

2000-2004 Medical Doctor
Queen’s University
Kingston, Ontario
Awarded May 2004

1997-2000 Diploma in Pre-Medical Sciences
Post-Baccalaureate Pre-Medical Program
School of General Studies
Columbia University in the City of New York
New York, New York
Awarded May 2000.
1993-1996 Master of Science
Anatomy and Neurobiology/Neuroscience
Dalhousie University
Halifax, Nova Scotia
Awarded October 1996.

1988-1992 Bachelor of Science (Honours in Biology)
Acadia University
Wolfville, Nova Scotia

Licensure:

2004 MCCQE Part 1
2005 MCCQE Part 2

APPOINTMENTS:

Hospital Appointments:

2008 Chief Resident
Department of Radiation Oncology
University of Toronto
Toronto, Ontario

2004-2009 Resident
Department of Radiation Oncology
University of Toronto
Toronto, Ontario

Research Appointments:

2002 Summer Student,
Radiation Oncology Research Unit,
Kingston Regional Cancer Centre, Kingston Ontario.
Independent research on clinical evaluation of prognostic factors in oncology.
2001           Summer Student,  
               Radiation Oncology Research Unit,  
               Kingston Regional Cancer Centre, Kingston Ontario.  
               Independent research on clinical evaluation of prognostic  
               factors in oncology.  

1996-2000*     Staff Research Associate,  
               Center for Radiological Research, Department of Radiation  
               Oncology, Columbia Presbyterian Hospital, New York, New  
               York.  

1996-1998      Manager of H.C. Irving Radiation Facility, Center for  
               Radiological Research, Department of Radiation Oncology  
               Columbia Presbyterian Hospital, New York, New York.  

* September 1998-August 1999 one year academic leave of absence to  
   complete pre-medical requirements at Columbia University, School of  
   General Studies and prepare for the Medical College Admissions Test.  

**Honours and Awards Received:**  

2002           Ivan Smith Student Fellowship  
               Kingston Regional Cancer Centre  
               Kingston, Ontario  

1994           Phyllis Horton Student Bursary  
               Alzheimer’s Society of Nova Scotia  
               Halifax, Nova Scotia.  

1993           Sister Christine Gaudet Student Bursary  
               St. Michael’s Hospital  
               Toronto, Ontario.  

1993-1996      Dalhousie Graduate Scholarship  
               Dalhousie University  
               Halifax, Nova Scotia.
ADMINISTRATION AND COMMITTEES:

Residency Committees:

- **2008**
  - Radiation Medicine Awards Committee,
  - Radiation Medicine Program, University of Toronto, Toronto, Ontario

- **2008-present**
  - External Relations Committee,
  - Department of Radiation Oncology, University of Toronto, Toronto, Ontario.

- **2008**
  - Resident Selection Committee,
  - Department of Radiation Oncology, University of Toronto, Toronto, Ontario.

- **2008-2009**
  - Postgraduate Medical Education Committee,
  - Department of Radiation Oncology, University of Toronto, Toronto, Ontario.

- **2007–present**
  - Resident Member at Large,
  - Canadian Association of Radiation Oncology, Education Committee.

- **2006**
  - Radiation Medicine Awards Committee,
  - Radiation Medicine Program, University of Toronto, Toronto, Ontario

- **2006**
  - Resident Selection Committee,
  - Department of Radiation Oncology, University of Toronto, Toronto, Ontario.

- **2005-2006**
  - Postgraduate Medical Education Committee,
  - Department of Radiation Oncology, University of Toronto, Toronto, Ontario.

Medical School Committees:

- **2002-2003**
  - President,
  - Internal Executive Committee, Student’s Medical House Incorporated, Queen’s University, Kingston Ontario.
Curriculum Vitae - Sarah Jane Rauth

2001-2002
Secretary,
Internal Executive Committee, Student’s Medical House Incorporated, Queen’s University, Kingston Ontario.

Graduate School Committees:

1995-1996
Anatomy Department Representative,
Dalhousie Association of Graduate Students. Dalhousie University, Halifax, Nova Scotia.

1993-1995
Student Representative,
Department of Anatomy and Neurobiology. Dalhousie University, Halifax, Nova Scotia.

Undergraduate Committees:

1992
Student Member, Election Review Committee.
Acadia University Wolfville, Nova Scotia.

1991-1992
Student Member, Judicial Board.
Acadia University Wolfville, Nova Scotia.

SOCIETY MEMBERSHIPS:

2007-present
Member in Training
American Society of Therapeutic Radiology and Oncology

2005-present
Resident Member,
Canadian Association of Radiation Oncology

2002-2003
Student Member,
Radiation Research Society

1997-2002
Associate Member,
Radiation Research Society

1994-1997
Student Member,
Society for Neuroscience

1994-1997
Student Member,
Canadian Association of Anatomists,
Student Member
Canadian Society for Neuroscience

1994-1997

Student Member,
Canadian Federation of Biological Sciences.

Abstracts:

**PRESENTATIONS** (Peer reviewed selected by competition):

**RESEARCH PROJECTS**: (Ongoing)

1. A Pilot and Feasibility Study to Investigate the Use of an Intravaginal Stent to Prevent Vaginal Stenosis Following Gynecological Radiation Therapy. Supervisor: Dr. Wilfred Levin (Accruing patients, PMH)

2. Extending our Educational Reach: A feasibility study investigating the integration of on-line educational resources and face-to-face teaching at the national meeting of the Canadian Association of Radiation Oncology (CARO). Principle Investigator: Joyce Nyhof-Young (Grant submitted to Pfizer, June 2008)

9
   Supervisor: Dr. Mary Doherty (Poster Presentation, CARO 2007)

4. Predictive Power of Cervix Volume for Loco-Regional Control in Squamous Cell Carcinoma of the Uterine Cervix Treated with Definitive Radiotherapy: A Systematic Review of the Literature
   Supervisor: Dr. William Mackillop (Abstract accepted ESTRO 2008).

**TEACHING:**

**Didactic:**

2008  
Introduction to Clinical Oncology, Staging and Diagnostics for Radiotherapy Students, Radiation Medicine Program, University of Toronto. (2 hours)

2008  
Academic Half-Day, Department of Radiation Oncology, University of Toronto, Introduction to Academic Half-Day and Drill (1 hour)

2008  
Academic Block, Department of Radiation Oncology, University of Toronto, Stress Management and Introduction to Call at Princess Margaret Hospital (1 hour).

2008  
Academic Block, Department of Radiation Oncology, University of Toronto, Interprofessional Practice and Radiotherapy, with Kate Palmer (1 hour).

2007  
Second Year Medical Students, University of Toronto, Cancer Staging and Introduction to Radiation Oncology (1 hour).

1995  
Tutorial Leader, Embryology for Medical Students, Department of Anatomy and Neurobiology, Dalhousie University, Halifax, Nova Scotia.
**Laboratory Instructor:**

1995-1996  
Laboratory Assistant,  
General Histology and Oral Histology for Dental Students, Department of Anatomy and Neurobiology,  
Dalhousie University, Halifax, Nova Scotia.

1994  
Laboratory Assistant,  
Histology for Medical Students  
Department of Anatomy and Neurobiology,  
Dalhousie University, Halifax, Nova Scotia.

1994  
Laboratory Assistant,  
Neuroanatomy for Occupational and Physical Therapy Students, Undergraduate and Graduate Students, Department of Anatomy and Neurobiology,  
Dalhousie University Halifax, Nova Scotia.

1992  
Laboratory Assistant,  
Embryology II, Department of Biology,  
Acadia University, Wolfville, Nova Scotia.

1991-1992  
Laboratory Assistant,  
Histology I and II, Department of Biology,  
Acadia University, Wolfville, Nova Scotia.

1991  
Laboratory Assistant,  
Histochemistry, Department of Biology,  
Acadia University, Wolfville, Nova Scotia.

1996 - 1997 Chief Resident, Radiation Oncology, McMaster University, Hamilton, Ontario, Canada
1994 - 1996 Resident, Radiation Oncology, Hamilton Regional Cancer Centre, Hamilton, Ontario, Canada
1993 - 1994 Postgraduate Year 1, Internal Medicine, McMaster University, Hamilton, Ontario, Canada

Qualifications, Certifications and Licenses
1997 - present Fellow (FRCPC), Radiation Oncology, Royal College of Physicians and Surgeons of Canada, Canada
1997 - present Medical License, College of Physicians and Surgeons of Ontario, Canada
2010 Privacy for Physicians - Passed, University Health Network, Canada
2009 Certificate for “Qualitative Research: An Introduction”, Wilson Centre Atelier, Canada
2009 Certificate of Training: UHN Principles of Clinical Research Practice, University Health Network, Canada
2007 Certificates: Introduction to GCP, Investigator Responsibilities, Safety Reporting, Ethics and
2. EMPLOYMENT

Current Appointments

2014 Jul 1 - present  Professor, Surgery, Otolaryngology, Faculty of Medicine, University of Toronto, Toronto, Ontario, Canada
2013 Jul - present  Professor, Institute of Health Policy, Management and Evaluation, University of Toronto, Toronto, Ontario, Canada
2013 Jul - present  Professor, Radiation Oncology, University of Toronto, Toronto, Ontario, Canada
1999 - present Staff Radiation Oncologist, Radiation Medicine Program, Princess Margaret Hospital/Cancer Centre, University Health Network, Toronto, Ontario, Canada

Previous Appointments

UNIVERSITY - CROSS APPOINTMENT

2011 Nov - 2013 Jun  Associate Professor, Institute of Health Policy, Management and Evaluation, University of Toronto, Toronto, Ontario, Canada
2007 Jul - 2011 Oct  Associate Professor, Health Policy, Management and Evaluation, University of Toronto, Toronto, Ontario, Canada
1999 - 2007  Assistant Professor, Health Policy, Management and Evaluation, University of Toronto, Toronto, Ontario, Canada

UNIVERSITY - RANK

2007 Jul - 2013 Jun  Associate Professor, Radiation Oncology, Faculty of Medicine, University of Toronto, Toronto, Ontario, Canada
1999 Jul - 2007 Jun  Assistant Professor, Radiation Oncology, Faculty of Medicine, University of Toronto, Toronto, Ontario, Canada

3. HONOURS AND CAREER AWARDS

Distinctions and Research Awards

INTERNATIONAL

Received

2014 2014 Best of ASTRO Award, American Society for Therapeutic Radiology and Oncology (ASTRO) Annual Meeting. (Distinction)
Refining UICC TNM Stage and Prognostic Groups for HPV-Related Oropharyngeal Carcinomas which offers to most relevant and highly influential abstracts from American Society for Therapeutic Radiology and Oncology (ASTRO) Annual Meeting, USA.

2012 Sep  ISOQOL Outstanding Article of the Year Award, Collaborator, International Society for Quality of Life Research (ISOQOL). (Research Award)
honours the single best article dedicated to health-related quality of life research that was published in a peer-reviewed journal during the previous year; awarded for “Patterns of reporting health-related quality of life outcomes in randomized clinical trials: Implications for
Jolie RINGASH

*clinicians and quality of life researchers*, published in *Quality of Life Research* 2011.

**NATIONAL**

**Received**

2015 Mar

**Leading Practice**, Co-Lead and Medical Director of the Program, Accreditation Canada, Canada. (Distinction)

*Awarded to "The Head and Neck Cancer Survivorship Program". This award recognizes practices that are: 1. Innovative and creative; 2. Client- or family-centred; 3. Evaluated; 4. Able to demonstrate intended results; 5. Sustainable; 6. Adaptable by other organizations.*

2014 Aug

**2014 Survivorship Award**, Radiation Oncologist, Canadian Association of Radiation Oncology (CARO). (Research Award)

*"The Prevalence and Nature of Survivorship Needs in Head and Neck Cancer Patients." for abstract with the highest score in the Survivorship domain.*

1997

**Award, Resident Research Poster**, Canadian Association of Radiation Oncologists, Canada. (Research Award)

1990

**Prize**, Chemical Institute of Canada, Canada. (Distinction)

1990

**Prize**, Canadian Society of Chemistry, Canada. (Distinction)

TRACK CO-CHAIR FOR FUNCTIONAL AND QUALITY OF LIFE RESEARCH
2015 Apr 1 - 2016 Jul 21 Track Co-Chair. Track Co-Chair. American Head and Neck Society 9th International Meeting, Seattle, Washington, United States. Collaborator(s): Kate Hutcheson (Co-Chair); Drs. Robert Ferris and Jonathan Irish, meeting co-Chairs. Responsible with co-Chair Kate Hutcheson of developing a plenary symposium of international invited (funded) speakers; integrating speakers knowledgeable in this area into main sessions (panels, educational sessions, research presentations, etc) to provide the functional/QOL perspective; and developing 5 educational courses related to functional/QOL issues; attended the meeting as track co-chair to insure smooth functioning of the planned events; spoke/chaired at several of the sessions, including co-Chairing the track Plenary.

C. Academic Profile

1. RESEARCH STATEMENTS
My primary research goal is to define, measure and improve the quality of life and health utility of patients with neoplasms of the head and neck. Advances in radiotherapy techniques and the advent of combined modality treatment have led to significant improvements in survival and local control of head and neck tumours over the past eight years. However, more intense treatment leads to a worsening of acute and late toxicities. Recent recognition of the excellent prognosis of human papillomavirus (HPV)-associated cancers has led to interest in de-intensification. Quality of life (QOL) questionnaires and utility measures can be used to determine the patients’ perspectives on the value of their treatment and well-being. Measurement of QOL along with local control and survival outcomes can lead to a better understanding, and hopefully improvement, of the therapeutic ratio of treatment strategies for head and neck neoplasms.

My QOL research has focused on the development, validation and evaluation of instruments suitable for measuring QOL and utilities in this specialized population, including a novel instrument designed to measure the QOL impact of enteral feeding during head and neck cancer therapy. I have measured the information needs of patients, the attitudes of nasopharyngeal cancer specialists toward QOL, and the clinical significance of changes in QOL and utility scores. I have also written a systematic review of all QOL instruments available for head and neck cancer patients, and am currently involved in systematic review of the QOL results according to treatment strategy.

As a result of my programme of research, I have been invited to be a methodology consultant and have been influential as a proponent of QOL research for head and neck cancer. I was appointed as inaugural Chair of the Outcomes subcommittee of the Previously Untreated, Locally Advanced (PULA) focus group within the U.S. NCI Head and Neck Cancer Group in 2009, and additionally serve as a member of PULA. This Outcomes committee consists of recognized experts and has recently drafted a manuscript outlining the recommended patient- and clinician- reported instruments for outcome assessment in head and neck cancer.

I have served as QOL coordinator and a member of the Trial Management Committee on a major international head and neck cancer clinical trial, the “HEADSTART” trial, conducted jointly by the Trans-Tasman Radiation Oncology Group (TROG) and Sanofi-Aventis [Phase III randomized trial of concomitant radiation, cisplatin and tirapazamine (SR259075) versus concomitant radiation and cisplatin in patients with advanced head and neck cancer]. We are currently in the process of publishing this data. It will be the first large randomized head and neck cancer trial (850 patients) to report QOL for patients treated with concurrent chemoradiotherapy. I am also currently the QOL coordinator for randomized trials in Canada (the recently closed HD.6) and in the USA (RTOG 1016, ECOG 3311), looking at the role of EGFR inhibitors in the treatment of head and neck cancer, particularly HPV-related oropharynx cancer.

As a practicing head and neck radiation oncologist, I combine an understanding of the highly technical aspects of modern therapy with methodologic expertise in outcomes measurement. This has helped me to introduce QOL methodology into the clinical and research setting locally and internationally. I have taught extensively in this area and have mentored trainees and peers.

My secondary research goal is to improve the frequency and methodology of health outcome measurement for patients with cancer. In recent years, the health care professions, governmental agencies and patient advocacy groups have realized the value of assessing additional outcomes besides survival. Access to and quality of care, the efficacy of new technology, continuous quality enhancement, acute and late toxicity, cost-utility assessments and patient reported outcomes are all examples of outcomes of interest. Creative sources of data, such as the use of administrative databases, may be required to answer outcomes-oriented research questions. Structured reviews and evidence-based guidelines are tools for dissemination of research results to hopefully close the loop and bring change to clinical...
practice. I am currently a co-applicant of the CCS-RI grant supporting a centre for Applied Research in Cancer Control (ARCC), a national collaboration emphasizing the interplay of economics, ethics, and policy in cancer care.

I have a broad understanding of outcomes assessment and have taught frequently on this topic. My research has focused primarily on patient reported outcomes, toxicity and medical decision-making. I have participated in population-based research on the outcomes of screening mammography and was the principal author of a national practice guideline on the same topic. I have also studied technology assessment for diagnosis, treatment and target definition (ultrasound and PET), and the value of new technology in radiotherapy delivery (conformal radiotherapy and IMRT). I have successfully attracted a number of international fellows and graduate students who have presented and published work completed under my supervision, and who will disseminate their expertise throughout the world.

My tertiary research goal is to improve the therapeutic ratio for patients requiring upper abdominal radiotherapy for stomach cancer; I have developed and published novel treatment techniques designed to reduce acute toxicity, including conformal and IMRT techniques, and am currently completing the phase II portion of a phase I/II study of novel chemoradiotherapy with IMRT in this disease. I was also among the first to demonstrate the effectiveness of adjuvant radiotherapy outside of a clinical trial. This research programme has led to a major ongoing project investigating the link between radiotherapy technique, late toxicity, and QOL in cancer survivors, and to a leadership position in a planned phase III international randomized trial of adjuvant therapy in gastric cancer (TROG-AGITG “TOPGEAR”/NCIC-CTG GA.1).

Beyond my primary clinical areas of focus, head and neck and gastrointestinal malignancy, I have served as a consultant and collaborator with colleagues interested in outcomes within other areas of oncology and within health care generally. I am regularly contacted by physicians elsewhere in North America and the world for advice regarding the measurement of treatment outcomes in clinical research. I am currently QOL coordinator for 4 internal, 1 national and 3 international trials. I have been a member of the NCIC-CTG QOL committee since 2005, and was named co-Chair of this committee in August 2006. In June of 2006, I participated as a representative of the NCIC-CTG QOL committee in a special meeting with members of the U.S. Food and Drug Administration on regulatory guidance for the use of patient reported outcomes (such as QOL) in research. Since 2008, I have been an international advisor and collaborator on an international initiative by the EORTC to retrospectively analyze pooled QOL data from EORTC and NCIC-CTG trials.

2. TEACHING PHILOSOPHY

Educational Endeavors

1. To provide international and national leadership in the assessment of quality of life for patients with head and neck neoplasms
   i. To educate regarding the importance of QOL and to promote inclusion in clinical trials
   ii. To improve and develop the methodology of QOL and utility research at levels appropriate to training by working with a broad spectrum of students from the undergraduate, graduate, post-graduate and clinician levels
   iii. To improve the quality of assessment and reporting of patient-related outcomes in head and neck cancer through research presentations and continuing medical education

2. To provide international and national leadership in outcome assessment, both in oncology and, through the clinical epidemiology programme, within related health fields and professions
   i. To promote the assessment of health outcomes and advance the profile of health outcomes research within oncology
   ii. To provide mentorship and collaborative opportunities to trainees and practicing oncologists interested in
developing skills in health outcome assessment

iii. To educate the community and government stakeholders regarding the value of population-based interventions and new medical technologies

3. To promote an interest and understanding of radiotherapy at the undergraduate level by providing undergraduate electives in radiation oncology

4. To provide mentorship and research experience to junior radiation oncologists by supervising radiation oncology residents and fellows

5. To encourage participation in research by allied health professionals by providing opportunities for research mentorship and collaboration.

D. Research Funding

1. GRANTS, CONTRACTS AND CLINICAL TRIALS

PEER-REVIEWED GRANTS

FUNDED

2014 Apr - present **Co-Principal Investigator.** Development and pilot evaluation of a rehabilitation consult for survivors of head and neck cancer. CCS-RI Innovation Grants. PI: McEwen, Sara and Ringash, Jolie. Collaborator(s): Davis, Aileen; Jones, Jennifer; Martino, Rosemary; Poon, Ian; Rodriguez Ana Maria. 199,930 CAD. [Grants] Survivors of head and neck cancer (HNC) can have rehabilitation needs different from those of other cancer survivors, such as problems with swallowing, speech, sensation and cognitive function. Dr. McEwen proposes a pilot study of an intervention that incorporates a rehabilitation consultant into aftercare for HNC patients, to better identify the patients' special needs and assign a customized personalized rehabilitation plan to aid their recovery and improve their quality of life. She will design this intervention after consultation with patients and their doctors and others involved in their care. The intervention has the potential to be used more broadly with different cancers.

2011 Jun - present **Co-Chair QOL.** RTOG 1016: Phase III trial of radiotherapy plus cetuximab versus chemoradiotherapy in HPV-associated oropharynx cancer. Radiotherapy Oncology Group. PI: Trotti A, Gillison M. Collaborator(s): Co-Chair, Quality of Life: Ringash J. [Clinical Trials] Per case funding.

QOL Coordinator. NCIC HN.6: A phase III study of standard fractionation radiotherapy with concurrent high-dose cisplatin versus altered fractionation concomitant boost radiotherapy with panitumumab in patients with locally advanced stage III and IV squamous cell carcinoma of the head and neck. National Cancer Institute of Canada (NCIC). CTG Trial. PI: Siu L, Waldron J. Collaborator(s): Quality of Life Coordinator: Ringash J. [Clinical Trials]
Per-case funding.

$185,000 over 3 years.

Randomized trial of best supportive care with or without single fraction radiotherapy for palliation of pain or discomfort due to liver cancer.

Co-Investigator. Sense of self: A new facet of quality of life in cancer. Princess Margaret cancer foundation. PI: Devins, Gerald. Collaborator(s): Irish, John; Ringash, Jolie; Lipton, Geoff; Easson, Alexandra. [Clinical Trials]

NCIC-CTG grant application; Mar 1, 2014 to Feb 28, 2019.

Development of a novel role, rehabilitation navigator, for survivors of head and neck cancer after completion of treatment.

Pilot study of intensified assessment and treatment by a speech language pathologist before, during and after concurrent curative chemoradiotherapy for head and neck cancer, to assess potential impact on duration of enteral feeding and associated costs.

Principal Investigator. Exploring the Unmet Survivorship Needs in Patients with Head and Neck Cancer. Princess Margaret Hospital Foundation (The). Collaborator(s): Catton, Pamela;
Cheng, Terry; Giuliani, Meredith; Jones, Jennifer; McQuestion, Maurene; Waldron, John. 175,866 CAD. [Donations]

Cross-sectional mixed-methods assessment of comprehensive survivorship needs in head and neck cancer survivors and their caregivers (survey and qualitative interviews).

2013 Jan - 2017 Dec  

The goal of this project is to evaluate the effectiveness of preoperative chemoradiotherapy versus preoperative chemotherapy for the management of resectable gastric cancer. This randomized trial is conducted in collaboration between NCIC-CTG, TROG and AGITG.

2012 Oct - 2015 Mar  

Co-Principal Investigator. Measures of Work Productivity for Cancer Survivors who Return to Work. Canadian Centre for Applied Research in Cancer Control (ARCC) Centre (funded by CCSRI). ARCC Funding Competition 2012. PI: Dewa, Carolyn; Jones, Jennifer; Ringash, Jolie. Collaborator(s): Hoch, Jeffrey; McQuestion, Maurene. 46,648 CAD. [Grants]

Cross-sectional pilot mixed-methods study comparing 4 instruments for assessment of work productivity to determine which is most acceptable and valid in head and neck cancer survivors.

2012 - 2019  

Co-Investigator. NCIC-CTG GA.1/TROG-AGITG “TOPGEAR”: Phase III trial of neoadjuvant chemoradiotherapy vs chemotherapy alone, followed by surgery and adjuvant chemotherapy, in potentially resectable gastric cancer. Canadian Institutes of Health Research (CIHR), NCIC-Clinical Trials Group (Canada), Trans-Tasman Radiation Oncology Group (Australia/NZ). CIHR operating grants. PI: Leung T (Australia), Wong R (Canada). Collaborator(s): Quality of Life Coordinator (Canada): Ringash J. 2,664,529 CAD. [Clinical Trials]

Phase III international clinical trial in collaboration between Australia/New Zealand, Europe and Canada.

2011 Sep - 2018 Sep  

Canadian component of phase III international clinical trial in collaboration between Australia/New Zealand, Europe and Canada.

2011 - 2015  

2010 Aug - 2015 Feb  

$6,445,910 (in 1st year).

2010 - 2011  

Co-Investigator. A Phase I/II study of high dose rate brachytherapy for the palliation of rectal cancer. Canadian Radiation Oncology Foundation. PI: Wong KSR. Collaborator(s): Bayley A,
*Sanofi – Aventis Research Innovation Award CASARIA 2010 – 2011.*

**2009 - 2014**

**2009 - 2012**

**Co-Investigator.** Psychometric testing of a new scale measuring medical outcomes of dysphagia (MOD) in adult patients with swallowing disorders secondary to stroke, spinal injury and head and neck cancer. Canadian Institutes of Health Research (CIHR). PI: Martino R. Collaborator(s): Davis A, Fehlings M, Ringash J, Streiner D. 396,289 CAD. [Grants]

**2009 - 2012**

**Co-Investigator.** Psychometric testing of a new scale measuring medical outcomes of dysphagia (MOD) in adult patients with swallowing disorders secondary to head and neck cancer. Canadian Cancer Society Research Institute. PI: Martino R. Collaborator(s): Davis A, Fehlings M, Ringash J, Streiner D. 424,592 CAD. [Grants]

**2009 - 2012**

*(CIHR $357,495, partner Bayer HealthCare Pharmaceuticals $572,000).*

**2009 - 2011**

**2008 - 2012**

**QOL Coordinator.** Phase I/II Trial of Radiation Therapy and Sorafenib for Treatment of Unresectable Liver Metastases. University of Toronto. PI: Dawson LA. Collaborator(s): Quality of Life Coordinator: Ringash, J. [Clinical Trials]

**2007 - 2010**

**QOL Co-Coordinator.** A Multi-Institutional Phase II Study of Neoadjuvant Gemcitabine and Oxaliplatin with Radiation Therapy in Patients with Pancreatic Cancer. PI: Zalupski M. Collaborator(s): Co-Quality of Life Co-Coordinators: Ringash J, Wei A. [Clinical Trials]

**2007 - 2010**

**2003 - 2006**

**2003 - 2004**

2002 - 2007  
**QOL Coordinator.** HEADSTART: Phase III randomized trial of concomitant radiation, cisplatin and tirapazamine (SR259075) versus concomitant radiation and cisplatin in patients with advanced head and neck cancer (closed May 2005, analysis pending). Trans-Tasman Radiation Oncology Group. PI: Jaskolka J. Collaborator(s): Member, Trial management committee: Ringash, J. Principal Investigator, Quality of Life: Ringash, J. [Clinical Trials] Collaborative trial of the Trans-Tasman Radiation Oncology Group (TROG) and Sanofi-Aventis. Per-case funding.

2001 - 2005  

2000 - 2002  
**Site Investigator.** NCIC SC.18: Phase III double-blind, placebo-controlled randomized comparison of megestrol acetate (Megace) versus an N-3 fatty acid (EPA) enriched nutritional supplement versus both for the treatment of cancer cachexia and anorexia (closed). National Cancer Institute of Canada (NCIC). PI: MacDonald J. Collaborator(s): Institutional Principal Investigator (Princess Margaret Hospital): Ringash, J. [Clinical Trials] Clinical Trials Group (NCIC-CTG) Trial. Per-case funding.

**NON-PEER-REVIEWED GRANTS**

**FUNDED**

2012 - present  
**Co-Investigator.** Risk factors associated with distant metastatic disease in patients with head and neck squamous cell carcinoma. University of Toronto. PI: Jaskolka J. Collaborator(s): Ringash J, Kotecha S. [Clinical Trials]

2005 - present  
**Principal Investigator.** Conformal abdominal radiotherapy: long-term renal and hepatic toxicity and quality of life. University of Toronto. Department Radiation Oncology. [Clinical Trials]

2005 - present  
**Co-Investigator.** Analysis of Single Nucleotide Polymorphisms in Patients with and without Swallowing Dysfunction, following Radical Radiotherapy for Head and Neck Cancer: A Pilot Study. University of Toronto. PI: Kim J, Liu F-F. Collaborator(s): Quality of Life Coordinator: Ringash, J. [Clinical Trials]

2003 - present  
**Co-Investigator.** Cognitive function & fatigue in cancer patients after chemotherapy: a longitudinal controlled study in patients with colorectal cancer. University of Toronto. PI: Vardy J, Tannock I. Collaborator(s): Ringash, J. [Clinical Trials]

2002 - present  
**Principal Investigator.** Prospective phase I/II study of adjuvant radiochemotherapy for gastric cancer. University of Toronto. Department Radiation Oncology. [Clinical Trials]

2009 - 2011  
**Co-Investigator.** Psychosocial Distress Screening among H&N Cancer Patients: a Pilot Study. University of Toronto. PI: de Ruiter J, Li M. Collaborator(s): Ringash, J. [Clinical Trials]

2009 - 2010  
**Co-Investigator.** Functional and quality of life outcomes after mandibular reconstruction for osteoradionecrosis with osseocutaneous free flaps. University of Toronto. PI: Hofer S, Payne C. Collaborator(s): Ringash, J. [Clinical Trials]

2008 - 2010  
**Principal Investigator.** Management and Outcome in Elderly Head and Neck Cancer Patients: A Single Institution Cohort Study. University of Toronto. [Clinical Trials]
2008 - 2010 **Co-Investigator.** Cognitive Function after Radiotherapy or Chemoradiotherapy for H&N Cancer. University of Toronto. PI: Gan H, Siu L. Collaborator(s): Ringash, J. [Clinical Trials]

2007 - 2011 **Co-Investigator.** Translating Quality of Life (QOL) Data from Randomized Clinical Trials into Improved Patient Care: Oncologists’ Attitudes and Educational Needs around the Value, Interpretation and Application of QOL Data. PI: Brundage, Michael. Collaborator(s): Ringash, Jolie. [Clinical Trials]

2007 - 2010 **Principal Investigator.** Randomized Pilot Study of J- vs. G-tubes for Enteral Feeding in Head and Neck Cancer Patients. University of Toronto. [Clinical Trials]

2006 - 2010 **Co-Principal Investigator.** Auditing the Clinical Outcome Data for Head and Neck Radiotherapy Treatment. University of Toronto. Collaborator(s): Co-Principal Investigators: Ringash J, O’Sullivan B. [Clinical Trials]

2006 - 2008 **Principal Investigator.** IMRT for Cervical Esophageal Cancer. University of Toronto. [Clinical Trials]

2005 - 2011 **Co-Investigator.** Impact of CN11 reconstruction on shoulder dysfunction and QOL of H&N cancer patients. University of Toronto. PI: Goldstein D, Davis A. [Clinical Trials]

2005 - 2011 **Principal Investigator.** Non-respiratory Organ Motion Assessment by Cine MRI in Upper Abdomen in Normal Conditions and After Pharmacological Gastric Peristalsis Inhibition in Healthy Volunteers. University of Toronto. [Clinical Trials]

2005 - 2007 **Principal Investigator.** Development of a Quality of Life (QOL) Module for Nasopharyngeal Cancer (NPC). Collaborator(s): Principal Investigators: Zee BCY, Tung SY, Ringash J. [Clinical Trials]

Joint initiative of Hong Kong and Toronto investigators.

2004 - 2008 **Principal Investigator.** Quantification of organ motion and set-up error during conformal radiotherapy of gastric carcinoma. University of Toronto. [Clinical Trials]

2003 - 2010 **QOL Coordinator.** Phase I/II trial of Stereotactic Radiotherapy for Unresectable Colorectal Cancer Liver Metastases and Hepatobiliary Carcinoma. University of Toronto. PI: Dawson LA. Collaborator(s): Quality of Life Coordinator: Ringash, J. [Clinical Trials]

2003 - 2005 **Co-Investigator.** Phase I/II Study of Trimodality Therapy for Esophageal Cancer. University of Toronto. PI: Knox JJ, Wong R. Collaborator(s): Ringash, J. [Clinical Trials]

2003 - 2005 **Co-Investigator.** Prognosis of endometrial cancer in HNPCC vs. sporadic patients. University of Toronto. PI: Kieser K, Gallinger S. Collaborator(s): Ringash, J. [Clinical Trials]

2002 - 2011 **QOL Coordinator.** Intensity Modulated Radiotherapy (IMRT) for Nasopharyngeal Cancer. University of Toronto. PI: Bayley A. Collaborator(s): QOL coordinator: Ringash, J. [Clinical Trials]

1. MOST SIGNIFICANT PUBLICATIONS

   This phase III randomized controlled trial was among the first trials in head and neck cancer to adopt a strategy of toxicity reduction, attempting to identify treatment strategies associated with lower survivorship burden. The combination of the EGFR-inhibitor panitumumab with altered-fractionation radiotherapy was hypothesized to improve progression-free survival over the current standard, high dose cisplatin with concurrent standard fractionation radiotherapy. Quality of life, swallowing experience and observer-rated swallowing function were important secondary trial endpoints. While this study failed to show a significant benefit for the primary PFS endpoint, perhaps more importantly it also failed to demonstrate any functional or QOL benefit to the novel and expensive agent, leading to a recommendation that treatment should not change until a more effective and/or lower toxicity drug is available.

   This manuscript presents a subgroup analysis of the international phase III randomized trial lead by the Trans-Tasman Radiation Oncology Group. As both treatment arms of the trial produced equivalent survival and quality of life results, a subgroup of patients with known p16/HPV status were pooled across arms, and quality of life was examined according to p16/HPV status. This paper is the first clinical trial report of a dramatically differing quality of life experience among patients with HPV-associated squamous cell carcinomas, relative to their peers with smoking and alcohol-associated cancers. Patients with HPV-associated cancer had better baseline quality of life but had a more severe and abrupt drop on treatment, with subsequent recovery. This paper suggests the need to develop better supportive care strategies and reduce the toxicity of treatment for this good-prognosis subgroup of head and neck cancer patients.

   This paper reviewed the current state of late toxicities, survivorship and non-cancer related death issues for head and neck cancer patients, and outlined areas of current need for research and programme development.

*This paper was written under the auspices of the Head and Neck Cancer Steering Committee of the US NCI, and presents guidelines for validated and accepted tools for measuring functional and quality of life outcomes in patients with head and neck cancer.*

*This paper presents the quality of life results from a major phase III randomized trial led by the NCIC-CTG, and demonstrated unequivocably that the addition of a new agent to cetuximab in patients undergoing palliative chemotherapy for K-RAS wild-type, heavily-pretreated colorectal cancer worsened quality of life.*

*This paper reported the pain relief and quality of life results for patients with symptomatic liver tumours treated with a single fraction of palliative radiotherapy in a single institution, single-arm phase II trial. The favourable results of this study led directly to the current CCTG phase III randomized trial He.1, comparing single fraction radiation to best supportive care for such patients.*

*This paper represents the culmination of a 7 year process in which we developed a new QOL instrument suitable for measuring the effects of enteral feeding. This instrument has now been accepted as a member of the FACIT/FACT (Functional Assessment of Chronic Illness Therapy/Functional Assessment of Cancer Therapy) suite of instruments, and has been requested for use by several investigators nationally and internationally.*

*This report was one of the first to provide prospective QOL data acquired in a head and neck cancer clinical trial. We were able to show that intensified radiotherapy could be given with excellent clinical outcomes, and despite some degree of increased acute toxicity, with good overall QOL results.*

*This paper incorporated both original data and literature review to propose a “rule of thumb” for the interpretation of the significance of QOL data. It led to several similar suggested “rules” and recognition by the QOL community that improving the understandability of our data is critical to the future use of QOL for decision-making at all levels.*

Invited Lectures and Presentations

2011 Nov 28 Invited Lecturer. How Does Quality of Life Measurement Add Value to What is Learned from Cancer Clinical Trials? Symposium: Patient-reported Outcomes and Cancer Care, Examples from Across the Cancer Continuum; The Canadian Cancer Research Conference. Toronto, Canada. (Continuing Education).

2009  **Invited Lecturer.** Quality of Life Measurement in NCIC-CTG Clinical Trials. Clinical Research Associate Lecture, NCIC-CTG annual spring meeting. Toronto, Ontario, Canada. Educational session for 100 clinical research associates (mainly nurses). (Continuing Education).

2008 Apr  **Invited Speaker.** Added Value of QOL - Case Study #2: SR.2. NCIC Clinical Trials Group, Quality of Life Committee Educational Workshop. Toronto, Canada. Educational 3 hour session for about 150 oncologists. (Continuing Education).

2008  **Invited Speaker.** Quality of Life in the Era of Chemoradiation. The 8th Princess Margaret Hospital Conference: Developments in Cancer Management: Conquering Cancer in our Lifetime. Toronto, Canada. CME event for about 500 oncologists. (Continuing Education).

2006 May  **Chair.** A Celebration of 20 Years of Quality of Life Research. NCIC Clinical Trials Group Symposium. Montreal, Canada. 3 hour session for about 200 oncologists. (Continuing Education).

2001  **Minimal Important Difference in QOL for Patients with Laryngeal Cancer.** National Cancer Institute of Canada Clinical Trials Group (NCIC-CTG) Quality of Life Committee. Montreal, Quebec.

2001  **Quality of Life and Radiation Oncology: Does the Hat Fit?** Symposium. Canadian Association of Radiation Oncologists. Quebec City, Quebec.

**Presented Abstracts**

2014 Aug 27  **Presenter.** Implementing a survivorship programme for head and neck cancer patients. Canadian Association for Radiation Oncology. St. John’s, Canada.

2007  **Assessment of non-respiratory stomach motion in fasting and postprandial states.** Canadian Association of Radiation Oncologists (CARO). Toronto.

2001  **Accuracy of ultrasound in localization of lumpectomy site.** Canadian Association of Radiation Oncologists (CARO). Quebec City.

2001  **Should 40-year-old women take tamoxifen to prevent breast cancer?** A quality adjusted decision analysis. Canadian Association of Radiation Oncologists (CARO). Quebec City.

2001  **Post-operative radiochemotherapy for gastric cancer: adoption and adaptation.** Canadian Association of Radiation Oncologists (CARO). Quebec City.

1999  **Quality of life and utility assessment for laryngeal cancer patients.** Canadian Association of Radiation Oncologists (CARO). Montreal.

**Presented and Published Abstracts**

2016 Sep  **not a presenter.** Prognostic Value of Pretreatment Serum Lactate Dehydrogenase in HPV-related and HPV-unrelated Oropharyngeal Cancer. CARO. Banff, Alberta, Canada. Presenter(s): Huang, SH.

*Publication Details:*

G. Teaching and Design

Teaching and Education Report: Highlights and Summary
1) Nominee and recipient of multiple awards for mentorship and research supervision; supervisor of award recipients
- Postgraduate Medical Education Research Supervision Award, The University of Toronto Department of Radiation Oncology, 2006
- Research Project Supervisor Award Recipient, Princess Margaret Hospital Radiation Medicine Programme Annual Education Awards, 2008
- Awarded to students under my direct research supervision: Best Poster Award, University of Toronto Resident Research Day (Zahra Kassam, 2008); Most significant contribution by a Radiation Oncologist to the scientific program of the RANZCR annual scientific meeting (AstraZeneca Exhibit Prize; Karen Wong, 2008); PSI Resident Research Award
2) Committed to curriculum development and course leadership:
- Co-course director, HAD 5301 Introduction to Clinical Epidemiology (University of Toronto Graduate Programme in Clinical Epidemiology, Department of Health Policy, Management & Evaluation [HPME]), 2003 to 2006; continuous curriculum revision
- Co-course director, HAD 5302 Measurement (University of Toronto Graduate Programme in Clinical Epidemiology, Department of Health Policy, Management & Evaluation [HPME]), 2012

3) International lecturer on quality of life research and research methodology

4) Leadership roles in graduate, post-graduate, and continuing education:
- Clinical Epidemiology MSc/PhD programme in the department of Health Policy, Management & Evaluation: Associate programme director, 2006-2010; Chair, admissions committee, 2007-2010; Member of programme executive committee since 2003; Member of admissions committee since 2002
- Member of Medical Oncology residency and fellowship programme committees, 2006; Site coordinator, 2006-2010
- Chair, “A Celebration of 20 Years of Quality of Life Research”, NCIC Clinical Trials Group Symposium, 2006

5) Author of chapters in two student textbooks of Head and Neck Cancer Management (Outcome Assessment in Head and Neck Cancer; Quality of Life in Head and Neck Cancer Patients)

6) Consistently ranked highly by graduate students as an effective and enthusiastic lecturer/tutor in HAD 5301, HAD 5303, 5302 and Research Methods II

7) Ranked highly by medical residents and undergraduate students as a clinical teacher and role model

8) Supervisor of successful clinical and research trainees, including undergraduate (medical and pre-medical), graduate and post-graduate students (residents and fellows), in medicine and allied health professions

9) Leader and mentor of practicing quality of life researchers through my role as co-Chair of the Quality of Life Committee at the NCIC-Clinical Trials Group.

1. INNOVATIONS AND DEVELOPMENT IN TEACHING AND EDUCATION

2012 Jan - 2012 Apr HAD 5302 Measurement, Graduate Education, Faculty of Medicine, Inst of Health Policy, Mgmt & Evaluation, Clinical Epidemiology, The University of Toronto
I was co-course director with Dr. Ahmed Bayoumi for the 2012 (winter) session. Due to an unexpected absence of the previous instructors, it was required to revise the course format significantly into a “seminar” structure with small-group, self-directed principles. A small number (12) of graduate students requiring this course to proceed in a timely fashion through their MSc or PhD requirements were accepted. Dr. Bayoumi and myself worked from the notes and advice of prior instructors to revise the course format, using existing materials. I directly taught 3 sessions and was responsible for grading the final assignments. The course was successfully delivered with all students completing the course passing the required standard. Feedback from the course was positive.

2003 Jul - 2006 Jun HAD 5301 Introduction to Clinical Epidemiology, Graduate Education, Faculty of Medicine, Inst of Health Policy, Mgmt & Evaluation, Clinical Epidemiology, The University of Toronto
I was co-course director of this course (with Dr. David Urbach) from 2003-2006. The following description is copied from the website of the Department of Health Policy, Management & Evaluation (HPME), Faculty of Medicine, University of Toronto (http://www.hpme.utoronto.ca/English/page-1-793-1.html#5301)
HAD 5301H
Course Number HAD 5301H
Course Name: Introduction to Clinical Epidemiology and Health Care Research
Prerequisite: None
Delivery Format: Summer - twice a week, 3 hour sessions, one half lecture/one half tutorial (offered to Clin Epi students only)
Winter - once a week, 3 hour sessions - one half lecture, one half tutorial. Non Clin Epi students have to submit a letter of intent and a letter from the supervisor by November 15.
Semester Offered: Summer and Winter
Instructors: Jolie Ringash, David Urbach

Description:
To introduce principles of epidemiology as applied to clinical research, emphasizing diagnosis, prognosis, treatment, the measurement of signs and symptoms of health and disease, and the evaluation of diagnostic, treatment and compliance-improving maneuvers.

Objectives:
1. To introduce the clinical epidemiology program and the courses offered
2. To develop an approach for addressing health research questions using appropriate research methods
3. To introduce the types of research designs used in clinical and epidemiologic research, including those using primary and secondary sources of data
4. To understand the threats to the validity of different study designs, and to become familiar with the methods used to enhance the validity of clinical research
5. To be able to critically appraise a biomedical research article
6. To be able to write a clinical research protocol

Evaluation:
Class participation: 10%
Interim assignment: 30%
Final assignment: 60%

The interim assignment is a short (1000 word maximum) paper describing a clinical research question and a discussion of how analytic bias might affect the validity of a study designed to answer the research question. The topic for the interim assignment may be the same as the topic for the final assignment (see below).

The final assignment is to develop a research protocol around an area of clinical interest, including the following components/sections:
1. title page;
2. abstract;
3. background;
4. research question;
5. population of interest and sampling methods;
6. maneuver;
7. outcomes;
8. analysis;
9. limitations;
10. feasibility; and
11. significance.
The written assignment is limited to a maximum of 2500 words.

The course is taught in two sessions annually. The summer session serves the incoming class of MSc and PhD candidates in the Clinical Epidemiology programme (20-30 students annually). The winter session is available on a priority basis to Clinical Epidemiology students unable to attend the summer session (eg. due to leaves), to students in other programmes of HPME, or (space permitting) to others who apply as Special Students or Auditors. Typically, the winter session includes 10-20 students, including graduate students.
in the Departments of Public Health or the Institute of Medical Sciences (IMS), and clinical practitioners such as medical residents and fellows. This is an extremely popular course which maintains a waiting list and unfortunately, has to turn down students every year. The course has been so successful and well-known that in early 2006, we received an unsolicited invitation from Cambridge University Press to develop our curriculum into a textbook. During our course co-directorship, Dr. Urbach and I gradually revised or replaced the previous units of the course. In past years, the course was structured to teach critical appraisal. However, evidence-based medicine and critical appraisal have since become more accepted and are included in the curricula of most undergraduate health care programmes. Dr. Urbach and I concentrated on revising the course so that it now provides a series of introductory seminars on topics in clinical epidemiology. Most topics are covered in more detail in graduate courses within the programme. Thus, students in the Clinical Epidemiology graduate streams can better determine the more advanced courses that will suit their interests and the needs of their theses after experiencing the “Intro” course. As much as possible, each seminar was taught by a methodologic expert, usually one of the teachers of the advanced course in that seminar topic.

Twice annually, Dr. Urbach and I met specifically for the purpose of curriculum revision. After reviewing all evaluations from the most recent course, we identified 2-3 units as priorities for updating and revision. Revisions could be minor, such as changing an assignment to update the clinical scenarios, or major, such as developing a new unit, or substantially changing the focus of a seminar. All revisions were made according to our advice and vision, however we often benefitted from the involvement of the appropriate methodologic experts.

During my tenure as co-course director, we revised or newly wrote the following units:

Session 1 – History of Clinical Epidemiology and Study Design; Session 3 – Bias in Medical Research; Session 4 – Evidence Based Medicine and Critical Appraisal; Session 5 – Causation; Session 6 – Disease Frequency; Session 8 – Diagnostic Tests; Session 11 – Decision Analysis; Session 12 – Health Services Research; Session 13 – Guidelines and Overviews.

H. Research Supervision

1. PRIMARY OR CO-SUPERVISION

Graduate Education

2011 Sep - present  

2013 Jul - 2018 Jun  
**Co-Supervisor.** Arlene Nugent. Supervisee Position: flex time student, Supervisee Institution: University of Toronto. *How is patient perspective and quality of life data incorporated into health technology assessment?*. Collaborator(s): Murray Krahn (co-supervisor).

2006 Jun - 2008 Jul  

2004 Jul - 2005 Jun  
Postgraduate MD

2011 Sep - present
Primary Supervisor. Core Program. Dr. Jonathan Klein. A systematic review of QOL outcomes for head and neck cancer patients receiving primary radiotherapy with or without chemotherapy.

2011 Sep - present
Primary Supervisor. Core Program. Dr. Jonathan Livergant. A systematic review of QOL outcomes for head and neck cancer patients receiving post-operative radiotherapy with or without chemotherapy.

2010 - present
Primary Supervisor. Core Program. Dr. Tatiana Conrad. Mapping recurrences following post-operative chemoradiation for localized gastric cancer.

2013 Sep - 2014 Dec

2011 Jul - 2012 Jun

2011 Jul - 2012 Jun

2008 - 2009

2007 - 2008
Primary Supervisor. Clinical Fellow. Dr. Karen Wong. Supervisee Position: Radiation Oncologist, Australia, Supervisee Institution: Liverpool Cancer Centre, Sydney, Australia. IMRT for Nasopharyngeal Cancer: Analysis of Quality of Life in a Prospective, Phase II Trial. Awards: AstraZeneca Exhibit Prize, RANZCR annual scientific meeting (Australia): awarded to exhibit by a radiation oncologist judged to have made the most significant contribution to the scientific program. Completed 2008.

2006 Jul - 2008 Jun

2005 Jul - 2008 Jun

2005 Jun - 2006 Jul
Primary Supervisor. Clinical Fellow. Dr. Barbara Wysocka. Supervisee Position: Clinical
Oncologist, Supervisee Institution: Arhus Universitethospital, Denmark. *Interfracton and Respiratory Organ Motion During Conformal Radiotherapy in Gastric Cancer.* Completed 2006.

**2. OTHER SUPERVISION**

**Graduate Education**

**Thesis Committee Member**

2012 Jul - 2015 Jun PhD. Julie Rouette. Supervisee Institution: Queen’s University. *Use of Patient Reported Outcome Data from Clinical Trials to Inform Cancer Care: An International Perspective.*
I. Creative Professional Activities

1. PROFESSIONAL INNOVATION AND CREATIVE EXCELLENCE

2006 Jul - present
Goal: To improve the outcomes of head and neck (H&N) cancer through improved measurement of, and interventions focused on, quality of life (QOL).
My goal is to define, measure and improve the quality of life and health utility of patients with neoplasms of the head and neck. Advances in radiotherapy techniques and the advent of combined modality treatment have led to significant improvements in survival and local control of head and neck tumours over the past eight years. However, more intense treatment leads to a worsening of acute and late toxicities. Recent recognition of the excellent prognosis of human papillomavirus (HPV)-associated cancers has led to interest in de-intensification. Quality of life (QOL) questionnaires and utility measures can be used to determine the patients’ perspectives on the value of their treatment and well-being. Measurement of QOL along with local control and survival outcomes can lead to a better understanding, and hopefully improvement, of the therapeutic ratio of treatment strategies for head and neck neoplasms.

My creative professional activity in this area has included QOL research focused on the development, validation and evaluation of instruments suitable for measuring QOL and utilities in this specialized population, including a novel instrument designed to measure the QOL impact of enteral feeding during head and neck cancer therapy. I have measured the information needs of patients, the attitudes of nasopharyngeal cancer specialists toward QOL, and the clinical significance of changes in QOL and utility scores. I have also written a systematic review of all QOL instruments available for head and neck cancer patients, and am currently involved in systematic review of the QOL results according to treatment strategy.

As a result of these creative professional activities, I have been invited to be a methodology consultant and have been influential as a proponent of QOL measurement in head and neck cancer. I was appointed as inaugural Chair of the Outcomes subcommittee of the Previously Untreated, Locally Advanced (PULA) focus group within the U.S. NCI Head and Neck Cancer Group in 2009, and additionally serve as a member of PULA. This Outcomes committee consists of recognized experts and has recently drafted a manuscript outlining the recommended patient- and clinician-reported instruments for outcome assessment in head and neck cancer.

I have served as QOL coordinator and a member of the Trial Management Committee on a major international head and neck cancer clinical trial, the “HEADSTART” trial, conducted
jointly by the Trans-Tasman Radiation Oncology Group (TROG) and Sanofi-Aventis [Phase III randomized trial of concomitant radiation, cisplatin and tirapazamine (SR259075) versus concomitant radiation and cisplatin in patients with advanced head and neck cancer]. We are currently in the process of publishing this data. It will be the first large randomized head and neck cancer trial (850 patients) to report QOL for patients treated with concurrent chemoradiotherapy. I am also currently the QOL coordinator for randomized trials in Canada (the recently closed HD.6) and in the USA (RTOG 1016, ECOG 3311), looking at de-escalation using either EGFR inhibitors or trans-oral surgery in the treatment of head and neck cancer, particularly HPV-related oropharynx cancer.

As a practicing head and neck radiation oncologist, I combine an understanding of the highly technical aspects of modern therapy with methodologic expertise in outcomes measurement. This has helped me to introduce QOL methodology into the clinical and research setting locally and internationally. I have taught extensively in this area and have mentored trainees and peers.

I have developed a novel QOL instrument for the measurement of issues related to enteral feeding in H&N cancer patients. This is timely and important, since more aggressive therapy has necessitated feeding support, but the patient well-being trade-offs between better maintenance of weight, vs. side effects of enteral feeding, are not well known. The questionnaire, initially known as “QOL-EF” has been accepted for inclusion into the popular Functional Assessment of Cancer Therapy (FACT) instrument suite administered by the FACIT group (http://www.facit.org/), and its use has been requested by several international investigators (Appendix 1).

I was an initiator, with site group leader Dr. Brian O’Sullivan, of a novel method of determining outcomes at point of care for patients with H&N cancer. The H&N “anthology”, established in 2003, created an inception cohort of new patients for whom outcomes data is collected prospectively at each visit, utilizing billing data (Appendix 1). I led the evaluation of the success of the system and of data quality. The data from the system’s first 3 years was audited, with results presented internationally, and published. On the basis of its excellent success and good data quality, the PMH has expanded the “anthology” system to other cancer diagnoses. Cancer Care Ontario (CCO) has adopted this system as its model for the design of a similar registry system planned for all cancer patients in Ontario. There has been preliminary interest from other oncologists in Canada in using our methods elsewhere.

I was chosen as the QOL coordinator for 4 major international head and neck cancer clinical trials, all being administered by different cooperative groups. One has been completed (Trans-Tasman Radiation Oncology Group – TROG - HEADStart), one recently completed accrual (NCIC-Clinical Trials Group - NCIC-CTG - HN.6), one is ongoing (Radiotherapy Oncology Group –RTOG- 1016) and one is upcoming (Eastern Cooperative Oncology Group – ECOG – 3311) (Appendix 1). The opportunity to apply expertise across different groups of investigators in Australia, New Zealand, Europe, Asia and the Americas has provided many opportunities to educate the international research community and standardize QOL measurement across jurisdictions. Most recently, I was recognized for my work in this area by being named Chair of a NCI-US Head and Neck Cancer subcommittee on Quality of Life, Toxicity and Patient Reported Outcomes (Appendix 1). Working with this committee, I have led the development of a manuscript recommending specific measurement tools for assessment of head and neck cancer outcomes in clinical trials, which is currently being prepared for publication.

I have authored two textbook chapter related to head and neck cancer. The chapter, "Outcomes Assessment in Head and Neck Cancer" was provided for a textbook that is being disseminated at low cost to physicians and trainees in less developed nations. I agreed to participate in this effort because of the extraordinary impact expected of providing up to date research and clinical care advice to physicians who may not have access to the standard journals and electronic resources.
Goal: To improve cancer care through quality research training, methodology, and application.

My secondary goal is to improve the frequency and methodology of health outcome measurement for patients with cancer. In recent years, the health care professions, governmental agencies and patient advocacy groups have realized the value of assessing additional outcomes besides survival. Access to and quality of care, the efficacy of new technology, continuous quality enhancement, acute and late toxicity, cost-utility assessments and patient reported outcomes are all examples of outcomes of interest. Creative sources of data, such as the use of administrative databases, may be required to answer outcomes-oriented research questions. Structured reviews and evidence-based guidelines are tools for dissemination of research results to hopefully close the loop and bring change to clinical practice.

I have a broad understanding of outcomes assessment and have taught frequently on this topic. My creative professional activity in this area has focused primarily on patient reported outcomes, toxicity and medical decision-making. I have participated in population-based research on the outcomes of screening mammography and was the principal author of a national practice guideline on the same topic. I have also studied technology assessment for diagnosis, treatment and target definition (ultrasound and PET), and the value of new technology in radiotherapy delivery (conformal radiotherapy and IMRT). I have successfully attracted a number of international fellows and graduate students who have presented and published work completed under my supervision, and who will disseminate their expertise throughout the world.

Beyond my primary clinical areas of focus, head and neck and gastrointestinal malignancy, I have served as a consultant and collaborator with colleagues interested in outcomes within other areas of oncology and within health care generally. I am regularly contacted by physicians elsewhere in North America and the world for advice regarding the measurement of treatment outcomes in clinical research. I am currently QOL coordinator for 4 internal, 1 national and 3 international trials. I have been a member of the NCIC-CTG QOL committee since 2005, and was named co-Chair of this committee in August 2006. In June of 2006, I participated as a representative of the NCIC-CTG QOL committee in a special meeting with members of the U.S. Food and Drug Administration on regulatory guidance for the use of patient reported outcomes (such as QOL) to support drug labeling claims. Since 2008, I have been an international advisor and collaborator on an international initiative by the EORTC to retrospectively analyze pooled QOL data from EORTC and NCIC-CTG trials. In addition to my own programme of creative professional activity, reflected in my publications list, I have been active as a methodology consultant and proponent of QOL measurement, utilization and reporting. I am currently QOL coordinator for 3 internal, 1 national and 1 international trial. I have made presentations at the national and international level on QOL.

In 2006, I was appointed as co-Chair of the NCIC-CTG QOL committee. This position has provided several opportunities to educate fellow investigators, research nurses and new investigators on QOL methodology (Appendix 2).

Since 2006, I have been a member of the international advisory board to the EORTC Quality of Life Group’s PROBE initiative. This involves pooled analysis of QOL data from many trials conducted in Europe and Canada. In addition to several publications, this collaboration has provided opportunities to educate researchers and graduate students internationally (Appendix 2).

I am currently a co-applicant of the Canadian Cancer Society Research Institute (CCS-RI) grant supporting a centre for Applied Research in Cancer Control (ARCC), a national collaboration emphasizing the interplay of economics, ethics, and policy in cancer care. I co-led the “Patients and Families” theme during the inauguration of this centre (Appendix 2).
I am also frequently contacted for comments and advice about general measurement, questionnaire and QOL issues (Appendix 2). As a graduate of the University of Toronto Clinical Epidemiology graduate programme, I have been cross-appointed to its home department, the Department of Health Policy, Management and Evaluation (HPME), since 2000 (recently renamed the Institute of Health Policy, Management and Evaluation). I have also been a member of the Programme Executive and was the co-course director for the required Introduction to Clinical Epidemiology (HAD 5301H) course from 2003 through 2006. I have been a member of the Clinical Epidemiology Executive Committee since 2003, a member of the Admissions Committee since 2004, and a member of both the Curriculum and Faculty committees since 2006. From 2006 until 2010, I served as Associate Programme Director for Clinical Epidemiology. I also Chaired the Admissions Committee in 2007, 2008, 2009 and 2010. I was co-course director for the Measurement (HAD 5302) course in 2012.

I have been the primary supervisor for two MSc students who have completed their programmes. I have sat on the thesis committees of a PhD student and several MSc students who has completed their programmes. I have also frequently served as an internal reviewer or chair in thesis defense proceedings.

2. EXEMPLARY PROFESSIONAL PRACTICE

2006 Jul - present Goal: To improve the care of gastric and upper abdominal cancer through technical radiotherapy advancement, clinical and research strategies. My tertiary goal is to improve the therapeutic ratio for patients requiring upper abdominal radiotherapy, particularly for stomach cancer. The presentation at ASCO 1999 of the results of the Intergroup 0116 randomized trial of adjuvant chemoradiation vs. observation post-surgery for gastric cancer, and its subsequent publication in the New England Journal, revolutionized the role of radiotherapy in upper abdominal malignancies. Recognition of the potential for very severe acute and late toxicities to abdominal organs including liver, kidney and small bowel had previously limited the role of radiotherapy in such malignancies. I have developed and published novel treatment techniques designed to reduce acute toxicity, including conformal and IMRT techniques, and am currently completing the phase II portion of a phase I/II study of novel chemoradiotherapy with IMRT in this disease. I was also among the first to demonstrate the effectiveness of adjuvant radiotherapy outside of a clinical trial. This creative professional activity has led to a major ongoing project investigating the link between radiotherapy technique, late toxicity, and QOL in cancer survivors, and to a leadership position in a planned phase III international randomized trial of adjuvant therapy in gastric cancer (TROG-AGITG "TOPGEAR"/NCIC-CTG GA.1) (Appendix 3).

I have lead a team of physicists, radiation therapists and radiation oncology colleagues in the development of conformal and intensity modulated RT for gastric cancer. Documents produced have included an institutional radiotherapy planning protocol and diet instructions for patients (Appendix 3). Together, we have published a novel radiotherapy technique, published data on the effects of respiratory movement on radiotherapy, conducted a quality assurance audit in the first cohort of 20 patients treated at PMH, published an study of the potential role of Intensity Modulated Radiotherapy (IMRT) for gastric cancer, and published the treatment outcomes of our completed cases, including late recurrence data. We have also initiated and are currently conducting a phase I/II trial of a novel approach to adjuvant therapy. Separately, we continue to monitor late effects and QOL in a prospective cohort study. I also contributed to a review of the use of IMRT in upper abdominal malignancies generally, and have acted as the QOL coordinator for related projects in liver irradiation. I was recently named as Canadian chair for quality assurance for an upcoming major international trial of gastric adjuvant therapy (NCIC-GA.1/TROG TOPGEAR).

This creative professional activity has attracted international fellows from the UK, Australia,
and Poland. Physicians in other nations (eg. Morocco) have indicated interest in my research and have requested information about our techniques, and have used my materials in teaching residents and fellows (Appendix 3). I have been recognized locally as the leader of our gastric programme and have been asked to present at CME events and site group retreats. I have been invited internationally as a visiting professor to discuss these developments. I was a faculty member for a course teaching Image Guided Radiotherapy (IGRT) for liver malignancies (primary cancers and metastases) provided to international attendees through a collaboration between the Princess Margaret Hospital/University Health Network and Cancer Care Ontario (Appendix 3).

I have won two awards for mentorship of research with my international GI fellows, the Postgraduate Medical Education Research Supervision Award from the University of Toronto Department of Radiation Oncology in 2006, and the Research Project Supervisor Award from the Princess Margaret Hospital Radiation Medicine Programme in 2006.
Curriculum Vitae

John Rowlands
PhD

A. Date Curriculum Vitae is Prepared: 2016 February 26

Only includes Activities from July 2015 to July 2016

B. Biographical Information

1. EDUCATION

Degrees

1967 Jun - 1971 Feb PhD, Solid State Physics, Physics, The University of Leeds, Leeds, United Kingdom, Supervisor(s): Professor Dennis Grieg
1963 - 1966 BSc, First Class Honours, Physics, The University of Leeds, Leeds, United Kingdom

Qualifications, Certifications and Licenses

1987 Member, MCCPM
Recertified 2012 until 2017, Diagnostic Imaging, Canada College of Physicians in Medicine, Canada

2. EMPLOYMENT

Current Appointments

2012 Jul - present Founding Scientist, Lakehead University, Science, Thunder Bay Regional Research Institute, Thunder Bay, Ontario, Canada
2007 - present Adjunct Professor, Physics, Lakehead University, Thunder Bay
2003 - present Adjunct Full Professor, Electrical Computer Engineering, University of Waterloo
1998 Jul - present Full Professor, Radiation Oncology, University of Toronto, Ontario, Canada
1998 Jul - present Full Professor, Medical Imaging, Faculty of Medicine, University of Toronto
1989 Jan - present Senior Scientist, Imaging Research, Sunnybrook Health Sciences Centre, Toronto, Ontario, Canada
1985 Jul - present  Member, Graduate Studies, University of Toronto

3. HONOURS AND CAREER AWARDS

Distinctions and Research Awards

NATIONAL
Received
2013 Jul - present  Fellow, Canadian Organisation of Medical Physicists. (Distinction, Specialty: Medical Physics)
1987 Jul - present  Fellow, Canadian College of Physicist in Medicine. (Distinction, Specialty: Diagnostic Radiology)

4. PROFESSIONAL AFFILIATIONS AND ACTIVITIES

Professional Associations
2013 - present  Member, Institute of Electrical and Electronic Engineers (IEEE), 92545489
1989 - present  Canadian Organization of Medical Physicists
1980 - present  SPIE the International Society for Optical Engineering
1979 - present  American Association of Physicists in Medicine
1971 - present  Canadian Association of Physicists

Administrative Activities

INTERNATIONAL
SPIE Physics of Medical Imaging Conference
2005 - present  Member, Program Committee, United States.

World Congress on Biomedical Engineering and Medical Physics

PROVINCIAL / REGIONAL
Sunnybrook Health Sciences Centre
2009 Nov - present  Board Member, OPIC Management Board

Thunder Bay Regional Research Institute
2007 - present  Chair, Advanced Detector Devices Theme Committee, Thunder Bay.

Peer Review Activities
### GRANT REVIEWS

**Reviewer**

- **2001 - present** 
  Canadian Institute for Health Research, for Operating Grants
- **1995 - present** 
  Natural Sciences and Engineering Research Council of Canada (NSERC), for Operating Grants

**Chair**

### STUDY SECTION/GRAINT REVIEW COMMITTEE

**Reviewer**

- **2005 - present** 
  US National Institutes of Health, R01/R21/R33 Study Sections (ad hoc)

### C. Academic Profile

#### 1. RESEARCH STATEMENTS

**2013 Jul - present** 
Detectors for synchrotron imaging detectors for multiple applications. Primary application is for next generation of synchrotron detectors for protein crystallography. Potential for new experiments not currently feasible such as “cine” of protein or dna folding.

**2012 Jul 1 - present** 
X-ray phase contrast imaging. There is worldwide interest in a new x ray contrast mechanism - phase contrast imaging. This requires a new way of thinking and a new kind of detector system, this is the subject of the proposed research. The promise of phase contrast imaging using x rays is to obtain new image information, with potentially much lower x ray dose as the mechanism does not require the deposition of energy to obtain
imaging information.

2009 - present
Lead oxide photoconductor for cardiac and chest x-ray imaging.
Building on the success of a-Se based direct conversion detectors, a
new large area, large bandgap semiconductor PbO is being
developed for higher energy x-ray applications such as chest
imaging and fluoroscopic imaging of the heart during international
procedures to stent the coronary vessels.

2008 Jul - present
Detectors for home lab protein crystallography.
For highest resolution images it is necessary to go to Synchrotron
Light Sources, not because of the higher flux or monochromaticity
but because of the better (and more expensive) detectors only
available there.
Our project is to make large area high sensitivity detectors available
for home labs at reasonable cost.
Making better detectors at lower cost will free the synchrotron
sources from repetitive work and make it available for projects which
depend on high flux (i.e. those where timing resolution is important).

2007 - present
Single photon optical detectors for real time optical microscopy for
establishing surgical margins intra operatively.
Based on joint research with Professor Kenkichi Tanioka over a 20
year period, this technology is being developed for photon counting
applications with Hamamatsu Photonics, based on joint inventions
and patents. This particular project has immense potential clinical
impact, but is competing with other possible approaches.

2005 - present
Brachytherapy imaging.
By use of sensitive integrating detectors it has been shown possible
to obtain Nuclear Medicine images without the need for actual
photon counting systems.

2004 - present
Single photon x-ray detectors for mammographic tomosynthesis.

2001 - present
Hybrid MRI/x-ray systems for cardiac imaging (minimally invasive
aortic valve replacement).

2001 - present
Detectors for positron emission tomography (PET).

2000 - present
Flat panel imagers for cone beam CT and digital tomosynthesis.

2000 - present
High quantum efficiency detectors for radiation therapy.

1997 - present
Avalanche multiplication in amorphous selenium and application to
medical imaging.

1995 - present
Relationship of material and imaging properties of amorphous
selenium.

1992 - present
Fundamental imaging properties of amorphous selenium for x-ray
imaging.
1992 - present  Liquid crystal readout of amorphous selenium for digital radiography.
1985 - present  Real-time digital image processing for GI studies and cardiac angiography.

D. Research Funding

1. GRANTS, CONTRACTS AND CLINICAL TRIALS

PEER-REVIEWED GRANTS

FUNDDED

E. Research Supervision

1. PRIMARY OR CO-SUPERVISION

Research Associate
2003 - present  **Primary Supervisor.** Norman Robert PhD, Sunnybrook Health Sciences Centre. Cardiac angiography.
Curriculum Vitae

Arjun Sahgal BSc, MD, FRCPC
Associate Professor, Department of Radiation Oncology and Surgery, University of Toronto

A. Date Curriculum Vitae is Prepared: 2016 August 4

1. EDUCATION

Degrees
1997 - 2001 MD, Dept of Medicine, University of Ottawa, Ottawa, Ontario, Canada
1993 - 1997 BSc, Science, University of Ottawa, Ottawa, Ontario, Canada

Postgraduate, Research and Specialty Training
2007 Principles and Practice of Gamma Knife Radiosurgery, University of Pittsburgh, Pittsburgh, Pennsylvania, United States
2006 - 2007 Clinical Fellow, Department of Radiation Oncology, University of California, San Francisco, San Francisco, California, United States, Supervisor(s): Dr. David Larson and Mack Roach III
2001 - 2006 Resident, Department of Radiation Oncology, University of Toronto, Toronto, Ontario, Canada

Qualifications, Certifications and Licenses
2007 - present Certificate of Registration for Independent Practice, College of Physicians and Surgeons of Ontario, Toronto, Ontario, Canada
2006 - present Specialist Certificate, Radiation Oncology, Royal College of Physicians and Surgeons of Canada
2003 - present Licentiate, Medical Council of Canada
2006 - 2007 Licentiate, Medical Board of California
2. EMPLOYMENT

Current Appointments

2015 - present  Associate Scientist of the Toronto Western Research Institute, University of Toronto, Toronto, Ontario, Canada
2013 - present  Associate Member of the Institute of Medical Sciences, University of Toronto, Toronto, Ontario, Canada
2013 - present  Deputy Chief of the Department of Radiation Oncology, Odette Cancer Centre, Sunnybrook Health Sciences Centre, Toronto, Ontario, Canada
2013 - present  Site Group Leader for CNS Oncology, Odette Cancer Centre, Sunnybrook Health Sciences Centre, Toronto, Ontario, Canada
2012 - present  Clinician Scientist, University of Toronto, Toronto, Ontario, Canada
2012 - present  Scientist, Odette Cancer Research Program, Physical Sciences, Sunnybrook Research Institute, Toronto, Ontario, Canada
2012 - present  Associate Professor, Radiation Oncology, University of Toronto, Toronto, Ontario, Canada
2010 - present  Cross-Appointed, Surgery, University of Toronto, Toronto, Ontario, Canada
2009 - present  Cross-Appointed, University of Toronto Spine Program, University of Toronto, Toronto, Ontario, Canada
2007 - present  Staff Radiation Oncologist, Radiation Oncology, Odette Cancer Centre, Sunnybrook Health Sciences Centre, University of Toronto, Toronto, Ontario, Canada

Previous Appointments

CLINICAL

2008 - 2014  Cross-appointed, Division of Neurosurgery, St. Michael’s Hospital, University of Toronto, Toronto, Ontario, Canada
2008 - 2013  Staff Radiation Oncologist, Radiation Oncology, Princess Margaret Hospital, University Health Network, University of Toronto, Toronto, Ontario, Canada
2007 - 2008  Cross-appointed Staff, Department of Radiation Oncology, Princess Margaret Hospital, University Health Network, University of Toronto, Toronto, Ontario, Canada
2006 - 2007  Clinical Instructor, Department of Radiation Oncology, University of California San Francisco, San Francisco, California, United States

HOSPITAL

2013 - 2014  Interim Chief of Medical Physics, Radiation Oncology, Odette Cancer Centre, Sunnybrook Health Sciences Centre, Toronto, Ontario, Canada

RESEARCH

2008 - 2013  Ontario Cancer Research Institute Researcher, University Health Network, University of Toronto, Toronto, Ontario, Canada

UNIVERSITY - RANK

2007 - 2012  Assistant Professor, Radiation Oncology, University of Toronto, Toronto, Ontario, Canada
3. HONOURS AND CAREER AWARDS

Distinctions and Research Awards

INTERNATIONAL

Received

2016
2nd highest downloaded research paper for 2015 in the International Journal of Radiation Oncology Biology Physics. (Distinction)

2016
Top 5 cited research paper for 2014-2015 in Clinical Oncology. (Distinction)

2014
De novo vs. progression of an existing vertebral compression fracture (VCF) following spine stereotactic body radiotherapy (SBRT): Separate risk profiles to consider, Senior responsible author, Best of ASTRO. (Distinction)
Selected to be highlighted at the “Best of ASTRO 2014” symposium held in Miami, USA, trainee Chia-Lin Tseng (primary supervisor).

2014
Excellence in reviewing for the International Journal of Radiation Oncology, Biology, Physics. (Distinction)
Award as outstanding reviewer for the journal.

2014
Factors influencing vertebral compression fracture specific to renal cell carcinoma spinal metastases after stereotactic body radiotherapy: A multi-institutional study, Senior responsible author, Best of ASTRO. (Distinction)
Selected to be highlighted at the “Best of ASTRO 2014” symposium held in Miami, USA, trainee Isabelle Thibault (primary supervisor).

2014
Salvage spine stereotactic body radiotherapy (SBRT) for spinal metastases that failed initial SBRT: A first report, Senior responsible author, Best of ASTRO. (Distinction)
Selected to be highlighted at the “Best of ASTRO 2014” symposium held in Miami, USA, trainee Isabelle Thibault (primary supervisor).

2013
Cochrane review: Radiation dose escalation for high grade glioma. (Distinction)
Fellow award: Luluel Khan (primary supervisor).

2013
Excellence in reviewing for the International Journal of Radiation Oncology, Biology, Physics. (Distinction)
Award as outstanding reviewer for the journal.

2013
Individual patient data (IPD) meta-analysis of randomized controlled trials comparing stereotactic radiosurgery (SRS) alone to SRS plus whole brain radiation therapy in patients with brain metastases, Best of ASTRO. (Distinction)
Selected to be highlighted at the “Best of ASTRO 2013” symposium held in Miami, USA.

2013
Spine stereotactic body radiotherapy for metastatic renal cell cancer: Local control and analysis of predictive and prognostic factors, Senior responsible author, International Stereotactic Radiosurgery Society 11th bi-annual meeting. (Distinction)
Young investigator award, trainee Isabelle Thibault (primary supervisor).

2012
Meta-analysis evaluating stereotactic radiosurgery, whole brain radiotherapy, or both for patients presenting with a limited number of brain metastases, Principal author, European Association of Neuro-Oncology (EANO). (Distinction)
Best article in 2011 sub-section on brain metastases.
NATIONAL

Received

2013 **Volunteer of distinction**, Brain Tumour Foundation of Canada. (Distinction)
*Award for exceptional voluntary work for the Brain Tumour Foundation of Canada.*

2010 **Stereotactic body radiation therapy of the spine using the Elekta synergy, hexapod and bodyFIX systems**, Senior responsible author, Canadian Association of Radiation Oncology (CARO). (Distinction)
*Award for best CARO abstract in radiation/medical physics (shared with Co-PI Derek Hyde PhD).*

PROVINCIAL / REGIONAL

Received

2016 **Leaders Circle Ambassador**, Leaders Circle, Toronto, Ontario, Canada. (Distinction)
*Award for bringing 2013 International Stereotactic Radiosurgery Congress to Toronto.*

2012 **Clinical Scientist**, Ontario Association of Radiation Oncologists (OARO), Toronto, Ontario, Canada. (Distinction)
*Award designation and support as a clinician scientist.*

2008 **Cancer Care Ontario quality award for the Rapid Response Radiotherapy Program**, Collaborator, Cancer Care Ontario, Toronto, Ontario, Canada. (Distinction, Specialty: Quality assurance award, radiation oncology)
*Award for program excellence.*

LOCAL

Received

2016 **Department of Radiation Oncology chair’s award for academic excellence in research**, University of Toronto, Ontario, Canada. (Research Award, Specialty: Radiation Oncology)
*Dosimetric feasibility of the hybrid magnetic resonance imaging (MRI)-LINAC system for brain metastases: The impact of the magnetic field. Fellow award: Chia-Lin (Eric) Tseng (primary supervisor).*

2015 **Department of Radiation Oncology, Sunnybrook Health Sciences Centre, annual performance award**, Sunnybrook Health Sciences Centre, Toronto, Ontario, Canada. (Distinction, Specialty: Research and clinical performance award)
*Award for outstanding research and clinical practice by the Chief of Radiation Oncology, Sunnybrook Health Sciences Centre.*

2014 **Department of Radiation Oncology, Sunnybrook Health Sciences Centre, annual performance award**, Sunnybrook Health Sciences Centre, Toronto, Ontario, Canada. (Distinction, Specialty: Research and clinical performance award)
*Award for outstanding research and clinical practice by the Chief of Radiation Oncology, Sunnybrook Health Sciences Centre.*

2013 **Department of Radiation Oncology, Sunnybrook Health Sciences Centre, annual performance award**, Sunnybrook Health Sciences Centre, Toronto, Ontario, Canada. (Distinction, Specialty: Research and clinical performance award)
*Award for outstanding research and clinical practice by the Chief of Radiation Oncology, Sunnybrook Health Sciences Centre.*

2013 **Radiation Medicine Program Princess Margaret Cancer Centre, research productivity award**, Toronto, Ontario, Canada. (Research Award, Specialty: Radiation Oncology)
*Award for highest research productivity within the department.*

2013 **University of Toronto Spine Program, SpineFEST 2011, 3rd place in clinical oral**
presentation award, primary supervisor, Toronto, Ontario, Canada. (Research Award)
Award for the abstract ‘Surgical resection of epidural disease improves local control following stereotactic body radiotherapy (SBRT)’, trainee Isabelle Thibault (primary supervisor).

2012
Department of Radiation Oncology, Sunnybrook Health Sciences Centre, annual performance award, Sunnybrook Health Sciences Centre, Toronto, Ontario, Canada. (Distinction, Specialty: Research and clinical performance award)
Award for outstanding research and clinical practice by the Chief of Radiation Oncology, Sunnybrook Health Sciences Centre.

2012
Odette Cancer Centre, Sunnybrook Health Sciences Centre Allan E. Tiffin award, Toronto, Ontario, Canada. (Research Award, Specialty: Radiation Oncology)
Award to perform research in MRI and brain metastases response following radiosurgery. Total Amount: 45,000 CAD

2012
Radiation Medicine Program Princess Margaret Cancer Centre, research productivity award, Toronto, Ontario, Canada. (Research Award, Specialty: Radiation Oncology)
Award for highest research productivity within the department.

2012
University of Toronto Spine Program, SpineFEST 2011, 1st place in clinical oral presentation award, Toronto, Ontario, Canada. (Research Award)
Award for the abstract ‘Predictors of vertebral compression fracture (VCF) post-spine stereotactic body radiotherapy (SBRT): Analysis of predictive factors’, trainee, Marcello Pecora (primary supervisor).

2011
Department of Radiation Oncology, Sunnybrook Health Sciences Centre, annual performance award, Sunnybrook Health Sciences Centre, Toronto, Ontario, Canada. (Distinction, Specialty: Research and clinical performance award)
Award for outstanding research and clinical practice by the Chief of Radiation Oncology, Sunnybrook Health Sciences Centre.

2011
Radiation Medicine Program, Princess Margaret Hospital, most influential research publication 2011 award, Toronto, Ontario, Canada. (Specialty: Research publication award, Radiation Oncology)
Award for the publication with the greatest potential for influence in the future.

2011
University of Toronto Spine Program, SpineFEST 2011, 2nd place in clinical oral presentation award, Toronto, Ontario, Canada. (Research Award)
Award for the abstract ‘Local control with stereotactic body radiotherapy (SBRT) for spinal metastases: Is it dose or biology that matters’, trainee publication, Laura Masucci (primary supervisor).

2010
Department of Radiation Oncology, Sunnybrook Health Sciences Centre, annual performance award, Sunnybrook Health Sciences Centre, Toronto, Ontario, Canada. (Distinction, Specialty: Research and clinical performance award)
Award for outstanding research and clinical practice by the Chief of Radiation Oncology, Sunnybrook Health Sciences Centre.

2009
Department of Radiation Oncology, Sunnybrook Health Sciences Centre, annual performance award, Sunnybrook Health Sciences Centre, Toronto, Ontario, Canada. (Distinction, Specialty: Research and clinical performance award)
Award for outstanding research and clinical practice by the Chief of Radiation Oncology, Sunnybrook Health Sciences Centre.

2009
Department of Radiation Oncology, University of Toronto best annual research performance award, Toronto, Ontario, Canada. (Research Award, Specialty: Radiation Oncology)
Award for most peer reviewed papers in one year as selected by the Department of Radiation Oncology.

2009
Department of Radiation Oncology, University of Toronto outstanding research potential award, Toronto, Ontario, Canada. (Research Award, Specialty: Radiation Oncology)
Award for outstanding research potential as selected by the Department of Radiation Oncology.
2000

**Highest standing pediatrics 3rd year clinical rotation medical school**, Clinical clerk, University of Ottawa, Ottawa, Ontario, Canada. (Distinction, Specialty: Clinical award, Pediatrics)

Recognition for achieving the highest standing in pediatrics 3rd year clinical rotation. Total Amount: 500 CAD

### Teaching and Education Awards

#### LOCAL

**Received**

2013

Department of Radiation Oncology, University of Toronto, professional development and continuing medical education award, Toronto, Ontario, Canada. (Specialty: Teaching award, Radiation Oncology)

Award for leading major educational activities - International Stereotactic radiosurgery Society 11th bi-ennial meeting, June 2013 in Toronto, Canada.

2013

Radiation Medicine Program Princess Margaret Cancer Centre, AEP “Putting Innovation to Work” award, Toronto, Ontario, Canada. (Specialty: Radiation Oncology)

Award for the creation of the paraspinal image guidance course.

2013

Radiation Medicine Program Princess Margaret Cancer Centre, AEP award highest overall average teaching effectiveness score, Toronto, Ontario, Canada. (Specialty: Radiation Oncology)

Teaching award.

2012

Radiation Medicine Program, Princess Margaret Hospital, best rounds for 2012, Toronto, Ontario, Canada. (Specialty: Presentation award, Radiation Oncology)

Award for the best rounds presented based on those evaluations of all weekly rounds given for the radiation medicine program at the Princess Margaret Hospital in 2012.

2011

Radiation Medicine Program, Princess Margaret Hospital, best rounds for 2011, Toronto, Ontario, Canada. (Specialty: Presentation award, Radiation Oncology)

Award for the best rounds presented based on those evaluations of all weekly rounds given for the Radiation Medicine Program at the Princess Margaret Hospital in 2011.

2010

Radiation Medicine Program, Princess Margaret Hospital, post-graduate mentorship award, Mentor, University of Toronto, Toronto, Ontario, Canada. (Specialty: Teaching award, Radiation Oncology)

Award for outstanding mentoring of post-graduate students.

2009

Best research project supervisor award, Supervisor, Department of Radiation Medicine, Princess Margaret Hospital, University of Toronto, Toronto, Ontario, Canada. (Specialty: Teaching award, Radiation Oncology)

Award for best research project supervisor of post-graduate students.

### Student/Trainee Awards

#### LOCAL

**Received**

2014

2014 D+H SRI research summer student award program, primary supervisor. Sunnybrook Research Institute (SRI)

Studentship for Stephanie Zhou to work on MR Linac. Total Amount: 3,200 CAD
4. PROFESSIONAL AFFILIATIONS AND ACTIVITIES

Professional Associations

2015 - present Radiosurgery Society
2014 - present American College of Radiology
2014 - present AOSpine
2013 - present Society of Neuro-Oncology
2010 - present International Stereotactic Radiosurgery Society
2007 - present Acoustic Neuroma Society of Canada
2007 - present American Society for Therapeutic Radiology and Oncology
2007 - present Canadian Association for Radiation Oncology
2007 - present Canadian Brain Tumour Consortium
2010 - 2013 Canadian Spine Society
2007 - 2014 Canadian Association of Brain Tumours

Administrative Activities

INTERNATIONAL

1st Annual conference on innovations in cancer therapy and response monitoring
2015 - 2016 Co-Chair, Toronto, Ontario, Canada.
Co-chairs are Dr. Gregory Czarnota, Dr. Gregory Stanisz, Dr. Michael Kolios.

1st Annual conference on innovations in radiation engineered therapy
2015 - 2016 Co-Chair, Toronto, Ontario, Canada.
Co-chair is Dr. Gregory Czarnota.

American Association of Physics in Medicine
2013 - present Participating Member and Report Co-Author AAPM TG-178
Gamma Knife standards committee.
2011 - present Participating Member
AAPM Biologic Effects Committee - Working group on biologic effects of hypofractionated radiotherapy which includes the SBRT TCP group, SBRT NTCP group, SBRT rationale for Rx group, SBRT TCP cranial group, SBRT NTCP cranial group, SBRT TCP spinal group, and SBRT NTCP spinal group.

American College of Radiology
2014 - present Panel Member
ACR Appropriateness Criteria (AC) expert panel on RO-bone metastases.

American Society of Therapeutic Radiation Oncology (ASTRO)
2014 - present Member
History committee.
2014 - present Member
CNS track committee.
2015 Discussant
CNS IV - Spinal SBRT; Melanoma of Brain and Ocular Structures.

Arjun SAHGAL BSC, MD, FRCPC

Ontario, Canada.

2009

**Scientific Session Facilitator**
9th bi-annual International Society of Stereotactic Radiosurgery meeting, head and neck and prostate scientific abstract session, San Francisco, California, USA.

2007

**Scientific Session Facilitator**
9th bi-annual International Society of Stereotactic Radiosurgery meeting, benign spine radiosurgery tumor scientific abstract session, San Francisco, California, USA.

Memorial Sloan Kettering Cancer Center (MSKCC) Spine SBRT Working Group
2009 - 2012 **Participating Member**, New York, United States.

Neuro-Oncology Journal
2016 - 2017 **Chief Editor**
Supplement on advanced radiation technology.

NRG Oncology Cancer Prevention and Control (CPC) Committee
2015 - present **Member**
Committee on trial application for review on cancer prevention and control.

Radiologic Society of North America
2012 - 2013 **Medical Advisor**
RSNA RadiologyInfo.org public education website - radiosurgery/SBRT information subsection.

Society of Neuro-Oncology
2011 **Co-Chair**, Anaheim, California, United States.
Society of Neuro-Oncology annual meeting education day.

NATIONAL
Acoustic Neuroma Society of Canada
2008 - 2014 **Member, Medical Advisory Board**

Brain Tumour Foundation of Canada
2009 - present **Member, Professional Advisory Group**
Medical expert for patients contacting the organization.
2013 - 2015 **Board Member**

Canadian Association of Radiation Oncology
2010 - 2012 **Committee Chair and Report Author**, Canada.
Stereotactic body radiotherapy working group.
2010 **Scientific Session Facilitator**, Canada.
Central nervous system abstract session, 24th annual meeting, Vancouver, British Columbia, Canada.
2009 - 2010 **Member and Report Co-author**, Canada.
Stereotactic radiosurgery guideline development committee.
2007 - 2014 **Member, Advisory Group**, Canada.
Symptom control in radiation oncology.
Canadian Brain Tumour Consortium
2010 - present  
Member
2010 - 2014  
Board of Directors

Canadian Melanoma Task Force
2013 - 2016  
Member
*Brain metastases sub-section.*

Canadian Neuro-Oncology (CNO)
2015 - 2016  
Scientific Committee Member, Canadian Neuro-Oncology (CNO) scientific program committee, 17th biennial meeting, Toronto, Ontario, Canada.

Clinical Trials
2016 - present  
SBRT QA Chair
*The role of stereotactic body radiotherapy in the management of castration-resistant prostate cancer with oligometastases: An adaptive phase II/III randomized trial.*

National Cancer Institute of Canada - Clinical Trials Group
2016 - present  
Trial Committee & QA chair NCIC CTG BR.35
*A randomized phase II study of precision radiotherapy for oligometastatic non-small cell lung cancer (PROMISE-NSCLC).*

2013 - present  
Study Chair NCIC CTG IND.224
*A phase II study of concurrent dabrafenib and trametinib with stereotactic radiation in the management of patients with BRAF mutation-positive malignant melanoma and brain metastases.*

2013 - present  
Representative
*CNS site group for the National Cancer Institute of Canada.*

2012 - present  
Study Chair NCIC CTG SC24
*A phase II randomized feasibility study comparing stereotactic body radiotherapy (SBRT) versus conventional palliative radiotherapy (CRT) for patients with spinal metastases.*

2007 - present  
Member, Advisory Group
*Symptom control in radiation oncology.*

2016  
Senior Leadership Committee Member
*Participate in new strategic plan for NCIC-CTG.*

2011 - 2014  
Member
*Quality assurance radiation coordinator for the EORTC-led CATNON clinical trial.*

2008 - 2009  
Representative
*Genito-urinary site group for the National Cancer Institute of Canada.*

University of Saskatchewan
2007 - 2008  
Radiosurgery Consultant
*Provincial proposals: “A second plea to establish a stereotactic radiosurgery program in Saskatchewan” by Dr. Daryl Fourney.*

PROVINCIAL / REGIONAL
Cancer Care Ontario
2016 - present  
Member
*Proton Therapy Expert Panel Member.*

2015 - present  
Member
Radiation equipment replacement grant committee.

2014 - present
Member
Integrate regional steering committee.

2010 - 2011
Guideline Reviewer
Cancer Care Ontario program for evidence-based care IMRT guideline project.

2010
Member
Cyberknife working group.

Ontario Ministry of Health
2014 - present
Expert Reviewer
Out-of-country approval program.

2008 - 2009
Expert Reviewer
Ontario Ministry of Health out-of-province unit.

LOCAL
Sunnybrook Health Sciences Centre
2015 - present
Department Representative, Toronto, Ontario, Canada.
Medical Advisory Committee.

2016
Medical Advisory Committee Representative, Toronto, Ontario, Canada.
5 year Family and Community Medicine Department Review.

University of Toronto
2013 - present
Director of the Cancer Ablation Therapy Program, Toronto, Ontario, Canada.
Sunnybrook Odette Cancer Centre.

2013 - present
Deputy Chief of Radiation Oncology, Toronto, Ontario, Canada.
Sunnybrook Odette Cancer Centre, Department of Radiation Oncology.

2009 - present
Research Committee Member, Toronto, Ontario, Canada.
Spine program faculty.

2013 - 2014
Interim Chief of Medical Physics, Toronto, Ontario, Canada.
Sunnybrook Odette Cancer Centre, Department of Radiation Oncology.

2010 - 2012
Member, Toronto, Ontario, Canada.
Strategic plan cross appointment committee, Department of Radiation Oncology.

2009
Member, Toronto, Ontario, Canada.
CARMS selection committee for the 2010 international medical graduate applicants to the University of Toronto Radiation Oncology Residency, Department of Radiation Oncology.

2009
Member, Toronto, Ontario, Canada.
Resident examination committee, Department of Radiation Oncology.

2008 - 2010
Chair, Toronto, Ontario, Canada.
Sunnybrook hospital multidisciplinary spine oncology rounds.

2007 - 2015
Advisor to the Editor for Hot Spot, Toronto, Ontario, Canada.
A non-peer reviewed newsletter of the Rapid Response Radiotherapy Program at Sunnybrook Health Sciences Centre.

2005 - 2006
Member, Toronto, Ontario, Canada.
Radiation oncology post-graduate resident medical education committee, Department of Radiation Oncology.

2004 - 2005
Member, Toronto, Ontario, Canada.
CARMS resident selection committee, Department of Radiation Oncology.

2003 - 2004
Member, Toronto, Ontario, Canada.
Clinical ethics committee, Sunnybrook and Women’s College Health Sciences Centre.
Arjun SAHGAL BSC, MD, FRCPC

2001 - 2005  **Member**, Toronto, Ontario, Canada.  
*Radiation oncology post-graduate resident medical education committee, Department of Radiation Oncology.*

**Peer Review Activities**

**EDITORIAL BOARDS**

**Member**

C. Academic Profile

1. RESEARCH STATEMENTS

Research Statement.
My research focus relates to my training and clinical expertise in spinal metastases, brain metastases and primary central nervous system tumours. I have expertise in technical evaluation of radiation apparatus, and in developing and conducting clinical trials specific to brain radiosurgery and stereotactic body radiotherapy. I have a major interest in fundamental technical research and development specific to MR Linac technology, Gamma Knife technology and the general application of MR in radiation planning and delivery. In line with high precision radiotherapy treatments, I participate in the development of focal non-radiotherapeutic modalities for spine and brain tumors using photodynamic therapy, radiofrequency ablation and MRI guided ultrasound technology.
D. Research Funding

1. GRANTS, CONTRACTS AND CLINICAL TRIALS

PEER-REVIEWED GRANTS

Funded

2015 - 2017 Co-Investigator. A mindfulness-based intervention to improve quality of life among brain tumour survivors. Brain Tumour Foundation of Canada. PI: Selchen S, Ellis J. Collaborator(s): Perry J, Sahgal A, Soliman H, Tsao M, Moroney C, Bilodeau D. 25,000 CAD. [Grants] This study will test the hypothesis that an 8 week MBI for brain tumour survivors will be more effective than treatment as usual in reducing depressive symptoms and mental fatigue, as well as improving quality of life.

Examining patterns of relapse in glioblastoma patients treated with chemoradiation.

NON-PEER-REVIEWED GRANTS

**[Grants]**  
*Evaluation of the safety and feasibility of SRT for oligo-progression patients with metastatic RCC.*

2014 - 2019  **Principal Investigator.** Elekta WFM project. Elekta AB. Collaborator(s): Chin, L. 142,500 CAD.  
**[Grants]**  
*Developing Mosaic for MR Linac.*

2014 - 2019  **Co-Investigator.** Investigation of plan quality for spine SBRT and brain SRT using the Monaco treatment planning system. Elekta AB. PI: Rushin, M. Collaborator(s): Sahgal A, Soliman H, Lee Y. 100,000 CAD.  
**[Grants]**  
*Evaluation of Monaco for brain and spine SBRT.*

2014 - 2019  **Principal Investigator.** Randomized study of SRS vs. SRS plus WBRT for 5 to 15 metastases. Elekta AB. 4,500,000 CAD.  
**[Grants]**  
*Evaluation of SRS for multiple brain metastases.*

2014 - 2019  **Principal Investigator.** Monaco dosimetry studies for MR linac. Elekta AB. Collaborator(s): Keller, B. 605,531.25 CAD.  
**[Grants]**  
*Evaluation of treatment planning for the MR linac.*

2014 - 2016  **Co-Principal Investigator.** SRT/SBRT elearning modules. Elekta AB. PI: Di Prospero, L. Collaborator(s): Sahgal, A, Soliman, H. 40,000 CAD.  
**[Grants]**  
*Developing educational modules for SRT and SBRT.*

**[Clinical Trials]**  
*To determine the incidence of late toxicities associated with comprehensive stereotactic radiotherapy of all disease sites in patients with hormone sensitive oligometastatic prostate cancer, and to determine the efficacy of such an approach.*

**[Clinical Trials]**

**[Clinical Trials]**

**[Grants]**  
*Development of a new program for Sunnybrook to reduce burnout with mindfulness techniques.*

2012 - 2016  **Principal Investigator.** Early prediction of response for brain metastases following
stereotactic radiosurgery and hypofractionated stereotactic radiosurgery using perfusion and apoptosis quantification MRI. Odette Cancer Centre. Allan E. Tiffin Trust. Collaborator(s): Aviv R, Stanisz G. 45,000 CAD. [Grants]
Funding to perform novel imaging for response in brain metastases.

2012 - 2013

**Principal Investigator.** A phase II study to determine efficacy of stereotactic body radiotherapy (SBRT) for spinal/para-spinal metastases - sub-section on CT perfusion. Spinal Research Foundation. Collaborator(s): Laperriere JN, Massicotte E, Lewis S, Rampersaud R, Fehlings F, Xu W, Letourneau D, Yu E. 10,000 CAD. [Grants]
Funding to perform sub-study on the use of CT perfusion in patients treated with SBRT.

2011 - 2016

**Co-Principal Investigator.** A study to evaluate the safety and feasibility of transcranial MRI-Guided focused ultrasound surgery in the treatment of brain tumors. MRI Guided Focused Ultrasound Foundation Virginia. REB #: 366-2010. PI: Mainprize, T. Collaborator(s): Hynynen K, Tsao M. 287,717 CAD. [Clinical Trials]

2010 - 2012

**Local Co-Investigator.** Phase III trial on concurrent and adjuvant temozolomide chemotherapy in non-1p/19q deleted anaplastic glioma. The CANTON Intergroup trial. National Cancer Institute of Canada Clinical Trials Group. PI: Mason, W. Collaborator(s): Laperriere JN, Menard CM, Sahgal A, Millar B. [Clinical Trials]
OCREB #: 09-044.

2010 - 2012

**Co-Investigator.** Stereotactic body radiotherapy for oligometastases a phase 1 feasibility study. PI: Cheung P. Collaborator(s): Sahgal A, Chung H, Chu H, Poon I, Chow E. [Clinical Trials]
REB#: 253-2010.

2009 - 2012

**Principal Investigator.** A population-based study on low grade glioma. Institute of Clinical Evaluation Sciences. Collaborator(s): Paszat L, Tsao M, Perry J, Laperriere N, Mainprize T. [Clinical Trials]
REB #: 2010 0872 010 000.

2009 - 2012

**Co-Investigator.** A phase 1 trial on the use of PDT in the treatment of breast cancer vertebral metastases. PI: Yee, A. Collaborator(s): Whyne C, Akens M, Sahgal A, Chow E, Wilson B, Bisland S, Clemons M. [Clinical Trials]
A phase I study examining the use of photodynamic therapy to treat vertebral metastases from breast cancer.

2009 - 2011

**Co-Investigator.** Canadian-led international development of a European Organization for Research and Treatment of Cancer (EORTC) quality of life module for malignant epidural spinal cord compression. Sunnybrook Health Sciences Centre. PI: Mitera, G. Collaborator(s): Sahgal A, Chow E, Loblaw A. [Clinical Trials]
REB#: 321-2009.

2009 - 2011

**Local Principal Investigator.** Childhood cancer survivor study. Childhood cancer survivor study group. PI: Greenberg M. Collaborator(s): Sahgal A. [Clinical Trials]
REB#: 455-2008.

2009 - 2010

**Local Co-Investigator.** A randomized, double blind, placebo controlled multicentre phase III trial of bevacizumab, temozolomide and radiotherapy, followed by bevacizumab and temozolomide versus placebo, temozolomide and radiotherapy followed by placebo and temozolomide in patients with newly diagnosed glioblastoma. F. Hoffmann-La Roche Ltd. PI: Mason, W. Collaborator(s): Laperriere JN, Menard CM, Sahgal A, Millar B. [Clinical Trials]
2009 - 2010
**Local Co-Investigator.** BIBW 2992 with or without daily temozolomide in the treatment of patients with recurrent malignant glioma. Boehringer Ingelheim. PI: Mason, W. Collaborator(s): Laperriere JN, Menard CM, Sahgal A, Millar B. [Clinical Trials] 
*OCREB #: 09-027.*

2008 - 2013
**Local Principal Investigator.** A randomized phase III study of temozolomide alone and short-course radiation versus short-course radiation alone in the treatment of newly diagnosed glioblastoma multiforme in elderly patients. National Cancer Institute of Canada. PI: Sahgal, A. [Clinical Trials] 
*REB #: 212-2007.*

2008 - 2012
**Local Co-Principal Investigator.** Surgical versus nonoperative treatment of metastatic epidural spinal cord compression. Quality of life and cost-effectiveness outcomes. PI: Sahgal, A. [Clinical Trials] 
*REB#: 423-2007.*

2006 - 2013
**Local Co-Investigator.** Primary chemotherapy with temozolomide vs. radiotherapy in patients with low grade gliomas after stratification for genetic 1p-loss: A phase III study. National Cancer Institute of Canada Clinical Trials Group. PI: Mason, W. Collaborator(s): Laperriere JN, Menard CM, Sahgal A, Millar B. [Clinical Trials] 
*UHN REB#: 06-0400-C.*

2004 - 2006
**Principal Investigator.** Rapid reversal of iron deficiency anemia using intravenous iron infusion in locally advanced cervical cancer patients undergoing concurrent curative chemotherapy and radiotherapy: A phase two clinical efficacy trial. Luitpold Pharmaceuticals (United States) and Genpharm Inc. (Canada). Collaborator(s): Ackerman I, Thomas G. 60,000 CAD. [Grants] 
*A phase II trial examining intravenous iron infusion in patients with locally advanced cervical cancer to rapidly reverse iron deficiency anemia.*

1. **MOST SIGNIFICANT PUBLICATIONS**

      As the committee chairperson for the spine section of the Response Assessment in Neuro-Oncology (RANO) group, which is an international group of experts in all aspects of neuro-oncology, I led this international effort to standardize practice and clinical endpoints specific to spine SBRT. This is the first part of the SPINO committee’s scope that details what imaging protocols should be used for planning and follow-up, and response criteria for pain and imaging-based local control. This paper will serve as the benchmark for clinical trial development, and the principles have been adhered to in the SC24 Canadian Phase 2 Spine SBRT trial.

This paper represents Level 1 evidence, as an individual patient data meta-analysis, supporting SRS alone for younger patients with a survival benefit. This research was the result on an international collaboration showing for the first time a survival advantage for SRS alone. This paper has been recognized as practice changing with an accompanying editorial, invited comment in Lancet Oncology, and several media announcements. Ultimately, this analysis is a major contribution to support practice change away from whole brain radiation to stereotactic radiosurgery alone. The International Journal of Radiatiation, Oncology, Biology, Physics reported that this paper was their 2nd most downloaded paper during 2015.

This paper is the first multi-institutional analysis of vertebral compression fracture following SBRT. It confirms my prior work (Cunha et al.), and clearly indicates a dose-complication relationship. This report also confirms three of the six SINS factors as significant and supports its use in determining high risk patients for fracture. Ultimately, this paper has had impact as it detracts from high dose single fraction SBRT due to the high complication rate.

These data represent the most extensive dosimetric data for spinal cord tolerance to be published. We created a first logistic regression model for radiation myelopathy and SBRT to generate safe tolerance doses to the spinal cord in 1 to 5 fractions. This was a multi-institutional and international collaboration, and the recommended threshold doses are being adopted globally in clinical practice including clinical trials. Furthermore, the AAPM spinal cord guidelines for SBRT (HYTEC) have endorsed these data.

This paper is a first report of re-irradiation spinal cord tolerance specific to re-irradiation with spine SBRT. As a result of a multi-institutional collaboration cases of re-treatment myelopathy were collected and compared to control and the data modelled to provide tolerance doses for 1 to 5 fractions given various ranges of prior radiotherapy. Until this paper, there had been no benchmark for cord tolerance with re-irradiation SBRT and this paper is a landmark study. These data have been adopted globally and represent a standard for safe re-irradiation SBRT practice.

F. Presentations and Special Lectures

1. INTERNATIONAL

Invited Lectures and Presentations

2016 Visiting Professor. Stereotactic body radiotherapy for spinal metastases: Where we have been and where we need to go. University of Rochester. Rochester, New York, United States.

2016 Invited Speaker. Overcoming the limitations of spine SBRT for spinal metastases. 11th Meeting of Korean Radiosurgery Society. Seoul, Korea, Republic Of.

2016 Invited Speaker. Hypofractionated stereotactic radiosurgery for brain metastases. 18th International Leksell Gamma Knife Society Meeting. Amsterdam, Netherlands.

2016 Invited Speaker. 24 Gy is too much. Memorial Sloan Kettering Cancer Center Multidisciplinary Spine Oncology Symposium. New York, New York, United States.

2016 Invited Speaker. SBRT in the setting of cord compression, SBRT in the post-operative patient. 3rd

2016 **Invited Speaker.** Spine SBRT: What we have learned and what we need to go further. Radiation Oncology Grand Rounds, Roswell Park Cancer Institute. Buffalo, New York, United States.

2015 **Invited Speaker.** Stereotactic body radiotherapy for spinal metastases. Radiosurgery Society Webinar.

2015 **Visiting Professor.** Stereotactic body radiotherapy for spinal metastases: A new paradigm for success and adverse effects. Neurosurgery Grand Rounds at Massachusetts General Hospital. Boston, Massachusetts, United States.

2015 **Invited Speaker.** Stereotactic radiosurgery for brain metastases. The Royal Australian and New Zealand College of Radiologists New South Wales Radiotherapy Club and Faculty Branch Meeting. Sydney, New South Wales, Australia.

2015 **Invited Speaker.** SABR contouring, planning and delivery. IAEA/RCA Project RAS 6065 “Strengthening the Application of Stereotactic Body Radiation Therapy to Improve Cancer Treatment” SABR Symposium, University of Sydney. Sydney, New South Wales, Australia.

2015 **Invited Speaker.** Spine stereotactic body radiotherapy for metastases: Focus on technical aspects of delivery. IAEA/RCA Project RAS 6065 “Strengthening the Application of Stereotactic Body Radiation Therapy to Improve Cancer Treatment” SABR Symposium, University of Sydney. Sydney, New South Wales, Australia.

2015 **Invited Speaker.** Spine stereotactic body radiotherapy for metastases: Contouring dosimetry/toxicity avoidance. IAEA/RCA Project RAS 6065 “Strengthening the Application of Stereotactic Body Radiation Therapy to Improve Cancer Treatment” SABR Symposium, University of Sydney. Sydney, New South Wales, Australia.

2015 **Invited Speaker.** Practical session spine SBRT IGRT. IAEA/RCA Project RAS 6065 “Strengthening the Application of Stereotactic Body Radiation Therapy to Improve Cancer Treatment” SABR Symposium, University of Sydney. Sydney, New South Wales, Australia.

2015 **Invited Speaker.** Stereotactic radiosurgery and stereotactic body radiotherapy: The future of radiation oncology. IAEA/RCA Project RAS 6065 “Strengthening the Application of Stereotactic Body Radiation Therapy to Improve Cancer Treatment” SABR Symposium, University of Sydney. Sydney, New South Wales, Australia.

2015 **Invited Speaker.** Photon therapy for chordoma. 4th Bologna-Budapest Spine Meeting on Tumors and Osteoporosis. Bologna, Italy.

2015 **Invited Speaker.** Discussant. CNS IV – Spinal SBRT; Melanoma of brain and ocular structures. American Society for Radiation Oncology. San Antonio, Texas, United States.

2015 **Invited Speaker.** Contouring dosimetry and toxicity avoidance. Memorial Sloan Kettering Cancer Center Multidisciplinary Spine Oncology Symposium. New York, New York, United States.

2015 **Invited Speaker.** Stereotactic radiosurgery & brain metastases - Is the sky the limit. 83rd American Association of Neurological Surgeons Annual Scientific Meeting. Washington D.C. District of Columbia, United States.

2015 **Invited Speaker.** Spine stereotactic radiosurgery/stereotactic body radiotherapy and renal cell metastases. Medtronic Tumour Virtual Grand Rounds.

2014 **Invited Speaker.** Spine stereotactic body radiotherapy: An emerging technique requiring multidisciplinary care. 7th Annual Advances in Neurosciences Symposium. Freemont, California, United States.

2014 **Invited Speaker.** Spine SBRT and strategies to mitigate the risk. 56th Annual American Society for Radiation Oncology Meeting. San Francisco, California, United States.

2014 **Invited Speaker.** Radiotherapy for spinal neoplasms. AOSpine Masters Symposium - Surgical Treatment

2014  Visiting Professor. SBRT for treating spine metastases: Where we are and where we are going. Johns Hopkins University. Baltimore. Maryland, United States.

2013  Invited Speaker. The role of the spinal instability neoplastic score in predicting stereotactic radiosurgery induced vertebral compression fracture. Association for Collaborative Spine Research. San Diego, California, United States.

2012  **Invited Speaker.** Late effects to the spinal cord and bone: A new paradigm in the era of spine SBRT. American Society of Therapeutic Radiation Oncology, Spine Innovative Approaches to the Management of Spinal Metastases Workshop. Boston, Massachusetts, United States.

2011  **Invited Speaker.** Introduction to technology of radiosurgery and stereotactic body radiotherapy: Evolution from brain to spine. Society of Neuro-oncology Education Day. Anaheim, California, United States.

2011  **Invited Speaker.** Introduction to spine stereotactic body radiotherapy: What is it? What are the outcomes? What are the issues, controversies? Society of Neuro-oncology Education Day. Anaheim, California, United States.

2011  **Invited Speaker.** Brain metastases and neurocognition. 2nd International Symposium on Long-Term Control of Secondary Central Nervous System Malignancies. Cleveland, Ohio, United States.

2011  **Invited Speaker.** Limitations to spine SBRT and how we overcome them at the University of Toronto. European Elekta Users’ Conference. Warmunde, Germany.

2011  **Invited Speaker.** Human spinal cord tolerance to radiosurgery. 10th International Stereotactic Radiosurgery Congress. Paris, France.

2010  **Invited Speaker.** Brain metastases and neurocognition. International Symposium on Long-Term Control of Secondary Central Nervous System Malignancies. Cleveland, Ohio, United States.

2010  **Visiting Professor.** Stereotactic body radiotherapy for spine metastases and spinal cord tolerance. Mayo Clinic, University of Rochester. Rochester, Minnesota, United States.

2009  **Visiting Professor.** Stereotactic body radiotherapy for spine metastases and spinal cord tolerance. M.D. Anderson Cancer Center, University of Texas. Austin, Texas, United States.

2009  **Invited Speaker.** Inter and intrafractional motion for spine stereotactic body radiotherapy and the dosimetric impact. 3rd Annual International Symposium on Stereotactic Body Radiation Therapy and
Stereotactic Radiosurgery. Orlando, Florida, United States.

2008  **Visiting Professor.** Overview of spine stereotactic body radiotherapy. Yale Medical School. New Haven, Connecticut, United States.

2008  **Visiting Professor.** Spine radiosurgery. Baylor University, Baylor Medical College. Houston, Texas, United States.

2008  **Invited Speaker.** Spinal cord tolerance following spine radiosurgery. American Society of Therapeutic Radiation Oncology, Spine Radiosurgery Workshop. Boston, Massachusetts, United States.

Invited Lectures and Presentations

2014  **Invited Speaker.** Stereotactic radiosurgery for brain metastases - No more whole brain radiation please. 8th Canadian Melanoma Conference. Banff, Alberta, Canada.

2014  **Visiting Professor.** Stereotactic Radiosurgery for Brain Metastases - No More Whole Brain Radiation Please. Cross Cancer Institute, University of Alberta. Edmonton, Alberta, Canada.

2013  **Invited Speaker.** Stereotactic body radiotherapy (SBRT) for spine metastases and vertebral compression fracture management within an interdisciplinary care team. Foothills Hospital Symposium. Calgary, Alberta, Canada.

2012  **Invited Speaker.** Non-surgical treatment of spinal metastases - When to consider spine radiosurgery. 7th Annual Canadian Contemporary Spinal Techniques Course. Toronto, Ontario, Canada.

2012  **Invited Speaker.** Why spine SBRT? Target Insight VI. Toronto, Ontario, Canada.

2012  **Invited Speaker.** Stereotactic body radiotherapy for high risk spinal metastases: SBRT vs CRT for complex spinal metastases. NCIC CTG SC.24 National Cancer Institute of Canada Clinical Trials Group Symptom Control Committee. Toronto, Ontario, Canada.

2011  **Visiting Professor.** Stereotactic body radiotherapy for spine metastases: Current status and future directions. Centre Hospitalier De L'University De Montreal, University of Montreal. Montreal, Quebec, Canada.

2011  **Invited Speaker.** Spine SBRT, cord tolerance. Canadian Association of Radiosurgery. Winnipeg, Manitoba, Canada.

2010  **Invited Speaker.** Spine metastases. 10th Princess Margaret Hospital Conference. Toronto, Ontario, Canada.

**Presented Abstracts**

**Presenters**

Age as a significant prognostic factor in ovarian cancer. Society of Obstetrics and Gynecology. Ottawa, Ontario, Canada. Presenter(s): Sahgal A, Fung Kee, Fung M.

2012

2012

Invited Speaker. Treatment planning in paraspinal SBRT-From targets to plan optimization. Princess Margaret Hospital Paraspinal IGRT Education Course, University of Toronto. Toronto, Ontario, Canada.
2012 **Invited Speaker.** Developing a paraspinal SBRT program: Prepare to launch. Princess Margaret Hospital Paraspinal IGRT Education Course, University of Toronto. Toronto, Ontario, Canada.

2012 **Invited Speaker.** Multimodality registration for treatment planning exercise. Princess Margaret Hospital Paraspinal IGRT Education Course, University of Toronto. Toronto, Ontario, Canada.

2012 **Invited Speaker.** Late effects of SBRT. Princess Margaret Hospital Paraspinal IGRT Education Course, University of Toronto. Toronto, Ontario, Canada.

2012 **Invited Speaker.** Paraspinal SBRT in action. Princess Margaret Hospital Paraspinal IGRT Education Course, University of Toronto. Toronto, Ontario, Canada.

2012 **Invited Speaker.** Paraspinal disease: Setting the stage. Princess Margaret Hospital Paraspinal IGRT Education Course, University of Toronto. Toronto, Ontario, Canada.

2012 **Invited Speaker.** Stereotactic radiosurgery for spinal tumours. 37th Annual William S. Keith Professorship in Neurosurgery, Division of Neurosurgery, Department of Surgery, University of Toronto. Toronto, Ontario, Canada.

2012 **Invited Speaker.** Advanced radiation technology in the roles of brain tumours and brain metastases. Department of Surgery, Division of Neurosurgery, Resident Academic Teaching Block on Tumours, University of Toronto. Toronto, Ontario, Canada.

2012 **Invited Speaker.** Introduction to CNS tumours and radiosurgery. Odette Cancer Centre, CNS Site Group, Sunnybrook Health Sciences Centre, University of Toronto, Grand Rounds, University of Toronto. Toronto, Ontario, Canada.

2011 **Invited Speaker.** Current management of brain metastases, the neurocognitive effect of WBRT and the future of brain SRS. Odette Cancer Centre, Sunnybrook Health Sciences Centre, University of Toronto, Grand Rounds. Toronto, Ontario, Canada.

2011 **Invited Speaker.** Radiation for brain tumors. Department of Radiology Neuroradiology Program Professor’s Rounds, University of Toronto. Toronto, Ontario, Canada.

2011 **Invited Speaker.** The emerging role of radical palliation. Princess Margaret Hospital Palliative Care Department, Pain and Symptom Management Rounds, University of Toronto. Toronto, Ontario, Canada.

2011 **Invited Speaker.** The management of brain metastases in 2011. Department of Radiation Oncology, Rapid Response Palliative Program Rounds, University of Toronto. Toronto, Ontario, Canada.

2010 **Invited Speaker.** Spinal cord tolerance for spine stereotactic body radiotherapy. Department of Radiation Medicine Rounds, University of Toronto. Toronto, Ontario, Canada.

2010 **Invited Speaker.** Radiation for brain tumors. Department of Radiology, Neuroradiology Program Professor’s Rounds, University of Toronto. Toronto, Ontario, Canada.

2010 **Invited Speaker.** The treatment of paraspinal disease. Image-guided radiotherapy education course, Princess Margaret Hospital, University of Toronto. Toronto, Ontario, Canada.

2010 **Invited Speaker.** The management of brain metastases. Odette Cancer Centre, Sunnybrook Health Sciences Centre, Melanoma Rounds. University of Toronto. Toronto, Ontario, Canada.

2010 **Invited Speaker.** The management of brain metastases in 2010. Department of Radiation Medicine Oncology Rounds, University of Toronto. Toronto, Ontario, Canada.
2010 **Invited Speaker.** The management of brain metastases in 2010. Sunnybrook Health Sciences Centre, Odette Cancer Centre, Oncology Grand Rounds, University of Toronto. Toronto, Ontario, Canada.

2010 **Invited Speaker.** Spine SBRT and minimal access spine surgery. PMH Innovation Rounds, University of Toronto. Toronto, Ontario, Canada.

2010 **Invited Speaker.** Spine stereotactic body radiotherapy: A high dose approach for radioresistant tumors. Odette Cancer Centre, Sunnybrook Health Sciences Centre, Melanoma Rounds, University of Toronto. Toronto, Ontario, Canada.

2010 **Invited Speaker.** The management of brain metastases in 2010. Sunnybrook Health Sciences Centre, Division of Neurology Grand Rounds, University of Toronto. Toronto, Ontario, Canada.

2009 **Invited Speaker.** Stereotactic body radiotherapy for spinal metastases and spinal cord tolerance to SBRT fractionation. Department of Radiation Medicine Grand Rounds, University of Toronto. Toronto, Ontario, Canada.

2009 **Invited Speaker.** Implementing a spine stereotactic body radiotherapy program at the University of Toronto. Department of Radiation Medicine Rounds, University of Toronto. Toronto, Ontario, Canada.

2009 **Invited Speaker.** Is radiation the best treatment for anaplastic oligodendroglioma or does it just melt brains? Division of Neurology, J.C. Richardson Neurology Subspecialty Day, University of Toronto. Toronto, Ontario, Canada.

2009 **Invited Speaker.** Stereotactic radiosurgery for brain metastases. Odette Cancer Centre, Breast Site Group Rounds, Sunnybrook Health Sciences Centre. Toronto, Ontario, Canada.

2009 **Invited Speaker.** Overview of what’s new in nonsurgical treatment of metastatic spinal disease - When to consider radiosurgery. 4th Annual Canadian Contemporary Spinal Techniques Course, University of Toronto. Toronto, Ontario, Canada.

2009 **Invited Speaker.** Technology and biology - Finally, a merging of the minds. University of Toronto Glioma Day: Advances and Therapeutic Challenges. Toronto, Ontario, Canada.

2008 **Invited Speaker.** Stereotactic body radiotherapy for spinal metastases. Division of Rheumatology and Orthopedics Grand Rounds. Toronto, Ontario, Canada.

2008 **Invited Speaker.** Radiosurgery of the spine and radiation tolerance of the spinal cord. E. Harry Botterell Lectureship in Neurosurgery, The Toronto Western Hospital. Toronto, Ontario, Canada.

(Internal Medicine included Psychiatry)

CLINICAL SERVICE

• New consults in average over 400 per year  
• During last 5 years have treated all sites when there was a need  
• Special interest in Genitourinary System, Gastrointestinal System, Breast, Lung, and in pain and symptom management  
• Experience in establishing two cancer centres.

RESEARCH AND PROJECTS

1989  Developed one of the first “Bed Utilization” projects in Ontario. My recommendations were accepted and implemented.

1990  Developed the “Bed Utilization Model”. This model was the foundation for the tool currently being used by the Ministry of Health to rationalize health services in Ontario. This model is currently known as the “Planning Decision Support Tool (PDST)”.

1993  Project on designing “Costing Models and Costing Cancer Treatments Modalities in Ontario”, Ontario Cancer Treatment and Research Foundation, Ontario, Canada.

1996  My work on “Costing Cancer Treatments in Ontario” was used by Cancer Care Ontario in a proposal to the Ontario Ministry of Health.
1997  The data from my work on “Costing of Cancer Treatments in Ontario” was accepted by the Ontario Ministry of Health.

1998  My work on “Costing Cancer Treatments in Ontario” was used in the Canadian Cervical Cancer Screening Project.

1998  Completed a project on “Evaluating the Current Radiotherapy Workload Measurement System (NHPIP)”.

1998  The effect of extended hours of operation on the lifespan and reliability of linear accelerators – developed a questionnaire and mailed to appropriate institutions and manufacturers throughout the world.

1999  Developed the Radiotherapy Treatment Guidelines for the province of Prince Edward Island.

1999  Submitted a report on Radiotherapy Services in Prince Edward Island.

EXPERIENCE IN ESTABLISHING TWO CANCER CENTRES:

1999  Involved in the development of a new cancer centre in Prince Edward Island which included the planning of the building, purchase of equipment and hiring of staff. It should be noted that I was the only Provincial Radiation Oncologist at that time.

2000  Involved in the development of a new cancer centre in Kitchener, Ontario. The degree of involvement was less than that in P.E.I.

BRIEFINGS:

1989 – 1991  Briefed the following officials on my “Bed Utilization Model”:
Hon. Elinor Caplan, Minister of Health
Dr. Martin Barkin, Deputy Minister of Health

PRESENTATIONS AND PUBLIC SPEECHES

2002  “Management of Prostate Cancer” presented to the urologists in the GRRCC catchment area.

2002  “Prostate Cancer”, Prostate Support Group in Guelph, Ontario

2003  “Role of Radiation Treatment in Pain and Symptom Management”, Palliative Care Conference, Holiday Inn, Guelph, Ontario
2006  “Role of Radiation Treatment in Pain and Symptom Management”, Credit Valley Hospital

2010  Breast Cancer, Oncology Rounds, Credit Valley Hospital

TEACHING

1997  “Human Anatomy”, Radiation Therapy students at Hamilton Regional Cancer Centre.

2001-2006  Adjunct Professor, University of Western Ontario, London, ON

2003  “Overview of Radiotherapy”, Oncology Nurses, Supportive Care Co-ordinators, Dietitians, Social Workers and Pastoral Care staff.

2006-to date  Involved in Teaching Medical Students and Residents whenever needed.

SPECIAL TRAINING

1999  CT-Simulator Training
       Joint Centre, Boston, Massachusetts, U.S.A.

2003  Pinnacle Planning System Training
       San Jose, California, U.S.A.

MEMBERSHIPS

Canadian Association of Radiation Oncologists

B. Biographical Information

1. EDUCATION

Degrees
2000 Aug - 2009 May MD/PhD, Case Western Reserve University, Cleveland, Ohio, United States
1996 Sep - 1997 Dec MSc, Immunology, University of California, Davis, Davis, California, United States
1992 Aug - 1996 May BSc, Biology, Tufts University, Medford, Massachusetts, United States

Postgraduate, Research and Specialty Training
2013 Jul - 2014 Jun Chief Resident, Radiation Oncology, Stanford University Hospitals, Stanford, California, United States
2010 Jul - 2014 Jun Resident, Radiation Oncology, Stanford University Hospitals, Stanford, California, United States
2009 Jul - 2010 Jun Intern, Internal Medicine-Preliminary, MetroHealth Medical Center, Cleveland, Ohio, United States

Qualifications, Certifications and Licenses
2010 - present California Medical License, United States
2010 - present Controlled Substance Certificate, Drug Enforcement Administration, United States
2015 May - 2016 May The College of Physicians and Surgeons of Ontario, License / Membership #: 107841
2015 May Clinical Exam (Oral), American Board of Radiology
2014 Jul Clinical Exam (Written), American Board of Radiology
2013 Jul Physics and Biology Exam, American Board of Radiology
2010 Apr USMLE Step 3, United States Medical Licensing Examination
2009 Feb USMLE Step 2 CK, United States Medical Licensing Examination
2008 Dec USMLE Step 2 CS, United States Medical Licensing Examination
2002 Jul USMLE Step 1, United States Medical Licensing Examination

2. EMPLOYMENT

Current Appointments
2015 Aug - present Assistant Professor, Radiation Oncology, University of Toronto, Toronto, Ontario, Canada
2015 Aug - present Staff Physician treating CNS malignancies and sarcoma
2015 Aug - present Clinical Investigator and Staff Radiation Oncologist, Radiation Oncology, Princess Margaret Cancer Centre, Toronto, Ontario, Canada
Previous Appointments

HOSPITAL
2014 Aug - 2015 Jul Instructor of Radiation Oncology, Stanford University Hospitals, Stanford, California, United States
Attending physician treating thoracic malignancies

3. HONOURS AND CAREER AWARDS

Distinctions and Research Awards

INTERNATIONAL

Received
2014 Merit Award, Conquer Cancer Foundation of ASCO. (Distinction)
2007 Graduate Student Award, AAAS/Science Program for Excellence in Science. (Distinction)

NATIONAL

Received
2000 Travel Award, ASH Meeting, San Francisco, California, United States. (Distinction)

LOCAL

Received
2006 1st Prize Poster: Lepow Medical Student Research Day, Case Western Reserve University. (Distinction)
2000 - 2009 Medical Scientist Training Program Fellowship, Case Western Reserve University. (Distinction)
1997 Immunology Graduate Group Fellowship Award, University of California, Davis. (Distinction)

4. PROFESSIONAL AFFILIATIONS AND ACTIVITIES

Professional Associations

2015 Sep - present Member, Medical Association
2011 - present Member, American Society for Radiation Oncology
2010 - present Member, Radiological Society of North America
2014 Member, The Radiosurgery Society

Peer Review Activities

MANUSCRIPT REVIEWS

Ad Hoc Reviewer
2014 - present International Journal of Radiation Oncology, Biology, Physics
2014 - present Journal of the National Comprehensive Center Network
2014 - present Journal of Thoracic Oncology
2014 - present Practical Radiation Oncology
Other Research and Professional Activities

THESIS PROJECT
- Described a role for NFkappaB components in the signaling mechanisms of IFN-gamma.
1996 Sep - 1997 Dec Master’s Thesis: “Colocalization of IgA and PBC specific antigen in PBC liver”. University of California, Davis, Davis, California, United States. Supervisor(s): M. Eric Gershwin, MD (Mentor).
- Demonstrated colocalization of a disease-associated antigen and IgA through analyses using light and confocal microscopy.

RESEARCH EXPERIENCE
2010 Jul - present Stanford University, Department of Radiation Oncology, Stanford, California, United States.
- Published as first author five research papers and three review articles
- Completed one laboratory-based research project
- Presented seven abstracts at national meetings.
2008 Jun - 2009 May The Cleveland Clinic Foundation, Department of Radiation Oncology, Cleveland, Ohio, United States.
- Investigated the efficacy of high-dose-rate brachytherapy in patients with soft tissue sarcoma.
- Used mouse models to study acute promyelocytic leukemia.
- Conducted phase III clinical trials on a peptide-based HIV vaccine.

INTERNATIONAL
University of Cambridge
2010 - present Member, Canadian Undergraduate Academic Selection Committee, United Kingdom.

University of Toronto
2015 - present Medical Advisor, Toronto Addis Ababa Academic Collaboration Oncology Initiative, Ethiopia.
C. Academic Profile

1. RESEARCH STATEMENTS

Statement of Scholarly and Professional Activity.
Staff Radiation Oncologist at the Odette Cancer Centre treating patients with Lymphoma and Lung Cancer. Dr. Spayne is the physician leader for a collaborative initiative to develop educational programs in medical radiation sciences at the University of Addis Ababa. This is part of the Toronto Addis Ababa Academic Collaboration which is designed to build sustainable medical education and human resource capacity in a low-income setting. Previously, Dr. Spayne was the lead Radiation Oncologist with the centre's innovative Locally Advanced Breast Cancer (LABC) program. She was the Principal Investigator of a clinical trial exploring concurrent neoadjuvant chemoradiation treatment for high risk patients.

1. EDUCATION

Degrees

08/1999 – 06/2003  
Medical Doctor, Faculty of Medicine, University of Toronto, Toronto, Ontario, Canada

08/1996 – 06/1999  
Master of Science, Department of Experimental Medicine, Faculty of Medicine, University of British Columbia, Vancouver, British Columbia, Canada. Supervisor: Dr. Vincent Duronio

08/1992 – 06/1995  
Bachelor of Science (Honours), Department of Microbiology and Immunology, Faculty of Science, McGill University, Montreal, Quebec, Canada. Supervisor: Dr. Mark Wainberg

Postgraduate, Research and Specialty Training

[Presented in reverse chronological order]

07/2008 – 12/2009  
Clinical Research Fellow, Department of Radiation Oncology, Faculty of Medicine, University of Toronto, Toronto, Ontario, Canada. [Supervisor(s): Dr. John Waldron and Dr. Jolie Ringash]

07/2003 – 06/2008  
Resident, Department of Radiation Oncology, Faculty of Medicine, University of Toronto, Toronto, Ontario, Canada.

Qualifications, Certifications and Licenses

01/2010 – present  
Physician, College of Physicians and Surgeons of Ontario (CPSO), Toronto, Ontario, Canada. License Number: 79473.

08/2008 – present  
Fellow, Division of Medicine, Royal College of Physicians and Surgeons of Canada (RCPSC), Ottawa, Ontario, Canada. Member Number: 710491

06/2005 – present  
Licentiate, Medical Council of Canada (LMCC), Ottawa, Ontario, Canada. Member Number: 98283
2. EMPLOYMENT

Current Appointments

02/2015 – present  Head, Radiation Treatment Program, Simcoe Muskoka Regional Cancer Program, Royal Victoria Regional Health Centre, Barrie, Ontario, Canada
01/2015 – present  Staff Physician, Orillia Soldier’s Memorial Hospital, Orillia, Ontario, Canada
10/2014 – present  Medical Director, Simcoe Muskoka Regional Cancer Program, Royal Victoria Regional Health Centre, Barrie, Ontario, Canada
01/2011 – present  Adjunct Lecturer, Department of Radiation Oncology, Faculty of Medicine, University of Toronto, Toronto, Ontario, Canada
06/2010 – present  Adjunct Lecturer, Department of Family and Community Medicine, Faculty of Medicine, University of Toronto, Toronto, Ontario, Canada
01/2010 – present  Staff Physician, Royal Victoria Regional Health Centre, Barrie, Ontario, Canada

4. PROFESSIONAL AFFILIATIONS AND ACTIVITIES

Professional Associations

2010 – present  Member, Ontario Association of Radiation Oncologist
2010 – 2016  Executive clinical director and co-founder, Community Radiation Oncologists of Southern Ontario (COMRADS)
2007 – present  Member, American Society of Clinical Oncology; Membership #82501
2005 – present  Member, American Society of Radiation Oncology; Membership #35197765
2003 – present  Member, Canadian Association of Radiation Oncology
1999 – present  Member, Ontario Medical Association; Membership #0813873
1999 – present  Member, Canadian Medical Association; Membership #1222724

Administrative Activities

NATIONAL

2014 – 2016  Member, Organizing Committee for 6th Annual Conference for Quality and Safety in Radiation Medicine

PROVINCIAL / REGIONAL

02/2015 – present  Head, Radiation Treatment Program, Simcoe Muskoka Regional Cancer Program, Royal Victoria Regional Health Centre, Barrie, Ontario, Canada
10/2014 – present  Medical Director, Simcoe Muskoka Regional Cancer Program, Royal Victoria Regional Health Centre, Barrie, Ontario, Canada
2015  Member, CCO Person-Centred Care Working Group, Cancer Care Ontario, Toronto, Ontario, Canada

C. Academic Profile

1. CREATIVE PROFESSIONAL ACTIVITIES STATEMENT

My Creative Professional Activities have resulted in 2 major themes and 1 minor theme. The 2 major themes fall under the category of professional innovation and creative excellence.

Theme 1:  Prophylactic Cranial Irradiation (PCI) in Lung Cancer
Theme 2:  Positron Emission Tomography (PET) Imaging in Lung Cancer
The minor theme falls under the category of contributions to the development of professional practices.

Theme 3: The Role of Radiotherapy in Skin Cancer.

D. Research Funding

1. GRANTS, CONTRACTS AND CLINICAL TRIALS

PEER-REVIEWED GRANTS

FUNDED

2015 - 2018

2013 - 2016

**Principal Investigator.** A Feasibility Study of Hypoxia Imaging in Patients with Lung Cancer using Positron Emission Tomography (PET) with 18F-Fluoroazomycin Arabinoside (18F-FAZA). Ontario Research Fund (ORF). Collaborator(s): Breen S, Yeung I, Vines D, Jaffray D. 420,000. [Grants]

**Ontario Consortium for Adaptive Interventions in Oncology and GE Healthcare Systems.**

2010 - 2015

**Co-Principal Investigator.** Randomized Phase II Study Comparing Prophylactic Cranial Irradiation Alone To Prophylactic Cranial Irradiation And Consolidative Extra-Cranial Irradiation For Extensive Disease Small Cell Lung Cancer (ED-SCLC). National Cancer Institute (USA). PI: Gore E, **Sun A.** Collaborator(s): Ramalingam S, Grimm D, Hu C. 385,000 USD. [Clinical Trials]

**RTOG 0937.**

2009 - 2013

2009 - 2012

**Principal Investigator.** A Randomized Phase III Comparison of Standard Dose (60 Gy) versus High Dose (74 Gy) Conformal Radiotherapy with concurrent and Consolidation Carboplatin/Paclitaxel +/- Cetuximab in patients with Stage IIIA/IIIB Non-Small Cell Lung Cancer. RTOG. PI: Bradley J. [Clinical Trials]

**RTOG 0617.**

2007 - 2009

Alexander Y. SUN

2003 - 2008  **National Representative, Principal Site Investigator.** A Phase II/III Randomized Trial of Two Doses (Phase III-Standard vs. High) and Two High Dose Schedules (Phase II-Once vs. Twice Daily) for Delivering Prophylactic Cranial Irradiation for Patients with Limited Disease Small Cell Lung Cancer. Radiation Therapy Oncology Group. PI: Wolfson A. Collaborator(s): Komaki R, Meyers C, Moversas B, Le Pechoux, Gaspar L, Bonner J, Bogart J. [Clinical Trials] **RTOG 0212.**

2003 - 2007  **Trial Committee, Principal Site Investigator.** The Impact of Positron Emission Tomography (PET) Imaging In Stage III Non-Small Cell Lung Cancer: A Prospective Randomized Clinical Trial. (PET-START). Ministry of Health of Ontario. PI: Ung Y. Collaborator(s): **Sun A**, Leigh N, Darling G, Yu E, Macrae R, Wright J, Levine M. 750,000. [Clinical Trials]

2000 - 2001  **Principal Site Investigator.** Phase III Trial to Evaluate the Duration of Neoadjuvant Total Androgen Suppression (TAS) and Radiation Therapy (RT) in Intermediate Risk Prostate Cancer. Radiation Therapy Oncology Group. [Clinical Trials] (Nova Scotia Cancer Centre) **RTOG-99-10.**

2000 - 2001  **Principal Site Investigator.** A Double-Blind, Randomized Clinical Trial Comparing Ondansetron and Dexamethasone versus Ondansetron and Placebo in the Prophylaxis Against Radiation Induced Emesis. National Cancer Institute of Canada (NCIC). [Clinical Trials] (Nova Scotia Cancer Centre) **NCIC-CTG, SC19.**

2000 - 2001  **National Trial Committee.** A Double-Blind, Randomized Clinical Trial Comparing Ondansetron and Dexamethasone versus Ondansetron and Placebo in the Prophylaxis Against Radiation Induced Emesis. National Cancer Institute of Canada (NCIC). PI: Wong R. [Clinical Trials] **National Trial Committee, CTG, SC19.**

1999 - 2001  **National Trial Committee.** A Phase III Study of Involved Field Radiation Therapy (IFRT) in Patients with Histologically Aggressive Non-Hodgkin’s Lymphoma Following High Dose
Chemotherapy and Autologous Hematopoietic Stem Cell Transplantation (ASCT). National Cancer Institute of Canada (NCIC). [Clinical Trials]
National Trial Committee, CTG, LY.8.

1998 - 2001
Principal Site Investigator. Randomized trial of palliative radiation therapy for osseous metastases: a study of palliation of symptoms and quality of life. Radiation Therapy Oncology Group. [Clinical Trials]
(Nova Scotia Cancer Centre), RTOG 97-14.

1998 - 2001
Principal Site Investigator. A phase II randomized trial comparing intermittent versus continuous androgen suppression for patients with prostate-specific-antigen progression in the clinical absence of distant metastases following radiotherapy for prostate cancer. National Cancer Institute of Canada (NCIC). [Clinical Trials]
(Nova Scotia Cancer Centre) PR.7 (NCIC-CTG).

1998 - 1999

1996 - 2001
Principal Site Investigator. A phase III study of radiotherapy or ABVD plus radiotherapy versus ABVD alone in the treatment of early stage Hodgkin’s Disease. National Cancer Institute of Canada (NCIC). [Clinical Trials]
(Nova Scotia Cancer Centre), HD.6 (NCIC-CTG).

1996 - 1998
Principal Site Investigator. A phase III study of an assessment of the efficacy of dexamethasone in the prophylaxis of radiation induced emesis. National Cancer Institute of Canada (NCIC). [Clinical Trials]
SC.12 (NCIC-CTG) (Nova Scotia Cancer Centre).

1995 - 2001
Principal Site Investigator. A phase III trial of the study of endocrine therapy used as a cyto-reductive and cyto-static agent prior to radiation therapy in good prognosis locally confined adenocarcinoma of the prostate. Radiation Therapy Oncology Group. [Clinical Trials]
RTOG 94-08 (Nova Scotia Cancer Centre).

1995 - 1998
Principal Site Investigator. A randomized trial of a shorter radiation fractionation schedule for the treatment of localized prostate cancer. National Cancer Institute of Canada (NCIC). [Clinical Trials]
PR.5 (NCIC-CTG) (Nova Scotia Cancer Centre).

1995 - 1997
Co-Investigator. A randomized trial comparing the efficacy and safety of Ondansetron plus single fraction radiation therapy with fractionated therapy in the palliation of skeletal metastases. Glaxo Wellcome Inc. Protocol No. 517-400. 30,000. [Grants]
(Nova Scotia Cancer Centre).
E. Publications

1. MOST SIGNIFICANT PUBLICATIONS

Treatment of locally advanced non–small cell lung cancer with chemoradiotherapy (CRT) is limited by development of toxicity in normal tissue, including radiation esophagitis (RE). Increasingly, fluorodeoxyglucose (FDG) positron emission tomography (PET) is being used for adaptive planning. We showed that changes in FDG-PET images during CRT may predict for the development of RE, which has implications for adaptive RT planning. This is the first of a series of publications resulting from our grant funded study on adaptive RT planning for lung cancer. The Journal of Thoracic Oncology is the official journal of the International Association of the Study of Lung Cancer (IASLC), the foremost international multi-disciplinary organization for lung cancer in the world, with an impact factor of 5.8.

This study built upon the initial experience of the manuscript published below by Dahele et.al., but took it a step further. We showed that fluorodeoxyglucose (FDG) positron emission tomography (PET) was a predictor of outcome for early stage non-small cell lung cancer (NSCLC) patients treated radically with stereotactic body radiotherapy (SBRT). These results have implications for future trials of adjuvant therapies post SBRT. This manuscript was published in the journal Radiotherapy and Oncology, the leading radiotherapy journal in Europe (impact factor 4.86), where the fellow I supervised was from. This article has been cited 29 times so far.

Response assessment after stereotactic radiotherapy (SBRT) for lung cancer typically makes use of computed tomography (CT)-based anatomic changes. However, maximum tumour shrinkage can take several months and treatment-induced lung changes can confound the evaluation. An accurate and timely response assessment has become even more important as SBRT is being proposed as a possible alternative to surgery in patients with medically operable, early stage disease. In this context, identifying or predicting treatment failure could still allow definitive ‘salvage’ therapy. Here we described a pilot experience with 18F-fluorodeoxyglucose positron emission tomography-CT (FDG PETCT) for response assessment 3 months after SBRT. With this initial information we are now continuing this imaging strategy with the aim of trying to identify PET metrics for response assessment and prognosis. This study lead to the manuscript published above (Clarke et.al.).

This is the largest randomized phase III study of PCI in locally advanced non-small cell lung cancer. It is also one of the very rare times that the primary and secondary endpoint analyses were published back to back in the same issue of The Journal of Clinical Oncology (JCO), one of the most prestigious journals for Oncology research in the world with an impact factor of 18.4. This manuscript has been instrumental in establishing the basis of the very topical area of neurocognitive function with cranial irradiation. The results can be summarized by an editorial from JCO, where Khan et al. wrote “To discriminate the relative contributions of disease and therapy on cognitive impairment, we can turn to....Sun et al....from RTOG 0214....There were several important findings reported in this study: memory decline after cranial radiotherapy is relatively frequent when measured with sensitive tools; both immediate and delayed recall are affected; QOL scores do not correlate with neurocognitive function and do not seem to be worse with PCI”. Currently there are many ongoing clinical trials worldwide in brain metastases and PCI, which are using neurocognitive endpoints as their primary endpoints and are using the same tools as used in our study. One example is the newly approved cooperative group study “Randomized Phase II/III trial of PCI +/- hippocampal avoidance for small cell lung cancer, NRG-CC003”, which I am the Lung Co-PI of. In addition, this article has been cited 128 times so far.

This study was one of the first studies to identify young age as a predictor of brain relapse in locally advanced non-small cell lung cancer patients treated radically with combined chemotherapy and radiotherapy. It was also an important part of the body of literature that supported the randomized phase III study of PCI in LA-NSCLC, RTOG 0214 (above). This manuscript was published in the journal Lung Cancer, which at that time, was the official journal of the International Association of the Study of Lung Cancer (IASLC), the foremost international multi-disciplinary organization for lung cancer in the world. The first author was my radiation oncology resident that I primarily supervised. This study has been cited 54 times so far.

Invited Lectures and Presentations

2015 May  **Invited Speaker.** The Use of Adjuvant Radiation Therapy for Curatively Resected Melanoma. Cancer
Alexander Y. SUN

Care Ontario; Program in Evidence-based Care. Melanoma Disease Site Group. Toronto, Ontario, Canada. Presenter(s): Sun A. (Continuing Education).

2009 Dec  **Invited Speaker.** The Role of IMRT in Skin Cancers. Cancer Care Ontario (CCO); Program in Evidence-Based Care (PEBC) - IMRT (Intensity Modulated Radiotherapy) Indications Expert Panel. Toronto, Ontario, Canada. Presenter(s): Sun A. (Continuing Education).

**Presented and Published Abstracts**

*Publication Details:*

*Publication Details:*
Lack of effect of B-endorphin on basal or glucagon-stimulated hepatic glucose production in vitro. Co-Principal Author.

4. LOCAL

**Invited Lectures and Presentations**

2013  Treatment Intent and Patient Selection. IGRT in Lung Cancer Education Course, Princess Margaret Hospital. Toronto, Ontario, Canada. Presenter(s): Sun A. (Continuing Education).

2012  Treatment Intent and Patient Selection. IGRT in Lung Cancer Education Course, Princess Margaret Hospital. Toronto, Ontario, Canada. Presenter(s): Sun A. (Continuing Education).

2011 Treatment Intent and Patient Selection. IGRT in Lung Cancer Education Course, Princess Margaret Hospital. Toronto, Ontario, Canada. Presenter(s): Sun A. (Continuing Education).

Other Lectures and Presentations

2012 May Presenter. RTOG Energy….Pre- NRG. Radiation Medicine Program Grand Rounds, Princess Margaret Cancer Centre. Toronto, Ontario, Canada. (Continuing Education).

2010 Oct Presenter. PMH (RMP/DMOH) and the RTOG (not TROG). Radiation Medicine Program Grand Rounds, Princess Margaret Cancer Centre. Toronto, Ontario, Canada. (Continuing Education).

2008 May Presenter. RTOG Clinical Trials. Radiation Medicine Program Grand Rounds, Princess Margaret Cancer Centre. Toronto, Ontario, Canada. (Continuing Education).

2006 Dec Presenter. RTOG Lung Studies. Lung Retreat, Radiation Medicine Program, Princess Margaret Cancer Centre. Toronto, Ontario, Canada. (Continuing Education).

2006 Oct Presenter. PMH and the RTOG. Radiation Medicine Program Grand Rounds, Princess Margaret Cancer Centre. Toronto, Ontario, Canada. (Continuing Education).

2005 Mar Presenter. Thoracic Oncology Tumour Conference_Clinical Trials Update. Princess Margaret Hospital. (Continuing Education).

2005 Feb Presenter. PCI in LA-NSCLC and LD-SCLC (how the brain is connected to the lung). Radiation Medicine Program Grand Rounds, Princess Margaret Cancer Centre. Toronto, Ontario, Canada. (Continuing Education).

G. Teaching and Design

1. INNOVATIONS AND DEVELOPMENT IN TEACHING AND EDUCATION

2015 Feb Contributing Faculty, Radiation Oncology Residents Longitudinal Physics Imaging Course - PET Imaging, Postgraduate MD, Faculty of Medicine, Dept of Radiation Oncology

2015 Chair, Organizing Committee, Lung SBRT Workflow Overview, Moncton Lung SBRT Coaching Session, Princess Margaret Cancer Centre, Continuing Education, Faculty of Medicine, Dept of Radiation Oncology

2014 Feb Contributing Faculty, Radiation Oncology Residents Longitudinal Physics Imaging Course - PET Imaging, Postgraduate MD, Faculty of Medicine, Dept of Radiation Oncology

2013 Apr Contributing Faculty, Radiation Oncology Residents Longitudinal Physics Imaging Course - PET Imaging, Postgraduate MD, Faculty of Medicine, Dept of Radiation Oncology

2013 Chair, Organizing Committee, Image-Guided Radiotherapy (IGRT) Education Course, Princess Margaret Cancer Centre, Continuing Education, Faculty of Medicine, Dept of Radiation Oncology

2012 Contributing Faculty, Image-Guided Radiotherapy (IGRT) Education Course, Princess Margaret Cancer Centre, Continuing Education, Faculty of Medicine, Dept of Radiation Oncology
H. Research Supervision

1. PRIMARY OR CO-SUPERVISION

Undergraduate MD

Postgraduate MD

2013 Jul - 2014 Jun  Primary Supervisor. Clinical Fellow. Qurrat Mehmood, United Kingdom. *Predicting Esophagitis During Radical Lung Radiotherapy Using 18-FDG-PET.*

2009 Jul - 2010 Jun  Primary Supervisor. Clinical Fellow. Katy Clarke, United Kingdom. *FDG-PET SUV uptake as a predictor of outcome in stereotactic body radiotherapy (SBRT) for non-small cell lung cancer (NSCLC).*

2002 Jul - 2005 Jun  Primary Supervisor. Core Program. Hannah Carolan. Does the incidence and outcome of brain metastases in locally advanced non-small cell lung cancer justify prophylactic cranial irradiation or early detection?

Other

I. Creative Professional Activities

1. PROFESSIONAL INNOVATION AND CREATIVE EXCELLENCE

Positron Emission Tomography (PET) imaging in Lung Cancer. My goal is to improve outcomes in lung cancer patients through the integration and establishment of Positron Emission Tomography (PET) imaging in the management of lung cancer.

Firstly, to establish a unique and innovative program with the use of PET imaging as a means of developing an adaptive or personalized approach to radical radiotherapy for the treatment of locally advanced non-small cell lung cancer (LA-NSCLC). The concept of "adaptive radiotherapy" refers to adapting or altering a course of radiotherapy depending on changes observed prior to, during or after a course of radiotherapy. The need for such an approach stems from the results of a large prospective randomized trial, RTOG 0617, comparing a higher dose of radiotherapy to the standard dose in LA-NSCLC. There is strong evidence for a dose response relationship in lung cancer, meaning higher doses are more effective. However, RTOG 0617 was a negative trial. Not only was there no benefit to higher doses, but there may have even been a detriment effect. Thus the standard dose remains the same, and survival of lung cancer patients has not significantly improved for many years. The interpretation of this study is that a "class" solution to higher doses is not the answer, but a more innovative approach is required ie. an approach that is adaptive to the individual patient rather than to the entire "class" of patients. One innovative strategy is with the use of PET.

Secondly, to establish the role of PET imaging as a predictor of response to Stereotactic Body Radiotherapy (SBRT) for early stage lung cancer. Response assessment after SBRT for lung cancer typically makes use of computed tomography (CT)-based anatomic changes. However, maximum tumour shrinkage can take several months and treatment-induced lung changes can confound the evaluation. An accurate and timely response assessment has become even more important as SBRT is being proposed as a possible alternative to surgery in patients with medically operable, early stage disease. In this context, identifying or predicting treatment failure could still allow definitive ‘salvage’ therapy or additional adjuvant therapies. This can be potentially achieved through the use of PET. It was originally thought that PET imaging could not be interpreted during a course of radiotherapy. However, we along with others have found that this is not the case, through a funded pilot study that I led as Principal Investigator. As a result of this initial pilot experience, our group (I am the Clinical PI and Dr. Bissonnette is the Physics PI) was successful in obtaining a peer reviewed grant from the Canadian Cancer Society, to further characterize “adaptive radiotherapy”. So far, 2 manuscripts have been submitted for publication (I am the corresponding author for both). One of which has just recently been accepted for publication in the Journal of Thoracic Oncology, which is the current official journal of the International Association for the Study of Lung Cancer, the leading international multidisciplinary lung cancer organization in the world. This journal has an impact factor of 5.8. We showed that changes in PET images during radiotherapy may predict for the development of radiation
esophagitis, one of the dose limiting toxicities, which has implications for adaptive radiotherapy planning.

Building upon our experience, we have drafted a proposal for a prospective randomized study utilizing PET as a method of adaptive dose escalation. Our resident, Srinivas Raman, recently attended a prestigious Workshop on Methods in Clinical Cancer Research, in Flims (Switzerland) based on this proposal. He was 1 of 10 accepted out of 133 applicants. He also won another award based on the same project. More importantly, we have just secured funding for this trial. This is the only study of its kind being performed in multi-institutions across Canada and is on the leading edge of the future of radical radiotherapy in lung cancer management. We are one of only a few groups worldwide performing this kind of research and hope to change the standard of care of radical radiotherapy in lung cancer.

I have published on the role of PET imaging in SBRT for early stage lung cancer. In one study we described a pilot experience with fluorodeoxyglucose positron emission tomography (FDG-PET) for response assessment 3 months after SBRT. With this initial information we continued this imaging strategy with the aim of trying to identify PET metrics for response assessment and prognosis. Another study built upon the initial experience of the manuscript published above, but took it a step further. We showed that FDG-PET was a predictor of outcome for early stage non-small cell lung cancer patients treated radically with SBRT. These results have implications for future trials of adjuvant therapies post SBRT.

I have published on the role of PET imaging in SBRT for early stage lung cancer. In one study we described a pilot experience with fluorodeoxyglucose positron emission tomography (FDG-PET) for response assessment 3 months after SBRT. With this initial information we continued this imaging strategy with the aim of trying to identify PET metrics for response assessment and prognosis. Another study built upon the initial experience of the manuscript published above, but took it a step further. We showed that FDG-PET was a predictor of outcome for early stage non-small cell lung cancer patients treated radically with SBRT. These results have implications for future trials of adjuvant therapies post SBRT.

Princess Margaret is the premier centre for SBRT in lung cancer in Canada and one of the leading centres worldwide. I am currently the lung cancer site group leader and am also the leader of the PET program within the Princess Margaret lung cancer and SBRT program.

In addition, I am the PI of a grant funded study using PET with 18F-Fluoroazomycin Arabinoside (18F-FAZA)*. All of the previously mentioned PET studies have been done with FDG. FAZA is a hypoxic marker that can be used in conjunction with FDG-PET and we are one of a few groups worldwide investigating this relatively untested but potentially promising PET agent in lung cancer.

As a result of my leadership of our innovative and creative PET adaptive radiotherapy program for lung cancer, I have been able to attract a number of trainees from locally, provincially, nationally and internationally to help develop and move the program forward.

My recognition in this area of research in Canada is exemplified by my invited presentations at various venues nationally including one at Canadian Association of Radiation Oncology, our national organization and national annual meeting for our specialty.

Prophylactic Cranial Irradiation (PCI) in Lung Cancer.
My goal is to define the role of prophylactic cranial irradiation (PCI) in lung cancer. PCI is the most effective means of preventing metastases to the brain, but had unrecognized toxicities. Currently PCI is considered standard of care in limited disease small cell lung cancer (LD-SCLC) as it has shown a survival benefit. There was a large international randomized trial comparing a higher dose to the standard dose of PCI in an attempt to improve this survival benefit. I was the Canadian Representative of this study as I was invited to present this study at the National Cancer Institute of Canada Clinical Trials Meeting (NCIC-CTG) annually from 2003 to 2007. The study resulted in no change to the standard dose of PCI.

At that time, it was recognized that brain metastases rates in locally advanced non-small cell cancer (LA-NSCLC) were approaching that of LD-SCLC due to patients living longer from more effective treatment. In 2002, I became the Canadian Principal Investigator (PI) for the largest randomized phase III trial of PCI in LA-NSCLC, led by the Radiation Therapy Oncology Group (RTOG), 0214. RTOG (now NRG) is the foremost clinical trials group dedicated to Radiotherapy trials based in the United States, but with international participation.
RTOG 0214 resulted in 2 publications in the Journal of Clinical Oncology (JCO), one of the most prestigious journals for Oncology research with an impact factor of 18.4. It is also one of the rare times that the primary and secondary endpoint analyses were published back to back in the same issue of JCO. I was the lead author in the secondary analysis and played a major role in the primary analysis. They have been cited 150 and 128 times, respectively. Furthermore, my secondary analysis has been instrumental in identifying and characterizing the toxicities of PCI and has helped form the basis of the very topical research field of neurocognitive function with cranial irradiation. Currently there are many ongoing clinical trials worldwide in brain metastases and PCI, which have neurocognitive endpoints as their primary endpoint. This is a departure from the traditional primary survival endpoints. The neurocognitive tools used in these studies are also based on our study. In an editorial from JCO, Khan et al. wrote “To discriminate the relative contributions of disease and therapy on cognitive impairment, we can turn to…Sun et al….from RTOG 0214….There were several important findings reported in this study: memory decline after cranial radiotherapy is relatively frequent when measured with sensitive tools; both immediate and delayed recall are affected; QOL scores do not correlate with neurocognitive function and do not seem to be worse with PCI.”

I presented the primary and secondary analyses at the World Lung Conference (IASLC-International Association for the Study of Lung Cancer) in 2009, the most prestigious and well attended multi-disciplinary International Conference in Lung Cancer. My abstract was 1 of the top 12 abstracts selected for media presentation at this meeting. The secondary analysis was also selected for presentation in the Plenary Session (top 4 abstracts) at ASTRO (American Society for Radiation Oncology – the largest and most prestigious International meeting focusing on Radiation Oncology) and at the RTOG meeting Plenary Session (top 4 RTOG abstracts) in 2010. Currently, I am the Principal Author, of the 5 year long term updated results of RTOG 0214, submitted for publication to the JCO.

I also conducted a sub-study of RTOG 0214 addressing accrual issues, which resulted in an invited presentation at the RTOG meeting in 2005. I was also invited to present this study at the NCIC-CTG from 2002-2007. As a result of my national leadership, Canadian centres represented 8 of the top 15 accruing centres around the world, representing more than 20% of the overall accrual. This success resulted in an invitation in 2007, as a speaker at the RTOG Main Scientific Session.

More recently, PCI is becoming the standard of care in extensive disease small cell lung cancer (ED-SCLC) based on the results of a European study published in the New England Journal of Medicine. During the European study, a similar North American study was being led by the RTOG (0937) for which I am a Co-PI. RTOG 0937 closed this year and preliminary results were presented as a late breaking abstract at ASTRO. The final results of this study are highly anticipated as it may alter the newly adopted standard of practice.

Currently, I am the Lung Co-PI of a newly approved North American study led by NRG (previously RTOG), which is addressing neurocognitive function and memory change, the main toxicity of PCI. Much of this study was based on the results of my JCO publication addressing this issue in RTOG 0214. A similar study is also being conducted separately in Europe.

My success in RTOG studies has led to a number of significant leadership positions at RTOG/NRG. I was appointed to the Publications Committee in 2011 in part because of the 2 landmark publications back to back in the same issue of JCO, which was viewed extremely favourably by RTOG. I was only 1 of 2 Canadians serving on that committee. I was also 1 of only 4 members of the Nominations Committee. I served as Co-Chair of the Clinical Trials, Evaluation and Recruitment (CTER) Committee. This committee was an innovative initiative designed to investigate and implement new strategies to increase accrual to RTOG studies. As a result of the CTER initiatives, various strategies have been implemented at RTOG Headquarters to facilitate successful accrual to newly proposed studies. As a result of my
work, I was an invited speaker at the RTOG Theme Symposium on Recruitment to Clinical Trials held in 2007. In addition, I was an invited presenter as Co-Chair of the CTER committee on behalf of RTOG at the National Institutes of Health Core Grant Renewal Site Visit in Bethesda, MD, in 2008, which was successful in renewing their grant.

At the RTOG Symposium in 2004, I was the only Canadian Invited Panel Discussant, along with some of the most prominent Radiation Oncology lung cancer experts in the US. I was an invited speaker at the Canadian Lung Cancer Conference in 2012, where my topic was RTOG Lung Cancer Clinical Trials. In addition, I was the invited speaker as the expert on the topic of “Neurotoxicity of Cranial Irradiation” at the World Lung Cancer Conference (IASLC) in Australia in 2013.

My recognition in this field was also exemplified by being the Invited International Reviewer for a project grant application of a European study similar to RTOG 0214, but smaller in scope, the results of which are pending. I have already been contacted by my European colleagues leading this trial regarding the possibility of combining our data for a meta-analysis.

I am also one of the recognized leaders on the Lung Cancer Steering Committee exemplified by my leadership as PI or co-PI on a number of RTOG/NRG lung cancer studies as discussed above.

In summary, I am recognized as the leader in the field of PCI for lung cancer in Canada and also as a leader in this field in North America and Internationally.

2. CONTRIBUTIONS TO THE DEVELOPMENT OF PROFESSIONAL PRACTICES

The Role of Radiotherapy in Skin Cancer.
My goal is to improve the care of skin cancers (melanoma and non-melanoma) treated with radiation therapy. I joined the Skin Cancer Site group as a member in 2009 and have been the Site Group Leader in Radiation Oncology at Princess Margaret since 2010. I was the only Radiation Oncology Representative on the Melanoma Disease Site Group, Program in Evidenced Based Care, at Cancer Care Ontario until recently. I have published and led guidelines on radiation therapy of skin cancers. I am a contributing author to book chapters related to the management of skin cancers.

I was invited to lead a guideline examining the expanding role of IMRT (Intensity Modulated Radiation Therapy) use in treating skin cancers. I was also the Principal author on a recently completed guideline entitled “The Use of Adjuvant Radiation Therapy for Curatively Resected Melanoma”. This manuscript is currently in press. Both of these guidelines were performed through the Program in Evidenced Based Care at Cancer Care Ontario. This program provides evidence based care information for health care providers and the public. This is an internationally recognized guideline development program. The aim is to provide clinicians and policy makers the best scientific evidence to support standard practice and policy decisions. These guidelines are used to define standard practice across Ontario and are often used across the country and internationally.

My recognition in this area is exemplified by being invited to be the representative Radiation Oncology author to book chapters in the Surgical Oncology Manual, developed by the University of Toronto’s Department of Surgery, the leading Surgical Oncology Department in Canada. I contributed to 2 separate chapters, one on Non-melanoma skin cancer and the other on Merkel Cell Carcinoma. The second edition of this manual is currently in press. This manual is used by surgical oncology programs across the country.

I was also recently invited as a contributing author for a chapter entitled “Cancers of the Skin, Including Mycosis Fungoides.” in: Faiz M. Khan, et.al., editor(s), Treatment Planning in Radiation Oncology, 4th Edition. (United States); 2015, currently in press. This is the most widely used Radiation Treatment Planning textbook amongst trainees, and reference
textbook for practicing Radiation Oncologists in non-academic centres, throughout the US, Canada and internationally.

My recognition in this area is also exemplified by my recent invitation to join the newly founded Clinical Trials Strategy Group for Melanoma, for the Canadian Cancer Clinical Trials Network (3CTN). This is the first group that 3CTN has formed, with other cancer subtype groups to follow. 3CTN is the recent creation of a pan-Canadian program to strengthen academic-sponsored cancer clinical trials capacity to improve patient outcomes. I am one of only 2 Radiation Oncologists on this multidisciplinary committee, where our goal is to shape the research landscape in melanoma across Canada.

1. EDUCATION

Degrees
2003 - 2005 MEd, Department of Theory and Policy Studies in Education, OISE/UT, University of Toronto, Toronto, Ontario, Canada, Supervisor(s): Dr Pamela Catton, Dr Glen Jones
1976 - 1982 MD, Medical University of Lodz, Lodz, Poland

Postgraduate, Research and Specialty Training
1993 - 1997 Resident, Radiation Oncology, University of Ottawa, Ottawa, Ontario, Canada
1988 - 1990 Resident, Diagnostic Radiology, Medical, University of Lodz, Lodz, Poland
1983 - 1987 Resident, Radiation Oncology, Medical, University of Lodz, Lodz, Poland
1976 - 1982 Intern, Internal Medical, University of Lodz, Lodz, Poland

Qualifications, Certifications and Licenses
2006 Teacher Trainer Certificate, Stepping Stones Program, University of Toronto, Toronto, Ontario, Canada
2006 Interprofessional Education Faculty Development: Advancing the Future of Health Care Through Learning Certification, University of Toronto, Toronto, Ontario, Canada
1998 Licentiate, Medical Council of Canada, Canada
1997 General Medical License, College of Physicians and Surgeons of Ontario
1997 Specialist License, Radiation Oncology, University of Alberta, Edmonton, Alberta, Canada
1997 Specialist Certificate, Royal College of Physicians and Surgeons of Canada, Toronto, Ontario, Canada
1994 Federation Licensing Examination (FLEX) Certificate, Federation of State Medical Boards, United States
2. EMPLOYMENT

Current Appointments

2013 - present  Associate Professor, Radiation Oncology, University of Toronto, Toronto, Ontario, Canada
2011 - present  Associate Courtesy, The Scarborough Hospital, Toronto, Ontario, Canada
2009 - present  Associate Courtesy, Toronto East General Hospital, Toronto, Ontario, Canada
2006 - present  Regional Affiliate, The Royal Victoria Hospital of Barrie, Barrie, Ontario, Canada
1998 - present  Staff Radiation Oncologist, Odette Cancer Centre, Department of Radiation Oncology, Sunnybrook Health Sciences Centre, Toronto, Ontario, Canada

Previous Appointments

CONSULTING

1997  Consultant, Radiation Oncology, Tom Baker Cancer Centre, Calgary, Alberta, Canada

UNIVERSITY - RANK

2001 - 2013  Assistant Professor, Radiation Oncology, University of Toronto, Toronto, Ontario, Canada

3. HONOURS AND CAREER AWARDS

Distinctions and Research Awards

NATIONAL

Received

2006  Abbott Travel Award, Canadian Association of Radiation Oncologists. (Distinction)
2005  Physician Manager Institute Certificate of Achievement, Canadian Medical Association. (Distinction)

PROVINCIAL / REGIONAL

Received

2015 Mar  Sunnybrook Education Advisory Council (SEAC) Educational Research Award, Sunnybrook Health Sciences Centre, Toronto, Ontario, Canada. (Research Award)
The Educational Research Award recognizes sustained effort and excellence in research related to education. Research may be theoretical or applied, and utilize any range or combination of research approaches.

Examples of nominee contributions to educational research include, but are not limited to:

- Publications, posters, and presentations related to educational research at the local, regional, national, or international level
- Leadership roles in support of educational research
- Foster.

1999  Short Programs in Oncology Award, Cancer Care Ontario. (Distinction)
LOCAL
Received

2015 May  ACURA Uro-Oncologic Radiation Research Award, CARO - Canadian Association of Radiation Oncology. (Research Award)
2005 - 2006  Academic Performance Award, Department of Radiation Oncology, Toronto-Sunnybrook Regional Cancer Centre. (Distinction)
2003  Fifteen Year Service Award, Toronto-Sunnybrook Regional Cancer Centre. (Distinction)
2003  Five Year Service Award, Toronto-Sunnybrook Regional Cancer Centre. (Distinction)
2003  Ten Year Service Award, Toronto-Sunnybrook Regional Cancer Centre. (Distinction)

Teaching and Education Awards

LOCAL
Received

2016  Ivy Oandasan Leadership Award for Outstanding Contributions in Advancing Interprofessional Education, University of Toronto, Sunnybrook Health Sciences Centre - Odette Cancer Centre

C. Academic Profile

1. RESEARCH STATEMENTS

Needs assessments of patients, healthcare providers and trainees in radiotherapy practice.

Enhancing patients and healthcare providers’ decisional preferences for radiotherapy treatment.

Developing an interprofessional learning environment and creating modalities for continuing professional education in radiation therapy.

2. CREATIVE PROFESSIONAL ACTIVITIES STATEMENT

My Creative Professional Activity (CPA) is focused on two themes. This CPA dossier outlines my contributions to innovative/creative excellence and the development of professional practices in these two themes.

• Theme 1: Understanding the needs and preferences of cancer patients in radiation oncology practice
• Theme 2: Working together as an inter-professional team in radiation oncology practice to improve the care of cancer patients

Theme 1: The first theme focuses on investigating cancer patients’ needs in radiation oncology practice to give health care providers a better understanding of patients’ needs and incorporating these needs into patient care. I have contributed to professional innovations and creative excellence within this first theme through the following activities: 1) understanding patient preferences in the treatment of bone metastases with palliative radiotherapy (RT), 2) understanding needs of older patients with early breast cancer while undergoing adjuvant RT, 3) development of a patient decision aid for adjuvant RT for older women with early breast cancer, and 4) understanding the needs of prostate cancer patients treated with radical prostatectomy who require adjuvant and salvage RT. The contributions to the development of professional practice in these four areas are outlined in my peer reviewed papers published since my last academic promotion. These scholarly works included information about cancer patients’ needs to voice their opinions and to inform and guide clinicians on how to address these needs and incorporate them into cancer care.

Theme 2: The second theme of my CPA focuses on creating an inter-professional team in radiation oncology practice for better care of cancer patients. This is achieved by fostering an inter-professional practice in radiation oncology through continuing medical education (CME), scholarly work and research. Here, I have provided significant contributions in the following areas: 1) understanding the needs of healthcare providers in cancer care and enhancing RT services and treatment in underserviced areas, 2) developing and assessing the effectiveness of an educational intervention on the congruence of prostate and rectal contouring as compared to a gold standard in planning for three-dimensional RT (3D-CRT) for prostate cancer, 3) developing an inter-professional learning environment and creating modalities for continuing professional education in radiation therapy by organizing inter-professional CME events such as Radiation Oncology Palliative Care Rounds, Inter-professional Radiation Oncology Rounds (IROR), and the HOT SPOT newsletter CME section, and 4) investigating inter-professional needs of cancer care providers and trainees. Under theme 2, the development of professional practice has focused on providing interdisciplinary leadership for cancer care providers and trainees through education and mentorship. Evidence for my contributions in this theme is documented in my publications, international and national presentations and my participation in a number of workshops.

There is growing recognition throughout the medical and scientific research community that an interdisciplinary approach to cancer care should incorporate patient communication to maximize the benefits of current medical discoveries in diagnosis and treatment—particularly in the emerging era of personalized medicine. Cancer treatment often involves multiple options and choices; it can be toxic, costly, intense and protracted and may be associated with serious long-term
complications. In addition, responses to cancer treatments are quite variable, so predicting the potential risks and benefits of various treatment options for individual patients is often difficult. Furthermore, because of the complexity of treatment choices, compiled with the life threatening nature of cancer and its emotional repercussions, it is often difficult for cancer patients to make decisions about their care. The fragmented nature of the cancer care system also presents challenges that may impede coordinated care and the development of a comprehensive treatment plan. Evidence indicates that clinicians cannot predict cancer patients’ needs and patients’ roles in the treatment decision process. These areas require further investigations. My research and CPA have been focused on attempting to better understand cancer patients’ needs when they experience RT and how these needs can be incorporated into the patient care paradigm. I have disseminated this new knowledge through several avenues including publications and presentations at national and international meetings, active participation on editorial boards, grant and review committees, guideline working groups, and workshops. This work has also contributed to the training of health care professionals to practise within this new paradigm.

D. Research Funding

1. GRANTS, CONTRACTS AND CLINICAL TRIALS

PEER-REVIEWED GRANTS

Funded

2015 Apr - 2016 Mar

Co-Principal Investigator. The Senior Toronto Oncology Panel. Funding CIHR 15,000, St. Michael’s hospital $6,000, University Health Network $3,000, Odette Cancer Centre $3,000, Mount Sinai Hospital $1,000, Leukemia and Lymphoma Society Canada $2,500, Prostate Cancer Canada $1,000, Toronto East General Hospital $1,000. Patient Engagement Collaboration. PI: Martine Puts. Collaborator(s): Ms. J. Manthorne (Canadian Cancer Survivor Network), Mr. B. Stein (Colorectal Cancer Association Canada), Dr. C. Simone (Toronto East General Hospital), Dr. Y. Rahim (Stronach Cancer Centre), Dr. J. Richards (University Health Network), Dr. S. Sinha (Mount Sinai Hospital), Dr. C. Law (Odette Cancer Centre), ELLICS, Mr. A. Quinn (Carp Canada), M. Winkler (BrainTumour Canada), Mr. Stuart Edmonds (Prostate Canc. 30,500 CAD

To understand how we can involve patients in research.

2015 Mar - 2016 Mar

Principal Investigator. Assessing the impact of an instructional video on patients’ compliance with bowel and bladder preparation instructions for CT scan planning for intensity modulated radiotherapy (IMRT) for prostate cancer. Sunnybrook Health Sciences Centre SEAC. SEAC ERC Education and Research and Scholarship Grant. Collaborator(s): Dawdy K, Russell S, Cao X, Ryzymski A, Harth T, Townsend C. 8,600 CAD

2014 Jul - 2015 Jun

Principal Investigator. Empowering patients through education – development and evaluation of a multimedia patient education tool to ensure patient preparedness for planning CT scan for prostate cancer (randomized study). ACURO/ CARO. 15,000 CAD

2014 - 2016

Co-Principal Investigator. High Fidelity Simulation-based Training in Radiation Therapy: Attitudes and Behaviours towards Safety in Radiation Therapy. UT-DRO. 50,000 CAD

2009

Co-Investigator. Exploring meanings of caring among health care professionals providing cancer care. Sunnybrook and Women’s College Health Sciences Centre. Practice-Based Research Award Grant. PI: Osmar K. Collaborator(s): DasGupta T, Daley A, Szumacher E, Fitch M. 15,500 CAD
2008 Jul - 2010 Jun **Principal Investigator.** The development of the decision-aid investing patients’ preferences for adjuvant radiotherapy and antiestrogen therapy versus antiestrogen therapy alone in patients 70 years or older with stage I, EP/PR positive, invasive breast cancer. Canadian Breast Cancer Foundation (CBCF). Collaborator(s): Paszat L, Angus J, Metcalfe K, Whelan T, Llewellyn-Thomas H. 121,076 CAD

2006 **Principal Investigator.** The effectiveness of an educational intervention on the congruence of prostate and rectal contouring as compared to a gold standard in planning for three-dimensional radiotherapy for prostate cancer (3D-CRT). Canadian Association of Radiation Oncologists (CARO). Abbott-CARO Uro-Oncologic Radiation Award (ACURA). 10,000 CAD

2005 **Principal Investigator.** Educational Scholarship in Radiation Oncology. Mr. Clive Siedel. 20,000 CAD

2000 **Collaborator.** A prospective assessment of symptom palliation for patients attending rapid response radiotherapy program and bone metastases clinic. Geoffrey H. Wood Foundation. PI: Chow E. Collaborator(s): Danjoux C, Wong R, **Szumacher E**. 10,000 CAD

1997 **Collaborator.** A phase III double blind randomized study to compare the effectiveness of radiotherapy and pamidronate versus radiotherapy and placebo in the relief of pain due to bone metastases. Toronto-Sunnybrook Regional Cancer Centre. Radiation Program Fund. PI: Wong R. Collaborator(s): Hoegler D, Danjoux C, Chow E, **Szumacher E**, Franssen E. 61,000 CAD

1997 **Co-Investigator.** A prospective assessment of symptom palliation for patients attending a rapid response radiotherapy program. Toronto-Sunnybrook Regional Cancer Centre. Radiation Program Fund. PI: Chow E. Collaborator(s): Danjoux C, Wong R, **Szumacher E**. 8,000 CAD

1997 **Collaborator.** Survey of patterns of practice among Canadian radiation oncologists on the management of bony metastases in cancer patients. Toronto-Sunnybrook Regional Cancer Centre. Radiation Program Fund. PI: Chow E. Collaborator(s): Danjoux C, Wong R, **Szumacher E**. 1,250 CAD

1. MOST SIGNIFICANT PUBLICATIONS

The study aims to investigate the information needs and unique illness experiences of older women with early stage breast cancer. Breast cancer patients have expressed a high need for information to help them cope with their disease and treatment decision making. Satisfying information needs can also improve patient outcomes including perceptions of control, levels of distress, and psychological well-being. Focus groups and one patient interview were conducted investigating the informational needs of patients 70 years or older who were diagnosed with stage I breast cancer. Women identified their experiences and information needs related to diagnosis, participation in treatment decision making, treatment onset, and unexpected life changes. They provided several suggestions to healthcare professionals related to breast cancer treatment. The study’s findings increase our understanding of older breast cancer patients’ needs and provide a foundation for the development of a decision aid to help patients better understand their treatment options.

The purpose of this study was to examine the effect of a teaching intervention, “Prostate and Rectum Contouring Workshop”, on the accuracy of delineation of the prostate and rectum for three-dimensional conformal radiotherapy (3D-CRT) for prostate cancer. Participants were randomly assigned to one of two workshop sessions. Subjects included radiation oncology trainees, therapists and therapy students. Training sessions were found to improve technical performance similarly and non-significantly for both groups. The delayed survey reflected that participants in the experimental group alone felt more confident with prostate and rectum contouring after the training session, and a majority of subjects in both groups would investigate further opportunities to learn more about organ contouring. The enthusiastic response to this program and opportunities for further educational interventions indicated both the lack of and the need for formal training in organ contouring. Optimal course content and format has yet to be determined.

2012 Nov 23

2011  Presenter. Fostering Scholarship in Health Professions Education in Cancer Care through Inter-Institutional Collaboration: Creating Opportunities. 2nd Interprofessional Education/Interprofessional Care (IPE/IPC) Showcase. Toronto, Ontario, Canada. Presenter(s): Szumacher, Ewa. (Continuing Education).

2010  Presenter. The informational needs of prostate cancer patients treated with radical prostatectomy regarding adjuvant or salvage radiotherapy DOCH 2 project. Wilson Centre Research Day. Toronto, Ontario, Canada. Presenter(s): Szumacher, Ewa.

2007  Presenter. The effectiveness of an educational intervention on the congruence of prostate and rectal contouring as compared to a gold standard in planning for a three-dimensional radiotherapy for prostate cancer (3D-CRT). Wilson Centre Research Day. Toronto, Ontario, Canada. Presenter(s): Szumacher, Ewa. (Continuing Education).

2005 **Presenter.** The incidence and effectiveness of remedial programs of the Medical Radiation Sciences Program at University of Toronto and the Michener Institute for Applied Health Sciences. Wilson Centre Research Day. Toronto, Ontario, Canada. Presenter(s): Szumacher, Ewa. (Continuing Education).

2000 **Presenter.** Evaluations of our first year’s experience of new combined bone metastases clinic - the first of its kind in Canada - are we achieving what we initially planned? Humber College 10th Annual Palliative Care Conference. Toronto, Ontario, Canada. Presenter(s): Szumacher, Ewa.

2000 **Presenter.** Exploring reasons for poor accrual in palliative bone metastases trial at Rapid Response Radiotherapy Program, Toronto Sunnybrook Regional Cancer Centre (TSRCC), University of Toronto. Humber College 10th Annual Palliative Care Conference. Toronto, Ontario, Canada. Presenter(s): Szumacher, Ewa.

2000 **Presenter.** Should we involve our patients in the decision making process involving palliative radiotherapy treatment? A review of the literature. Humber College 10th Annual Palliative Care Conference. Toronto, Ontario, Canada. Presenter(s): Szumacher, Ewa.

eLearning

2013 Jun 7 **Attendee.** Li Ka Shing International Healthcare Education Centre - St. Mike’s Hospital. Toronto, Ontario, Canada.

Other Presentations

G. Teaching and Design

1. INNOVATIONS AND DEVELOPMENT IN TEACHING AND EDUCATION

2012 - present Education Research and Scholarship Grant, Multilevel Education, Faculty of Medicine, SEAC Education & Research Co-Organizer, Associate Director role.

2010 - present Interdisciplinary Radiation Oncology Rounds - IROR, Multilevel Education, Faculty of Medicine, Dept of Radiation Oncology, Odette Cancer Centre The following topics were presented by the invited speakers: March 8, 2011 - Radiation Induced nausea and Vomiting - Speakers; Dr. K. Dennis and Dr.
M. Pasetka  
April 19, 2011 - Permanent Breast Seed Implants: The Physics Perspective - Speaker; Dr. B. Keller  
May 24, 2011 - Exploring Meanings of Caring among Health Care Professionals Providing Cancer Care - Speaker(s); Tracey DasGupta, Dr. A. Daley, Kari Osmar  
June 14, 2011 - Management of Brain Metastases Using the Currently Available Evidence. - Speaker; Alon Dembo Visiting Professor Dr. Eric L. Chang  
Sept 13/2011 - A Discussion of Study Findings Regarding RT Patient Group Education at the Odette Cancer Centre - Speaker; John Maamoun  
Oct 11/2011 - Treatment Outcome for Early Stage Hodgkin’s Disease Treated at the OCC  
Dec 13/2011 - Understanding the Pathophysiology of Pain Flare - The role of Cytokines and Chemokines - Speaker; Carlo DeAngelis  
Jan 10/2012 - Managing Concurrent Chemoradiation in GI Cancers: a Multi-disciplinary approach  
Feb 21/2012 - Achieving the Achievable: The Role of Health Services Research in Radiation Oncology  
Mar 13/2012 - Trends in Simulation Augmented Education  
March 28/2012 - Radiation Oncology: Program QA Rounds  
April 10/2012 - Enhancing Your Lifelong Learning to Support Your Practice in Teaching  
May 8/2012 - Dynamic Acquisition of Knowledge: Are We Ready  
June 12/2012 - The Interface between Psychiatry and Cancer  
Sep 10/2013 - Developing and testing of Couplelinks.ca: The first online intervention for young couples coping with Breast Cancer  
Oct 8/2013 - Stories at Work: Writing to Learn, Care, and Collaborate in Radiation Therapy  
Nov 12/2013 - The Dynamically evolving VMAT program at the OCC  
Jan 14, 2014 - Understanding the discharge planning needs of Medical and Radiation Oncology Patients.  
Feb 11, 2014 - Dose Escalation and Margin Reduction in SBRT  
Mar 11, 2014 - A National System for Incident Reporting in Radiation Therapy: The CPQR, CIHI and you.  
Apr 8, 2014 - Human Factors in the Health Care Context  
May 13, 2014 - Tiny Cancer Warriors - nanomedicine  
June 10, 2014 - Leadership: Are you the allocentric leader of the future?  
Sept 9, 2014 - Let’s Talk About It: Quality Dying  
Oct 14, 2014 - Shining a light on PDT  
Nov 12, 2014 - Communities of Competence: Approaching changing practice collaboratively  
Dec 15, 2014 - What’s inside the box? - SRS at Odette  

2014 Oct 17  
3rd Annual Sunnybrook Education Council: Technology Enhanced Learning, Patient and Public Education, Faculty of Medicine, University of Toronto, CEPD accredited, Sunnybrook Health Sciences Centre  

2013 Oct 10  
2nd Annual Sunnybrook Education Conference: Digital Learning, Patient and Public Education, Co-Chair of the committee, University of Toronto, Sunnybrook Health Sciences Centre  

2013 Jul 1 - 2014 Jun 30  
Postgraduate MD, Faculty of Medicine, Dept of Radiation Oncology, DOCH-2  

2012 Oct 4  
First - Sunnybrook Education Conference: Educational Expo, Patient and Public Education, Member Planning Committee, University of Toronto, Sunnybrook Health Sciences Centre  

2004 Jul - 2005 Jun  
Radiation Oncology Palliative Care Rounds (Monthly), Continuing Education, Faculty of Medicine, Dept of Radiation Oncology, University of Toronto  
Acted as coordinator for these rounds.
The following topics were presented by the invited speakers:

September – An Overview on Art Therapy and Music Therapy

October – Money Worries: Research About Financial Issues for people With Cancer

November – Love, Learning and Listening – The Art of Communication in Palliative Care

January – Re-thinking Palliative Care

February – How Best to Treat My Patient…? Setting Goals of Care and making Treatment Decisions with Patients and Families

March – Spirituality and Breast Cancer Research

May – Discussing Prognosis for Patients with Metastatic Cancer: What Does the Literature Tell Us?

June – Culture and End of Life Care.

2003 Jul - 2004 Jun

Radiation Oncology Palliative Care Rounds (Monthly), Continuing Education, Faculty of Medicine, Dept of Radiation Oncology, University of Toronto

Acted as coordinator for these rounds.

The following topics were presented by the invited speakers:

September – Technology in Palliative Radiotherapy – Which Simulator Should We Use?

October – Suffering and Healing in Palliative Care – The Patient, Family and the Professional Caregiver

November – Issues in the Management of Patients with Brain Metastases: Case-based Discussions

January – Symptom Control – The Research Update From PMH

February – Cannabinoids – A New Frontier

March – Preliminary Results of a Randomized Study of Accelerated Whole Brain Irradiation in Patients with Brain Metastases

May – E-Resources Available to TSRCC Staff

June – Children of Cancer Patients and Their Grief.

2003

Online Suite, Development of the Needs Assessment for Prostate Cancer Patients Online Course, Continuing Education, The University of British Columbia

Course on line suite/ www.suite101.com/course.cfm/17126/overview/253861.

1998 Jul - 1999 Jun

Radiation Oncology Palliative Care Rounds (Monthly), Continuing Education, Faculty of Medicine, Dept of Radiation Oncology, University of Toronto

Acted as coordinator for these rounds.

The following topics were presented by the invited speakers:

September – Innovative Way of Caring-Palliative Radiation Therapy Beginnings of Rapid Radiation Response Clinic

October – Prevention and management of Skeletal Complications of Malignancy
November – Teens Coping with the Illness and Death of a Parent

December – Christmas Rounds – Cases

January – Orthopedic Aspect of Metastatic Disease

February – Radiosurgery for Brain Metastases

March – Pain and Symptoms Management

April – Single Dose Wide Field Irradiation for Palliation of Bone Metastases

May – Utilization of Palliative Radiotherapy in Canada

June – Palliative Care Information Centre Metropolitan Toronto.

2013 Jun - 2013 Aug Primary Supervisor. Kaitlin Koo. TBD.
2. OTHER SUPERVISION

Undergraduate Education

Research Supervisor

2012 Kaitlin Koo. *Treatment decisional support for older women with breast cancer considering adjuvant RT.*

2012 Kaitlin Koo. *Attitudes of Canadian radiation oncologists, radiation therapists, physicists and oncology nurses regarding interprofessional teaching and learning.*

2012 Rebecca Reinhart. Supervisee Position: Medical Radiation Sciences Program (MRSP), Supervisee Institution: Michener Institute for Applied Health Sciences, University of Toronto, Department of Radiation Oncology. *Research Methods II Project – Would a small group inter-professional patient education session for patients undergoing radiation treatment for prostate cancer be useful and acceptable for the patients? A Pilot Study.*

2010 Cindy Tran. Supervisee Position: Medical Radiation Sciences Program (MRSP), Supervisee Institution: Michener Institute for Applied Health Sciences, University of Toronto, Department of Radiation Oncology. *An evaluation of the usability and usefulness of a multi-language online patient education module – A pilot study – Assessment of the module.*

2010 Andrew Warkentin. Supervisee Position: Determinants of Community Health (DOCH-2), Supervisee Institution: University of Toronto, Faculty of Medicine, Peters-Boyd Academy. *Are social determinants of health, more specifically socioeconomic status, associated with prostate and breast cancer patient perception of team membership within the multidisciplinary health care team, while undergoing radiation therapy at the Odette Cancer Centre?: A survey based pilot study.*

2009 - 2010 Sarah Hahn. Supervisee Position: Determinants of Community Health (DOCH-2), Supervisee Institution: University of Toronto, Faculty of Medicine, Peters-Boyd Academy. *The informational needs of patients with prostate cancer treated with radical prostatectomy regarding salvage or adjuvant radiotherapy: Sooner or later? The development of the needs assessment questionnaire and how social determinants of health affect their informational needs.*

2005 - 2007 Jen Dewhurst. Supervisee Position: Medical Radiation Sciences Program (MRSP),
Supervisee Institution: Michener Institute for Applied Health Sciences, University of Toronto,
Department of Radiation Oncology. Research Methods II Project – Is there a standardized
protocol for the management of lymphedema in patients with breast cancer in Ontario?.

2005 - 2006 Peter Choi. Supervisee Position: Determinants of Community Health (DOCH-2), Supervisee
Institution: University of Toronto, Faculty of Medicine, Peters-Boyd Academy. Radiation
Oncology Practice and Patients’ Needs Project.

2003 - 2004 Claudia So. Supervisee Position: Medical Radiation Sciences Program (MRSP), Supervisee
Institution: Michener Institute for Applied Health Sciences, University of Toronto, Department
of Radiation Oncology. Research Methods II Project – Information needs and source
preferences of patients with primary caregivers.

2003 Christine Chan. Supervisee Position: Medical Radiation Sciences Program (MRSP),
Supervisee Institution: Michener Institute for Applied Health Sciences, University of Toronto,
Department of Radiation Oncology. Research Methods II Project – Short-term functional
status in the Performance of Activity of Daily Living among post-axially dissection in breast
cancer patients receiving radiotherapy.

2002 - 2003 Thalicia James. Supervisee Position: Medical Radiation Sciences Program (MRSP),
Supervisee Institution: Michener Institute for Applied Health Sciences, University of Toronto,
Department of Radiation Oncology. Research Methods II Project – Patients’ assessment of
the effectiveness of external Beam Radiation therapy for the palliation of metastases in the
weight-bearing bone.

Graduate Education

Research Supervisor

2009 - present MHSc Medical Radiation Science. Laura D’Alimonte. Supervisee Position: Master of Health
Science in Medical Radiation Sciences, Supervisee Institution: University of Toronto. What
prostate cancer patients should know about post-operative radiotherapy post-prostatectomy -
Health professionals’ opinions.

Science in Medical Radiation Sciences, Supervisee Institution: University of Toronto.
Treatment decisional support for older women with breast cancer considering adjuvant RT
post lumpectomy.

Science in Medical Radiation Sciences, Supervisee Institution: University of Toronto.
Working towards a decision: The development and first impression of a decision aid for older
women with early stage breast cancer.

Research Supervisor

2012 Bonnie Bristow, Research Radiation Therapist, Odette Cancer Centre. Psychological impact
of daily bowel preparation on prostate patients who received radiation therapy.

I. Creative Professional Activities

1. Understanding the needs and preferences of cancer patients in radiation oncology
practice.
   The first theme of this CPA is on understanding the needs of cancer patients in radiation
oncology practice to empower them to play an active role in their care and treatment
decision-making process. These activities have been centered on understanding the needs
of cancer patients and disseminating this knowledge to healthcare providers so these needs
can be incorporated into patient centered cancer care. The goal of my scholarly work within
this theme is to help healthcare providers to communicate better with cancer patients, offering them better support.

In first project, I examined patients’ roles in the decision-making process for treatment of painful bone metastases. A number of randomized studies have reported that single fraction RT was as effective as multi-fraction RT in relieving pain due to bone metastasis. However, patients’ preferences had never been previously investigated in the context of which palliative treatment regimens patients would prefer. I thus initiated a study to determine patients’ preferences for the two commonly used palliative RT regimens for bone metastases: 800 cGy in one fraction vs. 2000 cGy in five fractions. This study showed that patients preferred to decide about their treatment by themselves or together with the radiation oncologist, and patients were more likely to select the single fraction regimen. The convenience of the treatment plan and the likelihood of bone fracture were the most important factors influencing patients’ choices. Results of this study have been presented at several international meetings, and my paper (Szumacher et al, 2005) has been cited by several authors investigating patients’ preferences for palliative treatment.

My next research project concentrated on cancer patients’ satisfaction with the information they received about radiotherapy and how this information can be improved. The results showed that although the patients were satisfied with the information, language barriers prevented many non-English-speaking patients from participating in this study. With the transition towards more patient-centered care, it is important that we customize our practice to meet each patient’s needs.

The chronic nature of cancer means that patients’ information needs are not static in nature. In addition, most healthcare professionals’ interactions tend to remain low in patient centeredness due to our focus on the management of their medical conditions. Therefore, the informational needs of patients (and their families) living with advanced cancer was addressed. The primary objective of this research project was to determine the content and format that is most suitable for educational events targeting patients and caregivers who are living with advanced cancer. Secondary objectives included examining the differences in information needs between patients and their caregivers and providing an estimate of the rate of participation in educational events targeting such patients and caregivers. The participants identified the management of pain, fatigue, and home palliative care resources as the areas in which information was most needed. Caregivers displayed greater interest, and the range of topics for which they continue to seek additional information is wider than patients. Thirty-one percent of respondents including patients and caregivers said they would participate in an educational event. A ‘one-on-one’ interview approach and short written materials were the preferred sources of information. The findings provide information on the type of topics and format that are preferred when educators are developing educational events for patients and their caregivers. The outcomes of this study were published in Supportive Cancer Care Journal.

Breast cancer is the most frequently diagnosed cancer in Canadian women, with the probability of developing breast cancer significantly increasing over the age of 50. Although adjuvant breast RT after lumpectomy is considered the standard of care for all patient subgroups, older breast cancer patients are at a greater risk for side-effects and more complicated recovery from this treatment. Breast cancer is also less aggressive in older women with a higher proportion of estrogen receptor positive, well-differentiated, slowly proliferating tumors. Stage I breast cancer on adjuvant tamoxifen therapy have a low risk of local recurrence after lumpectomy without adjuvant breast radiation.

We wanted to understand whether evidence on breast cancer treatment in older women corresponded with the patterns of practice of radiation oncologists in Canada. To more specifically look at the needs of older women with breast cancer, and to understand the national pattern of their care, I conducted a survey among Canadian radiation oncologists who treat breast cancer. The survey also explored the willingness of radiation oncologists to implement a decision aid in this patient population. Results of this study provided evidence of
significant variation in practice patterns and attitudes among Canadian radiation oncologists regarding post-lumpectomy RT for elderly, low-risk breast cancer patients. However, the vast majority of oncologists valued the concept of patient choice and would be willing to use a decision aid designed for this population in their practice. Understanding radiation oncologists’ attitudes towards adjuvant RT confirmed that a decision aid could be useful to facilitate shared decision-making. In addition, with my guidance and mentorship, Eiran Warner, a medical student was successful in publishing our findings in Clinical Oncology.

Although there is a body of literature focusing on the information needs among breast cancer patients, most studies have been conducted with younger patient populations which offer limited insight on the specific information older women would like to know when considering adjuvant treatment. Older female cancer patients may differ from younger patients in terms of information needs due to differences in educational attainment, value of experiential knowledge versus medical sources and age-associated motivational changes. Thus, it is a concern that the informational needs and the unique illness experiences of older women with early stage breast cancer are under-reported in the literature. In addition, the use of decision aids has been advocated in breast cancer decisions to promote patient involvement in the decision-making process. Decision aids (DA) are developed with the intent to support people in making specific and deliberate choices by improving information transfer about different outcomes. Previous research has shown that DA can greatly increase patient knowledge regarding treatment options, reduce decisional conflict, and increase patient satisfaction with the decision-making process.

Taking into consideration the results of the national survey and evidence from the literature indicating uniqueness of this group of patients -I lead as principal investigator, a two year research project to develop a DA for older women with early stage breast cancer. This study was supported by a grant from the Canadian Breast Cancer Foundation. In the first year, we conducted a needs assessment and the draft DA was developed specific to older post-lumpectomy patients with Stage I hormone receptor-positive breast cancer. The objectives of the DA were to increase patients’ knowledge of their options, reduce conflict and distress in decision-making, and improve satisfaction with the decision-making process. In the second year, we conducted a needs assessment from the lay perspective with the intention of designing a DA. In our study, we qualitatively described the views of older women who had made decisions about adjuvant treatment for their early stage breast cancer with respect to the challenges of decision making, supports and resources needed during the process of choosing the treatment. Women participated in one of six focus groups following their radiation treatment for stage I breast cancer. Many women identified several challenges in the decision-making process and identified different informational needs for making decisions about their treatments. These participants and our steering committee also reviewed the draft of the DA. This research documented that all women who participated in this study felt that the DA we developed was helpful and informative. Compared with baseline scores patients had a statistically significant reduction in decisional conflict, increased clarity of treatment benefits and risks, and improved general treatment knowledge after using this decision aid. This study was published in the International Journal of Radiation Oncology, Biology and Physics, and provided evidence that this DA may be a helpful educational tool for this group of women. The quality of care for older cancer patients may be enhanced by using a tailored patient DA to help them informed about treatment options. The next goal of this work is to test the DA in several major cancer centres across Canada, evaluating both patient and physician outcomes. Ultimately, we plan to have the DA disseminated across the nation to facilitate better decision-making and patient communication. Jen Wong the student whom I supervised published the results of this work in the Journal of Cancer Education. In addition, many findings of this work were presented at the national and international conferences such as American Association of Radiation Oncologists, Canadian Association of Radiation Oncologists and International Association of Medical Education.

While discussing their treatment options with oncologists, women with breast cancer frequently express many concerns regarding treatment side effects, and sometimes decline
conventional treatment when the risks are too high. Indigenous medical knowledge and alternative medical treatments are not widely accepted because of the lack of confirmed efficacy of such treatments in evidence-based literature. Therefore a review of the literature was conducted to investigate a feminist approach to the decision-making process for women with breast cancer. The review was divided into the following themes: (1) limitations of the patient decision-making process in conventional medicine; (2) participation of native North American patients in healthcare decisions; (3) a feminist approach to breast cancer; and (4) a feminist theory of breast cancer. The literature provides evidence that the needs of minority patients are not completely fulfilled in Western medical culture. We conclude that introducing a feminist theory into evidence-based medicine will help patients to be better informed about treatment choices and will assist them to select treatment according to their own beliefs and values. This published review also provided some perspectives about treatment decision for minority women, who may not follow conventional treatment options (Szumacher et al, 2006). This research enables the health care providers to be more receptive to this group of patients when discussing treatment options. I have also presented the findings at several national and international meetings. Another group of patients whose needs are not clear are prostate cancer patients facing decisions regarding post-operative RT. The role of adjuvant and salvage RT remains controversial in terms of timing of the treatment after radical prostatectomy. Current trials demonstrate improved biochemical control and/or disease-free survival with adjuvant RT, and one long-term follow-up of a randomized clinical trial showed that adjuvant RT significantly reduced the risk of metastasis and increased survival. Despite these outcomes, several investigators propose waiting for evidence of biochemical failure and then attempting salvage RT. I supervised a medical student, Sara Hahn, who developed a research project to assess whether the social determinants of health (e.g., income, education attainment) affect the informational needs of prostate cancer patients who may face the decision of postoperative RT. Our pilot study allowed us to identify a variety of patient information needs. Through an understanding of the impact of social determinants of health on this patient population, healthcare professionals can tailor patient education tools to suit patients’ needs to allow them to make informed decisions. This work was presented at several national and international meetings and published in the Journal of Medical Imaging and Radiation Sciences.

Growing attention has been devoted to developing patient decision aids and decisional support interventions to aid patients in their decisions when making treatment choices in oncology. Treatment discussions are challenging both for physicians to transfer medical information to patients, and for patients to conceptualize the risks and benefits of treatment, and ultimately form a treatment decision. Jennifer Wong, an undergraduate student whom I supervised reviewed the recent literature on decision-making preferences, treatment preferences and decisional support development in radiation oncology. We reviewed the findings from studies conducted in radiation oncology that investigated patients’ preferences for radical or palliative RT across all cancer sites and discussed the challenges of transferring medical information to patients. This work provides a comprehensive review of the current status of patients’ decision-making process in radiation oncology, including radical and palliative treatments. The review was published in the Expert Review of Pharmacoeconomics and Outcomes Research and presented at several international conferences.

2. Working together as an inter-professional team in radiation oncology practice to improve the care of cancer patients. A collaborative multidisciplinary approach breaks down the silos of traditional care, and is considered the most valued service by patients. In the last few decades, this approach has changed the cancer care landscape. A multidisciplinary approach has distinct advantages over uni-professional fragmented care. Radiation oncology is a specialty that requires multidisciplinary care and communication between staff, clinicians, trainees, radiation therapists, other allied health care professional and patients. Collaborative practice is an
inter-professional process for communication and decision-making that enables the separate and shared knowledge and skills of cancer providers to synergistically influence the client patient care provided. However, implementing an inter-professional care curriculum into radiation oncology practice can be challenging. For the last 11 years my academic efforts have focused on developing and implementing inter-professional patient care through education, research and undergraduate training and mentoring.

The goal of Theme 2 of my CPA is the development of professional practice by providing interdisciplinary leadership for cancer care providers and trainees through education and mentorship. Evidence for my contributions in this theme is documented in my publications, international and national presentations and my participation in a number of workshops. One outcome of this work was a study on understanding the needs of health care providers in cancer care and the subsequent enhancement of RT services in the Simcoe-Muskoka area. The Simcoe-Muskoka region of Ontario is an underserviced area with respect to RT utilization. I led a group from the Sunnybrook Health Sciences Centre and the Royal Victoria Hospital in Barrie, Ontario, to conduct a study to investigate the healthcare needs and access to RT services in the region. The study consisted of a questionnaire to evaluate access to and knowledge about palliative RT, and two radiation therapy education focus groups to investigate regional knowledge and utilization of RT. The major barrier to RT access was distance to regional radiation cancer centers. Many respondents were unaware of the effectiveness of palliative RT for cancer patients. However, most were eager to learn more about RT. The focus groups identified several ways to offer health-care providers in Simcoe-Muskoka up-to-date information about palliative RT. Following this study, several continuing education sessions were conducted in community hospitals in the Simcoe-Muskoka region. These sessions were well attended and evaluated highly by the healthcare providers.

Three dimensional conformal RT (3D-CRT) is a well-established treatment modality for prostate cancer as it spares surrounding normal tissues and increases tumour kill. However, the complex task of organ contouring for 3D-CRT requires synthesis of information from MR and CT as well as a precise delineation of the prostate and the rectum. In 2006, I received peer-reviewed funding (Abbott-CARO Uro-Oncologic Radiation Award) to research the effect of a prostate and rectal contouring workshop on precise delineation of the prostate and rectum during planning for 3D-CRT for prostate cancer. The main objective of this workshop was to see if formal training on MR prostate/rectal anatomy and the use of MR-CT fusion would improve the skills in CT planning scans. Previously in Canada there was no formal training program in prostate or rectal contouring. The enthusiastic response to the workshop and to opportunities for further educational interventions indicated a need for this formal training. The effectiveness of this educational intervention was published in International Journal of Radiation Oncology, Biology and Physics.

Inter-professional care is the provision of comprehensive health services to patients by multiple healthcare providers who work collaboratively to deliver quality care within and across specialties. To improve inter-professional care and collaboration within our own cancer centre, we focused our research efforts on understanding the inter-professional needs of faculty members within radiation oncology and RT. These needs were translated into the following inter-professional CME activities.

First, from 1999 to 2005, I developed and organized the monthly Radiation Oncology Palliative Care Rounds at the Toronto Sunnybrook Regional Cancer Centre (TSRCC). Grand rounds have long been used as a tool for CME. The objectives of the rounds were to educate the healthcare providers about palliative RT and to complement the Rapid Response Radiotherapy Program at the TSRCC. I obtained funding for these events and invited leading national and international experts in palliative RT and palliative care to present at the rounds. The evaluations collected from these sessions indicated that this CME program was very effective in disseminating knowledge to interdisciplinary healthcare providers and serves as model for CME.
Second, since 2003, I have been organizing a CME program (Inter-professional Radiation Oncology Rounds, IROR) at the Odette Cancer Centre, that serves a monthly inter-professional education program to provide a venue where different disciplines (radiation oncology, radiation therapy, radiation nursing and medical physics) could showcase their contributions to the care and treatment of patients referred for radiation therapy. Two special memorial lectures have also been developed to honour two previous radiation oncology colleagues (Dr. Alon Dembo and Dr. Veronique Benk). These activities take the form of an invited professorship with the culmination of each visit consisting of a presentation to the Odette Cancer Centre at the IROR. The rounds are fully accredited by the Maintenance of the Certification Program of the Royal College of Physicians and Surgeons as well as other professional associations. Needs assessments evaluating the IROR demonstrate that these rounds have been valuable to an inter-professional audience and help facilitate an inter-professional learning environment.

A third need identified that family physicians and community-based oncologists play a key role in cancer care. To promote knowledge transfer, academic cancer centres like the Odette Cancer Centre need to provide support in the form of guidance and continuing education resources. I have served as a CME advisor to the editorial board of Hot-Spot, a quarterly newsletter of the Rapid Response Radiotherapy Program of Sunnybrook’s Odette Cancer Centre, and prepared its continuing education section. The newsletter is distributed to over 2000 readers (oncologists, family physicians and inter-professional healthcare team members in palliative medicine) in Toronto and Canada. It is also posted on the Sunnybrook Health Sciences Centre website.

Also, collaborative patient-centered practice is designed to promote active participation of each discipline in patient care. It enhances patient and family centered goals and values, provides mechanisms for communication among caregivers, and optimizes staff participation in clinical decision-making within and across disciplines, fostering respect for the contributions of all professionals. In light of this, we developed a workshop to explore the theory and practice of professional and collaborative roles in patient-centered care, using inter-professional collaboration within the radiation medicine program as a model. The goals were to advance participants’ awareness of how understanding professional roles is integral to patient-centered practice and collaboration. I have since conducted this workshop at several national and international conferences. More recently, I have been a co-investigator on a study to explore the needs of healthcare professionals who provide cancer care. The purpose of the study is to develop an understanding of the similarities and differences in the meaning of care among health care providers working in an Oncology Program of a Regional Cancer Centre and to develop educational initiatives from which inter-professional groups can learn, with and about each others’ perspectives on caring.

I have taken the lead role in several research initiatives to understand the needs of multiple disciplines (radiation oncology residents, radiation therapy students, etc) in radiation oncology. Each of these areas highlights a need for more inter-professional training and education to ultimately improve collaboration, academic medicine and quality of care. The University of Toronto, Department of Radiation Oncology (DRO) identified mentorship as a priority issue to be explored. I was the principal investigator in a mentorship working group where we conducted a needs assessment for the development of an inter-professional mentorship program for the DRO faculty members across three disciplines: radiation oncology, radiation therapy and medical physics. The study identified a need for a comprehensive interdisciplinary mentorship program within the department, as well as for a survey assessing the needs of different groups and development of an orientation program for new faculty members. The findings of these projects have since been incorporated into the residency program at the UTDRO. Also, I lead a national group of investigators to specifically investigate the needs of junior residents, PGY1, in radiation oncology across Ontario residency programs in radiation oncology.

As a PGY-1 coordinator within the residency program at the DRO, University of Toronto, I
noticed that many residents were experiencing a lack of mentorship in their training and career planning. The results of this survey, presented at national meetings, and now published in International Journal of Radiation Oncology, Biology and Physics showed that most of the Ontario residents in their first postgraduate year were satisfied with their training program, but more counselling should be offered by radiation oncology faculty members to help the residents with their career planning and stress management strategies. The findings from this survey were incorporated informally into the DRO residency programs to improve the mentorship relationships and well-being of junior residents in Ontario radiation oncology programs.

As academic coordinator of the Medical Radiation Sciences Program (MRSP), Michener Institute for Applied Health Sciences at the University of Toronto, I have a leadership role on the Program Review Committee which reviews students with difficulties and recommends remedial programs. Academic difficulty can often be a significant problem for students in health professional programs. Students in difficulty are often identified late in their training and run the risk of dismissal if remediation is not successful. Since the inception of the MRSP in 1999, a number of students have required remediation in the didactic or clinical components of their training. Not all remediation was successful, and a number of students have been dismissed. There is relatively sparse evidence in the educational literature regarding the nature of academic difficulties that health professional students encounter, and what constitutes appropriate remedial education. The purpose of this research was to evaluate the incidence and prevalence of remediation in the MRSP and the nature of the academic problems. In addition, this study looked at the type of remedial instruction that the Radiation Sciences Board of Examiners recommended for these students as well as the effectiveness of these recommendations. This study provided an important perspective about the remediation process at the MRSP. Despite its retrospective methodology, it attempted to identify the magnitude of learning problems that lead to remediation, and identified the efficacy of the remedial program (Makhani et al, 2012). I presented several workshops at national and international medical education conferences on remedial education in healthcare professional programs and the need for the development of student-based remedial programs. The program review committee that oversees the progress of trainees in difficulty in the MRSP has been well structured and incorporates new remedial strategies to students in difficulties. All the remedial cases are now regularly reviewed by this inter-professional committee and feedback with recommendations are forwarded to Oversight Committee which makes final recommendations about the remedial students to the Board of Examiners, at the University of Toronto.
CURRICULUM VITAE

Name: Dr. Mojgan Taremi

Address: Department of Radiation Oncology
          Southlake Regional Health Centre
          596 Davis Drive, Newmarket, ON, Canada, L3Y 2P9

Telephone: 905-895-4521 x6595
Fax: 905-952-2818
Email: mtaremi@southlakeregional.org

Last updated: October 2015

EDUCATION

Post Graduate and Medical Training:

1990 -1995 Medical Doctor Diploma
       Azad Tehran University

1995–1997 Internship,
       Torpe and Fayazbakhsh Hospitals, Tehran, Iran

2002-2003 Internship
       Ontario International Medical Graduate Program

2003-2004 Radiation Oncology Residency
       Queen’s University

2004-2008 Radiation Oncology Residency
       University of Toronto

2008-2009 Clinical/Research Fellowship
       Stereotactic Lung Radiotherapy
       Princess Margaret Hospital, Toronto, Ontario

2008-present Masters Degree (IMS program), University of Toronto
       Radiotherapy Induced Bone Injury as a Lung SBRT Late Toxicity

Certificate & Licensures:

- Neurosurgery Residency admission Exam, University of Tehran, Iran (1997)
- Ontario IMG Program, Written Exam (2001)
- Ontario IMG Program OSCE Exam (2002)
- Radiation Oncology Board of Royal College of Physicians and Surgeons of Canada (2008)
BIOGRAPHICAL INFORMATION

Hospital/Staff Appointments:

2009-Present  
**Active Staff, Radiation Oncology**  
Stronach Regional Cancer Centre (SRCC)  
Southlake Regional Health Centre, Newmarket, Ontario, Canada

**Active Staff, Radiation Oncology**  
The Princess Margaret Cancer Centre, Toronto, Ontario, Canada

Professional Affiliations:

- Royal College of Physicians and Surgeons of Canada
- College of Physicians and Surgeons of Ontario

Peer Review Activities:

- Journal of Cancer Research and Therapeutics, November 2011

Other Professional Activities:

- Taremi M; “A Rare Feature of Cerebral Toxoplasmosis as a Solitary Cerebral Tumour” Medical Degree Thesis, Supervisor: Dr. A. Naderi, Chief of Neurological Research, and Neurosurgery Department, Department of Medical Sciences, Azad Tehran University, 1996
**Current Clinical Studies**

2011  
**Principle Investigator: Proclaim Study**  
Southlake Regional Health Centre  
Phase 3 Study of Pemetrexed, Cisplatin and Radiotherapy vs. Etoposide, Cisplatin and Radiotherapy

2011  
**Co-investigator: Proclaim Study**  
Princess Margaret Hospital  
A Phase 3 Study of Pemetrexed, Cisplatin and Radiotherapy Followed by Consolidation Pemetrexed versus Etoposide, Cisplatin and Radiotherapy Followed by Consolidation Cytotoxic Chemotherapy of Choice in Patients with Unresectable, Locally Advanced, Stage III Non-Small Cell Lung Cancer Other than Predominantly Squamous Cell Histology (PROCLAIM)

2011  
**Co-investigator: NCIC BR.28/CONVERT**  
Princess Margaret Hospital  
Concurrent ONce-daily VErsus twice-daily RadioTherapy: A 2-arm randomized controlled trial of concurrent chemo-radiotherapy comparing twice-daily and once-daily radiotherapy schedules in patients with limited stage small cell lung cancer (SCLC) and good performance status

2011  
**Co-investigator: RTOG 0617**  
Princess Margaret Hospital  
A Randomized Phase III Comparison of Standard-Dose (60Gy) versus High-Dose (74Gy) Conformal Radiotherapy with Concurrent and Consolidation Carboplatin/Paclitaxel in Patients with Stage IIIA/IIIB Non-small Cell Lung Cancer

2011  
**Co-investigator: RTOG 0813**  
Princess Margaret Hospital  
Seamless Phase I/II Study of Stereotactic Lung Radiotherapy (SBRT) for Early Stage, Centrally Located, Non-Small Cell Lung Cancer (NSCLC) in Medically Inoperable Patients (RTOG 0813)

2011  
**Co-investigator: RTOG 0915**  
Princess Margaret Hospital  
A Randomized Phase II Study Comparing 2 Stereotactic Body Radiation Therapy (SBRT) Schedules for Medically Inoperable Patients with Stage I Peripheral Non-Small Cell Lung Cancer

2011  
**Co-investigator: MRI Assessment SBRT NSCLC**  
Princess Margaret Hospital  
MRI Assessment of Post-Radiation Changes following Stereotactic Body RT for Non-Small Cell Lung Cancer: A Pilot Study
2011 Co-investigator: PET CT Re-Planning NSCLC  
Princess Margaret Hospital  
Prospective Study of CT and PET Imaging during a course of Radical  
Radiotherapy to determine the Dosimetric Benefits of Re-planning in Non-Small  
Cell Lung Cancer

2011 Co-investigator: SBRT LUNG  
Princess Margaret Hospital  
Lung Stereotactic Radiation Therapy for Patients with Non-Small Cell Lung  
Cancer and Other Cancers

2011 Co-investigator: Survey of Anti-cancer and Non Anti-cancer Drug Cost and Adherence  
Multi-centre Study between UHN, St Michaels Hospital, and SRHC

2011 Co-investigator: Patient Preferences for Completing Epidemiology Questionnaires  
Incorporated into Cancer Clinical Trials  
Collaboration between UHN, St Michaels Hospital, and SRHC

2012 Co-investigator: The Influence of Social Determinants of Health, Physical Activity, and Supplement Use on Smoking Cessation and Recidivism in Cancer Patients  
Collaboration between UHN and SRHC

2013 Co-investigator: Complementary and Alternate Medicine for Patients undergoing Treatment  
Stronach Regional Cancer Centre at Southlake Regional Health Centre

2013 Co-investigator: Complementary and Alternate Medicine for Patients undergoing treatment at Stronach Regional Cancer Center  
Stronach Regional Cancer Centre at Southlake Regional Health Centre

2013 Co-investigator: Ontario Health Study  
Stronach Regional Cancer Centre at Southlake Regional Health Centre

2014 Co-investigator: Patient Preferences for Research Access to Administrative Data in Ontario  
Stronach Regional Cancer Centre at Southlake Regional Health Centre

Publications in Preparation:

- Assessment of shortness of breath (evaluated by ESAS scores in patients with lung cancer) Lynne Penton, Taremi M

- Radiation pneumonitis risk factors in patients with collapsed lung. Edwin Chung, Taremi M

**Presentations & Special Lectures**

**Invited Lectures & Presentations:**

- Anti-Serotonin Treatment, an Interesting Case of Multi-Pharmaceutical Approach. Kingston Regional Cancer Centre, 2004

- “CanMEDS” Presentation; Communication with the Patients and their Families. Princess Margaret Hospital, 2004

- Review of Articles in Management of Locally Advanced Cervical Cancer. Princess Margaret Hospital, Journal Club, 2004

- Diagnosis and Management of Lobular Carcinoma In Situ, Sunnybrook Regional Cancer Centre, Breast Tumour Board, 2006

- Review of Articles in Management of Elderly Patients with Diffuse Large B-Cell Lymphoma. Princess Margaret Hospital, Journal Club, 2007

- Diagnosis, Management, and Outcome of Patients with Stage I Follicular Lymphoma; Review of PMH Experience. Princess Margaret Hospital, Lymphoma Tumour Board, 2007

- Diagnosis and Management of Penile Carcinoma. Princess Margaret Hospital, Genito-Urinary Tumour Board, 2007

- Several Presentations on the Management of Early Stage Non-Small Cell Lung Cancer with Stereotactic Radiotherapy. Princess Margaret Hospital, Stereotactic Radiotherapy Rounds, 2008 – 2009

• Review on Lung Cancer. Southlake Regional Health Centre, Cancer Education Series, 2011

• Prognosis and treatment of Lung Cancer, Southlake Regional Health Centre, Cancer Education Series, 2012

• Presentations in Prevention and Management of Breast, Gynaecological, Colo-Rectal and Lung Cancers. Canadian Cancer Society, Iranian Community, 2005 - present

Presented & Published Abstracts:

• **Taremi M**, Hope A, Waddell T et al; “Assessment of Local Failure in Patients Treated with Stereotactic Lung Radiotherapy; Princess Margaret Hospital Experience”, Oral Presentation, CaRS (Canadian Radiosurgery) Conference, July 2009.

• **Taremi, M**, Hope A, Max D, et al; “Four Year Outcomes of Patients with Stage I Lung Cancer Treated with SBRT”, Oral Presentation, *CARO (Canadian Association of Radiation Oncology)*, Sep 2010.

• Karan T, Kim S, Abbas A, Moseley D, Taremi M, Yeung I; “Dosimetric Discrepancies due to Positional Errors in MLC Movement during Stereotactic Lung VMAT” Poster Presentation, ASTRO (American Association of Radiation Oncology), September 2014

Teaching:

2011 Supervising Radiation Therapists’ Research Southlake Regional Health Centre Project: Dose volumetric Study on Collapsed Lung and their Relationship with Radiation Pneumonias

2003-2009 Teaching Medical Students, Junior Residents Queen’s University and University of Toronto (Princess Margaret Hospital)

1990-1997 Teaching Junior Medical Students Azad Tehran University

1984-1985 Teaching Physics to High School Students as a Part-Time Job Iran-Tehran

1. EDUCATION

Degrees
1970 MD, University of Toronto, Canada
1967 Honours B.Sc. Biological and Medical Sciences, University of Toronto, Canada

Postgraduate, Research and Specialty Training
1994 Jun 5 - 1994 Jun 7 (Follow-up - October 14, 1994), Communications, Conflict Resolution, and Negotiations Workshop, Pecos River Learning Centers, Inc, Sunnybrook Health Science Centre, Toronto, Ontario, Canada
1977 Jul - 1977 Nov Fellow, Princess Margaret Hospital, Canada, Supervisor(s): Radiation Oncology
1976 Dec - 1977 Jun Chief Resident, Princess Margaret Hospital, Canada, Supervisor(s): Radiation Oncology
1975 Jul - 1977 Jun Resident, Princess Margaret Hospital, Canada, Supervisor(s): Radiation Oncology
1972 Jul - 1972 Oct Assistant Resident, Toronto General Hospital, Canada, Supervisor(s): Medicine
1971 - 1972 Family Practice, London, United Kingdom
1970 - 1971 Straight Intern, Toronto General Hospital, Canada, Supervisor(s): Medicine
Straight Intern, The Hospital for Sick Children, Canada, Supervisor(s): Paediatrics

Qualifications, Certifications and Licenses
2012 Admitted: Fellow (ad eundum), Obstetricians and Gynecology, Royal College of Obstetricians and Gynecologists, United Kingdom
2006 Honorary Fellow, Royal College of Radiologists
1977 FRCP(C), Radiation Oncology, Royal College of Physicians and Surgeons of Canada,
2. EMPLOYMENT

Current Appointments

2004 Aug - present  Staff Radiation Oncologist, Toronto-Sunnybrook Regional Cancer Centre, Canada
1996 - present  Professor, Division of Gynecologic Oncology, Obstetrics and Gynaecology, University of Toronto
1995 Jul - present  Professor, Obstetrics and Gynaecology, University of Toronto
1995 Jul - present  Professor, Radiation Oncology, University of Toronto, Canada
1988 Jun - present  Staff Radiation Oncologist, Toronto-Sunnybrook Regional Cancer Centre, Canada (now Odette Cancer Centre)
1996  Professor, Obstetrics and Gynaecology, University of Toronto
1978  Lecturer, University of Toronto

Previous Appointments

HOSPITAL

2002 Jan - 2004 Jul  Consultant, Department of Radiation Oncology, Toronto-Sunnybrook Regional Cancer Centre, Canada
1994 Mar - 2001  Head, Department of Radiation Oncology, Sunnybrook Health Sciences Centre, Toronto, Canada
1991 Aug - 2001 Mar  Head, Division of Radiation Oncology, Toronto-Sunnybrook Regional Cancer Centre, Canada

Responsible for the overall activity of the department including the clinical, academic, research and educational functions.

In my administrative/management role as Head of the Department of Radiation Oncology, Sunnybrook & Women’s College Health Science Centre/Toronto-Sunnybrook Regional Cancer Centre and Head of the Radiation Program at Toronto-Sunnybrook Regional Cancer Centre, I was responsible, with the help of an administrative assistant, for the full operation and budget of the program. The program is the largest in the Centre, having approximately 220 employees, of which 23 physicians were direct reports to the head as were 2 managers of the physics and radiotherapy departments. As Head, I was part of the senior management team for the TSRCC and SWC. I was directly involved in defining the Centre’s vision, strategic planning, developing and managing changes in operations, setting annual program and Centre budgets and allocation of resources. Quality assurance programs and continuous quality improvement were part of my mandate.

At the provincial level, I was responsible, with the heads of radiation for the other CCO Centres and other senior radiation management personnel, for developing strategic directions for provincial radiotherapy programs

1988 - 1991  Staff Radiation Oncologist, Radiation Oncology, Toronto-Sunnybrook Regional Cancer Centre
1977 Dec - 1988 May  Staff Radiation Oncologist, Princess Margaret Hospital, Canada
1972 Nov - 1975 Jun  Clinical Associate, Princess Margaret Hospital, Canada

RESEARCH

2001 Dec - 2003 Feb  Medical Director, GlaxoSmithKline Canada, Canada

UNIVERSITY - CROSS APPOINTMENT

1988 Jul - 1995 Jun  Associate Professor, Division of Gynecologic Oncology, Obstetrics and Gynaecology,
Gillian Monica THOMAS

University of Toronto, Canada

1987 Jul - 1988 Jun Assistant Professor, Division of Gynecologic Oncology, Obstetrics and Gynaecology, University of Toronto, Canada

UNIVERSITY - RANK

1988 Jul - 1995 Jun Associate Professor, Radiation Oncology, University of Toronto, Canada
1981 Jul - 1988 Jun Assistant Professor, Department of Radiology, University of Toronto, Canada

3. HONOURS AND CAREER AWARDS

Distinctions and Research Awards

INTERNATIONAL

Received

2014 Boudwdijk Bastiaanse Award, Dutch Gynecologic Oncology Group, Netherlands. (Distinction, Specialty: Gynecologic Oncology) "Lifetime Contribution and Achievement in Gynecologic Oncology".

2008 Award for Excellence, International Gynecologic Cancer Society. (Distinction)
2006 Honorary Fellow, Royal College of Radiologists, United Kingdom. (Distinction)
2005 Felix Rutledge Lectureship in Gynecologic Oncology, MD Anderson Hospital, United States. (Distinction)
2003 Honorary Fellowship, Society of Gynecologic Oncologists of the Philippines, Philippines. (Distinction)
2002 - 2004 President, International Gynecologic Cancer Society. (Distinction)

NATIONAL

Received

2012 May Queen's Diamond Jubilee Medal, Queen Elizabeth II Diamond Jubilee Medal program. Canada. (Distinction, Specialty: Gynecology) Significant contributions and achievements in the field of Gynecology.
1969 Alpha Omega Alpha Honour Medical Society, Canada. (Distinction)

4. PROFESSIONAL AFFILIATIONS AND ACTIVITIES

Professional Associations

1995 - present American Radium Society
1990 - present Society of Gynecologic Oncology
1988 - present Canadian Association of Radiation Oncologists
1987 - present Founding Member, International Gynecology Cancer Society
1986 - present Society of Gynecologic Oncology of Canada
1983 - present American Society of Therapeutic Radiology and Oncology
1978 - present American Society of Clinical Oncology
1970 - present Canadian Medical Association
1970 - present Ontario Medical Association
Gillian Monica THOMAS

1998 - 2001  Gynecologic Cancer Foundation
1990 - 2000  Affiliate Member, Society of Urologic Oncology
1978 - 1988  Canadian Oncology Society

Administrative Activities

INTERNATIONAL

4th National Hellenic Congress & Gynecologic Oncology
2002  Participant, Tumour Board

American College of Obstetricians and Gynecologists
1991 - 1997  Member, Committee on Human Research

American College of Radiologic Imaging Network
2004 - present  Member, Gynaecological cancers committee

American College of Radiology
1988 - present  Member, Patterns of Care: Cervix Committee
1995 - 2001  Chair, Patterns of Care: Member GU, Seminoma Committee
1995  Member, Data Monitoring Committee of Radiation Therapy Oncology Group
1995  Member, Data Monitoring Committee of Radiation Therapy Oncology Group

American College of Surgeons
2003 - present  Member, Gynecologic Oncology Disease Site Team of the Commission on Cancer

American Radium Society
1996  Member, Scientific Program Committee

American Society for Therapeutic Radiology and Oncology
2000  Member, Scientific Program Subcommittee

American Society of Clinical Oncology
1996  Member, Scientific Committee (Gynecology)
1996  Member, Scientific Committee (Gynecology)
1989 - 1990  Member, Patient Advocacy Committee
1981 - 1984  Member, Exhibit Screening Committee

Ehrreich Consulting
1997 - 2000  Consultant, DBD Advisory Panel

European Society of Gynaecological Oncology
2000  Member, International Scientific Committee

Gynecologic Oncology Group
2004 - present  Vice Chairman, Protocol Committee, United States.
2002 - present  **Member**, Cervix and Vulva Committee, United States.
1994 - present  **Member**, Publications Committee, United States.
1988 - present  **Member**, Protocol Committee, United States.
1986 - present  **Member**, Cervix, Vulva, Vagina Committee, United States.
2011  **Program Chair**, GOG Winter 2011 Symposium, San Diego, California.
2000  **Member**, R.F.A. Review Committee
2000  **Member**, Management Committee, United States.
1994 - 2002  **Chair**, Cervix, Vulva, Vagina Committee, United States.
1994 - 2002  **Chair**, Cervix and Vulva Committee, United States.
**Responsibilities for administration of the Committee include:**
• setting research directions
• guiding research protocol development
• liaising with basic researchers to develop translational research protocols
• presentation of the site activities to obtain five-year grant funding from NIH. (Total current application this year $46 million, of which approximately one quarter is for support of Cervix and Vulva Committee).
1993 Feb  **Moderator**, General Scientific Session, “The Effect of Overall Treatment Time on Recurrence in Cancer of the Cervix”
1991 - 1997  **Member**, Executive Committee, United States.
1991 - 1997  **Member**, Membership Committee, United States.
1988 - 1994  **Co-Chair**, Cervix, Vulva, Vagina Committee, United States.

**International Gynecologic Cancer Society**
1995 Sep - present  **Member**, Scientific Committee
1995 - present  **Member**, Program Committee
2008  **Member**, Scientific/Program Committee, 12th Biennial Meeting
2006  **Chairman**, Scientific/Program Committee, 11th Biennial Meeting
2004 - 2006  **Past President**
2002 - 2004  **President**
2000 - 2002  **Chair**, Sub-Committee on Awards
2000  **President Elect**
2000  **Council Member**, Executive Committee
1998  **Member**, International Scientific Committee
1998  **Member**, International Scientific Committee
1993 Sep  **Member**, Scientific Committee
1991 Sep  **Chairman**, Workshop, “New Approaches for Gynecological Malignancies”
1991 - 1996  **Council Member**, Executive Committee

**International Prostate And Testicular Cancer Conference**
1990 Oct  **Co-Chairman**
(Major role in planning topics and speakers and reviewing abstracts for presentation).

**National Cancer Institute**
2006 - present  **Co-Chair**, Gynecologic Cancer Steering Committee, United States.
Gillian Monica THOMAS

2011 - 2014  **Member**, Clinical Trials and Translational Research Advisory Committee, United States.
2010 - 2011  **Reviewer**, NCI Cancer Clinical investigator Leadership Awards
2009 - 2011  **Reviewer**, NCI-ASCO Cancer Foundation Clinical Investigator Team Leadership Award
2005  **Chair**, Novel Approaches to IP Therapy, Ovarian Cancer State of the Science Meeting

**National Cancer Institute of Canada/Clinical Trials Group**
2008 - present  **Member**, Cervix Working Group

**Northern Oncology Centre**
2010  **Reviewer**, Graduate School Program – Northern Oncology Centre, Groningen, Netherlands.

**Ortho-Biotech**
1997 - 2001  **Member**, Speakers Panel and National Advisory Committee

**Society for Gynecologic Oncologists**
1995 - present  **Member**
2001  **Member**, Program Committee
1999  **Member**, Task Force 2000
1998  **Member**, International Committee
1997  **Member**, Education Committee
1996 - 1997  **Member**, Program Committee

**Society of Gynecologic Oncologists**
2011  **Member**, SGO Research Summit and Strategic Research Plan
2002  **Member**, Scientific Program Committee, 33rd Annual Meeting

**Society Of Gynecologic Oncologists**
2001 - 2002  **Member**, Scientific Committee
1996  **Member**, Program Committee

**TAP Holdings Inc**
1997 - 2001  **Chair**, Advisory Board, TNP-40

**NATIONAL**
**Alberta Cancer Board**
2001  **External Reviewer**, Clinical Research Program

**National Cancer Institute of Canada**
1991 - 1995  **Member**, Clinical Trials Gynecology Nucleus Committee
1990 - 1993  **Head**, Radiation Oncology Quality Assurance Committee
1987 - 1992  **Chairman**, Radiation Oncology Committee
1982 - 1989  **Member**, F Committee

**Royal College of Physicians and Surgeons of Canada**
1987 - 1991  **Chief Examiner**, Radiation Oncology
Gillian Monica THOMAS

1985 - 1987 Examiner, Radiation Oncology

PROVINCIAL / REGIONAL

Cancer Care Ontario
1998 - 2001 Member, Research Advisory Committee
1998 - 2001 Member, Radiation Oncology Professional Advisory Committee
1998 - 2001 Member, Radiation Treatment Advisory Committee

Ontario Cancer Research Network
2002 - present Member, Scientific Advisory Committee
2002 - 2004 Member, Scientific Advisory Committee

Ontario Cancer Treatment and Research Foundation
1997 Member, Proton Radiation Treatment Working Group
1996 - 1997 Member, Radiation Therapy Program Committee
1994 - 1996 Member, Radiation Oncology Professional Advisory Committee
1992 Member, Research Planning Committee
1992 Member, GYN Disease Site Group
1991 - 1997 Member, Research Advisory Committee

Ontario Clinical Oncology Group
1990 - 1995 Site Representative
1982 - 1995 Member, Policy Committee

LOCAL

Kingston Regional Cancer Centre
1998 Member, Search Committee, CEO

Odette Cancer Centre
2008 - present Member, Image Guided Brachytherapy Committee
2007 - present Member, Research Advisory Committee

Princess Margaret Hospital
1980 - 1985 Member, Technical Procedures Committee
1979 - 1984 Member, Infection Control Committee
1978 - 1984 Member, Resident Committee

Sunnybrook and Women's College Health Sciences Centre
1999 Member, Bylaws Committee
1998 Member, Search Committee, Obstetrician & Gynaecologist in Chief

Sunnybrook Health Science Centre
1995 Member, Senior Medical Council
1995 Member, Search Committee, Head of Department of Obstetrics & Gynecology
Gillian Monica THOMAS

1994  Member, Medical Advisory Committee
1994  Member, Academic Medical Council
1993  Member, Search Committee, Head of Department of Gynaecology

Sunnybrook Health Science Centre & Toronto-Bayview Regional Cancer Centre
1992  Member, Search Committee, Head, Division of Medical Physics Research

Sunnybrook Health Sciences Centre
1991 - 1995  Member, Comprehensive Cancer Program: Executive Committee
1991 - 1993  Member, Comprehensive Cancer Program: Strategic Planning Committee

Toronto-Bayview Regional Cancer Centre
1993  Member, Search Committee, Director of Patient Services

Toronto-Sunnybrook Regional Cancer Centre
1996 - present  Member, Strategic Planning Committee
1996 - present  Member, Clinical Services Management Committee
1991 - present  Member, Executive Committee
1998  Member, Search Committee, Head, Division of Medical Oncology
1998  Member, Medical/Radiation Oncology Accreditation Team
1995  Member, Medical/Radiation Oncology Accreditation Team
1994 - 2001  Head, Radiation Program
1989  Member, Radiation Services Committee

University of Toronto
1992 - present  Member, Senior Advisory Committee, Faculty of Medicine, Dept of Radiation Oncology
1994  Member, Gynecologic Fellowship Committee, Faculty of Medicine, Dept of Obstetrics & Gynaecology
1992 - 1993  Member, Academic Promotions Committee

Other Research and Professional Activities

RESEARCH PROJECT

Sunnybrook PI. The impact of Positron Emission Tomography (PET) imaging in women with locally advanced cervical cancer.

Sunnybrook PI. Randomized Phase III trial comparing Concurrent Chemoradiation and Adjuvant Chemotherapy with Pelvic Radiation alone in high-risk and advanced stage endometrial cancer.
C. Research Funding

1. GRANTS, CONTRACTS AND CLINICAL TRIALS

PEER-REVIEWED GRANTS

FUNDED

2003

Per case funding 2000 (closed 2003) $2,200.00/case, 250 cases.

2001

Principal Investigator. Phase III trial to evaluate the efficacy of maintaining hemoglobin levels above 120 g/l with erythropoietin versus above 100 g/l without erythropoietin in anemic patients receiving concurrent radiation and cisplatin for cervical cancer. Gynecologic Oncology Group. [Grants]
Per case funding $3,300.00/case, (closed prior to accrual completion 2003, Awaiting analysis,460 cases International Intergroup Trial).

2000 - 2003

Co-Principal Investigator. Phase I study of weekly cisplatin and paclitaxel with whole abdominal radiation in advanced endometrial cancer. Gynecologic Oncology Group. [Grants]
Per case funding. $2,200.00/case, 60 cases.

1996 - 1998

Principal Investigator. Multivariate analysis of radiation factors predicting outcomes in cervical cancer. Janssen-Ortho Inc. 43,000 CAD. [Grants]

1994 - 1998

(Study closed early due to lack of accrual).

1994 - 1996

1994

1993 - 1995

Principal Investigator. A Phase II study of leuprolide acetate in advanced or recurrent endometrial cancer. Abbott Laboratories. 45,000 CAD. [Grants]

1993

Co-Principal Investigator. Circadian infusion 5-fluorouracil/leucovorin as radiosensitizers for hyperfractionated whole abdominal radiation in patients with abdominal malignancies. Berlex Canada Inc. Collaborator(s): Co-principal Investigator with Dr. G. Bjarnason. 41,600 CAD. [Grants]

1989

Industry Supported.
1979  **Principal Investigator.** Trials Secretary. Gastrointestinal Study Group. 20,220 CAD. [Grants]

1978  **Principal Investigator.** Phase I clinical trials of radiation sensitizer and study of some other therapeutic factors. Ontario Cancer Treatment and Research Foundation. 157,570 CAD. [Grants]

E. Presentations and Special Lectures

1. INTERNATIONAL

Invited Lectures and Presentations

2013  **Invited Speaker.** State of the Science in Cervical Cancer: Where we are today and where we need to go. Recurrent/metastatic cervical cancer to date: Success or Failure? Gynecologic Oncology Group. San Antonio, Texas, United States.

2012  **Invited Speaker.** ANZGOG - 2012. Australia.

2011  **Invited Speaker.** Concurrent Chemo/Radiotherapy in Cervical Cancer. How far have we come? ESTRO 30th Anniversary Conference. United Kingdom.

2011  **Invited Speaker.** Quando e quale radioterapia nel cancro cervical? Sicilian Gynecologic Oncology Meeting.

2011  **Invited Speaker.** The True Cost of Running Trials for CCTGs: An International Perspective on Cooperative Trials Groups. COSA. Perth, Australia.

2011  **Invited Speaker.** The Big Picture Downunder: Concurrent Chemo-Radiation: Where are we now? COSA. Perth, Australia.

2011  **Invited Speaker.** Debate: Pro side Endometrial Cancer should be managed by the Specialist Gynecologist not the Gynecologic Oncologist. The Complicated Pelvis Meeting. Perth, Australia.

2011  **Invited Speaker.** Vulvar Cancer:“Put Down the Knife and Bring on the Healing Rays”. The Complicated Pelvis Meeting. Perth, Australia.

2011  **Invited Speaker.** Are we missing the Boat? Peter MacCallum Cancer Centre. Melbourne, Australia.

2010  **Visiting Professor.** University of Groningen. Groningen, Netherlands.

2008  **Visiting Professor.** Importance of Lymph Nodes and Implications for Adjuvant therapy in Endometrial Cancer. Department of Radiation Oncology, Tehran University. Iran, Islamic Republic Of.

2006  **Visiting Professor.** Martin Schneider Memorial Lecturer Department of Radiation Oncology, University of Texas Medical Branch. Galveston, United States.

2005  **Visiting Professor.** Felix Rutledge Lectureship, Department Of Gynecologic Oncology MD Anderson Cancer. Houston, United States.

2003  **Visiting Professor.** Boerhaave Professor, University of Leiden Medical Centre, Departments of Gynecologic Oncology and Radiation. Netherlands.

2001  **Visiting Professor.** Department of Radiation Oncology, University of Pennsylvania School of Medicine. Philadelphia, United States.

2000  **Visiting Professor.** Netherlands Cancer Institute. Amsterdam, Netherlands.

2000  **Visiting Professor.** Barbara Moore Jordan Visiting Professor, Memorial Sloan Kettering Cancer Centre. New York, United States.

1998  **Visiting Professor.** Department of Radiation Oncology, Fox Chase Cancer Centre. Philadelphia, United States.

1997  **Visiting Professor.** University of Indianapolis. Indiana, United States.

1996  **Visiting Professor.** University of Wisconsin-Madison Medical School. Madison, United States.

1996  **Visiting Professor.** Mayo Clinic. Rochester, United States.

1995  **Visiting Professor.** Department of Radiation Oncology, Department of Obstetrics and Gynecology, University of California. Irvine, United States.

1994  **Visiting Professor.** Department of Radiation Oncology, Bowman-Gray School of Medicine, Wake Forest University. Winston-Salem, United States.

1994  **Visiting Professor.** Department of Radiotherapy, Loyola University Medical Centre. Maywood, United States.

1993  **Visiting Professor.** Department of Radiation Oncology, Fox Chase Cancer Centre. Philadelphia, United States.

1990  **Visiting Professor.** Department of Radiation Oncology, New England Medical Centre, Tufts University. Boston, United States.

1986  **Visiting Professor.** Department of Radiation Therapy, University of Pennsylvania Hospital and Fox Chase Cancer Centre. Philadelphia, United States.

1985  **Visiting Professor.** Radiation Oncology Center of Sutter Community Hospital. Sacramento, United States.

1984  **Visiting Professor.** Department of Gynecology Oncology, University of California School of Medicine. Los Angeles, United States.

1983  **Visiting Professor.** Department of Radiotherapy, Harper-Grace and Wayne State University Hospital. Detroit, United States.

**Presented Abstracts**

2006  **First Author.** A GOG Phase III trial to evaluate Maintaining Hemoglobin (Hgb) \(>120\text{g/l} \) with Erythropoetin (EPO) during chemoradiation (CT/RT) for cervical cancer. Int Gynecol Cancer Soc, 11th Biennial Meeting. Santa Monica, United States.

2000 Moving beyond quality of life to tissue oxygenation. 28th World Congress of the International Society of Hematology. Toronto, Ontario. Thomas G.

1999 Anemia associated with inferior outcomes in patients treated with radiotherapy (RT) for cancer of the cervix. IGCS Post Congress Satellite Symposium. Venice, Italy. Thomas G.

1997 Chemotherapy in cervix cancer: Is there a role? The 1st Annual Terry Fox & Chang Gung Memorial Hospital International Cancer Symposium on Cervical Cancer. Taipei, Taiwan, Province Of China. Thomas G.

1994 Whole abdominal radiotherapy should be considered reasonable treatment for small-volume Stage Ill

2004
Integrating Multimodality Therapy in Vulvar Cancer. IXth National Gynecologic Oncology Congress. Antalya, Turkey.

2004

2004
**Moderator.** Afternoon Session. GOG Summer Symposium.

2004
Debate, Con side: Systemic Chemotherapy following Surgical Bulk Reduction is the Treatment of Choice for patients with Stage III-IV Endometrial Cancer confined to the Pelvis and Abdominal Cavity. Southern Association for Oncology.

2004

2004
Anemia in Cancer an Opportunity for Improving Treatment Outcomes? University of Helsinki. Helsinki, Finland.

2004
Multimodality treatment in vulvar carcinoma. Aarhus University Hospital. Norrebrogade, Denmark.

2003 Clinical Decision Making and Evidence Based Medicine, Adjuvant Treatment in Stage IB Cervical Cancer and Management of Vulvar Cancer. EORTC Symposium. Naples, Italy.

2002 Presentation on Chemoradiation in Cervical Cancer. 4th National Hellenic Congress & Gynecologic Oncology. Athens, Greece.

2002 **Chair.** Seminar – Innovations in Radiation Oncology. 18th UICC International Cancer congress. Oslo, Norway.

2002 Round Table Discussion – Cervical Cancer. 4th National Hellenic Congress & Gynecologic Oncology. Athens, Greece.

2001 Chemoradiation in “locally advanced” cervical cancer. Identification of patients likely to benefit from lymph node debulking – cervix. European Society of Gynaecological Oncology 12. Venice, Italy.

2000 Co-chair. Hemoglobin levels and radiation therapy outcomes – is there a correlation? Seville, Spain.

2000 Chemoradiotherapy is now standard treatment for cervical cancer. Chemoradiotherapy for vulvar carcinoma. Chemoradiation: From the Laboratory to the Clinic, Joint Leeds/Royal College of Radiologists Conference. York, United Kingdom.

Vienna, Austria.

1999  

1999  

1999  

1999  

1999  

1999  
**Chair.** Anemia management in radiation oncology. Janssen-Ortho Advisory Board Meeting. San Antonio, United States.

1999  

1999  

1999  
**Chair.** Round Table on Cervical Cancer – raising treatment problems in cervical cancer. Satellite Symposium of the Seventh Biennial Meeting of the Int Gynecol Cancer Soc. Venice, Italy.

1998  

1997  
Changing concepts in the management of vulvar cancer. The New York Hospital Queens Oncology Conference. Flushing, United States.

1997  
Integration of therapies - Radiation therapy. Combined modalities therapies (Round table discussion) Treatment of Recurrent Cervical Carcinoma. Aviano, Italy.

1997  
Randomized study of adjuvant treatment including radiation therapy and chemotherapy in patients with vulvar cancer. EORTC Gynecological Group Meeting. Aviano, Italy.

1997  
**Breakfast Session: Management of early-stage ovarian cancer. 21st Annual Meeting of the Society of Gynecologic Oncologists. Phoenix, United States.**

1997  

1997  
**Moderator.** Plenary Session. 21st Annual Meeting of the Society of Gynecologic Oncologists. Phoenix, United States.

1997  

1997  

1997  
Vulva ca RT vs CT vs both (case discussion). American Radium Society. New York, United States.

1997  **Chair.** Cervix symposium. International Congress of Radiation Oncology. Beijing, China.

1997  Is there a role for chemotherapy in advanced cervical cancer? 1st Annual Terry Fox/Chang Gung Memorial Hospital International Cancer Symposium. Taipei, Taiwan, Province Of China.

1997  **Chair.** Multidisciplinary clinical decision-making. 6th Biennial Meeting International Gynecologic Cancer Society. Fukuoka, Japan.

1997  **Chair.** Radiotherapy of cervical cancer. 1st Annual Terry Fox/Chang Gung Memorial Hospital International Cancer Symposium. Taipei, Taiwan, Province Of China.

1996  When and how to use a combined approach (Disease of the vulva). Postgraduate Course on Gynaecologic Oncology. Heemskerk, Netherlands.

1996  Combined modality therapy in cervical cancer. 1st European Society for Medical Oncology Congress. Vienna, Austria.

1996  Optimising therapy in Stage IB cancer of the cervix. Irish Gynaecological Oncology Society. Dublin,
Ireland.

1996
The role of radiation therapy in the management of vulvar cancer. St. Lukes' Hospital. Dublin, Ireland.

1996
Should chemotherapy be used in the primary treatment of cervical cancer? Grand Rounds, M.D. Anderson Hospital. Houston, United States.

1995

1995

1995

1995
Is there a role for radiation therapy in ovarian cancer? Symposium on Gynecology and Gynecologic Oncology, University of Minnesota. Minneapolis, United States.

1991

1991

1990

Concurrent 5-Fluorouracil and radiation in the management of advanced cervical cancer. Department of Radiation Oncology, New England Medical Center, Tufts University. Boston, United States.

1989

Conservative management of carcinoma of the anal canal. 1st European Winter Oncol Conf. Switzerland.

1989

The role of adjuvant therapy in the high risk early stage cervical cancer patient. Radiation therapy in ovarian cancer. 1st European Winter Oncol Conf. Switzerland.

1989

The role of adjuvant therapy in high risk stage IB cervical cancer patient. Breakfast Education Sessions with Dr. A. Dembo and Dr. F. Stehman. Soc. Gynecol Oncol. 20th Anniversary Meeting. Hawaii.

1989

Progress and controversies in seminoma. Prostate and Testicular Cancer Consensus Conference. Hull, United Kingdom.

1989

1989

1989

Chair. EORTC Consensus Conference on Testicular Seminoma. Prostate and Testicular Cancer Consensus Conference. Hull, United Kingdom.

1988

Princess Margaret Hospital Experience with radiotherapy in advanced locoregional seminoma. Recent advances in the systemic therapy of genitourinary malignancies. MD Anderson Hospital, 31st Annual Clinical Conference.

1988

1988

1988

How much therapy is necessary for low stage seminoma? Berlin, Germany.

1988

1987

1987

1986  Implication for future therapy for carcinoma of the cervix. 4th Annual Cancer Symposium Medical Center of Beaver County. United States.

1986  Radiation therapy for carcinoma of the ovary: The Princess Margaret Hospital Experience. 4th Annual Cancer Symposium Medical Center of Beaver County. United States.

1986  The role of radiation therapy in endometrial carcinoma. 4th Annual Cancer Symposium Medical Center of Beaver County. United States.

1986  Issues in the management of testicular seminoma. Fox Chase Cancer Center, Univ. Pennsylvania Hospital. United States.

1985  The role of radiation in the management of all stages and extent of seminoma. The 2nd Germ Cell Tumour Conf. Leeds, United Kingdom. (Chaired).

1985  Combined modality therapy for carcinoma of the cervix and anal canal. Aachen, Germany.

1983  Carcinoma of the cervix: The Princess Margaret Hospital results. Grand Rounds, Harper-Grace and Wayne State University Hospital. Detroit, United States.

1980  Results of treatment for seminoma: The Princess Margaret Hospital experience. Cambridge University. United Kingdom.

2. NATIONAL

Invited Lectures and Presentations

Presented Abstracts

2010  Palliative Radiotherapy for Cervical Cancer: A systematic review. 31st Annual General meeting, the society of Gynecologic Oncology of Canada. Canada. van Lonkhuijzen L, Thomas G.

2001  New technology on radiation therapy treatment units... Does it make a difference? CARO. Pegler R, Robson S, Danjoux C, Chow E, Franssen E, Thomas G. (poster).
Gillian Monica THOMAS

1999  Impact of new technology on radiation therapy treatment deviations at T-SRCC. CARO. Robson S, Pegler R, Danjoux C, Chow E, Franssen E, **Thomas G.**

1998  Patients with high-risk stage I ovarian carcinoma should receive platinum-based adjuvant chemotherapy. A GOG Educational Symposium. Toronto, Ontario. **Thomas G.**

1996  Whole abdominal radiotherapy alone or preceded by 2 cycles of cisplatin in the post-operative management of ovarian cancer with chemotherapy at time of relapse. Annual Meeting of Royal College of Physicians and Surgeons of Canada. Morton G, Lavery B, **Thomas G**, Ackerman I, Covens A, Osborne R.

1980  **First Author.** Phase I study of metronidazole and misonidazole with conventional RT. Canadian Association of Radiologists. Montreal.

1980  **First Author.** Seminoma of the testes: Results of treatment following orchidectomy and radiation therapy. Cdn Urologic Assoc. Banff, Alberta.

**Lectures and Other Presentations**

1982  The role of radiation in the treatment of cancer of the endometrium. W.W. Cross Institute. Edmonton,

3. PROVINCIAL / REGIONAL

Invited Lectures and Presentations

1987 **Visiting Professor**. Department of Radiation Oncology, University of Western Ontario. London, Ontario.

Lectures and Other Presentations

1995 **Chair**. Measuring the value and counting the cost of palliative radiotherapy - what are our questions? Controversies in Palliative Radiotherapy: Focus on Indications and Fractionation. Toronto, Ontario.

1981 Seminoma: The Princess Margaret Hospital experience. Ontario Cancer Treatment and Research Foundation, Hamilton Centre.

1980 Endometrial cancer: Problems in the study of treatment methods. Symposium on Advances in
Endometrial and Ovarian Carcinoma. Toronto, Ontario.

4. LOCAL

Lectures and Other Presentations

1993  Role surveillance for seminomatous and non-seminomatous germ cell tumours. Urology Update 1993, Continuing Education, Faculty of Medicine, University of Toronto, Department of Surgery, Division of Urology. Toronto, Ontario. (Continuing Education).

1989  Cancer of vulva -- tailored treatment with Dr. P. Bryson, Dr. T. Colgan. Annual Review Course in Obstetrics and Gynecology, University of Toronto.

F. Research Supervision

1. PRIMARY OR CO-SUPervision

Graduate Education

Postgraduate MD

2009 - 2010  Primary Supervisor. Dr. Behzad Banihashemi.
2008 - 2009  Primary Supervisor. Dr. Jennifer Forrest.
2005 - 2006  Primary Supervisor. Dr Marie Claude Beauchemin.
2001  **Primary Supervisor.** Clinical Fellow. Dr Viet Do. *Chronotherapy with chemo radiation in endometrial cancer.*

2000 - 2001  **Primary Supervisor.** Dr. Viet Do.

2000  **Primary Supervisor.** Clinical Fellow. Dr Margot Lehman. *Vaginal Dose Distribution Of two techniques of Brachytherapy in cervical cancer.*

1999 - 2000  **Primary Supervisor.** Dr. Margot Lehman.

1998 Dec  **Primary Supervisor.** Dr. John Boyle.

1998 - 1999  **Primary Supervisor.** Dr. Choan E.

1997 - 1998  **Primary Supervisor.** Dr. Michelle Grogan.

1996  **Primary Supervisor.** Dr. Stephane Laframboise.

1995 - 1996  **Primary Supervisor.** Dr. Vivian von Gruenigen.

1994 - 1995  **Primary Supervisor.** Dr. David Hoegler.

1993 - 1994  **Primary Supervisor.** Dr Clare Faul.

1992 - 1993  **Primary Supervisor.** Dr. Gerard Morton.

1992  **Primary Supervisor.** Dr. Laurie Elit.

1991 - 1992  **Primary Supervisor.** Dr. Bernadette Lavery.

1978 - 1979  **Primary Supervisor.** Dr. Wyman Bethune.

### 2. OTHER SUPERVISION

**Graduate Education**

**Thesis Examiner**

**External (international) Examiner**

2002  **PhD.** Dr E Pras.

1. EDUCATION

Degrees
1977 - 1981    MD, University of Ottawa
1975 - 1977    Undergraduate Year 1 and 2, Faculty of Arts and Science, Western University, London, Ontario, Canada

Postgraduate, Research and Specialty Training
1989           Visiting Research Fellow, Gray Laboratory, Cancer Research Campaign, Mount Vernon Hospital, Northwood, United Kingdom
1985 - 1988    Resident, Radiation Oncology, University of Toronto, Toronto, Ontario, Canada
1982 - 1985    Resident, Internal Medicine, University of Ottawa, Ottawa, Ontario, Canada
1981 - 1982    Intern, St. Michael’s Hospital, Toronto, Ontario, Canada

Qualifications, Certifications and Licenses
1988 - present Fellow, Radiation Oncology, Royal College of Physicians and Surgeons of Canada, Canada
1986 - present Fellow, Internal Medicine, Royal College of Physicians and Surgeons of Canada
1982 - present Fellow, College of Physicians and Surgeons of Ontario
1990           Certificate, Radiation Oncology, American Board of Radiology
1985           Diplomate, American Board of Internal Medicine
1982           Licentiate, Medical Council of Canada (LMCC), Canada
1982           Diplomate, National Board of Medical Examiners, United States
2. EMPLOYMENT

Current Appointments
2008 Jul - present Professor, Radiation Oncology, University of Toronto
2007 - present Associate Director of Clinical Programs, Radiation Medicine Program, Princess Margaret Hospital, University Health Network, Toronto, Ontario, Canada
1990 - present Staff Radiation Oncologist, Princess Margaret Hospital, University Health Network, Toronto, Ontario, Canada

Previous Appointments
HOSPITAL
1998 Clinical Assistant, Department of Radiation Oncology, Princess Margaret Hospital-Ontario Cancer Institute, Toronto, Ontario, Canada
1994 - 1996 Consultant Staff, Medicine, Wellesley Hospital, Toronto, Ontario, Canada

UNIVERSITY - RANK
2000 - 2008 Associate Professor, Radiation Oncology, University of Toronto, Toronto, Ontario, Canada
1994 - 2000 Assistant Professor, Radiation Oncology, University of Toronto, Toronto, Ontario, Canada
1990 - 1993 Lecturer, Radiation Oncology, University of Toronto, Toronto, Ontario, Canada

3. HONOURS AND CAREER AWARDS

Distinctions and Research Awards
INTERNATIONAL
Received
1999 Jul Travel Award, Radiation Research Society, Dublin, Ireland. (Research Award)
For the 11th International Congress of Radiation Research. Total Amount: 730
1998 Apr The International Karl Musshoff Prize, Fourth International Symposium on Hodgkin’s Lymphoma, Cologne, Germany. (Research Award)
Best clinical abstract.

PROVINCIAL / REGIONAL
Received
1989 Goldberg Fellowship, Ontario Cancer Institute, Ontario, Canada. (Research Award)
For Cancer Research.

Teaching and Education Awards
LOCAL
Received
2007 - 2008 Individual Teaching Excellence Award, Dept of Radiation Oncology, Faculty of Medicine, The Wightman-Berris Academy, Mount Sinai and University Health Network Hospitals, University of Toronto, Toronto, Ontario, Canada. (Postgraduate MD, Core Program)
Postgraduate medicine category.
2003 Residents’ award, Dept of Radiation Oncology, Faculty of Medicine, University of Toronto, Toronto, Ontario, Canada. (Postgraduate MD)
4. PROFESSIONAL AFFILIATIONS AND ACTIVITIES

Professional Associations

1999 - present  Member, Canadian Bone Marrow Transplantation Group
1998 - present  Member, American Society of Therapeutic Radiology and Oncology
1992 - present  Member, Canadian Association of Radiation Oncologists
1989 - present  Member, Radiation Research Society
1981 - present  Member, Canadian Medical Protective Association
1981 - present  Member, Ontario Medical Association
1981 - 1985    Member, American College of Physicians

Administrative Activities

INTERNATIONAL

American Board of Radiology
2007 - present  Chair, Written Examination Committee for the Lymphoma-Leukemia category, United States. Responsible for the overall management and question selection for the upcoming Radiation Oncology qualifying examinations, and management of the questions pool.
2004 - present  Member, Written examination Angoff Panel, Lymphoma-Leukemia category, United States. Determination of the pass-fail cutoff for each examination question in the Clinical Oncology examination.

International Union Against Cancer (UICC)
2001 - 2006  Member, Expert Advisory Panel on Skin Tumours, Geneva, Switzerland.

Trans-Tasman Radiation Oncology Group
2006 - present  Member, Trials Management Committee

NATIONAL

Canadian Association of Radiation Oncologists (CARO)
2005 - 2009  Secretary/Treasurer, Executive, Canada.
2005 - 2009  Member, Board of Directors, Canada.
2003 - 2012  Member, Finance and Audit Committee, Canada.
1998 - 2001  Member, Manpower and Standards Committee, Canada.

National Cancer Institute of Canada
2006 - present  Member, Lymphoma Subcommittee, Canada.

Pituitary Tumor Support Network
1996 - 2006  Member, Medical Advisory Committee, Canada.

PROVINCIAL / REGIONAL

Ontario Association of Radiation Oncology
Richard Wing-Chi TSANG

2008 - 2011 Vice Chair, Executive, Ontario, Canada.

C. Academic Profile

1. RESEARCH STATEMENTS

Expert in Radiation Therapy of Hematologic Malignancies.
To study the role of radiation therapy, for early stages of lymphoma, and when given in the setting of bone marrow transplantation.
My research focuses on defining the use of radiation therapy in rare hematologic malignancies, specifically extranodal MALT lymphoma, and solitary plasmacytoma. I have defined the role of radiation therapy through original work in stage I and II MALT lymphomas, which resulted in several peer-reviewed papers (see publications 33, 37, 50, 57). Prior to my work first published in 2001, the role of radiation therapy was not clearly defined in non-gastric stage I/II MALT lymphomas. I have authored and co-authored textbook chapters, and review articles on this subject. I have also lectured extensively on this topic. My research studies on solitary plasmacytoma have refined the factors that determine prognosis in this disease, particularly the importance of tumor bulk. This also resulted in collaborative studies internationally (see publications 35, 60, 62). I have authored and co-authored textbook chapters, and review articles on this subject. I am principal investigator in seven on-going clinical trials of hematologic malignancies at Princess Margaret Hospital, University Health Network.
My work in Hodgkin Lymphoma received recognition at the 4th International Symposium on Hodgkin’s lymphoma with the Karl Musshoff Award for the best clinical abstract (1998). As a result of this work (publication # 26), the clinical practice of administering radiotherapy in Toronto before stem cell transplantation was changed to the post-transplant period. This has become the most common accepted world-wide practice. I have continued with this area of research and have numerous publications in a similar line of work, defining toxicities of total body radiation therapy when given in the setting of stem cell transplantation in patients with lymphoma, and multiple myeloma. Each of these collaborative projects have changed the clinical practice in Toronto (see publications # 15, 20, 29, 34, 43, 44, 51, 52, 67). I have supervised residents and fellows in these areas of research, which had included a recent UICC-funded international technology transfer fellow. I have continued to study innovative ways of applying radiation therapy in difficult and specific situations, e.g. with novel fractionation regimens (publication 61), and conduct clinical trials in radioimmunotherapy, and assessing the role of FDG-PET in lymphoma.

The selective use of Radiation Therapy in Thyroid cancers.
Other research accomplishments include the study of endocrine neoplasm, specifically thyroid cancer (publications #8, 10, 12, 18, 1, 22, 24, 38, 55, 64, 68, 69). Together with my colleague Jim Brierley, we have performed original research in the management of thyroid cancer, including staging, radioactive iodine, and criteria for selection of patients who benefit from external beam radiation therapy. I have authored and co-authored textbook chapters, and review articles on this subject. Other related areas include staging, and policy issues in management of lymphomas and thyroid cancers (publications # 4, 6, 12, 18, 21, 22, 24, 40, 41, 47, 49, 59, 68), and late effects of radiation therapy (publication # 5, 23, 63, 65, 66).
D. Research Funding

1. GRANTS, CONTRACTS AND CLINICAL TRIALS

PEER-REVIEWED GRANTS

FUNDED

2005 - 2008  

2001 - 2003  
Study Chair.

NON-PEER-REVIEWED GRANTS

FUNDED

2002 - present  
Principal Investigator. A randomised multicentre trial of involved field Radiotherapy versus involved field radiotherapy plus chemotherapy for stage I-II low grade follicular lymphoma. Trans-Tasmin Radiation Oncology Group. [Clinical Trials]  
Principal Investigator at PMH/UHN.

1987 - present  
Co-Investigator. A multi-institution, North American prospective database for thyroid cancer. The National Thyroid Cancer Treatment Cooperative Study Group. PI: Sherman, S., Brierley, J. [Clinical Trials]

2007 - 2011  
Principal Investigator. Positron emission tomography for staging and treatment assessment of response in lymphomas, The PET-STAR lymphoma study. Princess Margaret Hospital Foundation. [Clinical Trials]

2007 - 2010  
Principal Investigator. Palliative radiation therapy for malignant lymphomas: A prospective cohort study. GlaxoSmithKline Inc. [Clinical Trials]

2006 - 2012  
Principal Site Investigator. A prospective single arm trial of involved field radiotherapy alone for stage I – II low grade non-gastric marginal zone lymphoma. Trans-Tasmin Radiation Oncology Group. PI: Manus, M. Mac. [Clinical Trials]  
Principal Investigator at PMH/UHN. Trials Management Committee Member.

2005 - 2011  
Principal Investigator. Molecular genetics study of Mucosa-Associated Lymphoid Tissue Lymphomas with fluorescent in-situ hybridization (FISH) technique from archival biopsy specimens. Princess Margaret Hospital Foundation. [Clinical Trials]

2005 - 2009  
Co-Principal Investigator. Spatio-temporal response of Non-Hodgkin’s lymphoma to external beam radiation therapy measuring 2-[18F]Fluoro-2-deoxyglucose (FDG) uptake with a combined PET/CT simulator: A Pilot Study. Princess Margaret Hospital Foundation. PI: Keller, Harry. [Clinical Trials]

2004 - 2006  
Principal Investigator. A single arm, open label, multicentre, phase II study of tositumomab and iodine I 131-tositumomab in subjects with indolent non-Hodgkin’s lymphoma who have
2004 - 2005  **Co-Investigator.** A phase I dosimetry and dose escalation study of lymphorad-131 (LR131; iodine I 131 labeled B-lymphocyte stimulator) in patients with relapsed or refractory multiple myeloma, or following autologous stem cell transplant LR131-MM02, and LR131 MM03. Human Genome Science, Inc. PI: Reece, Donna. [Clinical Trials]

2004 - 2005  **Principal Investigator.** A phase II study evaluating the safety and efficacy of ABT-510 in subjects with refractory lymphoma, Abbott protocol M02-457. Abbott Inc. [Clinical Trials]

2003 - 2004  **Co-Investigator.** Efficacy and safety of subsequent treatment with 90Y-ibritumomab tiuxetan versus no further treatment in patients with stage III or IV follicular non-Hodgkin’s lymphoma having achieved partial or complete remission after first line chemotherapy. A prospective, multicenter, randomized phase III trial. Berlex Canada Inc. PI: Crump, Michael. [Clinical Trials]

2002 - 2003  **Co-Investigator.** A randomized, double-blind, placebo-controlled trial of recombinant human keratinocyte growth factor (rHuKGF) in patients with hematologic malignancies undergoing total body irradiation (TBI) and high-dose chemotherapy with autologous peripheral blood progenitor cell (PBPC) transplantation. Amgen. PI: Keating, Armand. [Clinical Trials]

*Principal Investigator at PMH/UHN.*

1999 - 2000  **Collaborator.** Familial thyroid cancer genetic study. Princess Margaret Hospital. PI: Dr. Tuya Pal, and Dr. Steven Narod. [Clinical Trials]

C. Academic Profile

1. RESEARCH STATEMENTS

2002 Aug - 2013 Jul 1  Research statement:
My research focuses on the development of professional practices under two themes:

1. Treatment guidelines and management of brain metastases
2. Treatment guidelines and management of malignant gliomas.

2. TEACHING PHILOSOPHY

My teaching philosophy has emerged from my experience with outstanding teachers I have had during my training. From their example, I have modeled an approach that captures the following principles:

1) incite interest
2) solidify basic principles
3) clarify difficult topics
4) improve retention of knowledge gained using relevance and repeated exposure to knowledge gained in different
May N. TSAO

settings

From this foundation, I have had the honour of teaching trainees who have later become successful in their own careers.

The following are some specific examples of my significant contributions to undergraduate and postgraduate medical teaching.

Undergraduate Medicine: From July 2008 to June 2013, I served as Undergraduate Medical Education Director, University of Toronto, Department of Radiation Oncology. This involved overseeing all aspects of teaching Radiation Oncology to undergraduate medical students at the University of Toronto, Department of Radiation Oncology. I was responsible for medical student rotations in Radiation Oncology. Yearly annual reports summarizing activities in undergraduate medical education in the Department of Radiation Oncology were provided. I actively participated as the Peters-Boyd Academy Determinants of Community Health II Supervisor and Agency Research supervisor. I am the Transition to Residency supervisor for Radiation Oncology at Odette Cancer Centre. Other significant contributions include supervising and teaching numerous medical students as outlined in my teaching dossier.

Postgraduate Medicine: I have significantly contributed to teaching post graduate trainees as outlined in my teaching dossier. In 2012, I won the Postgraduate Classroom Teaching Award. In 2010, I won the Excellence in Clinical Teaching Award, Department of Radiation Oncology, Residency Program, University of Toronto.

3. CREATIVE PROFESSIONAL ACTIVITIES STATEMENT

My Creative Professional Activity (CPA) is based on contributions to the development of professional practices and is focused on two themes.

Theme 1: Treatment guidelines and management of brain metastases.

This theme also includes meta-analysis, namely critical evaluation and pooling of outcomes in randomized trials for the management of brain metastases to guide practice by evaluating whether a) radiation treatments are associated with beneficial effects and b) the magnitude of these effects.

My CPA has helped define standard evidence-based radiation practice nationally and internationally for patients with brain metastases. This effort has lead to promotion of good clinical practice as an extensive body of medical literature has been thoroughly reviewed, synthesized, combined and analyzed statistically. Recommendations based on levels of evidence have been formulated. The guidelines produced have been accepted nationally [eg. through Cancer Care Ontario (CCO)] and internationally [eg. through the American Society of Therapeutic Radiation Oncology (ASTRO)]. Rigorous external review and extensive practitioner feedback were obtained prior to finalizing these guideline documents. Furthermore, the ASTRO brain metastases guidelines have resulted in an ASTRO self assessment module for Radiation Oncologists and metrics for the ASTRO Radiation Oncology Practice Accreditation Program (ROPA).

Theme 2. Evidence based guidelines on the role of focused radiation (radiosurgery) in the management of malignant gliomas.

My work on the ASTRO evidence-based review on the role of radiosurgery for malignant gliomas is internationally recognized for demonstrating the lack of benefit to the addition of radiosurgery boost in patients with malignant gliomas.

My contribution to the radiation management for malignant gliomas includes our series of patients with primary malignant glioma (glioblastoma). We demonstrated the imaging follow-up phenomenon of “pseudo-progression” where the brain cancer appears larger with more swelling after radiotherapy due to radiation effect rather than true tumour progression. This phenomenon of “pseudo-progression” is now a recognized radiographic pattern. Our findings have altered practice in that maintenance chemotherapy is generally not abandoned on the basis of seemingly worse imaging features identified within the first three months of concurrent radiation and chemotherapy.

H. Creative Professional Activities

1. CONTRIBUTIONS TO THE DEVELOPMENT OF PROFESSIONAL PRACTICES

2002 Aug - 2013 Jul  
Theme 1: Treatment guidelines and management of brain metastases.

The first theme of this CPA is my leadership role in the development of treatment guidelines in the management of brain metastases. Having had formal training in clinical epidemiology as well as clinical expertise in the management of brain metastases, I was able to serve as national and international chair as well as lead author for several papers dealing with treatment guidelines in the management of brain metastases.

These brain metastases guidelines have also resulted in the critical evaluation and pooling of outcomes in randomized trials for the management of brain metastases to guide practice by evaluating whether a) interventions are associated with beneficial effect and b) the magnitude of effect. Whereas medical intervention guidelines aim to guide decisions regarding management, meta-analyses involve statistically combining and contrasting results from different studies generating overall effect sizes and confidence intervals.

Highlights of this work include being chair and/or first author for the following peer-reviewed publications:

1) Cancer Care Ontario guidelines on brain metastases
   I was invited to lead the practice guideline report, Management of Brain Metastases: Role of radiotherapy alone or in combination with other treatment modalities under the auspices of the Supportive Care Guidelines Group and the Neuro-Oncology Disease Site Group for Cancer Care Ontario’s Program in Evidence-based care. This led to recommendations for the use of radiotherapy and surgery for single brain metastasis, radiotherapy for multiple brain metastases, and supportive care in patients with brain metastases. Practitioner feedback was also obtained from this guideline document.

   In recognition for my work with Cancer Care Ontario guidelines in brain metastases and in my involvement with ASTRO’s Health Services Research Committee, I was invited to chair and first-author ASTRO’s radiotherapeutic and surgical management for brain metastasis/es in 2009. The Guidelines Subcommittee of the Clinical Affairs and Quality Committee recruited a Task Group composed of recognized experts in the fields of radiotherapy, surgery and radiosurgery for brain metastases to work on these guidelines, chaired by myself. We formulated novel and useful tables to guide medical practitioners in the management of single or multiple brain metastases depending on prognostic categories and based on the various grades of evidence available.

3) A meta-analysis evaluating stereotactic radiosurgery, whole brain radiotherapy or both for patients presenting with a limited number of newly diagnosed brain metastases. In this paper, aggregate data from published randomized controlled trials comparing the following interventions were studied:
- Whole brain radiotherapy and radiosurgery versus whole brain radiotherapy
- Radiosurgery alone versus whole brain radiotherapy and radiosurgery boost

This was the first published meta-analysis demonstrating no survival advantage among the interventions studied for patients with multiple brain metastases. The use of whole brain radiotherapy improved overall brain control. Radiosurgery alone (a focussed radiation technique used to treat small intracranial tumour targets) improved targeted lesion control when used with whole brain radiotherapy as compared to the strategy of using whole brain radiation alone. The possible advantage of radiosurgery alone was neurocognitive sparing as compared to whole brain radiotherapy.

This very comprehensive systematic review was undertaken to assess the effectiveness and adverse effects of whole brain radiotherapy in adult patients with multiple brain metastases. Randomized controlled trials in which adult patients with multiple metastases to the brain from any primary cancer treated with whole brain radiotherapy were included. Thirty-nine randomized controlled trials involving 10,835 participants were included in the last updated Cochrane review (2012). This publication clarified the benefits, side effects associated with the use of whole brain radiotherapy (alone or in combination with other therapies such as radiosensitizers, chemotherapy or radiosurgery) in the management of brain metastases.

My commitment as a Cochrane Collaboration contributor involved leading and first authoring the first Cochrane systematic review on the use of whole brain radiotherapy for the management of multiple brain metastases (initially published in 2007). This Cochrane Collaboration commitment continues indefinitely as regular updates to the systematic review will be published (last update published in 2012).

1) The Cancer Care Program in Evidence-Based Care provides evidence-based care information for health care providers and the public. This is an internationally recognized guideline development program. The aim is to provide clinicians and policy makers the best scientific evidence to support standard practice and policy decisions. The brain metastases guidelines have defined standard practice across Ontario.

2) The ASTRO evidence based brain metastases guidelines were also endorsed by the American Association of Neurological Surgeons/ Congress of Neurosurgeons. The ASTRO guidelines also resulted in an ASTRO self assessment module for Radiation Oncologists and metrics for the ASTRO Radiation Oncology Practice Accreditation Program (ROPA). This guideline is the under the “Most Read” category for the peer reviewed journal Practical Radiation Oncology and has been highlighted in an ASTRO endorsed webinar and podcast. Based on the Agency for Healthcare Research and Quality, United States Department of Health and Human Services, this ASTRO guideline has had 21,375 page views.

3) The meta-analysis evaluating stereotactic radiotherapy, whole brain radiotherapy or both for patients presenting with a limited number of metastases was recognized by the European Association of Neuro-Oncology as one of the best neuro-oncology papers in 2011 among a select group of papers by researchers around the world. This paper was published in Cancer (impact factor 4.771) in the year 2012.

4) The Cochrane Collaboration is an international network of more than 28 000 people from over 100 countries who work to develop internationally recognized high quality information about the effectiveness of health care. Cochrane Reviews are internationally acknowledged as the highest standard in evidence-based health care. In addition, the Cochrane Database of Systematic Reviews has an impact factor of 5.912 and is ranked in the top 10 out of the 153 journals in the Medicine, General and Internal category. The Cochrane review on whole brain radiotherapy for the treatment of multiple brain metastases provided independent high quality evidence for international health care decision making. Based on Google Scholar, the Cochrane meta-analysis (for which I am first author) has been cited 93 times.
My work in meta-analysis has led to invited collaborations with other peer-reviewed publications relating to lung cancer, bone metastases and psychosocial intervention.

This body of work has defined local, national and international standard of practice in the management of brain metastases. My scholarly activities in this area has led to several book chapters, invited presentations for colleagues and teaching sessions for medical students and residents.

2002 Aug - 2013 Jun 30

Theme 2: Treatment guidelines on the role of focussed radiation (radiosurgery) in the management of malignant gliomas.

The ASTRO evidence-based review on the role of radiosurgery for malignant glioma is internationally recognized for summarizing no benefit to the addition of radiosurgery boost after external beam radiotherapy as compared to external beam radiotherapy in patients with malignant gliomas. Outcomes of interest were overall survival, local control and quality of life.

This work in radiation management for malignant glioma includes our series of patients with primary malignant glioma (glioblastoma). Under my supervision, Dr. Paul Sanghera, a previous clinical fellow published our experience with glioblastoma patients treated with external beam radiotherapy and chemotherapy. We demonstrated the imaging follow-up phenomenon of “pseudo-progression” where the brain cancer appears larger with more swelling after radiotherapy due to radiation effect rather than true tumour progression. Dr. Sanghera is presently an oncology consultant at the Queen Elizabeth Hospital, Birmingham, UK.

ASTRO systematic review on the role of radiosurgery for malignant glioma has highlighted the lack of benefit for the use of radiosurgery boost as the initial management for patients with malignant gliomas. Based on Google Scholar, this publication has been cited 105 times.

The phenomenon of “pseudo-progression” is now a recognized radiographic entity and has also been reported by other independent brain tumour investigators. In our group of patients, a third of patients showed pseudo-progression within the first three months of concurrent radiation and chemotherapy. From these findings, maintenance chemotherapy is generally not discontinued on the basis of seemingly discouraging imaging features identified within the first three months of concurrent radiation and chemotherapy.

C. Research Funding

1. GRANTS, CONTRACTS AND CLINICAL TRIALS

PEER-REVIEWED GRANTS

FUNDED
The overall goal of the NCTN Program is to “conduct definitive, randomized, late phase clinical treatment trials and advanced imaging trials across a broad range of diseases and diverse patient populations, as well as development efforts preliminary to those trials, as part of the NCIC’s overall clinical research program for adults and children with cancer.” The mission of the NCIC CTG is “to develop and conduct clinical trials aimed at improving the treatment and prevention of cancer with the ultimate goal of reducing
morbidity and mortality from this disease.” The overlaps of these goals create a rationale for a Canadian Collaborating Clinical Trials Network. This rationale is further supported by similar societal expectations by Canadians and Americans for improved health outcomes and similar respective strategic priorities of NCIC CTG and the NCTN that recognize that new understandings of the molecular basis of carcinogenesis have the potential to advance health care delivery, including through improved therapeutic targeting of the cancer cell and better identification of therapies for individual patients. The specific objectives of this grant are for NCIC CTG to collaborate with NCI/CTEP and US-based groups, through its newly-formed National Clinical Trials Network Program, to develop new Intergroup trials under NCIC CTG leadership and to ensure more rapid accrual to trials led by US-based groups, to enhance the scientific content of these trials through evaluation of additional endpoints and to contribute to new understandings of clinical trial methodology and analysis. This aim is facilitated by NCIC CTG’s unique information technology supports and understandings of the Canadian regulatory environment. The aims of this application are to facilitate Canadian leadership of NCTN trials that represent value from the perspective of expenditure of U.S. federal dollars and to conduct U.S.-led NCTN trials in Canada.

2010 Aug - 2015 Jul

The purpose of this grant is to provide core programmatic funding for the NCIC Clinical Trials Group to engage in a wide range of multicenter trials in Canada. It helps provide infrastructure support to the CTG to fund highly qualified faculty and other personnel through which trials are developed and conducted in Canada.

2010 Jul - 2015 Jun

Precis: The mission of the NCIC Clinical Trials Group (CTG) is to develop and conduct clinical trials aimed at improving the treatment and prevention of cancer with the ultimate goal of reducing morbidity and mortality from this disease. Trials addressing treatment strategies include testing hypotheses that may prevent, be curative, prolong survival, and/or improve quality of life.

2010 Jul - 2014 Jun

Co-Investigator. A phase III study comparing the proportion of lung cancer patients with symptomatic and quality of life improvements receiving external beam radiation with or

Precis: Non-small cell lung cancer (NSCLC) remains the single leading cause of cancer mortality in Canada. Most patients present with disease advanced beyond that amendable to surgery or other potentially curative interventions, and many patients are treated with external beam radiation (EBR) to improve their underlying symptoms of thoracic disease. But the success of EBR treatment and duration of benefit is limited. From uncontrolled studies, the addition of High Dose Rate Brachytherapy (HDRIB) appears to have the potential to improve the symptomatic benefit achieved by patients by delivering an additional dose of radiation to the epicenter of the luminal disease without significant additional toxicity.

We are proposing to conduct a multi-centered phase III randomized trial of EBR alone (20 Gy/5fractions) versus the same EBR followed by HDRIB (14Gy/2 fractions) in patient subjects with thoracic symptoms of advanced stage, or recurrent NSCLC, that have documented luminal disease and that would otherwise be candidates for EBR alone. Two hundred and fifty subjects will be accrued over a 3 year period.

The primary outcome of the study is the proportion of subject that demonstrate an improvement in the summary question of "lung cancer symptoms" (question 7) of the Lung Cancer Symptom Scale (LCSS) at six weeks following randomization as defined by a 10-point or more improvement on a 100-point scale. Secondary outcomes will include individual symptom scores, quality of life (QOL) as measured by the complete LCSS, symptom progression free survival, overall survival, cost effectiveness, and cost utility.

Our hypothesis is that HDRIB in addition to EBR will provide greater local tumour control compared to EBR alone and will result in improved symptom control and QOL for patients with advanced NSCLC that have luminal disease.

2008 Aug - 2014 Feb Co-Investigator. Canadian contribution to NCI Intergroup Program. National Institute of HealthNational Cancer Institute (NIH/N. PI: Eisenhauer, Elizabeth. 5,813,781 CAD. [Grants] The goal of this grant is to enable collaborative clinical trial conduct between Canada and the US by permitting Canadian contributions to recruitment to US Cooperative group clinical trials and to enable Canadian-led trials with US Cooperative Group involvement to be developed and conducted.

2006 - 2008 Steering Committee Member. Accelerated hypofractionated 3-dimensional conformal radiotherapy (3DCRT) for inoperable Stage I/II non-small cell lung cancer (NSCLC). National Cancer Institute of Canada (NCIC). [Clinical Trials] $3000 per case funding.

Precis: The goal of this award was to a clinicopathological correlation study of PET CT
images with the final resected pathological specimen in patients undergoing surgical resection as a companion clinical trial to the PET START trial. This study was to evaluate the accuracy of PET CT with the final pathological specimen with applications to targeting by radiation therapy.

Precis: The goal of this award was to develop an effective multi-disciplinary team approach for lung cancer patients that involved a structured multi-disciplinary clinic, satellite clinics in a community hospital and a multi-institutional and multi-disciplinary tumor board to facilitate timely referrals and reduce patient wait times for evaluation and treatment.

Precis: The goal of this award was to continue longterm followup for patients on the ELPET trial to determine whether PET standardized uptake values have any prognostic implications in early stage non-small cell lung cancer.

Precis: The goal of this award was to see if a system redesign for patient referrals with suspected lung cancer could reduce the time to referral, time to diagnostic tests and time to consultation with lung cancer specialists for lung cancer patients.

2004 Jul - 2008 Jun  Principal Investigator. The impact of Positron Emission Tomography (PET) imaging in staging potentially surgically resectable non-small cell lung cancers: A prospective, multicenter randomized clinical trial. Ontario Clinical Oncology Group (OCOG) and the Ontario Ministry of Health and Long-term Care. [Clinical Trials] $1250 per case funding; (ELPET Steering Committee Member).

2004 Jul - 2008 Jun  Principal Investigator. A Phase III trial of Cisplatin/Etoposide/Radiotherapy with consolidation Docetaxel followed by maintenance therapy with ZD 1839 or placebo in patients with inoperable locally advanced Stage III non-small cell lung cancer. National Cancer Institute of Canada (NCIC). [Clinical Trials] $3000 per case funding; (NCIC CTG BR 15 Canadian Study Chair).

2003 - 2006  Principal Site Investigator. A Phase II study of ZD6474 or placebo in small cell lung cancer patients who have complete or partial response to induction chemotherapy ± radiation therapy. National Cancer Institute of Canada (NCIC). [Clinical Trials] $3000 per case funding; (Odette Cancer Centre PI).

2002 Jul - 2004 Jun  Collaborator. The appropriateness of colorectal cancer treatment in Ontario. Canadian

[Grants]

Precis: The goal of this award was to evaluate the appropriateness of colorectal cancer management in colorectal cancer patients in the province of Ontario. This was done by setting up appropriateness criteria and doing chart reviews.

2000 Jul - 2001 Jun

Precis: The goal of this award was to test the hypothesis that gamma camera coincidence imaging (i.e. positron emission tomography) coregistered with CT for radiation treatment planning in locally advanced non-small cell lung cancer would be superior to CT based planning alone using dose volume histogram analysis for target coverage and normal tissue constraints for lung, heart and spinal cord.

NON-PEER-REVIEWED GRANTS

FUNDED

2012 Jul - 2013 Jun

Principal Investigator. A randomized double blind phase 2 dose ranging study to evaluate the safety and efficacy of Veliparib and whole brain radiation therapy versus placebo and whole brain radiation therapy in subjects with brain metastases from non-small cell lung cancer. [Clinical Trials]

2012 Jul - 2013 Jun

Principal Investigator. Randomized double blind, multicenter phase 2 trial comparing Veliparib plus carboplatin and paclitaxel versus placebo plus carboplatin and paclitaxel in previously untreated metastatic or advanced non-small cell lung cancer (NSCLC). [Clinical Trials]

1999 Jul - 2000 Jun

Precis: The goal of this award was to evaluate the impact of integrating pet images with CT planning in lung cancer patients.

1998

Precis: The goal of this award was to evaluate the impact of combing pet imaging to radiation treatment planning in lung cancer.

1997 Jul - 1998 Jun

Precis: The goal of this award was to test the hypothesis that electron arc radiation therapy was superior to either a direct electron field or a photon field arrangement for treating the chest wall in postmastectomy breast cancer patients by using dose volume histogram analysis of normal tissue constraints for lung, heart and the clinical target volume.
D. Publications

1. MOST SIGNIFICANT PUBLICATIONS

   We showed that it was possible to enroll palliative lung patients on a placebo controlled randomized clinical trial that would involve having daily injections of saline (placebo) versus erythropoietin and to measure symptom control outcomes.

   This PET guideline was a thorough systematic review of the role of PET in lung cancer. It highlighted the best available data to guide practitioners in the clinical utility of PET and also showed areas where data is lacking or not of sufficient quality to make definitive conclusion regarding the role for PET.

   This guideline on HDR was a thorough evaluation of the role of HDR brachytherapy for symptom control. Randomized clinical trials are very difficult to do comparing different methods for palliation of symptomatic endobronchial disease and in fact, one attempted randomized trial closed due to lack of accrual. This guideline was an important summary of best available evidence to guide practitioners in the use of HDR brachytherapy.

   This guideline was thorough review of the role for radiation in malignant pleural mesothelioma. There is a paucity of randomized clinical trials involving the use of radiation therapy for mesothelioma and this guideline served as a useful guide for practitioners in this area.

   As the clinical principal investigator, this paper was the first to rigorously evaluate the impact of gamma camera coincidence imaging/PET on changing management intent from radical to palliative and its impact on radiation treatment planning with dose volume histogram analysis.

1. RESEARCH STATEMENTS

2016 Research. Dr Vesprini is a radiation oncologist at the Sunnybrook Odette Cancer Centre and a member of the SBRT team. He is the site Lead for the multicentre phase II/III randomized PCS IX trial comparing ADT + enzalutamide +/- SBRT for oligometastatic disease. He is also the prostate site group lead for the Cancer Ablative Therapy (CAT) program at Sunnybrook and a member of the MR Linac Atlantic Consortium which is developing a SBRT protocol for prostate cancer. He is co-PI/co-Investigator on multiple biomarker studies focused on predicting radiation response and prognosis.

1990 - 1993 Resident, Radiation Oncology, Princess Margaret Hospital, University of Toronto
1988 - 1990 Resident, Internal Medicine, Royal Victoria Hospital, McGill University, Montreal, Canada
1984 Jan - 1986 Jun Graduate Student, Neurophysiology, Physiology, Queen’s University at Kingston,
Supervisor(s): Peter Zarzecki
1983 - 1984 Student Researcher (seven months), Orthopedic Surgery, Laboratory for Experimental
Surgery, International Association for Exchange of Students for Technical Experience
(I.A.E.S.T.E.), Davos-Platz, Switzerland

Qualifications, Certifications and Licenses
2009 Aug University Health Network Principles of Clinical Research Practice, ESTRO PIC Meeting
Teaching Course, Toronto
2008 Nov - 2009 May Rotman Health Care Leadership Development Program, Rotman School of Management, University of Toronto
2002 Sep Technological Advances in Radiation Oncology, ESTRO PIC Meeting Teaching Course
1999 Aug Acusim (CT Simulator) Fellowship, University of Chicago
1999 Jun Future Directions in Radiation Oncology (CME course), University of Toronto
1997 Jan Integrating the Internet into Clinical Practice (CME course), University of Toronto
1996 Nov Translating Physics into Clinic Practice (CME course), University of Toronto
1996 May Radionics Stereotactic Radiotherapy Course, Boston
1996 Apr - 1996 May Cancer Pain Management Course, Princess Margaret Cancer Centre, Toronto
1994 Nov Medical Presentation Skills Workshop (CME course), University of Toronto
1994 Aug Teaching in Small Groups & One on One Teaching (CME course), University of Toronto
1994 May Clinical Aspects of Radiation Biology (CME course), University of Toronto
1993 Fellow (FRCPC), Radiation Oncology, Royal College of Physicians and Surgeons of Canada
1988 Licentiate (LMCC), Medical Council of Canada

2. EMPLOYMENT

Current Appointments

2005 - present Cross Appointment Staff, Surgery, Otolaryngology, Faculty of Medicine, Princess Margaret Hospital, University Health Network
2000 Jul - present Assistant Professor, Radiation Oncology, Faculty of Medicine, University of Toronto

Previous Appointments

HOSPITAL
1994 - 2000 Lecturer, Radiation Oncology, Faculty of Medicine, Princess Margaret Hospital, University Health Network

UNIVERSITY - RANK
1994 - 2000 Lecturer, Radiation Oncology, University of Toronto

3. HONOURS AND CAREER AWARDS

Distinctions and Research Awards

PROVINCIAL / REGIONAL
Received
1979 Ontario Scholarship. (Distinction)

LOCAL
Received
1993 - 1994 George Knudson Fellowship in Cancer Research, Ontario Cancer Institute/Princess Margaret Hospital, Toronto. (Research Award)
1985 Queen’s Graduate Scholarship, Queen’s University at Kingston. (Distinction)
1984 Queen’s Graduate Scholarship, Queen’s University at Kingston. (Distinction)

Nominated
2014 Jun - present Gerald Kirsh Humanitarian Award, Princess Margaret Cancer Foundation. (Distinction)
*For outstanding commitment to compassionate care.*
Teaching and Education Awards

LOCAL

Received

2009 May  Best Radiation Medicine Program Rounds, Dept of Radiation Oncology, Faculty of Medicine, Princess Margaret Cancer Center. (Multilevel Education, Specialty: Radiation Oncology)

2003 Jul - 2004 Jun  Chief's Choice Best Rounds, Dept of Radiation Oncology, Faculty of Medicine, Princess Margaret Cancer Center. (Specialty: Radiation Oncology)

4. PROFESSIONAL AFFILIATIONS AND ACTIVITIES

Professional Associations

1993 Jul - present  Member, Ontario Medical Association

1993 Jul - present  Fellow, Royal College of Physicians and Surgeons of Canada

1989 - present  Member, Canadian Association of Radiation Oncologists (CARO)

1989 - 1991  Member, American Society for Therapeutic Radiology and Oncology (ASTRO)

Administrative Activities

INTERNATIONAL

National Cancer Institute

2012 - present  Member, Head and Neck Steering Committee

2007 - 2012  Co-Chair, Head and Neck Tumor Biology and Imaging Task Force

NATIONAL

National Cancer Institute of Canada/Clinical Trials Group

2014 - present  Chair, Head and Neck Working Group, Canada.

2006 - 2014  Member, Head and Neck Working Group

PROVINCIAL / REGIONAL

Cancer Care Ontario

2011 - present  Member, Head and Neck Community of Practice

2007 - present  Member, Head and Neck Cancer Treatment Standards Group

Princess Margaret Cancer Center

Member, Wharton Day Organizing Committee

LOCAL

Other Organizations

1995  Member, Radiation Services Information Systems (RSIS) Committee

Princess Margaret Cancer Center
John Nicholas WALDRON

2014 Jun - present  Member, Radiation Medicine Program Capital Executive Committee
2014 Mar - present  Member, Radiation Medicine Program Space Transformation Committee
2013 - present  Member, Radiation Medicine Program Clinical Protocol Review Committee
2011 Jul - present  Executive, Head and Neck Translational Research Committee, Canada.
2011 Jul - present  Executive, Head and Neck Tissue Committee, Canada.
2008 Jan - 2009 Jan  Chair, Radiation Oncology Partnership
2007 Jul 11 - 2007 Sep 23  Member, Search Committee Head Dental Oncology
1997  Member, Radiation Medicine Program Accreditation Committee

Princess Margaret Cancer Centre
2006 - present  Site Group Leader, Radiation Medicine Program Head and Neck Site Group
2006 - 2010  Member, External Beam Process Committee, Radiation Medicine Program
2005 - 2006  Co-Chair, Radiation Medicine Program, Molecular Imaging Research Group
1997  Member, Medical Advisory Committee, In-Patient Services Committee
1996 - 2004  Director, Radiation Medicine Program Inpatient Services
1996 - 1997  Chair, Department of Radiation Oncology Digital Information Group (DIG)

University Health Network
2013 - 2014  President, (President) UHN Medical Staff Association, Toronto, Canada.
2013 - 2014  President, (President) UHN Medical Staff Association, Toronto, Canada.
2012 - 2013  Member, Research Committee UHN Board of Trustees, Faculty of Medicine, Dept of Radiation Oncology, Toronto, Canada.
2011 - 2013  Member, UHN Medical Advisory Committee, Faculty of Medicine, Dept of Radiation Oncology, Toronto, Ontario, Canada.
2011 - 2013  Member, UHN Board of Trustees
2011 - 2013  Member, Finance and Audit Committee UHN Board of Trustees
2011 - 2012  Vice President, UHN Medical Staff Association, Toronto, Ontario, Canada.
2010  Treasurer, UHN Medical Staff Association
2004 - 2008  Member, Research Ethics Board
2004 - 2007  Member, Electronic Health Records Clinical Advisory Committee
Member, MSH UHN Academic MO

University of Toronto
1996 - 1997  Member, Department of Radiation Oncology Accreditation Committee

STRATEGIC RETREAT

*Break out session to address the question: How do we develop, evaluate and approve concepts and take these to a stage of trial activation?*

C. Academic Profile

1. CREATIVE PROFESSIONAL ACTIVITIES STATEMENT

My Creative Professional Activities have predominantly been within the sub specialty of head and neck cancer management.

1) Professional Innovation and Creative Excellence. In this discipline I have demonstrated professional innovation and creative excellence through clinical trials leadership, education and mentoring.

Examples of clinical trials leadership include the following:

- The National Cancer Institute of Canada Clinical Trials Group (NCIC CTG) HN6 study (Waldron co-PI) served to promote and facilitate the introduction of advanced radiotherapy techniques (IMRT) for the management of head and neck cancer in Canada. At time this study opened many Canadian centers were not routinely using IMRT to manage these patients and this study, by providing detailed radiation planning and treatment guidelines, served to stimulate the adoption of this technology now considered a clinical standard of care. In addition this study has served to consolidate the Canadian national Head and Neck Oncology community by stimulating participation of 17 cancer centers from across Canada to enroll 320 patients and as such has been the largest prospective clinical trial of head and neck cancer ever mounted in Canada.

- The Ontario Clinical Oncology Group (OCOG) study PET PREVENT (Waldron PI) prospectively enrolled over 400 head and neck cancer patients at four Ontario centers. The study which examined the role of PET scanning in treatment decision making was the largest prospective PET study ever mounted in head and neck cancer and led to an oral presentation of results at ASCO. My work in PET imaging resulted in an invitation to write an editorial for the Journal of Clinical Oncology.

- The National Research Group (NRG formerly RTOG) study HN002 (Waldron Canadian PI) will shortly open in North America. This is the first study to examine de-intensification of treatment in patients with favourable risk HPV related oropharyngeal cancer (OPC) and represents a significant paradigm shift in head and neck cancer management. The design of HN002 has been significantly influenced by data published by the PMH Head and Neck site group that was the first to describe a favourable prognosis for a large number of HPV positive OPC patients treated with radiotherapy only.

Examples of Education and Mentoring include:

- The leadership and development of numerous detailed and comprehensive multi-day head and neck IMRT and IGRT CME events delivered to national and international audiences.

- Mentoring in head and neck radiation oncology both on site and with site visits to other provincial and national head and neck cancer programs.

2) Contributions to the Development of Professional Practice

I have provided numerous contributions to the development of professional practice through local, national and
international leadership positions.
• Locally I have served as leader of the PMH Radiation Medicine Program Head and Neck Site Group (PMH HNSG) since 2006. In this capacity I have been responsible for overseeing the clinical, research and teaching activities of this group. The PMH HNSG consists of 8 Radiation Oncologists, 3 Clinical Physicists, 7 Treatment Planners and numerous Radiation Therapists. This group is the largest of its kind in North America and manages over 500 head and neck cancer patients annually. We have developed and delivered multiple CME courses on advanced radiotherapeutic management (IMRT, IGRT) of head and neck cancer to the national and international community. We have also achieved global impact through our head and neck radiation oncology fellowship program which has trained over 30 national and international fellows. We have developed comprehensive treatment guidelines which have been shared with members of the national and international community. The site group was the first at PMH to introduce an anthology of outcomes for our patient population by prospectively collecting patient data and outcomes at the point of care since 2003. This data set which now contains over 7500 patients has served to facilitate multiple research projects and quality assurance monitoring. Recent supplements to this have included the addition of prospectively collected head and neck patient reported outcomes (a National first) and links to biospecimen repositories.
I have had a number of leadership roles in the Provincial, National and International Head and Neck Oncology Community.

Provincially
• I have been a member of the CCO Evidenced Based Guidelines Committee and Head and Neck Community of Practice
• Principal author of the radiotherapy section of the CCO guidelines document for the management of head and neck cancer in Ontario.
• Led the development of provincial guidelines for the testing for HPV in OPC.

Nationally
• Present co-chair of the NCI (Canada) Clinical Trials Group Head and Neck Working Group. In charge of the development and implementation of head and neck clinical trials run through NCIC CTG.

Internationally
• I am on the ASTRO committee charged with the development of guidelines for the management of OPC.
• National Cancer Institute (US) Head and Neck Steering Committee. This committee consists of North American thought leaders in Head and Neck Cancer and is charged with reviewing and evaluating the major cooperative group clinical trial concepts. I am one of only three Canadian members.
• Co-authored a consensus document resulting from in an NCI clinical trials planning meeting to develop clinical trials for the investigation of trans-oral surgery for the management of OPC.
• Co-chaired the NCI Head and Neck Tumor Biology and Imaging Task Force which reviewed the biology and imaging components of trials prior to advancement to the Steering committee for final evaluation.

I have participated in leadership positions within the University Health Network. Specifically I was elected Vice President of the UHN Medical Staff Association advancing to President in my final year. In this capacity I represented the interests of over 800 fulltime dental and medical staff on the UHN Board of Trustees, the Medical Advisory Committee and the Finance and Audit and Research Committees of the Board.

3) Exemplary Professional Practice

I have demonstrated exemplary professional practice as indicated by the leadership positions I have held and the standards of practice I have helped develop and disseminate. I have been regarded by colleagues as a competent and fair leader. Colleagues have sought out my assistance in mentoring head and neck radiation oncology practice at centers within and beyond the province. I have been invited to be an external reviewer of the Head and Neck Oncology Program at the University of Alberta.
D. Research Funding

1. GRANTS, CONTRACTS AND CLINICAL TRIALS

PEER-REVIEWED GRANTS

Funded

Project Number: 3.

NON-PEER-REVIEWED GRANTS

Funded

A collaborative study involving radiation biology (Hill RP), radiation oncology (O’Sullivan B), surgical oncology (Bell R) and cellular transplantation therapy (A. Keating) at the Ontario Cancer Institute / Princess Margaret Hospital, University of Toronto.

Collaborators include experts in head and neck and limb surgery (Gullane P, Wunder J, Bell R, Neligan P), clinical and experimental radiation oncology (O’Sullivan B and Waldron J) and cellular transplantation techniques developed from bone marrow transplantation adapted to mesenchymal cell therapy (Keating A, medical and hematology oncology). Other collaborators on this Grant include expertise in interpretation of mesenchymal tissue and wound pathology (Kandel R), vascularity of healing tissue (Pang C), the use of viral transfection to provide markers for tracking transplanted cells (Sandhu K) and the development of valid instruments for measuring relevant clinical outcomes following surgery and radiotherapy (Davis A).

1. INTERNATIONAL

Invited Lectures and Presentations

2004 Nov 19 Quality assurance rounds for head and neck cancer patients managed with radiation therapy are an important aspect of risk management. UICC Meeting of International Cancer Societies. Dublin, Ireland.

**Presented Abstracts**

2015 Feb 11  **Speaker.** ‘Cure’ is a realistic goal in HPV-related oropharyngeal cancer with oligometastasis. 5 TH ICHNO International conference on innovative approaches in head and neck oncology. Nice, France. Presenter(s): S. Huang, **J. Waldron**, W. Xu, J. Ringash, A. Bayley, A. Hope, J. Kim, J. Cho, M. Giuliani, B. O’Sullivan.

2014 Jul  Changing mortality profile in long term follow-up of a randomized trial for locally advanced head and neck cancer. 5th World Congress of IFHNOS & Annual Meeting of the AHNS. New York.

2011 Jun  **Presenter.** Results of an Ontario Clinical Oncology Group (OCOG) prospective cohort study on the use of FDG PET/CT to predict the need for neck dissection following radiation therapy of head and neck cancer (HNC). ASCO. Chicago.
Identification of Metadherin as a Novel Target of MIR-375 in Nasopharyngeal and Head and Neck Squamous Cancers. 102nd Annual Association for Cancer Research. Orlando.

Comparative predictive value of E6 mRNA vs. HPV 16 ISH for human oropharyngeal carcinoma. 100th Annual American Association for Cancer Research Meeting. Denver, Colorado.

Carcinoma of the Tonsillar Region: The Influence of prognostic factors and technique in 335 T1 And T2 cases treated with external beam radiotherapy. 4th International Conference on Head and Neck Cancer.
John Nicholas WALDRON

Toronto.

**Presented and Published Abstracts**

2016 Apr 29  **Invited Speaker.** The prognostication of tumor volume and lower neck lymph nodes in laryngeal cancer treated with IMRT. Poster (PO-0631). 2016 European Society for Therapeutic Radiology and Oncology (ESTRO) Annual Meeting. Turin, Italy. Presenter(s): Huang SH.

**Publication Details:**

2013 Apr  Head & Neck Cancer: Setting the Stage. IGRT Education Course, Princess Margaret Cancer Centre. Toronto. ~25-30 radiation oncologists, radiation therapists, medical physicists, and industry representatives from PMH and around the world. (Continuing Education).

2013 Apr  Issues in Radical Radiotherapy for Head & Neck Cancer. IGRT Education Course, Princess Margaret Cancer Centre. Toronto. ~25-30 radiation oncologists, radiation therapists, medical physicists, and industry representatives from PMH and around the world. (Continuing Education).

2013 Apr  Vignette: Early-Stage Larynx Cancer IGRT Lessons Learned. IGRT Education Course, Princess Margaret Cancer Centre. Toronto. ~25-30 radiation oncologists, radiation therapists, medical physicists, and industry representatives from PMH and around the world. (Continuing Education).

2013 Apr  Moving Mountains. IGRT Education Course, Princess Margaret Cancer Centre. Toronto. ~25-30 radiation oncologists, radiation therapists, medical physicists, and industry representatives from PMH and around the world. (Continuing Education).

2013 Feb  **Presenter and Invited Speaker.** Head and Neck Site Group’s Perspective on Achieving Quality and Safety. RMP Quality Rounds, Princess Margaret Cancer Centre. Toronto.

2012 Mar  Head & Neck Cancer: Setting the Stage. IGRT Education Course, Princess Margaret Cancer Centre. Toronto. ~25-30 radiation oncologists, radiation therapists, medical physicists, and industry representatives from PMH and around the world. (Continuing Education).

2012 Mar  General Principles of Head & Neck Cancer Management. IGRT Education Course, Princess Margaret Cancer Centre. Toronto. ~25-30 radiation oncologists, radiation therapists, medical physicists, and industry representatives from PMH and around the world. (Continuing Education).

2012 Mar  Issues in Radical Radiotherapy for Head & Neck Cancer. IGRT Education Course, Princess Margaret Cancer Centre. Toronto. ~25-30 radiation oncologists, radiation therapists, medical physicists, and industry representatives from PMH and around the world. (Continuing Education).

2012 Mar  Vignette: Early-Stage Larynx Cancer IGRT Lessons Learned. IGRT Education Course, Princess Margaret Cancer Centre. Toronto. ~25-30 radiation oncologists, radiation therapists, medical physicists, and industry representatives from PMH and around the world. (Continuing Education).

2012 Mar  Patient Reported Outcomes: Listening to Our Patients. IGRT Education Course, Princess Margaret Cancer Centre. Toronto. ~25-30 radiation oncologists, radiation therapists, medical physicists, and industry representatives from PMH and around the world. (Continuing Education).

2011 Nov  **Panel Chair.** Listening to our Patients. Annual Wharton/Elia Day, Princess Margaret Hospital. Toronto.

2011 Apr  IGRT for Head and Neck Cancer. IGRT Education Course, Princess Margaret Cancer Centre. Toronto. ~25-30 radiation oncologists, radiation therapists, medical physicists, and industry representatives from PMH and around the world. (Continuing Education).

2010 Oct  IGRT for Head and Neck Cancer. IGRT Education Course, Princess Margaret Cancer Centre. Toronto. 
~25-30 radiation oncologists, radiation therapists, medical physicists, and industry representatives from PMH and around the world. (Continuing Education).

2010 Apr  IGRT for Head and Neck Cancer. IGRT Education Course, Princess Margaret Cancer Centre. Toronto. 
~25-30 radiation oncologists, radiation therapists, medical physicists, and industry representatives from PMH and around the world. (Continuing Education).

2009 Nov  IGRT for Head and Neck Cancer. IGRT Education Course, Princess Margaret Cancer Centre. Toronto. 
~25-30 radiation oncologists, radiation therapists, medical physicists, and industry representatives from PMH and around the world. (Continuing Education).

2009 Jun  Panel Member. EGFR and Beyond. Annual Wharton Day, Princess Margaret Hospital. Toronto.

2009 Apr  Group Exercise - IMRT Urban Legends. IGRT Education Course, Princess Margaret Cancer Centre. Toronto. ~25-30 radiation oncologists, radiation therapists, medical physicists, and industry representatives from PMH and around the world. (Continuing Education).

2008 Oct  IGRT for Head and Neck Cancer. IGRT Education Course, Princess Margaret Cancer Centre. Toronto. 
~25-30 radiation oncologists, radiation therapists, medical physicists, and industry representatives from PMH and around the world. (Continuing Education).

2008 Apr  IGRT for Head and Neck Cancer. IGRT Education Course, Princess Margaret Cancer Centre. Toronto. 
~25-30 radiation oncologists, radiation therapists, medical physicists, and industry representatives from PMH and around the world. (Continuing Education).

2008 Jan  IGRT for Head and Neck Cancer. IGRT Education Course, Princess Margaret Cancer Centre. Toronto. 
~25-30 radiation oncologists, radiation therapists, medical physicists, and industry representatives from PMH and around the world. (Continuing Education).

2007 Nov  New Information Reforming Clinical Practice. IGRT Education Course, Princess Margaret Cancer Centre. Toronto. ~25-30 radiation oncologists, radiation therapists, medical physicists, and industry representatives from PMH and around the world. (Continuing Education).

2007 Nov  IGRT for Head and Neck Cancer. IGRT Education Course, Princess Margaret Cancer Centre. Toronto. 
~25-30 radiation oncologists, radiation therapists, medical physicists, and industry representatives from PMH and around the world. (Continuing Education).

2007 Sep  IGRT for Head and Neck Cancer. IGRT Education Course, Princess Margaret Cancer Centre. Toronto. 
~25-30 radiation oncologists, radiation therapists, medical physicists, and industry representatives from
PMH and around the world. (Continuing Education).

2007 Sep
New Information Reforming Clinical Practice. IGRT Education Course, Princess Margaret Cancer Centre. Toronto. ~25-30 radiation oncologists, radiation therapists, medical physicists, and industry representatives from PMH and around the world. (Continuing Education).

2007 Jun 8
Molecular Targeted Agents in Radiotherapy Future Options. Wharton Day, Princess Margaret Hospital.

2007 Jun
IGRT for Head and Neck Cancer. IGRT Education Course, Princess Margaret Cancer Centre. Toronto. ~25-30 radiation oncologists, radiation therapists, medical physicists, and industry representatives from PMH and around the world. (Continuing Education).

2006 Jun 8
This House Believes that Molecular Therapies will substantially Improve the Therapeutic Index for Head and Neck Cancer Patients. Wharton Day "Improving Outcomes in Head and Neck Cancer". Toronto.

2005 Apr 2
The Science and Management of Radiation Late Effects. University of Toronto Department of Radiation Oncology - The Kingbridge Centre. King City, Ontario.

2002 Jun

2000 Jun
Clinical Experience with Stereotactic Radiation Therapy for Head and Neck Cancer at PMH. 2nd Annual Wharton Day, Princess Margaret Hospital.

1999 Jun
Conformal Therapy in CNS Cancer. University of Toronto CME Course. (Continuing Education).

1999 Jun
Conformal Therapy for Head and Neck Cancer: Workshop. University of Toronto CME Course. (Continuing Education).

1997 Oct 29
Studies of Radiation Sensitivity in Fibroblasts from Patients Receiving Radiation Therapy. Department of Otolaryngology Basic Science Research Meeting, University of Toronto.

1995 Nov 2
Invited Speaker. What’s New in Palliative Radiation Oncology? Scarborough Palliative Care Team Rounds Scarborough General Hospital. Scarborough.

1995 May 2

Presented and Published Abstracts

2015 Sep 8  Speaker. OUTCOME FOLLOWING DEFINITIVE RADIOThERAPY FOR SQUAMOUS CELL CARCINOMA OF THE NASAL VESTIBULE. CARO 2015. 29th Annual Scientific Meeting. British Columbia, Canada. Presenter(s): Ibrahim Atean, Shao Hui Huang, John Waldron, Yuyao Song, Wei Xu, Andrew Bayley, Scott Bratman, Meredith Giuliani, Andrew Hope, John Kim, Jolie Ringash, Jonathan Irish, Brian O’Sullivan.

Publication Details:
OUTCOME FOLLOWING DEFINITIVE RADIOThERAPY FOR SQUAMOUS CELL CARCINOMA OF THE NASAL VESTIBULE. 2015 Sep 8. Coauthor or Collaborator.

2011 Jun Results of an Ontario Clinical Oncology Group (OCOG) prospective cohort study on the use of FDG PET/CT to predict the need for neck dissection following radiation therapy of head and neck cancer (HNC).

Publication Details:

2009 Jul The role of FDG PET/CT in clinical decision making for the management of oral cancer.

Publication Details:

2009 Feb Patterns of care in elderly head and neck cancer patients: the recent PMH experience.

Publication Details:

2008 Sep Quality of Life in Patients with Nasopharyngeal Carcinoma after Intensity-Modulated Radiation Therapy.

Publication Details:

2008 Sep Delivery of Less Than Intended Cisplatin (CDDP) Dose Intensity in Patients with Locally Advanced Head and Neck Squamous Cell Carcinoma (LA-HNSCC) Receiving Concurrent Chemoradiation (CRT) Correlates with Poorer Outcome.

Publication Details:

2008 Sep Feeding Tube Requirements for Advanced Head and Neck Cancer (HNC) Patients Treated with IMRT Versus Two Dimensional Radiation Techniques (2DRT).
John Nicholas WALDRON

**Publication Details:**

2008 Sep Feasibility of Reducing Radiation Dose to the Brachial Plexus (BP) for Nasopharyngeal Cancer (NPC) Patients Treated with IMRT.

**Publication Details:**

2008 Sep Intensity Modulated Radiation Therapy for Nasopharyngeal Carcinoma: Analysis of Quality of Life in a Prospective Phase II Study.

**Publication Details:**

2008 Sep Brachial Plexus Contouring Guideline Assessed with Inter Observer Variability during Image Guided IMRT for Head and Neck Cancer.

**Publication Details:**

2008 Sep Differences in Feeding Tube Requirements for Patients Treated with IMRT Versus Two Dimensional Radiation Techniques for Advanced Head and Neck Cancer.

**Publication Details:**

1999 Apr CNS Cancer Lecture. Princess Margaret Hospital School of Radiation Therapy. Toronto.

G. Research Supervision

1. PRIMARY OR CO-SUPERVISION

Postgraduate MD

2000 Primary Supervisor. Core Program. Dr. M. ElMahlah.

Continuing Education

2006 - 2007 Primary Supervisor. Inna Kaminsky, PMH RMP.
2006 - 2007 Primary Supervisor. Lyndon Johnson, PMH RMP.

Clinical Research Fellow (MD)

2014 Primary Supervisor. Dr. Irene Karam.
2014 Primary Supervisor. Dr. Ali Hosni.
2014 Primary Supervisor. Dr. Vani Ramasamy.
2013 Primary Supervisor. Dr. Sallil Vengalil.
2013 Primary Supervisor. Dr. Mathew Mason.
2013 Primary Supervisor. Dr. Eric Tran.
2012 Primary Supervisor. Dr. Phillipe Rey.
2012 Primary Supervisor. Dr. Joel Yarney.
2011 Primary Supervisor. Dr. Meredith Johnston.
2011 Primary Supervisor. Dr. Isabelle Gauthier.
2011 Primary Supervisor. Dr. Jepp Friborg.
2010 Primary Supervisor. Dr. Pranshu Mohindra.
2010  Primary Supervisor. Dr. Fionnuala Houghton.
2010  Primary Supervisor. Dr. Albert Tiong.
2009  Primary Supervisor. Dr. Ashok Nikapota.
2009  Primary Supervisor. Dr. Seema Arif.
2008 - 2009  Primary Supervisor. Dr. Indranil Mallick. Awards: Best Poster Award - U of T Department Radiation Oncology Research Day.
2008  Primary Supervisor. Dr. Yongjin Wang.
2008  Primary Supervisor. Dr. Christian Stevens.
2006 - 2007  Primary Supervisor. Dr. David Hwang.
2004 - 2005  Primary Supervisor. Dr. Shiroma DeSilva. Awards: Best Oral Presentation - University of Toronto Department of Radiation Oncology Research Day.
1999  Primary Supervisor. Dr. M. Tin.
1998  Primary Supervisor. Dr. A. Curran.
1997  Primary Supervisor. Dr. A. Mis, Department of Ocular Oncology.

2. OTHER SUPERVISION

Undergraduate Education

2013  Radiation Science students, Michener Institute, Toronto.
1996 - 2013  Undergraduate dental student teaching, Faculty of Dentistry, University of Toronto.
1994 - 2009  Undergraduate medical student teaching, Faculty of Medicine, University of Toronto.
1985 - 1986  Medical, nursing, life sciences student physiology laboratory demonstrator, Department of Physiology, Queen’s University, Kingston.

Postgraduate MD

1997 - 2013  Dental resident, Radiation Oncology Clinic Rotations, Faculty of Dentistry, University of Toronto.
1994 - 2013  Radiation Oncology Residents-Fellows training, Princess Margaret Cancer Centre, University of Toronto.
**Contact Information**

- Name: Dr. Yongjin Wang
- Business address:
  Peel Regional Cancer Centre  
  Credit Valley Hospital  
  2200 Eglinton Avenue West  
  Mississauga, ON   L5M 2N1
- Business Telephone: (905) 813-1100  Ext 5147
- Business Fax: (905) 813-3962
- E-mail: ywang@cvh.on.ca
- Date Curriculum Vitae was Last Updated: June 4, 2012

**Education**

- University Education: MB, Beijing University, China, 1981-1987
- Post-Graduate and Medical Training
  - Residency in Urology, Shandong Provincial Hospital, China, 1990-1994
  - Research Fellow, Department of Urology, Prince Henry Hospital, University of New South Wales, Sydney, Australia, 1994 – 1995
  - Research Fellow, Department of Urology, Cleveland Clinic Foundation, Cleveland, USA, 1995 – 1997
  - Research Fellow, Division of Urology, Toronto Western Hospital, University of Toronto, Toronto, Ontario, 1997 – 2002
  - Ontario International Medical Graduate Program, University of Toronto, 2002 – 2003
  - Radiation Oncology Residency Program, University of Toronto, 2003-2008
  - Radiation Oncology Fellowship Program, University of Toronto, July – Dec 2008
- Continuing Education
  - MSc, Shandong University, China, 1987-1990
- Scholarships and Awards:
  - Second Prize, American Urological Association Essay Contest, American Urological Association, USA, 1999

**Biographical Information**

- Degrees
  - MB, Beijing University  1987
  - MSc, Shandong University  1990
  - FRCP, Radiation Oncology 2008
- Hospital/Staff Appointments
  - Staff Radiation Oncologist, Credit Valley Hospital and Trillium Health Centre, Mississauga, ON
- Academic Appointments
  - Lecturer Adjunct, Department of Radiation Oncology, University of Toronto
• Professional Affiliations and Activities e.g. Editor of journal, academic organizations

• Certifications and Licensures
  o Licentiate of the Medical Council of Canada (LMCC No. 89746), 2001
  o College of Physicians and Surgeons of Ontario (CPSO) Independent License, 2008-present
  o Royal College of Physicians and Surgeons of Canada, 2008-present

• Patents and Commercialization Activities

• Administration and Committee Appointments
  Local Committees
  National and Provincial Committees
  International Committees

• Journal and Grant Peer-Reviewed Responsibilities
  i. Provincial/National
  ii. International

• Editorial and Peer-Reviewed Responsibilities
  i. Editor
  ii. Manuscript Peer-Reviewer for:

1. EDUCATION

Degrees
1977 M.B., Ch.B, University of Dublin - Trinity College, Dublin, Ireland
1977 B. A.O. University of Dublin - Trinity College, Dublin, Ireland
1977 BA, University of Dublin - Trinity College, Dublin, Ireland

Postgraduate, Research and Specialty Training
2003 - 2004 Medical Administration, UHN-University of Toronto Rotman Leadership Development Program, University of Toronto, Toronto, Ontario, Canada
1985 - 1986 Chief Resident, Radiation Oncology, Radiation Oncology Training Program, University of Toronto, Toronto, Ontario, Canada
1983 - 1985 Resident, Radiation Oncology, Radiation Oncology Training Program, University of Toronto, Toronto, Ontario, Canada
1982 - 1983 Clinical Fellow, Department of Medical Oncology, Princess Margaret Hospital, Toronto, Ontario, Canada
1981 - 1982 Medical Registrar, General Medicine/Medical Oncology, Department of Medical Oncology, University College, Dublin, Dublin, Ireland
1980 - 1981 Medical Registrar (Chief Resident), Internal Medicine, Mercer’s Hospital, Dublin, Ireland
1980 - 1981 Tutor, Internal Medicine, University of Dublin - Trinity College, Dublin, Ireland
1978 - 1980 Residency, Internal Medicine, University of Dublin - Trinity College, Dublin, Ireland
1977 - 1978 Internship, Internal Medicine/Medical Oncology, Dr. Steevens Hospital, Dublin, Ireland

Qualifications, Certifications and Licenses
1986 Fellow, Radiation Oncology, Royal College of Physicians of Canada
1986 Diplomate, Radiation Oncology, American Board of Radiology
1983 Licentiate, The Medical Council of Canada
1980 Member, Internal Medicine, Royal College of Physicians of Ireland
2. EMPLOYMENT

Current Appointments

2009 - present  Provincial Head, Radiation Treatment Program, Cancer Care Ontario, Toronto, Ontario, Canada
2003 - present  Professor, Radiation Oncology, University of Toronto, Toronto, Ontario, Canada
1987 - present  Staff Radiation Oncologist, Department of Radiation Oncology, Princess Margaret Hospital, Toronto, Ontario, Canada

Previous Appointments

HOSPITAL

2013 - 2014 Apr  Interim Vice President, Clinical Programs and Quality Initiatives, Cancer Care Ontario, Toronto, Ontario, Canada
2013 - 2014 Apr  Member, Cancer Quality Council of Ontario, Toronto, Ontario, Canada
2008 - 2010  Interim Head, Radiation Medicine Program, Southlake Regional Cancer Centre, Ontario, Canada
2005 - 2012  Deputy Head, Radiation Medicine Program, Princess Margaret Hospital, Toronto, Ontario, Canada
2005 - 2009  Medical Director, Clinical Research Unit, Ontario Cancer Institute, Ontario, Canada
1999 - 2005  Associate Director, Medical Programs, Radiation Medicine Program, Princess Margaret Hospital, Toronto, Ontario, Canada
1995 - 2002  Site Group Leader, Multidisciplinary Genitourinary Site Group, University Health Network, Toronto, Ontario, Canada
1992 - 2001  Site Group Leader, Genitourinary Site Group, Department of Radiation Oncology, Princess Margaret Hospital, Toronto, Ontario, Canada
1987 - 1996  Consultant, Medicine, Wellesley Hospital, Toronto, Ontario, Canada

UNIVERSITY - RANK

1997 - 2003  Associate Professor, Radiation Oncology, University of Toronto, Toronto, Ontario, Canada
1987 - 1996  Assistant Professor, Radiation Oncology, University of Toronto, Toronto, Ontario, Canada

3. HONOURS AND CAREER AWARDS

Distinctions and Research Awards

INTERNATIONAL

Received

2012  Visiting Professor, Virginia Mason Medical Center, Seattle, Washington, United States. (Distinction)
2005  Visiting Professor, University of Pennsylvania, Department of Radiation Oncology, Philadelphia, Pennsylvania, United States. (Distinction)

NATIONAL

Received

2004  Visiting Professor, University of British Columbia, Department of Radiation Oncology, Vancouver, British Columbia, Canada. (Distinction)
2004  Visiting Professor, University of Dalhousie, Department of Oncology, Canada. (Distinction)
1995  Visiting Professor, University of British Columbia, Department of Surgery, Vancouver,
British Columbia, Canada. (Distinction)

1986 Research Fellowship Award, National Cancer Institute of Canada. (Research Award)
1985 Resident Award Session - 1st Prize, Canadian Association of Radiologists, Canada. (Distinction)

LOCAL
Received

2011 Sustained Excellence in Research, University of Toronto, Department of Radiation Oncology, Toronto, Ontario, Canada. (Distinction)
2005 Best Guest Speaker, University of Toronto, Department of Radiation Oncology, Toronto, Ontario, Canada. (Distinction)
2004 Best RMP Rounds for Fall 2004, Princess Margaret Hospital, Toronto, Ontario, Canada. (Distinction)
In recognition of presentation: “Radiation Therapy for Prostate Cancer Adjunctive Hormones for All?” Radiation Medicine Program.
2003 Sustained Excellence in Research, University of Toronto, Department of Radiation Oncology, Toronto, Ontario, Canada. (Distinction)
1977 G.B. McHutchson Final Medical Examination 1st place overall, Trinity College, Dublin, Ireland. (Distinction)
1977 Honours Degree in Medicine, University of Dublin - Trinity College, Dublin, Ireland. (Distinction)
1977 Professor’s Prize in Paediatrics – 1st Place. (Distinction)
1977 Reuben Harvey Memorial Prize, Royal College of Surgeon’s of Ireland, Dublin, Ireland. (Distinction)
1977 Sir Arthur Ball Memorial Prize for 1st Place in Surgery. (Distinction)

Teaching and Education Awards
LOCAL
Received

1999 Residents Award for Excellence in Clinical Teaching, Dept of Radiation Oncology, Faculty of Medicine, University of Toronto, Toronto, Ontario, Canada
1999 Wightman-Berris Academy Teaching Award, Dept of Radiation Oncology, Faculty of Medicine, University Health Network, Toronto, Ontario, Canada for excellence in Undergraduate and Postgraduate teaching, (Toronto General Hospital, Toronto Western Hospital and Princess Margaret Hospital).
1993 Residents Award for Excellence in Clinical Teaching, Dept of Radiation Oncology, Faculty of Medicine, University of Toronto, Toronto, Ontario, Canada

Student/Trainee Awards
INTERNATIONAL
Received

2013 GU Merit Award, Awardee Name: Dr. Swetha Sridharan (Fellow). ASCO
NATIONAL

Received

2010  Young Canadian Investigator Award, Awardee Name: Dr. Eric Leung (Radiation Oncology Resident). Novartis Oncology
2006  Young Canadian Investigator Award, Awardee Name: Dr. Jarad Martin (Radiation Oncology Fellow). Novartis Oncology
2001  Grant For Research Protocol, Awardee Name: Dr. Michael Lock (Radiation Oncology Resident). ACURA
  A phase III evaluation of gabapentin for the treatment of hot flushes in prostate cancer patients undergoing androgen deprivation therapy. Total Amount: 23,900

LOCAL

Received

2000  R S Bush Award. University of Toronto
  Best Fellow’s Presentation, Dr Andrew Bayley (Radiation Oncology Fellow).

4. PROFESSIONAL AFFILIATIONS AND ACTIVITIES

Professional Associations

Member, American Society of Clinical Oncology
Member, American Society of Therapeutic Radiology and Oncology
Member, American Urological Association
Member, Canadian Association of Radiation Oncologists
Member, Canadian Urological Association
Member, Canadian Uro-Oncology Group
Member, European Society of Radiation Oncology
Member, Ontario Medical Association

Administrative Activities

INTERNATIONAL

International Board of UK
2004 - 2009  Member, Clinical Trials Awards and Advisory Committee (CTAAC), United Kingdom.

Movember Foundation
2013 - present  Chair, Global Testicular Cancer Research Advisory Committee
2013 - present  Member, Prostate Cancer Research Advisory Committee

NATIONAL

Canadian Prostate Cancer Research Initiative
2006 - 2008  Chair, Management Committee, Canada.
2004 - 2006  Board Member, Management Committee, Canada.
2003 - 2006  Member, Management Committee, Canada.
National Cancer Institute of Canada
1994 - present  **Member**, Clinical Trials Group, Genitourinary Committee, Canada.
1999 - 2003  **Member of Executive**, Clinical Trials Group, Genitourinary Committee, Canada.
1995 - 2001  **Representative**, Clinical Trials Group - Princess Margaret Hospital Centre, Canada.

Princess Margaret Hospital Centre

PROVINCIAL / REGIONAL
Cancer Care Ontario
2011 - present  **Chair**, Models of Care Committee, Ontario, Canada.
1996 - present  **Member**, GU Guidelines Committee, Ontario, Canada.
2006 - 2009  **Member**, IMRT Standards Committee, Ontario, Canada.

Ontario Medical Association
1994 - 2001  **Chair**, Tariff Committee, Section of Radiation Oncology, Ontario, Canada.
1991 - 1993  **Executive Member**, Section of Radiation Oncology, Ontario, Canada.
1989 - 1991  **Chair**, Section of Radiation Oncology, Ontario, Canada.

Princess Margaret Hospital
2008 - 2009  **Chair**, Radiation Oncology Provincial Advisory Committee
2005 - 2009  **Member**, Radiation Oncology Provincial Advisory Committee

LOCAL
Department of Radiation Oncology
1998 - 2001  **Chair**, Clinical Research Committee
1997 - 1998  **Chair**, Radiation Therapy Technical Review Committee
1994  **Chair**, Ad-hoc Committee on Radiation Therapy Review Clinics
1992  **Member**, Ad-hoc Committee on Inpatient Care

Princess Margaret Cancer Centre
1992 - 1994  **Chair**, Radiation Services Subcommittee Medical Advisory Committee
1989 - 1992  **Chair**, Clinical Trials Committee
1989 - 1992  **Secretary**, Medical Advisory Committee
1988 - 1989  **Department of Radiation Oncology Representative**, Resource Management Committee
1988 - 1989  **Member**, Ambulatory Care Subcommittee of Medical Advisory Committee
1988 - 1989  **Executive**, Medical Staff Association

University of Toronto
2006 - present  **Member**, Executive Committee, Department of Radiation Oncology, Toronto, Ontario, Canada.
1999 - 2001  **Member**, Department of Radiation Oncology, Senior Advisory Committee, Toronto, Ontario,
Canada.

1998 Jan - 1999  **Chair**, Oncology Research Ethics Board II, Toronto, Ontario, Canada.

2. NATIONAL

Invited Lectures and Presentations

2012 Nov  "Radiation Therapy for Prostate Cancer in 2012 and Beyond". Man to Man, Prostate Cancer Canada. Toronto, Ontario, Canada.

3. PROVINCIAL / REGIONAL

Invited Lectures and Presentations

2010 Apr  "What Research Do We/(I) Need?". Cancer Care Ontario Research Day. Toronto, Ontario, Canada.

2009 Oct  "Delayed Postoperative Radiotherapy is the Best Treatment for Prostate Cancer". Prostate Cancer Champions Workshop - Cancer Care Ontario. Toronto, Ontario, Canada.

2009 May  "Prostate Cancer – Role of Hormonal Therapy. GU Rounds,Sudbury Regional Cancer Centre. Sudbury, Ontario, Canada.

4. LOCAL

Invited Lectures and Presentations

2008 Oct  Seminoma: “From more to less”. Developments in Cancer Management: Conquering Cancer in our Lifetime. The 8th Princess Margaret Hospital Conference. Toronto, Ontario, Canada.

2007 Feb  Adjuvant Hormonal Therapy of Prostate Cancer with Reference to Current Trials. GU Tumour Board Rounds, Credit Valley Hospital. Toronto, Ontario, Canada.
A. Date Curriculum Vitae is Prepared: 2016 August 3

B. Biographical Information

Primary Office
Sunnybrook Health Sciences Centre
Odette Cancer Centre
Department of Radiation Oncology
2075 Bayview Avenue, T2
Toronto, Ontario, Canada
M4N 3M5

Telephone 416-480-6100 ext 2625
Fax 416-480-6002
Email shun.wong@sunnybrook.ca

1. EDUCATION

Degrees
1980 MD, University of Toronto, Toronto, Ontario, Canada

Postgraduate, Research and Specialty Training
1986 Research Fellow MD, Anderson Cancer Centre, Houston, Texas, United States,
Supervisor(s): Dr. K.K. Ang
1985 Clinical Assistant, Department of Radiation Oncology, Princess Margaret Hospital, Toronto,
Ontario, Canada
1982 - 1985 Resident, Department of Radiation Oncology, University of Toronto, Toronto, Ontario, Canada
1981 - 1982 Resident, Department of Internal Medicine, University of Toronto, Toronto, Ontario, Canada
1980 - 1981 Intern, Sunnybrook Medical Centre, University of Toronto, Toronto, Ontario, Canada

Qualifications, Certifications and Licenses
1986 Therapeutic Radiology, American Board of Radiology, United States
1985 Royal College of Physicians and Surgeons of Canada (FRCPC), Ontario, Canada, License / Membership #: 33377
1985 Fellow, Radiation Oncology, Royal College of Physicians and Surgeons of Canada, Canada
1980 LMCC, Medical Council of Canada, Canada
2. EMPLOYMENT

Current Appointments

2013 - present  Courtesy Staff, Department of Medicine, Rouge Valley Health System, Toronto, Ontario, Canada
2013 - present  Clinician Scientist, Department of Radiation Oncology, Sunnybrook Health Sciences Centre, Toronto, Ontario, Canada
2009 - present  Consultant, Department of Surgery, North York General Hospital, Toronto, Ontario, Canada
2009 - present  Courtesy Staff, Department of Medicine, The Scarborough Hospital, Toronto, Ontario, Canada
2004 - present  Vice-Chair, Radiation Oncology, University of Toronto, Toronto, Ontario, Canada
2002 - present  Senior Scientist, Biology, Sunnybrook Health Sciences Centre, Ontario, Canada
2002 - present  Staff Radiation Oncologist, Odette Cancer Centre, Department of Radiation Oncology, Sunnybrook Health Sciences Centre, Toronto, Ontario, Canada
2000 - present  Professor, Radiation Oncology, University of Toronto, Toronto, Ontario, Canada
2000 - present  Professor, Medical Biophysics, University of Toronto, Toronto, Ontario, Canada

Previous Appointments

HOSPITAL
2002 - 2013  Chief, Department of Radiation Oncology, Sunnybrook Health Sciences Centre, Ontario, Canada
2002 - 2013  Head, Odette Cancer Centre, Radiation Treatment Program, Sunnybrook Health Sciences Centre, Ontario, Canada
1987 - 2002  Staff Radiation Oncologist, Princess Margaret Hospital, Toronto, Ontario, Canada
1987  Staff Radiation Oncologist, Toronto Bayview Regional Cancer Centre, Toronto, Ontario, Canada

RESEARCH
1997 - 2001  Research Director, Radiation Medicine Program, Princess Margaret Hospital, Toronto, Ontario, Canada
1996 - 2002  Senior Scientist, Division of Experimental Therapeutics, Ontario Cancer Institute, Ontario, Canada
1996 - 2001  Research Director, Radiation Oncology, University of Toronto, Toronto, Ontario, Canada
1992 - 1996  Associate Scientist, Division of Experimental Therapeutics, Ontario Cancer Institute, Ontario, Canada

UNIVERSITY - RANK
1994 - 2000  Associate Professor, Medical Biophysics, University of Toronto, Toronto, Ontario, Canada
1994 - 2000  Associate Professor, Radiation Oncology, University of Toronto, Toronto, Ontario, Canada
1988 - 1994  Assistant Professor, Radiation Oncology, University of Toronto, Toronto, Ontario, Canada
1987 - 1988  Lecturer, Department of Radiology, University of Toronto, Toronto, Ontario, Canada
3. HONOURS AND CAREER AWARDS

Distinctions and Research Awards

PROVINCIAL / REGIONAL
Received
2013 - 2018  **Clinician Scientist Award**, Ontario Association of Radiation Oncologists, Toronto, Ontario, Canada. (Clinician Scientist Award)
*Total Amount: 500,000 CAD*

LOCAL
Received
2003  **Sustained Excellence in Research Award**, Department of Radiation Oncology, Ontario, Canada. (Distinction)

4. PROFESSIONAL AFFILIATIONS AND ACTIVITIES

Professional Associations

2009 - present  **Member**, Canadian Association of Neuroscience
2005 - present  **Member**, Society for Neuroscience
1998 - present  **Member**, American Association for Cancer Research
1997 - present  **Member**, Journal Club Chinatown Physicians
1992 - present  **Member**, Canadian Medical Association
1992 - present  **Member**, Ontario Medical Association
1990 - present  **Member**, Radiation Research Society
1989 - present  **Member**, Canadian Association of Radiation Oncologists
1989 - present  **Member**, Chinese Canadian Medical Society
1988 - present  **Member**, Canadian Medical Protective Association

Administrative Activities

INTERNATIONAL
**The American Association of Physicists in Medicine**
2013 - present  **Member**, Working Group on Biological Effects of Hypofractionated Radiotherapy/SBRT, College Park, Maryland, United States.

NATIONAL
**Canadian Association of Radiation Oncologists**
1998  **Chair**, Resident Paper Session, Annual Meeting, Canada.

**Colorectal Cancer Association**
2008  **Member**, Advisory Board, Ontario, Canada.
Eloxatin
2008   Consultant, National Rectal Cancer Consultative Meeting, Ontario, Canada.

Royal College of Physicians and Surgeons of Canada,
2000   Member, Abstract Review Panel, 2000 meeting, Canada.

PROVINCIAL / REGIONAL
Cancer Care Ontario
2015 - present   Colorectal Cancer Working Group-Quality Indicators for pre-operative assessment in rectal patients, Ontario, Canada.
2012 - 2015   Member, Pre-treatment Assessment of Rectal Cancer, Program in Evidence Based Care, Ontario, Canada.
2009   Member, Search Committee, Quality Lead, Radiotherapy, Radiation Treatment Program, Ontario, Canada.
2009   Member, Search Committee, Quality Lead, Radiation Oncology, Radiation Treatment Program, Ontario, Canada.
2009   Member, Search Committee, Quality Lead, Medical Physics, Radiation Treatment Program, Ontario, Canada.
2008   Member, Search Committee, Provincial Head for Radiation Treatment Program, Ontario, Canada.
2006   Member, Toronto RCP Performance Monitoring & Improvement Group, Ontario, Canada.
2005 - 2013   Member, Provincial Radiation Treatment Program Committee, Ontario, Canada.
2003 - 2007   Member, Durham Evening Clinic at Sunnybrook Steering Committee, Ontario, Canada.
2002 - 2013   Member, Radiation Oncology Professional Advisory Committee, Ontario, Canada.
2002 - 2003   Member, Radiation Treatment Advisory Committee, Ontario, Canada.

Ontario Medical Association
1996 - 1997   Chair, Education and Programs Committee; Section, Radiation Oncology, Ontario, Canada.
1993 - 1994   Chair, Education and Programs Committee, Section on Radiation Oncology, Toronto, Ontario, Canada.

Royal Victoria Hospital
2007 - 2012   Chair, Search Committee, Radiation Oncologists, Ontario, Canada.

Royal Victoria Hospital/Odette Cancer Center
2008 - 2012   Member, Radiation Treatment Program, Steering Committee, Toronto, Ontario, Canada.

St. Paul L’Amoreaux Senior Centre
1999 - 2001   Board Member, Ontario, Canada.

LOCAL
Princess Margaret Cancer Center
2016 - present   Member, Review Committee for Campbell Chair in Breast Cancer Research, Toronto, Ontario, Canada.
Princess Margaret Hospital

1999 - 2001  Institute Representative, NCIC CTG Brain Site, Toronto, Ontario, Canada.
1998 - 2001  Member, Search Committee for Staff Radiation Oncologists, Toronto, Ontario, Canada.
1998 - 2001  Chair, Research Committee, Radiation Medicine Program, Toronto, Ontario, Canada.

1997  Chair, Research Sub-committee for Strategic Planning, Radiation Services, Toronto, Ontario, Canada.
1993  Member, Ad-Hoc Committee on Academic Programs, Department of Radiation Oncology, Toronto, Ontario, Canada.
1993  Member, Medical Staff Association Executive, Toronto, Ontario, Canada.
1993  Member, Radiation Oncologist Partnership Executive, Toronto, Ontario, Canada.
1993  Member, Symptom Control Subcommittee, Toronto, Ontario, Canada.
1993  Member, Incident Forms Task Group, Toronto, Ontario, Canada.
1992 - 1993  Member, Pharmacy Computerization Review Group, Toronto, Ontario, Canada.
1992  Member, Research Advisory Committee, Department of Radiation Oncology, Toronto, Ontario, Canada.
1991 - 1999  Member, Pharmacy and Therapeutics Committee, Toronto, Ontario, Canada.
1991 - 1995  Member, Search Committee for Senior Scientist, Division of Experimental Therapeutics, Toronto, Ontario, Canada.
1990 - 1994  Chair, Radiographers Education Committee, Toronto, Ontario, Canada.
1988 - 1995  Member, Terry Fox Fellowship Committee, Toronto, Ontario, Canada.
1988 - 1994  Member, Medication Incidents Review Sub-Committee, Toronto, Ontario, Canada.

Sunnybrook Health Sciences Centre

2013 - present  Member, Search Committee, Department of Radiation Oncology, Toronto, Ontario, Canada.
2013  Member, Cancer Committee, Toronto, Ontario, Canada.
2012 - 2013  Member, Search Committee, Head of Division of Medical Oncology/Hematology, Toronto, Ontario, Canada.
2011  Member, Search Committee, Chief of Odette Cancer Centre, Toronto, Ontario, Canada.
2008 - 2012  Chair, Search Committee for Head of Medical Physics, Toronto, Ontario, Canada.
2008  Member, 5-Year Review, Department of Dentistry, Toronto, Ontario, Canada.
2007 - 2013  Member, Medical Physics Research Operations Committee, Toronto, Ontario, Canada.
2007 - 2010  Member, Clinical Trials & Epidemiology Steering Committee, Toronto, Ontario, Canada.
2007  Member, External review, CNS Disease Site Group, Toronto, Ontario, Canada.
2007  Member, Integrated Management Committee, Toronto, Ontario, Canada.
2006  Member, 5-Year Review, Department of Anesthesia, Toronto, Ontario, Canada.
2005  Member, Search Committee for Regional VP, Cancer Program, Toronto, Ontario, Canada.
2005  Member, TSRCC ICP IM Strategy Committee, Toronto, Ontario, Canada.
2004 - 2013  Chair, Steering Committee, Radiation Treatment Program, Toronto, Ontario, Canada.
2004 - 2013  Member, Clinical Operations Committee, Radiation Treatment Program, Toronto, Ontario, Canada.
2004 - 2013  Member, Research Advisory Committee, Department of Radiation Oncology, Toronto, Ontario, Canada.
2003 - 2013  Chair, PET/CT Committee, Toronto, Ontario, Canada.
C Shun WONG

2003 - 2013  Chair, PET/CT Research Committee, Toronto, Ontario, Canada.
2003 - 2005  Member, Prostate Cancer Steering Committee, Toronto, Ontario, Canada.
2003        Member, Toronto Cancer Research Partnership, Toronto, Ontario, Canada.
2002 - 2013  Member, Medical Advisory Committee, Toronto, Ontario, Canada.
2002 - 2013  Member, Senior Medical Council, Toronto, Ontario, Canada.
2002 - 2013  Member, Program Council, Cancer Program, Toronto, Ontario, Canada.
2002 - 2013  Chair, Radiation Oncology Manpower Committee, Toronto, Ontario, Canada.
2002 - 2013  Chair, Radiation Oncology Staff Committee, Toronto, Ontario, Canada.
2002 - 2013  Member, Editorial Board of Hot Spot Newsletter, Toronto, Ontario, Canada.
2002 - 2013  Member, Site Group Leaders Committee, Toronto, Ontario, Canada.
2002 - 2013  Member, Radiation Oncology Associates Executive, Ontario, Canada.
2002 - 2013  Chief, Department of Radiation Oncology, Toronto, Ontario, Canada.
2002 - 2011  Member, Discipline of Molecular and Cell Biology, Toronto, Ontario, Canada.
2002 - 2004  Member, Academic Medical Council, Toronto, Ontario, Canada.
2002 - 2004  Member, Search Committee for Cancer Research Director, Toronto, Ontario, Canada.
2002 - 2003  Member, Radiation Program Expanded Group, Toronto, Ontario, Canada.
2002 - 2003  Chair, Radiation Program Core Group, Toronto, Ontario, Canada.
2002 - 2003  Chair, Search Committee for Medical Physics Research Director, Toronto, Ontario, Canada.
2002 - 2003  Member, IMRT Committee, Toronto, Ontario, Canada.
2002 - 2003  Member, TSRCC/DRCC Evening Clinic Committee, Toronto, Ontario, Canada.
2002        Member, Search Committee for Chief of Dentistry, Toronto, Ontario, Canada.
2002        Member, Search Committee for Chief of Radiology, Toronto, Ontario, Canada.
2002        Member, Search Committee for Clinician Scientists, Cancer Program, Toronto, Ontario, Canada.
2001 - 2003  Member, TSRCC/CROS Steering Committee, Toronto, Ontario, Canada.

University of Toronto
2015 - present Member, Executive Committee, Faculty of Medicine, Institute of Medical Science, Multilevel Education, Toronto, Ontario, Canada.
2006 - present Member, Finance Committee, Department of Radiation Oncology, Toronto, Ontario, Canada.
2005 - present Chair, Three-Year Review Committee, Department of Radiation Oncology, Toronto, Ontario, Canada.
2005 - present Chair, Appointments Committee, Department of Radiation Oncology, Toronto, Ontario, Canada.
2005 - present Member, Vice Chairs Committee, Department of Radiation Oncology, Toronto, Ontario, Canada.
2005 - present Chair, Promotions Committee, Department of Radiation Oncology, Toronto, Ontario, Canada.
2003 - present Member, EIRR 21st Grants Panel, Toronto, Ontario, Canada.
2001 - present Member, Executive Committee, Department of Radiation Oncology, Toronto, Ontario, Canada.
2012 - 2015 Member, IMS, Appointments Committee, Toronto, Ontario, Canada.
2012        Judge, Laidlaw Manuscript Competition, Toronto, Ontario, Canada.
2011        Member, Search Committee for Campbell Chair in Breast Cancer Research, Toronto, Ontario, Canada.
2011        Member, Search Committee for Farghason Chair in Renal Cancer Research, Toronto, Ontario, Canada.
2009  **Acting Chair**, Department of Radiation Oncology, Toronto, Ontario, Canada.

2006  **Member**, Search Committee, Chief of Department of Radiation Oncology, Toronto, Ontario, Canada.

2006  **Member**, Five-year Review Committee, Department of Radiation Oncology, Toronto, Ontario, Canada.

2002 - 2013  **Member**, Fellowship Committee, Department of Radiation Oncology, Toronto, Ontario, Canada.

1997 - 2001  **Chair**, Resident Research Committee, Department of Radiation Oncology, Toronto, Ontario, Canada.

1997 - 2001  **Member**, Resident Selection Committee, Department of Radiation Oncology, Toronto, Ontario, Canada.

1997 - 2001  **Member**, Fellowship Selection Committee, Department of Radiation Oncology, Toronto, Ontario, Canada.

1996 - 2001  **Director**, Research, Department of Radiation Oncology, Toronto, Ontario, Canada.

1996 - 2001  **Member**, Senior Advisory Committee, Department of Radiation Oncology, Toronto, Ontario, Canada.

1996 - 2001  **Chair**, Research Advisory Committee, Department of Radiation Oncology, Toronto, Ontario, Canada.

1996  **Member**, Committee on Graduate Education in Clinical Sciences, for Institutional Self-study for Accreditation, Faculty of Medicine, Dept of Radiation Oncology, Graduate Education, Toronto, Ontario, Canada.

1992 - 2004  **Member**, Promotions Committee, Department of Radiation Oncology, Toronto, Ontario, Canada.

C. Research Funding

1. GRANTS, CONTRACTS AND CLINICAL TRIALS

PEER-REVIEWED GRANTS

Funded

2009 - 2010 **Co-Investigator.** Ultrasound microbubble enhancement of bladder cancer responses to radiation. American Association for Cancer Research, Henry Sheppard Translational Research Grant. PI: Czarnota GJ. Collaborator(s): **Wong CS.** 125,000 USD. [Grants]

2007 - 2010 **Co-Investigator.** Ultrasound analyses of vascular effects of radiation. Canadian Breast Cancer Foundation (Ontario Chapter). PI: Czarnota GJ. Collaborator(s): **Wong CS,** Burns PN, Foster SF. 428,000 CAD. [Grants]

2005 - 2008 **Principal Investigator.** The neuroprotective role of erythropoietin in radiation-induced CNS injury. OCRN. 526,893 CAD. [Grants]

2002 - 2006 **Principal Investigator.** Role of endogenous and exogenous neural stem cells and progenitor cells in CNS radiation responses. National Cancer Institute of Canada (NCIC). 479,403 CAD. [Grants]

2002 - 2004 **Collaborator.** Equipment maintenance support for oncologic molecular micro-imaging.

1997 - 2000 Principal Investigator. The role of apoptosis in radiation damage to the central nervous system. National Cancer Institute of Canada (NCIC). 417,603 CAD. [Grants]

NON-PEER-REVIEWED GRANTS

FUNDED

2006 - 2008 **Principal Investigator.** Positron emission tomography (PET) evaluation study - Sunnybrook site. Ministry of Health and Long-Term Care Research Grant. 130,000 CAD. [Grants]

2004 **Principal Investigator.** Neuroprotection in a mouse model of behavioral and learning/memory impairment after cranial irradiation. Ortho Biotech. 64,407 CAD. [Grants]

2002 - 2007 **Principal Investigator.** Research Support. Sunnybrook Health Sciences Centre. 635,000 CAD. [Grants]

2002 **Principal Investigator.** Equipment Grant. Sunnybrook Health Sciences Centre. 145,238 CAD. [Grants]

1999 **Principal Investigator.** Travel Award. Radiation Research Society. 500 USD. [Grants]

1992 **Principal Investigator.** Continuing Education Day - Current Controversies in the Colorectal Cancer. Princess Margaret Hospital Foundation. Collaborator(s): Moore M. 19,400 CAD. [Grants]

1978 **Principal Investigator.** A study of the influence of dose fractionation on the radiation tolerance of the rat spinal cord. Princess Margaret Hospital Trust Fund. 2,940 CAD. [Grants]

D. Publications

1. MOST SIGNIFICANT PUBLICATIONS

   Neural progenitors in adult brain undergo p53-dependent apoptosis after irradiation. In contrast, radiation-induced apoptosis of microvascular endothelial cells is regulated by membrane acid sphingomyelinase. Using genetic, pharmacological and transplantation approaches, we provide evidence that endothelial cells may regulate p53-dependent apoptosis of neural progenitors after genotoxic stress.

   Microvascular permeability changes and loss of blood-brain barrier integrity are important features of central nervous system (CNS) radiation injury. Expression of vascular endothelial growth factor (VEGF) is an important determinant of microvascular permeability. Hypoxia mediates VEGF up-regulation through hypoxia-inducible factor-1 alpha (HIF1alpha). In rat spinal cord, we observed increase in astrocitic expression of HIF1-alpha and VEGF before the onset of radiation-induced white matter necrosis and forelimb paralysis. VEGF-low-expressing mice were found to be protected from radiation myelopathy compared to wild type or VEGF-high-expressing mice. Our study provided first evidence for a causative role of VEGF in CNS radiation injury.

   Ionizing radiation results in acute disruption of the blood-brain barrier. Following radiation, microvascular endothelial cells undergo apoptosis, a process mediated by membrane acid sphingomyelinase. We show that in acid sphingomyelinase-deficient mice, ionizing radiation does not result in endothelial cell apoptosis and there is no disruption of the blood-brain barrier after irradiation. Intravenous basic fibroblast growth factor which protects endothelial cell from apoptosis after irradiation also confers protection against disruption of the blood-brain barrier. Our study provides mechanistic insight that links endothelial cell apoptosis to acute blood-brain barrier disruption after irradiation.

   Dysfunction of the blood-brain barrier is associated with radiation-induced white matter lesions. Using the rat radiation myelopathy model, we showed a dose-dependent temporal and spatial association of hypoxia, vascular endothelial growth factor (VEGF) up-regulation, and radiation-induced blood-spinal cord barrier disruption. The results provide the first observation that tissue hypoxia and VEGF up-regulation play a role in blood-brain barrier permeability damage in the spinal cord after ionizing radiation, and add mechanistic insight to the underlying pathophysiology of late CNS effects after irradiation.

   We characterized acute apoptosis in rat spinal cord after irradiation and provided the first observation that apoptotic cells after ionizing radiation in the adult spinal cord are cells of the oligodendroglial lineage.

1994 A phase I study of combined radiation therapy, 5-fluorouracil and low dose folinic acid in patients with locally advanced pancreatic or extrabiliary carcinoma. 94th Annual Meeting, Royal College of Physicians and Surgeons of Canada. Toronto, Ontario, Canada.

1992 Influence of level of initial damage on the re-irradiation tolerance in rat spinal cord. 5th Canadian Neuro-Oncology Meeting. Huntsville, Ontario, Canada.

3. PROVINCIAL / REGIONAL

Invited Lectures and Presentations

2010  

2006  

2004  
**Visiting Professor.** CNS radiation injury: new paradigms for neuroprotection. Department of Radiation Oncology, Ottawa Regional Cancer Centre. Ottawa, Ontario, Canada.

2003  
**Invited Speaker.** Endothelial apoptosis initiates acute blood-drain barrier disruption following ionizing radiation. Crolla Research Day. Toronto, Ontario, Canada.

1999  
**Visiting Professor.** Pathophysiology of CNS radiation injury. Department of Oncology, University of Western Ontario. London, Ontario, Canada.

4. LOCAL

Invited Lectures and Presentations

2013  
**Lecturer.** Radiation Therapy for Colorectal Cancer. Department of Surgery, University of Toronto. Toronto, Ontario, Canada.

2013  

2013  

2012  
Neoadjuvant chemoradiation for locally advanced colon cancer. York Central Hospital. Toronto, Ontario, Canada.

2011  
Radiation Treatment for colorectal cancer: controversies. TORSO 2011, University of Toronto. Toronto, Ontario, Canada.

2011  
Colon Cancer Care: Coordination Counts. Toronto Surgical Oncology Rounds. Toronto, Ontario, Canada.

2001  

1997  
**Invited Speaker.** Radiation-induced apoptosis in the CNS. Grand Rounds. Toronto Sunnybrook Regional Cancer Centre. Toronto, Ontario, Canada.

1995  

1994  
**Invited Speaker.** Permanent radiation myelopathy following single courses of radiation therapy and retreatment. Toronto Sunnybrook Regional Cancer Centre, Grand Rounds. Toronto, Ontario, Canada.

1994  
Presented Abstracts

1992  Sparing effect of small doses per fraction given once daily in rat spinal cord. University of Toronto, Department of Radiation Oncology Alumni Day. Toronto, Ontario, Canada.

CME Courses

2001  **Lecturer.** Surgical Oncology Network, Tele-Oncology Rounds - Rectal Cancer. Department of Surgery, University of Toronto. Toronto, Ontario, Canada. (Continuing Education).

2000  **Lecturer.** Radiation Oncology Nursing Program - CNS malignancies. Princess Margaret Hospital. Toronto, Ontario, Canada. (Continuing Education).

1998  **Chair.** Resident Paper Session. Canadian Association of Radiation Oncologists. Toronto, Ontario, Canada. (Continuing Education).

1997  **Panelist.** Colon Cancer Update. Mount Sinai Hospital. Toronto, Ontario, Canada. (Continuing Education).

1994  **Course Co-ordinator.** Resource issues in the practice of radiation oncology in the 90’s. University of Toronto. Toronto, Ontario, Canada. Approved for 3.9 type II MOCOMP credits of the Royal College of Physicians and Surgeons of Canada. (Continuing Education).

1993  **Lecturer.** Introduction to Radiation Oncology, Pharmacy Preceptor Workshop. Princess Margaret Hospital. Toronto, Ontario, Canada. (Continuing Education).

1993  **Lecturer.** Radiation Therapy Nursing Course, Radiobiologic effect on normal tissues. Princess Margaret Hospital. Toronto, Ontario, Canada. (Continuing Education).

1992  **Lecturer.** Refresher Course in Radiation Oncology - GI Tumor. Princess Margaret Hospital. Toronto, Ontario, Canada. (Continuing Education).

1992  **Lecturer.** Radiotherapy for Advanced and Locally Recurrent Colorectal Cancer. Princess Margaret Hospital. Toronto, Ontario, Canada. (Continuing Education).

1992  **Lecturer.** Introduction to Radiation Oncology, Pharmacy Preceptor Workshop. Princess Margaret Hospital. Toronto, Ontario, Canada. (Continuing Education).

1992  **Course Co-ordinator.** Concurrent controversies in colorectal cancer. University of Toronto. Toronto, Ontario, Canada. Approved for 8.25 type II MOCOMP credits of the Royal College of Physicians and Surgeons of Canada. (Continuing Education).

1991  **Lecturer.** Refresher Course in Radiation Oncology - GI Tumor. Princess Margaret Hospital. Toronto, Ontario, Canada. (Continuing Education).

F. Teaching and Design

1. INNOVATIONS AND DEVELOPMENT IN TEACHING AND EDUCATION

1994  Resource Issues in the practice of Radiation Oncology in the 90’s, Continuing Education, Faculty of Medicine, Dept of Radiation Oncology, University of Toronto.  
**Course Co-ordinator.** Approved for 3.9 type II MOCOMP credits of the Royal College of Physicians and Surgeons of Canada.

1993 - 1998  Postgraduate MD, Faculty of Medicine, Dept of Radiation Oncology, University of Toronto.  
**Course Co-ordinator:** Applied Radiobiology.  
Eight 1h seminars, with formal written and oral examinations at end of course.

1992 - 1994  Continuing Education, Faculty of Medicine, Dept of Radiation Oncology, Princess Margaret
G. Research Supervision

1. PRIMARY OR CO-SUPERVISION

Undergraduate Education

Graduate Education

2010 - present  Primary Supervisor. PhD. Kristopher Dennis, Medical Science. *Radiation-induced nausea and vomiting.*
2003 - 2006  Co-Supervisor. MSc. Alina Mihai, Medical Science. *Is the inner shell ionization model predictive for the radiosensitization induced by halogenated pyrimidines?*

Undergraduate MD

2000

1999

Postgraduate MD

1998 - 1999

1996 - 1998

1996

1995 - 1996

1995 - 1996

1995

1994 - 1996

1994

1992 - 1993

Faculty Development

2013 Aug - 2014 Aug
Primary Supervisor. Xinhong He, Medical Science. Supervisee Position: Assistant Professor, Supervisee Institution: Fudan University, China. MRI changes post neoadjuvant chemoradiation for rectal cancer, Non-thesis Project. Awards: Fudan University, Shanghai Cancer Center. Collaborator(s): Laurent Milot.

2007 - 2009

Postdoctoral Research Fellow (PhD)

2008 - 2009

2007

2005 - 2007

2002 - 2007

2002
Primary Supervisor. PhD. Peng-Sheng Zheng, Medical Biophysics. HPV and p53 in human
anal carcinoma., Completed 2002.

1997 - 1999 **Primary Supervisor.** PhD. Bao-Fu Sun, Medical Biophysics. *Influence of HPV-E6 on radiosensitivity.*

1995 - 1999 **Primary Supervisor.** PhD. Yu-Qing Li, Medical Biophysics. *Radiation-induced apoptosis in rat spinal cord.*

1995 - 1996 **Primary Supervisor.** PhD. Ya-Ping Guo, Medical Biophysics. *Time course of radiation-induced apoptosis in adult rat spinal cord.*

Clinical Research Fellow (MD)

2001 - 2002 **Primary Supervisor.** MD. Bronwyn Matheson. *MRS changes in brain tumors and normal brain after radiotherapy.*

2. OTHER SUPERVISION

Graduate Education

**Thesis Committee Member**

2015 Sep - present **MSc.** Jae Lee, Physics. Supervisee Institution: Ryerson University. Supervisor(s): Carl Kumaradas.

2014 Sep - present **MSc.** Christianne Hoey, Medical Biophysics. Supervisor(s): Stanley Liu.

2014 Sep - present **MSc.** Chris Morrone, Laboratory Medicine and Pathobiology. Supervisor(s): JoAnne McLaurin.

2012 - present **PhD.** Elizabeth de Guzman, Medical Biophysics. Supervisor(s): Brian Nieman.

2014 - 2015 Apr **PhD.** Priscilla Lai (withdrawn), Medical Biophysics. Supervisor(s): Greg Czarnota.

2012 - 2014 **MSc.** Tiffany Scarcelli, Laboratory Medicine and Pathobiology.

2010 - 2012 **MSc.** Christina Kim, Medical Biophysics.

2007 - 2010 **MSc.** Justin Lee, Medical Biophysics.

2007 - 2009 **MSc.** Clinton Hubble, Medical Biophysics.

2007 - 2009 **MSc.** James Bae, Laboratory Medicine and Pathobiology.

2004 - 2006 **MSc.** Nick Davies, Medical Biophysics.

2003 - 2006 **MSc.** Amy Wong, Laboratory Medicine and Pathobiology.

2001 - 2004 **MSc.** Lindsay Park, Medical Biophysics.

1998 - 1999 **MSc.** A. Molckovsky, Medical Biophysics.

1992 **MSc.** A. Speke, Medical Biophysics.

1990 - 1992 **MSc.** T. Haston, Medical Biophysics.

**Thesis Examiner**

2014 **MSc.** Tiffany Scarcelli, Laboratory Medicine and Pathobiology.

2012 **MSc.** Christina Kim, Medical Biophysics.

2010 **MSc.** Justin Lee, Medical Biophysics.
2009  MSc. Clinton Hubble, Medical Biophysics.
2009  MSc. James Bae, Laboratory Medicine and Pathobiology.
2009  PhD. Brian Keller, Medical Science.
2006  MSc. Alina Mihai, Medical Science.
2006  MSc. Amy Wong, Laboratory Medicine and Pathobiology.
2006  MSc. Nick Davies, Medical Biophysics.
2005  MSc. Ashraf Mahmoud-Ahmed, Medical Biophysics.
2004  MSc. Lindsay Park, Medical Biophysics.
2003  PhD. David Wu, Laboratory Medicine and Pathobiology.
2003  MSc. Robert Nordal, Medical Biophysics.
2003  MSc. Shelly Atkinson, Medical Biophysics.
1999  MSc. A. Molckovsky, Medical Biophysics.
1999  MSc. K. De Jaeger, Medical Biophysics.
1999  MSc. Brenda Chow, Medical Biophysics.
1999  MSc. V. Vukovic, Medical Biophysics.
1995  MSc. M-C. Kavanagh, Medical Biophysics.
1992  PhD. C. Newcombe, Medical Biophysics.
1992  MSc. T. Haston, Medical Biophysics.
1992  MSc. A. Speke, Medical Biophysics.

Qualifying/Reclass Examiner
2016 Jun  Chris Morrone, Laboratory Medicine and Pathobiology. Supervisor(s): JoAnne McLaurin.
2015 May  MSc. Xiao Zhao, Medical Science. Supervisor(s): Fei-Fei Liu.
2014      MSc. Priscilla Lai, Medical Biophysics.
2012      MSc. Kristopher Dennis, Medical Science.
2012      PhD. Wei-Chih Cheng, Medical Science, Neuroscience.
2011      MSc. S. Mashouf, Medical Science.

Thesis Committee Member, Foreign Advisor
CURRICULUM VITAE

Name: Jason Wong, MD FRCP(C)

Business Address: Radiation Medicine Program
Stronach Regional Cancer Centre at
Southlake Regional Health Centre
596 Davis Drive
Newmarket, Ontario
L3Y 2P9

Telephone: 905-895-4521 ext. 6595
Fax: 905-952-2818
E-Mail: j3wong@southlakeregional.org

EDUCATION

University Education:
1996 – 1999 Bachelor of Science
McMaster University, Hamilton, ON, Canada

Post Graduate and Medical Training:
1999 – 2003 Doctor of Medicine
Queen’s University School of Medicine, Kingston, ON, Canada
2003 – 2008 Residency: Radiation Oncology
Princess Margaret Hospital, University of Toronto, Toronto, ON, Canada
2008 – 2009 Fellowship: Prostate/Gyne Brachytherapy
Seattle Prostate Institute, Swedish Medical Center, Seattle WA

Qualifications & Certifications:
2003 Licentiate of the Medical Council of Canada (LMCC): PART I (PASS)
2003 United States Medical Licensing Examination (USMLE): STEP 1 (PASS)
2003 United States Medical Licensing Examination (USMLE): STEP 2 (PASS)
2004 Licentiate of the Medical Council of Canada (LMCC): PART II (PASS)
2005 United States Medical Licensing Examination (USMLE): STEP 3 (PASS)
2008 – present Fellow of the Royal College of Physicians and Surgeons of Canada
2010 – present American Board of Radiology, Radiation Oncology

Licenses:
2008 Washington
2009-present California
2003-2008 Ontario
2013-present
CURRENT APPOINTMENTS

05/2013 – present
Active Staff, Radiation Oncology
Stronach Regional Cancer Centre (SRCC)
Southlake Regional Health Centre, Newmarket, Ontario, Canada

Active Staff, Radiation Oncology
The Princess Margaret Cancer Centre, Toronto, Ontario, Canada

PREVIOUS APPOINTMENTS

5/2012-5/2013
Program Director, Radiation Oncology Residency Program
Assistant Clinical Professor
Department of Radiation Oncology
School of Medicine
University of California, Irvine

10/2009-5/2013
Assistant Clinical Professor
Department of Radiation Oncology
School of Medicine
University of California, Irvine

08/2008-07/2009
Fellow in Radiation Oncology
Swedish Medical Center/Prostate Cancer Institute, Seattle, WA

08/2008-07/2009
Staff Radiation Oncologist
Stevens Hospital, Edmunds, WA
Highline Medical Center, Burien, WA
Valley Medical Center, Renton WA
Northwest Hospital, Seattle, WA

07/2003-06/2008
Resident in Radiation Oncology
Princess Margaret Hospital, Toronto, ON

05/2001-09/2001
Research Assistant
Serial tumor blood flow measurements in shionogi tumors
Prostate Centre, Vancouver General Hospital, University of British Columbia, BC

05/1999-08/1999
Research Assistant
Ottawa Heart Institute, Ottawa, ON

05/1998-08/1998
Research Assistant
Implantation of encapsulated myoblasts expressing VEGF in non-muscle sites induces localized angiogenesis
Department Molecular Biology and Pathology, McMaster University, Hamilton, ON

05/1997-08/1997
Research Assistant
Gene Therapy: Microencapsulation Gene Therapy
Department of Pediatrics, Faculty of Health Sciences, McMaster University, Hamilton, ON
HONORS & AWARDS

2012 ASTRO-ARRO Teacher of the Year award (Association Residents in Radiation Oncology)
2011 “Heroes in Healthcare” nomination University of California, Irvine Medical Center/ Chao Family NCI Cancer Center.
2010 Short Listed for Radiation Oncology 2009-2010 Educator of the Year Award
2001 British Columbia Cancer Agency Summer Research Scholarship
2000 Rehabilitation Institute of Chicago Summer Research Scholarship
2000 Queen's University Summer Research Studentship
1999 McMaster University BSc.- Summa Cum laude
1999 McMaster University Merit Senate Scholarship 1999
1999, 1998, 1997 McMaster University's Dean's Honor List

PROFESSIONAL AFFILIATIONS:

2009 - 2010 American Brachytherapy Society
2008 - present Fellow of the Royal College of Physicians and Surgeons of Canada
2007 - present American Medical Association
2005 - present Canadian Association of Radiation Oncologists
2005 - present American Society for Therapeutic Radiology and Oncology (ASTRO)
2003 - 2008 Royal College of Physicians and Surgeons of Canada: Resident Member
2003 - 2008 College of Physicians and Surgeons of Ontario: Member
1999 - 2010 Ontario Medical Association: Member
1999 - 2010 Canadian Medical Association: Member

CURRENT CLINICAL STUDIES

2014-present A pilot project to assess the feasibility of introducing patient reported outcomes into the Standard of Care of patients undergoing radiation treatment for rectal carcinoma in the radical setting.
Principal Investigator: Kassam, Z
REB #0065-1314 (SRHC)

2014-present Prospective Evaluation and Data mining to predict and minimize Individual Clinical Toxicity in Breast cancer radiotherapy (PREDICT – Bre)
Principal Investigator: Ruschin M, Local Principal Investigator: Fenkell L
REB # 0012-1415 (SRHC)

2015 A Multicentre Randomized Controlled Clinical Trial for the Reduction of Acute Skin Reaction in Adjuvant Breast Radiation in Large Breasted Women using a Prone Technique
Principal Investigators: Fenkell, L and Comsa D
REB # 0005-1516 (SRHC)

1. EDUCATION

Degrees
2001 MSc, Clinical Epidemiology, McMaster University, Canada
1984 MB ChB, Medical School, Sheffield University, United Kingdom

Postgraduate, Research and Specialty Training
2015 Mar Scholar, Health Professional Education, Harvard Macy Institute, Boston, United States

Qualifications, Certifications and Licenses
1989 FRCP, Radiation Oncology, Royal College of Physician and Surgeons of Canada, Canada

2. EMPLOYMENT

Current Appointments
2014 - present Vice Chair, Education, Radiation Oncology, University of Toronto, Canada
2010 - present Full Professor, Radiation Oncology, University of Toronto, Canada
2002 - present Associate member, Institute of Medical Science, University of Toronto, Canada
2002 - present Associate member, Health Policy, Management and Evaluation, University of Toronto, Canada
2001 - present Active staff, Radiation Medicine Program, Princess Margaret Hospital, University Health Network, Canada

Previous Appointments
HOSPITAL
2012 Committee Member, Search Committee for Chief of Radiation Medicine Program, Radiation Medicine Program, Princess Margaret Hospital
1990 - 2001 Active staff, Toronto-Sunnybrook Regional Cancer Centre, Canada
1990 - 2001  Active staff, Sunnybrook and Women’s College Health Sciences Centre, Canada

UNIVERSITY
2008 - 2012  Associate Program Director, Post Graduate Medical Education, Medicine, Faculty of, Radiation Oncology, University of Toronto
2002 - 2008  Director, Medicine, Faculty of, Radiation Oncology, University of Toronto

Resident Research

UNIVERSITY - RANK
2013 - 2014  Acting Vice Chair, Education, Radiation Oncology, University of Toronto, Canada
2012 - 2014  Chair, Social Responsibility, Professionalism and Equity, Radiation Oncology, University of Toronto, Canada
2004 - 2010  Associate Professor, University of Toronto, Canada
1997 - 2004  Assistant Professor, University of Toronto, Canada
1990 - 1997  Lecturer, University of Toronto, Canada

3. HONOURS AND CAREER AWARDS

Distinctions and Research Awards

LOCAL

Received

2015  Most Influential Research Publication, Princess Margaret Hospital. (Distinction)
2011  Research Leadership Award, Radiation Medicine Program, Princess Margaret Hospital, Canada. (Distinction)
2009  Excellence in Research Leadership, Radiation Oncology, University of Toronto, Canada. (Distinction)
2009  Guest Lecture Award, Medical Radiation Science Program, University of Toronto, Canada. (Distinction)
2007  Most Influential Research Publication, Princess Margaret Hospital. (Distinction)

4. PROFESSIONAL AFFILIATIONS AND ACTIVITIES

Professional Associations

2013 - present  Member, Canadian Society for Epidemiology and Biostatistics
2009 - present  Member, American Society of Clinical Oncology, 56211
2000 - present  Member, American Society of Therapeutic Radiation Oncology, 35150684
1998 - present  Member, Multinational Association for Supportive Care in Cancer
1991 - present  Member, Canadian Association of Radiation Oncologists
1990 - present  member, Ontario Medical Association
1995 - 2000  Member, Canadian Palliative Care Association

Administrative Activities

INTERNATIONAL

AJCC Cancer Staging System
2014 - present  Member, Expert Panel - Neuroendocrine tumor
American Society Therapeutic Radiation Oncology
2013 - present  Annual Meeting Organizing Committee - Palliative Track, United States.
2012 - 2014  Annual Meeting Organizing Committee - Gastrointestinal Track, United States.

ASTRO
2014 - present  Member, Guidelines Sub-Committee
2014 - 2015  Member, Bone Metastases Guideline Working Group
2014 - 2015  Member, Combining Precision Radiotherapy with Precision Molecular Targeting White Paper Working Group
2014  Member, Guidelines and Best Practice Task Force
2013 - 2014  Member, Health Care Access and Training Subcommittee

Cochrane Collaboration
2001 - 2005  Chair, University of Toronto Committee

Intergroup Esophagogastric Working Group
2006 - present  Member

Multinational Association in Supportive Care
2005 - 2006  Member, Organizing Committee, 2006 Annual Meeting

NRG
2014 - present  Member, Cancer Care Delivery Research Committee
2014 - present  Member, CPC Scientific Committee

Radiation Therapy Oncology Group
2010 Jul - present  Member, Community Clinical Oncology Program Steering Committee, United States.

UICC
2011 - present  Member, Expert Panel - Upper GI TNM Watch

NATIONAL
Canadian Association of Radiation Oncologists
2006 - 2011  Member, Steering committee, Symptom Control Advisory Board
2004 - 2005  Chair, Symptom Control Advisory Board
2003 - 2004  Chair, Symptom Control Task Force

National Cancer Institute of Canada/Clinical Trials Group
2009 - present  Chair, Symptom Control Committee
2003 - present  Co-Chair, Esophageal Disease Working Group
2001 - 2009  Co-Chair, Symptom Control Committee
1999 - 2009  Member, Gastrointestinal Site Group
1996 - 1998  Member, Symptom Control Committee
**Palliative Radiation Oncology Group, Canada**

2002 - 2014  **Princess Margaret Hospital Site Chair**
2000 - 2014  **Founding Co-Chair**

**PROVINCIAL / REGIONAL**

**Cancer Care Ontario**

- **2011 - present**  **Member**, Colorectal Cancer Treatment Pathway Expert Panel, Colorectal Cancer Team Disease Management Pathway Initiative
- **2011 - present**  **Member**, Colorectal Cancer Diagnosis Pathway Expert Panel, Colorectal Cancer Team Disease Management Pathway Initiative
- **2008 - present**  **Member**, Colorectal Cancer Team Disease Management Pathway Initiative
- **2013 - 2014**  **Member**, NET Operating Council
- **2012 Jul 1**  **Member**, Radionuclide Therapy Operating Council & Executive Committee, Ontario, Canada.
- **2011 - 2014**  **Member**, Report Approval Panel, Practice Guideline Initiative
- **2008 - 2011**  **Co-Chair**, Gastrointestinal Site Group, Practice Guideline Initiative
- **2003 - 2004**  **Chair’s representative**, Guidelines Coordinating Committee, Practice Guideline Initiative
- **2001 - 2008**  **Co-Chair**, Supportive Care Guidelines Group, Practice Guideline Initiative
- **2001**  **Founding Co-chair**, Supportive Care Guidelines Group, Practice Guideline Initiative
- **1991 - 2009**  **Member**, Gastrointestinal Site Group, Practice Guideline Initiative
- **1991 - 1998**  **Member**, Sarcoma Site Group, Practice Guideline Initiative

**LOCAL**

**Other Organizations**

- **2015 Jul - present**  Executive Committee, Faculty of Medicine, Dept of Radiation Oncology, MHSc, Graduate Education, Canada.
- **2014 Jul 1 - present**  Admissions Committee, Faculty of Medicine, Institute of Medical Science, Graduate Education, Canada.
- **2014 Jul 1 - present**  Board of Examiners, Faculty of Medicine, Dept of Radiation Oncology, Medical Radiation Science, Ontario, Canada.

**Mitchener Institute**

- **2014 - present**  Joint Management Committee, Faculty of Medicine, Dept of Radiation Oncology, Canada.

**Mitchener Institute for Applied Health Sciences**

- **2001 - 2003**  **Faculty Advisor**, Diploma Program

**Toronto-Sunnybrook Regional Cancer Centre**

- **1999 - 2001**  **Research Director**, Rapid Response Radiotherapy Program
- **1993 - 2001**  **Member**, Sunnybrook Chinese Community Group
- **1993 - 2001**  **Member**, Patient Education Committee
- **1992 - 2001**  **Member**, Radiation Oncology Staff Selection Committee

**University Health Network, Princess Margaret Hospital**

- **2015 - present**  **Member**, Cancer Education Committee
- **2011 - present**  Cancer Clinical Research Unit Executive Committee, Canada.
- **2002 - present**  **Member**, Pharmacy & Therapeutics Oncology Subcommittee
2010 - 2011  **Chair**, Radiation Oncologists Partnership, Radiation Medicine Program
2009 - 2010  **Vice Chair**, Radiation Oncologists Partnership, Radiation Medicine Program
2008 - 2009  **Treasurer**, Radiation Oncologists Partnership, Radiation Medicine Program
2004 - 2010  **Coordinator**, QA rounds, GI site group, Radiation Medicine Program
2001 - 2003  **Member**, Research Ethics Board

**University Health Network, Princess Margaret Hospital, Radiation Medicine Program**
2004 - present  **Physician leader**, Super Team IV
2004 - present  **Coordinator**, Esophageal Cancer, GI site group
2004 - present  **Leader**, Palliative Radiation Oncology Program

**University Health Network, Princess Margaret Hospital, Radiation Medicine Program**
2014 - present  **Member**, Steering Committee, Canada.
2014 - present  **Chair**, Education Committee, Canada.
2014 - present  **Director**, Education, Canada.
2009 - present  **Director**, Clinical Research Program,

**University of Toronto**
2012 - present  **Member**, Decanal Promotions Committee, Faculty of Medicine
2003 - present  **Interviewer**, Medical School Admissions Committee, Faculty of Medicine

**University of Toronto - Dept Radiation Oncology**
2013 - present  **Member**, Executive Committee, Faculty of Medicine, Dept of Radiation Oncology
2013 - present  **Member**, Fellowship Training Program Committee, Faculty of Medicine, Dept of Radiation Oncology
2013 - present  **Member**, Appointments Committee, Faculty of Medicine, Dept of Radiation Oncology
2013 - present  **Member**, Promotions Committee, Faculty of Medicine, Dept of Radiation Oncology
2008 - present  **Associate Program Director**, Radiation Oncology Postgraduate Medical Education Committee, Faculty of Medicine, Dept of Radiation Oncology, Postgraduate MD
2012 Sep - 2013 May  **Member**, Target Insight VII organizing committee, Faculty of Medicine, Dept of Radiation Oncology, Ontario, Canada.
2002 - 2008  **Resident Research Director**, Radiation Oncology Postgraduate Medical Education Committee, Faculty of Medicine, Dept of Radiation Oncology, Postgraduate MD
1993 - 1998  **Member**, North York General Hospital Post-Graduate Education Committee, Radiation Oncology Postgraduate Medical Education Committee, Faculty of Medicine, Dept of Radiation Oncology, Postgraduate MD
1993 - 1997  **PGY 1-2 Co-ordinator**, Radiation Oncology Postgraduate Medical Education Committee, Faculty of Medicine, Dept of Radiation Oncology, Postgraduate MD
1991 - 1998  **Member**, Radiation Oncology Postgraduate Medical Education Committee, Faculty of Medicine, Dept of Radiation Oncology, Postgraduate MD

**University of Toronto - IHPME**
2011 - present  **Member**, Co- Course Instructor Guidelines (HAD 5305), Faculty of Medicine, Inst of Health Policy, Mgmt & Evaluation
2004 - 2007  **Interviewer**, Faculty of Medicine, Inst of Health Policy, Mgmt & Evaluation

C. Academic Profile

1. RESEARCH STATEMENTS

Symptom Control in Radiation Oncology.
The use of palliative radiotherapy to relieve symptoms is well established in clinical practice. However, advances to improve on its therapeutic ratio is hampered by the methodological challenges inherent in conducting research in palliative populations.

Capacity building is an important component of research and development in this content area. I served as the research director for the palliative radiotherapy program at Toronto Sunnybrook Regional Cancer Centre between 1999-2001, and the leader for the Palliative Radiation Oncology Program at Princess Margaret Hospital since 2004. I was the founding chair for the Symptom Control Advisory Board for the Canadian Association of Radiation Oncologists, and serve as its chair between 2003-2005, and continue to serve as a member of its steering committee. Specific initiatives implemented during this time included theme symposium in symptom control research at our annual scientific meeting in 2005, symptom control research methods workshop 2005, establishing an annual symptom control research award, and co-founded the Canadian Palliative Radiation Oncology Group, a forum for monthly research discussions across Canada. In collaborating with its current chairs, educational objectives in symptom control for Canadian radiation oncology residents are closing completion. The research and educational environment created has expanded interest in symptom control research among radiation oncology trainees and attracted international postgraduate trainees, expanding the pool of collaborative talents. To facilitate research at the national level, I have been serving as the chair for the Symptom Control Committee at the National Cancer Institute of Canada Clinical Trials Group since 2001. During this time, palliative radiotherapy trials have been established as one of the four strategic directions for this group, with two national and one international Phase III radiotherapy focused symptom control trials within our portfolio.

At a policy level, I was the founding Chair for the Supportive Care Guidelines Group, Cancer Care Ontario Program in Evidence based Care and serve as its Chair until 2008. During this time, I have attracted talented junior faculty in taking on performing systematic reviews and guidelines development in bone metastases, brain metastases and skin care following radiotherapy. These guidelines have served as key resources and foundations for pattern of practice evaluation.

At a research level, since 2004, I have authored and or collaborated on 23 peer-reviewed articles in the area of symptom control. These research efforts have established the efficacy of dexamethasone in the prophylaxis of radiation induced emesis, described the impact of technology on palliative radiotherapy delivery, and most recently the development and implementation of a 1 step simulate to treatment process resulting in reduced waiting time and improved access and quality of patient care. A series of sequential projects led to the development of a combined story and fact based patient educational resource for patients and caregivers with brain metastases now in clinical use. My work also established the use of virtual consultation to facilitate multidisciplinary care opinion for patients with spinal cord compression, reducing the need for patient transfers while securing reliable multidisciplinary opinions to facilitate timely commencement of optimal patient care.
From Evidence to Guidelines Development.
To translate research results into clinical practice, enabling tools are needed. The methodology of systematic reviews and clinical guidelines provide transparency, while engaging community opinion leaders’ to adapt evidence into clinical practice. I have chosen to engage in this process through involvement with the Cochrane Collaboration and the Cancer Care Ontario Program in Evidence Based Medicine.

At the level of capacity building, I served as the Toronto Chair to the Canadian Cochrane Collaboration and Network between 2001-2005, seeking out potential learners and creating learning opportunities both local and nationally. Specifically, training workshop were tailored and successfully conducted for trainees in internal medicine, family medicine, radiation oncology residents and fellows, and radiation oncology faculty in addition to systematic reviewers from other disciplines. As the Chair to the Supportive Care guidelines Group between 2001-2008, I have led the effort to identify key topics important in supportive care, engage clinical experts across multiple disciplines, serve as a methodological resource, resulting in the development of clinical guidelines on 8 different clinical areas including bone, brain metastases, skin care following radiotherapy, lymphedema, depression, pain, and shortness of breath. These documents represent part of the key resources in the field.

I have authored three Cochrane reviews (bisphosphonates in bone pain, chemoradiotherapy in esophageal cancer, preoperative radiotherapy for rectal cancer). The bisphosphonates review served as the basis for a Health Technology Report on this topic, while both esophageal and rectal reviews served as the basis for clinical practice guidelines for Ontario.

Optimizing the Use of Radiotherapy in the Management of Esophageal Cancer. Radiotherapy has a key role to play in both the curative and palliative management of esophageal cancer although strategies to improve outcomes are still clearly needed. From a capacity building perspective, I serve as the Chair to the Esophageal Disease working group for the National Cancer Institute of Canada Clinical Trials Group since 2003, and has been a member of the Esophago-Gastric Task Force for the GI Intergroup US.

From a policy perspective, I have authored and co-authored the evidence and practice guidelines on the management of esophageal cancer, leading to improved consistency and quality of care in this area for our province. The availability of PET scan for the staging of esophageal cancer has until now been elusive to Ontarians. I led the review of the literature, co-authored and led the subsequent provincial discussions on PET and esophageal cancer. These efforts have translated into the approval of the use of PET for patients who are potential candidates for curative therapy. These practice changes have a direct effect on optimizing the choice and quality of therapy for esophageal cancer patients.

In terms of research, I have led a phase II study on the use of accelerated fractionation for the palliative management of dysphagia establishing its efficacy and favourable toxicity profile. As the Canadian Principal investigator, in collaboration with the Trans-Tasman Radiation Oncology Group, we are nearing completion of a study examining the effect of radiotherapy with or without chemotherapy for the relief of dysphagia (ES2). As the radiation oncology lead at our institution, we are currently conducting our second phase II study in tri-modality therapy for localized disease, where adjuvant sutent, is being tested. A strategy combining early brachytherapy and our experience in accelerated fractionation in esophageal cancer for the elderly is in development. My research has also contributed to establishing the role of PETCT in improving the quality of radiotherapy planning for esophageal cancer.

2015 Feb - 2018 Jan  
**Co-Investigator.** A phase III study of palliative radiotherapy for symptomatic hepatocellular carcinoma and liver metastases. Canadian Cancer Society Research Institute. Quality of Life Research Grants. PI: Dawson, Laura. Collaborator(s): Chris O’Callaghan, Jolie Ringash, **Rebecca Kwok Sum Wong**, Derek Jonker, Camilla Zimmerman, Sarin Ekizian, Dongsheng Tu. 299,916 CAD. [Clinical Trials]  
*A phase III study of palliative radiotherapy for symptomatic hepatocellular carcinoma and liver metastases*  
*Advanced liver cancer is often not treatable and causes pain that is hard to control. In a prior study, Dr Laura Dawson found that low-dose radiation therapy reduced cancer-related pain in liver cancer patients. In this new clinical trial, she will compare the effectiveness of radiation vs. standard supportive care alone in improving pain in patients with advanced liver cancer who are not candidates for standard therapy. By determining an improved pain management strategy, this study could have a huge impact on quality of life for cancer patients in palliative care.*

### E. Publications

1. **MOST SIGNIFICANT PUBLICATIONS**

   *This is a review paper describing the current evidence supporting indications of radiotherapy in gastric cancer.*

   *This randomized trial was conceived and completed by the symptom control committee Canadian Cancer Clinical Trials Group, establishing the role of a single fraction as effective in providing pain control as pretreatment for bone metastases. It is significant both in its contribution to the practice of radiation oncology, as well as being testament of the impact of the symptom control committee which I am the chair.*

Palliative radiotherapy should be effective and delivered with the least delay. This work formed the basis of the clinical testing and implementation of an on-line planning process. The clinical results are to be published. This has been translated from research to clinical practice.

The first review was published in 2001. This is a substantial update incorporating new contemporary evidence and methodology. This has been a definitive resource in support of the use of combination chemoradiotherapy for the curative management of esophageal cancer. This review formed the foundation of the Ontario Practice Guideline on the same topic.

One of the strategic directions of the Symptom Control Committee at the National Cancer Institute of Canada is to examine strategies to improve the side effects of cancer treatments. Building on the results of SC12, this study established the effect of dexamethasone in the prophylaxis of radiation induced emesis. This work was awarded the most influential publication award in 2007 at Princess Margaret Hospital. Radiation Medicine Program.

**G. Teaching and Design**

1. Program innovation to build research capacity among radiation oncology oncology trainees

My contribution to residency research can be traced back to 2002. During this time, while research is an expectation, the mechanism in which trainees would initiate their projects were not well defined, and more substantial projects were often deferred due to a delayed start in the planning stages. We hypothesized that the introduction of a defined process, including an instructional research methods course would improve the quality and quantity of research undertaken by our trainees, and contribute to a life time quest for research for improved patient care. With that in mind, I led the creation of the radiation oncology resident research program, putting in place specific goals, objectives, responsibilities and milestones. The framework allowed both residents and faculty to share a common expectation, encouraged dialogue during early months of the residency to secure a supervisor and a research topic. She also designed and implemented the PGY1 research methods course that was first offered in 2002. The program structure was further refined in 2012 with the introduction of the Biannual Resident Research Half Day. The objectives were to provide a forum for residents to present
their work in progress as well as prior to external dissemination of their findings. It was also expected to serve the dual objective of broadening faculty engagement.

We first compiled the annual Resident Research Report in 2002 summarizing academic deliverables (abstracts, publications, grants etc) to provide metrics and evidence for ongoing improvement of the program. Guidance to consider creative professional activities was introduced in 2011. Each of these process improvements has evolved from novel ideas at the time to become part of our standard curriculum. Metrics for impact can be observed from the research reports, evaluations of the events. Publications during residency provide a and as broad summary indicator.

2. Incorporating pedagogy into the clinical environment

Clinical, education and research excellence is an essential triad for continuously striving for the best outcomes for our patients. In contrast to the robust training in physician training for clinical and research excellence, knowledge based on how to become an excellence teacher receives minimal attention. Mechanisms to bring pedagogical principles to our faculty deserves deliberate and systematic action. It was hypothesized that faculty development that is embedded within our daily activities will enable the greatest uptake. With this in mind, in 2015 put in place the first of a series of efforts. RMP Education Rounds were introduced in Jan 2015, designed to provide a sustained forum to highlight novel education theories, education projects in development and accomplishments by our peers. The Radiation Medicine Summer Series entitled "New Age Education" was launched. Designed to appeal to radiation medicine practitioners and beyond, the series provided frameworks, tools and new ideas in education that would inspire. In 2016, the University of Toronto Department of Radiation Oncology Evening journal club were introduced. This education event goes beyond our organization walls and is designed to build a forum for learning among the radiation medicine community across greater GTA.

e. Teaching research skills to radiation medicine trainees in low and middle income country

Research capacity building is recognized to be critical skill that is required to enable innovation and change. From evidence to practice, knowledge translation requires deliberate intent, action and tools. The Radiation Medicine Program at Princess Margaret Cancer Center has as its vision to be “the radiation medicine education provider of choice” although efficient and careful deployment of resources are needed for sustainability and impact, especially when designing strategies to support colleagues in low and middle income countries. It is hypothesized that a joint mentorship strategy between the host institution and external faculty (e.g. PMH) as a source of methodological expertise and capacity, would be effective in enhancing clinical research capacity. In 2015, the inaugural PMH-Ghana research mentorship program was established. A collaborative project with the national radiation oncology facility in Ghana, this year long mentorship program accepted its first cohort of five radiation oncology trainees in Jan 2015. This successful program will expand her offerings to trainees in Nigeria and Zimbabwe in 2016.

1. INNOVATIONS AND DEVELOPMENT IN TEACHING AND EDUCATION

2016 Jan - present Evening Journal Club, Continuing Education, Faculty of Medicine, Dept of Radiation Oncology

This education event is designed to build a forum for learning among the radiation medicine community across greater GTA. Speakers are invited to show case innovations and research accomplished or planned as a University Department.

2015 Jan - present PMH-Ghana research mentorship program, Postgraduate MD, Faculty of Medicine, Dept of Radiation Oncology, Princess Margaret Cancer Center

A collaborative project with the national radiation oncology facility in Ghana, this year long mentorship program is designed to teach radiation oncology residents in low and middle income countries critical appraisal and basic research methods. It is our vision that teaching and mentorship provided in this way would enable critical evaluation of new technologies and evidence - a life long skill that is the cornerstone for better patient care and outcomes.

2015 Jan - present RMP Education Rounds, Faculty Development, Faculty of Medicine, Dept of Radiation Oncology

Designed to provide a sustained forum to highlight novel education theories, education projects in development and accomplishments by our peers.
2010 - present  
Research Methods course - Radiation Oncology Residency Program, Postgraduate MD, Faculty of Medicine, Dept of Radiation Oncology, Post-Graduate Medical Education Resident Training Program, Princess Margaret Hospital  
*This is an introductory research course designed for PGY1-2 (delivered during academic block). Topics ranged from Qualitative research to randomized trials.*

2015 Jul - 2015 Aug  
Summer Series - New Age Education, Faculty Development, Faculty of Medicine, Dept of Radiation Oncology, Radiation Medicine Program  
*Designed to appeal to radiation medicine practitioners and beyond, the series provided frameworks, tools and new ideas in education that is intended to inspire.*

2012 Jul 1 - 2013 Jun 30  
Biannual Research Half Day - Radiation Oncology Residency Program, Postgraduate MD, Faculty of Medicine, Dept of Radiation Oncology, Post-Graduate Medical Education Resident Training Program, Princess Margaret Hospital  
*Research Half Day was designed to provide a forum for residents to*  
- present their work in progress  
- present their major research project for approval  
- provide feedback to your peers  
- Obtain feedback from your peers and faculty  
- nominate projects for CARO/ASTRO/UT research day submissions (Jan session)  
- practice presentation for CARO/ASTRO presentations (Aug session).

J. Creative Professional Activities

1. PROFESSIONAL INNOVATION AND CREATIVE EXCELLENCE
2. CONTRIBUTIONS TO THE DEVELOPMENT OF PROFESSIONAL PRACTICES

3. EXEMPLARY PROFESSIONAL PRACTICE

2008  Champions of Care, Sunnybrook Health Sciences Centre, February 2008.
Description (taken from http://sunnybrook.ca/foundation/content/?page=champions): If you or a loved one has received special care from a doctor, nurse, technician, volunteer or any staff member, you can recognize them as a Champion of Care by making a donation in their honour. Your Champion of Care will receive an acknowledgement card and a commemorative pin to wear in recognition of your generosity.
Jasper Yuen

**Peel Radiation Oncology, Peel Regional Cancer Centre, Credit Valley Hospital**
Staff Radiation Oncologist
- Aug 2009-present
- Head of Brachytherapy
- Physician Lead - Gynecology
- Physician Co-Lead - Thoracic
- Physician Champion - Smoking Cessation Program, Quality Assurance
- Site Groups: Gynecology, Thoracic, Prostate, Breast, Palliative, SBRT
- Hospital Privileges
  - Credit Valley Hospital
  - William Osler Health Centre - Brampton Civic Hospital

**Education**

**Fellowship in Radiation Oncology**
Memorial Sloan-Kettering Cancer Center New York, New York
- Brachytherapy Fellowship
- July 2008 – June 2009

**Residency in Radiation Oncology**
University of Western Ontario London, Ontario
- July 2004 – June 2008
- Chief Resident 2007
- PostGraduate Education Committee
- Residency Selection Committee

**First Year Internship in Radiation Oncology**
University of Alberta Edmonton, Alberta
- July 2003 – June 2004

**Doctor of Medicine**
University of Western Ontario London, Ontario
- September 1999 – June 2003
- Summer Research Training Program
- Class Secretary and Treasurer

**Bachelor of Science with Honours First Class (ssp)**
Queen’s University Kingston, Ontario
- Life Sciences – Subject of Specialization
- September 1995 – May 1999

**Awards received**
Alexander Rutherford Scholarship 1995

1. EDUCATION

Degrees
1971 - 1975 MD, University of Toronto, Toronto, Ontario, Canada
1969 - 1970 BA, University of Toronto, Toronto, Ontario, Canada

Postgraduate, Research and Specialty Training
1976 - 1978 Resident, Radiation Oncology, University of Toronto, Toronto, Ontario, Canada
1975 - 1976 Internship, University of Toronto, Toronto, Ontario, Canada
1975 - 1976 Resident, General Internal Medicine, University of Toronto, Toronto, Ontario, Canada
1983 Fellow, Radiation Oncology, Hamilton Regional Cancer Centre, McMaster University, Hamilton, Ontario, Canada

Qualifications, Certifications and Licenses
1983 Fellowship in Radiation Oncology, Royal College of Physicians and Surgeons of Canada, United States
1982 Diploma, American College in Therapeutic Radiology, United States
1978 General License, Ontario College of Physicians and Surgeons, Canada
1975 License, Medical Council of Canada, Canada

2. EMPLOYMENT

Current Appointments
2005 - present Associate Professor, Radiation Oncology, University of Toronto, Toronto, Ontario, Canada
1993 - present Assistant Professor, Obstetrics and Gynaecology, University of Toronto, Toronto, Ontario,
Ida ACKERMAN
Canada

1984 - present  Staff, Radiation Oncologist, Sunnybrook Health Sciences Centre, Odette Cancer Centre, Toronto, Ontario, Canada

Previous Appointments

CLINICAL
1978 - 1979  Clinical Associate, Princess Margaret Hospital, Toronto, Ontario, Canada

UNIVERSITY - RANK
1995 - 2005  Assistant Professor, Radiation Oncology, University of Toronto, Toronto, Ontario, Canada
1984 - 1995  Lecturer, Radiation Oncology, University of Toronto, Toronto, Ontario, Canada

OTHER
2014 Oct - 2015 Mar  Consulting staff, Department of Surgery, North York General Hospital, Toronto, Ontario, Canada

3. HONOURS AND CAREER AWARDS

Distinctions and Research Awards

NATIONAL
Received
1984  Blair Fellowship, Canadian Cancer Society, Canada.

LOCAL
Received
1969  Ontario Scholar, Canada. (Distinction)

Teaching and Education Awards

LOCAL
Received
2008  Medical Radiation Sciences, Program, Guest Lecturer Award, Dept of Radiation Oncology, Faculty of Medicine, University of Toronto, Toronto, Ontario, Canada
2005  Postgraduate Research Supervisor Award, Dept of Radiation Oncology, Faculty of Medicine, University of Toronto, Toronto, Ontario, Canada
2004  Postgraduate Advocacy and Mentorship Award, Dept of Radiation Oncology, Faculty of Medicine, University of Toronto, Toronto, Ontario, Canada
2002  Radiation Oncology Residents Award, Dept of Radiation Oncology, Faculty of Medicine, University of Toronto, Toronto, Ontario, Canada
1997  Radiation Oncology Residents Award, Dept of Radiation Oncology, Faculty of Medicine, University of Toronto, Toronto, Ontario, Canada
1992  Radiation Oncology Residents Award, Dept of Radiation Oncology, Faculty of Medicine,
4. PROFESSIONAL AFFILIATIONS AND ACTIVITIES

Professional Associations

1991  Member, American Society of Clinical Oncology
1987  Member, International Gynecological Cancer Society
1986  Member, Canadian Association of Radiation Oncology (CARO)
1984  Member, American Society of Therapeutic Radiation Oncology
1982 - 1986 Member, Canadian Association of Radiologists

Administrative Activities

INTERNATIONAL

American Society of Therapeutic Radiation Oncology
1997 - 2004 Member, International Committee, United States.

International Gyne Cancer Society Biennial Meeting
2002 - 2004 Member, International Scientific committee

International Gynecologic Cancer Society

2006 Member, Education Committee, Postgraduate MD
2005 Coordinator, Tumor Board
2004 Member, Scientific Committee, 10th Biennial Meeting, Toronto, Ontario, Canada.
2004 Member, Nominating Committee
1999 - 2004 Council Member, Canada.
1999 - 2004 Member, Treatment Practice Guidelines Committee, Canada.

NATIONAL

Canadian Association of Radiation Oncology

2006 - 2012 Member, Foundation Board of Directors, Canada.
2006 - 2011 Ex-officio board member, Canada.
2005 - 2008 Member, Manpower Committee, Canada.
2002 - 2004 Member, Education Committee, Canada.
2001 Member, Committee for Annual Scientific Meeting. Toronto, Ontario, Canada.
2000 - 2002 Member, Annual Scientific Meeting Committee, Canada.
1999 - 2001 Past President, Canada.
1997 - 1999 President, Canada.
1995 - 1997 President Elect, Canada.
1994 - 1995 Ontario Director, Canada.

Canadian Association of Radiation Oncology Foundation
Ida ACKERMAN

2006 - 2007  **Member**, Board of Director

**Canadian Coalition on Cancer Surveillance**

1997 - 2000  **Member**, Canada.

**CARO-CROF**

2006 - 2011  **President**, Foundation Board of Director Member, Canada.

**Gynecology Oncology Society of Canada**

1998 - 2000  **Member**, Executive Committee Member, Canada.

**Health Canada - Cancer Control Strategy**

1999 - 2001  **Member**, Surveillance Working Group, Canada.

**Royal College of Physicians and Surgeons of Canada**

1992 - 2000  **Member**, Examination Board in Radiation Oncology, Canada.

**PROVINCIAL / REGIONAL**

**Cancer Care Ontario**

2008 - 2009  **Member**, Expert Panel

*Delivery of Brachytherapy for Cervical Cancer: Organizational and Technique advice.*

**Toronto Sunnybrook Regional Cancer Centre**

2005 - 2006  **Coordinator**, Postgrad Radiation Oncology Program, Postgraduate MD, Toronto, Ontario, Canada.

*Organization of Treatment Planning Exams for PGY4 &5: 60 hrs, Internal review of postgraduate program: 1 hr
  Internal review of department: 1 hr.*

2004 - 2005  **Coordinator**, Radiation Oncology Program, Postgraduate MD, Toronto, Ontario, Canada.

**LOCAL**

**Princess Margaret Hospital/University of Toronto**

2015 Dec 4  **Examiner**, CPEE, Faculty of Medicine, Dept of Radiation Oncology, Postgraduate MD, Toronto, Ontario, Canada.

**University of Toronto**

1995 - present  **Member**, Gyne Oncology Fellowship Committee, Faculty of Medicine, Division of Gynecologic Oncology, Postgraduate MD, Toronto, Ontario, Canada.

2009 - 2014  **Member**, Postgrad Medical Oncology Program, Faculty of Medicine, Dept of Radiation Oncology, Postgraduate MD, Toronto, Ontario, Canada.

2009 - 2011  **Member**, Target Insight Organizing Committee, Postgraduate MD, Toronto, Ontario, Canada.

2008 - 2014 **Associate Director**, Postgraduate Medical Education Committee, Department of Radiation Oncology, Faculty of Medicine, Dept of Radiation Oncology, Postgraduate MD, Toronto, Ontario, Canada.

2008 - 2009 **Member**, Clinical Trials Award and Advisory Committee (CTAAC), Toronto, Ontario, Canada.

2008 - 2009 **Member**, Translational Research in Clinical Trials Committee (TRICC), Toronto, Ontario, Canada.

2008 - 2009 **Interim Director**, Department of Radiation Oncology, Toronto, Ontario, Canada.

2008 **Member**, Education Awards Review Committee, Postgraduate MD, Toronto, Ontario, Canada.

2007 - 2011 **Member**, UTDRO Education Awards Review Committee, Postgraduate MD, Toronto, Ontario, Canada.

2007 - 2009 **Member**, Teaching Effectiveness Committee, Toronto, Ontario, Canada.

2006 - 2012 **Board Examiners Member**, Medical Radiation Sciences Program, Toronto, Ontario, Canada.

2001 **Member**, Organizing Committee – Biennial, Toronto, Ontario, Canada.  
*Dept. of Radiation Oncology Refresher Course “Target Insight”.*

1999 - 2001 **Co-Chair**, Breast Site Group, Toronto, Ontario, Canada.

1996 - 2010 **Member**, CE Committee, Toronto, Ontario, Canada.

1995 - 2010 **Member**, Academic Promotions Committee, Department of Radiation Oncology, Faculty of Medicine, Dept of Radiation Oncology, Toronto, Ontario, Canada.

1995 - 2012 **Member**, UTDRO Education Awards Review Committee, Postgraduate MD, Toronto, Ontario, Canada.

1994 **Member**, Organizing and Scientific Committee, Toronto, Ontario, Canada.  
*Department of Radiation Oncology Refresher Course on Clinical Aspects of Radiation Biology.*

1992 - 1993 **Member**, Undergraduate Medical Education Committee, Faculty of Medicine, Dept of Radiation Oncology, Undergraduate Education, Toronto, Ontario, Canada.

1991 - 2001 **Chair**, TSRCC Gynecology Group, Toronto, Ontario, Canada.

**OTHER**

**Other Organizations**

2008 - 2012 Target Insight Organizing Committee and Speaker, Ontario, Canada.

2008 - 2010 Research Day Organizing Committee, Ontario, Canada.

2006 - 2014 CARMS, Ontario, Canada.

1995 - 2014 Gyne Oncology Fellowship Committee, Canada.

**Peer Review Activities**

**EDITORIAL BOARDS**

**Other**

2001 - 2006 International Journal Gynecological Cancer

1995 - 2006 Gynecologic Oncology
GRANT REVIEWS

External Grant Reviewer

MANUSCRIPT REVIEWS

Reviewer

2011 - present European Journal Cancer
2009 - present International Journal Radiation Oncology, Biology, Physics
2001 - present International Journal of Gynecologic Cancer

E. Presentations and Special Lectures

1. INTERNATIONAL

Invited Lectures and Presentations

2014 Nov **Invited Speaker.** Serous Cancer Uterus - Does adjuvant therapy work? Liverpool Cancer Center, South Western Sydney, Local Health District. Sydney, Australian Capital Territory, Australia.

2005 International Gynecologic Cancer Tumor Board. 11th Biennial Scientific Meeting, International Gynecologic Cancer Society. Santa Monica, California, United States. (Continuing Education).

2004 Jul “Surgical Staging is Unnecessary in Endometrial Cancer”. Gynecologic Oncology Group Symposium. Irvine, California, United States. (Continuing Education).

2004 Surgical Staging is Unnecessary in Endometrial Cancer. Gynecologic Oncology Group Symposium. Irvine, California, United States.

1996 Treatment of Uterine Papillary Serous Carcinoma. 3rd Biennial Alon Dembo Workshop, International
Ida ACKERMAN

Gyne. Tumour Board. Bermuda. (Continuing Education).

1996

**Visiting Professor.** Visiting Professor. Henry Ford Hospital and Medical Centres. Detroit, Michigan, United States.

1991

**Lecturer.** A study to assess the dose and technique of postoperative radiation on pelvic control rates in endometrial cancer. International Gynecologic Cancer Society, 3rd Biennial Meeting. Cairns, Australia. Presenter(s): Ackerman I, Milosevic M, Thomas G, Dembo A, Balogh J.

1991

1985

**Workshops**

2. NATIONAL

**Invited Lectures and Presentations**

2006  Moving from LDR to HDR for Cervix Cancer, the Do’s and Don’ts. Canadian Association of Brachytherapy. Calgary, Alberta, Canada.

2004  **Lecturer.** Toxicity of Adjuvant Pelvic Radiotherapy following Radical Hysterectomy and Pelvic Lymph Node Dissection. Gyne Oncology Society of Canada. Edmonton, Alberta, Canada. Presenter(s): Steed H, Ackerman I.

2002  **Lecturer.** “Cosmetic Results of Radiation Therapy for Non-Melanoma Skin Cancer”. Canadian Association of Radiation Oncology. Toronto, Ontario, Canada. Presenter(s): Breen D, Ackerman I.

Ida ACKERMAN

Presentations at Scientific Meetings

3. PROVINCIAL / REGIONAL

Invited Lectures and Presentations

2005  Role of Radiation in gynecologic and breast cancer:. Royal Victoria Hospital of Barrie Cancer Care Program. Barrie, Ontario, Canada. (Continuing Education).

1987  Diagnosis and Management of difficult skin tumours. Postgraduate Dermatology Seminar. Toronto, Ontario, Canada. (Continuing Education).

4. LOCAL

Invited Lectures and Presentations

1992  Symposium on skin cancer; Specific Indications for Radiation Therapy as a Treatment of choice. Mount Sinai Hospital. Toronto, Ontario, Canada. (Continuing Education).

2009 A pilot study to assess intra-treatment FDG-PET parameters that predict for locoregional control in advanced head and neck cancer treated with chemoradiation.

Publication Details:

2008 Hypofractionated radiotherapy offers effective palliation for nonmelanoma skin cancer.

Publication Details:

2008 Treating Recurrent Cases of Squamous Cell Carcinoma with Radiotherapy.

Publication Details:

2008 Observer variability in radiotherapy targeting of head and neck tumors: can PET-CT reduce the variability?

Publication Details:

2007 Variability in identification of positive nodes for head and neck cancers: Comparison of CT Alone with PET/CT.

Publication Details:

2003 The effect of PET CT co-registration on observer variation in the 3D-intersection of radiation therapy treatment volumes.

Publication Details:

2002 Tumor size and necrosis on FDG PET potentially adverse features in non-small cell lung cancer.

Publication Details:

F. Teaching and Design

1. INNOVATIONS AND DEVELOPMENT IN TEACHING AND EDUCATION

1995 - 1999 Continuing Education, Faculty of Medicine, Dept of Radiation Oncology, University of Toronto Co-design and running of biennial oncology course.

1994 - 1995 Continuing Education, Faculty of Medicine, Dept of Radiation Oncology, University of Toronto Workshop development.

1993 Postgraduate MD, Faculty of Medicine, Dept of Radiation Oncology, University of Toronto Applied Physics Course, responsible for developing objectives and case scenarios for 5 weeks of a 5 month course.

1991 - 1999 Undergraduate Education, Faculty of Medicine, Dept of Radiation Oncology, University of Toronto Oncology Management Course, responsible for development of approximately 1/3 of cases in 6 month course.

1988 - 1989 Undergraduate Education, Faculty of Medicine, Dept of Radiation Oncology, University of Toronto Radiation Pathology Course, developed course on effects of radiation in: fetus/embryo, normal tissues, tumors.

1. EDUCATION

Degrees
2000 - 2002 MPA, School of Policy Studies, Queen’s University at Kingston, Kingston, Ontario, Canada
1991 - 1995 MD, University of Ottawa, Ottawa, Ontario, Canada
1988 - 1991 BSc, Major in Zoology, Minor in Philosophy, University of Toronto, Toronto, Ontario, Canada

Postgraduate, Research and Specialty Training
1995 - 2000 Residency, Radiation Oncology, Princess Margaret Hospital, University Health Network, Toronto, Ontario, Canada
1995 - 2000 Residency, Radiation Oncology, University of Toronto, Toronto, Ontario, Canada
1995 - 2000 Residency, Radiation Oncology, Toronto-Sunnybrook Regional Cancer Centre, Toronto, Ontario, Canada

Qualifications, Certifications and Licenses
2000 Fellow, Royal College of Physicians, Canada
1999 - 2009 Certification, American Board of Radiology, United States
1996 MCCQE Part I, Medical Council of Canada, Canada
1996 MCCQE Part II, Medical Council of Canada, Canada

2. EMPLOYMENT

Current Appointments
2016 Feb 1 - present ARCC Program Co-Lead, Health Systems, Services, & Policy, Applied Research in Cancer Control (ARCC)
2015 - present Senior Adjunct Scientist, Institute for Clinical Evaluative Sciences, Toronto, Ontario, Canada
Previous Appointments

HOSPITAL
2006 - 2011  Courtesy Staff, Radiation Oncologist, Toronto East General Hospital, Toronto, Ontario, Canada
2005 - 2014  Adjunct Scientist, Institute for Clinical Evaluative Sciences, Toronto, Ontario, Canada
2004 - 2013  Scientist, Clinical Epidemiology, Sunnybrook Research Institute, Toronto, Ontario, Canada
2003 - 2004  Associate Scientist, Clinical Epidemiology, Sunnybrook & Women’s Research Institute, Toronto, Ontario, Canada

UNIVERSITY
2000 - 2002  Lecturer (Adjunct I), Oncology, Queen’s University at Kingston, Kingston, Ontario, Canada
2000 - 2002  Health Policy Research Fellow, Radiation Oncology Research Unit, Kingston Regional Cancer Centre, Kingston, Ontario, Canada

UNIVERSITY - CROSS APPOINTMENT
2007 - 2015  Cross Appointment, Health Policy, Management and Evaluation, University of Toronto, Toronto, Ontario, Canada

UNIVERSITY - RANK
2003 - 2011  Assistant Professor, Radiation Oncology, University of Toronto, Toronto, Ontario, Canada
2002 - 2003  Lecturer, Radiation Oncology, University of Toronto, Toronto, Ontario, Canada

3. HONOURS AND CAREER AWARDS

Distinctions and Research Awards

NATIONAL
Received
2015  Top 10 Society-Funded Research Stories of 2015, Canadian Cancer Society. (Distinction)
2001  Research Fellow, National Cancer Institute of Canada (NCIC). (Research Award)

Estimating the Need for Radiotherapy in Ontario: An Evidence Based Epidemiological Approach. Total Amount: 47,500

PROVINCIAL / REGIONAL
Received
2004 - 2009  Career Scientist Award, Ontario Ministry of Health and Long Term Care. (Research Award)
The Quality of Palliative and End of Life Care in Cancer Patients. Total Amount: 301,875
2000  Clinical Research Fellowship, Cancer Care Ontario. (Research Award)
Total Amount: 56,000

LOCAL
Received
2015 Academic Performance Award, Odette Cancer Centre. (Research Award)
2011 Best Annual Research Performance Award, University of Toronto, Toronto, Ontario, Canada. (Research Award)
2011 Outstanding Performance Award, Odette Cancer Centre, Toronto, Ontario, Canada. (Research Award)
2010 Academic Performance Award, Odette Cancer Centre, Toronto, Ontario, Canada. (Research Award)
2009 Academic Performance Award, Odette Cancer Centre, Toronto, Ontario, Canada. (Research Award)
2006 Outstanding Research Potential, University of Toronto, Toronto, Ontario, Canada. (Research Award)
2005 Academic Performance Award, Sunnybrook and Women's College Health Sciences Centre. (Research Award)
1999 W.J. Simpson Award, University of Toronto, Toronto, Ontario, Canada. (Research Award)
Residents’ Research Day.

Teaching and Education Awards
LOCAL
Received

2013 Postgraduate Advocacy and Mentorship Award, Dept of Radiation Oncology, Faculty of Medicine, University of Toronto, Department of Radiation Oncology

Student/Trainee Awards
LOCAL
Received

2015 Chair's Award for Academic Excellence in Research, Awardee Name: Hamid-Reza Raziee. University of Toronto, Department of Radiation Oncology

4. PROFESSIONAL AFFILIATIONS AND ACTIVITIES

Professional Associations

2012 - present Member, International Gynecologic Cancer Society
2011 - present Member, European Society of Gynecologic Oncology (ESGO)
2009 - present Member, American Society of Clinical Oncology (ASCO)
2004 - present Member, Canadian Association of Health Services and Policy Research (CAHSPR)
2003 - present Member, Academy Health
1998 - present Member, American Society of Therapeutic Radiation Oncology (ASTRO)
1997 - present Member, Canadian Association of Radiation Oncologists (CARO)
1993 - present Member, Canadian Medical Association
1993 - present Member, Canadian Medical Protective Association (CMPA)
1993 - present Member, Ontario Medical Association
Administrative Activities

INTERNATIONAL

American Society of Clinical Oncology
2016 Symposium Faculty, Quality of Care Symposium
2015 May - 2018 Apr Member, Quality of Care Committee, United States.
2015 May - 2018 Apr Member, Patient Reported Outcomes Sub-Committee, United States.

NATIONAL

Canadian Association of Radiation Oncology (CARO)
2000 - 2002 Observer, Manpower Committee, Canada.
1998 - 2000 Chair, Residents and Fellows Committee, Faculty of Medicine, Dept of Radiation Oncology, Postgraduate MD, Canada.

Canadian Partnership Against Cancer (CPAC)
2014 - present Member, Person Centred Perspective Measurement Steering Committee, Toronto, Ontario, Canada.
2016 Member, PEO LC Research Framework Working Group
2013 - 2014 Member, Measurement Methodology Working Group, Toronto, Ontario, Canada.

Canadian Partnership for Quality Radiotherapy (CPQR)
2013 Jan 31 Participant, Consensus Delphi meeting, Mont Tremblant, Quebec, Canada.

PROVINCIAL / REGIONAL

Cancer Care Ontario
2015 - present Chair, Patient Reported Outcomes Steering Committee, Toronto, Ontario, Canada.
2014 - present Chair, Gyne Community of Practice “Models of Care” Working Group, Toronto, Ontario, Canada.
2013 - present Member, Sexual Health in Cancer Community of Practice, Toronto, Ontario, Canada.
2012 - present Member, Gyne Community of Practice, Toronto, Ontario, Canada.
2014 - 2016 Chair, Program in Evidence Based Medicine (PEBC) “Sexual Health in Cancer Survivors” Working Group, Toronto, Ontario, Canada.
2014 - 2015 Member, Patient Reported Outcomes Steering Committee, Toronto, Ontario, Canada.
2011 - 2012 Member, Multidisciplinary Cancer Conference, Measurement Committee, Ontario, Canada.
2006 - 2008 Member, Provincial Palliative Care Integration, Performance Measurement and Evaluation Team, Ontario, Canada.
2006 - 2007 Member, Program in Evidence Based Care; Nursing, Palliative Care and Supportive Care Guideline Group Steering Committee, Ontario, Canada.

Cancer Quality Council of Ontario (CQCO)
2006 - present Contributor, Cancer System Quality Index, Toronto, Ontario, Canada.
2012 Jul 23 Panel Member, Programmatic Review of Palliative Care, Toronto, Ontario, Canada.
2006 Member, Signature Event on Palliative Care Steering Committee, Ontario, Canada.

Ministry of Health and Long Term Care (MOHLTC)
2013 - 2015 Member, Provincial Hospice Palliative Care Data and Performance Subcommittee, Toronto, Ontario, Canada.
Ontario Institute for Cancer Research
2009 - present  **Member**, Health Services Research Program Management Committee, Ontario, Canada.

LOCAL
Odette Cancer Centre
2011 - present  **Lead**, Gyne Radiation Site Group, Toronto, Ontario, Canada.
2002 - present  **Member**, Radiation Oncology Associates, Toronto, Ontario, Canada.
2014 - 2016  **Chair**, Radiation Oncology Associates, Toronto, Ontario, Canada.
2007 - 2015  **Director**, SHARE: Sexual Health Rehabilitation Clinic, Toronto, Ontario, Canada.
2004 - 2006  **Member at Large**, Radiation Oncology Associates, Executive Committee, Toronto, Ontario, Canada.

University of Ottawa
1991 - 1993  **Student Representative**, Student Advisory Group, Ottawa, Ontario, Canada.

University of Toronto
2012 - present  **Member**, Department of Radiation Oncology, Appointments Committee, Toronto, Ontario, Canada.
2015  **Member**, Department of Radiation Oncology, Target Insight Scientific Program Committee, Toronto, Ontario, Canada.
2006  **Member**, Preparation of University of Toronto, Faculty Statement for external departmental review, Toronto, Ontario, Canada.
2003 - 2005  **Member**, Department of Radiation Oncology, Ethics Review Committee, Toronto, Ontario, Canada.
1997 - 1998  **Junior Resident Representative**, Medical Education Committee, Faculty of Medicine, Dept of Radiation Oncology, Toronto, Ontario, Canada.

Peer Review Activities

**GRANT REVIEWS**

External Grant Reviewer
2012  Cancer Research, United Kingdom
2008  Alberta Heritage Foundation for Medical Research, Investigator Award Competition, declined due to conflict of interest
2007  Canadian Institutes of Health Research, ‘International Opportunities Program - Collaborative Research Project Grant’ RFA

Reviewer
2015  Canadian Cancer Society Research Institute (CCSRI), Knowledge to Action Grants - Review Panel
2013 May 8  Canadian Cancer Society Research Institute (CCSRI), Innovation 13-2 Panel I5, Prevention and Cancer Outcomes
2011 - 2012  Canadian Institutes of Health Research (CIHR), Doctoral Research Awards and Canada Graduate Scholarships Master’s Award
2009 - 2010  Ontario Institute for Cancer Research, Health Services Research
C. Research Funding

1. GRANTS, CONTRACTS AND CLINICAL TRIALS

PEER-REVIEWED GRANTS

FUNDED

2016 Aug - 2019 Jul  
Lisa BARBERA

[Grants]

2016 Jun - 2018 Jun  
**Co-Investigator.** Significance and Impact of a Health Services Research Program in Gynecologic Oncology. University of Toronto. Department of Obstetrics and Gynecology. Merit Award. PI: Gien L. Collaborator(s): Barbera L, Kupets R. 40,000 CAD. [Grants]

2016 Jan - 2016 Dec  

2015 Feb - 2020 Jan  

2014 Apr - 2018 Mar  

2012 - 2016  

2011 - 2016  

2011 - 2015  

2011 - 2014  

2011 - 2014  

2011 - 2012  
10,000 CAD. [Grants]

2007 **Co-Investigator.** Improving access to quality palliative care for cancer patients. Canadian Institute of Health Research (CIHR). Collaborator(s): Brazil K, Howell D, Williams A, Husain A, Sussman J, Barbera L. 10,000 CAD. [Grants]

2006 - 2009 **Principal Investigator.** Improving the delivery of palliative care in Ontario. Cancer Care

2006 - 2007  

2004 - 2006  
**Principal Investigator.** Palliative and end of life quality indicators in lung cancer. Canadian Institute of Health Research (CIHR). Collaborator(s): Barbera L, Paszat L. 98,360 CAD. [Grants]

2003 - 2004  

**NON-PEER-REVIEWED GRANTS**

**FUNDED**

2014 Jan  
**Principal Investigator.** Impact of ESAS Screening on emergency department visits in metastatic colorectal cancer patients receiving chemotherapy. Cancer Care Ontario (CCO). Collaborator(s): Krzyzanowska M, Sutradhar R. 15,000 CAD. [Grants]

2008

Degrees
1993 - 1996 MD, The University of Calgary, Calgary, Alberta
1989 - 1993 BSc, Biochemistry, Queen’s University, Kingston, Ontario

Postgraduate, Research and Specialty Training
2001 - 2002 Symptom Control and Palliative Care Fellowship, Radiation Oncology, MD Anderson Cancer Center, Houston, Texas, United States
1997 - 2001 Radiation Oncology Residency, Radiation Oncology, Cross Cancer Institute, Edmonton, Alberta, Canada
1996 - 1997 Internship, University of Alberta, Edmonton, Alberta

Qualifications, Certifications and Licenses
2003 American Board of Hospice and Palliative Medicine (ABHPM), License / Membership #: 2260
2002 Fellow FRCP(C), Radiation Oncology, Royal College of Physicians and Surgeons of Canada, License / Membership #: 522948
1999 United States Medical Licensing Examination
1998 Licentiate (LMCC), Medical Council of Canada
2. EMPLOYMENT

Current Appointments

2002 Dec - present  Assistant Professor, Department of Radiation Oncology, Sunnybrook Health Sciences Centre
2002 - present  Medical Staff, Department of Radiation Oncology, Sunnybrook Health Sciences Centre

Previous Appointments

UNIVERSITY - RANK
2002 Sep - 2002 Dec  Lecturer, Department of Radiation Oncology, Sunnybrook Health Sciences Centre

3. HONOURS AND CAREER AWARDS

Distinctions and Research Awards

NATIONAL
Received

2000  MDS Nordion Award, Canadian Association of Radiation Oncologists, Edmonton, Alberta. (Distinction)
For resident podium presentation at Annual Scientific Meeting.

PROVINCIAL / REGIONAL
Received

1989 - 1993  Provincial Scholarship, Queen’s University. (Distinction)

LOCAL
Received

1993  Summer Electives Award, The University of Calgary. (Distinction)
1992  Dean’s Honor Roll, Queen’s University. (Distinction)

OTHER
Received

2013 Mar  A Sunnybrook Moment of Service Excellence, Sunnybrook Health Sciences Centre, Ontario, Canada. (Outstanding Service and Dedication to Patients)
In honour of outstanding service and dedication to patients - Office of The Patient Experience Certificate of Recognition.
4. PROFESSIONAL AFFILIATIONS AND ACTIVITIES

Administrative Activities

INTERNATIONAL
ASTRO Health Services
2003 - 2005 Member, Research Committee, United States.

Evidence-based Practice Center at Brown University
Technical Expert, Treatments for Non-Melanoma Skin Cancers, Agency for Healthcare Research and Quality (AHRQ), Providence, Rhode Island, United States.

Society for Palliative Radiation Oncology
2014 - present

NATIONAL
National Cancer Institute of Canada/Clinical Trials Group
2008 - present Symptom Control Chair, NCIC Symptom Control Group, Ontario, Canada.
2003 - present Department Representative, NCIC Symptom Control Group, Ontario, Canada.

LOCAL
Odette Cancer Centre
2005 - present Chair, Skin Site Group, Ontario, Canada.
2005 - present Radiation Oncology Site Group Lead Skin Site Group, Ontario, Canada.

Sunnybrook Health Sciences Centre
2014 Feb - present Hand Hygiene - Physician Champion Committee, Toronto, Ontario, Canada.

University of Toronto
2015 Dec 4 Examiner, CPEE Planning Exams, Radiation Oncology, Faculty of Medicine, Dept of Radiation Oncology, Postgraduate MD, Toronto, Ontario, Canada.

OTHER
Michener Institute for Applied Health Sciences
2014 Oct 30 OSCE, Toronto, Ontario, Canada.

Peer Review Activities

EDITORIAL BOARDS
Member
2001 - present Odette Cancer Centre, Hotspot, Educational Newsletter for the community oncologists and palliative care physicians from Rapid Response Radiotherapy Program

C. Academic Profile

1. RESEARCH STATEMENTS

Clinical Trials in Prostate Cancer.
The main focus of my scholarly activity has been research into precision radiotherapy, specifically the use of intensity modulated radiation therapy in the management of high risk prostate cancer. Initial studies have resolved around the definition of CTV for high risk
prostate cancer, the use of MRI-CT co-registration, on line guidance and the acute and long term toxicity of dose escalated radiotherapy to the pelvic lymph nodes and prostate/seminal vesicles for high risk prostate cancer.

1. EDUCATION

Degrees
2013 Jan - 2014 Dec MSc, Institute of Medical Science, University of Toronto, Toronto, Canada
2000 - 2007 MD, MD, graduated with high honors, GPA 6,7 (1-7 scale), Medical School, Pontificia Universidad Católica de Chile, Santiago, Chile

Postgraduate, Research and Specialty Training
2013 Jan - 2014 Dec Clinical Research Fellow (, GU Radiation Oncology, Department of Radiation Oncology, Princess Margaret Cancer Centre, University of Toronto, Toronto, Ontario, Canada, Supervisor(s): Dr. Robert Bristow
2009 Nov - 2011 May Resident, Radiation Oncology, Clinica Alemana de Santiago – Universidad del Desarrollo, Santiago, Región Metropolitana de Santiago, Chile, Supervisor(s): Dr. Andres Cordova
2008 Jun - 2009 Nov Clinical-Research Fellow, Radiation Oncology, Chaim Sheba Medical Centre, Ramat Gan, Israel, Supervisor(s): Drs. Zvi Symon, Raphael Pfeffer and Raphael Catane
2007 Jan - 2008 Jun Resident, Radiation Oncology, Clinica Alemana de Santiago – Universidad del Desarrollo, Santiago, Región Metropolitana de Santiago, Chile, Supervisor(s): Dr. Andres Cordova

Qualifications, Certifications and Licenses
2011 Nov - present ECFMG Certificate, Educational Commission for Foreign Medical Graduates, United States, License / Membership #: 0-815-071-6
2007 Nov - present Medical License, MD, Colegio Médico de Chile, Chile, License / Membership #: 26016-9
2015 Sep - 2018 Aug Academic Restricted License, Radiation Oncology, CPSO, Ontario, Canada, License / Membership #: 99728
2012 Dec - 2022 Dec Radiation Oncologist, Radiation Oncology, CONACEM, Chile, License / Membership #: 14400
2. EMPLOYMENT

Current Appointments

2015 Sep - present  Associate Professor, Radiation Oncology, Faculty of Medicine, University of Toronto, Toronto, Ontario, Canada
2015 Sep - present  Radiation Oncologist (Staff), Radiation Medicine Program, Princess Margaret Cancer Centre - University Health Network, Toronto, Ontario, Canada

Previous Appointments

HOSPITAL
2011 Jun - 2015 Aug  Radiation Oncologist (Staff), Clinica Alemana de Santiago, Santiago, Región Metropolitana de Santiago, Chile

3. HONOURS AND CAREER AWARDS

Distinctions and Research Awards

INTERNATIONAL
Received

2014 Oct  21st Scientific Retreat attendee (invitation-only), Prostate Cancer Foundation. (Distinction)
  Travel, accommodation, and retreat attendance award. Invitation-only).

2014 Jun  Awardee attendant (peer-reviewed), 16th ECCO-AACR-EORTC-ESMO Workshop on Methods in Clinical Cancer Research (June 21st-27th), Flims, Switzerland. (Distinction)
  Travel, accommodation and course attendance award (Peer-reviewed).

2014 Apr  Young Scientists Poster Award, ESTRO 33 annual meeting, Vienna, Austria. (Distinction)

2014 Jan - 2014 Feb  Merit Award, The Conquer Cancer Foundation of ASCO, United States. (Distinction)
  Total Amount: 1,000 USD

2013 Jul  Awardee attendant (peer-reviewed), AACR Molecular Biology in Clinical Oncology Workshop (July 21st-28th), Snowmass, Colorado. (Distinction)
  Travel, accommodation, and course attendance award (peer-reviewed).

NATIONAL
Received

2007  Best National of all Medical School Graduates of Chile, National Council of Medicine, Chile. (Distinction)

2006 Dec  Best score of the country in the National Medical Exam, EUNACOM, Chile. (Distinction)

2004  Best scientific work, XXVII Chilean Congress of Urology, Pucón, Chile. (Research Award)
  Title: Allele typification in germ cell tumors. Authors: Velasco Alfredo, Riquelme Erick, Zúñiga Alvaro, Berlin Alejandro, Javier Pizarro.

2003  Best scientific work, XXVI Chilean Congress of Urology, Viña del Mar, Chile. (Research Award)
LOCAL

Received

2014  R.S. Bush award, University of Toronto. (Research Award)
      For academic excellence in research by a radiation oncology fellow, Department of Radiation Oncology.

2006 Mar - 2006 Dec  Honor Roll, Medical School, Pontificia Universidad Católica de Chile, Santiago, Chile. (Distinction)

2006  Valedictorian Prize, Medical School, Pontificia Universidad Católica de Chile, Chile. (Distinction)
      Prize for best class student.

2004 Mar - 2004 Dec  Honor Roll, Medical School, Pontificia Universidad Católica de Chile, Santiago, Chile. (Distinction)

2002 Mar - 2002 Dec  Honor Roll, Medical School, Pontificia Universidad Católica de Chile, Santiago, Chile. (Distinction)

2000 Mar - 2006 Dec  Ranked first place of Medical School class, Pontificia Universidad Católica de Chile, Santiago, Chile. (Distinction)

MANUSCRIPT REVIEWS

Reviewer

2016 Jun - present  Cancer Nanotechnology, Number of Reviews: 1
2016 May 25 - present  International Journal of Radiation Oncology Biology Physics, Number of Reviews: 1
2016 May 15 - present  Radiotherapy and Oncology, Number of Reviews: 1
2016 May 11 - present  The Journal of Urology, Number of Reviews: 2
2016 Mar 1 - present  Frontiers in Oncology, Number of Reviews: 1
2015 Dec - present  The British Journal of Radiology, Number of Reviews: 1
2014 Dec - present  European Journal of Cancer, Number of Reviews: 2
2014 Feb 28 - present  Urologic Oncology: Seminars and Original Investigations, Number of Reviews: 4
C. Research Funding

1. GRANTS, CONTRACTS AND CLINICAL TRIALS

PEER-REVIEWED GRANTS

FUNDED

2013 Sep - 2014 Dec  
**Student/Trainee Awards.** Excellence in Radiation Research for the 21st Century (EIRR21) Scholarship Award. The Terry Fox Research Institutes and Canadian Institutes of Health Research. [Grants]

2013 Jul - 2014 Jun  
**Educational Grant.** Educational Grant. Clinica Alemana de Santiago. [Grants] Scholarship for pursuing MSc Degree University of Toronto.

2013 Jul - 2014 Jun  
**Research Award Fellow Grant.** Research Award Fellow Grant. Canadian Urological Oncology Group (CUOG). [Grants]

2002 Jan - 2005 Dec  
**Research Assistant.** Expression of mismatch repair genes in testicular cancer. FONDECYT/DIPUC. 1020695/3811-011. [Grants]

NON-PEER-REVIEWED GRANTS

FUNDED

2016 May - 2017 May  

2016 May - 2017 May  

2016 Apr - 2018 Apr  
D. Publications

1. PEER-REVIEWED PUBLICATIONS

Journal Articles

5. Fraser M, **Berlin A**, Bristow RG, van der Kwast T. Genomic, pathological, and clinical heterogeneity as drivers of personalized medicine in prostate cancer. Urol Oncol. 2015 Feb 1;33(2):85-94. **Coauthor or Collaborator.**

Comment, Letters to Editor

Journal Articles, Review

2. NON-PEER-REVIEWED PUBLICATIONS

Journal Articles

1. Raziee H, Berlin A. Gaps between Evidence and Practice in Postoperative Radiotherapy for Prostate Cancer: Focus on Toxicities and the Effects on Health-Related Quality of Life. Front Oncol. 2016 Jan 1;6:70. Senior Responsible Author.

Invited Lectures and Presentations

F. Research Supervision

1. PRIMARY OR CO-SUPERVISION

Postgraduate MD

G. Creative Professional Activities

1. CONTRIBUTIONS TO THE DEVELOPMENT OF PROFESSIONAL PRACTICES

2014 Jul 1 - 2015 Jun 30  Co-Chair Target Insights Annual Meeting. Target Insight a world recognized multidisciplinary conference for the Radiation Medicine Community offered by the Department of Radiation Oncology at the University of Toronto. Target Insight’s mandate is to introduce and educate radiation oncology practitioners and trainees on current and evolving developments in practice, research, and technologies in our discipline. In recent past, topics have included the best practice use of advanced technologies such as IMRT, VMAT, IGRT and brachytherapy, and larger topics such as Big Data, Proton Therapy, and Palliative Care in Radiation Medicine. This is a tailored and targeted conference with the focus placed on providing participants every opportunity to take these developments back to their clinics. Main RMP-organized conference

1. EDUCATION

Degrees
1991 - 1995 MSc, Clinical Epidemiology, Clinical Epidemiology and Biostatistics, McMaster University, Hamilton
1985 Medicinae Doctor Chirurgiae Magister, McGill University, Montreal
1982 Bachelor of Medical Sciences, Kuwait University, Kuwait

Postgraduate, Research and Specialty Training
1988 - 1991 Residency, Radiation Oncology, Princess Margaret Hospital/University of Toronto, Ontario
1985 - 1988 Residency, Internal Medicine, Royal Victoria Hospital, Montreal, Quebec

Qualifications, Certifications and Licenses
1993 Fellow (FACR), Radiation Oncology, American College of Radiology, United States
1991 Fellow (FRCPC), Radiation Oncology, Royal College of Physicians and Surgeons of Canada
1989 Fellow (FRCPC), Internal Medicine, Royal College of Physicians and Surgeons of Canada
1988 Diplomate, American Board of Internal Medicine, United States
1986 Certificate (NBME), National Board of Medical Examiners, United States
1985 Licenciate (LMCC), Medical Council of Canada

2. EMPLOYMENT

Current Appointments
2009 - present Professor, Radiation Oncology, University of Toronto
2009 - present Professor, Clinical Epidemiology & Health Care Research Program, Health Policy, Management and Evaluation, University of Toronto
1998 - present Associate Member, Graduate Studies, University of Toronto
Andrea BEZJAK

1991 - present  Staff Radiation Oncologist, Department of Radiation Oncology, Radiation Medicine Program, Princess Margaret Hospital/ University Health Network, Toronto

2016 Sep 1  Program Director, Postgraduate Medical Education, Radiation Oncology, University of Toronto, Ontario, Canada

2016 Jun 1 - 2021 May 31  Associate Member, Institute of Medical Science, University of Toronto, Toronto, Ontario, Canada

**Previous Appointments**

**HOSPITAL**

1997 - 1998  Associate Staff, Division of Radiation Oncology, Department of Medical Imaging, The Toronto Hospital, Toronto

**UNIVERSITY - CROSS APPOINTMENT**

2002 - 2009  Associate Professor, Clinical Epidemiology & Health Care Research Program, Health Policy, Management and Evaluation, University of Toronto

1998 - 2001  Assistant Professor, Clinical Epidemiology & Health Care Research Program, Health Administration, University of Toronto

**UNIVERSITY - RANK**

2002 - 2009  Associate Professor, Radiation Oncology, University of Toronto

1995 - 2001  Assistant Professor, Radiation Oncology, University of Toronto

1991 - 1994  Lecturer, Radiation Oncology, University of Toronto

**3. HONOURS AND CAREER AWARDS**

**Distinctions and Research Awards**

**INTERNATIONAL**

**Received**

2006  Research Article of the Year, 12th International Society of Quality of Life, San Francisco, United States. (Research Award)  
(Brundage M et al. JCO 23(28) 2005 – AB co-author).

2005  Best Poster, 11th World Conference on Lung Cancer, Barcelona, Spain. (Research Award)

1978 - 1982  Honour's list, Kuwait University, Kuwait. (Distinction)

Semesters 2, 3, 4.

**NATIONAL**

**Received**

1985  University Scholar, McGill University, Montreal. (Distinction)

(top 10% for entire program duration).

1983 - 1985  Faculty Scholar, McGill University, Montreal. (Distinction)

(top 10% for the year).

1982  Joseph Morley Drake Prize for Pathology, McGill University, Montreal. (Distinction)

**LOCAL**

**Received**

2013 Oct  RMP Staff Recognition Award, Princess Margaret Hospital - Radiation Medicine Program, Toronto. (Distinction)
**Andrea BEZJAK**

Most Inspiring Team Member - Radiation Oncology.

PROVINCIAL / REGIONAL

Received

2008

Prize for Top 2 Best Abstracts by Trainees, Supervisor, Awardee Name: Dr Gerald Lim (Fellow, Department of Radiation Oncology). 3rd Annual Ontario Thoracic Cancer Conference, Niagara-on-the-Lake

LOCAL

Received

2007

Department of Radiation Oncology Award for Academic Excellence in Research by a Fellow, Co-Supervisor, Awardee Name: Dr. Kevin Franks (Fellow, Department of Radiation Oncology, Graduate student, MSc Program in the Institute of Medical Sciences). University of Toronto

2006

Department of Radiation Oncology University of Toronto Chair’s Award for Academic Excellence in Research by a Postgraduate Trainee, Co-Supervisor, Awardee Name: Dr. Kevin Franks (Fellow, Department of Radiation Oncology, Graduate student, MSc Program in IMS). University of Toronto

2002

First prize for best research presentation by a radiation oncology fellow, Supervisor, Awardee Name: Dr. Paula Wilson (Fellow, Department of Radiation Oncology). 2002 Department of Radiation Oncology Fellows and Residents Research Day, Toronto

2002

Thomas and Edna Naylor Memorial Award for the best MSc/PhD thesis in health services research, MSc Thesis Committee Member, Awardee Name: Dr. Louise Bordeleau (Graduate student, MSc Program in Clinical Epidemiology). 2002 Clinical Epidemiology Research Day, Toronto

2001

First prize for best research presentation by a radiation oncology resident, Supervisor, Awardee Name: Dr. Michael Lock (Radiation Oncology Resident). 2001 Department of Radiation Oncology Fellows and Residents Research Day, Toronto

2001

Second prize for best poster, MSc Thesis Committee Member, Awardee Name: Dr. Edward Chow (Graduate student, MSc Program in Clinical Epidemiology). 2001 Clinical Epidemiology Research Day, Toronto

2000

Open Fellowship, Supervisor, Awardee Name: Dr. Derek Wilke (Graduate student, MSc Program in Clinical Epidemiology). University of Toronto for top 5% academic record as graduate student in the Department of Health Administration. Total Amount: 3,600 CAD

1999

1st prize in Graduate Medical Research Day, Co-Supervisor, Awardee Name: Hillary Chen (Medical Student). University of Toronto

1998

2nd prize, Resident Research Day, Department of Radiation Oncology, Supervisor, Awardee Name: Dr. Lisa Barbera (Radiation Oncology Resident). University of Toronto

American Society of Therapeutic Radiation Oncology
2010 - present  Member, Lung Cancer Resource Panel of the Clinical Affairs and Quality Committee
2009 - present  Panel Member, Practice Guideline on Palliative Radiotherapy

European Organization for Research and Treatment of Cancer Quality of Life Study Group
1998 - 2000  Member, Executive
1996 - 2007  Member

International Association for Study of Lung Cancer
2009 - present  Member, Bylaws Committee

International Association for Study of Lung Cancer/Advanced Radiation Technology Committee
2013 Jul - present  IASLC/ART Committee, Texas, United States.

International Society for Quality of Life Research
2007  Member, Conference Organizing Committee
       Toronto.
2005  Member, Conference Organizing Committee
       San Francisco.
2003 - 2006  Member, Board of Directors
2001  Member, Conference Organizing Committee
       Prague, Czech Republic.
1997  Member, Conference Organizing Committee
       Orlando.

JCO Editorial Board

Multinational Association of Supportive Care in Cancer
2005  Member, Conference Organizing Committee, Toronto.
2003 - 2006  Vice Chair, Quality of Life Study Section
1999  Member, Conference Organizing Committee, Nice, France.
1997 - 2004  Member, Board of Directors
1996  Member, Conference Organizing Committee, Toronto.

National Cancer Institute
2004 - 2009  National Cancer Institute of Canada Clinical Trials Group Representative, Lung Cancer Intergroup Committee
2001 - 2007  Member, Health Related Quality of Life Intergroup Committee, United States.
National Lung Cancer Partnership (now known as “Free to Breathe”)
2009 - present Member, Scientific Executive Committee, United States.

Radiation Therapy Oncology Group
2006 - present Member, Lung Cancer Steering Committee

NATIONAL

Canadian Association of Radiation Oncology
2013 - present Past President
2011 - 2013 President

Canadian Institutes of Health Research
2003 - 2009 Member, Clinical Trials Panel

National Cancer Institute of Canada/Clinical Trials Group
1993 - present Member, Quality of Life Committee
2002 - 2004 Center Representative for Princess Margaret Hospital
1996 - 2006 Chair, Quality of Life Committee

Sociobehavioural Cancer Research Network
1999 - 2000 Member, Ad-hoc group on collaborative research
1998 - 2005 Member, Executive of the Clinical Group
1998 - 2005 Liaison of National Cancer Institute of Canada Clinical Trials Group

PROVINCIAL / REGIONAL

Cancer Care Ontario
2009 - 2010 Lead, Management and Surveillance working group, Lung Disease Pathway Management
2005 - 2013 Member, Lung Cancer Disease Site Group Committee, Program in Evidence-based Care
1999 - 2008 Member, Supportive Care Guidelines Committee, Program in Evidence-based Care

Gilda’s Club
1998 - present Member, Medical Advisory Board, Greater Toronto

Wellspring
2003 - 2010 Member, Evaluation and Research Committee

LOCAL

Princess Margaret Cancer Centre
2009 - present Lung Site Group Leader, Cancer Program
2004 - present Physician Leader, Radiation Medicine Program Team 2
1997 - present Member, Palliative Radiation Oncology Program, Department of Radiation Oncology
1994 - present Member, Organizing committee, Philippa Harris Annual Lecture on Bioethical Issues in Cancer
2011 - 2012 Chair, Cancer Committee
2005 - 2010  Member, Annual Princess Margeret Hospital Conference
2005 - 2010  Chair, Annual Princess Margeret Hospital Conference
2003 - 2012  Leader, Department of Radiation Oncology Lung Group
2002 - 2004  Member, Supportive Care Quality Team
2001 - 2002  Department of Radiation Oncology Representative, Palliative Care Unit Steering Committee and the Palliative Care Unit Clinical Advisory Committee
2001 - 2002  Member, Executive of the Radiation Oncology Partnership
1999 - 2003  Leader, Palliative Radiation Oncology Program, Department of Radiation Oncology
1998 - 2006  Member, Department of Radiation Oncology Clinical Research Committee
1998     Member, Department of Radiation Oncology Committee on Workload Issues
1993 - 1998  Department of Radiation Oncology Representative, Clinical Trials Subcommittee of the Medical Advisory Committee

University of Toronto
2009 - 2010  Member, Executive Committee
2008 - 2013  Member, Fellowship Selection Committee
2000 - 2002  Member, Fellowship Selection Committee
1999     Member, Workshop on Palliative Radiation Oncology Research Methods, Conference Organizing Committee, Toronto.
1996 - 1997  Member, Admissions Committee, Clinical Epidemiology & Health Care Research Program

Peer Review Activities

EDITORIAL BOARDS

Associate Editor
2011 - present  Journal of Thoracic Oncology
Member

1. EDUCATION

Degrees
1998 - 2001 PhD, Medical Biophysics, University of Toronto, Toronto, Ontario, Canada
1992 - 1996 M.D., C.M. McGill University, Montreal, Quebec, Canada
1990 - 1992 MSc, Biochemistry, McMaster University, Hamilton, Ontario, Canada
1986 - 1990 BSc, McMaster University, Hamilton, Ontario, Canada

Postgraduate, Research and Specialty Training
2005 - 2006 Research Fellow, Medical Oncology, Drug Development Fellowship Program, University of Toronto, Toronto, Ontario, Canada
2002 - 2005 Resident PGY1-5, Radiation Oncology, University of Toronto, Toronto, Ontario, Canada
1996 - 1997 Resident PGY1-5, Radiation Oncology, University of Toronto, Toronto, Ontario, Canada

Qualifications, Certifications and Licenses
2005 - present Fellow, Radiation Oncology, Royal College of Physicians
1996 - present Licensure, Ontario College of Physicians and Surgeons

2. EMPLOYMENT

Current Appointments
2016 May - present Division Head, Trillium Health Partners-Mississauga Halton Central West Regional Cancer Program, Mississauga, Ontario, Canada
2016 May - present Regional Lead, Trillium Health Partners-Mississauga Halton Central West Regional Cancer Program, Mississauga, Ontario, Canada
2013 Sep - present Chair- Board of Examiners, Medical Radiation Sciences, Faculty of Medicine, University of
Previous Appointments

HOSPITAL

2011 Sep - 2016 Apr  
Vice Chair, Research Ethics Board, Princess Margaret Cancer Centre, Toronto, Canada

2008 - 2011  
Courtesy Medical Staff, Southlake Hospital Regional Cancer Centre, Newmarket, Ontario, Canada

2008 - 2011 Sep  
Lung Site Group Leader, Southlake Hospital Regional Cancer Centre, Newmarket, Ontario, Canada

2008 - 2011 Sep  
Inpatient Consult Leader, Southlake Hospital Regional Cancer Centre, Newmarket, Ontario, Canada

2005 - 2016 Apr  
Clinician Scientist, Princess Margaret Cancer Centre, Toronto, Ontario, Canada

3. HONOURS AND CAREER AWARDS

Distinctions and Research Awards

INTERNATIONAL

Received

2011  
Certificate of Appreciation, Lilly Oncology Clinical Trials, PROCLAIM. (Distinction) 
for achieving the highest enrolment for PROCLAIM study during the 3rd Quarter of 2011.

2006  
Hans Wyder Fellowship, European Society of Oncology Travel Award. (Credential)

2005  
Young Investigator award, American Society of Clinical Oncology. (Distinction) 
Total Amount: 35,000

2003  
Scholarship. (Distinction) 
To attend the American Society for Clinical Oncology/American Association for Cancer Research Clinical Trials Workshop in Vail, Colorado.

2003  
Scholarship. (Distinction) 
to attend the American Association for Cancer Research workshop for Molecular Biology in Clinical Oncology in Aspen, Colorado.

NATIONAL

Received

2001  
Elekta Award, Canadian Association of Radiation Oncology Annual Meeting. (Distinction) 
Best Basic Science Presentation by a Resident.

1998 - 2001  
Jesse Davidson Post-doctoral Fellowship, Joint MRC (Canada)/Foundation for Cell and Gene Therapy. (Credential)

1998  
Elekta Award, Canadian Association of Radiation Oncology Annual Meeting. (Distinction) 
Best Presentation by a Resident.

1993  
Summer Research Scholarship, Canadian Down’s Syndrome Association. (Distinction)
PROVINCIAL / REGIONAL

Received

2005 Fellowship, Canadian Cancer Society Ontario Division. (Credential, Specialty: Oncology)
Total Amount: 61,000

LOCAL

Received

2000 W.J. Simpson Award, Department of Radiation Oncology, University of Toronto. (Distinction)
1999 W.J. Simpson Award, Department of Radiation Oncology, University of Toronto. (Distinction)
1998 W.J. Simpson Award, Department of Radiation Oncology, University of Toronto. (Distinction)
1994 Carlo Bos Prize, McGill University. (Distinction)
1986 Dundas Scholarship, McMaster University, Hamilton, Ontario, Canada. (Distinction)

Teaching and Education Awards

LOCAL

Nominated

2014 Dept of Radiation Oncology, Faculty of Medicine, Princess Margaret Cancer Centre, Toronto, Ontario, Canada. (Postgraduate MD)

4. PROFESSIONAL AFFILIATIONS AND ACTIVITIES

Professional Associations

2014 - present Advisor, Centre for Education of Health Professionals Educated Abroad (CEHPEA) (recently re-branded as Touchstone Institute)
2008 - present Examiner, Centre for the Evaluation of Health Professionals Educated Abroad (CEHPEA) (recently re-branded as Touchstone Institute)
2007 Item Writer, Centre for the Evaluation of Health Professionals Educated Abroad (CEHPEA)
Associate Member, American Association for Cancer Research
Member, American Association for Cancer Research
Member, American Society for Clinical Oncology
Member, American Society for Therapeutic Radiology and Oncology
Member, Canadian Association of Radiation Oncologists
Member, Canadian Medical Association
European Society for Radiotherapy & Oncology
Member, International Association for the Study of Lung Cancer
Member, Ontario Medical Association

**Vice Chair**, Radiation Oncology Partnership Executive Committee, Toronto, Ontario, Canada.
2009  
**Treasurer**, Radiation Oncology Partnership Executive Committee, Toronto, Ontario, Canada.
2007 - 2008  
**Member**, PMH Cancer Program Strategic Plan – Novel Therapeutics Working Group, Toronto, Ontario, Canada.
2006 - 2016 Apr  
**Member**, Research Ethics Board, Toronto, Ontario, Canada.
2001 - 2005  
**Reviewer**, Toronto, Ontario, Canada. 
*for the Oncology Interactive Educational CD-ROM Series, Jack digital Productions.*
1997  
**Member**, Library Task Force Committee, Toronto, Ontario, Canada.

Trillium Health Partners-Mississauga Halton Central West Regional Cancer Program

2016 May - present  
**Member**, Integrated Cancer Program Committee, Mississauga, Ontario, Canada.
2016 May - present  
**Member**, Oncology Scientific Review and Oversight Committee, Mississauga, Ontario, Canada.
2016 May - present  
**Member**, Radiation Safety Committee, Mississauga, Ontario, Canada.
2016 May - present  
**Member**, Radiation Clinical Operations Committee, Mississauga, Ontario, Canada.
2016 May - present  
**Member**, Treatment Delivery Review Committee, Mississauga, Ontario, Canada.
2016 May - present  
**Member**, Outpatient Oncology Clinic Redesign Team, Mississauga, Ontario, Canada.
2016 May - present  
**Member**, Grand Rounds Planning Committee, Mississauga, Ontario, Canada.

University Health Network

2007 - 2016 Apr  
**Member**, Electronic Health Record Advisory Committee, Toronto, Ontario, Canada.
1997  
**Member**, Library Task Force Committee, Toronto, Ontario, Canada.
Anthony Matthew BRADE

University of Toronto
2011 - present  
**Interviewer**, MD Admissions, Faculty of Medicine, Dept of Medicine, Graduate Education, Toronto, Ontario, Canada.

2011 - 2012  
**Chair**, UTDRO Strategic Plan Implementation, Operations: Alumni and Stakeholder Engagement, Toronto, Ontario, Canada.

2010 - 2014  
**Member**, Alumni Council, Faculty of Medicine, Toronto, Ontario, Canada.

2006 - 2014  
**Chair**, Department of Radiation Oncology Academic Communications Committee, Toronto, Ontario, Canada.

2004 - 2006  
**Member**, Ad Hoc Committee for Implementation of Content Management System, Toronto, Ontario, Canada.

**Radiation Medicine Program Web Site**.

2003 - 2006  
**Member**, Radiation Medicine Program, System Support Group, Toronto, Ontario, Canada.

2002 - 2004  
**CARMS/IMG Interviewer**, Toronto, Ontario, Canada.

*Department of Radiation Oncology*.

**1. GRANTS, CONTRACTS AND CLINICAL TRIALS**

**PEER-REVIEWED GRANTS**

**FUNDED**

2010 - present  

2010 - present  
**Site Principal Investigator**, A Phase 3 Study of Pemetrexed, Cisplatin and Radiotherapy Followed by Consolidation Pemetrexed versus Etoposide, Cisplatin and Radiotherapy Followed by Consolidation Cytotoxic Chemotherapy of Choice in Patients with Unresectable, Locally Advanced, Stage III Non-Small Cell Lung Cancer Other than Predominantly Squamous Cell Histology (H3E-MC-JMIG/PROCLAIM). Eli Lilly Canada Inc. REB #: 08-041 OCREB. Collaborator(s): Senan S, Vokes E. 110,000. [Clinical Trials]  
*Trial Steering committee member.*
2009 - present  **Co-Principal Investigator.** A Phase I Study of Stereotactic Radiosurgery Concurrent with Sunitinib in Patients with Brain Metastases. Pfizer Canada Inc. REB#: 09-0115-C. PI: Chung C, **Brade A.** Collaborator(s): Mason W, Zadeh G, Menard C (Co-Investigators). 140,250. [Clinical Trials]

2012 - 2014  **Site Principal Investigator.** A Randomized, Double-Blind, Phase 2, Dose-Ranging Study to Evaluate the Safety and Efficacy of Veliparib and Whole Brain Radiation Therapy Versus Placebo and Whole Brain Radiation Therapy in Subjects with Brain Metastases from Non-Small Cell Lung Cancer (M10-897). Abbott Laboratories. [Clinical Trials]

2009 - 2012  **Co-Investigator.** Radiation Therapy and Sorafenib for Primary and Metastatic Liver Cancer. Canadian Institutes of Health Research (CIHR). Collaborator(s): Dawson L, Yeung I, Ringash J, Coolens C, Knox J, Kim TY. 929,495. [Clinical Trials]

2009 - 2011  **Site Principal Investigator.** Phase I-II Clinical Study of Nimotuzumab (TheraCIM h-R3) in Combination with External Radiotherapy in Stage IIB, III and IV NSCLC. YM BioSciences Inc. REB #: 05-955-CA. [Clinical Trials] $18,671/patient for 10-20 patients.

2008 - 2016  **Co-Investigator.** A phase I/II study of sorafenib and radiation in patients with liver metastases. Bayer Canada Inc. REB 08-0598. PI: Dawson L. 255,000. [Clinical Trials]

2008 - 2013  **Site Principal Investigator.** A Phase 1 study evaluating the Safety, Tolerability and Pharmacokinetics of ABT-888 in combination with whole brain radiation therapy in subjects with brain metastasis (M10-128). Abbott Laboratories. REB#: 09-0348-C. [Clinical Trials]

2008 - 2011  **Co-Principal Investigator.** A Phase I/II Study of Sorafenib and Palliative Radiotherapy in
Patients with Advanced Renal Cell Carcinoma and Symptomatic bony Metastases. Bayer Canada Inc. REB#: 07-0357-C. Collaborator(s): Milosevic M, Oza A (Co-Principal Investigators). [Clinical Trials]

2008 - 2010  
**Co-Investigator.** Identification of Lung Cancer Mutations that Contribute to Treatment Response: A Pilot Study. Princess Margaret Hospital Foundation (The). Invest in Research Program. Collaborator(s): Wouters B. 100,000. [Clinical Trials]

2008 - 2010  
**Co-Investigator.** A phase II study of AZD0530 as first line treatment in patients with metastatic or locally advanced gastric carcinoma. National Cancer Institute of Canada (NCIC). Cancer Therapy Evaluation Program. PI: McKay H. Collaborator(s): Au HJ. 175,000. [Clinical Trials]

2008 - 2009  

2007 - 2012  
**Principal Investigator.** A Phase I Dose Escalation Study of Concurrent Low Dose Radiation with Sorafenib in Three Anatomically-based, Independent Cohorts (Thorax, Abdomen, Pelvis) the TAP Study. Bayer Canada Inc. REB#: 07-0097. [Clinical Trials]

2007 - 2012  
**Principal Investigator.** A phase I dose escalation study of concurrent low dose radiation with sorafenib in three anatomically based, independent cohorts (thorax, abdomen, pelvis) – the TAP study. Bayer Canada Inc. REB#: 07-0097. Collaborator(s): Oza A, Siu L, Chen E, Milosevic M. 225,000. [Clinical Trials]

2007 - 2009  

2006 - 2012  
**Co-Investigator.** A Randomized, Phase III, Open-Label Study of Oral Topotecan plus Whole-Brain Radiation Therapy (WBRT) Compared with WBRT Alone in Patients with Metastases from Non-small Cell Lung Cancer (Protocol #HYT105962). GlaxoSmithKline. REB#: 06-0739-C. PI: Bezjak A. [Clinical Trials]

2006 - 2009  
**Principal Investigator.** A Phase II Study of Concurrent Premetrexed/Cisplatin/Radiation in Stage IIIA/B Non-Small Cell Lung Cancer. Eli Lily Canada Inc. REB#: 05-021-OCREB. Collaborator(s): Shepherd F, Bezjak A. 263,500. [Clinical Trials]

2006 - 2007  
**Co-Investigator.** A phase II study of neoadjuvant radiation followed by concomitant bevacizumab/paclitaxel/carboplatin is a stage IV NSCLC patient at high risk of hemoptysis. National Cancer Institute of Canada (NCIC). Cancer Therapy Evaluation Program. Collaborator(s): Goldberg Z, Leighl N. 360,000. [Clinical Trials]

RESEARCH PROJECT

THESIS PROJECT

C. Research Funding

1. GRANTS, CONTRACTS AND CLINICAL TRIALS

PEER-REVIEWED GRANTS

FUNDED

2016 Aug - 2018 Jul  

The objective of this project is to evaluate the prognostic significance of detectable ctDNA at mid-treatment in OPC patients treated with definitive RT/CRT. We hypothesize that detectable ctDNA at mid-treatment of RT/CRT provides equivalent prognostic information to post-treatment detectable ctDNA. We expect that this ctDNA test can be utilized in future studies to identify patients who could be treated with reduced doses (or escalated doses) of RT/CRT.

2016 Aug - 2018 Jul  

The objective of this project is to demonstrate the feasibility of detecting ctDNA spikes within the 1st week of initiating RT. We hypothesize that a spike in ctDNA levels occurs in a subset of OPC patients within the 1st week of initiating RT as a result of rapid tumour cell death, signifying radiosensitivity.

2016 Jul - 2017 Jun

2015 Nov - 2016 Oct  
**Principal Investigator.** Invest in Research Grant- Impact of distinct HPV subtypes on survival in oropharyngeal cancer. Princess Margaret Cancer Foundation. 100,000 CAD. [Grants]

The purpose of this study is to demonstrate the importance of determining HPV subtype to facilitate personalized treatment of oropharynx cancer. We furthermore aim to evaluate the performance of a novel test that, compared with the standard HPV subtyping test, has the distinct advantages of reduced cost and tissue requirements. Altogether, this proposal will lead to more precise treatments for oropharynx cancer that are tailored to each individual, leading to high cure rates with fewer side effects.
Co-Investigator. MYELSTONE: Replacing Bone Marrow Aspirates with Circulating Tumour DNA Analysis of Multiple Myeloma. Princess Margaret Cancer Centre. Collaborator(s): Trudel, Tracy; Pugh Trevor and Bratman, Scott. 300,000 CAD. [Grants]
The purpose of this project is to develop and deploy a clinical laboratory platform for non-invasive monitoring of ctDNA in multiple myeloma patients. The aims of the project include: (1) extending the sensitivity of ctDNA sequencing protocols; (2) translating ctDNA sequencing protocols from research labs to a clinical setting; (3) comparing the sensitivity and specificity of clinical testing of ctDNA and matched bone marrow biopsies; (4) evaluation of clinical impact, including turnaround time, increased frequency of myeloma patients undergoing monitoring, increased recruitment to clinical trials, and cost of ctDNA versus bone marrow profiling.

Principal Investigator. Selection Pressure and Evolution Induced by Immune Checkpoint Inhibitors and other Immunologic Therapies (SPECIAL). Princess Margaret Hospital Foundation (The). Collaborative Personalized Cancer Medicine Team Grant. Collaborator(s): Siu, Lillian. 300,000 CAD. [Clinical Trials]
This proposal is a prospective study with dedicated blood and fresh tumor tissue acquired for the purpose of identifying circulating biomarkers of response to immune checkpoint inhibitors (ICIs) in head/neck cancer and metastatic melanoma. We will be assessing the utility of ctDNA quantification and enumeration of circulating myeloid-derived suppressor cells and regulatory T-cells for the purpose of predicting response to ICIs.

Co-Principal Investigator. Circulating HPV DNA in Patients withLocally Advanced Cervical Cancer Treated with Definitive Chemoradiation. University of Toronto. Collaborative Seed Grant. Collaborator(s): Han, Kathy and Leung, Eric. 50,000 CAD. [Grants]
This project aims to investigate the clinical utility of plasma HPV DNA detection and FDG-PET/CT scanning for determining response to treatment in locally advanced cervical cancer.

The objective of this project was to apply methods for detecting circulating tumor DNA to breast and colorectal adenocarcinomas and to non-Hodgkin lymphoma.

The objective of this project was to develop methods for detecting cancer-specific mutations in plasma before and after radiotherapy.

This project explored how the tumor microenvironment impacts cancer stem cell function and treatment resistance.

NON-PEER-REVIEWED GRANTS

FUNDED

Principal Investigator. Circulating nucleic acid biomarkers for head/neck and related cancers. Princess Margaret Cancer Centre. Lab Start-up Funds. 1,250,000 CAD. [Grants]
These unrestricted funds are intended to provide continuous lab research funding for 5 years. My lab is investigating novel analysis approaches and applications of circulating tumour-derived DNA (ctDNA) and other circulating nucleic acid biomarkers. Analysis of ctDNA has
the potential to revolutionize the management of head/neck cancer and other cancer types. Through innovative clinical trials, the use of model systems, and in vitro studies, my lab is working to turn ctDNA and other biomarkers into clinically useful tools in order to improve outcomes and limit side effects from invasive procedures or unnecessary treatment.

**Presenter.** Post-Radiotherapy Cervical Lymph Node Calcification on its Own is Not Predictive for Neck Recurrence in Oropharyngeal Carcinoma. Canadian Association of Radiation Oncology (CARO) Annual Meeting. Kelowna, British Columbia, Canada. Purpose: Claims that post-radiotherapy (Post-RT) lymph node calcification (calLN+) is a putative adverse feature for residual neck disease in head and neck cancer are not readily supported with evidence. This study evaluates the frequency and prognostic significance of post-RT calLN+ in lymph node-positive (LN+) oropharyngeal cancer (OPC) following definitive radiotherapy ± chemotherapy (RT/CRT).

**Materials and Methods:** A retrospective review of a prospectively assembled cohort of LN+ OPC treated with RT/CRT from 2003 to 2012 was conducted. Tumour HPV status was ascertained by p16 staining. calLN+ was identified by review of all patients with contrast enhanced CT undertaken within six months following RT. Radiological details of calLN+ and "adverse radiologic features" [defined as extra capsular extension (ECE), necrosis, or conglomerate nodal mass(es)] were recorded. Each calLN+ patient was matched to two controls without lymph node calcification (calLN–) treated during the same study period (1:2 matched for T-, N-category, and p16 status). Regional control (RC) was calculated using Kaplan-Meier method and log-rank test for comparison between study (calLN+) and control (calLN–) cohorts. Multivariable analysis (MVA) identified predictors for RC.

**Results:** calLN+ were present in 52 (5%) of 966 consecutive LN+ OPC patients, of whom 31 (60%), 10 (19%), three (6%) and eight (15%) had 1, 2, 3 or ≥4 calLN+, respectively. Median calLN+ size was 1.3 cm (range: 0.5-4.1 cm). The frequency of calLN+ did not differ between p16-positive [p16(+)] and p16-negative [p16(–)] patients [37/615 (6%) versus 12/192 (6%), p=0.90]. The matched control cohort of 104 calLN– patients had similar demographic and clinical features compared to the study population. Post-RT neck dissection was performed in 9/52 (17%) calLN+ versus 13/104 (13%) calLN– patients (p=0.41). "Adverse radiological features" were present in 8/52 (15%) calLN+ versus 12/104 (12%) calLN–, respectively (p=0.49). Regional failure manifested in 7/52 (13%) calLN+ patients, five with residual nodal disease (all had "adverse radiological features") while two failed subsequently. The remaining 42 calLN+ cases without "adverse radiological features" did not experience regional failure. At the median follow-up of four years, RC at three years was similar for calLN+ versus calLN– (86% versus 91%; p=0.26). MVA confirmed that "adverse radiological features" was the only prognostic factor for regional failure [HR=5.7, p=0.002], while calLN+ (p=0.34) and p16 status (p=0.49) were not predictive.

**Conclusions:** Presence of calLN+ in the post-RT setting is not associated with inferior regional control. Our study confirms that nodes with "adverse radiological features" (ECE, necrosis, or conglomerate nodal mass(es)) had poorer outcomes. calLN+ alone in the absence of "adverse radiological features" should not be considered an indicator for post-RT neck dissection.

**Publication Details:**
Shrinivas Rathod, Shao Hui Huang, John Waldron, John Kim, Eugene Yu, Li Tong, Andrew Bayley, Scott Bratman, John Cho, Meredith Giuliani, Andrew Hope, Jolie Ringash, Brian O’Sullivan. Post-Radiotherapy Cervical Lymph Node Calcification on its Own is Not Predictive for Neck Recurrence in Oropharyngeal Carcinoma. Radiother Oncol. Coauthor or Collaborator.
Materials and Methods: All p16-confirmed newly diagnosed HPV(+) OPC treated with RT +/- CTx between 2000 to 2012 were included. Overall survival (OS), locoregional control (LRC), distant control (DC), and Grade 3-4 late toxicity (LT) were estimated. Multivariable analysis (MVA) identified predictors for DC and OS. Recursive partitioning analysis (RPA) derived low- and high-DM risk groups. Within the low- and high-DM risk subgroup identified by RPA, we compared DC between RT with or without CTx to identify potential candidates for omission of CTx.

Results: A total of 757 HPV(+) (Stage I/II/III/IV: 8, 34, 93, 622) patients were identified, including 605 (80%) males and 389 (51%) >10 pack-year (PY) smokers. Median age was 58 years. Tonsil or tongue base primary tumours were detected in 718 (95%) patients. Concurrent CTx (cisplatin 100mg/m2 every three weeks) with RT was given in 382 (50%) cases. Median follow-up was 5.1 years. A total of 40 local, 35 regional, and 98 DM were identified. Five-year OS, LRC, DC and LT were 76%, 92%, 87%, and 20%, respectively. MVA identified T4 [Hazard ratio (HR) 1.95, p<0.01] or N2c-3 (HR 3.5, p<0.01], and absence of CTx (1.7, p=0.03) as DM predictors; neither smoking PYs (HR 0.99, p=0.41) nor age (HR 1.01, p=0.43) were predictive for DM, but predictive for OS (age: HR 1.02; smoking: 1.01, both p<0.01). RPA divided entire cohort into low-risk (T1-3N0-2b, n=441) and high-risk (T4 or N2c-3, n=316) subgroups with five-year DC of 94 versus 76% and OS of 84 versus 66%, respectively (both p<0.01). In the low-risk subgroup, DC was similar between RT (n=247) versus RT+CTx (n=194) (95% versus 93%, p=0.67). Five-year DC rates by smoking <=10 (n=47) versus >10 (n=52) pack-years were also similar in T1-3N2b (93% versus 90%, p=0.53) subset. In the high-risk subgroup, DC was lower in the RT (n=128) versus CRT (n=188) (65% versus 83%, p<0.01).

Conclusions: This expanded cohort study (sample size doubled from 382 to 757) confirms that DM is the main form of treatment failure for HPV(+) OPC patients. T1-T3N0-N2b subgroup has low-DM risk, which is not influenced by smoking PY although smoking adversely affects survival for all groups. While these findings should be confirmed prospectively, the low-DM risk subgroup represents a candidate for deintensification approaches.

Brian O’Sullivan, Shao Hui Huang, John Waldron, Susie Su, Andrew Bayley, Scott Bratman, John Cho, Meredith Giuliani, Andrew Hope, John Kim, Jolie Ringash, Aaron Hansen, David Goldstein, Li Tong, Bayardo Perez-Ordonez, Ilan Weinreb, Wei Xu. Metastatic Risk Groups in Human Papillomavirus-related Oropharyngeal Cancer Treated with Definitive Radiotherapy with or without Chemotherapy. Radiother Oncol. Coauthor or Collaborator.

2015 Sep

Risk of Relapse Profile in Human Papillomavirus-unrelated Oropharyngeal Carcinoma Treated with Definitive Radiotherapy with or without Chemotherapy. Canadian Association of Radiation Oncology (CARO) Annual Meeting. Kelowna, British Columbia, Canada. Purpose: To determine the risk of disease relapse profile following definitive radiotherapy/chemotherapy (RT/CRT) in Human papillomavirus-unrelated [HPV(-)] oropharyngeal cancer (OPC) patients.

Materials and Methods: All newly diagnosed p16-confirmed HPV(-) OPC patients treated with RT/CRT from 2000 to 2012 were included. Overall survival (OS), recurrence-free survival (RFS), locoregional control (LRC), distant control (DC), and grade 3-4 late toxicity (LT) were estimated using Kaplan-Meier method. Multivariable analysis (MVA) identified predictors for RFS. Recursive partitioning analysis (RPA) derived low- and high-RFS risk groups.

Results: A total of 314 HPV(-) (Stage I/II/III/IV: 13, 39, 51, 211) patients were identified, including 231 (74%) males with median age of 65 years (range 33-89). Primary tumours originated from tonsil or tongue base in 230 (73%) cases. Two hundred and ten (67%) cases were treated with RT alone, 87 (28%) with concurrent cisplatin (100 mg/m2 x 3 on days 1, 22, and 43) and 17 (5%) with cetuximab. Median follow-up was 3.9 years. Relapse occurred in 112 cases (79 locoregional, 55 distant failures). At five years, OS, RFS, LRC, DC, and LT were 45%, 64%, 74%, 83%, and 25%, respectively. MVA identified N2b-3 category as a predictor for disease relapse [Hazard Ratio (HR) 2.6 (95% CI: 1.7-4.1), p<0.01]; age (HR 1.03, p=0.06) and T3-4 (HR 1.4, p=0.09) were marginally predictive; smoking pack-years (p=0.94) and concurrent chemotherapy (p=0.29) were non-predictive. RPA stratified the entire cohort into low- (T1-2N0-
2a, n=77) and high- (T3-4 or N2b-3, n=237) relapse risk subgroups with five-year RFS of 86% and 56%, respectively. In the low-risk group, 74/77 (96%) patients received RT alone and their five-year RFS was 86% (95% CI 74-92). For the high-risk group, RT alone (n=136) subgroup had a lower RFS compared to CRT (n=84) or RT with cetuximab (n=17) (51% versus 63%, p=0.03).

Conclusions: Locoregional failure is the main form of treatment failure for the HPV(-) OPC population. A low-relapse risk subgroup, defined as T1-T2N0-N2a, may be appropriately treated with RT alone. High-relapse risk HPV(-) OPC patients have a poor prognosis, even with intensified treatment schedules (i.e. high dose cisplatin) and warrants further research on novel treatment strategies.

Shao Hui Huang, John Waldron, Susie Su, Li Tong, Andrew Bayley, Scott Bratman, John Cho, Meredith Giuliani, Andrew Hope, John Kim, Jolie Ringash, Aaron Hansen, David Goldstein, Bayardo Perez-Ordonez, Ilan Weinreb, Wei Xu, Brian O’Sullivan. Risk of Relapse Profile in Human Papillomavirus-unrelated Oropharyngeal Carcinoma Treated with Definitive Radiotherapy with or without Chemotherapy. Radiother Oncol. Coauthor or Collaborator.

2015 Sep Natural Course Following Failure After Definitive (Chemo-) Radiotherapy in HPV-Related and HPV-Unrelated Oropharyngeal Cancer. Canadian Association of Radiation Oncology (CARO) Annual Meeting. Kelowna, British Columbia, Canada. Purpose: To report patterns of first site of failure, outcomes after failure and to identify predictors of survival following failure in HPV-related [HPV(+)] and HPV-unrelated [HPV(-)] oropharyngeal cancer treated with definitive radiotherapy or chemoradiotherapy (RT/CRT).

Materials and Methods: A prospectively assembled cohort of p16-confirmed OPC patients with documented disease relapse at local, regional or distant sites following RT/CRT (RT dose ≥50 Gy) from 2000 to 2012 were included. Tempo and pattern of site of first failure and outcome following failure were compared between HPV(+) and HPV(-) cohorts. Overall survival (OS) after failure was estimated by Kaplan-Meier method and multivariate analysis (MVA) was performed to identify survival predictors.

Results: A total of 249 OPC patients [136 HPV(+) and 113 HPV(-)] with disease relapse following primary RT/CRT were identified. The most common site of first failure was locoregional (LRF) in the HPV(-) patients [70 (62%)], while distant metastases (DM) was most common in the HPV(+) patients [84 (62%)]. The interval from RT/CRT to DM was longer in HPV(+) versus HPV(-) [16.7 versus 8.9 months, p<0.01] but interval to LRF was similar (8.4 versus 6.8 months, p=0.80). First failure occurred within the first two years following RT/CRT in 90% HPV(-) versus 78% HPV(+) cases. Median follow-up was 1.8 years. HPV(+) patients had longer OS compared to the HPV(-) (OS at two years: 32% versus 15%, p<0.01). For the LRF alone subset, more HPV(+) patients underwent salvage surgery (Sx) [30/52 (58%) versus 22/70 (31%), p=<0.01]. Salvage Sx recipients had higher OS (two years rates: 43% versus 19%; p<0.001) compared to those without salvage Sx. HPV(+) patients had higher OS at two years compared to the HPV(-) patients (26% versus 11%, p=0.01) for those without salvage Sx and marginally higher in those with salvage Sx (52% versus 30%, p=0.08). For the DM subset, HPV(+) also had higher two-year OS compared to the HPV(-) (31% versus 19%, p<0.01). On MVA, HPV(+) status [Hazard ratio (HR) 0.7, p=0.03], >20 smoking pack-years (HR 1.9, p<0.01) and salvage Sx intervention (HR 0.4, p<0.01) were the survival predictors.

Conclusions: This study confirms a differing natural course following disease failure in HPV(+) and HPV(-) OPC. A longer survival in HPV(+) patients is observed in almost all subsets compared to their HPV(-) counterparts. In HPV(+) patients, delayed distant failures are a feature with 22% DM presenting after two years of follow-up. This study has implication on surveillance strategies and highlights the importance of long-term surveillance in HPV(+) patients. HPV status, smoking pack-years and surgical salvage intervention are independent predictors of survival after progression.

Shrinivas Rathod, Shao Hui Huang, John Kim, Susie Su, Wei Wu, John Waldron, Andrew Bayley, Scott Bratman, John Cho, Meredith Giuliani, Andrew Hope, Jolie Ringash, Aaron Hansen, David Goldstein, Li Tong, Bayardo Perez-Ordonez, Ilan Weinreb, Brian O’Sullivan. Natural Course Following Failure After Definitive (Chemo-) Radiotherapy in HPV-Related and HPV-Unrelated Oropharyngeal Cancer. Radiother
Outcome Following Definitive Radiotherapy for Squamous Cell Carcinoma of the Nasal Vestibule. 

Canadian Association of Radiation Oncology (CARO) Annual Meeting. Kelowna, British Columbia, Canada. Purpose: Nasal vestibule squamous cell carcinoma (NV-SCC) is a rare disease entity. No staging system exists within the UICC/AJCC classification for this tumour, although the Wang staging system is often applied. Radiotherapy (RT) is known to be effective at early presentation but its role in more advanced disease is controversial. We report our experience of managing this disease with definitive RT.

Materials and Methods: A retrospective review of all patients diagnosed with NV-SCC treated in our institution from 1980 to 2013 was performed. Staging was based on Wang classification (T1, superficial and localized to the vestibule, T2, extends beyond the vestibule and T3, with fixation to underlying structure). Overall survival (OS), cause specific survival (CSS), local control (LC), regional control (RC) and distant control (DC) were estimated using Kaplan-Meier method. Multivariable analysis (MVA) with Cox regression was performed to identify factors associated with LC. Long-term sequelae, including function and cosmesis, were assessed.

Results: A total of 108 eligible patients were included. Primary tumour size was <2 cm in 53 patients (49%), 2-4 cm in 45 patients (42%) and >4 cm in 10 patients (9%). According to Wang Classification, T1: 42 (39%), T2: 36 (33%) and T3: 30 (28%) patients. Bone involvement occurred in 19 (18%) patients. Sixteen patients (15%) had clinical nodal involvement at presentation. All patients were treated with curative RT (BED2: 50-70Gy). Median follow-up was 6.6 years. Twenty-eight patients (25.9%) had local failure (initial tumour size: ≤4 cm: 22 patients; >4 cm: 6); of whom 21 (75%) were successfully salvaged by surgery; including 5/6 of >4 cm initial tumour size. Seven patients (6%) had isolated regional failure (five of whom were salvaged successfully) and seven patients (6.4%) had distant failure. Grade 3-4 toxicity was only present in two cases (one deformity of nose and one hard palate perforation). The five-year LC, RC and DC rates were 74%, 90%, and 93% respectively. The five-year OS and CSS rates were 66% and 89%, respectively. Tumours >4 cm in size had worse LC compared to <4 cm tumours (40% versus 77%, respectively, p=0.01). Presence of bone involvement also trended to a lower LC (58% versus 77%, p=0.07). Non-significant reduction in LC was observed with higher Wang stage (78% for T1/T2 versus 63% for T3, p=0.1). MVA confirmed that tumour size >4 cm was adversely affecting the LC (Hazard Ratio 2.7, p=0.036), while T classification (p=0.96) and bone invasion (p=0.43) were not predictive.

Conclusions: This single institution series shows that definitive RT is an effective treatment for nasal vestibule SCC with high local control and excellent cosmetic outcome. Tumours size >4 cm have poor LC, but RT can still be offered since it can potentially preserve the organ and if not, salvage surgery is highly successful. Nodal failure is uncommon and elective regional nodal irradiation is not recommended.

Publication Details:
Ibrahim Atean, Shao Hui Huang, John Waldron, Yuyao Song, Wei Xu, Andrew Bayley, Scott Bratman, Meredith Giuliani, Andrew Hope, John Kim, Jolie Ringash, Jonathan Irish, Brian O'Sullivan. Outcome Following Definitive Radiotherapy for Squamous Cell Carcinoma of the Nasal Vestibule. Radiother Oncol. Coauthor or Collaborator.

Impact of Surgical Margins on Outcomes in Oral Cavity Squamous Cell Carcinoma Managed with Surgery and Post-Operative Radiotherapy. Canadian Association of Radiation Oncology (CARO) Annual Meeting. Kelowna, British Columbia, Canada. Purpose: To report the outcome of post-operative radiotherapy (PORT) for oral cavity squamous cell carcinoma (OCSCC) and identify predictors of treatment failure.

Materials and Methods: A retrospective review was conducted using a prospectively collected database from a comprehensive cancer centre. Patients with OCSCC treated between 2005 and 2012 with curative intent surgical resection followed by PORT were identified. Surgical procedure, histopathology, post-operative treatment, outcomes and late toxicity data was extracted. Local (LC), regional (RC), distant control (DC); and overall survival (OS) were analyzed. Multivariate analysis (MVA) was used to evaluate predictors for local (LF), regional failure (RF), distant metastasis (DM).

Results: A total of 300 patients were identified: median age - 61 years (21-87); median follow-up - 41
months (4–115); T3/4 category - 121 (41%); N2/3 category - 141 (47%); and G2/3 - 285 (96%). The most common primary site was tongue (n=135; 45%). Margin status was: involved (n=64, 21%); ≤1 mm (n=75, 25%); <5mm (n=99, 33%); and ≥5 mm (n=62, 21%). Neck dissection (ND) was performed in 281 (94%) patients (104 bilateral and 177 unilateral), with nodal extracapsular extension (ECE) present in 89 ND (32%). Concomitant chemotherapy was used in 73 patients (24%). The median time between surgery and PORT (S-RT interval) was six weeks (range 4-10). All patients were treated with IMRT: median dose of 66 Gy; 130 (43%) received 60 Gy; and 128 (43%) received 66 Gy. The five-year LC, RC, DC and OS were 85%, 82%, 86% and 69%; respectively. Of 39 pts with LF, only 8 (21%) had positive invasive margin(s). RF was the most frequent treatment failure (n=49). DM occurred in 39 patients, mainly in lung (n=28, 72%). On MVA, no factors correlated with LF. N2/3 (p<0.001) and longer S-RT interval (p=0.004) correlated with RF; while N2/3 and G2/3 (p<0.001, for both) correlated with DM. Of 90 deaths, 58 were cancer-related. No grade 4 or 5 RTOG late toxicity was reported; 27 patients had grade 3, including osteoradionecrosis (n=16), neck fibrosis (n=6), trismus (n=3) and dysphagia (n=2).

Conclusions: Surgery and PORT achieved excellent outcomes and low rates of late toxicity in OCSCC. Local failures were infrequent and not correlated with margin status. Longer S-RT interval, N2/3 and G2/3 disease were all correlated with worse outcomes.

2015 Sep

Major Salivary Gland Carcinoma: Independent Prognostic Factors for Distant Metastasis and Survival. Canadian Association of Radiation Oncology (CARO) Annual Meeting. Kelowna, British Columbia, Canada. Purpose: To report the outcome of post-operative radiotherapy (PORT) for salivary gland carcinoma (SGC) and identify patients at high risk of distant metastases (DM) who might benefit from systemic therapy.

Materials and Methods: Patients with major SGC treated between 2000-2012 were reviewed retrospectively. All patients underwent initial primary maximal resection with preservation of major nerves unless encased by tumour. Neck dissection (ND) was performed therapeutically in N+ or electively (N0, if high grade and/or T3/4). PORT was delivered using 3D-CRT or IMRT for risk features: T3/4, N+, positive/close margin, high-risk pathology, nerve involvement. Local (LC), regional (RC), distant control (DC); cause-specific (CSS) and overall survival (OS) were analyzed. Multivariate analysis (MVA) assessed predictors for DM, CSS and OS.

Results: A total of 304 patients were identified: 48% were Stage III/IV and 22% had lymphovascular invasion (LVI). The most common primary site was parotid gland (n=237; 78%). High-risk pathology was found in 190 patients (62.5%) as follows: salivary duct carcinoma (n=40), SCC (n=11), G2/3 adenocarcinoma (n=15), G2/3 mucoepidermoid (n=35), G2/3 carcinoma ex-pleomorphic adenoma (n=22), G3 adenoid cystic carcinoma (n=55) and rare histologies (n=12). Margin status was as follows: involved (n=152, 50%), very close ≤1 mm (n=98, 32%) and close <5mm (n=22, 7%). ND was performed in 154 patients (51%), with nodal extracapsular extension (ECE) in 32. Adjuvant chemotherapy was used in 10 patients (3%), all of them with positive/close margin and/or nodal ECE. IMRT (median dose 66 Gy) was used in 171 patients (56%), and 3D-CRT in 133 (44%; median dose 60 Gy). The five- and (ten-) year LC, RC, DC, CSS, OS were 96% (96%), 95% (94%), 80% (77%), 83% (82%), 78% (75%); respectively. Of 13 patients with local failure, 11 (85%) had positive margin (p=0.02). Regional failure occurred in 16 patients, four treated with IMRT and 12 with 3D-CRT (p=0.02). DM was the most frequent treatment failure (n=62), mainly in lung (n=38). On MVA, Stage III/IV, positive margin and high-risk pathology significantly correlated with DM. Of 62 deaths, 49 were cancer-related. MVA identified Stage III/IV and LVI as poor predictors for CSS and OS, while positive margin predicted CSS only. No grade 4 or 5 RTOG late toxicity was reported; 10 patients had grade 3, including neck fibrosis (n=4), osteoradionecrosis (n=4), trismus (n=1) and dysphagia (n=1).

Conclusions: Surgery and PORT achieved excellent long-term outcomes and low rates of toxicity in SGC.
Further research is required for patients with Stage III/IV, positive margin and high-risk pathology to determine incremental benefit of concurrent chemotherapy with PORT to reduce DM.

Publication Details:

2015 Sep Clinical Outcomes Following Re-Irradiation in Head and Neck Cancers. Canadian Association of Radiation Oncology (CARO) Annual Meeting. Kelowna, British Columbia, Canada. Purpose: To evaluate the clinical outcomes following re-irradiation (rRT) in non-nasopharynx head and neck cancers.

Materials and Methods: Retrospective review of a prospectively collected database of all patients who had rRT with curative intent to the head and neck area, for either locoregional recurrences (LRR) or second new primaries (SNP), between 2002 and 2012. Overall survival (OS), local control (LC), regional control (RC) and distal control (DC) was calculated from time of rRT. Multivariate modeling was used to identify predictors of outcomes. Toxicity was graded per Common Terminology Criteria for Adverse Events v3.0 (CTCAE).

Results: Eighty-five patients were included in this study with a median follow-up of 47 months (4-117). Twenty-eight (33%) had rRT for SNP and 57 (67%) for LRR with a median interval from initial RT to rRT of 3.6 years (0.3-56.7). Histology was SCC in 65 (76%) patients and non-SCC in 20 (24%) patients. There were 63 (74%) males and the median age at rRT was 67.4 years. The TNM distribution was: T0-T1 (n=38), T2-T4 (n=47), N0 (n=42), N1 (n=12), N2 (n=31). Fifty-one (60%) patients had rRT adjuvantly post-surgery and 21 (25%) had concurrent chemotherapy. Seventy (82%) patients were treated with hyperfractionated regimes with 1-1.5 Gy/fraction, twice daily to a dose of 44-66 Gy, seven (8%) patients received conventional fractionation with 1.8-2 Gy/fraction to a dose of 40-70 Gy and seven (8%) received hypofractionated regimes with >2 Gy/fraction to a dose of 35-66Gy. The mean rRT BED10 was 58.1 and the mean cumulative BED10 was 84.7. 75 (88%) patients had rRT using IMRT technique, nine (11%) non-IMRT techniques and one patient had brachytherapy. The OS, LC, RC and DC at two years were 52% (42-64), 88% (78-93), 93% (84-97) and 89% (80-94) respectively. The two-year cancer-specific survival was 64% (52-73). Multivariate analysis showed that SCC histology was associated with worse OS {HR 3.91(1.6-9.3), p=0.0026} and SNP with better OS {HR0.4 (0.21-0.77)}. The rate of grade ≥3 late toxicity was five (2-13) at one year and 7% (3-16) at three years.

Conclusions: This large series shows that rRT using IMRT technique in head and neck cancers can be used safely to salvage selected patients.

1. INTERNATIONAL

Invited Lectures and Presentations

2014 Nov 2 Invited Speaker. Thyroid Cancer Tumor Board Session. American Thyroid Association. San Diego, California, United States.

2013 Panelist. Nodal disease management. 2nd World Congress on Thyroid Cancer. Toronto.

2013 Panelist. Anaplastic Thyroid Cancer. 2nd World Congress on Thyroid Cancer. Toronto.

2013 Chair. Instructional Course - External beam radiation therapy in the management of aggressive thyroid cancer. 2nd World Congress on Thyroid Cancer. Toronto.

2010 Chair. “New UICC Staging System for Cancer (TNM-7) and Japanese Staging System: Problems and
2010
2009
External Beam Radiation Therapy in the Management of Aggressive Thyroid Cancer. World Congress on Thyroid Cancer. Toronto.
2009
Future Directions in Advanced Thyroid Cancer Therapies Radiation for Locally Advanced Thyroid Cancer. 80th Annual Meeting of the American Thyroid Association. Palm Beach, Florida.
2007
Treatment planning for Rectal and Anal Cancers. Addenbrookes Hospital. Cambridge, United Kingdom.
2006
External Beam Radiation Therapy in Thyroid Cancer. The Endocrine Society. 88th Annual Scientific Meeting. Boston.
2006
2006
Meet the Professors Workshop Radioactive Iodine and External Beam Radiotherapy: when to use. American Thyroid Association 74th Annual Scientific Meeting. Phoenix.
2005
2005
Evans Memorial Lecture Oesophageal Chemoradiation: Target Volume Definition. Royal College of Radiologist, Annual Scientific Meeting. London, United Kingdom.
2005
Rectal Cancer: Is there a dose response with CRT. Royal College of Radiologist, Annual Scientific Meeting. London, United Kingdom.
2003
Differentiated Thyroid Cancer: is there a role for external beam radiotherapy. Surgery of the Thyroid and Parathyroid Glands. Harvard University Continuing Medical Education. Boston. (Continuing Education).
2002
External Radiotherapy in Thyroid Cancer Radiotherapy in Thyroid Cancer. American Thyroid Association. 74th Annual Scientific Meeting. Los Angeles.
2000
Adjuvant Therapy in Differentiated Thyroid Cancer. Thyroid Cancer Symposium. University of Cincinnati. Ohio, United States.
1999
Radiation in Rectal Cancer. St Luke's Hospital, Department of Clinical Oncology. Guilford, United Kingdom.
1998
Accelerated External Beam Radiotherapy Alone for Sphincter Preservation. The Fourth International Conference on Gastrointestinal Oncology. Pentagon City, Virginia, United States.
1998
Radiotherapy and High Dose Infusional 5FU with and without Mitomycin C for Anal Cancer. The Fourth International Conference on Gastrointestinal Oncology. Pentagon City, Virginia, United States.
1997
The National Thyroid Cancer Treatment Cooperative Study Registry Experience. Meet The Professors Lunch. The American Thyroid Association Conference. San Diego.
1997
1996
The Role of Radiation in Rectal Cancer. Addenbrookes Hospital. Cambridge, United Kingdom.

Other Lectures and Presentations

2007  Organ motion during preoperative chemoradiation for rectal cancer. World Congress on Gastrointestinal Cancer.

2006  Bortezomib in Patients with Metastatic Differentiated Thyroid Cancer: Preliminary Results of a Multicenter Phase II Study. American Thyroid Association. Plenary Presentation.

2004  The Internet Facilitates Cancer Staging. UICC World Conference for Cancer Organizations. Dublin, Ireland.

2001  Phase I/II Study of combined modality therapy in Pancreatic Cancer with Gemcitabine (Gem) and Escalating Dose Radiation Therapy (RT). American Society for Therapeutic Radiology and Oncology (ASTRO). San Francisco.

2000  Acute morbidity of preoperative concurrent radiotherapy and 5FU infusion in rectal cancer. European Society for Therapeutic Radiology and Oncology (ESTRO). Istanbul.

1999  How accurately is the TNM Stage recorded in a tertiary cancer center. American Society for Therapeutic Radiology and Oncology (ASTRO). San Antonio.

1997  Improved survival and local control following XRT in Differentiated Thyroid Cancer. American Society for Therapeutic Radiology and Oncology (ASTRO). Orlando.

1996 Jun  Early Stage Hodgkins Disease - The Late Effects of Treatment. The International Conference on Malignant Lymphoma.

1995  Medullary Thyroid Cancer - Prognostic Factors and the Role of External Radiation Therapy. The International Thyroid Congress. Toronto.

2. NATIONAL

Invited Lectures and Presentations

2012  Mercury rising: Who can avoid neoadjuvant RT. Toronto Cancer Conference. Toronto.

2010  Cancer Staging 101. Canadian Partnership Against Cancer.

2008  Thyroid Cancer a Radiation Oncologists Perspective. Canadian Society of Nuclear Medicine Annual Scientific Meeting 2008.

2004  Do we over treat or under treat Differentiated Thyroid Cancer? Vancouver Cancer Centre. Vancouver.

2002  The Management of Differentiated Thyroid Cancer. The experience from a single Institution (Princess Margaret Hospital) and a Multinational Registry. Montreal Thyroid Club. Montreal.

2002  High Dose Iodine Therapy in Thyroglobulin Positive Scan Negative Thyroid Cancer. Canadian Diabetes Association and Canadian Society of Endocrinology and Metabolism. 6th Annual Meeting. Vancouver.

Presented and Published Abstracts

Annual Meeting (CARO). Winnipeg, Manitoba.

Publication Details:

2009
Management of Pituitary Adenoma with Stereotactic Radiotherapy at Princess Margaret Hospital. CARO Annual Meeting. Montreal, Quebec.

Publication Details:

2009
Intensity Modulated Radiotherapy (IMRT) and Concurrent Chemotherapy (CHT) for Anal and Perianal Cancer: Preliminary Report of Acute Toxicity. CARO Annual Meeting. Montreal, Quebec.

Publication Details:

Other Lectures and Presentations

2001

1999
The accuracy of recorded TNM Stage in a tertiary cancer center. Canadian Association of Radiation Oncologists (CARO). Montreal.

1999

1997
Designing a Curriculum for Quality Improvement in a Postgraduate Education Program. Canadian Association for Medical Education (CAME). Halifax.

1996
A review of Staging Classifications in Thyroid Cancer. The Royal College of Physicians and Surgeons. Halifax.

1995
Late Mortality and Morbidity following treatment for early stage Hodgkin’s Disease. The Royal College of Physicians and Surgeons. Montreal.

1994
Failure to Demonstrate an Effect of Interruption of Radiation Therapy on Local Control of Rectal Cancer. The Royal College of Physicians and Surgeons of Canada. Toronto.

1993
Involved field radiation in clinical stage I & II low grade lymphoma. The Royal College of Physicians and Surgeons of Canada. Vancouver.

1992

1992
External Beam Radiotherapy as Primary Treatment for Rectal Adenocarcinoma. The Royal College of Physicians and Surgeons of Canada. Ottawa.
3. PROVINCIAL / REGIONAL

Invited Lectures and Presentations

2013  All stage II and III rectal cancer should have adjuvant therapy. Do they? Or should they? Grand Rounds. Kingston.

2012  Visiting Professor. Should we give adjuvant therapy to all stage II and III rectal cancers? South Lake Hospital. Newmarket.

2011  Cancer Stage: How are we using Stage Data In Ontario? Does TNM have a future? Kingston Regional Cancer Centre; Grand Rounds Kingston. (Continuing Education).

2010  IMRT in Anal Cancer. The University of Toronto, Department of Radiation Oncology IMRT Insights: Transforming Practice Through Collaboration.

2007  How to Stage. McLaughlin Durham Regional Cancer Centre. Oshawa.

1999  Adjuvant Therapy in Thyroid Cancer. Queen’s University, Kingston Continuing Medical Education. (Continuing Education).

4. LOCAL

Invited Lectures and Presentations

2007  Panelist. Colorectal Cancer Symposium. Update on General Surgery, University of Toronto. (Continuing Education).

2006  External Beam Radiotherapy. Current Concepts in the Management of Thyroid Nodular Disease,
University of Toronto. (Continuing Education).

2005
Adjuvant Chemoradiation in Rectal Cancer. New Developments in Cancer Management, Princess Margaret Hospital Conference.

2004
External Radiation Therapy in Differentiated Thyroid Cancer. Current Concepts in the Management of Thyroid Nodular Disease, University of Toronto. (Continuing Education).

2002
The Role for External Radiation Therapy in Differentiated Thyroid Cancer. Current Concepts in the Management of Thyroid Nodular Disease, University of Toronto. (Continuing Education).

2001
Adjuvant Therapy in Gastric Cancer. COMET.

2000
Chemotherapy and Radiation therapy in Pancreatic Cancer. Focus on Gastrointestinal Oncology, University of Toronto, Continuing Medical Education. (Continuing Education).

1999
Chemoradiation. Indications and Applications. Future Directions in Radiation Oncology University of Toronto, Continuing Medical Education. (Continuing Education).

1999
The Role for Adjuvant Therapy in Thyroid Cancer. Current Concepts in the Management of Thyroid Nodular Disease. University of Toronto, Continuing Medical Education. (Continuing Education).

1998
Cancer of the Esophagus: Radiation and/or Chemotherapy. Course on Gastroenterology and Digestive Endoscopy. Wellesley Hospital. Toronto.

1998
Role of External Beam Radiation in the Multidisciplinary Management of Pancreatic Cancer. HPB Mini Symposium for the Visiting Professor, Department of Surgery, Faculty of Medicine, University of Toronto.

1997
The Role of Radiation Therapy in Locally Advanced Disease. Update in Pancreatic Cancer Research and Treatment. University of Toronto, Continuing Medical Education. (Continuing Education).

1997

1997
Is there a role for surgery in the management of Esophageal Cancer? Combined Annual Thoracic Refresher Course.

1996
The Role of Adjuvant Chemotherapy and Radiotherapy in Colorectal Cancer, Update in General Surgery. University of Toronto, Continuing Medical Education. (Continuing Education).

1996
The Adjuvant Management of Differentiated Thyroid Cancer, Current Concepts in the Management of Thyroid. University of Toronto, Continuing Medical Education. (Continuing Education).

1996
Esophageal Cancer, Update on Digestive Diseases. University of Toronto, Continuing Medical Education. (Continuing Education).

1995
The Role of Combination Therapy in Oesophageal Cancer. Toronto Thoracic Surgery Refresher Course, University of Toronto, Continuing Medical Education. (Continuing Education).

1993
The Role of Primary Radiotherapy in Rectal Cancer: Controversies in Colorectal Cancer. University of Toronto, Continuing Medical Education 1993. (Continuing Education).

1. EDUCATION

Degrees
1995 - 1997 PhD, Medical Biophysics, University of Toronto, Canada
1988 - 1992 MD, Graduated with Honors, Medicine, Faculty of, University of Toronto, Canada
1986 - 1988 MSc, Medical Biophysics, University of Toronto, Canada
1982 - 1986 BSc, Graduated with Honors, Zoology, University of Toronto, Canada

Postgraduate, Research and Specialty Training
1997 - 1998 Visiting Scholar-Post MD Fellowship, Department of Cell Biology and Genetics, Erasmus University, Rotterdam, Netherlands
1993 - 1996 Resident, Department of Radiation Oncology, Faculty of Medicine, University of Toronto, Canada
1992 - 1993 Internship, Comprehensive Internal Medicine, Toronto General Hospital, Department of Medicine, University of Toronto, Canada
1990 Summer Research Fellowship, Department of Radiation Medicine, Massachusetts General Hospital, Harvard University, Boston, United States
1989 Visiting Scientist, MD Anderson Cancer Center, Department of Experimental Radiotherapy, University of Texas, Houston, United States

Qualifications, Certifications and Licenses
2013 Aug - 2014 Aug Primary Human Prostate Cancer Xenografts for the Study of Radiosponse and DNA Repair in Stem Cells, University Health Network, Toronto, Ontario, Canada, License / Membership #: AUP 2269.5
2013 Aug - 2013 Nov Characterization of New Drugs Which Sensitize Human Xenografts to Chemotherapy and Radiotherapy on the Basis of Increased Tumour Growth Delay and Decreased Gut Toxicity, Toronto, Ontario, Canada, License / Membership #: AUP 833.22
2013 May - 2013 Aug Characterization of New Drugs Which Sensitize Human Xenografts to Chemotherapy and
Radiotherapy on the Basis of Increased Tumour Growth Delay and Decreased Gut Toxicity, Toronto, Ontario, Canada, License / Membership #: AUP# 833.21

2013 Jan - 2013 Jul Primary Human Prostate Cancer Xenografts for the Study of Radiosponse and DNA Repair in Stem Cells, University Health Network, Toronto, Ontario, Canada, License / Membership #: AUP# 2269.4

2013 Jan - 2013 Jun Characterization of New Drugs Which Sensitize Human Xenografts to Chemotherapy and Radiotherapy on the Basis of Increased Tumour Growth Delay and Decreased Gut Toxicity. University Health Network, Toronto, Ontario, Canada, License / Membership #: AUP# 833.2

2011 Biosafety certificate. DNA Repair and Cell Cycle Checkpoints in Human Cancer, University Health Network, Canada, License / Membership #: # 25116

2011 Primary Human Prostate Cancer Xenografts for the Study of Radiosponse and DNA Repair in Stem Cells. University Health Network Animal Care Committee, Canada, License / Membership #: #AUP 2269.0

2010 - 2011 Characterization of New Drugs Which Sensitize Human Xenografts to Chemotherapy and Radiotherapy on the Basis of Increased Tumour Growth Delay and Decreased Gut Toxicity, University Health Network Animal Care Committee, Canada, License / Membership #: #AUP 833.14

2009 - 2011 Biosafety certificate, STTARR/PMH Research, Canada, License / Membership #: #13376

2009 - 2011 Biosafety certificate. DNA Repair and Cell Cycle Checkpoints in Human Cancer, University Health Network, Canada, License / Membership #: # 13376

2008 - 2010 Biosafety Certificate. Characterization of New Drugs Which Sensitize Human Xenografts to Chemotherapy and Radiotherapy and Improved radiation induced lung toxicity prediction with linked pre-clinical/clinical models and biomarkers. University Health Network, Canada, License / Membership #: #:12456

2006 - 2008 Biosafety Certificate. DNA Repair and Cell Cycle Checkpoints in Human Cancer, University Health Network, Canada, License / Membership #: #7398

2001 - 2007 Studies in Molecular Carcinogenesis and Molecular Radiobiology in Genitourinary Oncology. University Health Network Animal Care Committee, Canada, License / Membership #: #AUP 833

1996 Fellowship, FRCPC, Radiation Oncology, Royal College of Physicians and Surgeons of Canada, Canada

1993 General Practice Licence, College of Physicians and Surgeons of Ontario, Canada

1992 Licence, L.M.C.C; Canadian General Medical Examinations, Medical Council of Canada, Canada

2. EMPLOYMENT

Current Appointments

2009 - present Professor, Radiation Oncology, University of Toronto, Canada

2009 - present Professor, Medical Biophysics, University of Toronto, Canada

2006 - present Senior Scientist, Ontario Cancer Institute and Campbell Family Cancer Research Institute, Canada

2005 - present Full Member, Institute of Medical Science, University of Toronto, Canada

1999 - present Clinician-Scientist, Radiation Medicine Program, Princess Margaret Hospital, Canada

Previous Appointments

UNIVERSITY - CROSS APPOINTMENT

2005 - 2009 Associate Professor, Medical Biophysics, University of Toronto, Canada

2003 - 2005 Associate Member, Institute of Medical Science, University of Toronto, Canada

1998 - 2005 Assistant Professor, Medical Biophysics, University of Toronto, Canada
3. HONOURS AND CAREER AWARDS

Distinctions and Research Awards

INTERNATIONAL

Received

2011  ESTRO Honorary Fellow, European Society for Therapeutic Radiology and Oncology (ESTRO), Stockholm, Sweden. (Research Award)

2008  Virginia Logan Award Lecturer, Kimmel Cancer Center, Thomas Jefferson University, United States. (Distinction)

2003  Young Investigator Travel Award, Gordon Research Conference on Radiation Oncology, Ventura, California, United States. (Distinction)

1995  Junior Scientist Award, International Congress of Radiation Research - Radiation Research Society, Wurzburg, Germany. (Research Award)

1995  Outstanding Poster Award, Annual Meeting of the American Association for Cancer Research, Toronto, Canada. (Research Award)

NATIONAL

Received

2012 Apr  John Ferguson Hero Award, PCC Research Strategy, Prostate Cancer Canada, Toronto, Ontario, Canada. (Distinction)

2012 Mar  Picchione Visiting Scholar Award, Dalhousie Medical Research Foundation, Halifax, Nova Scotia, Canada. (Distinction)

2004 - 2010  Career Research Scientist, Canadian Cancer Society & National Cancer Institute of Canada, Canada. (Distinction)

1996  Resident Research Award, Canadian Society for Clinical Investigation and Medical Research Council of Canada, Canada. (Research Award)

1995  Phillips Award for Resident Research, Annual Meeting of the Canadian Association of Radiation Oncologists (CARO) - Royal College of Physicians and Surgeons of Canada, Montreal, Quebec, Canada. (Research Award)

1994  Phillips Award for Resident Research, Annual Meeting of the Canadian Association of Radiation Oncologists (CARO) - Royal College of Physicians and Surgeons, Toronto, Ontario, Canada. (Research Award)

PROVINCIAL / REGIONAL

Received

2013 Apr - 2013 Jul  Alan Burton Award in Medical Biophysics, Western University, London, Ontario, Canada. (Specialty: Medical Biophysics)

2013 Mar  Vivian Saykaly Visiting Professor of Oncology, McGill University, Montreal, Quebec, Canada.

2006  Best Annual Research Performance Award, DRO Annual General Meeting, Toronto, Ontario, Canada. (Research Award)
Robert Glen BRISTOW

LOCAL
Received

2016 May

**Best Clinical Paper for 2015.**, Princess Margaret Cancer Center Research Institute. (Research Award)

*Nature Genetics paper describing “Spatial genomic heterogeneity within localized, multifocal prostate cancer. (Boutros et al; 47;736, 2015).*

2014

**Best RMP Rounds for ‘Precision Cancer Medicine for Localized Prostate Cancer: Genomic Subsets and Treatment Intensification’**, Princess Margaret Hospital, Canada. (Distinction)

2014

**Radiation Medicine Program “Radiation Oncology Research Productivity” Award**, Princess Margaret Hospital, Canada. (Distinction)

2011

**CROF/Sanofi-Aventis Research Innovation Award, Department of Radiation Oncology**, University of Toronto, Canada. (Research Award)

2009

**Radiation Medicine Program “Radiation Oncology Research Productivity” Award**, Princess Margaret Hospital, Canada. (Distinction)

2009

**Sustained Excellence in Research Award, Department of Radiation Oncology**, University of Toronto, Canada. (Distinction)

2006

**Radiation Medicine Program “Research Leadership” Award**, Princess Margaret Hospital, Toronto, Ontario, Canada. (Distinction)

2006

**Research Leadership Award, Radiation Medicine Program**, Princess Margaret Hospital, Canada. (Distinction)

2003

**Winner of Best Poster, Department of Medical Biophysics Student Research Day**, Supervisor, University of Toronto, Canada.

1996

**1st Annual Brady Award for Resident Research, Joint Oncology Program**, University of Toronto, Toronto, Ontario, Canada. (Research Award)

1996

**W.J. Simpson Award for Resident Research, Department of Radiation Oncology**, University of Toronto, Toronto, Ontario, Canada. (Research Award)

1994

**W.J. Simpson Award for Resident Research, Department of Radiation Oncology**, University of Toronto, Toronto, Ontario, Canada. (Research Award)

Nominated

2011

**Gerald Kirsh Humanitarian Award**, The Princess Margaret Hospital Foundation, Canada. (Distinction)

**Teaching and Education Awards**

PROVINCIAL / REGIONAL
Received

2006

**Postgraduate Classroom Teaching Award**, Dept of Radiation Oncology, Faculty of Medicine, DRO Annual General Meeting, Toronto, Ontario, Canada. (Postgraduate MD)

LOCAL
Received

2013 Jun

**Professional Mentorship Award, Radiation Medicine Program, Princess Margaret Cancer Centre**, Dept of Radiation Oncology, Faculty of Medicine, Toronto, Ontario, Canada

2009

**Post-Graduate Medical Education (PGME) Excellence Award in Teaching Performance/Mentorship and Advocacy, Faculty of Medicine**, Dept of Radiation
Robert Glen BRISTOW

Oncology, Faculty of Medicine, University of Toronto, Canada. (Postgraduate MD)

2008

Postgraduate Medical Education Excellence in Research Supervision Award, Department of Radiation Oncology, Dept of Radiation Oncology, Faculty of Medicine, University of Toronto, Canada. (Postgraduate MD)

2007

Radiation Medicine Program Education Award “Research Supervisor” Award, Dept of Radiation Oncology, Faculty of Medicine, Princess Margaret Hospital, Toronto, Ontario, Canada. (Postgraduate MD)

Student/Trainee Awards

INTERNATIONAL

Received

2010 - 2011

Junior Investigator Award, Supervisor, Awardee Name: K Luoto. Tumor Microenvironment Workshop

Total Amount: 500 USD

2010 - 2011

Selected to attend Films Workshop – Methods in Clinical Cancer Research, Supervisor, Awardee Name: J Thoms. ECCO-AACR_EORTC-ESMO, Films, Switzerland

2009

AACR- AstraZeneca International Scholar-in-Training Award, Supervisor, Awardee Name: Norman Chan. American Association for Cancer Research, United States

For the AACR-NCI-EORTC International Conference on Molecular Targets and Cancer Therapeutics Meeting in Boston, Massachusetts.

2009

AICR Marie Curie Fellowships 2010, Supervisor, Awardee Name: Stephania Berton. American Institute for Cancer Research (AICR)

2009

ASCO Cancer Foundation Young Investigator Award, Supervisor, Awardee Name: Stanley Liu. American Society of Clinical Oncology, United States

“Identification and characterization of the cellular mechanisms underlying DLL4-Notch pathway-mediated tumor radioresistance.”.

2009

VARIAN-Juliana Denekamp Award 2009, Supervisor, Awardee Name: Stéphane Supiot. European Society for Therapeutic Radiology and Oncology

11th International Wolfsberg Meeting on Molecular Radiation Biology/Oncology 2009.

2008

10th ECCO-AACR-ASCO Workshop on Methods in Clinical Cancer Research – Travel Award, Supervisor, Awardee Name: Dr. Bezad Banihashemi. ECCO-AACR-ASCO, Flims, Switzerland

2008

AACR-GSK Outstanding Clinical Scholar, Supervisor, Awardee Name: Eva Christensen. American Association for Cancer Research, United States

2008

Scholar-in-Training Award, Supervisor, Awardee Name: Eva Christensen. American Association for Cancer Research, United States

2007 May

Young Investigator Award, Supervisor, Awardee Name: Nirmal Bhogal. VIIIth International Workshop, Radiation Damage to DNA, Alberta, Canada

Poster - ASTRO.

2007

Travel Award, Supervisor, Awardee Name: Dr. Stephane Supiot. AACR, Aspen, Colorado, United States

AACR Workshop, Molecular Biology in Clinical Oncology.

2007

Winner of the 2007 ASCO Foundation Merit Award, Supervisor, Awardee Name: Dr. Stephane Supiot. ASCO Foundation, Orlando, Florida, United States

2007 Prostate Cancer Symposium.

2007

Winner of the 2007 ECCO pResidential Abstract Award, Supervisor, Awardee Name: Dr. Stephane Supiot. European Cancer Congress Meeting, Barcelona, Spain

(Given to the best abstract at the European Cancer Congress Meeting).

2006

Scholar-in-Training Travel Award, Supervisor, Awardee Name: Ramya Kumarsewaran. Radiation Research Society
2006 **Winner of the Scholars –In-Training Award**, Supervisor, Awardee Name: Norman Chan. Radiation Research Society  
*Poster* - ASTRO.

2006 **Winner of the Scholars –In-Training Award**, Supervisor, Awardee Name: Ramya Kumarsenwaran. Radiation Research Society  
*Poster* - ASTRO.

2006 **Winner of the Shenaq International Research Award**, Supervisor, Awardee Name: Artur Gevorgyan. University of Toronto

2005 **Fellowship**, Supervisor, Awardee Name: Ananya Choudhury. Cancer Research UK/ Royal College of Radiologists, United Kingdom

2005 **Marie Curie Award**, Supervisor, Awardee Name: Shahnaz Al-Rashid. Radiation Research Society

2005 **Poster Presentation Award**, Supervisor, Awardee Name: Norman Chan. Radiation Research Society

2005 **SIT Travel Award**, Supervisor, Awardee Name: Norman Chan. Radiation Research Society

2005 **SIT Travel Award**, Supervisor, Awardee Name: Shahnaz Al-Rashid. Radiation Research Society

2005 **Student in Training Travel Award**, Supervisor, Awardee Name: Ananya Choudhury. Radiation Research Society

2004 **Trainee Award**, Supervisor, Awardee Name: Shahnaz Al-Rashid. Radiation Research Society, St. Louis, United States

2004 **Trainee Award**, Supervisor, Awardee Name: Oliver Faulhaber. Radiation Research Society, St. Louis, United States

2001 - 2003 **Travel Award**, Supervisor, Awardee Name: Shahnaz Al-Rashid. Radiation Research Society, Canada  

**NATIONAL**

2011 **Abbott Research Award**, Supervisor, Awardee Name: A Dal Pra. Canadian Urologic Oncology Group, Canada

2010 **Abbott Research Award**, Supervisor, Awardee Name: A Ishkanian. Canadian Urologic Oncology Group, Flims, Canada  
**Title**: Identification of candidate predictive biomarkers specific to intermediate risk prostate cancer, which may aid in prognostication and prediction of individual response to therapy.

2009 **2009 Canadian Research Award for Specialty Residents, Division of Medicine**, Supervisor, Awardee Name: Stanley Liu. Royal College of Physician and Surgeons of Canada, Canada  
“A novel poly (ADP-ribose) polymerase inhibitor, ABT-888, radiosensitizes malignant human cell lines under hypoxia.”.

2009 **Post MD Research Fellowship Award through NCIC**, Supervisor, Awardee Name: Stanley Liu. Terry Fox Foundation, Canada  
“Identification and characterization of the cellular mechanisms underlying DLL4-Notch pathway-mediated tumour radiosresistance.”.

2008 - 2009 **Post-doctoral Fellowship**, Supervisor, Awardee Name: Dr. Michael Fraser. National Cancer Institute of Canada, Terry Fox Foundation, Canada

2008 **Oncology Canada Young Investigator Award-ASCO 2008**, Supervisor, Awardee Name: Dr. Adrian Ishkanian. Novartis

2008 **Post MD Research Fellowship Award**, Supervisor, Awardee Name: Dr. Stanley Liu. Terry Fox Foundation, Canada
Robert Glen BRISTOW

2006 - 2009 **Winner of the Excellence in Radiation Research (EIRR21), Strategic Training Fellowship**, Supervisor, Awardee Name: Eva Christensen. Canadian Institutes of Health Research

2006 - 2008 **EIRR21st Scholarship**, Supervisor, Awardee Name: Ramya Kumarsewaran. Canadian Institutes of Health Research, Canada
*Training Fellow in the Excellence in Radiation Research for the 21st Century (EIRR21st) Program.*

2004 **Junior Investigator Travel Grant**, Supervisor, Awardee Name: Shahnaz Al-Rashid. Canadian Association of Radiation Oncologists, Canada

2004 **Junior Investigator Travel Grant**, Supervisor, Awardee Name: Oliver Faulhaber. Canadian Association of Radiation Oncologists, Canada

2004 **Junior Investigator Travel Grant**, Supervisor, Awardee Name: Dr. A. Tabassum. Canadian Association of Radiation Oncologists, Canada

2004 **Junior Investigator Travel Grant**, Supervisor, Awardee Name: Dr. A. Cuddihy. Canadian Association of Radiation Oncologists, Canada

2002 - 2004 **Prostate Training Fellowship**, Supervisor, Awardee Name: Dr. Andrew Coleman. Canadian Prostate Cancer Research Initiative - National Cancer Institute of Canada, Canada

2001 **Travel Award**, Supervisor, Awardee Name: Gillian Bromfield. Radiation Research Society, Canada

2000 - 2003 **Studentship**, Supervisor, Awardee Name: Shahnaz Al-Rashid. National Cancer Institute of Canada/Clinical Trials Group, Canada

2000 - 2001 **Prostate Training Fellowship**, Supervisor, Awardee Name: Dr. T. Kumaravel. Canadian Prostate Cancer Research Initiative - National Cancer Institute of Canada, Canada

**PROVINCIAL / REGIONAL**

Received

2010 Jul **Peterborough K.M. Hunter Graduate Student Fellowship award**, Supervisor, Awardee Name: S. Harding. University of Toronto, Canada
*Total Amount: 20,000 CAD*

2010 - 2011 **Fellowship Grant – Flims Workshop**, Supervisor, Awardee Name: J Thoms. Ontario Institute of Cancer Research, Canada

2010 - 2011 **Paul Starita Graduate Student Fellowship award**, Supervisor, Awardee Name: S. Harding. University of Toronto, Canada
*Total Amount: 2,000 CAD*

2010 **Travel Award**, Supervisor, Awardee Name: N. Chan. Terry Fox Research Institute, Canada
*To attend the at the 2nd Terry Fox Research Institute Scientific Meeting, Vancouver, British Columbia, May 2010.*

2006 - 2007 **Ontario Graduate Scholarship**, Supervisor, Awardee Name: Eva Christensen. Province of Ontario, Canada

2005 **Winner**, Supervisor, Awardee Name: Norman Chan. Ontario Student Opportunity Trust Fund, Canada

2004 **Summer Studentship**, Supervisor, Awardee Name: Graeme Nimmo. Ontario Cancer Institute, Canada

2002 **Summer Studentship**, Supervisor, Awardee Name: Jonathan Ng. Ontario Cancer Institute, Canada

1999 **Summer Studentship**, Supervisor, Awardee Name: Katherine Shim. Ontario Cancer Institute, Canada

**LOCAL**

Received
2009 Overall Excellence in Radiation Research by a Postgraduate Trainee, Supervisor, Awardee Name: Adrian Ishkanian. University of Toronto Department of Radiation Oncology, Canada

2009 Travel Award, Supervisor, Awardee Name: Kaisa Luoto. University Health Network, Canada For the 11th International Wolfsberg Meeting on Molecular Radiation.

2009 Travel Award, Supervisor, Awardee Name: Michael Fraser. University Health Network, Canada For the 11th International Wolfsberg Meeting on Molecular Radiation.

2009 Travel Award, Supervisor, Awardee Name: Adrian Ishkanian. University Health Network, Canada For the 11th International Wolfsberg Meeting on Molecular Radiation.

2009 W.J. Simpson Award, Academic Excellence in Research by a Resident, Supervisor, Awardee Name: Adrian Ishkanian. University of Toronto Department of Radiation Oncology, Canada

2008 - 2009 Helena Lam Fellowship, Supervisor, Awardee Name: Dr. Michael Fraser. Ontario Cancer Institute

2008 Best Oral Presentation – Fellow Award - DRO-UofT Research Day, Supervisor, Awardee Name: Dr. Danny Vesprini. University of Toronto, Canada

2008 Best Oral Presentation – Resident Award- DRO-UofT Research Day, Supervisor, Awardee Name: Dr. Stanley Liu. University of Toronto, Canada

2008 Best Radiation Medicine Program Resident Award, Supervisor, Awardee Name: Dr. Stanley Liu. Princess Margaret Hospital, Canada

2008 DRO-UofT Research Day Best Oral Presentation, Supervisor, Awardee Name: Eva Christensen. University of Toronto, Canada

2007 - 2008 Frank Fletcher Memorial Fund, Supervisor, Awardee Name: Shane Harding. University of Toronto

2007 - 2008 Graduate Fellowship in Prostate Cancer Research, Supervisor, Awardee Name: Shane Harding. Princess Margaret Hospital Foundation, Canada

2007 The Scace Graduate Fellowship in Prostate Cancer Research, Supervisor, Awardee Name: Shane Harding. University of Toronto

2007 2007 Robert Matthews Scholarship, Supervisor, Awardee Name: Eva Christensen. Princess Margaret Hospital, Canada

2007 DRO Resident Award, Supervisor, Awardee Name: Dr. Stanley Liu. University of Toronto, Canada

2007 Helena Lam Fellowship, Supervisor, Awardee Name: Dr. Michael Fraser. Princess Margaret Hospital

2007 IMS Entry Scholarship, Supervisor, Awardee Name: Eva Christensen. University of Toronto, Canada

2007 Medical Biophysics Research Excellence Scholarship, Supervisor, Awardee Name: Norman Chan. University of Toronto, Canada

2007 Open Scholarship, Supervisor, Awardee Name: Norman Chan. University of Toronto, Canada

2007 W. J. Simpson Award, Supervisor, Awardee Name: Dr. Stanley Liu. Princess Margaret Hospital, Canada For Academic Excellence in Research by a Resident Department of Radiation Oncology.

2006 - 2007 Lawrence, Ila and William Gifford Scholarship, Supervisor, Awardee Name: Ramya Kumarswaran. University of Toronto, Canada

2006 Graduate Fellowship in Cancer Research, Supervisor, Awardee Name: Ramya Kumarswaran. Princess Margaret Hospital Foundation

2006 Honorable mention, The Laidlaw Manuscript Competition, Supervisor, Awardee Name:
Artur Gevorgyan. UofT Annual Research Day
2006
Winner of the Radiation Medicine Program for Exceptional Research Support,
Supervisor, Awardee Name: Farid Jalali. University of Toronto

OTHER
Received
2009
Scholars-in-Training (SIT) Travel Award, Supervisor, Awardee Name: Ken Tse. Radiation
Research Society
For the Radiation Research Society Annual Meeting in Savannah, Georgia.
2005
EIRR Post-Doctoral Award, Supervisor, Awardee Name: Evangelia Tomai
Declined.
2005
Helen Lam Fellowship Award, Supervisor, Awardee Name: Evangelia Tomai
Declined.

4. PROFESSIONAL AFFILIATIONS AND ACTIVITIES

Professional Associations
American Association for Cancer Research
American Society for Therapeutic Radiology and Oncology
Canadian Association of Radiation Oncologists
Canadian Medical Association
Canadian Urological Association
College of Physicians and Surgeons of Ontario
European Society for Therapeutic Radiology and Oncology
Ontario Medical Association
Radiation Research Society
Royal College of Physicians and Surgeons of Canada
The American Society for Cell Biology

Administrative Activities
INTERNATIONAL
12th International Tumour Microenvironment Workshop Toronto
2010 Organizer, Radiation Oncology, Toronto, Ontario.
2010 Co-Chair, Radiation Oncology, Toronto, Ontario.

8th International Workshop on DNA Damage and Repair
2004 Chair, Session on “DNA-dsb Repair”, Banff, Alberta.

ABBOTT Pharmaceuticals
2010 - present Consultant
2010 - present Member, Scientific Advisory Board

Academic Clinical Oncology and Radiobiology Research Network
2005 - 2008 Member, International Advisory Committee, United Kingdom.
American Association for Cancer Research
2003 Member, Clinical Program Committee, Washington, District of Columbia.

American Society for Therapeutic Radiology and Oncology
2011 - present Member, ASTRO Cancer Biology/Radiation Biology Task Force
2011 - present Member, Biology Resource Panel of the Clinical Affairs and Quality Committee
2011 - present Chair, Radiation and Cancer Biology Committee
2011 - present Member, Radiobiology and Cancer Biology Task Force
2011 - present Member, Science and Research Council
2011 - present Member, Annual Scientific Meeting Organization Committee
2008 - present Vice Chair, Translational Radiobiology Committee
2004 - 2009 Member, Education Committee

American Society of Therapeutic Radiology and Oncology
2011 Session Moderator, "DNA Repair", 3B Research Forum: Benchtop to Bedside and Back, Atlanta, Georgia.
2011 Organizer, 3B Research Forum: Benchtop to Bedside and Back, Atlanta, Georgia.
2011 Faculty, 3B Research Forum: Benchtop to Bedside and Back, Atlanta, Georgia.
2011 Chair, Prostate Cancer Genomics and Personalized Medicine Session, 2011 ASTRO Annual Scientific Meeting, Miami, Florida.
2011 Chair, Session on DNA Repair and Radiation Oncology, ASTRO Annual Scientific Meeting, Miami, Florida.
2011 Organizer, Biology Session Reviews, ASTRO Annual Scientific Meeting, Miami, Florida.
2011 Co-Chair, Biology Session Reviews, ASTRO Annual Scientific Meeting, Miami, Florida.
2011 Chair, Session on New Targets - DNA Response and Intracellular Signals, ASTRO Annual Scientific Meeting, Miami, Florida.
2010 Co-Chair, Translational Radiobiology Session, ASTRO Annual Meeting and Scientific Program, San Diego, California.
2010 Session Moderator, "Translational Aspects of DNA Damage and Repair", 52nd Annual Meeting, San Diego, California.
2001 Chair, Poster Session on “Translational Biology”, Annual Meeting, San Francisco, California.

Antoni van Leeuwenhoek Hospital
2010 Member, Scientific Advisory Board, Division of Radiotherapy, The Netherlands Cancer Institute
2010 Site Reviewer, Division of Radiotherapy, The Netherlands Cancer Institute

Astra-Zeneca
2001 Faculty, Focus Group on Prostate Cancer, Miami, Florida.

Australian-Canadian Prostate Cancer Alliance
2008 Organizer, Multidisciplinary Treatment of Prostate Cancer, First Meeting, Brisbane, Australia.
2008 Session Chair, Multidisciplinary Treatment of Prostate Cancer, First Meeting, Brisbane, Australia.
2008  Session Chair, “Translational Opportunities & Correlative Biomarkers”, Brisbane, Australia.

2008  Session Chair, “Clinical Trials Networks & Collaborations – Ongoing and new trials”, Brisbane, Australia.

Australian-Canadian Prostate Cancer Research
2010  Session Chair, The Tumour Microenvironment International Organizing Committee, AC-PCRA Scientific Meeting, Brisbane, Australia.

Canadian Prostate Cancer-BioNet
2002  Program Director, Annual Meeting, National Satellite Meeting, San Francisco, California.

Canadian-US Cancer Control Alliance
2005  Faculty, Seattle, Washington.

ECCO-ESTRO
2011  Chair, ECCO Debate on Personalized Breast Cancer Trials, Annual Scientific Meeting, Stockholm, Sweden.
2011  Chair, Session on Immunology and Radiotherapy, Annual Scientific Meeting, Stockholm, Sweden.

European Society for Therapeutic Radiology and Oncology
2011 - present  ESTRO Honorary Fellow
2003  Chair, Session on “Clinical Genomics”; Radiobiology Workshop, Nijmegen, Netherlands.
2002  Chair, Session on “Introduction to Proteomics”; Annual Meeting, Prague, Czech Republic.
2000 - 2002  Member, Scientific and Planning Committee, Prague, Czech Republic.
2000  Chair, Session on “p53 Strategies”, Annual Meeting, Istanbul, Turkey.
2000  Co-Chair, Session on “Gene Therapy”, Annual Meeting, Istanbul, Turkey.

Golden Horseshoe Radiobiology Meeting
2008  Organizer, University of Rochester, Rochester, New York.
2008  Session Chair, University of Rochester, Rochester, New York.
2005  Program Director, Princess Margaret Hospital, Toronto, Ontario.
2004  Chair, Session on “DNA Damage Response, McMaster University, Hamilton, Ontario.

Gordon Research Conference
2010  Vice Chair, Radiation Oncology, Houston, Texas.

ICPC
2005  Faculty, Conference on Issues & Controversies in Prostate Care, Jamaica.

Innovative Strategies to Improve Target Definition in Radiation Oncology
2001  Chair, Session on “Biomolecular Targets in Radiotherapy”; Target Insight Meeting, Toronto, Ontario.

International Atomic Energy Agency
Robert Glen BRISTOW

2004  **Member**, Tissue Banking & Genomics Committee, (IAEA-Vienna), Amsterdam, Netherlands.

**International Cancer Genome Consortium**
2010 - present  **Member**, International Steering Committee
2010 - present  **Lead PI**, Prostate Cancer Project

**International Conference on Translational Research and Oncology**
2006  **Faculty**, Lugano, Switzerland.

**International Conference on Translational Research and Pre-Clinical Strategies in Clinical Radio-Oncology**
2002  **Chair**, Session on “Genomic Response”; Meeting, Lugano, Switzerland.

**International Union Against Cancer**
2001  **Course Director**, Training Program, Toronto, Ontario.
2001  **Faculty**, Training Program, Toronto, Ontario.

**Irish Prostate Cancer Consortium**
2011  **Member**, Scientific Advisory Board, Galloway, Ireland.

**Joint ECCO 15-34th ESMO Multidisciplinary Congress**
2009  **Session Chair**, “Cancer Stem Cells and Radiation Resistance”, Berlin, Germany.

**Joint Meeting of the Prostate Cancer Research Foundation of Canada and Prostate Cancer Research Foundation-United Kingdom**
2008  **Member**, Program Committee, Toronto, Ontario.

**MOVEMBER Prostate Cancer Global Action Plan (GAP)**
2009 - present  **Member**, Scientific Advisory Committee

**Myriad Genetics**
2010  **Member**, Scientific Advisory Board, Park City, Utah.

**National Institute of Health**
2003  **Chair**, Session on “Predictive Assays”; Workshop on Radiobiology, Bethesda, Maryland.
2002  **Chair**, Session on “Biological Assays”; Workshop on Bio-Targeting, Bethesda, Maryland.
2000  **Delegate**, Young Investigators Workshop, Bethesda, Maryland.

**National Institutes of Health (NIH)**
2009 - present  **Member**, Scientific Advisory Board, Structural Biology of DNA Repair NIH PO1 Program

**Prostate Cancer Foundation**
2010 - present  **Member**, Scientific Advisory Board, United States.
2010  **Judge**, Australia Annual Scientific Meeting, Brisbane, Australia.
2010  **Member**, Organizing Committee, United Kingdom.
Robert Glen BRISTOW

2009 **Member**, Scientific Advisory Board, STAR Program, United States.

**Radiation Research Society**

2011 **Member**, Constitution and Bylaws Committee
2009 **Member**, Editor Search Committee
2009 **Member**, Annual Meeting Committee
2008 **Session Chair**, Developments in the CMCR Programs, Annual Meeting, Boston, Massachusetts.
2001 **Chair**, Session on “DNA Repair II”, Annual Meeting, San Juan, Puerto Rico.

**Radiation Research Society and American Society of Therapeutic Radiation Oncology**

**Radiation Therapy Oncology Group**

2007 **Member**, Translational Committee, Tampa, Florida.

**Radiotherapy Oncology Group**

2007 - present **Canadian Lead**, Translational Research Program (TRP) Committee
2008 **Committee Member**, 2009 Annual Meeting, New Orleans, Louisiana.

**Research Council**

2011 - 2012 **Chair**, Radiation and Cancer Biology Committee, Miami, Orlando.

**Target Insight II: Innovation Strategies for Target Definition to Enhance the Therapeutic Ratio Meeting**

2006 **Chair**, Session on Biological Targets in Radiation Therapy Session, Toronto, Ontario.

**Terry Fox Research Institute**

2010 - present **Member**, Prostate Cancer Biomarkers Scientific Committee

**University of Oxford**

2010 **Chair**, Scientific Advisory Board, Gray Institute for Radiation Oncology & Biology

**VERTEX Pharamceuticals**

2011 - present **Chair**, Scientific Advisory Board

**Wolfsberg Radiobiology Meeting**

2004 - 2005 **Member**, Planning Scientific Committee, Ermatingen, Switzerland.
2004 **Judge**, “Translational Biology” Poster Competition, 8th International Meeting, Ermatingen, Switzerland.

**Worlsberg ESTRO Radiobiology Meeting**

2011 **Poster Judge**, Ermatingen, Switzerland.
NATIONAL

Canadian Association for Radiation Oncologists
2001 - 2010  **Chair**, National Task Force on Translation Radiobiology

Canadian Association of Radiation Oncologists
2008  **Session Chair**, Imaging and Biology of the Tumour Microenvironment, Annual Scientific Meeting
2004  **Chair**, Session on “Molecular Targets and Predictors in Radiotherapy”, Annual Meeting, Halifax, Nova Scotia.
2003 - 2009  **Chair**, Translational Biology Scientific Advisory Group
2002  **Chair**, Poster Session on “New Modalities in Radiotherapy”, Annual Meeting, Toronto, Ontario.
2001  **Chair**, Poster Session on “Translational and GU Oncology”, Annual Meeting, Montreal, Quebec.

Canadian Cancer Research Alliance
2009  **Session Discussion Leader**, Stakeholder Consultation Session, Toronto, Ontario.

Canadian Cancer Research Conference
2011  **Member**, Scientific Program Committee, Toronto, Ontario.
2011  **Session Chair**, Session on Biological Adapted Therapy: Lessons Learned from Prostate and Breast Cancer, Toronto, Ontario.

Canadian Cancer Society & National Cancer Institute of Canada
2004 - present  **Career Research Scientist**

Canadian Prostate Cancer BioResearch Network
2007  **Program Director**, 6th Annual Satellite Meeting, Montreal, Quebec.
2007  **Co-Chair**, 6th Annual Satellite Meeting, Montreal, Quebec.
2002 - 2006  **Co-Administrator**

Canadian Prostate Cancer Genome Sequence Project
2010 - present  **Project Lead**, Steering Committee

Canadian Prostate Cancer Research Initiative
2006  **Chair**, Biomarkers Planning Committee
Robert Glen BRISTOW

Canadian Urology Association
2001 Member, Prostate Expert Panel on Locally Advanced Prostate Cancer

GU Radiation Oncologists of Canada
2004 Consultant, Prostate Radiotherapy Group Consensus Meeting
2004 Faculty, Prostate Radiotherapy Group Consensus Meeting
2000 Consultant, Advisory Board
2000 Faculty, Advisory Board

National Cancer Institute of Canada
2004 Member, External Planning Committee
2004 Chair, Workshop on “Translational Oncology”, Toronto, Ontario.

National Cancer Institute of Canada/Clinical Trials Group
2010 - present Chair, GU Disease Site Correlative Science Working Group Committee
2008 - present Member, IND Translational Biomarker Subcommittee
2008 Member, Investigation New Drugs Translational Committee
2007 Chair, Session on Biomarkers, Vancouver, British Columbia.

Prostate Cancer Canada
2009 - present Chair, Networks & Partnerships Committee
2009 - present Chair, National Network of BRCA1/2 Prostate Cancer Carriers
2006 - present Board Member
2011 Organizer, Translational Biology Meeting

Prostate Cancer Research Foundation of Canada
2005 - 2009 Chair, Scientific and Medical Advisory Committee

Target Insight III Meeting
2009 Co-Organizer, Toronto, Ontario.

PROVINCIAL / REGIONAL
Other Organizations
2012 - present Canadian Association for Radiation Oncology (CARO), Ottawa, Alberta, Canada.

Ontario Cancer Biomarker Network
2007 - 2009 Chair, Steering Committee
2007 - 2009 Member, Scientific Advisory Board

Ontario Cancer Institute
2006 Session Chair, Applied Molecular Oncology – Retreat, Toronto, Ontario.

Ontario Institute for Cancer Research
2010 - present Co-Lead, Prostate Cancer Initiative
2010 Co-Chair, Workshop on Prostate Cancer Strategic, Annual Meeting, Nottawasaga Inn, Ontario.

2008 Chair, Clinical Session, Annual Retreat, Nottawasaga Inn, Ontario.

The Thunder Bay Regional Research Institute
2008 - present Member, Scientific Advisory Board

LOCAL
Cancer Canada Research Alliance
2013 - present Scientific Meeting Committee, Ontario, Canada.

Mount Sinai Hospital
2011 - present Consultant, Clinical Genomics Centre, Samuel Lunenfeld Research Institute, Toronto, Ontario.

Princess Margaret Hospital
2008 Faculty Member, Developments in Cancer Management: The 8th Princess Margaret Hospital Conference, Toronto, Ontario.

2007 - 2008 Program Director, Prostate Cancer Program Retreat, Toronto, Ontario.

2000 - 2004 Member, Continuing Education Committee, DRO
1999 - 2004 Member, Postgraduate Education Committee, DRO
1999 - 2004 Coordinator, Genito-Urinary (GU) Rounds, PMH GU-Site Group
1999 - 2002 Secretary, DRO Staff Association Meetings
1994 Representative, Department of Radiation Oncology, Association of Residents and Interns of Ontario (PAIRO)

Princess Margaret Hospital - University Health Network
2010 - present Co-Lead, Terry Fox Hypoxia Project Program Team
2004 - 2010 Co-Investigator, Terry Fox Hypoxia Project Program Team
2004 - 2010 Team Member, Terry Fox Hypoxia Project Program Team
2003 - 2005 Leader, Prostate Clinical Research Program
2000 - 2003 Leader, Section II, Clinical Research Program-Prostate
2000 - 2003 Leader, Clinical Impact Team-Prostate

University of Toronto
2008 - present Member, Department of Medical Biophysics Promotions Committee, Faculty of Medicine, Dept of Medical Biophysics

2011 Poster Judge, Institute of Medical Science Research Day, Faculty of Medicine, Dept of Radiation Oncology

2011 Chair, Search Committee, Department of Radiation Oncology, Faculty of Medicine, Dept of
Radiation Oncology

2010  **Member**, UT-DRO Strategic Planning Committee, Faculty of Medicine, Dept of Radiation Oncology

2009  **Committee Member**, 2009 Target Insight Meeting, Princess Margaret Hospital

2009  **Organizer**, 2009 Target Insight Meeting, Princess Margaret Hospital

2001 - 2003  **Course Director**, MBP1018Y Oncology Course, Faculty of Medicine, Dept of Radiation Oncology, Graduate Education

*Designed and administered Course; convened lecturers, exam preparation. 2001 - 50 Students, 20 hrs. 2002 - 45 Students, 10 hrs. 2003 - 45 Students, 10 hrs.*

1999 - 2004  **Member**, Faculty Council, Faculty of Medicine

1996  **Graduate School Representative**, External Review for Department of Medical Biophysics, Faculty of Medicine, Dept of Medical Biophysics

1991  **Member**, Aiken’s Award Committee on Course Development and Coordination, Faculty of Medicine

1990  **Member**, Palliative Care Subcommittee of the Oncology Coordinating Council

**Peer Review Activities**

**EDITORIAL BOARDS**

**Editor**

2013 Jan - present  Cancer Research (AACR)

2010 - present  Clinical and Investigative Medicine

2010 - present  European Journal of Clinical and Medical Oncology

2003 - present  Basic Science of Oncology, 4th edition-(international oncology textbook for residents and graduate students)

2003 - present  Radiotherapy and Oncology

C. Research Funding

1. GRANTS, CONTRACTS AND CLINICAL TRIALS

PEER-REVIEWED GRANTS

Funded

Determine genomic and TME effects on radioresistance of prostate cancer and drive novel Phase II trials to overcome radioresistance.

2012 Jul - 2015 Jun **Co-Principal Investigator.** Clinician Scientist Award. Ontario Association of Radiation Oncologists (OARO). PI: Bristow, Rob. 255,000 CAD. [Grants]

This peer-reviewed award provides personal salary support for research to offset clinical activity.

2012 Jul - 2014 Dec **Principal Investigator.** High-throughput discovery of prostate tumour initiating cells markers for prognosis and personalized medicine. Prostate Cancer Canada (PCC). Collaborator(s): Ailles Laurie, Brinkman Ryan, Van der Kwast Theodorus H. 150,000 CAD. [Grants]

NON-PEER-REVIEWED GRANTS

FUNDED

2008 Jul - present  **Co-Investigator.** Fiducial Localization and Individualized Radiotherapy for Prostate Cancer (FLIP). REB#: 08-0271-C. PI: Menard, Cynthia. Collaborator(s): Bristow RG, Chopra S, Craig T, Foltz W, Milosevic M. [Clinical Trials]

2008 Jul - present  **Co-Investigator.** Hypoxia & Clinical Outcome after Radiotherapy for Invasive Bladder Cancer (Chart Review). REB#: 08-0271-C. PI: Milosevic, Michael. Collaborator(s): Bristow RG. [Clinical Trials]

2008 - present  **Principal Investigator.** Evidence for Intrinsic Tissue Sensitivity as a Predictor of Prostate Cancer Radioresponse (Chart Review). REB#:08-0473-CE. Collaborator(s): RMP Co-Investigators: D. Vesprini, C. Catton. [Clinical Trials]

2007 - present  **Co-Investigator.** A Phase I-II Trial of Post-Operative Image-guided and Intensity Modulated Radiotherapy (IG-IMRT) for Localized Prostate Cancer. REB#: 07-0234-C. PI: Menard C. Collaborator(s): RMP Co-Investigators: Catton C, Craig T, Kong V, Bristow RG. [Clinical Trials]

2006 - present  **Principal Investigator.** A Pilot Study to Determine the Feasibility of Testing Serum, Plasma...
2005 - present

2005 - present

2005 - present

2001 Jul - present

Principal Investigator. Molecular Determinants of Radiosresponse in Prostate Cancer. REB #: 01-0620-C. Collaborator(s): Milosevic M, Warde P, Lilge L. [Clinical Trials]

2000 - present

REB#00-0443-C (Dr. Milosevic); REB#01-0620-C (Dr. Bristow).

2013 Jul - 2018 Jul

2013 Jul - 2018 Jul

Co-Principal Investigator. PCC Prostate Cancer Discovery Team Grant. Prostate Cancer Canada. PI: Buttyan R, Bristow RG. Collaborator(s): Gleave M, Houmedia A. 6,000,000 CAD. [Grants]

2013 Jul - 2016 Jul

2013 Jul - 2015 Jul

Principal Investigator. Investigation of Predictive Biomarkers for First-In-Class Inhibitors of Mitotic. Prostate Cancer Canada. 200,000 CAD. [Grants]

To study the effect of PLK4 inhibitors on Prostate Cancer Growth.

2012 Jul - 2015 Jun

Principal Investigator. The Canadian Prostate Cancer Genome Network (CPC-GENE): A National Outcomes-Based DNA Sequencing Initiative. Prostate Cancer Canada and the
Ontario Institute for Cancer Research. Collaborator(s): Boutros P, Hudson T, Stein L, Muthuswamy, L, van der Kwast T, Collins C. 20,000,000 CAD
To complete whole genome sequencing of 500 prostate cancers and test for novel prognostic factors in outcome.

2012 Jul - 2014 Jun  
*To quantify KLK proteins in urine and correlate to prostate cancer progression.*

2011 - 2014  
**Principal Investigator.** Augmin-Centrosome Complexes: A Novel Marker for Prostate Cancer Aggression/Progression. Ontario Institute for Cancer Research. Collaborator(s): Pelletier L, van der Kwast T. 513,612 CAD. [Grants]

2011 - 2013  
**Co-Investigator.** Active Surveillance Magnetic Resonance Imaging Study (ASIST Trial). Ontario Institute for Cancer Research. Collaborator(s): Loblaw, Menard C, **Bristow RG**, Vesprini D. 2,700,000 CAD. [Grants]
*Précis: To understand the role of MRI in active surveillance.*

2011 - 2012  
**Principal Investigator.** A High-throughput Discovery of Prostate Cancer Stem Cell Epitopes. Orillia Cancer Foundation. Motorcycle Ride For Dad. 70,000 CAD. [Grants]

2011 - 2012  
**Principal Investigator.** Stem Cell Markers and Radiotherapy Outcome in Intermediate Risk Prostate Cancer-Translational Studies. Canadian Radiation Oncology Foundation. Collaborator(s): Zafarana G. 20,118 CAD. [Grants]

2010 - 2015  
*Précis: To create Tissue Microarrays in prostate radiotherapy for novel prognostic markers.*

2010 - 2015  
*Précis: Test the role of gold nanoparticles as radiosensitizers*
*Effort: 3 %*
*Amount: $129,931/year.*

2010 - 2013  
**Co-Investigator.** Clinical Course of BRCA2-associated prostate cancer. Canadian Institutes of Health Research (CIHR). PI: Narod SA. Collaborator(s): **Bristow RG**, Nam RK, Trachtenberg J. 463,131 CAD. [Grants]
*Précis: To determine the pronosis of BRCA2 carriers in prostate cancer.*
*Amount: $154,377/yr.*

2010 - 2011  
**Co-Principal Investigator.** A Prostate Cancer Proteomic Profiling Program. Ontario Institute for Cancer Research. Collaborator(s): **Bristow RG** (co-PI), Fleshner, N and Evans, K. 300,000 CAD. [Grants]
*Précis: To discover novel proteomic signatures of aggressive prostate cancer versus indolent prostate cancer.*

2010 - 2011  
**Principal Investigator.** Individualization of Therapy for Prostate Cancer Patients: Predictive Biomarkers Based on DNA Repair Gene Expression. Rapid AstraZeneca. Ontario Institute for Cancer Research. 25,537 CAD. [Grants]
*Précis: To complete mRNA expression analyses on 115 prostate cancers and test for novel*
prognostic factors in radiotherapy outcome.

Précis: Training Program in Radiation Oncology.
Amount: $325,000/ per year.

2009 - 2014 **Co-Investigator.** Molecular-Mechanism-Based Target Identification and Drug Discovery for Radiotherapy of Cancer. Canadian Institutes of Health Research (CIHR). PI: Lu QB. Collaborator(s): **Bristow RG,** Jaffray D. 662,865 CAD. [Grants]
Précis: This grant will investigate novel radiosensitizers to improve breast and prostate cancer outcome.
Effort: 2%.

Précis: Hypoxia effects on homologous recombination.
Effort: 15%.

Précis: To determine CGH array biomarkers of prostate cancer radiotherapy response.
Effort: 10%.

Précis: To determine whether gammaH2AX foci predicts radiotherapy toxicity
Effort: 2%.

Précis: Study cytokine expression in men undergoing radiotherapy
Effort: 2%.

2008 Jul - 2012 Jun  **Principal Investigator.** Evidence for Intrinsic Tissue Sensitivity as a Predictor of Prostate Cancer Radioresponse (Chart Review). REB#:08-0473-CE. Collaborator(s): D. Vesprini, C. Catton. [Clinical Trials]

2008 - 2010  **Principal Investigator.** DNA Repair Inhibition in Prostate Cancer Cells and Individualized Therapy. Prostate Cancer Research Foundation of Canada. Collaborator(s): Bharati Bapat, Theo van der Kwast, John Trachtenberg. 60,000 CAD. [Grants]

**Précis:** Developing new targets for radiotherapy based on prostate cancer cell DNA repair status

**Effort:** 5%.

**Amount:** $146,178/ per year

**Précis:** Understanding the roles of p53 in DNA-dsb repair.

**Effort:** 10%.

Wilson B. 2,000,000 CAD. [Grants]
Amount: $400,000/ per year
Précis: Equipment grant.

2005 - 2010
Amount: $171,781 U.S./ per year
Précis: Determining the utility of DNA repair foci and micro nuclei as IR biodosimeters in skin murine.

2005 - 2009
Co-Investigator. Development of a prostate deformation model to enable accurate registration of endorectal coil magnetic resonance images (ERC-MRI) to reference treatment planning CT images. REB#: 05-0041-C. PI: Menard, C. Collaborator(s): RMP Co-Investigators: Bristow RG, Gospodarowicz M, Milosevic M, McLean M, Chung P, Crook J, Bayley A, Catton C, Warde P. [Clinical Trials]

2005 - 2009

2005 - 2008
Co-Investigator. The MYH gene and colorectal cancer risk. National Cancer Institute of Canada (NCIC). PI: Gallinger, S. Collaborator(s): Bristow RG, Cotterchio M, Manno M, Bishop T. 423,000 CAD. [Grants]
Précis: To determine the epidemiologic and molecular biologic role of MYH in colorectal cancer.

2005 - 2008
Précis: The role of SNPs in breast radiotherapy response.

2005 - 2007
Précis: To test SNP-toxicity profiles in prostate cancer radiotherapy.

2005 - 2006
Co-Investigator. Identification of Lung Cancer Mutations that Contribute to Treatment Response: A Pilot Study by the Princess Margaret Hospital Foundation Invest in Research Program. Princess Margaret Hospital Foundation. PI: Wouters B, Tsao M. Collaborator(s): Liu G, Brade A, Bejak A, Bristow RG, Hope A. 100,000 CAD. [Grants]
Effort: 2%.

2005 - 2006
(one-time award).

2005 - 2006
Co-Investigator. Development of chemotherapeutic agents based on Inhibition of the ERK MAPkinase pathway. Canadian Institutes of Health Research (CIHR). Collaborator(s): Jongstra J, Bristow RG. 149,157 CAD. [Grants]
(one-time award).
2004 - 2012  **Principal Investigator.** Basic and translational studies of DNA damage and repair as relates to p53. National Cancer Institute of Canada (NCIC). Canadian Cancer Society (CCS).  
[Grants]  
Salary Support Award (#15559)  
Amount: $75-85,000/ per year  
Précis: Career Salary Award  
Effort: N/A-salary award only.

Canadian Foundation for Innovation Grant. CFI-Infrastructure Grant. Collaborator(s): Jaffray D (PI), Milosevic M (PI). 11,418,194 CAD.  
[Grants]  
R. Bristow: Core I Leader: Cell Imaging Program ($1,850,000)  
Précis: Start up of a new STTARR Innovation Facility for cell and animal imaging.  
Effort: N/A-Infrastructure grant only.

[Grants]  
2004 - 2006  **Principal Investigator.** Intracellular Trafficking of the Rad51 Protein in Prostate Cancer.  
Prostate Cancer Research Foundation of Canada. 98,000 CAD.  
Amount: $49,000/ per year.

[Grants]  
Amount: $300,000/ per year  
Précis: Training Program in Radiation Oncology.

[Clinical Trials]  
2003 - 2006  **Principal Investigator.** The p53 protein and DNA damage recognition. National Cancer Institute of Canada (NCIC). NCIC-Operating Grant. 400,710 CAD.  
[Grants]  
Amount: $133,570/ per year.

2002 - 2006  **Principal Investigator.** Pre-Clinical Efficacy and Biomarker Analyses Pertaining to a Novel DNA Repair Inhibitor in Prostate and Pancreatic Cancer. Ontario Cancer Research Network Research. Collaborator(s): Hedley D, Moore M, Vallerga A. 565,440 CAD.  
[Grants]  
Amount: $141,360/ per year.

[Grants]  
Amount: $48,000/ per year.
*Amount: $39,800 over 2 years.*

2002 - 2004  **Principal Investigator.** Pilot Studies into the Anti-Apoptotic Protein, Survivin, as a Potential Target in Prostate Cancer Radiotherapy. Abbot-CARO Uro-Oncologic Radiation Award (ACURA). Collaborator(s): Sweet J, Squire J. 61,000 CAD. [Grants]
*Amount: $30,500/ per year.*

2002 - 2004  **Principal Investigator.** Pilot Studies into the Anti-Apoptotic Protein, Survivin, as a Potential Target in Prostate Cancer Radiotherapy. Abbot-CARO Uro-Oncologic Radiation Award (ACURA). Collaborator(s): Sweet J, Squire J. 61,000 CAD. [Grants]
*Amount: $30,500/ per year.*

*Amount: $666,000/ per year.*

*Amount: $97,483/ per year.*

*Amount: $105,000/ per year.*

*Amount: $114,000/ per year.*

2000  **Principal Investigator.** Molecular and Clinical Aspects of DNA Repair. Canada Foundation for Innovation (New Opportunities Fund). Collaborator(s): Investigators: Milosevic M (PI), Toi A, Sweet J, **Bristow RG**, Hedley D, Panzarella T, Hill R. 386,000 CAD. [Grants]
*(one-time award; equipment/infrastructure only).*

1999 - 2000 **Principal Investigator.** PMH Scientist Start-up Funds. Princess Margaret Hospital Foundation (The). 10,000 CAD. [Grants] (one-time award).

**D. Publications**

1. **MOST SIGNIFICANT PUBLICATIONS**

1. Al Rashid ST, Harding S, Law C, Coackley C, **Bristow RG**. Chromatin-binding of p53 with ATM and 53BP1 in response to DNA damage. Radiation Res. 2011 May;175(5):588-98. **Senior Responsible Author.**

2. Chan N, **Bristow RG**. Contextual Synthetic Lethality/Loss of Heterozygosity: Tumor Hypoxia and Modification of DNA Repair. Clin Cancer Res. 2010;16(18):4553-60 (Trainee publication, N Chan). **Senior Responsible Author.**

   *Important studies showed that support chronic hypoxic cells as homologous recombination defective and prone to increased sensitivity to DNA damaging agents PARP inhibitors. These manuscripts suggests that chronically hypoxic cells and acutely hypoxic cells may be used as biomarkers for personalized medicine. (IMPACT FACTORs 7.3 and 8.2 – Highlighted in Nature Reviews Cancer and Nature Reviews Drug Discovery).*

   *Important studies showed that support chronic hypoxic cells as homologous recombination defective and prone to increased sensitivity to DNA damaging agents PARP inhibitors. These manuscripts suggests that chronically hypoxic cells and acutely hypoxic cells may be used as biomarkers for personalized medicine. (IMPACT FACTORs 7.3 and 8.2 – Highlighted in Nature Reviews Cancer and Nature Reviews Drug Discovery).*

This paper is one of the first to define the genetics of intermediate risk prostate cancer and defined five novel microdeletions associated with the disease. It also clarified the genetics of the commonly used prostate cancer cell lines to show that only one, 22RV1, had genetic changes consistent with primary human samples. Importantly, NKX3.1 haploinsufficiency (a gene involved in cancer initiating cell biology and DNA repair) was found to be a new prognostic factor in prostate cancer. (IMPACT FACTORS 7.3 and 4.1).

This paper describes the activity of the wild type and mutant versions of recombinant DNA repair protein MYH in colorectal carcinogenesis based on actual mutations found in cancer patients. This paper sets up the basic science behind studying MYH and other BER repair proteins in hypoxic tissues and using novel biochemical assays to determine activity in relation to cellular radiobiology. (IMPACT FACTOR 14.0).

This review critically discusses the role of hypoxia in altering DNA-dsb repair leading to repair-deficient and aggressive tumour cell phenotypes. It argues for a new hypothesis concerning hypoxia in which HR-deficient hypoxic cells may be the target for novel cancer therapies and associated biomarkers. (IMPACT FACTOR 37.2).

**COVER OF DEC 1 2005 CANCER RESEARCH: This manuscript suggests a unique biology for this p53 phosphoform in the initial steps of DNA damage signaling and implicates ATM-p53 chromatin-based interactions as mediators of cell cycle checkpoint control and DNA repair to prevent carcinogenesis. (IMPACT FACTORS 8.2 and 2.6).**

2011 Contextual Synthetic Lethality: Studies of Hypoxia and DNA Repair. 3B ASTRO Translation Research Meeting. Atlanta, Georgia, United States.

2011 **Invited Speaker.** Personalized Prostate Cancer Treatment on the Basis of Individual Genomics. ASTRO Annual Scientific Meeting. Miami, Florida. Audience: Radiation Oncologists & Scientists. (Continuing Education).

2010 Genomics, DNA Repair and Prostate Cancer. Myriad Genetics Scientific Advisory Baord Meeting. Salt Lake City, Utah.

2010 View of the Radiation Oncologist in Prostate Cancer. Swiss Academy of Multidisciplinary Oncology (SAMO) Interdisciplinary Workshop on Urogenital Tumors. Lucerne, Switzerland.

2010 Predicting radiotherapy outcome using somatic genetics in prostate cancer. Acta Oncologica 2010

2010 The ICGC Prostate Project. Australian-Canadian, Prostate Cancer Research Alliance (AC-PCRA). Brisbane, Australia.

2010 Thoughts on IHC and Genetic Validation of MRI-based Prostate Imaging. Australian-Canadian, Prostate Cancer Research Alliance (AC-PCRA). Brisbane, Australia.

2010 The Biology of Prostate Hypoxia and Approaches to Targeting. Australian-Canadian, Prostate Cancer Research Alliance (AC-PCRA). Brisbane, Australia.

2010 Targeting DNA Repair as a New Therapy for Prostate Cancer. Prostate Cancer Foundation of Australia (PCFA). Brisbane, Australia.

2010 Out of the Box Thinking in Radiobiology for Hypoxia and DNA Repair. Medical Biophysics (MBP) Retreat. Lake Couchiching, Ontario.

2010 Contextual Cell Lethality and Hypoxic Cancer Cell Kill. American Society for Radiation Oncology (ASTRO) 52nd Annual Meeting. San Diego, California.

2010 DNA repair gene modifications in prostate cancer and individualised therapy: A Canadian-ICGC prostate cancer project. Translational Cancer Genomics Symposium - Personal Genomes for Improved Cancer Care, Garvan Institute of Medical Research. Sydney, Australia.

2009 Feb Hypoxia, DNA Repair and Genetic Instability. 4th International Conference on Translational Research (ICTR) and Pre-Clinical Strategies in Radiation Oncology. Geneva, Switzerland. Audience: Oncologists & Scientists. (Continuing Education).

2009 Invited Speaker. IMRT and Biological Approaches in Radiotherapy for Prostate Cancer. Joint ECCO 15-34th ESMO Multidisciplinary Congress. Berlin, Germany. Audience: Oncologists & Scientists. (Continuing Education).

2009 Visiting Professor. Contextual Synthetic Lethality of Cancer Cell Kill Based on the Tumor Microenvironment. Faculty of Science and Technology, Institute of Health and Biomedical Innovation Centre, Queensland University of Technology. Brisbane, Australia. Audience: Oncologists & Scientists. (Continuing Education).

2009 Tissue-Based Imaging In Tumours and Normal Tissues in Response to Experimental Cancer Therapies: The STTARR Program. Faculty of Science and Technology, Institute of Health and Biomedical Innovation Centre, Queensland University of Technology. Brisbane, Australia.

2009 Visiting Professor. The STTARR Program State of MaRS: Complementary Activities between Industry and Academia. Faculty of Science and Technology, Institute of Health and Biomedical Innovation Centre, Queensland University of Technology. Brisbane, Australia. Audience: Oncologists & Scientists. (Continuing Education).

2009 Hypoxia and DNA Repair. ON-Q-ITY Advisory Board Meeting. Boston, United States.

2009 Visiting Professor. Imaging to a Mixed Clinical and Academic Audience. Faculty of Science and Technology, Institute of Health and Biomedical Innovation Centre, Queensland University of Technology. Brisbane, Australia. Audience: Oncologists & Scientists. (Continuing Education).

2008 Jun Individualizing Cancer Therapy on the Basis of Intratumoral DNA Repair. Scientific Meeting of the Prostate Cancer Research Foundation of the United Kingdom. King City, Ontario. Audience: Oncologists & Scientists. (Continuing Education).

2008  DNA Repair Inhibitors and the Clinic. Annual Meeting of the American Society of Therapeutic Society (ASTRO). Boston, Massachusetts.

2008  STTARR-MaRs, Advanced In Vivo Imaging Centre PMH Toronto. Australian Canadian Prostate Cancer Research Alliance Program. Brisbane, Australia.

2008  Hypoxia, DNA Repair and Prostate Cancer. Australian Canadian Prostate Cancer Research Alliance Program. Brisbane, Australia.

2007  DNA Repair Mechanisms and Implications for Radiation Oncology. 10th International Wolfsberg Meeting on Molecular Radiation Biology/Oncology. Ermatingen, Switzerland.

2007  p53 Phosphorylation and Interactions with ATM following DNA damage. 13th International Congress of Radiation Research. San Francisco, California.

2007  Hypoxia and DNA Repair as Factors in Prostate Cancer Progression and Aggression. Prostate Cancer Research Program 2007 IMPaCT Meeting. Atlanta, Georgia.

2006 DNA Damage and Repair Biomarkers During Conformal Radiotherapy for Prostate Cancer: Results From A Phase I Pre-Operative Trial of 15 Patients. ASCO Prostate Meeting. San Francisco, California.

2005 Sep DNA repair as a biological modifier and target. 7th International Conference on Dose, Time and Fractionation in Radiation Oncology. Madison, Wisconsin. Audience: Clinicians & Basic Researchers. (Continuing Education).

2005 Expression of DNA-dsb Repair Proteins is Altered Under Hypoxia in Prostate Cancer Cells. 9th International Wolfsberg Meeting on Molecular Radiation Biology/Oncology. Ermatingen, Switzerland.

2005 Strikes, Spares and Misses: Hypoxia, DNA Repair and Prostate Cancer. Clinical And Experimental Research In Radiation Oncology (CERRO)- The European Society for Therapeutic Radiology and Oncology. Les Menuires, France. Audience: International-Basic Scientists and Oncologists. (Continuing Education).

2005 DNA Repair Foci As A Biological Dosimeter, In Situ. Center for Biophysical Assessment and Risk Management Following Irradiation, University of Rochester. Rochester, New York.

Presented Abstracts

2014 Apr 3  **Chair.** Radiobiology 3: Interplay Between Hypoxia, DNA Repair and Radiosensitivity. ESTRO. Vienna, Austria. Presenter(s): Bristow, R.

2011  **Senior Responsible Author.** Genomic and Microenvironmental Predictors of Prostate Cancer Radioresponse. L H Gray International Conference. Manchester, United Kingdom. Bristow RG.

2009  **Senior Responsible Author.** RNF8 independent K63 poly-ubiquitination plays a role in maintaining genomic stability. 11th International Wolfsberg Meeting on Molecular Radiation Biology/Oncology. Ermatingen, Switzerland. Ramaekers C, van den Beucken Twan, Bristow RG, Wouters BG. (Trainee Presentation).

2009  **Senior Responsible Author.** A subset of nuclear Akt is phosphorylated on Ser473 in an ATM-dependent manner in response to radiation –induced DNA Double Strand Breaks. 11th International Wolfsberg Meeting on Molecular Radiation Biology/Oncology. Ermatingen, Switzerland. Fraser M, Bristow RG. (Trainee Presentation).

2009  **Senior Responsible Author.** Array CGH of prostate cancer biopsies identifies genetic variations in DNA

2009 **Senior Responsible Author.** c-Myc and DNA Double Strand Break Repair Gene Expression. 11th International Wolfsberg Meeting on Molecular Radiation Biology/Oncology. Ermatingen, Switzerland. Luoto KR, Meng A, Penn LZ, Bristow RG. (Trainee Presentation).

2008 Apr **Senior Responsible Author.** PML nuclear bodies are juxtaposed to DNA-DSBs following IR-induced DNA damage. American Association of Cancer Research (AACR) Annual Meeting. San Diego, California. Tse KCK, Jalali F, Kumareswaran R, Dellaire G, Bazett-Jones DP, Bristow RG. (Trainee Presentation).

2008 **Senior Responsible Author.** Hypoxia and DNA Repair as Factors in Prostate Cancer Progression and Aggression. Proceedings of the 13th International Congress of Radiation Researchs. San Francisco, California. Chan N, Milosevic M, Bristow RG.

2008 **Senior Responsible Author.** Goda J, Bristow RG. Use of gammaH2AX and Lymphocytes to Predict Prostate Radiosensitivity. Golden Horseshoe Meeting- Radiation Symposium. Rochester, New York.

2007 **Senior Responsible Author.** Nutlin-3 Radiosensitizes Prostate Cancer Cell Lines Independent of p53 Status. The Prostate Cancer Symposium. Tampa, Florida. Supiot S, Bristow RG.

2007 **Senior Responsible Author.** A novel poly(ADP-ribose) polymerase inhibitor, ABT-888, radiosensitizes
malignant human cell lines under oxia and hypoxia. 10th International Wolfsberg Meeting. Ermatingen, Switzerland. Liu S, Coackley C, Bristow RG.

2006 Nov  
**Senior Responsible Author**. DNA-dbS Signaling and Repair in Hypoxic Cells within Prostate Cancer Xenografts. American Society of Therapeutic Radiation and Oncology (ASTRO). Phan T, Meng A, Do T, Nicklee T, Ho J, Cole H, Sweet J, Hedley D and Bristow RG. (Trainee Presentation).

2006 Jun  

2006 May 17  

2006 Mar  

2006 Feb  

2006 Feb  

2006  

2006  
**Senior Responsible Author**. Nutlin-3 Radiosensitizes Prostate Cancer Cell Lines Independent of p53 Status. American Society of Therapeutic Radiation and Oncology (ASTRO). Supiot S, Bristow RG.

2006  

2006  
**Senior Responsible Author**. Hypoxia As A Mediator Of DNA-dbS Repair in Prostate Cancer Xenografts. European Society for Therapeutic Radiation Oncology (ESTRO). Bristow RG.

2006  
**Senior Responsible Author**. Molecular Epidemiology of DNA repair signaling proteins as a risk factor for bladder cancer. National Cancer Research Institute Conference. Birmingham, United Kingdom. Choudhury A, Barrett J, Sak SC, Bristow RG, Bishop DT, Kiltie AE. Awarded the BOA Young Investigator Award.

2006  
**Senior Responsible Author**. Enhancement of chemo and radiosensitization by targeting homologous recombination via RAD51. Medical Research Society/Academy of Medical Sciences/Royal College of Physicians. London. Choudhury A, Zhao H, Al-Rashid S, Kiltie A, Bristow RG.

2005 Oct  

2005 Apr  **Senior Responsible Author.** Mutant p53 and phosphostates. Golden Horseshoe Radiobiology Meeting. Toronto. Cuddihy A, Bristow RG.

2005 **Senior Responsible Author.** Hypoxia Reduces Expression of DNA Double Strand Break Repair Genes in Prostate Cancer. 9th International Tumor Microenvironmental Workshop. Oxford. Meng A, Jalali F, Nicklee T, Ho J, Hedley D, Bindra R, Glazer P and Bristow RG.

2005 **Principal Author.** DNA-dsb Repair as a Biological Modifier and Target. 7th International Conference on Dose, Time and Fractionation in Radiation Oncology. Madison, Wisconsin. Bristow RG.

2003 Jan  **Principal Author.** Homologous Recombination as A Target for Therapy in Prostate Cancer. Gordon

Robert Glen BRISTOW

1994 **Collaborator.** The p53-mediated G1 checkpoint remains intact in rat embryo fibroblasts transfected with ras or HPV16-E7. 7th International p53 Workshop. Lake Muskoka, Ontario. Peacock J, Chung S, Bristow RG, Hill RP, Benchimol S.

1991 **Principal Author.** Ras and radioresistance. International Congress of Radiation Research. Toronto. Bristow RG, Hunt T and Parde F.

1990 **Principal Author.** Chromosomal Damage Following XRT and 5-FU in CHO Cells. 37th Meeting of the Radiation Research Society. New Orleans. Bristow RG, Savin S, Hittelman W and Brock W.

Lectures and Other Presentations

2011 **Visiting Professor.** Contextual Synthetic Lethality: Studies of Hypoxia and DNA Repair Within the Tumour Microenvironment. Center for Cancer Research and Cell Biology, Queen’s University Belfast. Belfast, United Kingdom.

2011 **Visiting Professor.** Personalized Medicine for Prostate Cancer. Center for Cancer Research and Cell Biology, Queen’s University Belfast. Belfast, United Kingdom.

2010 Oxygen and Prostate Cancer-Friend or Foe. Prostate Cancer Foundation of Australia. Brisbane, Australia. (Presentation to Patients/Public).

2010 **Visiting Professor.** Contextual Synthetic Lethality: the Tumour Microenvironment and DNA Repair As Targets for Novel Cancer Therapies. Department of Radiation Oncology, University of Florida Shands Cancer Center. Gainsville, Florida.

2009 Feb **Visiting Professor.** Cancer Cell Hypoxia and DNA Repair: New Targets and New Therapies. Department of Biology, Adam Mickiewicz University. Poznan, Poland. Audience: Oncologists & Scientists. (Continuing Education).

2009 **Visiting Professor.** Hypoxia and DNA Damage Biomarkers as Predictors of Prostate Cancer Therapy Response. Faculty of Science and Technology, Institute of Health and Biomedical Innovation Centre, Queensland University of Technology. Brisbane, Australia. Audience: Oncologists & Scientists. (Continuing Education).

2008 Sep The phosphorylation of 53BP1: a response to DNA-double strand breaks category: DNA damage
induction, repair and the damage response. ASTRO. Harding S. (Trainee Presentation).

2008 Jun A subset of nuclear Akt is phosphorylated on Ser473 in an ATM-dependent manner in response to radiation –induced DNA Double Strand Breaks. 11th International Wolfsberg Meeting on Molecular Radiation Biology/Oncology. Ermatingen, Switzerland. Fraser M. (Trainee Presentation).

2008 Jun A subset of nuclear Akt is phosphorylated on Ser473 in an ATM-dependent manner in response to radiation –induced DNA Double Strand Breaks. 11th International Wolfsberg Meeting on Molecular Radiation Biology/Oncology. Ermatingen, Switzerland. Fraser M. (Trainee Presentation).

2008 Feb **Visiting Professor.** Hypoxia Leads to DNA Repair Deficiencies ad Novel Therapuetics. Department of Radiation Oncology, University of Texas Southwestern University. Dallas, Texas. Audience: Oncologists & Scientists. (Continuing Education).

2008 **Visiting Professor.** Biomarkers for DNA Repair Inhibitor Radiotherapy Trials. University Hospital Carl Gustav Carus, Technische Universität Dresden. Dresden, Germany.

2006 Dec **Visiting Professor.** DNA Repair and Prostate Cancer Progression: The Hypoxia Connection. UCLA’s GU Leaders in the Field Seminar, Department of Urology, University of California. Los Angeles, California. Audience: Biologists and Clinicians. (Continuing Education).

Robert Glen BRISTOW

2006 Sep  

2005 Nov  

2005 Oct  
**Visiting Professor.** Novel Strategies in Targeting DNA Repair To Improve Oncologic Outcome. Department of Oncology, Peter MacCallum Cancer Centre, Melbourne, Australia. Audience: Clinicians & Basic Researchers. (Continuing Education).

2005 Jun  
**Visiting Professor.** Hypoxia, DNA Repair and Prostate Cancer. Department of Radiation Oncology, University of Maastricht, Maastricht, Netherlands. DA: International-Basic Scientists and Oncologists. (Continuing Education).

2005 Jun  
**Visiting Professor.** Hypoxia, DNA Repair and Prostate Cancer. Department of Radiation Oncology, University of Medical Center Nijmegen, Nijmegen, Netherlands. Audience: International-Basic Scientists and Oncologists. (Continuing Education).

2005  
**Senior Responsible Author.** RAD51: A DNA repair target for increasing the therapeutic potential in the treatment of bladder cancer. The European Society for Therapeutic Radiology and Oncology/ECCO, Paris. Choudhury A, **Bristow RG**. (Trainee Presentation).

2004 May  
Recruitment of Serine-15 Phosphorylated P53 To Nuclear Sites Of DNA Damage In Situ. 8th International Workshop On Radiation Damage To DNA. Banff, Alberta, Canada. Audience: Clinicians and Researchers (100). (Continuing Education).

2003 Jul  

2003 Jun  

2003 Jun  
Rad51 as Target in Prostate Cancer Treatment. 2nd Annual CPC-BioNet Satellite Meeting. Montreal, Quebec. Audience: Clinicians and Researchers (50). (Continuing Education).

2003 Jan  

2002  
**Visiting Professor.** p53 and DNA Repair Complexes In Situ. Medical Research Council (MRC) Harwell Radiation Stability and Genetics Unit and Department of Oncology, Oxford University. Oxford, United Kingdom.

2001  

1996  
**Visiting Professor.** P53 as a determinant of therapeutic response: fiction or function? Department of Radiation Oncology, University of Pennsylvania. Philadelphia, Pennsylvania.

**Lecutres and Other Presentations**

2007 Apr  

2007  
Hypoxia and DNA Repair as Factors in Prostate Cancer Progression and Aggression. 13th International
2. NATIONAL

Invited Lectures and Presentations

2014 Oct 6  Invited Lecturer. “Precision Cancer Medicine for Prostate Cancer: Lets Make It Personal !”. Memorial University. St. Johns, Newfoundland and Labrador, Canada. Presenter(s): Bristow, RG.

2013 Sep  Speaker. Metformin use in PRostate Cancer Patients Treated with Radiotherapy: Improved outcomes due to Enhanced Tumor Oxygenation. CARO-COMP JSM. Presenter(s): Bristow RG, Dal Pra A.

2013 Mar  Visiting Professor. “Personalized Genomic and Biomarker Assessment for Individualized Prostate Cancer Treatment.”. Department of Oncology, Dalhousie University. Halifax, Ontario, Canada.

2012  Invited Speaker. The CPC-GENE Project for Individualized Prostate Cancer Therapy. Terry Fox Research Institute (TFRI) Meeting on Prostate Cancer. Montreal, Quebec, Canada.

2011 Personalized Prostate Cancer Medicine Based on Genetic Predictors of Radiotherapy Response. Southern Alberta Cancer Research Institute, University of Calgary. Calgary, Alberta.

2008  **Canadian Research Network.** Australian Canadian Prostate Cancer Research Alliance Program. Brisbane, Australia.

2005 Apr  Fidelity of DNA Repair as a Factor in Prostate Carcinogenesis. Montreal General Hospital/McGill. Montreal, Quebec. Audience: Clinicians & Scientists. (Continuing Education).

Presented Abstracts

2010 May  Chronic Hypoxia Suppresses Base Excision Repair by Inhibition of Protein Synthesis: An Example of Contextual Synthetic Lethality. 2nd Terry Fox Research Institute Scientific Meeting. Vancouver, British Columbia. Presenter(s): Chan N. N Chan, M Ali, GP McCallum, PG Wells, S Gallinger and RG Bristow. (Trainee Presentation).

2007  Principal Author. Hypoxia Limits DNA-dsb Signalling and Repair in Prostate Cancer Cells: In Vitro and In Vivo Studies. Prostate Cancer Research Foundation of Canada Retreat. Toronto. Bristow RG.

2006  Principal Author. DNA Repair and Prostate Cancer-Canadian Collaborations in Carcinogenesis and Therapy. 5th Annual Canadian Prostate Cancer BioResearch Network Meeting. Niagara-on-the-lake. Bristow RG.

Media Appearances

2006 Sep 18  Prostate Cancer Program offers Assessment Tools. CTV.ca. Toronto, Ontario. (Presentation to Patients/Public).

Lectures and Other Presentations

2010  Prostate Cancer: Individualizing a Man’s Disease. Prostate Cancer Canada Breakfast Fundraiser. Toronto, Ontario. (Presentation to Patients/Public).

2010  New Avenues of Prostate Cancer Research Funded by Prostate Cancer Canada. Prostate Cancer Canada Annual Conference. Toronto, Ontario. (Presentation to Patients/Public).

2009  Visiting Professor. Inhibiting DNA Repair as a Means to Improve Radiotherapy Outcome. Department of Radiation Oncology, University of Manitoba and Manitoba Institute of Cell Biology, Cancercare Manitoba. Winnipeg, Manitoba. Audience: Oncologists & Scientists. (Continuing Education).

2008 Sep  Chronically Hypoxic Cells are Uniquely Sensitized to PARP Inhibition. CARO. Chan N. (Trainee Presentation).

2008 Sep  Novel targeted inhibitors of PARP, ATM and DNAPKcs radiosensitize oxic and hypoxic malignant human cells. CARO. Coackley C. Poster presentation. (Trainee Presentation).

2007 Sep  A novel poly(ADP-ribose) polymerase inhibitor, ABT-888, radiosensitizes malignant human cell lines under oxia and hypoxia. CPCRI. Toronto. Liu SK. (Trainee Presentation).

2006  CPCRI Prostate Cancer Research Education Breakfast. (Presentation to Patients/Public).

2004 Jun  Home Run Challenge. Prostate Cancer Awareness Week, Blue Jays Game on behalf of the Prostate Cancer Research Foundation of Canada. Toronto, Ontario. (Presentation to Patients/Public).

2000  **Visiting Professor.** Department of Radiation Oncology, University of Bristish Columbia. Genetics Determinants of Radiation Curability. Vancouver, British Columbia.

Invited Lectures and Presentations

2013 Prostate Cancer Genomics and Changing Clinical Practice: A Partnership between Clinicians, Bioinformaticians and the Patients. Ontario, Canada. Presenter(s): Bristow, RG.

Presented Abstracts

2012 Nov AZD5438, an inhibitor of CDK 1, 2, and 9, enhances the radiosensitivity of non-small cell lung carcinoma cells. Presenter(s): Tumati V, Raghavan P, Yu L, Chan N, Tomimatsu N, Buma, S, Bristow RG, Saha D.

2012 Sep Hypofractionated and conventionally fractionated radiotherapy schedules for localized prostate cancer. Canadian Association of Radiation Oncologists (CARO) 2012 Annual Scientific Meeting. Ottawa, Ontario,

G. Teaching and Design

1. INNOVATIONS AND DEVELOPMENT IN TEACHING AND EDUCATION

2004 Translational Radiobiology IMS 1502H, Graduate Education, Faculty of Medicine, Institute of Medical Science, University of Toronto
This new half-year course will be given over 2 terms starting in 2005 within the new trans-disciplinary M.Sc in Radiation Sciences Program (IMS-based). The course is designed to be seminar-based and student-interactive. It also has a unique hands-on laboratory component spread over 5 basic and applied oncology research modules. Local and guest lecturers will interact with the students to generate modern state-of-the-art approaches to molecular oncology and the development of new treatments within the field of radiation oncology.

2001 MBP1018Y-Basic Science of Oncology, Graduate Education, Faculty of Medicine, Dept of Medical Biophysics, University of Toronto Press
This full-year graduate course is available to all graduate students in biological sciences within the School of Graduate Studies (SGS) at the University of Toronto. It is hosted by the Department of Medical Biophysics. Dr. Bristow took over as Course Supervisor in 2001 and re-designed a series of lectures in a didactic format interspersed with clinical examples to showcase the breadth of oncology research. The course covers molecular and cellular oncology and the biological basis for several cancer treatment modalities in 13 to 15 lectures of 2 hours each. Overall, the course received excellent evaluations.

2000 UICC Cancer Research Training Course: International Union for the Control of Cancer (UICC-Geneva) and Princess Margaret Hospital (University Health Network-Toronto), Faculty of Medicine, Dept of Radiation Oncology
This course was designed by Dr. Bristow de novo as per UICC guidelines and was hosted by OCI-PMH laboratories and local OCI/PMH scientific lecturers. Dr. Bristow was Course Director, lecturer and established the didactic and practicum curriculum for the international attendees. The course covered major topics of cellular and molecular oncology and cancer treatments over a seven-day period. More than 20 graduate and post-graduate trainees from over 16 countries took part in the course. The course was instrumental in teaching state-of-the-art biology to a wide variety of students from varied scientific background to take back to their home countries and implement within their own programs and laboratories.

A full schedule of lectures pertaining to the breadth and depth of the subjects is appended as well as an evaluation of the course. The vast majority of the group stated that the overall experience within the course was excellent.

H. Research Supervision

1. PRIMARY OR CO-SUPERVISION

Graduate Education

2011 Primary Supervisor. Ramya Kumareswaran.
2011 Primary Supervisor. Michael Fraser.
2010 - 2011 Primary Supervisor. PhD. Kenneth Tse.

2004 - 2006 **Primary Supervisor.** PhD. Ahmed Haddad. Collaborator(s): Supervisor: Dr. L. Klotz and Dr. N. Fleschner.

2004 **Primary Supervisor.** MSc. Cindy Yau. Collaborator(s): Supervisor: Dr. Hedley.

2004 **Primary Supervisor.** PhD. Adam Shuhendler. Collaborator(s): Supervisor: Dr. Peter Wells.

Undergraduate MD

2010 - 2011  Primary Supervisor. Fiona Warde.
2010 - 2011  Primary Supervisor. Shaquil Kassam.
2009  Primary Supervisor. Derek Wong.
2008  Primary Supervisor. Refat Khan.
2008  Primary Supervisor. Safia Ladha.
2008  Primary Supervisor. Jas Waspiewski.
2008  Primary Supervisor. Nadja Ring.
2007  Primary Supervisor. Annie Cheng.
2007  Primary Supervisor. Tanya Pavri.
2007  Primary Supervisor. Aleem Abdulla.
2007  Primary Supervisor. Refat Khan.
2006  Primary Supervisor. Kenneth Tse.
2006  Primary Supervisor. Agatha Jassem.
1999  Primary Supervisor. Wissam Assaily.

Postgraduate MD

2005 - 2010  Primary Supervisor. Helen Zhao.
2005  Primary Supervisor. Cindy Law.
2005  Primary Supervisor. Clinical Fellow. Dr. Kirsty Wiltshire.
2001 - 2011  Primary Supervisor. Alice Meng.

Postdoctoral Research Fellow (PhD)

2011  Primary Supervisor. Christine Schultze.
2007  Primary Supervisor. Stanley Liu. Awards: 2007: W. J. Simpson Award for Academic Excellence in Research by a Resident Department of Radiation Oncology, PMH.
2006 - 2007  Primary Supervisor. Stephane Supiot. Awards: 2007: Winner of the 2007 ASCO Foundation Merit Award. 2007 Prostate Cancer Symposium, Orlando, FLA. AACR Travel Award, AACR Workshop, Molecular Biology in Clinical Oncology, Aspen, CO. Winner of the 2007 ECCO pResidential Abstract Award, Barcelona, Spain (Given to the best abstract at the European Cancer Congress Meeting)
2000 - 2003  Primary Supervisor. Dr. Rong Fan.

2. OTHER SUPERVISION

Graduate Education

Thesis Committee Member
2010 - 2011  Nataliya Zhukova.
2010 - 2011  Ken Kron.
2009 - 2011  Kika Anyiwe. Collaborator(s): Supervisor: Dr. Aaron Schimmer.
2009 - 2011  Preethy Prasad. Collaborator(s): Supervisor: Dr. X.Y. Wu.
2009 - 2011  Johnny Li. Collaborator(s): Supervisor: Dr. Rasq Hakem.
2008 - 2011  Andrea Para. Collaborator(s): Supervisor: Dr. R. Hill.
2008 - 2011  Kenneth Tse. Collaborator(s): Supervisory: Dr. R. Bristow.
2006 - 2009  Eva Christensen. Collaborator(s): Supervisor: Dr. R. Bristow.
2006 - 2009  Shane Harding. Collaborator(s): Supervisor: Dr. R. Bristow.
2006  Carla Rosario. Collaborator(s): Supervisor: Dr. C. Swallow.
2006  Jamil Sawani. Collaborator(s): Supervisor: Dr. R. Bristow.
2006  Andrea Para. Collaborator(s): Supervisor: Dr. R. Hill.
2005 - 2006  Shahnaz Al Rashid. Collaborator(s): Supervisor: Dr. R. Bristow.
2005  Artur Gevorgyan. Collaborator(s): Supervisor: Dr. C. Forrest; HSC.
2005  MSc. Andrew Primeau. Collaborator(s): Supervisor: Dr. I. Tannock.

1. EDUCATION

Degrees
1972 - 1976 MD, University of Ottawa, Ottawa, Ontario
1970 - 1972 Western University, London, Ontario

Postgraduate, Research and Specialty Training
1984 Senior Registrar, Radiation Oncology, The Royal Marsden Hospital, Sutton, United Kingdom
1983 Clinical Fellow, Radiation Oncology, Toronto-Bayview Regional Cancer Centre, Toronto, Ontario
1980 - 1983 Resident, Radiation Oncology, Princess Margaret Hospital, Toronto, Ontario
1979 - 1980 Chief Resident, Toronto East General Hospital, Toronto, Ontario
1978 - 1979 Toronto Western Hospital, Toronto, Ontario
1976 - 1978 Sunnybrook Health Sciences Centre, Toronto, Ontario

Qualifications, Certifications and Licenses
1983 Board Certified, American Board of Radiology (Therapeutic)
1983 FRCPC, Radiation Oncology, Royal College of Physicians of Canada
1980 FRCPC, Internal Medicine, Royal College of Physicians of Canada
1980 Board Certified, American Board of Internal Medicine

2. EMPLOYMENT

Current Appointments
2010 - present Professor, Radiation Oncology, University of Toronto
1988 - present Staff Radiation Oncologist, Princess Margaret Hospital, Toronto, Ontario
Previous Appointments

HOSPITAL
1986 - 1988 Staff Radiation Oncologist, OCTRF Toronto-Bayview Regional Cancer Centre, Toronto, Ontario
1985 - 1986 Staff Radiation Oncologist, OCTRF Hamilton Regional Cancer Centre, Hamilton, Ontario

UNIVERSITY - RANK
2010-present Professor, Radiation Oncology, University of Toronto
2003 - 2010 Associate Professor, Radiation Oncology, University of Toronto
1992 - 2003 Assistant Professor, Radiation Oncology, University of Toronto
1988 - 1992 Assistant Professor, Radiology, University of Toronto
1986 - 1988 Lecturer, Dept of Radiology, University of Toronto

3. HONOURS AND CAREER AWARDS

Distinctions and Research Awards

INTERNATIONAL
Received
2006 Godfrey Price Memorial Lecturer, Bristol University, Bristol, United Kingdom. (Distinction)
2016 Best of ASCO award. 2016 ASCO ASM Chicago, USA (Award)

LOCAL
Received
2008 Radiation Oncology Research Productivity Award, Princess Margaret Hospital. (Research Award)

Teaching and Education Awards

LOCAL
Received
2002 Teaching Award - Best RMP Rounds, Dept of Radiation Oncology, Faculty of Medicine, Princess Margaret Hospital. (Multilevel Education)

4. PROFESSIONAL AFFILIATIONS AND ACTIVITIES

Professional Associations
2004 - present Canadian Association of Radiation Oncologists
College of Physicians and Surgeons of Ontario
European Society of Therapeutic Radiology and Oncology
Ontario Medical Association
Fellow, Royal College of Physicians and Surgeons of Canada
Administrative Activities

INTERNATIONAL

American Society of Clinical Oncology
2011-present  **Member**, GU Expert Panel, Prostate Guideline Committee

C. Academic Profile

1. RESEARCH STATEMENTS

1992 – present

My scholarly efforts over the past 20 years have been to optimize treatment outcomes for patients with localized prostate cancer, and sarcomas. Conceptual innovations undertaken for optimizing the care of those with localized prostate cancer include:

- Development of high-precision radiotherapy treatment techniques.
- Investigation of an altered radiation fractionation regimen.
- Establishing the limitations of standard therapy.
- Development of novel combined radiotherapy-surgery techniques.

I have had impact on professional practices nationally and internationally through:

- Leading proof-of-principle clinical trials.
- Application of these principles through process improvement and practice change.
- Leadership to promote the adoption of new concepts and approaches into practice.
- For sarcomas, I lead the development and implementation of Provincial sarcoma care guidelines.

2. TEACHING PHILOSOPHY

To provide teaching and mentorship to Radiation, Medical and Surgical Oncology fellows and residents; medical students, allied health workers and the public. I have promoted best practices through participation in General Surgical Oncology curriculum development at a national level. I have expanded capacity through leadership of the University of Toronto Radiation Oncology Fellowship Program.

D. Research Funding

1. GRANTS, CONTRACTS AND CLINICAL TRIALS

PEER-REVIEWED GRANTS

FUNDED

2011 - 2014

Co-Investigator. Tumor-targeted Radiotherapy for Prostate Cancer. Canadian Cancer Society. PI: C Menard. Collaborator(s): Bristow R, Brock K, Craig T, Foltz W, Haider M, Milosevic M, Stanescu T, van der Kwast T. 745,340 CAD. [Grants] This trial will utilize novel imaging and guidance techniques along with our experience in prostate hypofractionation to investigate hypofractionated dose escalation to the dominant prostate nodule only. It includes imaging correlative studies to investigate tumor hypoxia.

2010 - 2015

331,405 CAD. [Grants]
Known as the PROFIT trial, this is an international phase III trial designed to test the hypothesis generated by my Phase II trial; that hypofractionated IG-IMRT for intermediate risk prostate cancer is non-inferior to conventionally fractionated dose-escalated IG-IMRT.

2009 - 2012
This grant was obtained to fund the Australian component of the PROFIT trial.

2008 - 2009
This grant was obtained to fund the Australian component of the PROFIT trial.

2008
This is a formal evaluation of the toxicity associated with our established fiducial marker IGRT program.

2007
A prospective trial designed to limit toxicity of prostate RT by PTV optimization, employing multi-modal imaging techniques.

2006 - 2019
An international trial designed to investigate the optimal timing of post-operative radiotherapy, and optimal duration of adjuvant hormone therapy for prostate cancer. I was involved in trial design and international implementation as co-vice chair of the Trial Management Committee, and I implemented the trial in Canada through the NCIC-CTG as the Canadian Co-principal Investigator.

2006 - 2007

2006
A study to evaluate deformational changes in normal tissue that occur over the course of prostate radiotherapy, and to evaluate the impact on prostate and normal tissue dosimetry.

2006
Co-Investigator. The impact of prostate dimensions on toxicity after high dose conformal external beam radiotherapy for prostate cancer. This was a secondary analysis of my dose-

2005 - 2010  
**Principal Investigator.** A randomized trial of a shorter fractionation schedule for localized carcinoma of the prostate. Canadian Institutes of Health Research (CIHR). Known as the PROFIT trial, this is an international phase III trial designed to test the hypothesis generated by my Phase II trial; that hypofractionated IG-IMRT for intermediate risk prostate cancer is non-inferior to conventionally fractionated dose-escalated IG-IMRTCollaborator(s): H Lukka, P Warde, M Levine, J Julian, A Gafni, G Bauman, M Parliament, J Wu, T Pickles, L Souhami, JP Bahary. 2,209,971 CAD. [Grants]

2005  

2004  
**Supervisor.** Evaluation of rectal and bladder normal tissue complication probability after escalated dose external beam radiotherapy for prostate cancer. This project undertook a dosimetric analysis of prospectively collected toxicity data from our initial phase II dose escalation prostate trial. Canadian Association of Radiation Oncologists (CARO). Abbott–CARO Uro-Oncologic Radiation Award (ACURA). PI: Peter Chung. Collaborator(s): R Bristow, A Bayley, P Warde, M Gospodarowicz, M Milosevic, E White and D Jaffray. 29,614 CAD. [Grants]

2003 - 2004  
**Principal Investigator.** A cohort comparison of daily target organ image matching and correction using implanted fiducial markers or flat plate cone beam computerised tomography (CT) for patients undergoing conformal radiotherapy for localized prostate cancer. Canadian Association of Radiation Oncologists (CARO). Abbott–CARO Uro-Oncologic Radiation Award (ACURA). 03-0483-CE. Collaborator(s): P Chung; R Bristow; M Milosevic; M McLean; T Haycocks; M Gospodarowicz. [Clinical Trials]

2003  
This prospective trial acquired cinematic MRI images of the prostate, to evaluate the magnitude and causes of intrafractional prostate motion, and to evaluate the impact of a bowel regimen on inter- and intrafractional prostate motion.

2002  
**Supervisor.** A cohort study of a bowel regimen to reduce intra-fraction prostate motion. Canadian Prostate Cancer Research Initiative. 15485. PI: Alan Nichol. Collaborator(s): P Warde, R Bristow, M Gospodarowicz, M Milosevic, E White, D Jaffray. 36,500 CAD. [Grants]  
This prospective trial acquired cinematic MRI images of the prostate, to evaluate the magnitude and causes of intrafractional prostate motion, and to evaluate the impact of a bowel regimen on inter- and intrafractional prostate motion.

2001 - 2005  
**Principal Investigator.** A cohort comparison of daily target organ image matching and correction using implanted fiducial markers or flat panel cone beam computerized tomography (CT) for patients undergoing conformal radiotherapy for localized prostate cancer. Canadian Association of Radiation Oncologists (CARO). Abbott–CARO Uro-Oncologic Radiation Award (ACURA). Collaborator(s): P Warde, R Bristow, A Bayley, M
Gospodarowicz, M Milosevic, E White D Jaffray. 15,000 CAD. [Grants]
This was the initial clinical evaluation of the cone beam CT technology in comparison with our standard IG technique.

2001

Principal Investigator. A Phase I-II Prospective Trial of Conformal Hypofractionated Intensity Modulated Radiotherapy (IMRT) for Clinical Stage T1,T2N0M0 Adenocarcinoma of the Prostate. Canadian Association of Radiation Oncologists (CARO). Abbott–CARO Uro-Oncologic Radiation Award (ACURA). Collaborator(s): P Warde, R Bristow, M Gospodarowicz, M Milosevic, T Haycocks. 29,000 CAD. [Grants]
This trial was to investigate the safety and feasibility of short-course, large dose per fraction radiotherapy for prostate cancer, using an IG-IMRT technique.

NON-PEER-REVIEWED GRANTS

FUNDING

2006 - present

Co-Principal Investigator. Prostate cancer: Radiotherapy and Androgen Deprivation In Combination After Local Surgery (RADICALS). National Cancer Institute of Canada (NCIC). 07-063. PI: F Saad. Collaborator(s): M Sydes; W Paruleker; J Logue; N Clarke; K Mellon; H Kyneston; C Cooper; H Payne; M Parmar. [Clinical Trials] Co-funded with Cancer Research UK (C Parker, Principal Investigator).

2004 - 2005

Principal Investigator. A phase III randomised study of preoperative radiation plus surgery vs surgery alone for patients with retroperitoneal sarcoma (RPS). American College of Surgery Oncology Group. 04-0416-C. Collaborator(s): C Swallow; B O’Sullivan. [Clinical Trials]

2002 - 2003

Principal Investigator. A randomized study of inter-and intra fraction prostatic motion using two different immobilization devices during conformal prostatic radiotherapy. Princess Margaret Hospital Foundation (The). 01-0856-C. Collaborator(s): P Warde; R Bristow; M Milosevic; M McLean; T Haycocks; M Gospodarowicz. [Clinical Trials]

2000 - 2001

Principal Investigator. A phase III trial of supine vs. prone positioning for men undergoing escalated dose conformal radiotherapy for localized adenocarcinoma of the prostate. Princess Margaret Hospital Foundation (The). Collaborator(s): A Bayley; P Warde; R Bristow; M Milosevic; M McLean; T Haycocks; M Gospodarowicz. [Clinical Trials]

1999 - 2004

Co-Investigator. A Randomized phase III study of neo-adjuvant hormone therapy in patients with localized prostate cancer treated with escalated dose radiotherapy. Princess Margaret Hospital Foundation (The). PI: P Warde. Collaborator(s): R Bristow; M Milosevic; M McLean; T Haycocks; M Gospodarowicz. [Clinical Trials]

1998 - 2001

Principal Investigator. Phase I-II trial of pre-operative irradiation and postoperative brachytherapy for the management of non-metastatic retroperitoneal soft tissue sarcoma. Princess Margaret Hospital Foundation (The). Collaborator(s): C Swallow; B O’Sullivan. [Clinical Trials]

1997 - 1999

Principal Investigator. A phase I-II trial of escalated dose conformal external beam radiotherapy for the management of localized carcinoma of the prostate. Princess Margaret Hospital Foundation (The). Collaborator(s): A Nichol; P Warde; R Bristow; M Milosevic; M McLean; T Haycocks; M Gospodarowicz. [Clinical Trials]

1996 - 1997

Principal Investigator. A randomized, double blind, placebo-controlled multicentre trial of a shorftatty acid rectal enema in the treatment of radiation induced proctitis and
proctosigmoiditis. Industry. Collaborator(s): H Steinhart. [Clinical Trials]

1989 - 1992 **Principal Investigator**. A multicentre phase I-II trial of hyperfractionated cranial irradiation for primary CNS lymphoma. Toronto-Bayview Regional Cancer Centre. [Clinical Trials]

E. Publications

1. MOST SIGNIFICANT PUBLICATIONS

   *This prospective phase II trial used cine-MRI scan to measure the magnitude of intra-fractional prostatic movement at different points in the planning and treatment process, and evaluated an intervention designed to limit that motion. This trial provided important information regarding the magnitude of uncertainty associated with intra-fractional prostate motion, and provided an accurate evaluation of the safety margin (PTV) required in prostate treatment planning to account for this uncertainty.*

   *This prospective phase II trial represented the application of our accumulated experience in developing high-precision radiotherapy techniques for prostate cancer, and reports the safety and efficacy of a novel, dose-escalated hypofractionation technique. The results were instrumental in my being awarded a CIHR grant to establish an ongoing Ontario Clinical Oncology Group sponsored phase III trial. This trial has since been adopted by the Trans-Tasman Radiation Oncology Group (TROG) and is accruing internationally.*

   *This prospective phase II trial reported the long-term outcome of the initial Canadian experience with dose-escalated radiotherapy, and confirmed the safety and efficacy of our technique. It was a direct consequence of our earlier work to optimize conformal prostate radiotherapy. It has been cited 21 times.*

   *This randomized trial formed part of our long-term work to minimize set-up error and optimize the PTV for dose-escalated prostate radiotherapy, and was one of the first to formally evaluate different immobilization methods. It has been cited 38 times.*

   *This study formed part of our long-term work to minimize set-up error and optimize the PTV for dose-escalated prostate radiotherapy, and was one of the first to demonstrate the feasibility and utility of CT/MRI fusion in radiation treatment planning for prostate cancer. It has been cited 51 times.*

2007 Bone fractures following external beam radiotherapy and limb preservation surgery for extremity soft tissue sarcoma: relationship to irradiated bone length, volume and dose. Connective Tissue Oncology Society Annual Scientific Meeting. Dickie CI, Parent AL, Griffin AM, Chung PW, Catton CN (collaborator), Wunder JS, Ferguson PC, Sharpe MB, O’Sullivan B.

2005 Comparison of outcomes of soft tissue sarcoma arising in the popliteal fossa or posterior thigh. Canadian Orthopaedic Association. Montreal, Quebec. Clarkson PW, Griffin AM, Catton CN, O’Sullivan B, Ferguson PC, Wunder JS, Bell RS.

3. PROVINCIAL / REGIONAL

Invited Lectures and Presentations

2011 Hormonal and Radiotherapy for Localized Prostate Cancer. Grand River Regional Cancer Centre.

2010 Feb 10 Hypofractionation for localized prostate cancer. Web seminar to SEORCC; Ottawa Hospital, Barrie Regional Cancer Centre and Cornwall Cancer Clinic.

Charles Nicholas CATTON

2005 **Visiting Professor.** Department of Radiation Oncology, McMaster University, Juravinski Cancer Centre. Hamilton, Ontario.

2004 **Visiting Professor.** Department of Radiation Oncology, Lakehead University, Northwestern Ontario Regional Cancer Centre. Thunder Bay, Ontario.

1999 **Visiting Professor.** Department of Oncology, University of Western Ontario, London Regional Cancer Centre. London, Ontario.

4. LOCAL

**Invited Lectures and Presentations**

2013 Mar 1 **Speaker.** The UTDRO Fellowship Program. UTDRO Career Day. Toronto, Ontario, Canada. (Trainee Presentation).

2013 Jan 22 **Invited Speaker.** Building the research platform in the GU site group. Making the most of what you got. Odette Cancer Centre. Ontario, Canada.

2013 Jan **Invited Lecturer.** Combined management of soft tissue sarcomas. Department of Surgical Oncology. Toronto, Ontario, Canada. (Trainee Presentation).

2012 Sep **Invited Speaker.** Radiotherapy for prostate cancer. Department of Surgical Oncology. Toronto, Ontario, Canada. (Trainee Presentation).

2012 Feb **Lecturer.** Radiation Management of Sarcomas. Lecture for General Surgical Oncology and Breast Surgical Oncology clinical fellows. Toronto, Ontario, Canada. (Trainee Presentation).

2011 Oct 31 Introduction to Radiotherapy. UT Surgical Oncology Fellows. (Trainee Presentation).

2011 **Presenter.** Palliative care: Complex case discussion. The Toronto Cancer Conference. Toronto, Ontario, Canada.
2011 **Presenter.** Critique of RTOG 94-08. GU Radiation Oncologists of Canada. Toronto, Ontario, Canada.

2005 Modifying the late effects of combined therapy for STS. U of T DRO Rounds, Princess Margaret Hospital. Toronto, Ontario.

2002 High precision RT and beyond for prostate cancer. At New Developments in Cancer Management. Inter-Division Dept of Oncology, University of Toronto. Toronto, Ontario.

2000 Recent advances in prostate cancer. CE Programme for Community Urologists. Toronto, Ontario. (Continuing Education).

1999 Opportunities afforded by modern radiotherapy in prostate cancer. GU Oncology 99 Symposium, University of Toronto. Toronto, Ontario.

1997 Palliative radiotherapy for prostate cancer. GU Oncology 97 Symposium, Inter-Division Dept of Oncology, University of Toronto. Toronto, Ontario.

1995 The Role of Radiation Therapy in Early Stage Prostate Cancer. Uro-Oncology Workshop, University of Toronto. Toronto, Ontario.

G. Research Supervision

1. OTHER SUPERVISION

Graduate Education

Thesis Committee Member

2007 - 2008 MSc. Eva Christensen.
Biographical Sketch – 2008 to Present
Pamela Catton MD, MHPE, FRCPC

Dr. Catton is the Medical Director of both Patient Education at UHN, and Survivorship at PMH, where she also holds the title of Director Cancer Education. She is a practicing radiation oncologist who has treated prostate cancer patients since 1983. In 2006 she left the GU site group to focus on breast cancer, but maintains a small follow up practice. She is a Professor and Vice Chair of Radiation Oncology at the University of Toronto, and in 2005 was awarded the Butterfield Drew Chair in Breast Cancer Survivorship (PMH and U of T). In 2006 she was the PI on a successful CFI grant that allowed the development of ELLICSR, the Electronic Living Laboratory for Interdisciplinary Cancer Survivorship Research, which opened four years later. This 12000 foot centre has been developed into a collaborative centre for health wellness and cancer survivorship and supports clinicians researchers, educators and patients in their quest to revolutionize the cancer experience. She is the Director of ELLICSR and has assembled an eclectic team of over 40 researchers, ehealth innovators, educators, cancer specialists, advanced practice nurses and other allied health professionals to build a comprehensive survivorship program for all patients. She has a long history of developing innovative education programs for patients, health care undergraduate and post graduate students, graduate students and practitioners, with an emphasis on digital tools. She was the series medical editor of Oncology Interactive, a 23 title CD ROM patient education series that included prostate cancer, and www.caringtotheend, www.caringvoices the Virtual Tour, and more recently www.theprincessmargaret. The patient version of the Princess Margaret website is now the platform that will enable patients to access a host of self care and self management tools and personalized support.

Employment

CURRENT APPOINTMENTS
2011 Jul - present Medical Director, Patient Education, University Health Network
2010 Jul - present Director, Collaborative Centre for Health Wellness and Cancer Survivorship, Princess Margaret Cancer Program, University Health Network
2009 Jul - present Radiation Oncologist, St. Michael’s Hospital, Toronto, Ontario
2005 Jul - present Butterfield Drew Chair in Survivorship Research, Princess Margaret Cancer Program,University Health Network
2004 Jul - present Medical Director, Breast Cancer Survivorship Program, Princess Margaret Cancer Program, University Health Network

Education

DEGREES
1994 Jul - 1996 Jun Masters in Health Professions Education, University of Illinois at Chicago
1973 Jul - 1977 Jun MD, University of Ottawa

QUALIFICATIONS, CERTIFICATIONS AND LICENSES
1982 Jul - present Fellow, Radiation Oncology, Royal College of Physicians and Surgeons of Canada
1982 Jul - present Diplomate, Therapeutic Radiology, American College of Radiology
1977 Jul - present Licentiate, Medical Council of Canada
Role in Residency Program:

COMMITTEE:
Member and Fellow of the Royal College of Physicians and Surgeons 1983 - Present
Member, Canadian Association of Radiation Oncologists (CARO) 1986 - Present

Grant Reviewer
RCPSC Faculty Development Grants and Research Grants 2001 - Present
RCPSC/AMS CanMeds Development Grants 2001 - Present
RCPSC/AMS Medical Education Fellowship Grants 2003 - Present

1. EDUCATION

Degrees
1991 Sep - 1995 Jun MD, Medicine, Faculty of, University of Toronto, Toronto, Ontario, Canada
1989 Sep - 1991 Jun BSc, Arts and Science, University of Toronto, Toronto, Ontario, Canada

Postgraduate, Research and Specialty Training

2000 Jul 1 - 2001 Jun 30 Clinical Research Fellowship, Sunnybrook Odette Cancer Centre, Conformal Radiation Therapy & GU Brachytherapy, Dept of Radiation Oncology, University of Toronto, Toronto, Ontario, Canada, Supervisor(s): Dr. Yee Ung & Dr. Gerard Morton

1998 Jul 1 - 2000 Jun 30 Radiation Oncology Residency, Princess Margaret Hospital & Sunnybrook Odette Cancer Centre, PGY 4-5, Radiation Oncology, Dept of Radiation Oncology, University of Toronto, Toronto, Ontario, Canada

1995 Jul 1 - 1998 Jun 30 Internship and Residency, Kingston General Hospital and Kingston Regional Cancer Centre, PGY 1-3, Radiation Oncology, Dept of Oncology, Queen’s University at Kingston, Toronto, Ontario, Canada

Qualifications, Certifications and Licenses

2000 - 2010 Diplomate, Radiation Oncology, American Board of Radiology, United States, License / Membership #: 47660

2000 Fellow, Radiation Oncology, Royal College of Physicians and Surgeons of Canada, Ontario, Canada, License / Membership #: 525451

1997 United States Medical Licensing Examination Steps 1, 2, 3, United States Medical Licensing Examination, United States

1997 Medical Council of Canada Qualifying Examination Parts 1, 2, Medical Council of Canada, Canada
2. EMPLOYMENT

Current Appointments

2014 Jul 1 - present  Associate Professor, Radiation Oncology, Faculty of Medicine, University of Toronto, Toronto, Ontario, Canada
2010 Jan - present  Affiliate Scientist, Evaluative Clinical Sciences, Sunnybrook Research Institute, Odette Cancer Centre, Sunnybrook Health Sciences Centre, Toronto, Ontario, Canada
2001 Aug 1 - present  Staff Radiation Oncologist; Lung and GU Site Groups, Odette Cancer Centre, Sunnybrook Health Sciences Centre, Toronto, Ontario, Canada

Previous Appointments

HOSPITAL

2009 Jan 1 - 2013 Sep 30  Radiation Oncology Genitourinary (GU) Site Group Leader, Odette Cancer Centre, Sunnybrook Health Sciences Centre, Toronto, Ontario, Canada

UNIVERSITY

2011 Jan 1 - 2012 Jan 1  Associate Director of Postgraduate Education, Radiation Oncology, Faculty of Medicine, University of Toronto

UNIVERSITY - RANK

2003 Jul 1 - 2014 Jun 30  Assistant Professor, Radiation Oncology, Faculty of Medicine, University of Toronto, Toronto, Ontario, Canada
2001 Aug 1 - 2003 Jun 30  Lecturer, Radiation Oncology, Faculty of Medicine, University of Toronto, Toronto, Ontario, Canada

3. HONOURS AND CAREER AWARDS

Distinctions and Research Awards

LOCAL

Received

2015 Mar  Academic Performance Award, Odette Cancer Centre. (Research Award)
2011 Mar  Academic Performance Award, Odette Cancer Centre. (Research Award)
2008 Mar  Academic Performance Award, Odette Cancer Centre. (Research Award)
2005 Mar  Academic Performance Award, Odette Cancer Centre. (Research Award)
2004 Mar  Academic Performance Award, Odette Cancer Centre. (Research Award)
2003 Mar  Academic Performance Award, Odette Cancer Centre. (Research Award)

Teaching and Education Awards

LOCAL

Received

2011 Jun  Residents’ Award for Excellence in Clinical Teaching, Dept of Radiation Oncology, Faculty of Medicine, University of Toronto. (Postgraduate MD)
2008 Jun  Post Graduate Classroom Teaching Award (highest effectiveness scores), Dept of
Radiation Oncology, Faculty of Medicine, University of Toronto. (Postgraduate MD)
2004 Jun **Residents’ Award for Excellence in Clinical Teaching**, Dept of Radiation Oncology, Faculty of Medicine, University of Toronto. (Postgraduate MD)

4. PROFESSIONAL AFFILIATIONS AND ACTIVITIES

**Professional Associations**

2001 - present  Ontario Medical Association / Canadian Medical Association
1998 - present  Canadian Association of Radiation Oncologists
1997 - present  American Society for Therapeutic Radiology and Oncology
1997 - present  Royal College of Physicians and Surgeons of Canada
2001 - 2007  American Society of Clinical Oncology

**Administrative Activities**

**PROVINCIAL / REGIONAL**

**Other Organizations**

2011 - 2012  **Co-Chair**, GU Conversations Organizing Committee, Faculty of Medicine, Dept of Radiation Oncology, Continuing Education, Mississauga, Ontario, Canada.

**University of Toronto**

2011 - 2013  **Co-Chair**, Target Insight Organizing Committee, Faculty of Medicine, Dept of Radiation Oncology, Continuing Education, Toronto, Ontario, Canada.

2009 - 2011  **Member**, Target Insight Organizing Committee, Faculty of Medicine, Dept of Radiation Oncology, Continuing Education, Toronto, Ontario, Canada.

**LOCAL**

**Odette Cancer Centre**

2009 - 2013  **Member**, Capital Replacement Committee, Toronto, Canada.

2009 - 2013  **Leader**, Radiation Oncology Genitourinary (GU) Site Group, Toronto, Canada.

**Sunnybrook Health Sciences Centre**

2014 - present  **Member**, Research Ethics Board, Toronto, Ontario, Canada.

**University of Toronto**

2011 - 2013  **Member**, Radiation Oncology Postgraduate Education Committee, Radiation Oncology Residency Program, Faculty of Medicine, Dept of Radiation Oncology, Postgraduate MD, Toronto, Canada.

2011 - 2012  **Associate Director**, Postgraduate Education, Radiation Oncology Residency Program, Faculty of Medicine, Dept of Radiation Oncology, Postgraduate MD, Toronto, Canada.

C. Academic Profile

1. RESEARCH STATEMENTS

2001 Jan - present  Research Statement.
My research has focused on optimizing high precision radiotherapy techniques to deliver hypofractionated/stereotactic radiotherapy, and then evaluating such treatment strategies in phase I/II clinical trials in lung and prostate cancers. More recently, these themes have continued with exploring the use of hypofractionated/stereotactic radiotherapy in patients with oligometastases and oligo-progression.

2. TEACHING PHILOSOPHY

My teaching philosophy can be summarized by the following statements: I believe that a successful teacher is one who 1) can teach without intimidation, 2) can make the topic interesting so the student will WANT to learn on their own, 3) can praise and criticize a student’s performance in a constructive and neutral manner, and 4) can be a mentor and friend at the same time.

I believe that most students are very receptive to such an approach, as demonstrated by the teaching awards I have been fortunate enough to receive. It has been gratifying to see previous residents and fellows of mine becoming successful staff Radiation Oncologists in various parts of the world.
3. CREATIVE PROFESSIONAL ACTIVITIES STATEMENT

My work in the last decade has resulted in 3 major themes for creative professional activities. All fall under the category of professional innovation/creative excellence. Starting from the most recent, they are:

Theme 1: Treatment of Oligometastases and Oligo-Progression

Theme 2: Accelerated Hypofractionated and Stereotactic Body Radiotherapy for Lung Cancer.

Theme 3: High Precision Radiotherapy and Hypofractionation/Stereotactic Body Radiotherapy for Prostate Cancer.

D. Research Funding

1. GRANTS, CONTRACTS AND CLINICAL TRIALS

PEER-REVIEWED GRANTS

FUNDED

2016 Sep - 2017 Sep  Principal Investigator. Randomized Feasibility Trial of Prostate Radiotherapy vs Prostatectomy in Men with Hormone Sensitive Oligometastatic Prostate Cancer. Abbvie ACURA Uro-Oncologic Radiation Award. Collaborator(s): Robert Nam, Lawrence Klotz, Raj Satkunasivam, D. Andrew Loblaw. 29,500 CAD. [Grants]

2016 Jan - 2019 Dec  Principal Investigator. BR.35 “A Randomized Phase II Study of Precision Radiotherapy for Oligometastatic Non-Small Cell Lung Cancer”. Canadian Cancer Trials Group (CCTG). 266,000 CAD. [Clinical Trials]

2015 Sep - 2016 Sep  Principal Investigator. Phase I Trial of SBRT with Radium-223 for Patients with Oligometastatic Castration Resistant Prostate Cancer with Bone Only Metastases. Abbvie ACURA Uro-Oncologic Radiation Award. Collaborator(s): Hany Soliman, Urban Emmenegger, Scott Berry, D. Andrew Loblaw. 29,500 CAD. [Grants]

2011 Jan - 2011 Dec **Co-Investigator.** Nomogram Predicting the 7-Year Biochemical Disease Free Survival After External Beam Radiation Therapy (EBRT) and androgen deprivation therapy (ADT) for High Risk Prostate Cancer Patients. Canadian Radiation Oncology Foundation/Sanofi-Aventis Research Innovation Award (CASARIA). PI: D’Souza, Neil and Loblaw, D. Andrew. Collaborator(s): Patrick Cheung, Michael Kattan. 12,000 CAD. [Grants]

2006 Jan - 2006 May **Principal Investigator.** BR.25 “Accelerated Hypofractionated 3-Dimensional Conformal Radiotherapy (3D-CRT) For Inoperable Stage I/II Non-Small Cell Lung Cancer (NSCLC)”. National Cancer Institute of Canada Clinical Trials Group. Collaborator(s): Islam Mohamed, Dorianne Rheaume, Frances Shepherd, Jim Wright, Yee Ung. 280,000 CAD. [Clinical Trials]

2001 Jan - 2001 Dec **Principal Investigator.** Prospective Assessment Of Radiation Induced Lung Injury: A Feasibility Study For A Normal Tissue Toxicity Database. Toronto-Sunnybrook Regional Cancer Centre. Radiation Program Fund. Collaborator(s): Eileen Rakovitch, John Kim, May Tsao, Kathy Mah, Yee Ung, Katharina Sixel, D. Andrew Loblaw, Lawrence Paszat. 16,541 CAD. [Grants]

**NON-PEER-REVIEWED GRANTS**

**FUNDED**

2015 Dec - 2018 Dec **Co-Principal Investigator.** Stereotactic Ablative Radiotherapy for Oligoprogressive Metastatic Castration-Resistant Prostate Cancer During Abiraterone Therapy. Janssen Biotech Investigator Initiated Grant. PI: Emmenegger, Urban; **Cheung, Patrick.** Collaborator(s): Katherine Zukotynski. 240,000 CAD. [Industrial Grants]

2015 Jan - 2017 Dec **Principal Investigator.** Comprehensive Stereotactic Radiotherapy for Oligometastatic Prostate Cancer: A Phase I/II Study. Abbvie Investigator Initiated Grant. Collaborator(s): Peter Chung, Andrew Loblaw, Arjun Sahgal, Robert Bristow. 246,855 CAD. [Industrial Grants]

2014 - 2017 **Co-Principal Investigator.** Stereotactic Radiotherapy for Oligo-Progression in Kidney Cancer Patients on 1st Line Sunitinib Therapy: A Phase II Study. Pfizer Investigator Initiated Grant. PI: **Cheung, Patrick; Bjarnason, Georg.** Collaborator(s): Arjun Sahgal, William Chu, Daniel Heng. 551,261 CAD. [Industrial Grants]
E. Publications

1. MOST SIGNIFICANT PUBLICATIONS

   This is one of the few comparisons between accelerated hypofractionation and stereotactic ablative radiotherapy (SABR) for early stage NSCLC using a propensity score matched analysis. It confirms that SABR has superior loco-regional control. Overall survival is also superior in the SABR arm, most likely due to non-treatment factors.

This is the first published report of a prospective national phase 2 study evaluating the efficacy of an accelerated hypofractionated radiotherapy regimen for early stage non-small cell lung cancer. It serves as a benchmark representing “conventional radiotherapy” to compare to newer stereotactic approaches.

This was the first prospective randomized study to suggest that acute toxicity and quality of life may be worsened when delivering SBRT for lung tumours on 4 consecutive days compared to over 11 days.

This study reported on ~230 patients with high risk prostate cancer treated with a concomitant hypofractionated boost (simultaneous integrated boost) on 3 consecutive prospective trials. This particular manuscript focused on the effect of IMRT and bladder filling on acute toxicity and is one of the first prospective studies to show a benefit for IMRT over a 4 field box technique for elective pelvic nodal irradiation.

This was the first published report documenting the acute and late toxicities of a 5 week course of accelerated radiotherapy for localized high risk prostate cancer. This novel treatment regimen delivered a concomitant hypofractionated boost along with conventional elective pelvic nodal irradiation, and this study confirmed that it is a safe approach with toxicities that were comparable to more conventional courses of radiotherapy delivered over 7-8 weeks.

This study was one of the first to study the concept of small patient specific PTV margins for prostate cancer. It has become one my highest cited publications and the technical data has formed the basis of several hypofractionated/SBRT studies conducted at the Sunnybrook Odette Cancer Centre in the last few years.

Postgraduate MD

2016 Jan - 2016 Jun  **Primary Supervisor.** Clinical Fellow. Pablo Munoz S. *SBRT for Metastatic Prostate Cancer.*

2015 Jul - 2015 Dec  **Primary Supervisor.** Clinical Fellow. Tomas Merino. *SBRT for Oligometastatic and Oligoprogressive NSCLC.*

H. Creative Professional Activities

1. PROFESSIONAL INNOVATION AND CREATIVE EXCELLENCE

2011 - present  Treatment of Oligometastases and Oligo-progression.
A phase 1 study studying the use of SBRT to treat up to 5 sites of metastatic tumours has
just completed accrual at OCC recently. Almost all solid cancers were eligible. The data
will be analyzed in late 2014 and early results should be ready for presentation in 2015. I
was successful in obtaining an investigator initiated industry grant to study the use of SBRT
to treat hormone sensitive oligometastatic prostate cancer as a collaborative effort with
colleagues at Princess Margaret Cancer Centre. Another recent successful initiative was
obtaining another investigator initiated industry grant to study the use of SBRT for oligo-
progression in metastatic kidney cancer as a multi-institution Canadian phase II trial. A
review of the Sunnybrook experience in treating pulmonary oligometastases and oligo-
progression with SBRT is underway.
The role of radiotherapy in the management of oligometastases/oligo-progression is a topic
of interest for the whole Radiation Oncology specialty and is a priority for the Department of
Radiation Oncology at the University of Toronto. In the last 2 years, I have been invited to
speak about the role of radiotherapy in the management of oligometastatic cancers at
various venues locally, provincially, and nationally. In 2014, 2 large grants have been awarded to me to study this topic for prostate and kidney cancers and multi-institutional clinical trials are underway.

2002 - present

High Precision Radiotherapy and Hypofractionation/Stereotactic Body Radiotherapy for Prostate Cancer.

PTV Margin Optimization for Prostate Cancer:
In 2002, I was awarded my first peer reviewed grant to start a clinical and technical phase I study which measured patient specific intra-fraction prostate motion and used small patient specific PTV margins to deliver a hypofractionated external beam boost using daily image guidance for low and intermediate risk prostate cancer. Patients were treated with conventional fractionation for the first 4.5 weeks (42 Gy in 22 fractions) where pre- and post-treatment EPID images were performed to measure patient specific intrafraction prostate motion. After this, a hypofractionated boost of 30 Gy in 10 fractions was delivered using patient specific intra-fraction PTV which was calculated from each patient's intrafraction prostate motion data from the first phase of treatment.

Concomitant Hypofractionated IMRT Boost (Simultaneous Integrated Boost) for High Risk Prostate Cancer:
In 2003, I received a NCIC Prostate Cancer Research Initiative IDEA grant to study the delivery of a concomitant hypofractionated boost of 67.5 Gy in 25 fractions, while the pelvic lymph nodes received 45 Gy in 25 fractions at the same time as a more time efficient method to deliver a radical external beam radiotherapy to the prostate which explored hypofractionation and elective pelvic nodal irradiation at the same time for high risk prostate cancer. All patients received long term (2-3 years) of adjuvant androgen deprivation therapy. After the initial pilot project, more peer reviewed and industry grants were obtained to study this as part of a much larger phase II project of ~ 230 patients. Acute/late toxicities, and quality of life outcomes have been published, and the mature 5 year efficacy results has been reported at the 2013 CARO/ASTRO meetings as oral presentations (reviewer’s choice at CARO). One unique aspect of this study is that 5 year post radiotherapy prostate biopsies were performed to check for pathologic local failure.

SBRT to Mimic HDR Brachytherapy Boost for Prostate Cancer:
In 2009, I received a peer reviewed grant to conduct a phase I study of using SBRT to deliver a single fraction of 10-15 Gy to mimic HDR brachytherapy for intermediate risk prostate cancer. All patients received mildly hypofractionated external beam radiotherapy as well to a dose of 37.5 Gy in 15 fractions. This novel study employed a host of high precision techniques for the delivery of the single 10-15 Gy fraction: catheterization to control bladder volume, intra-rectal balloon for prostate immobilization, MRI/CT contouring, cine MRI to measure patient specific intrafraction motion, and use of patient specific PTV margins for the SBRT delivery, which continues the theme of small patient specific treatment margins from my first prostate IMRT project from 2002. This study has just completed accrual and acute toxicity results will be analyzed at the end of 2014.

PTV Margin Optimization for Prostate Cancer:
With the technical data gathered from this first IMRT project, small 4-5 mm population based intra-fraction PTV became the basis of all future hypofractionated/stereotactic radiotherapy studies for prostate cancer that employ daily image guidance with implanted fiducial markers at OCC. The 2005 publication about patient specific PTV margins is one of the highest cited references I have. Since 2007, I have been an invited lecturer regularly at the biannual GU Radiation Oncologists of Canada meeting to speak about various aspects of high precision radiotherapy for prostate cancer.

Concomitant Hypofractionated IMRT Boost (Simultaneous Integrated Boost):
The favourable toxicity/QoL results from these published studies have led to current randomized phase II studies being conducted at OCC, the Cross Cancer Institute, and a multi-centre phase III study in Quebec which compares the SIB approach pioneered at OCC to conventional fractionation for high risk prostate cancer. A recent publication from this
population of ~230 patients is the largest prospective study to demonstrate the value of IMRT and a full bladder to reduce acute toxicity during elective nodal irradiation for high risk prostate cancer patients. Long term results from this study will be analyzed in 2015.

SBRT to Mimic HDR Brachytherapy Boost for Prostate Cancer:
If the acute and late toxicity results are favourable, then larger studies of this approach may be started in the future. This will be the first study to tackle the question of whether a brachytherapy like dose of 10-15 Gy in 1 fraction can be safely delivered with external beam radiotherapy. The data gathered from the technical side of the study has already informed how OCC will technically approach the next generation of SBRT studies for prostate cancer with regards to immobilization and PTV margins.

2002 - present

Accelerated Hypofractionated and Stereotactic Body Radiotherapy for Lung Cancer.

Accelerated Hypofractionation for Early Stage Lung Cancer:
Since 1996, an accelerated hypofractionated radiotherapy schedule (48-52 Gy in 12-13 fractions) has been delivered for peripherally located early stage NSCLC at the Sunnybrook Odette Cancer Centre (OCC). This was relatively unique in the world, and I published on the results of this approach in 2002. In 2011, the long term results of such an approach were published. Based on this experience, a prospective multi-institutional phase II study was initiated in 2006 through the NCIC Clinical Trials Group which evaluated the use of 3DCRT to deliver a dose of 60 Gy in 15 fractions for stage I NSCLC. The results of this trial were presented at the 2012 CARO/ASTRO/Chicago Thoracic Symposium meetings and the manuscript has been published in 2014 in JNCI.

Stereotactic Body Radiotherapy for early stage Lung Cancer:
In 2008, I spearheaded a lung SBRT program at OCC, and it has become one of the largest SBRT centres in Canada. Early technical studies (including a randomized trial comparing 2 immobilization devices) have been published that justifies our techniques. In addition, a randomized pilot study was performed comparing delivering lung SBRT over 4 days vs 11 days. The results from this study were presented at the 2012 CARO/ASTRO/Chicago Thoracic Symposium meetings, and the manuscript was published in 2013. In the 2013 CARO/ASTRO meetings, the medium term efficacy outcomes of the OCC lung SBRT program (~250 patients treated from 2008-2011) were presented. Manuscripts about predictors of local control and chest wall toxicity have been published in 2014 and 2015, respectively. In 2014, the efficacy outcomes from the historical accelerated hypofractionated approach (1996-2008) have been compared to the modern SBRT era (2008-2011) for early stage NSCLC and were presented at the 2014 CARO/ASTRO meetings, with a manuscript submitted for publication in 2015.

Accelerated Hypofractionation for Early Stage Lung Cancer:
Even before the results of the NCIC-CTG trial were presented in 2012, many Canadian centres adopted the 60 Gy in 15 fraction fractionation scheme, based on the previous published OCC experience and their own experience when treating patients on the NCIC-CTG trial. The favourable results from the NCIC-CTG trial suggest that this approach may be an excellent alternative to SBRT in centres who do not have SBRT capability. This trial has also led to success in obtaining a Canadian Cancer Society Research Institute Impact Grant to conduct a multi-centre phase III study comparing 60 Gy in 15 fractions to SBRT in Canada.

Stereotactic Body Radiotherapy for Early Stage Lung Cancer:
Since 2010, I have supervised 5 Radiation Oncology fellows at OCC to gain clinical and research experience with lung SBRT and management of oligometastases. The high volume of SBRT treatments ensure a rich experience for those wishing to learn about this technique. The 4 vs 11 day randomized study revealed that SBRT delivered over 4 days was more acutely toxic compared to the 11 days, and is the first prospective study in the world to demonstrate a clinical effect due to overall treatment time for SBRT. In 2010, several technical and clinical publications were produced from our large lung SBRT experience. Since 2009, I have been invited to speak at various venues locally, provincially,
and nationally about lung SBRT.
CURRICULUM VITAE

Name: Charles Cho

Business Address: Radiation Medicine Program
Stronach Regional Cancer Centre at Southlake Regional Health Centre
596 Davis Drive
Newmarket, Ontario
L3Y 2P9

Telephone: 905-895-4521 ext. 6595
Fax: 905-952-2818
E-Mail: ccho@southlakeregional.org

Education

University Education:

1992-1996 Bachelor of Science (Honours Physiology)
University of Alberta, Edmonton, Alberta
Graduated with First Class Honours

1996-1999 Master of Science, Department of Physiology Banting and Best Institute
University of Toronto, Toronto, Ontario
Thesis: The Role of Oxidative Stress in Two Models of Insulin Resistance Within Primary Adipocytes

Post Graduate and Medical Training:

1999-2003 Doctor of Medicine
Queen’s University, Kingston, Ontario

2003-2008 Fellow of the Royal College of Physicians of Canada
Postgraduate Medical Training: Radiation Oncology
University of Toronto, Toronto, Ontario

2008-2009 Clinical Research Fellow: Radiation Oncology
Princess Margaret Hospital, University of Toronto, Toronto, Ontario

Biographical Information

Hospital/Staff Appointments:

2009-Present Active Staff, Radiation Oncology
Stronach Regional Cancer Centre (SRCC)
Southlake Regional Health Centre, Newmarket, Ontario, Canada

Active Staff, Radiation Oncology
The Princess Margaret Cancer Centre, Toronto, Ontario, Canada
Professional Affiliations:

- Canadian Medical Association
- Ontario Medical Association
- Canadian Association of Radiation Oncology
- American Society for Therapeutic Radiology and Oncology

Licensures:

- College of Physicians and Surgeons of Ontario (Canada)

Administration and Committee Appointments:

- Colorectal Cancer Pathway Working Group Member (2015-present)
- Cancer Care Ontario Program for Evidence Based Care: Gastrointestinal Disease Site Group (2011-Present)
- Southlake External Beam Process Committee (2009-Present)
- Postgraduate Medical Education Committee, Resident Representative (2007)
- MD admissions and interview committee (2000, 2001)

Current Clinical Studies

2011-present  Survey of Anti-cancer and non Anti-cancer Drug cost and Adherence: multicentre study between UHN, St Michaels Hospital, and SRHC

1. EDUCATION

Degrees

2002 Sep - 2007 Jun PhD, Institute of Medical Science, University of Toronto, Canada, Supervisor(s): Prof. Ian Tannock
1999 Jul - 2001 Jun MSc, Clinical Epidemiology, Health Policy, Management and Evaluation, University of Toronto, Canada, Supervisor(s): Prof. Ian Tannock
1983 - 1988 Bachelor of Medicine and Bachelor of Surgery (MBBS), University of Hong Kong

Postgraduate, Research and Specialty Training

1997 Dec - 1998 Jun Fellow, Radiation Oncology Program, St. Jude Children’s Research Hospital, United States
1997 Aug - 1997 Nov Fellow, Radiation Oncology Program, McMaster University, Canada
1994 Jul - 1997 Jun Resident, Radiation Oncology Program, Princess Margaret Hospital, University of Toronto, Canada
1993 Jan - 1993 Jun Resident, Core Internal Medicine Program, University of Toronto, Canada
1992 Jan - 1992 Dec Rotating Intern, Pasqua Hospital, University of Saskatchewan, Canada
1991 Jul - 1991 Dec Resident, Core Internal Medicine Program, University of Toronto, Canada
1991 Jun Clinical Fellow, Bone Marrow Transplant Team, Health Science Centre, University of Manitoba, Canada
1990 Oct - 1991 May Clinical Fellow, Addiction Research Foundation, University of Toronto, Canada
1990 Feb - 1990 Jul Senior House Officer, Accident and Emergency Department, Dudley Road Hospital, University of Birmingham, United Kingdom
1989 Feb - 1990 Jan Intern, Medicine and Surgery, Dudley Road Hospital, University of Birmingham, United Kingdom
1989 Jan Intern, Internal Medicine, Nethersole Hospital, University of Hong Kong, Hong Kong
Qualifications, Certifications and Licenses

1999 May  DABR, United States
1997 Jun  FRCP, Royal College of Physicians and Surgeons of Canada, Canada
1994 Jun  ECFMG, United States
1992 Jun  FLEX, United States
1991 May  LMCC, Medical Council of Canada, Canada
1990 Mar  MCCEE, Canada

2. EMPLOYMENT

Current Appointments

2010 - present  Associate Member, Institute of Medical Science, University of Toronto, Canada
2010 - present  Senior Scientist, Sunnybrook Research Institute, Canada
2009 - present  Professor, Radiation Oncology, University of Toronto, Canada
1998 - present  Active Staff, Department of Radiation Oncology, Odette Cancer Centre, Sunnybrook Health Sciences Centre, Canada

Previous Appointments

HOSPITAL
1998 Oct  Consultant, Department of Radiation Oncology, St. Jude Children's Research Hospital, United States
1993 Jul - 1994 Jun  Clinical Associate, Department of Radiation Oncology, Princess Margaret Hospital, Canada

RESEARCH
2004 - 2009  Scientist, Sunnybrook Research Institute, Canada

UNIVERSITY - RANK
2004 - 2009  Associate Professor, Radiation Oncology, University of Toronto, Canada
1998 - 2004  Assistant Professor, Radiation Oncology, University of Toronto, Canada

3. HONOURS AND CAREER AWARDS

Distinctions and Research Awards

INTERNATIONAL
Received
1999 Aug  Travel Award, ASCO/AACR. (Research Award)

NATIONAL
Received
2015  Canadian Cancer Society's Top 10 Research Impact Stories of 2015, Canadian Cancer Society. (Research Award)

2013  
CARO Supportive Care Award, Canadian Association of Radiation Oncology. (Distinction)

2008  
Quality Award to Rapid Response Radiotherapy Program by Cancer Care Ontario, Cancer Quality Council of Ontario and Canadian Cancer Society, Canada. (Distinction)

PROVINCIAL / REGIONAL

Received

2010  
Outstanding Leadership Award, Ontario Palliative Care Association, Canada. (Distinction)

2008  
Co-op Student of the Year Employer Award, Education at Work Ontario, Canada. (Distinction)

2006  
Co-op Student of the Year Employer Award, Education at Work Ontario, Canada. (Distinction)

1997  
Fellowship Award, Geoffrey H. Wood Foundation, Canada. (Research Award)  
Total Amount: 50,000 CAD

LOCAL

Received

2015  
Best Annual Research Performance, University of Toronto, Department of Radiation Oncology AGM. (Research Award)

2013  
Sustained Excellence in Research Award, University of Toronto. (Research Award)

2010  
Best Annual Research Performance Award, Department of Radiation Oncology, University of Toronto, Canada. (Research Award)

2008  
Cummings Education Leadership Award, Department of Radiation Oncology, University of Toronto, Canada. (Distinction)

2008  
Excellence in Research Leadership, Department of Radiation Oncology, University of Toronto, Canada. (Distinction)

2004  
Best Annual Research Performance Award, Department of Radiation Oncology, University of Toronto, Canada. (Research Award)

2001 - 2005  
Dr. Marion Hilliard Trust Fund, Sunnybrook and Women’s College Health Sciences Centre, Canada. (Research Award)

2001  
Second Prize, MSc Clinical Epidemiology Poster Competition, University of Toronto, Department of Health Administration, Toronto, Ontario, Canada. (Research Award)

2000  
Open Fellowship Award in Department of Health Administration, Faculty of Medicine, University of Toronto, Canada. (Research Award)

1996  
PGY4 Radiation Oncology Resident Research Award, University of Toronto, Canada. (Research Award)  
“Enhanced Control By Radiotherapy Of Cervical Lymph Node Metastases Arising From Nasopharyngeal Carcinoma Compared With Nodal Metastases From Other Head And Neck Squamous Cell Carcinomas”.

1986  
Best Award in Community Medicine Research Project, University of Hong Kong, Hong Kong. (Research Award)  
“Care of Patients in End Stage Renal Failure”.

1. RESEARCH STATEMENTS

Palliative radiotherapy in the treatment of bone metastases.
Development of quality of life instruments in advanced cancer.
End-of-life care including survival prediction and symptom cluster research.

D. Research Funding

1. GRANTS, CONTRACTS AND CLINICAL TRIALS

PEER-REVIEWED GRANTS

FUNDDED
2015 - 2017

2015 - 2017 Jul

2010

2010

**Principal Investigator.** Development of a Canadian-led international bone metastases module to accompany European Organization for Research and Treatment of Cancer Quality of Life Group Core Questionnaire (the EORTC QLQ-C30) for future clinical trials in patients with bone metastases. Phase IV study. EORTC. Quality of Life Group Grant. 74,000 EUR. [Grants]

2009 - 2012

2009

2007

**Principal Investigator.** Development of a Canadian-led international bone metastases module to accompany European Organization for Research and Treatment of Cancer Quality of Life Group Core Questionnaire (the EORTC QLQ-C30) for future clinical trials in patients with bone metastases. Translation of non-English speaking languages for international validation. EORTC. Quality of Life Group Grant. 3,030 EUR. [Grants]

2006

2005 - 2008

2004 - 2007

**Principal Investigator.** Validation of a predictive model for survival in metastatic cancer patients attending an outpatient palliative radiotherapy clinic. Canadian Institutes of Health Research (CIHR). Collaborator(s): Panzarella T, Bezjak A, and Wu J. 180,192 CAD. [Grants]

2003 - 2006

2003 - 2006  

2001  
**Principal Investigator.** Determination of the patient expectation of a clinically relevant partial response as achieved with palliative external beam radiotherapy for bone metastases. University of Toronto. Dean’s Fund Competition for New Staff Grants. Collaborator(s): Hruby G, and Danjoux C. 10,000 CAD. [Grants]

2000  

2000  

1999  

**NON-PEER-REVIEWED GRANTS**

**FUNDED**

2015 - present  

2013 Jul - 2014 Jun  

2002  
**Principal Investigator.** Prospective validation of a predictive model for survival in metastatic cancer patients attending an outpatient palliative radiotherapy clinic. Toronto Sunnybrook Regional Cancer Centre. Radiation Program Fund. 8,000 CAD. [Grants]

2002  
**Co-Investigator.** Quality of life in patients with brain metastases treated with a palliative course of radiotherapy. Toronto Sunnybrook Regional Cancer Centre. Radiation Program Fund. Collaborator(s): Tsao MN, **Chow E**, and Chan G. 10,350 CAD. [Grants]

1998  
1998

**Study Chair.** International randomized trial of single versus multiple fractions for re-irradiation of painful bony metastases. National Cancer Institute of Canada (NCIC). Collaborator(s): Hoskin P, Wu J, Roos D, Hartsell W, and van der Linden Y. [Clinical Trials] Clinical Trials Group Study (SC 20) in collaboration with TROG, RTOG, UK, French and Dutch Bone Metastases Study Group. Target accrual of 850 patients with per case funding $3500.

**Study Chair.** A randomized phase III double blind study of dexamethasone versus placebo in the prophylaxis of radiation-induced pain flare following palliative radiotherapy for bone metastases. National Cancer Institute of Canada (NCIC). [Clinical Trials] Clinical Trials Group Study (SC 23) in collaboration with TROG. Target accrual of 256 patients with per case funding $3500.

**Study Chair.** Assessing the quality of life in cancer patients receiving palliative radiotherapy for symptomatic lung cancer or lung metastases using the European Organization for Research and Treatment of Lung Cancer Module (EORTC QLQ- LC13). [Clinical Trials]

**Study Chair.** Assessing the quality of life in patients with bone metastases using the European Organization for Research and Treatment of Cancer Bone Metastases Module (EORTC QLQ- BM22). [Clinical Trials]

**Study Chair.** Prospective analysis of antiemetic medication prescribed for radiation induced emesis for patients in the Rapid Response Radiotherapy Program. [Clinical Trials]

**Study Chair.** Assessing the quality of life in patients with brain metastases using the European Organization for Research and Treatment of Cancer Brain Module (EORTC QLQ- BN20). [Clinical Trials]

**Study Chair.** Validation of the brain module to accompany European organization for research and treatment of cancer quality of life group core questionnaire (the EORTC QLQ-C30) for future clinical trials in patients with brain metastases. [Clinical Trials]

**Study Chair.** Multi-Lingual validation of the EORTC QLQ-BM22. [Clinical Trials]

**Study Chair.** Examining urinary markers for dexamethasone metabolism, inflammatory cytokines and bone marker turnover following the dexamethasone prophylaxis of pain flare. [Clinical Trials]

**Study Chair.** Dexamethasone for the prophylaxis of radiation-induced pain flare following palliative radiotherapy for bone metastases - A Phase II study. [Clinical Trials]
Study Chair. Examining urinary markers of pain flare in patients undergoing external beam radiotherapy in the treatment of bone metastases. [Clinical Trials]

Study Chair. Examining the incidence of pain flare following external beam radiotherapy in the treatment of bone metastases. [Clinical Trials]

Study Chair. Shortening the European Organization for Research and Treatment of Cancer Bone Metastases Module (EORTC QLQ-BM22). [Clinical Trials]

Study Chair. A prospective cohort study of androgen independent prostate cancer patients receiving Zoledronic Acid. [Clinical Trials]

Study Chair. A Phase II study of early integration of Zoledronic Acid with radiotherapy to bone in the treatment of painful bone metastases in prostate cancer. [Clinical Trials]

E. Publications

1. MOST SIGNIFICANT PUBLICATIONS

Accurate survival prediction is difficult, but important, in medical decision-making. A predictive model for survival in metastatic cancer patients attending an outpatient palliative radiotherapy clinic was developed using simple clinical prognostic factors. We have successfully validated the simpler model in an independent series of patients. This model can be used to guide clinical decisions, plan supportive services and allocate resource use. This manuscript has been selected to be accompanied by an editorial.

Optimal dose fractionation in the treatment of bone metastases remains controversial. This was a meta-analysis of all published randomized radiation trials in bone metastases, and provides evidence that single fraction radiation therapy results in the same degree of pain relief in uncomplicated bone metastases when compared with multiple treatments.

We are one of the first centers reporting that pain flare is common following external beam radiotherapy for bone metastases. This is the first publication that describes the potential role of dexamethasone as a prophylaxis for radiation-induced pain flare. Data from this study led to a randomized study sponsored by National Cancer Institute of Canada Clinical Trials Group (PI Edward Chow) that has been approved to open in 2009. International trial groups such as RTOG and TROG have expressed interest to join.

Symptom cluster research is in its infancy. We have published several papers in this area on bone metastases and brain metastases. Here we identified symptom clusters at baseline, and we also followed their interactions after the administration of palliative radiotherapy. This publication was accompanied by an editorial commenting the merits of the research. This work has also led to an ongoing effort by RTOG to repeat the same research in their randomized trial on bone metastases.

This is the first published paper examining the accuracy of survival prediction by palliative radiation oncologists. Most of the survival estimates are far from accurate, often in the overly optimistic direction. The paper recommends clinicians should employ validated predictive models to formulate the length of survival.

2007 Jun  Bone metastases module. Faculty of Medicine. Showa University School of Medicine and Ritsumeikan University. Tokyo and Shiga, Japan.

2007 Apr  Bone metastases module. Zenith Meeting. Prague, Czech Republic.

2007 Mar  Bone metastases research. Department of Radiation Oncology, Mount Vernon Hospital. Middlesex, United Kingdom.
Edward L.W. CHOW

2006 Aug  Bone metastases research. Department of Radiation Oncology, Sydney Cancer Centre/Royal Prince Alfred Hospital, University of Sydney. Sydney, Australia.

2006 Aug  Bone metastases research. Department of Clinical Oncology, Prince of Wales Hospital, The Chinese University of Hong Kong. Hong Kong, China.

2006 Aug  Bone metastases research. Department of Clinical Oncology, Queen Mary Hospital, The University of Hong Kong. Hong Kong, China.

2006 Aug  Modern management of bone metastases. Breakfast session. Medical Oncology Group of Australia/Faculty of Radiation Oncology Annual Scientific Meeting. Queensland, Australia.

2006 May  Bone metastases module. EORTC Quality of Life Group Spring meeting. Paris, France.

2005 Mar  Pain and structural effects of external beam radiotherapy. Fifth International Conference on Cancer-Induced Bone Disease (CIBD). Davos, Switzerland.

2002 Jun  International consensus on palliative radiotherapy endpoints for future clinical trials in bone metastases. 18th UICC International Cancer Congress. Oslo, Norway.

Presented Abstracts

2011 Jun  Update on the systematic review in palliative radiotherapy trials for bone metastases. MASCC/ISOO 23rd International Symposium Supportive Care in Cancer. Toronto, Ontario, Canada.

2004 Jun  Prospective assessment of quality of life following whole brain radiotherapy for brain metastases. MASCC/ISOO 16th International Symposium Supportive Care in Cancer. Miami Beach, Florida.

2002 Jun  A predictive model for survival in metastatic cancer patients attending an outpatient palliative radiotherapy clinic. 18th UICC International Cancer Congress. Oslo, Norway.

1999 Nov  Palliation of bone metastases: a survey of patterns of practice in Canada. 6th Hong Kong International Cancer Care Conference. Hong Kong.

1998 Oct  Radiotherapy for unresectable or marginally resectable osteosarcoma. The European Cancer Conference. Vienna, Austria.

1999 Sep  Palliation of bone metastases: a survey of patterns of practice in Canada. 6th Hong Kong International Cancer Care Conference. Hong Kong.

Invited Lectures and Presentations

2005 Sep  Palliative care round on latest advances in the endocrine treatment of breast cancer. Scarborough Community Care Access Centre.

2005 Sep  Introduction to radiation therapy with a focus on palliative radiation. The Royal Victoria Hospital of Barrie.

2005 Apr  To know or not to know - that is the question. 15th Annual Ontario Provincial Conference on Palliative and End-of-Life Care. Toronto, Ontario.

2004 Sep  Palliative care round on management of bone metastases. Scarborough Community Care Access Centre.

Edward L.W. CHOW

2003 Mar  Survival prediction – how important is it and how good are we? 13th Annual Hospice Palliative Care Conference. Toronto, Ontario.

2002 Jan  Survival prediction: how important is it and how good are we? Grand Round, Scarborough General Hospital. Scarborough, Ontario.

Presented Abstracts

2011 Apr  Update of the international consensus on palliative radiotherapy endpoints for bone metastases. 2011 Annual Hospice Palliative Care Conference. Toronto.

2010 Apr  Radiation treatment of bone metastases----biased or evidence based. 2010 Annual Hospice Palliative Care Conference. Toronto.

2010 Apr  Radiation treatment of bone metastases----biased or evidence based. 2010 Annual Hospice Palliative Care Conference. Toronto.

2009 Apr  Determining the accuracy of health care professionals in predicting the survival of patients with advanced metastatic cancer. 2009 Annual Hospice Palliative Care Conference. Toronto.

2009 Apr  Validation of meaningful change in pain scores in the treatment of bone metastases. 2009 Annual Hospice Palliative Care Conference. Toronto.

2001 Apr  How accurate are physicians’ clinical prediction of survival and the available prognostic tools in estimating survival times of terminally ill cancer patients - a systematic review. Palliative Care 11th Annual Conference. Toronto, Ontario.

1999 Apr  New combined bone metastases clinic: the ultimate one stop for cancer patients with bony metastases. The annual Palliative Care Conference. Toronto, Ontario.

C. Academic Profile

1. RESEARCH STATEMENTS

Advanced Imaging and Radiation Therapy.
My research focuses on novel functional MRI and ultrasound technologies to interrogate carcinogenesis and monitor radiotherapeutic response, the integration of advanced imaging technologies into radiation treatment planning and delivery, and innovative ablative treatment strategies. My clinical focus is on genitourinary and gastrointestinal malignancies.

D. Research Funding

1. GRANTS, CONTRACTS AND CLINICAL TRIALS

PEER-REVIEWED GRANTS

Funded

Stereotactic body radiotherapy (SBRT) is an emerging radiation therapy technique that delivers high doses of radiation with very high precision to a small tumor target. It is a definitive treatment option for an increasing variety of primary tumors including the lung, liver and prostate. SBRT is now a standard treatment option at the Odette Cancer Centre (OCC) for patients with renal cell carcinoma (RCC) who are either ineligible for surgery or decide against it. The principal aim of this study is to prospectively assess quality of life and outcomes in patients who receive kidney SBRT.

A multi-centre phase II study conducted in Canada to look at the role of SBRT in delaying the need to change systemic therapy in patients who develop oligo-progression while on Sutent. In essence, it is exploring a new way of using radiotherapy in the management of metastatic cancer in conjunction with systemic therapy.

2012 - present **Co-Investigator.** A prospective cohort study of radiotherapy-induced nausea and vomiting (RINV) among patients with gastrointestinal cancers. Sunnybrook Odette Cancer Centre. Rapid Response Radiotherapy Program. REB #069-2012. PI: Chung HT. Collaborator(s): DeAngelis C, Dennis K, Chow E, Chu W, Davey P. [Clinical Trials]

G. Creative Professional Activities

1. PROFESSIONAL INNOVATION AND CREATIVE EXCELLENCE

Development and Implementation of MR-Guided Focused Ultrasound for Recurrent Rectal CA.
Principal Investigator (First-in-human trial).

The PACE Trial - International Randomized Study of Laparoscopic Prostatectomy vs Stereotactic Body Radiotherapy (SBRT) and Conventionally Fractionated Radiotherapy vs SBRT for Early Stage Organconfined Prostate Cancer.
Principal Investigator (Canadian-lead).

Stereotactic Body Radiotherapy for Renal Cell Carcinoma.
Principal Investigator (National Prospective Trial).

Stereotactic Radiotherapy for Liver Tumours.
Co-Principal Investigator.
2. CONTRIBUTIONS TO THE DEVELOPMENT OF PROFESSIONAL PRACTICES

Development and Implementation of Unified UT DRO Anal Canal Cancer Treatment Protocol at OCC.

Development and Implementation of Renal Cell Cancer Stereotactic Treatment Protocol at OCC.

Qualifications, Certifications and Licenses
2008 Jun Fellow, Radiation Oncology, Royal College of Physicians and Surgeons of Canada
2005 - 2011 License, Ontario College of Physicians and Surgeons
2005 General Medical License, British Columbia
2004 Licentiate, Medical Council of Canada

2. EMPLOYMENT

Current Appointments
2015 Aug - present Clinician-Scientist (cross-appointment), Joint Division of Medical Imaging, University Health Network, Toronto, Ontario, Canada
2012 Sep - present Lead, Brain Metastasis Clinic, University Health Network - Princess Margaret Cancer Centre, Toronto, Ontario, Canada
2012 - present Clinician-Scientist, Ontario Association of Radiation Oncologists, Ontario, Canada
2011 Jul 1 - present Assistant Professor, Radiation Oncology, Faculty of Medicine, University of Toronto,
Previous Appointments

HOSPITAL
2011 - 2012 Radiation Oncologist, Radiation Oncology, Princess Margaret Hospital, University Health Network, Toronto, Ontario, Canada
2009 Jul 1 - 2010 Jun 30 Chief Fellow, Radiation Oncology, Radiation Oncology, University of Toronto, Princess Margaret Cancer Centre, Toronto, Ontario, Canada
2007 Jan 1 - 2008 Jan 1 Chief Resident, Radiation Oncology, Radiation Oncology, University of British Columbia, BC Cancer Agency, Vancouver, British Columbia, Canada

RESEARCH
2013 Aug - 2015 Apr Member, Ontario Cancer Research Ethics Board, Ontario, Canada

3. HONOURS AND CAREER AWARDS

Distinctions and Research Awards

INTERNATIONAL
Received
2015 Jan - 2015 Dec Marquis Who’s Who in the World. (Distinction)

For over 110 years, Marquis Who’s Who® has been the gold standard for biographical information, trusted by academic and public libraries. The 2015 32nd edition of Who’s Who in the World provides concise, accurate biographies of renowned individuals from around the world, representing virtually every major field of human endeavor.

2014 Jan - 2015 Dec Alliance for Clinical Trials in Oncology Alliance Scholar Award, Alliance for Clinical Trials in Oncology Foundation. (Research Award)
Total Amount: 88,000 USD

NATIONAL
Received
2007 Best Resident Poster Award, Canadian Association of Radiation Oncology. (Research Award)
2000 Summer Research Award in Medicine, Medical Research Council of Canada. (Research Award)

PROVINCIAL / REGIONAL
Received
2010 Jun Best Oral Presentation, The University of British Columbia, Vancouver, British Columbia, Canada. (Distinction, Specialty: Clinician Investigator Program)
2010 Scholarship, Government of Ontario. (Distinction)
2009 Jun Best Oral Presentation, The University of British Columbia, Vancouver, British Columbia, Canada. (Distinction, Specialty: Clinician Investigator Program)

LOCAL
Received
2015 Jun Research Productivity 2014/2015, Princess Margaret Cancer Centre - Radiation Medicine
Caroline CHUNG

Program, Toronto, Ontario, Canada. (Research Award, Specialty: Radiation Oncology)

2014 Jun  Chief’s Choice for 2014/2015, Princess Margaret Cancer Centre - Radiation Medicine Program, Toronto, Ontario, Canada. (Distinction, Specialty: Radiation Oncology)

2013 Sep  Outstanding Research Potential Award, University of Toronto, Toronto, Ontario, Canada. (Research Award, Specialty: Radiation Oncology)

2012 Jul  Postgraduate Medical Education Excellence in Research Supervision Award, University of Toronto, Toronto, Ontario, Canada. (Research Award, Specialty: Radiation Oncology)

2010 Oct  Department of Radiation Oncology Chair’s Award, University of Toronto, Toronto, Ontario, Canada. (Distinction)

2007  Barbara Allan Scholarship in Medicine, The University of British Columbia. (Distinction)

2006  Barbara Allan Scholarship in Medicine, The University of British Columbia. (Distinction)

2006  CanMeds Role Resident in Radiation Oncology Award, The University of British Columbia. (Distinction)

2005  Resident Research Day Oral Presentation Award, The University of British Columbia. (Distinction)

2003  Tommy Diespecker Memorial Medical Prize, The University of British Columbia. (Distinction)

2003  Victoria Herman Van Dine Scholarship in Medicine, The University of British Columbia. (Distinction)

2002  Louis Lipsey Toohill Scholarship, The University of British Columbia. (Distinction)

2001  Connie and Sam Carlin Scholarship, The University of British Columbia. (Distinction)

OTHER

Received

2007  Betty Rice Memorial Award for Lung Cancer Research, BC Cancer Agency, British Columbia, Canada. (Research Award)

Teaching and Education Awards

LOCAL

Received

2015  Chief’s Choice Award, Radiation Medicine Program, Dept. of Radiation Oncology, Faculty of Medicine, Princess Margaret Cancer Centre

Chief’s Choice for 2014/2015 Award: Mind over Matters.

2015  RMP Research Award, Radiation Medicine Program, Dept. of Radiation Oncology, Faculty of Medicine, Princess Margaret Cancer Centre

2014 Sep  Master of Health Science in Medical Radiation Sciences Best Guest Lecturer Award, Dept of Radiation Oncology, Faculty of Medicine, University of Toronto, Toronto, Ontario, Canada. (Postgraduate MD)

2013 Sep  Postgraduate Medical Education Excellence in Research Supervision Award, Dept of Radiation Oncology, Faculty of Medicine, Toronto, Ontario, Canada. (Postgraduate MD, Residents and Fellows, Specialty: Radiation Oncology)

2013 Jun  Best Academic Half-day Teaching Award, Dept of Radiation Oncology, Faculty of Medicine, Princess Margaret Cancer Centre, Toronto, Ontario, Canada. (Specialty: Radiation Oncology)

2012 Jun  Best Academic Half-Day Teaching, Dept of Radiation Oncology, Faculty of Medicine. (2012)
2012 Jun  **Best Teaching Activity**, Radiation Medicine Program, Dept of Radiation Oncology, Faculty of Medicine, Princess Margaret Cancer Centre. (Multilevel Education)

Nominated

2012 Jun  **Clinical Teaching Award**, Dept of Radiation Oncology, Faculty of Medicine, Radiation Medicine Program Princess Margaret Hospital

2012 Jun  **Professional Mentorship Award**, Dept of Radiation Oncology, Faculty of Medicine, Radiation Medicine Program Princess Margaret Hospital

**Student/Trainee Awards**

INTERNATIONAL

Received

2012 May  **Trainee Educational Stipend**, Awardee Name: Lee SL. International Society for Magnetic Resonance in Medicine, Australia

LOCAL

Received

2013 Jun  **Best Fellows’ Oral Presentation Award**, Radiation Oncology, primary supervisor, Awardee Name: Minh-Thi Tieu. Princess Margaret Cancer Centre, Toronto, Ontario, Canada

2012 Jun  **Best Resident Poster Award**, Radiation Oncology, primary supervisor, Awardee Name: Goldie Kurtz. Princess Margaret Hospital/University of Toronto, Toronto, Ontario, Canada

4. **PROFESSIONAL AFFILIATIONS AND ACTIVITIES**

**Professional Associations**

2014 Dec 8 - present  **Member**, Jumpstarting Brain Tumor Drug Development Coalition's Imaging Standardization Steering Committee

2014 Dec - present  **Member**, Radiological Society of North America

2014 Dec - present  **Lead - Research Subcommittee**, Society of Palliative Radiation Oncology (ASTRO)

2012 Nov - present  **Lead - Organs-at-risk Standardization Committee**, Gamma Knife Society

2012 Nov - present  **Member**, Society of Neuro-Oncology

2012 - present  **Member**, International Society of Radiosurgery

2012 - present  **Co-Director**, Women in Cancer

2011 - present  **Member**, Alliance for Clinical Trials in Oncology

2011 - present  **Member**, Flims Alumni Club

2011 - present  **Member**, Korean American Medical Association

2011 - present  **Member**, Korean American Society for Therapeutic Radiology and Oncology

2010 - present  **Member**, American Association for Cancer Research (AACR)

2010 - present  **Member**, American Society for Therapeutic Radiology and Oncology (ASTRO)

2010 - present  **Member**, Canadian Medical Association (CMA)

2010 - present  **Member**, International Society for Magnetic Resonance in Medicine (ISMRM)

2010 - present  **Member**, Ontario Medical Association (OMA)

2008 - present  **Member**, International Relations Working Group (CARO)
2010 - 2015 Apr  
Member, British Columbia Medical Association (BCMA)

**Administrative Activities**

**INTERNATIONAL**

**Alliance**
2012 - present  
Member, Neurooncology Committee
2012 - present  
Member, Imaging Committee

**Gamma Knife Society**
2013 - present  
Co-Chair, Gamma Knife Standardization Working Group
2012 - 2013  
Member, Gamma Knife Standardization Working Group

**Women in Cancer**
2012 - present  
Co-Chair, Women in Cancer

**NATIONAL**

**Canadian Association of Radiation Oncology (CARO)**
2009 - present  
Member, CIC Working Group
2008 - present  
Member, Symptom Control Advisory Group
2005 - present  
Member, Manpower Committee

**Canadian Breast Cancer Symposium**
2012 - 2013  
Member, Conference Organizing Committee

**PROVINCIAL / REGIONAL**

**Professional Association of Residents of British Columbia**
2004 - 2007  
Program Representative for Radiation Oncology
2003 - 2004  
Program Representative for St Paul’s Hospital PGY-1

**LOCAL**

**Department of Radiation Oncology, Princess Margaret Cancer Centre**
2012 Feb - 2014 Jan  
Secretary, Radiation Oncology Partnership Executive

**The University of British Columbia**
2006 - 2007  
Chief Resident of Radiation Oncology, Residency Training Committee, Postgraduate MD
2006  
Resident Representative, Radiation Oncology CaRMs Selection Committee, Postgraduate MD
2005 - 2006  
Resident Representative, Residency Training Committee, Postgraduate MD

**University of Toronto**
2012 - present  
Secretary, Oncology Executive Committee, Faculty of Medicine, Dept of Radiation Oncology
2011 - present  
Member, Strategic Initiative Committee: Metastatic and recurrent disease research, including building the best metastatic disease management program in the world
2009 - 2010  
Member, Academic Communications Committee, Faculty of Medicine, Dept of Radiation Oncology
Caroline CHUNG

Oncology

2009 - 2010  
**Fellow Representative**, Residency Training Committee, U of T/Dept of Radiation Oncology, Postgraduate MD

2009 - 2010  
**Chief Fellow of Radiation Oncology**

THESIS PROJECT
2011 Mar  Master of Science. Imaging Biomarkers of Response to Radiation and Anti-angiogenic Agents in Brain Tumors. Institute of Medical Science, University of Toronto.

C. Academic Profile

1. RESEARCH STATEMENTS

Statement of Scholarly and Professional Activity.
Dr. Chung’s clinical practice includes the treatment of primary CNS malignancies, brain metastases and breast cancer. Her primary research interests have focused on personalized image-guided approaches for the management of brain tumors and metastases. Specifically, this includes the investigation of novel combinations of systemic therapy and radiosurgery for brain metastases and the evaluation of imaging biomarkers of both response and toxicity following treatment. With a translational approach, her preclinical work has included the investigation of conformal radiation in combination with targeted anti-angiogenic therapy in a murine intracranial brain tumor model with serial multiparametric MRI and biofluid measures to discover promising biomarkers of response to guide personalized treatment of brain tumors. The findings from this preclinical work have lead to several ongoing clinical trials evaluating serial MRI biomarkers in patients treated with radiosurgery as well as a Phase I dose-escalation trial of anti-angiogenic agent (Sunitinib) in concurrently with radiosurgery. In terms of image-guided therapy, Dr. Chung has also lead the early clinical evaluation of a novel image-guided Gamma Knife radiosurgery unit that incorporates cone-beam CT and infrared intrafraction motion-monitoring. In addition to tumor directed therapy, Dr. Chung is investigating imaging measures and potential treatments of radiation injury in the brain through her translational research and as the principal investigator of a multi-centred Phase II randomized clinical trial of bevacizumab + steroids vs. placebo + steroids through the Alliance for Clinical Trials in Oncology collaborative group.

D. Research Funding

1. GRANTS, CONTRACTS AND CLINICAL TRIALS

PEER-REVIEWED GRANTS

FUNDED

2014 Jul - 2015 Jun  Principal Investigator. Randomized Phase II Study: Corticosteroids + Bevacizumab vs. Corticosteroids + Placebo (BeSt) for Radionecrosis after Radiosurgery for Brain Metastases
**2014 Jan - 2015 Dec**  
**Principal Investigator.** Alliance for Clinical Trials in Oncology Alliance Scholar Award.  
Alliance for Clinical Trials in Oncology Foundation. 88,000 USD. [Grants]  
Grant funding for correlative biomarkers for the research project entitled “Randomized Phase II Study: Corticosteroids + Bevacizumab vs. Corticosteroids + Placebo for Radionecrosis after Radiosurgery for Brain Metastases.”

**2013 Oct - 2014 Oct**  
**Principal Site Investigator.** The Toronto Brief Neurocognitive Battery (BNB) Development of a novel brief telephone battery for neurocognitive assessment of patients with brain metastases. University of Toronto. Department of Radiation Oncology Internal Seed Grant. 62,500 CAD. [Grants]

**2011 - 2012**  
**Co-Investigator.** A phase II study of PX-866 in patients with glioblastoma multiforme at time of first relapse or progression. National Cancer Institute of Canada (NCIC). REB#: 11-002-OCREB. PI: Mason W. Collaborator(s): Chung C, Millar BA, Laperriere N (Co-Investigators). 180,000. [Clinical Trials]  
Amount: $6,000/patient.

**2010 - 2013**  

**2010 - 2012**  

**2010 - 2011**  
**Co-Principal Investigator.** Imaging tumour hypoxia: feasibility of EF5-PET in prostate cancer. Canadian Association of Radiation Oncologists (CARO). Collaborator(s): McKenzie M, Chung C. 20,000. [Grants]

**2008 - 2010**  
**Co-Principal Investigator.** Introducing Sunitinib with Radiotherapy and Temozolomide in an Xenograft Glioblastoma Model. Canadian Association of Radiation Oncologists (CARO). 19,400. [Grants]

**2007 - 2015**  
**Site Primary Investigator.** A randomized phase III study of temozolomide and short-course radiation versus short-course radiation alone in the treatment of newly diagnosed glioblastoma multiforme in elderly patients. National Cancer Institute of Canada (NCIC). REB#: 07-0349-C. Collaborator(s): Mason W, Millar BA, Laperriere N (Co-Investigators). 203,000. [Clinical Trials]  
Amount: $4,000/patient.

**2007 - 2012**  
Validating the accuracy of a relocatable frame for PERFEXIONTM based stereotactic radiotherapy. PMH – Elekta. REB#: 08-0121-C. PI: Jaffray D. Collaborator(s): Chung C, Ruschin M (Study Chairs); Laperriere N, Tsang R, O’Sullivan B, Cho YB, Ménard C (Co-Investigators). 955,209. [Clinical Trials]

**2006**  
**Principal Investigator.** ACTION Research Grant for Neuropathic Pain Research. ACTION. 9,000. [Grants]
*Amount: $3,000/patient.*

**NON-PEER-REVIEWED GRANTS**

**FUNDED**

2013 Jul - 2018 May  **Site Investigator.** A double-blind, placebo-controlled, randomized, Phase IIIb trial evaluating the efficacy and safety of standard of care (SOC) +/- continuous bevacizumab treatment following progression of disease in patients with glioblastoma after first (1st)-line treatment with radiotherapy, temozolomide and bevacizumab. PI: Mason, W. Collaborator(s): Laperriere N, Millar BA. [Clinical Trials]

2013 Apr - 2015 Dec  **Principal Investigator.** Glycemic Interventions in Glioblastoma Outcomes (GIGO) Pilot Study. Gerry and Nancy Pencer Brain Tumor Centre. 50,000 CAD. [Grants]

2010 - 2013  **Co-Principal Investigator.** A phase I study of stereotactic radiosurgery concurrent with sunitinib in patients with brain metastases. Pfizer Inc. (USA). REB#: 09-0115-C. PI: Chung C, Brade A. Collaborator(s): Mason W, Zadeh G, Menard C (Co-Investigators). 140,250. [Clinical Trials]

2009 - 2012  **Co-Investigator.** A randomized, double blind, placebo controlled, multicenter phase III trial of bevacizumab, temozolomide and radiotherapy, followed by bevacizumab and temozolomide versus placebo, temozolomide and radiotherapy followed by placebo and temozolomide in patients with newly diagnosed glioblastoma. F. Hoffmann-la Roche Ltd. (Basel, Switzerland). REB#: 09-036-OCREB. PI: Mason, W. Collaborator(s): Chung C, Millar BA, Laperriere N (Co-Investigators). 179,752. [Clinical Trials]
*$26,000/patient.*

2. **SALARY SUPPORT AND OTHER FUNDING**

**Personal Salary Support**

2007  Peter Poon Grant Proposal Competition, Travel Grant. BC Cancer Agency.

Invited Lecturer. Negotiating your first academic appointment. UBC Clinician Investigator Program. British Columbia, Canada.

2012 May 4

Invited Speaker. Personalized Treatment of Brain Tumors: Integrating Radiotherapy and Molecular Therapeutics. Target Insights VI. Toronto, Canada. (Continuing Education).

2011 Sep 14

Invited Lecturer. Stereotactic Radiotherapy – CNS, Eye and Breast. Canadian Association of Radiation
Oncology. Winnipeg, Manitoba, Canada.

**Presented Abstracts**

2012  **Presenter.** Phase I Dose Escalation Study of Sunitinib and Radiosurgery for Brain Metastases. Canadian Association of Radiation Oncology (CARO). Ottawa, Canada.

2011 Nov  **Presenter.** Evaluating the Role of Pre-operative MRI to Guide Individualized Early Breast Cancer Treatment. Canadian Cancer Research Conference. Toronto, Ontario, Canada. Presenter(s): **Chung C.**

2009 Sep  **Presenter.** Development of a Canadian Palliative Radiation Oncology Curriculum. Canadian Association of Radiation Oncology (CARO) 2009. Quebec City, Quebec, Canada. Presenter(s): **Chung C.** (Poster Discussion).

2008  **Presenter.** Detection of circulating tumour cells from peripheral blood samples by a novel cell concentration method and immunohistochemistry (IHC) compared with reverse transcriptase-polymerase chain reaction (RT-PCR) in Stage III/IV Non-small cell lung cancer (NSCLC). Canadian Association of Radiation Oncology (CARO) 2008. Montreal, Quebec.

2007  Pearl of Wisdom: Choosing Your Battles Wisely. Royal College of Physicians and Surgeons 1st Chief
Residents’ Workshop. Winnipeg, Manitoba. (Oral Presentation).

Conference Organizing Committee

Other Lectures and Presentations

3. PROVINCIAL / REGIONAL

Invited Lectures and Presentations

2013 Jun 23 Invited Speaker. (Receptor-)Targeted Therapy for Breast Cancer. Medical Disease Management Symposium. Huntsville, Ontario, Canada. (Continuing Education).

Presented Abstracts
2011 **Speaker.** Murine Model for Early Biomarkers of Response to Antiangiogenics and RT. Imaging Network of Ontario 9th Annual Symposium (ImNO). Toronto, Ontario, Canada.

**Facilitator, Discussion Leader**

2013 May 17 **Facilitator.** Imaging Biomarkers in Research and Practice. Ontario Cancer Institute. Huntsville, Ontario, Canada.

4. LOCAL

**Invited Lectures and Presentations**

2014 Nov **Presenter.** Mind over matters: Efforts to preserve cognition in cancer patients. RMP Rounds, Princess Margaret Cancer Centre. Toronto, Ontario, Canada.

2014 Aug **Presenter.** Highlights of Summer Series on Customer Satisfaction & where will we go from here? An open discussion on how we can enhance our patient experience at the Princess Margaret Cancer Centre. Summer Series Rounds, Princess Margaret Cancer Centre. Toronto, Canada.

2014 Jun 4 **Visiting Professor.** Changing landscape of brain mets management - including the growing potential to combine targeted therapies. Grand Rounds to the Department of Oncology Queen’s University. Kingston, Canada.

2013 Jun 12 **Invited Speaker.** Radiotherapy for Graves’ Orbitopathy: Eye do - for better, for worse. Department of Endocrinology, St Michael’s Hospital. Toronto, Ontario, Canada. (Continuing Education).

2012 May 8 **Presenter.** Cancer and Hyperglycemia. UHN Endocrine Rounds. Toronto, Ontario, Canada. Presenter(s): Caroline Chung.

2012 **Invited Speaker.** Endocrinology & Radiation Oncology for Graves’ Orbitopathy: ‘Eye do - for better for worse’. University of Toronto City-Wide Endocrine Rounds. Toronto, Ontario, Canada. Presenter(s): Caroline Chung.

2011 Mar **Invited Speaker.** Research of Brain Metastases at Princess Margaret. Odette Cancer Centre. Toronto, Ontario, Canada.

2011 **Speaker.** Research of Brain Metastases at PMH. RRRP Educational Rounds, Odette Cancer Centre. Toronto, Ontario, Canada.

Presented Abstracts

2012 Jan  

Other Lectures and Presentations

2011 Speaker. Palliative Radiotherapy. Subspecialty Noon Rounds, Department of Medicine, Toronto General Hospital. Toronto, Ontario, Canada.

5. OTHER

Presented and Published Abstracts

Publication Details:
G. Teaching and Design

1. INNOVATIONS AND DEVELOPMENT IN TEACHING AND EDUCATION

2012 Feb - present UT-DRO Fellows Research Seminar, Postgraduate MD, Faculty of Medicine, Dept of Radiation Oncology, Princess Margaret Hospital

2012 - present Joint Neuro-Oncology Journal Club, Multilevel Education, Faculty of Medicine, Dept of Radiation Oncology, Princess Margaret Hospital

2012 - present Resident Practice Drills, PGY 5, Postgraduate MD, Faculty of Medicine, Dept of Radiation Oncology, Princess Margaret Hospital

2011 Sep - present Principles of Radiation Oncology, Undergraduate MD, Faculty of Medicine, Dept of Medicine Introductory lecture on the basic principles of Radiation Oncology to 2nd year medical students at the University of Toronto.

2006 - present Radiation Oncology Palliative Care Curriculum Development, Postgraduate MD, Canadian Association of Radiation Oncologists

- Resident Representative on SCADG (CARO)
  - Creation of a national survey to assess the educational needs of Radiation Oncology Residents in the area of palliative care in Radiation Oncology.
  - Creation of a national curriculum in the CanMEDS format to address these educational needs.

2014 May 1 - 2014 May 2 Target Insights VIII: 4PRT - Photons, Protons, Particles and Progress in Radiation Therapy, Continuing Education, Faculty of Medicine, Dept of Radiation Oncology, University of Toronto

Target Insight, now in its 8th year has been a mechanism to present targeted information to the radiation oncology community. In the recent past, this included the best practice use of advanced technologies such as IMRT, VMAT, IGRT and brachytherapy. This year the University of Toronto, The Hospital for Sick Children, Odette Cancer Centre, and Princess Margaret Cancer Centre are partnering together to bring the topic of Particle Therapy to the forefront of discussion for Canadians. Studies have demonstrated the gains in this treatment include lower overall costs because of less treatment morbidity.

- Member of the organizing committee and chair of session.

2014 May - 2014 Jun Research Mentor - Radbio Course, Graduate Education, Faculty of Medicine, Dept of Radiation Oncology, Medical Radiation Science, University of Toronto

- Worked with a student in the Masters of Health Science Radiation Science Program at the University of Toronto to develop a research proposal/concept. I provided guidance and mentorship in the approach and methodology for developing a study concept.

2014 Apr 24 - 2014 Apr 26 Personalized High Precision RT and Management for Brain Tumors, Continuing Education, Faculty of Medicine, Dept of Radiation Oncology, University Health Network-Princess Margaret Cancer Centre

- I developed and lead this 3 day course in conjunction with the Academic Enrichment Program at the University Health Network. This course provides a multidisciplinary overview in the management of brain tumors, primary and secondary, and high-precision radiation delivery. The course included didactic sessions, case discussions, and interactive radiation contouring and planning exercises.

2013 Dec 6 Competency to Practice Evaluation Exam, Postgraduate MD, Faculty of Medicine, Dept of Radiation Oncology, Princess Margaret Hospital

2013 Apr 10 Mentor, Undergraduate MD, Faculty of Medicine, Dept of Radiation Oncology, University of Toronto

- Jenn Teichman & Madeline Song.

2013 Apr 2 MRI Basics, Postgraduate MD, Faculty of Medicine, Dept of Radiation Oncology

- Development of an introductory session on MR physics and clinical applications for Radiation Oncology trainees.
2013 Jan 25  Biannual resident research, Multilevel Education, Faculty of Medicine, Dept of Radiation Oncology, Princess Margaret Hospital
   *PGY 2-4 Research Proposal.*

2013 Jan 2 - 2013 Jan 18  Radiologist, Postgraduate MD, Faculty of Medicine, Dept of Radiation Oncology, Princess Margaret Hospital
   *Eye clinic/ CNS.*

2013 Jan 2 - 2013 Jan 18  Radiologist, Undergraduate MD, Faculty of Medicine, Dept of Radiation Oncology, Princess Margaret Hospital
   *CNS and Brain Mets.*

2012 Dec 6  Planning Examiner, Multilevel Education, Faculty of Medicine, Dept of Radiation Oncology, Princess Margaret Hospital
   *PGY4 & PGY5 Resident Examiner.*

2012 Oct 8 - 2012 Oct 28  Radiologist, Undergraduate MD, Faculty of Medicine, Dept of Radiation Oncology, Princess Margaret Hospital
   *Eye clinic/ CNS review/ Brain Mets.*

2012 Oct 1 - 2012 Nov 30  PGY4 Rad Onc resident from Spain, Postgraduate MD, Faculty of Medicine, Dept of Radiation Oncology, Princess Margaret Hospital

2012 Oct 1 - 2012 Oct 13  Radiologist, Postgraduate MD, Faculty of Medicine, Dept of Radiation Oncology, Princess Margaret Hospital
   *Eye clinic.*

2012 Jul 9  Biannual Resident Research, Multilevel Education, Faculty of Medicine, Dept of Radiation Oncology, Princess Margaret Hospital
   *PGY 2-4 Research Proposal.*

2012 Jul - 2014 Dec  Medical Oncology Resident Teaching (GIM), Postgraduate MD, Faculty of Medicine, Dept of Radiation Oncology, Princess Margaret Hospital
   *Introductory lecture on Principles of Radiation Therapy given to Residents rotating through Medical Oncology.*

2012 Jun  CIP Research Meeting, Graduate Education, Faculty of Medicine, Dept of Radiation Oncology, UBC Clinician Investigator Program

2012 May  Exam Preparation, Postgraduate MD, Faculty of Medicine, Dept of Radiation Oncology, Princess Margaret Hospital

2012 Apr  Gamma Knife Treatment, Postgraduate MD, Faculty of Medicine, Dept of Radiation Oncology, Princess Margaret Hospital
   *Senior Resident Teaching.*

2012 Mar  Ocular Malignancies, Postgraduate MD, Faculty of Medicine, Dept of Radiation Oncology, Princess Margaret Hospital
   *Academic Half-day Teaching.*

2012 Mar  Frontiers of Radiation Medicine Research (MSC-1501H) Present, Graduate Education, Faculty of Medicine, Dept of Radiation Oncology, Princess Margaret Hospital
