2002 - 2004  Member, Search Committee for Cancer Research Director, Toronto, Ontario, Canada.
2002 - 2003  Member, Radiation Program Expanded Group, Toronto, Ontario, Canada.
2002 - 2003  Chair, Radiation Program Core Group, Toronto, Ontario, Canada.
2002 - 2003  Chair, Search Committee for Medical Physics Research Director, Toronto, Ontario, Canada.
2002 - 2003  Member, IMRT Committee, Toronto, Ontario, Canada.
2002 - 2003  Member, TSRCC/DRCC Evening Clinic Committee, Toronto, Ontario, Canada.
2002         Member, Search Committee for Chief of Dentistry, Toronto, Ontario, Canada.
2002         Member, Search Committee for Chief of Radiology, Toronto, Ontario, Canada.
2002         Member, Search Committee for Clinician Scientists, Cancer Program, Toronto, Ontario, Canada.
2001 - 2003  Member, TSRCC/CROS Steering Committee, Toronto, Ontario, Canada.

University of Toronto
2015 - present  Member, Executive Committee, Faculty of Medicine, Institute of Medical Science, Multilevel Education, Toronto, Ontario, Canada.
2006 - present  Member, Finance Committee, Department of Radiation Oncology, Toronto, Ontario, Canada.
2005 - present  Chair, Three-Year Review Committee, Department of Radiation Oncology, Toronto, Ontario, Canada.
2005 - present  Chair, Appointments Committee, Department of Radiation Oncology, Toronto, Ontario, Canada.
2005 - present  Member, Vice Chairs Committee, Department of Radiation Oncology, Toronto, Ontario, Canada.
2005 - present  Chair, Promotions Committee, Department of Radiation Oncology, Toronto, Ontario, Canada.
2003 - present  Member, EIRR 21st Grants Panel, Toronto, Ontario, Canada.
2001 - present  Member, Executive Committee, Department of Radiation Oncology, Toronto, Ontario, Canada.
2012 - 2015  Member, IMS, Appointments Committee, Toronto, Ontario, Canada.
2012         Judge, Laidlaw Manuscript Competition, Toronto, Ontario, Canada.
2011         Member, Search Committee for Campbell Chair in Breast Cancer Research, Toronto, Ontario, Canada.
2011         Member, Search Committee for Farghason Chair in Renal Cancer Research, Toronto, Ontario, Canada.
2009  **Acting Chair**, Department of Radiation Oncology, Toronto, Ontario, Canada.
2006  **Member**, Search Committee, Chief of Department of Radiation Oncology, Toronto, Ontario, Canada.
2006  **Member**, Five-year Review Committee, Department of Radiation Oncology, Toronto, Ontario, Canada.
2002 - 2013  **Member**, Fellowship Committee, Department of Radiation Oncology, Toronto, Ontario, Canada.
1997 - 2001  **Chair**, Resident Research Committee, Department of Radiation Oncology, Toronto, Ontario, Canada.
1997 - 2001  **Member**, Resident Selection Committee, Department of Radiation Oncology, Toronto, Ontario, Canada.
1997 - 2001  **Member**, Fellowship Selection Committee, Department of Radiation Oncology, Toronto, Ontario, Canada.
1996 - 2001  **Director**, Research, Department of Radiation Oncology, Toronto, Ontario, Canada.
1996 - 2001  **Member**, Senior Advisory Committee, Department of Radiation Oncology, Toronto, Ontario, Canada.
1996 - 2001  **Chair**, Research Advisory Committee, Department of Radiation Oncology, Toronto, Ontario, Canada.
1996  **Member**, Committee on Graduate Education in Clinical Sciences, for Institutional Self-study for Accreditation, Faculty of Medicine, Dept of Radiation Oncology, Graduate Education, Toronto, Ontario, Canada.
1992 - 2004  **Member**, Promotions Committee, Department of Radiation Oncology, Toronto, Ontario, Canada.

1. GRANTS, CONTRACTS AND CLINICAL TRIALS

PEER-REVIEWED GRANTS

FUNDED

2009 - 2010  **Co-Investigator.** Ultrasound microbubble enhancement of bladder cancer responses to radiation. American Association for Cancer Research, Henry Sheppard Translational Research Grant. PI: Czarnota GJ. Collaborator(s): **Wong CS**. 125,000 USD. [Grants]

2005 - 2008  **Principal Investigator.** The neuroprotective role of erythropoietin in radiation-induced CNS injury. OCRN. 526,893 CAD. [Grants]

2002 - 2006  **Principal Investigator.** Role of endogenous and exogenous neural stem cells and progenitor cells in CNS radiation responses. National Cancer Institute of Canada (NCIC). 479,403 CAD. [Grants]

2002 - 2004  **Collaborator.** Equipment maintenance support for oncologic molecular micro-imaging.

1997 - 2000  **Principal Investigator.** The role of apoptosis in radiation damage to the central nervous system. National Cancer Institute of Canada (NCIC). 417,603 CAD. [Grants]

1994 - 1997  **Principal Investigator.** Repair and recovery of radiation damage in rat spinal cord. National Cancer Institute of Canada (NCIC). 391,806 CAD. [Grants]

**NON-PEER-REVIEWED GRANTS**

**FUNDED**

2007 - 2014  **Principal Investigator.** Radiation biology of the central nervous system. CS Wong Medicine Corporation. 315,000 CAD. [Grants]

2007 - 2008  **Principal Investigator.** Tissue protective peptide in radiation-induced brain injury. Arain
Pharmaceuticals Inc. 10,665 CAD. [Grants]

2006 - 2008  **Principal Investigator.** Positron emission tomography (PET) evaluation study - Sunnybrook site. Ministry of Health and Long-Term Care Research Grant. 130,000 CAD. [Grants]

2004  **Principal Investigator.** Neuroprotection in a mouse model of behavioral and learning/memory impairment after cranial irradiation. Ortho Biotech. 64,407 CAD. [Grants]

2002 - 2007  **Principal Investigator.** Research Support. Sunnybrook Health Sciences Centre. 635,000 CAD. [Grants]

2002  **Principal Investigator.** Equipment Grant. Sunnybrook Health Sciences Centre. 145,238 CAD. [Grants]

1999  **Principal Investigator.** Travel Award. Radiation Research Society. 500 USD. [Grants]

1992  **Principal Investigator.** Continuing Education Day - Current Controversies in the Colorectal Cancer. Princess Margaret Hospital Foundation. Collaborator(s): Moore M. 19,400 CAD. [Grants]

1978  **Principal Investigator.** A study of the influence of dose fractionation on the radiation tolerance of the rat spinal cord. Princess Margaret Hospital Trust Fund. 2,940 CAD. [Grants]

**Personal Salary Support**

D. Publications

1. MOST SIGNIFICANT PUBLICATIONS

   Neural progenitors in adult brain undergo p53-dependent apoptosis after irradiation. In contrast, radiation-induced apoptosis of microvascular endothelial cells is regulated by membrane acid sphingomyelinase. Using genetic, pharmacological and transplantation approaches, we provide evidence that endothelial cells may regulate p53-dependent apoptosis of neural progenitors after genotoxic stress.

   Microvascular permeability changes and loss of blood-brain barrier integrity are important features of central nervous system (CNS) radiation injury. Expression of vascular endothelial growth factor (VEGF) is an important determinant of microvascular permeability. Hypoxia mediates VEGF up-regulation through hypoxia-inducible factor-1 alpha (HIF1alpha). In rat spinal cord, we observed increase in astrocytic expression of HIF1-alpha and VEGF before the onset of radiation-induced white matter necrosis and forelimb paralysis. VEGF-low-expressing mice were found to be protected from radiation myelopathy compared to wild type or VEGF-high-expressing mice. Our study provided first evidence for a causative role of VEGF in CNS radiation injury.

   Ionizing radiation results in acute disruption of the blood-brain barrier. Following radiation, microvascular endothelial cells undergo apoptosis, a process mediated by membrane acid sphingomyelinase. We show that in acid sphingomyelinase-deficient mice, ionizing radiation does not result in endothelial cell apoptosis and there is no disruption of the blood-brain barrier after irradiation. Intravenous basic fibroblast growth factor which protects endothelial cell from apoptosis after irradiation also confers protection against disruption of the blood-brain barrier. Our study provides mechanistic insight that links endothelial cell apoptosis to acute blood-brain barrier disruption after irradiation.

   Dysfunction of the blood-brain barrier is associated with radiation-induced white matter lesions. Using the rat radiation myelopathy model, we showed a dose-dependent temporal and spatial association of hypoxia, vascular endothelial growth factor (VEGF) up-regulation, and radiation-induced blood-spinal cord barrier disruption. The results provide the first observation that tissue hypoxia and VEGF up-regulation play a role in blood-brain barrier permeability damage in the spinal cord after ionizing radiation, and add mechanistic insight to the underlying pathophysiology of late CNS effects after irradiation.

   We characterized acute apoptosis in rat spinal cord after irradiation and provided the first observation that apoptotic cells after ionizing radiation in the adult spinal cord are cells of the oligodendroglial lineage.

Invited Lectures and Presentations

4. LOCAL

Invited Lectures and Presentations

2013 Lecturer. Radiation Therapy for Colorectal Cancer. Department of Surgery, University of Toronto. Toronto, Ontario, Canada.

2011 Colon Cancer Care: Coordination Counts. Toronto Surgical Oncology Rounds. Toronto, Ontario, Canada.

Presented Abstracts

1992  Sparing effect of small doses per fraction given once daily in rat spinal cord. University of Toronto, Department of Radiation Oncology Alumni Day. Toronto, Ontario, Canada.

CME Courses

2001  Lecturer. Surgical Oncology Network, Tele-Oncology Rounds - Rectal Cancer. Department of Surgery, University of Toronto. Toronto, Ontario, Canada. (Continuing Education).

2000  Lecturer. Radiation Oncology Nursing Program - CNS malignancies. Princess Margaret Hospital. Toronto, Ontario, Canada. (Continuing Education).

1993  Lecturer. Introduction to Radiation Oncology, Pharmacy Preceptor Workshop. Princess Margaret Hospital. Toronto, Ontario, Canada. (Continuing Education).

1993  Lecturer. Radiation Therapy Nursing Course, Radiobiologic effect on normal tissues. Princess Margaret Hospital. Toronto, Ontario, Canada. (Continuing Education).

1992  Lecturer. Refresher Course in Radiation Oncology - GI Tumor. Princess Margaret Hospital. Toronto, Ontario, Canada. (Continuing Education).

1991  Lecturer. Refresher Course in Radiation Oncology - GI Tumor. Princess Margaret Hospital. Toronto, Ontario, Canada. (Continuing Education).

F. Teaching and Design

1. INNOVATIONS AND DEVELOPMENT IN TEACHING AND EDUCATION

1994  Resource Issues in the practice of Radiation Oncology in the 90’s, Continuing Education, Faculty of Medicine, Dept of Radiation Oncology, University of Toronto
Course Co-Ordinator. Approved for 3.9 type II MOCOMP credits of the Royal College of Physicians and Surgeons of Canada.

1993 - 1998  Postgraduate MD, Faculty of Medicine, Dept of Radiation Oncology, University of Toronto
Course Co-ordinator: Applied Radiobiology
Eight 1h seminars, with formal written and oral examinations at end of course.

1992 - 1994  Continuing Education, Faculty of Medicine, Dept of Radiation Oncology, Princess Margaret
Hospital

*Educational Lecture Series - GI Site Group - Course Co-Ordinator.*

1992

Current controversies in colorectal cancer. Continuing Education, Faculty of Medicine, Dept of Radiation Oncology, University of Toronto

*Approved for 8.25 type II MOCOMP credits of the Royal College of Physicians and Surgeons of Canada, Course Co-Ordinators: Wong CS, Moore M.*

G. Research Supervision

1. PRIMARY OR CO-SUPERVISION

Undergraduate Education

2003 - 2004  

2003  
**Primary Supervisor.** Elective. Justin Lee.

2003  
**Primary Supervisor.** Elective. Stanley Liu.

2003  
**Primary Supervisor.** Medical Student. Josephe (Arie) Greenwald.

1995  

1994 - 1995  

1991  

1990  

Graduate Education

2010 - present  
**Primary Supervisor.** PhD. Wei-Chih Cheng. *The role of p53 in radiation induced inhibition of neurogenesis.*

2010 - present  
**Primary Supervisor.** PhD. Kristopher Dennis, Medical Science. *Radiation-induced nausea and vomiting.*

2005  
**Primary Supervisor.** MSc. Justin Lee, Medical Biophysics. *Vascular growth factors in CNS radiation responses.*

2003 - 2006  
**Co-Supervisor.** MSc. Alina Mihai, Medical Science. *Is the inner shell ionization model predictive for the radiosensitization induced by halogenated pyrimidines?*.

2002 - 2005  
**Primary Supervisor.** MSc. Ashraf Mahmoud-Ahmed, Medical Biophysics. *Early gene expression profile in mouse brain after ionizing radiation.*

2000 - 2003  
**Primary Supervisor.** MSc. Robert Nordal, Medical Biophysics. *Hypoxia in central nervous system radiation injury.*

2000 - 2003  

1996 - 1999  

Undergraduate MD

2002  

2001  

2000  
**Primary Supervisor.** Summer Student. Victor Jain. Awards: Life Science Award $3320.
Completed 2000.

### Postgraduate MD

1994 | **Primary Supervisor.** Resident. Victor Hsue. *A phase I study of combined radiation therapy, 5-fluorouracil and low dose folinic acid in patients with locally advanced pancreatic or extrapolibary carcinoma.*

### Faculty Development

2013 Aug - 2014 Aug | **Primary Supervisor.** Xinhong He, Medical Science. Supervisee Position: Assistant Professor, Supervisee Institution: Fudan University, China. *MRI changes post neoadjuvant chemoradiation for rectal cancer, Non-thesis Project.* Awards: Fudan University, Shanghai Cancer Center. Collaborator(s): Laurent Milot.

### Postdoctoral Research Fellow (PhD)

2007 | **Primary Supervisor.** PhD. Kassum Sinha, Medical Biophysics. *CNS Radiation Response., Completed 2007.*

2002 | **Primary Supervisor.** PhD. Peng-Sheng Zheng, Medical Biophysics. *HPV and p53 in human
anal carcinoma., Completed 2002.

Clinical Research Fellow (MD)

2001 - 2002 Primary Supervisor. MD. Bronwyn Matheson. MRS changes in brain tumors and normal brain after radiotherapy.

2. OTHER SUPERVISION

Graduate Education

Thesis Committee Member

2014 Sep - present MSc. Christianne Hoey, Medical Biophysics. Supervisor(s): Stanley Liu.

2014 Sep - present MSc. Chris Morrone, Laboratory Medicine and Pathobiology. Supervisor(s): JoAnne McLaurin.

2012 - present PhD. Elizabeth de Guzman, Medical Biophysics. Supervisor(s): Brian Nieman.

2010 - 2012 MSc. Christina Kim, Medical Biophysics.

2007 - 2010 MSc. Justin Lee, Medical Biophysics.

2007 - 2009 MSc. Clinton Hubble, Medical Biophysics.

2004 - 2006 MSc. Nick Davies, Medical Biophysics.

2001 - 2004 MSc. Lindsay Park, Medical Biophysics.

1998 - 1999 MSc. A. Molckovsky, Medical Biophysics.

1992 MSc. A. Speke, Medical Biophysics.

1990 - 1992 MSc. T. Haston, Medical Biophysics.

Thesis Examiner

2014 MSc. Tiffany Scarcelli, Laboratory Medicine and Pathobiology.

2012 MSc. Christina Kim, Medical Biophysics.

2010 MSc. Justin Lee, Medical Biophysics.
C Shun WONG

2009  MSc. Clinton Hubble, Medical Biophysics.
2009  MSc. James Bae, Laboratory Medicine and Pathobiology.
2009  PhD. Brian Keller, Medical Science.
2006  MSc. Alina Mihai, Medical Science.
2006  MSc. Amy Wong, Laboratory Medicine and Pathobiology.
2006  MSc. Nick Davies, Medical Biophysics.
2005  MSc. Ashraf Mahmoud-Ahmed, Medical Biophysics.
2004  MSc. Lindsay Park, Medical Biophysics.
2003  PhD. David Wu, Laboratory Medicine and Pathobiology.
2003  MSc. Robert Nordal, Medical Biophysics.
2003  MSc. Shelly Atkinson, Medical Biophysics.
1999  MSc. A. Molckovsky, Medical Biophysics.
1999  MSc. K. De Jaeger, Medical Biophysics.
1999  MSc. Brenda Chow, Medical Biophysics.
1999  MSc. V. Vukovic, Medical Biophysics.
1995  MSc. M-C. Kavanagh, Medical Biophysics.
1992  PhD. C. Newcombe, Medical Biophysics.
1992  MSc. T. Haston, Medical Biophysics.
1992  MSc. A. Speke, Medical Biophysics.

Qualifying/Reclass Examiner
2016 Jun  Chris Morrone, Laboratory Medicine and Pathobiology. Supervisor(s): JoAnne McLaurin.
2015 May  MSc. Xiao Zhao, Medical Science. Supervisor(s): Fei-Fei Liu.
2014  MSc. Priscilla Lai, Medical Biophysics.
2012  MSc. Kristopher Dennis, Medical Science.
2012  PhD. Wei-Chih Cheng, Medical Science, Neuroscience.
2011  MSc. S. Mashouf, Medical Science.

Thesis Committee Member, Foreign Advisor
CURRICULUM VITAE

Name: Jason Wong, MD FRCP(C)

Business Address: Radiation Medicine Program
Stronach Regional Cancer Centre at Southlake Regional Health Centre
596 Davis Drive
Newmarket, Ontario
L3Y 2P9

Telephone: 905-895-4521 ext. 6595
Fax: 905-952-2818
E-Mail: j3wong@southlakeregional.org

EDUCATION

University Education:
1996 – 1999 Bachelor of Science
McMaster University, Hamilton, ON, Canada

Post Graduate and Medical Training:
1999 – 2003 Doctor of Medicine
Queen’s University School of Medicine, Kingston, ON, Canada

2003 – 2008 Residency: Radiation Oncology
Princess Margaret Hospital, University of Toronto, Toronto, ON, Canada

2008 – 2009 Fellowship: Prostate/Gyne Brachytherapy
Seattle Prostate Institute, Swedish Medical Center, Seattle WA

Qualifications & Certifications:
2003 Licentiate of the Medical Council of Canada (LMCC): PART I (PASS)
2003 United States Medical Licensing Examination (USMLE): STEP 1 (PASS)
2003 United States Medical Licensing Examination (USMLE): STEP 2 (PASS)
2004 Licentiate of the Medical Council of Canada (LMCC): PART II (PASS)
2005 United States Medical Licensing Examination (USMLE): STEP 3 (PASS)
2008 - present Fellow of the Royal College of Physicians and Surgeons of Canada
2010 - present American Board of Radiology, Radiation Oncology

Licenses:
2008 Washington
2009-present California
2003-2008 Ontario
2013-present
CURRENT APPOINTMENTS

05/2013 – present  
**Active Staff, Radiation Oncology**  
Stronach Regional Cancer Centre (SRCC)  
Southlake Regional Health Centre, Newmarket, Ontario, Canada

**Active Staff, Radiation Oncology**  
The Princess Margaret Cancer Centre, Toronto, Ontario, Canada

PREVIOUS APPOINTMENTS

5/2012-5/2013  
**Program Director, Radiation Oncology Residency Program**  
Assistant Clinical Professor  
Department of Radiation Oncology  
School of Medicine  
University of California, Irvine

10/2009-5/2013  
**Assistant Clinical Professor**  
Department of Radiation Oncology  
School of Medicine  
University of California, Irvine

08/2008-07/2009  
**Fellow in Radiation Oncology**  
Swedish Medical Center/Prostate Cancer Institute, Seattle, WA

08/2008-07/2009  
**Staff Radiation Oncologist**  
Stevens Hospital, Edmunds, WA  
Highline Medical Center, Burien, WA  
Valley Medical Center, Renton WA  
Northwest Hospital, Seattle, WA

07/2003-06/2008  
**Resident in Radiation Oncology**  
Princess Margaret Hospital, Toronto, ON

05/2001-09/2001  
**Research Assistant**  
Serial tumor blood flow measurements in shionogi tumors  
Prostate Centre, Vancouver General Hospital, University of British Columbia, BC

05/1999-08/1999  
**Research Assistant**  
Ottawa Heart Institute, Ottawa, ON

05/1998-08/1998  
**Research Assistant**  
Implantation of encapsulated myoblasts expressing VEGF in non-muscle sites induces localized angiogenesis  
Department Molecular Biology and Pathology, McMaster University, Hamilton, ON

05/1997-08/1997  
**Research Assistant**  
Gene Therapy: Microencapsulation Gene Therapy  
Department of Pediatrics, Faculty of Health Sciences, McMaster University, Hamilton, ON
HONORS & AWARDS

2012  ASTRO-ARRO Teacher of the Year award (Association Residents in Radiation Oncology)
2011  “Heroes in Healthcare” nomination University of California, Irvine Medical Center/ Chao Family NCI Cancer Center.
2010  Short Listed for Radiation Oncology 2009-2010 Educator of the Year Award
2001  British Columbia Cancer Agency Summer Research Scholarship
2000  Rehabilitation Institute of Chicago Summer Research Scholarship
2000  Queen's University Summer Research Studentship
1999  McMaster University BSc.- Summa Cum laude
1999  McMaster University Merit Senate Scholarship 1999
1999, 1998, 1997  McMaster University's Dean's Honor List

PROFESSIONAL AFFILIATIONS:

2009 - 2010  American Brachytherapy Society
2008 - present  Fellow of the Royal College of Physicians and Surgeons of Canada
2007 - present  American Medical Association
2005 - present  Canadian Association of Radiation Oncologists
2005 - present  American Society for Therapeutic Radiology and Oncology (ASTRO)
2003 - 2008  Royal College of Physicians and Surgeons of Canada: Resident Member
2003 - 2008  College of Physicians and Surgeons of Ontario: Member
1999 - 2010  Ontario Medical Association: Member
1999 - 2010  Canadian Medical Association: Member

CURRENT CLINICAL STUDIES

2014-present  A pilot project to assess the feasibilty of introducing patient reported outcomes into the Standard of Care of patients undergoing radiation treatment for rectal carcinoma in the radical setting.  
Primary Investigator: Kassam, Z 
REB #0065-1314 (SRHC)

2014-present  Prospective Evaluation and Data mining to predict and minimize Individual Clinical Toxicity in Breast cancer radiotherapy (PREDICT – Bre) 
Primary Investigator: Ruschin M, Local Principal Investigator: Fenkell L 
REB # 0012-1415 (SRHC)

2015  A Multicentre Randomized Controlled Clinical Trial for the Reduction of Acute Skin Reaction in Adjuvant Breast Radiation in Large Breasted Women using a Prone Technique 
Primary Investigators: Fenkell, L and Comsa D 
REB # 0005-1516 (SRHC)

1. EDUCATION

Degrees
2001 MSc, Clinical Epidemiology, McMaster University, Canada
1984 MB ChB, Medical School, Sheffield University, United Kingdom

Postgraduate, Research and Specialty Training
2015 Mar Scholar, Health Professional Education, Harvard Macy Institute, Boston, United States

Qualifications, Certifications and Licenses
1989 FRCP, Radiation Oncology, Royal College of Physician and Surgeons of Canada, Canada

2. EMPLOYMENT

Current Appointments
2014 - present Vice Chair, Education, Radiation Oncology, University of Toronto, Canada
2010 - present Full Professor, Radiation Oncology, University of Toronto, Canada
2002 - present Associate member, Institute of Medical Science, University of Toronto, Canada
2002 - present Associate member, Health Policy, Management and Evaluation, University of Toronto, Canada
2001 - present Active staff, Radiation Medicine Program, Princess Margaret Hospital, University Health Network, Canada

Previous Appointments
HOSPITAL
2012 Committee Member, Search Committee for Chief of Radiation Medicine Program, Radiation Medicine Program, Princess Margaret Hospital
1990 - 2001 Active staff, Toronto-Sunnybrook Regional Cancer Centre, Canada
1990 - 2001 Active staff, Sunnybrook and Women’s College Health Sciences Centre, Canada

UNIVERSITY
2008 - 2012 Associate Program Director, Post Graduate Medical Education, Medicine, Faculty of, Radiation Oncology, University of Toronto
2002 - 2008 Director, Medicine, Faculty of, Radiation Oncology, University of Toronto

UNIVERSITY - RANK
2013 - 2014 Acting Vice Chair, Education, Radiation Oncology, University of Toronto, Canada
2012 - 2014 Chair, Social Responsibility, Professionalism and Equity, Radiation Oncology, University of Toronto, Canada
2004 - 2010 Associate Professor, University of Toronto, Canada
1997 - 2004 Assistant Professor, University of Toronto, Canada
1990 - 1997 Lecturer, University of Toronto, Canada

3. HONOURS AND CAREER AWARDS

Distinctions and Research Awards

LOCAL
Received
2015 Most Influential Research Publication, Princess Margaret Hospital. (Distinction)
2011 Research Leadership Award, Radiation Medicine Program, Princess Margaret Hospital, Canada. (Distinction)
2009 Excellence in Research Leadership, Radiation Oncology, University of Toronto, Canada. (Distinction)
2009 Guest Lecture Award, Medical Radiation Science Program, University of Toronto, Canada. (Distinction)
2007 Most Influential Research Publication, Princess Margaret Hospital. (Distinction)

4. PROFESSIONAL AFFILIATIONS AND ACTIVITIES

Professional Associations

2013 - present Member, Canadian Society for Epidemiology and Biostatistics
2009 - present Member, American Society of Clinical Oncology, 56211
2000 - present Member, American Society of Therapeutic Radiation Oncology, 35150684
1998 - present Member, Multinational Association for Supportive Care in Cancer
1991 - present Member, Canadian Association of Radiation Oncologists
1990 - present member, Ontario Medical Association
1995 - 2000 Member, Canadian Palliative Care Association

Administrative Activities

INTERNATIONAL
AJCC Cancer Staging System
2014 - present Member, Expert Panel - Neuroendocrine tumor
American Society Therapeutic Radiation Oncology
2013 - present        Annual Meeting Organizing Committee - Palliative Track, United States.
2012 - 2014           Annual Meeting Organizing Committee - Gastrointestinal Track, United States.

ASTRO
2014 - present        Member, Guidelines Sub-Committee
2014 - 2015           Member, Bone Metastases Guideline Working Group
2014 - 2015           Member, Combining Precision Radiotherapy with Precision Molecular Targeting White Paper Working Group
2014                   Member, Guidelines and Best Practice Task Force
2013 - 2014           Member, Health Care Access and Training Subcommittee

Cochrane Collaboration
2001 - 2005           Chair, University of Toronto Committee

Intergroup Esophagogastric Working Group
2006 - present        Member

Multinational Association in Supportive Care
2005 - 2006           Member, Organizing Committee, 2006 Annual Meeting

NRG
2014 - present        Member, Cancer Care Delivery Research Committee
2014 - present        Member, CPC Scientific Committee

Radiation Therapy Oncology Group-
2010 Jul - present     Member, Community Clinical Oncology Program Steering Committee, United States.

UICC
2011 - present        Member, Expert Panel - Upper GI TNM Watch

NATIONAL
Canadian Association of Radiation Oncologists
2006 - 2011           Member, Steering committee, Symptom Control Advisory Board
2004 - 2005           Chair, Symptom Control Advisory Board
2003 - 2004           Chair, Symptom Control Task Force

National Cancer Institute of Canada/Clinical Trials Group
2009 - present        Chair, Symptom Control Committee
2003 - present        Co-Chair, Esophageal Disease Working Group
2001 - 2009           Co-Chair, Symptom Control Committee
1999 - 2009           Member, Gastrointestinal Site Group
1996 - 1998           Member, Symptom Control Committee

C. Academic Profile

1. RESEARCH STATEMENTS

Symptom Control in Radiation Oncology.
The use of palliative radiotherapy to relieve symptoms is well established in clinical practice. However advances to improve on its therapeutic ratio is hampered by the methodological challenges inherent in conducting research in palliative populations.

Capacity building is an important component of research and development in this content area. I served as the research director for the palliative radiotherapy program at Toronto Sunnybrook Regional Cancer Centre between 1999-2001, and the leader for the Palliative Radiation Oncology Program at Princess Margaret Hospital since 2004. I was the founding chair for the Symptom Control Advisory Board for the Canadian Association of Radiation Oncologist, and serve as its chair between 2003-2005, and continue to serve as a member of its steering committee. Specific initiatives implemented during this time included theme symposium in symptom control research at our annual scientific meeting in 2005, symptom control research methods workshop 2005, establishing a annual symptom control research award, and co-founded the Canadian Palliative Radiation Oncology Group, a forum for monthly research discussions across Canada. In collaborating with its current chairs, educational objectives in symptom control for Canadian radiation oncology residents are closing completion. The research and educational environment created has expanded interest in symptom control research amount radiation oncology trainees and attracted international postgraduate trainees, expanding the pool of collaborative talents. To facilitate research at the national level, I have been serving as the chair for the Symptom Control Committee at the National Cancer Institute of Canada Clinical Trials Group since 2001. During this time, palliative radiotherapy trials have been established as one of the four strategic directions for this group, with two national and one international Phase III radiotherapy focused symptom control trials within our portfolio.

At a policy level, I was the founding Chair for the Supportive Care Guidelines Group, Cancer Care Ontario Program in Evidence based Care and serve as its Chair until 2008. During this time, I have attracted talented junior faculty in taking on performing systematic reviews and guidelines development in bone metastases, brain metastases and skin care following radiotherapy. These guidelines have served as key resources and foundations for pattern of practice evaluation.

At a research level, since 2004, I have authored and or collaborated on 23 peer-reviewed articles in the area of symptom control. These research efforts have established the efficacy of dexamethasone in the prophylaxis of radiation induced emesis, described the impact of technology on palliative radiotherapy delivery, and most recently the development and implementation of a 1 step simulate to treatment process resulting in reduced waiting time and improved access and quality of patient care. A series of sequential projects led to the development of a combined story and fact based patient educational resource for patients and caregivers with brain metastases now in clinical use. My work also established the use of virtual consultation to facilitate multidisciplinary care opinion for patients with spinal cord compression, reducing the need for patient transfers while securing reliable multidisciplinary opinions to facilitate timely commencement of optimal patient care.
From Evidence to Guidelines Development.
To translate research results into clinical practice, enabling tools are needed. The methodology of systematic reviews and clinical guidelines provide transparency, while engaging community opinion leaders’ to adapt evidence into clinical practice. I have chosen to engage in this process through involvement with the Cochrane Collaboration and the Cancer Care Ontario Program in Evidence Based Medicine.

At the level of capacity building, I served as the Toronto Chair to the Canadian Cochrane Collaboration and Network between 2001-2005, seeking out potential learners and creating learning opportunities both local and nationally. Specifically, training workshop were tailored and successfully conducted for trainees in internal medicine, family medicine, radiation oncology residents and fellows, and radiation oncology faculty in addition to systematic reviewers from other disciplines. As the Chair to the Supportive Care guidelines Group between 2001-2008, I have led the effort to identify key topics important in supportive care, engage clinical experts across multiple disciplines, serve as a methodological resource, resulting in the development of clinical guidelines on 8 different clinical areas including bone, brain metastases, skin care following radiotherapy, lymphedema, depression, pain, and shortness of breath. These documents represent part of the key resources in the field.

I have authored three Cochrane reviews (bisphosphonates in bone pain, chemoradiotherapy in esophageal cancer, preoperative radiotherapy for rectal cancer). The bisphosphonates review served as the basis for a Health Technology Report on this topic, while both esophageal and rectal reviews served as the basis for clinical practice guidelines for Ontario.

Optimizing the Use of Radiotherapy in the Management of Esophageal Cancer.
Radiotherapy has a key role to play in both the curative and palliative management of esophageal cancer although strategies to improve outcomes are still clearly needed. From a capacity building perspective, I serve as the Chair to the Esophageal Disease working group for the National Cancer Institute of Canada Clinical Trials Group since 2003, and has been a member of the Esophago-Gastric Task Force for the GI Intergroup US.

From a policy perspective, I have authored and co-authored the evidence and practice guidelines on the management of esophageal cancer, leading to improved consistency and quality of care in this area for our province. The availability of PET scan for the staging of esophageal cancer has until now been elusive to Ontarians. I led the review of the literature, co-authored and led the subsequent provincial discussions on PET and esophageal cancer. These efforts have translated into the approval of the use of PET for patients who are potential candidates for curative therapy. These practice changes have a direct effect on optimizing the choice and quality of therapy for esophageal cancer patients.

In terms of research, I have led a phase II study on the use of accelerated fractionation for the palliative management of dysphagia establishing its efficacy and favourable toxicity profile. As the Canadian Principal investigator, in collaboration with the Trans-Tasman Radiation Oncology Group, we are nearing completion of a study examining the effect of radiotherapy with or without chemotherapy for the relief of dysphagia (ES2). As the radiation oncology lead at our institution, we are currently conducting our second phase II study in tri-modality therapy for localized disease, where adjuvant sutent, is being tested. A strategy combining early brachytherapy and our experience in accelerated fractionation in esophageal cancer for the elderly is in development. My research has also contributed to establishing the role of PETCT in improving the quality of radiotherapy planning for esophageal cancer.
D. Research Funding

**Co-Investigator.** Behavioural determinants of Canadian radiation oncologists’ use of single fraction palliative radiation therapy for uncomplicated bone metastases. Canadian Cancer Society Research Institute (CCSRI). Knowledge to Action. PI: Christopher Dennis, Squires, Janet. Collaborator(s): Michael Brundage, Edward Chow, Alysa Fairchild, Ian Graham, Jeremy Grimshaw, Rebecca Wong, Jackson Wu. 79,918 CAD. [Clinical Trials]

**2015 Feb - 2018 Jan**

**Co-Investigator.** A phase III study of palliative radiotherapy for symptomatic hepatocellular carcinoma and liver metastases. Canadian Cancer Society Research Institute. Quality of Life Research Grants. PI: Dawson, Laura. Collaborator(s): Chris O’Callaghan, Jolie Ringash, Rebecca Kwok Sum Wong, Derek Jonker, Camilla Zimmerman, Sarin Ekizian, Dongsheng Tu. 299,916 CAD. [Clinical Trials]

**A phase III study of palliative radiotherapy for symptomatic hepatocellular carcinoma and liver metastases**

Advanced liver cancer is often not treatable and causes pain that is hard to control. In a prior study, Dr Laura Dawson found that low-dose radiation therapy reduced cancer-related pain in liver cancer patients. In this new clinical trial, she will compare the effectiveness of radiation vs. standard supportive care alone in improving pain in patients with advanced liver cancer who are not candidates for standard therapy. By determining an improved pain management strategy, this study could have a huge impact on quality of life for cancer patients in palliative care.

### E. Publications

#### 1. MOST SIGNIFICANT PUBLICATIONS

   *This is a review paper describing the current evidence supporting indications of radiotherapy in gastric cancer.*

   *This randomized trial was conceived and completed by the symptom control committee Canadian Cancer Clinical Trials Group, establishing the role of a single fraction as effective in providing pain control as pretreatment for bone metastases. It is significant both in its contribution to the practice of radiation oncology, as well as being testament of the impact of the symptom control committee which I am the chair.*

Palliative radiotherapy should be effective and delivered with the least delay. This work formed the basis of the clinical testing and implementation of an on-line planning process. The clinical results are to be published. This has been translated from research to clinical practice.

The first review was published in 2001. This is a substantial update incorporating new contemporary evidence and methodology. This has been a definitive resource in support of the use of combination chemoradiotherapy for the curative management of esophageal cancer. This review formed the foundation of the Ontario Practice Guideline on the same topic.

One of the strategic directions of the Symptom Control Committee at the National Cancer Institute of Canada is to examine strategies to improve the side effects of cancer treatments. Building on the results of SC12, this study established the effect of dexamethasone in the prophylaxis of radiation induced emesis. This work was awarded the most influential publication award in 2007 at Princess Margaret Hospital. Radiation Medicine Program.

G. Teaching and Design

1. Program innovation to build research capacity among radiation oncology oncology trainees

My contribution to residency research can be traced back to 2002. During this time, while research is an expectation, the mechanism in which trainees would initiate their projects were not well defined, and more substantial projects were often deferred due to a delayed start in the planning stages. We hypothesized that the introduction of a defined process, including an instructional research methods course would improve the quality and quantity of research undertaken by our trainees, and contribute to a life time quest for research for improved patient care. With that in mind, I led the creation of the radiation oncology resident research program, putting in place specific goals, objectives, responsibilities and milestones. The framework allowed both residents and faculty to share a common expectation, encouraged dialogue during early months of the residency to secure a supervisor and a research topic. She also designed and implemented the PGY1 research methods course that was first offered in 2002. The program structure was further refined in 2012 with the introduction of the Biannual Resident Research Half Day. The objectives were to provide a forum for residents to present...
their work in progress as well as prior to external dissemination of their findings. It was also expected to serve the dual objective of broadening faculty engagement.

We first compiled the annual Resident Research Report in 2002 summarizing academic deliverables (abstracts, publications, grants etc) to provide metrics and evidence for ongoing improvement of the program. Guidance to consider creative professional activities was introduced in 2011. Each of these process improvements has evolved from novel ideas at the time to become part of our standard curriculum. Metrics for impact can be observed from the research reports, evaluations of the events. Publications during residency provide a and as broad summary indicator.

2. Incorporating pedagogy into the clinical environment

Clinical, education and research excellence is an essential triad for continuously striving for the best outcomes for our patients. In contrast to the robust training in physician training for clinical and research excellence, knowledge based on how to become an excellence teacher receives minimal attention. Mechanisms to bring pedagogical principles to our faculty deserves deliberate and systematic action. It was hypothesized that faculty development that is embedded within our daily activities will enable the greatest uptake. With this in mind, in 2015 put in place the first of a series of efforts. RMP Education Rounds were introduced in Jan 2015, designed to provide a sustained forum to highlight novel education theories, education projects in development and accomplishments by our peers. The Radiation Medicine Summer Series entitled "New Age Education" was launched. Designed to appeal to radiation medicine practitioners and beyond, the series provided frameworks, tools and new ideas in education that would inspire. In 2016, the University of Toronto Department of Radiation Oncology Evening journal club were introduced. This education event goes beyond our organization walls and is designed to build a forum for learning among the radiation medicine community across greater GTA.

e. Teaching research skills to radiation medicine trainees in low and middle income country

Research capacity building is recognized to be critical skill that is required to enable innovation and change. From evidence to practice, knowledge translation requires deliberate intent, action and tools. The Radiation Medicine Program at Princess Margaret Cancer Center has as its vision to be “the radiation medicine education provider of choice” although efficient and careful deployment of resources are needed for sustainability and impact, especially when designing strategies to support colleagues in low and middle income countries. It is hypothesized that a joint mentorship strategy between the host institution and external faculty (e.g. PMH) as a source of methodological expertise and capacity, would be effective in enhancing clinical research capacity. In 2015, the inaugural PMH-Ghana research mentorship program was established. A collaborative project with the national radiation oncology facility in Ghana, this year long mentorship program accepted its first cohort of five radiation oncology trainees in Jan 2015. This successful program will expand her offerings to trainees in Nigeria and Zimbabwe in 2016.

1. INNOVATIONS AND DEVELOPMENT IN TEACHING AND EDUCATION

2016 Jan - present  
Evening Journal Club, Continuing Education, Faculty of Medicine, Dept of Radiation Oncology  
This education event is designed to build a forum for learning among the radiation medicine community across greater GTA. Speakers are invited to show case innovations and research accomplished or planned as a University Department.

2015 Jan - present  
PMH-Ghana research mentorship program, Postgraduate MD, Faculty of Medicine, Dept of Radiation Oncology, Princess Margaret Cancer Center  
A collaborative project with the national radiation oncology facility in Ghana, this year long mentorship program is designed to teach radiation oncology residents in low and middle income countries critical appraisal and basic research methods. It is our vision that teaching and mentorship provided in this way would enable critical evaluation of new technologies and evidence - a life long skill that is the cornerstone for better patient care and outcomes.

2015 Jan - present  
RMP Education Rounds, Faculty Development, Faculty of Medicine, Dept of Radiation Oncology  
Designed to provide a sustained forum to highlight novel education theories, education projects in development and accomplishments by our peers.
2010 - present  Research Methods course - Radiation Oncology Residency Program, Postgraduate MD, Faculty of Medicine, Dept of Radiation Oncology, Post-Graduate Medical Education Resident Training Program, Princess Margaret Hospital  
*This is an introductory research course designed for PGY1-2 (delivered during academic block). Topics ranged from Qualitative research to randomized trials.*

2015 Jul - 2015 Aug  Summer Series - New Age Education, Faculty Development, Faculty of Medicine, Dept of Radiation Oncology, Radiation Medicine Program  
*Designed to appeal to radiation medicine practitioners and beyond, the series provided frameworks, tools and new ideas in education that is intended to inspire.*

2012 Jul 1 - 2013 Jun 30  Biannual Research Half Day - Radiation Oncology Residency Program, Postgraduate MD, Faculty of Medicine, Dept of Radiation Oncology, Post-Graduate Medical Education Resident Training Program, Princess Margaret Hospital  
*Research Half Day was designed to provide a forum for residents to*  
- present their work in progress  
- present their major research project for approval  
- provide feedback to your peers  
- Obtain feedback from your peers and faculty  
- nominate projects for CARO/ASTRO/UT research day submissions (Jan session)  
- practice presentation for CARO/ASTRO presentations (Aug session).

H. Research Supervision

1. PRIMARY OR CO-SUPERVISION

Undergraduate Education

2014  **Primary Supervisor.** B. Sc. A Springer. *Strategies to increase clinical trial accrual.*

2011  **Primary Supervisor.** B. Sc. A Ng. *Patient specific quality assurance in radiation oncology.*

2005  **Primary Supervisor.** B. Sc. K Barrett. *A pilot project in the redesign of quality assurance.*

2003  **Primary Supervisor.** B. Sc. C Tsang. *Effect of duplicate publications on systematic reviews.*

2002  **Primary Supervisor.** B. Sc. D Yung. *Validation of surface contour generated by 3D digital surface imaging system using CT generated surface contour.*

2000  **Primary Supervisor.** B. Sc. K Fung. *Determining minimal clinically Important effect size in palliative radiotherapy.*

Graduate Education

2010 - 2011  **Primary Supervisor.** MSc. K Davidge. *Function and Health Status outcomes following soft tissue reconstruction for Limb preservation in extremity soft tissue sarcoma.*

2007  **Primary Supervisor.** MSc. J Wu. *Impact of specialized palliative radiotherapy clinics on radiotherapy utilization.*

2005  **Primary Supervisor.** PhD. D Letourneau. *Cone Beam Enabled One Step sim and treat process for palliative radiotherapy.*

2001  **Primary Supervisor.** MSc. M McQuestion. *A qualitative Descriptive study of patients’ experiences of receiving primary radiation Treatment for head and neck cancer.*

Undergraduate MD

2010  **Primary Supervisor.** Katherine Wheeler.

2004  **Primary Supervisor.** D Ng. *Determinants of Community Health Research Project: Evaluation of short stories as an educational tool for patients with brain metastases.*

2003  **Primary Supervisor.** J Sze. *Qualitative study on the caregiver expectations for patients with brain metastases.*

2002  **Primary Supervisor.** S Marisette. *A qualitative study on the informational needs for coping and treatment decision making for patients with brain metastases.*

**Postgraduate MD**

2010  **Primary Supervisor.** Clinical Fellow. Nichola Naidoo. *Pattern of Practice of a specialized palliative radiation Oncology Program.*

2009  **Primary Supervisor.** Clinical Fellow. Amy Shorthouse. *Retrospective Review of the Pattern of Practice of Esophageal Cancer At Princess Margaret Hospital.*

2009  **Primary Supervisor.** Clinical Fellow. Kathy Pope. *2D vs 3D palliative radiotherapy planning.*

2008  **Primary Supervisor.** Clinical Fellow. A Potter. *Health Outcomes in patients at high risk of fracture from femoral metastases.*

2007  **Primary Supervisor.** Clinical Fellow. D Fitzpatrick. *Virtual consultation to facilitate consultation for malignant spinal cord compression.*

2007  **Primary Supervisor.** I Kong. *Impact of 4DCT on esophageal radiotherapy planning.*

2006  **Primary Supervisor.** D Vesprini. *Role of PET scan in planning of esophageal cancer.*

2005  **Primary Supervisor.** Clinical Fellow. D Grabarz. *Cone beam CT in palliative radiotherapy.*

2004  **Primary Supervisor.** Clinical Fellow. C Elder. *Cone beam CT in palliative radiotherapy.*

2003  **Primary Supervisor.** Clinical Fellow. K Wiltshire. *Organ motion study in esophageal cancer.*

2002  **Primary Supervisor.** Clinical Fellow. P Haddad. *CT simulation in palliative radiotherapy.*
Clinical Research Fellow (MD)

2014 Jul - 2015 Jun  
**Primary Supervisor.** Moises Russos. A systematic review on research capacity building strategies in oncology for low and middle income countries. Completed 2015.

2. OTHER SUPERVISION

Thesis Examiner

2014 Jul  
Francisco Vera-Badillo, Medical Science. *Bias in Reporting of Randomized Clinical Trials in Oncology.* Supervisor(s): Ian Tannock. Completed 2013.

2013 Jul  
Curriculum Vitae

Dr. Frederick Yoon
Radiation Oncologist

2008  Champions of Care, Sunnybrook Health Sciences Centre, February 2008.
Description (taken from http://sunnybrook.ca/foundation/content/?page=champions): If you or a loved one has received special care from a doctor, nurse, technician, volunteer or any staff member, you can recognize them as a Champion of Care by making a donation in their honour. Your Champion of Care will receive an acknowledgement card and a commemorative pin to wear in recognition of your generosity.
Jasper Yuen

---

### Peel Radiation Oncology, Peel Regional Cancer Centre, Credit Valley Hospital

**Staff Radiation Oncologist**
- Aug 2009-present
- Head of Brachytherapy
- Physician Lead - Gynecology
- Physician Co-Lead - Thoracic
- Physician Champion - Smoking Cessation Program, Quality Assurance
- Site Groups: Gynecology, Thoracic, Prostate, Breast, Palliative, SBRT
- Hospital Privileges
  - Credit Valley Hospital
  - William Osler Health Centre - Brampton Civic Hospital

### Education

#### Fellowship in Radiation Oncology

**Memorial Sloan-Kettering Cancer Center**  
New York, New York  
- **Brachytherapy Fellowship**  
  - July 2008 – June 2009

#### Residency in Radiation Oncology

**University of Western Ontario**  
London, Ontario  
- **July 2004 – June 2008**  
- **Chief Resident 2007**  
- **PostGraduate Education Committee**  
- **Residency Selection Committee**

#### First Year Internship in Radiation Oncology

**University of Alberta**  
Edmonton, Alberta  
- **July 2003 – June 2004**

#### Doctor of Medicine

**University of Western Ontario**  
London, Ontario  
- **September 1999 – June 2003**  
- **Summer Research Training Program**  
- **Class Secretary and Treasurer**

#### Bachelor of Science with Honours First Class (ssp)

**Queen’s University**  
Kingston, Ontario  
- **Life Sciences – Subject of Specialization**  
- **September 1995 – May 1999**

### Awards received

- **Alexander Rutherford Scholarship**  
  - 1995

Abstracts
CT-based HDR cervix brachytherapy: Early toxicity and results using the Vienna fractionation
- L. VanderSpek, M. Davidson, D. D'Souza, J. Yuen, J. Hammond, D. Batchelar
- Awarded Poster Presentation at the 2008 World Congress of Brachytherapy in Boston

The Use of CT Image Based Treatment Planning in Cervical Brachytherapy
- J. Yuen, M. Davidson, D. D'Souza
- Awarded Poster Presentation at the 2007 American Society of Therapeutic Radiology and Oncology Annual Meeting in Los Angeles

Does Intraoperative ultrasound guidance benefit routine intracavitary cervical carcinoma therapy?
- M. Davidson, D. D'Souza, J. Yuen, J. Radwan, J. Hammond, T. Murray, L. Derrah, D. Batchelar
- Awarded Poster Presentation at the 2007 American Society of Therapeutic Radiology and Oncology Annual Meeting in Los Angeles

Comparing Two Strategies of Dynamic Intensity Modulated Radiation Therapy Using Helical Tomotherapy Versus 3D Conformal Radiation Therapy in the Hypofractionated Treatment of the Pelvis in High-Risk Prostate Cancer
- Awarded Poster Presentation at the 2006 Canadian Association of Radiation Oncologists Annual Meeting in Calgary
- Awarded Poster Presentation at the 2006 American Society of Therapeutic Radiology and Oncology Annual Meeting in Philadelphia

Comparing Helical Tomotherapy, Step and Shoot Intensity Modulated Radiation Therapy, and Traditional Conformal Radiation Therapy Using 4-Dimensional Computed Tomography and Respiratory Gating to Treat Early Stage Non Small Cell Lung Cancer
- J. Yuen, S. Gaede, S. Yartsev, E. Yu
- Awarded Poster at the 2006 Canadian Association of Radiation Oncologists Annual Meeting in Calgary

Oral Presentations
Image-Guided HDR Brachytherapy Treatment Planning: Does Custom CT Planning for Each Insertion Provide Better Conformal Avoidance of Organs at Risk?
- J. Yuen, M. Davidson, D. D'Souza, D. Batchelar
- Awarded Oral Presentation at the 2007 Canadian Association of Radiation Oncologists Annual Meeting in Toronto
### 3D Image Based Treatment Planning in Cervix Cancer Brachytherapy: The Use of CT Imaging in Assessing Dose Parameters
- **J. Yuen**, D. Batchelar, D. D’Souza, S. Karnas
  - Awarded Oral Presentation at the 2006 Canadian Association of Radiation Oncologists Annual Meeting in Calgary
  - Awarded Poster Discussion at the 2007 American Brachytherapy Society Annual Meeting in Chicago

### Comparing Two Strategies of Dynamic Intensity Modulated Radiation Therapy Using Helical Tomotherapy Versus 3D Conformal Radiation Therapy in the Hypofractionated Treatment of the Pelvis in High-Risk Prostate Cancer
  - Awarded Oral Presentation at the 2006 University of Western Ontario Oncology Research and Education Day

### Implementation of HDR Brachytherapy for Cervix Carcinoma: Multi-Modality Image-Guidance for Efficient Workflow
- D. Batchelar, M. Davidson, **J. Yuen**, JA. Hammond, J. Radwan, D. D’Souza,
  - Awarded Oral Presentation at the 2007 Canadian Association of Radiation Oncologists Annual Meeting in Toronto
  - Awarded People’s Choice Award for Best Oral Presentation

### Gynaecologic HDR Interstitial Brachytherapy: The Role of Radiation Oncology Nursing in Multidisciplinary Care
  - Awarded Poster at the 2006 Canadian Association of Radiation Oncologists Annual Meeting in Calgary

### Continuing Education
- Radiation Therapy Oncology Group (RTOG) 2005

1. EDUCATION

Degrees

Department of Curriculum, Teaching and Learning, Ontario Institute for Studies in
Education, Toronto, Ontario, Canada. Supervisor(s): Dr. Ruth Childs.

1984 – 1995 Bachelor of Science Degree, Biology, University of Guelph, Guelph, Ontario,
Canada.

Postgraduate, Research and Specialty Training

June 2011 EHPIC 2011, Educating Health Professionals in Interprofessional Care Certificate,
Continuing Education and Professional Development, Faculty of Medicine, University
of Toronto, Toronto, Ontario, Canada.

2009 – 2011 Interprofessional Care (IPC) Module 6: Leadership in Interprofessional Teams, The
Michener Institute for Applied Health Sciences, Toronto, Ontario, Canada.

2010 Interprofessional Care (IPC) Module 2 – Roles, Stereotypes and Power, The
Michener Institute, Toronto, Ontario, Canada.
2009 – 2010 Sunnybrook-Schulich Advanced Leadership Development Program, Sunnybrook Health Sciences Centre and Schulich School of Business, York University, Toronto, Ontario, Canada.

2009 MRS Clinical Preceptorship Certificate, Canadian Association of Medical Radiation Technologists (CAMRT), Ottawa, Ontario, Canada.

2005 Teacher Training Certificate Program (Stepping Stones), University of Toronto Faculty of Medicine Centre for Faculty Development, Toronto, Ontario, Canada.

2003 Diversity Training Workshop, The Michener Institute, Toronto, Ontario, Canada.

2001 Conflict Resolution Workshop, The Michener Institute, Toronto, Ontario, Canada.

1998 Measuring Student Achievement Certificate, Canadian Association of Medical Radiation Technologists (CAMRT), Ottawa, Ontario, Canada.

1996 CPR Instructor Training Course, Heart and Stroke Foundation, Wellesley Hospital, Toronto, Ontario, Canada.

1992 Diploma, Radiation Therapy, Toronto-Sunnybrook Regional Cancer Centre (T-SRCC) School of Radiation Therapy, Toronto, Ontario, Canada.

Qualifications, Certifications and Licenses

1999 – Present Associated Member, Graduate Appointment, Institute of Medical Science, University of Toronto

1992 – Present Medical Radiation Technologist (Radiation Therapy), College of Medical Radiation Technologists of Ontario, Toronto, Ontario, Canada.
2. EMPLOYMENT

Current Appointments

2009 – Present  
Director of Health Professions, Interprofessional Education and Interprofessional Care, Sunnybrook Health Sciences Centre, Toronto, Ontario, Canada.  
Oversee all Health Professional groups that are members of the Professional Advisory Committee (PAC), Chair of the PAC. Report to Chief Nursing Executive and Health Professions and Vice President, Education as well as the Medical Advisory Committee. Oversee Interprofessional Education Structured Placements at Sunnybrook Health Sciences Centre, as well as unstructured Interprofessional Education opportunities. Chair of the Interprofessional Education Committee.

Previous Appointments

CLINICAL

1992 – 1996  
Radiation Therapist, Toronto-Sunnybrook Regional Cancer Centre, Toronto, Ontario, Canada.

HOSPITAL

2006 – 2009  
Manager, Education and Research, Radiation Therapy, Toronto-Sunnybrook Regional Cancer Centre, Toronto, Ontario, Canada.

2004 – 2006  
Radiation Therapy Clinical Educator, Toronto-Sunnybrook Regional Cancer Centre, Toronto, Ontario, Canada.

1998 – 1999  
Interim Program Didactic Teaching Faculty, Princess Margaret Hospital / Toronto-Sunnybrook Regional Cancer Centre, Toronto, Ontario, Canada.

1996 – 1998  
Radiation Therapy Didactic and Clinical Instructor, Toronto-Sunnybrook Regional Cancer Centre, Toronto, Ontario, Canada.

1990  

1987 – 1989  
Laboratory Assistant (Haematology)/ Pathology Assistant – Oshawa General Hospital, Oshawa, Ontario, Canada.

RESEARCH

2006 – 2009  
3. HONOURS AND CAREER AWARDS

Distinctions and Research Awards

LOCAL

Received

2003  TMI Research Award for Radiation Faculty Research Project - Phase 1: Evaluating the value of formal ethics training in Radiation Therapy Education. The Michener Institute (TMI), Toronto, Ontario, Canada.

Teaching Awards

LOCAL

Received

2007  Professional Development and Continuing Medical Education Award, University of Toronto Department of Radiation Oncology, Toronto, Ontario, Canada.

2004  Year End Student Award for “Most Positive Faculty”, University of Toronto / The Michener Institute, Toronto, Ontario, Canada.

2004  Medical Radiation Sciences Classroom Teaching Award, University of Toronto Department of Radiation Oncology, Toronto, Ontario, Canada.
Student/Trainee Awards

NATIONAL

Received

1992 Dr. Alon J. Dembo Award for Academic Excellence for receiving the highest marks on the National Certification Examinations, Canadian Association of Medical Radiation Technologists, Ottawa, Ontario, Canada.

Professional Associations

2004 – 2008 Member, Canadian Association of Radiation Oncology (CARO), Ottawa, Ontario, Canada.

1999 – 2006 Member, International Society of Radiographers and Radiological Technologists (ISRRT) Canadian Association of Medical Radiation Technologists (CAMRT/ACTRM), Ottawa, Ontario, Canada.

Administrative Activities

LOCAL

2009 – Present Sunnybrook Health Professions Leadership Representative, Medical Advisory Council. It is a Sunnybrook Health Sciences Centre (Sunnybrook) policy to establish a Medical Advisory Committee (MAC) of the Board to comply with the Public Hospitals Act. The Medical Advisory Committee (MAC) advises the Board concerning, and supervises on behalf of the Board, all aspects of medical, dental and midwifery care appropriate to a university teaching hospital.

2009 – Present Sunnybrook Health Professions Leadership Representative, Quality of Care Committee. It is Sunnybrook policy to establish a Quality of Care Committee to advise the Medical Advisory Committee regarding quality assurance and quality improvement in medical care.

2009 – Present Sunnybrook Health Professions Leadership Representative, Q-CIPA Committee. It is Sunnybrook Health Science Centre (Sunnybrook) policy to establish a Quality of Care Committee under the Quality of Care Information Protection Act [QCIPA], November 1, 2004. This committee will be referred to as the QCIPA-QCC. The purpose and function of this committee is to study, assess or evaluate the provision of health care to a patient or group of patients with a view to improving or maintaining the quality of health care or the level of skill, knowledge and competence of the persons who provide the health care.

2009 – Present Chair, Sunnybrook Health Sciences Centre Professional Advisory Committee
It is Sunnybrook policy to establish a Professional Advisory Committee (PAC). The PAC represents a diverse spectrum of health professionals who provide patient care, education and research. It is an important vehicle for creating a supportive working environment in which health professionals are supported to help achieve the patient care and academic goals of Sunnybrook Health Sciences Centre.

2009 – Present  
**Chair**, Sunnybrook Health Sciences Centre Interprofessional Education Committee.

*It is the policy of Sunnybrook Health Sciences Centre to establish an Interprofessional Education (IPE) Committee to advise on and facilitate Interprofessional learning activities and initiatives throughout the hospital.*

2009  
**Odette Cancer Centre Representative**, Sunnybrook Health Sciences CPR Committee.

*It is a Sunnybrook Health Sciences Centre (Sunnybrook) Policy to establish a CPR Committee to advise and make recommendations to the SB Medical Advisory Committee (MAC) with the view to review, maintain and/or improve processes and practices of cardio-pulmonary resuscitation.*

2009  
**Member of Admissions Committee**, Institute of Medical Science Radiation Therapy Graduate program Admissions Committee, University of Toronto.

2009  
**Member**, PAC Interprofessional Education Planning Sub-committee, Sunnybrook Health Sciences Centre.

2008 – 2009  
**Radiation Therapy Representative**, Sunnybrook Health Sciences Professional Advisory Committee (PAC).

*It is Sunnybrook policy to establish a Professional Advisory Committee (PAC). The PAC represents a diverse spectrum of health professionals who provide patient care, education and research. It is an important vehicle for creating a supportive working environment in which health professionals are supported to help achieve the patient care and academic goals of Sunnybrook Health Sciences Centre.*

2006  
**Co-Chair**, Toronto-Sunnybrook Regional Cancer Centre Department of Radiation Oncology E-Learning Retreat, Feb. 2006.

2004 – 2009  
**Member**, Toronto-Sunnybrook Regional Cancer Centre Radiation Program Education Advisory Committee.

2004 – 2009  
**Chair**, Toronto-Sunnybrook Regional Cancer Centre CPR Executive Committee.

2004 – 2009  
**Member**, Toronto-Sunnybrook Regional Cancer Centre Patient Education Steering Committee

2004 – 2007  
**Co-Chair and Course Director**, University of Toronto Department of Radiation Oncology Toronto Medicine Conference, Kingsbridge, Ontario (2nd – 4th Annual Conferences).

2004 – Present  
**Member**, University of Toronto Academic Leadership Team

2004 – Present  
**Member**, University of Toronto Academic Mentorship Committee
2004 – 2005  Chair, University of Toronto/The Michener Institute Student Assessment Committee
2002 – 2004  Member, Department of Radiation Oncology Educational Advisory Committee
2001 – 2004  Member, University of Toronto/The Michener Institute Admissions Committee
1999 – 2004  Member, University of Toronto/The Michener Institute Joint Curriculum Development Committee
1999 – 2004  Member, University of Toronto/The Michener Institute Radiation Therapy Curriculum Review Committee
1999 – 2004  Member, University of Toronto/The Michener Institute Radiation Therapy Program Review
1999 – 2004  Member, Joint University of Toronto/The Michener Institute Policy and Procedure Committee
1999 – 2000  Member, The Michener Institute Organizational Learning Team
1998 – 2001  Member, Canadian Association of Medical Radiation Technologists Council on Education Committee Radiation Therapy (Certification Examination Board)

Peer Review Activities

EDITORIAL BOARDS

Member
2004 – 2009  Canadian Journal of Medical Imaging and Radiation Sciences, Editorial Board

GRANT REVIEWS

Co-Chair Selection Committee
2009 – 2010  Practice-Based Research (PBR) Awards Committee

C. Academic History

2. RESEARCH AWARDS

Grants, Contracts and Clinical Trials

PEER-REVIEWED GRANTS

Funded

2007 **Collaborator**, Developing an Advanced Practice Radiation Therapy Role in Skin Cancer: Demonstration Phase Funding. Ministry of Health Grant via Advanced Practice for Radiation Therapy Project Oversight Committee. Collaborators: Robson, S., Barker, R., Barnes, T. $72,000 Canadian Funds.

2007 **Collaborator**, Developing an Advanced Practice Radiation Therapy Role in Palliative Care: Demonstration Phase Funding. Ministry of Health Grant via Advanced Practice for Radiation Therapy Project Oversight Committee Developing an Advanced Practice Radiation Therapy. Collaborators: Robson, S., Barker, R., Danjoux C. $72,000 Canadian Funds.

2006 – 2007 **Collaborator**, The effectiveness of an educational intervention on the congruence of prostate and rectal contouring as compared to a gold standard in planning for three-dimensional radiotherapy for prostate cancer (3D-CRT). CARO – ACURA Award. Collaborators: Szumacher, E., Dumbrowski, A., Crook, J., Harnett, N., Kelly, V., Danjoux, C., Woo, M., Barker, R., Ackerman, I. $10,000 Canadian Funds.

2003 **Collaborator**, Evaluating the value of formal ethics training in Radiation Therapy Education. Radiation Therapy Faculty Research project - Phase 1. The Michener Institute for Applied Health Sciences Research Award. $1,000.00 Canadian Funds.

Salary Support and Other Funding

OTHER FUNDING

TRAVEL GRANTS

2011 Travel Grant. American Society of Radiologic Technologists. $1,000.00. Miami, Florida, U.S.A. Barker, R., Di Prospero, L., What’s all the talk about Interprofessional Education
2011

2. PEER-REVIEWED PUBLICATIONS

Refereed Publications

Abstracts

**Other Publications**

**Barker, Ruth.** A Retrospective Analysis of an Angoff Standard Setting Study Using Generalizability Theory to Determine the Stability of the Cut-Score, the Number of Items and the Number of Raters. Masters Thesis Project submitted in conformity with the requirements for the degree of Masters of Education in Measurement and Evaluation, Department of Curriculum, Teaching and Learning, Ontario Institute for Studies in Education of the University of Toronto, 2004.

**E. Presentations and Special Lectures**

1. INTERNATIONAL

**Invited Lectures and Presentations**

**Other Presentations**
Oral Presentations

**Presenter.** What’s all the talk about Interprofessional Education (IPE)?, ISSRT (International Society of Radiographers and Radiological Technologists), World Congress, Toronto, Ontario, Canada. Presenter: Barker, R. June 7-10, 2012

Poster Presentations

**Presenter.** The Development of an Interprofessional Mentorship Program for Faculty Members Within the Department of Radiation Oncology, University of Toronto – A New Beginning. Association for Medical Education in Europe (AMEE). Genova, Italy. Presenters: Szumacher, E., Ringash, J., Manchul, L., Barker, R., Kane, G., Palmer, C. September 2006.

2. NATIONAL

Abstracts and Other Papers

Invited Lectures and Presentations

Other Presentations

Oral Presentations

Poster Presentations

3. PROVINCIAL/ REGIONAL

Invited Lectures and Presentations

**Presenter.** INVESTIGATING ADVANCE PRACTICE for RADIATION THERAPISTS in ONTARIO – WHAT’S’s HAPPENING at TSRCC? Presented at the 10th Anniversary Celebration of the RRRP, Toronto Sunnybrook Regional Cancer Centre. Toronto, Ontario, Canada. Presenter(s): **R. Barker.** 2005

4. LOCAL

Invited Lectures and Presentations

**Presenter.** CELEBRATING the ACHIEVEMENTS of WOMEN Health CARE -120 YEARS of WOMEN at the UNIVERSITY of TORONTO. University of Toronto Faculty of Medicine Interprofessional Education Seminar Series. Toronto, Ontario, Canada. Presenter(s): **Barker, R.** 2004

**Presenter.** The PURSUIT of a GRADUATE DEGREE – ADVICE for BUSY PROFESSIONALS. Lunchtime Faculty Education Session at The Michener Institute. Toronto, Ontario, Canada. Presenter(s): **Barker, R.** 2003.

Other Presentations

Lay and Media Presentations

**Presenter.** Laying the Foundations for Qualitative Research Workshop Practiced Based Research, Sunnybrook Health Sciences Centre, Toronto, Ontario, Canada. Presenter: **Barker, R.** October 22, 2010.

**Presenter.** Sun Sense: Prevention and Early Detection of Skin Cancer, Sanofi-Pasteur Lunchtime Employee Information Session, North York, Ontario, Canada. Presenter: **Barker, R.** June 5, 2006,

**Presenter.** A Virtual Tour Through Radiation Therapy Treatment to the Brain. Brain Tumour Awareness Month

**Presenter.** Math Career Day Presentations: Trigonometry in Radiation Therapy. York Regional Catholic School Board, Aurora, Ontario, Canada. Presenter: Barker, R.

**Oral Presentations**

**Presenter:** A Mutual Learning Opportunity, George Brown College Internationally Educated Nursing Students and the Sunnybrook Interprofessional Team, Interprofessional Education(IPE)/Interprofessional Care (IPC) Showcase, Sunnybrook Health Sciences Centre, Toronto, Ontario, Canada. Presenter: Barker, R. June 6, 2012.

**Presenter:** Interprofessional Education Matters, Interprofessional Education(IPE)/Interprofessional Care (IPC) Showcase, Sunnybrook Health Sciences Centre, Toronto, Ontario, Canada. Presenter: Barker, R. June 6, 2012.

**Presenter.** Standard Setting, Past, Present and Future. The U of T Faculty of Medicine Donald R. Wilson Centre for Research in Education Research Day, Toronto, Ontario, Canada. Presenter: Barker, R. 2004

**Poster Presentations**

**Presenter.** The development of a screening tool to facilitate the provision of quality patient focused supportive care within a radiation therapy department. Interprofessional Education/Interprofessional Care, Sunnybrook Health Sciences Centre, Toronto, Ontario, Canada. Presenters: Maamoun, J., Fitch, M., Robson, S., Barker, R., Robson, S., Gillies, C., Turner, A., Lange-Mechlan, I., Kiss, A., and Gardner, S. June 2010

**Presenter.** Standard Setting, Past, Present and Future. The U of T Faculty of Medicine Donald R. Wilson Centre for Research in Education Research Day, Toronto, Ontario, Canada. Presenter: Barker, R. 2004

**F. Teaching and Design**

Please see Teaching Dossier for details.
Curriculum Vitae

Renate Bradley
MRT(T)

A. Date Curriculum Vitae is Prepared: 2016 February 26

Only includes Activities from July 2015 to July 2016

B. Biographical Information

1998 BSc, Neuroscience, University of Toronto

Postgraduate, Research and Specialty Training

2013 Jun 25 - 2013 Jun 26 Comprehensive CIHR Grant Development Workshop, Ryerson University, Toronto, Ontario, Canada
2012 Preparing for Leadership, Canadian Management Centre, Ontario, Canada
2007 Jan 4 - 2007 Feb 28 A Transformational Leadership Course, The Michener Institute, Toronto, Ontario, Canada
2007 Image Guided Radiation Therapy Workshop, Princess Margaret Hospital
2004 Online Teaching, University of Toronto
2003 Designing and Assessing Learning, Michener Institute for Applied Health Sciences

Qualifications, Certifications and Licenses

1998 - 2000 Certificate in Instructing Adults, Adult Education, George Brown College, Toronto, Canada
1998 Certificate in Medical Dosimetry, Medical Dosimetry, Medical Dosimetry Certification Board, United States
1985 Diploma, Ontario School of Radiation Therapy
License as M.R.T.T. (Medical Radiation Technologist), Radiation therapy, Ontario School of Radiation therapy (Princess Margaret Hospital), Toronto, Canada

2. EMPLOYMENT

Current Appointments

2011 - present  Clinical Liaison Officer (CLO) & Professor, Undergraduate BSc Radiation Therapy, Physics, Laurentian University/Michener Program, Sudbury, Canada

BSc. Radiation Therapy Program, Michener Institute/Laurentian University

2008 - present  Clinical Liaison Officer (CLO) & Professor, Medical Radiation Sciences (UT/Michener), Department of Radiation Oncology, Michener Institute for Applied Health Sciences/University of Toronto, Toronto, Canada

U of T/Michener Joint Program

2001 - present  Instructor, Department of Radiation Oncology, Faculty of Medicine, University of Toronto

3. PROFESSIONAL AFFILIATIONS AND ACTIVITIES

Professional Associations

2012 - present  Board Executive member, Medical Dosimetry Certification Board, US

1998 - present  Member, American Association of Medical Dosimetrist

1993 - present  Member, College of Medical Radiation Technology of Ontario

1990 - present  Member, Canadian Association of Medical Radiation Technology

Administrative Activities

LOCAL

Michener Institute for Applied Health Sciences

2009 - present  Member, Interprofessional Curriculum Committee, Undergraduate Education

Academic Coordinators of Clinical Education (ACCE).
Curriculum Vitae

Angela Cashell
M.R.T.(T) A.C.T., B. Sc.(Hons), MSc. CIA

A. Date Curriculum Vitae is Prepared: 2016 February 26

Only includes Activities from July 2015 to July 2016

B. Biographical Information

1. EDUCATION

Degrees
2009 MSc, Radiography (Therapeutic Pathway), Sheffield Hallam University, United Kingdom
2005 Jul Leadership, Rotman School of Management, University of Toronto, Toronto, Ontario, Canada
2000 BSc, Radiation Therapy (Hons), Anglia Ruskin University, Cambridge, United Kingdom

Qualifications, Certifications and Licenses
2005 Rotman Leadership Development Certificate, University of Toronto
1994 Adult Education Teaching Certificate, George Brown College, Toronto, Ontario
1990 Advanced Certification, Radiation Therapy, Canadian Association of Medical Radiation Technologists, Ottawa, Ontario, Canada
1984 Diploma of the College of Radiographers, Radiation Therapy, Middlesex Hospital, London, United Kingdom

2. EMPLOYMENT

Current Appointments
2002 - present Instructor, Radiation Oncology, University of Toronto
1999 - present Clinical Educator, Radiation Medicine Program, Princess Margaret Hospital, Toronto, Ontario
3. PROFESSIONAL AFFILIATIONS AND ACTIVITIES

Professional Associations

2003 - present Associate member, Canadian Association of Radiation Oncologists
1986 - present Member, Canadian Association of Medical Radiation Technologists
1986 - present Member, College of Medical Radiation Technologists of Ontario
1986 - present Member, Ontario Association of Medical Radiation Technologists

Administrative Activities

NATIONAL
Canadian Association of Medical Radiation Technologists
2003 - present Member, Continuing Education Advisory Committee

Canadian Association of Radiation Oncology
2007 - present Member, Education Committee

PROVINCIAL / REGIONAL
College of Medical Radiation Technologists of Ontario
2010 - present Peer Assessor, Peer Assessor, Quality Assurance Committee, Ontario, Canada.
2007 - present Elected Member, Inquiries, Complaints and Reports Committee

LOCAL
Princess Margaret Hospital
2002 - present Member, RMP Education Advisory Group
2000 - present Member, Breast Quality Team
1999 - present Member, Patient Education Advisory Committee
1998 - present Chair, Radiation Therapy Education Committee

Peer Review Activities

MANUSCRIPT REVIEWS
Reviewer
2012 - present Journal of Medical Imaging and Radiation Sciences
2011 May - present Journal of Medical Imaging and Radiation Science

PRESENTATION REVIEWS
Reviewer
2010 Dec - present Canadian Association of Medical Radiation Technologists
Curriculum Vitae

Martin J. Chai

A. Date Curriculum Vitae is Prepared: 2016 February 26

Only includes Activities from July 2015 to July 2016

B. Biographical Information

1. EDUCATION

Degrees

1998 - 2000 Master of Theological Studies, Tyndale Seminary, Toronto, Ontario
1992 - 1994 Diploma, Radiation Therapy, Odette Cancer Centre, Toronto, Ontario
1988 - 1992 BSc, Biology (major) and Psychology (minor), Queen’s University at Kingston, Ontario

Qualifications, Certifications and Licenses

1999 - present Basic Cardiac Life Saving Instructor Certification, Heart and Stroke Foundation of Ontario, Toronto, Ontario
1995 - present Certificate of Registration, College of Medical Radiation Technologists of Ontario, Toronto, Ontario

2. EMPLOYMENT

Current Appointments

2009 - present Program Communication Liaison, Radiation Sciences, Michener Institute for Applied Health Sciences, Toronto, Ontario
2000 - present Instructor, Radiation Oncology, University of Toronto, Toronto, Ontario
2000 - present Professor, Radiation Sciences, Michener Institute for Applied Health Sciences, Toronto, Ontario

3. PROFESSIONAL AFFILIATIONS AND ACTIVITIES
Professional Associations

2012 - present  
**BLS Instructor**, Michener Institute for Applied Health Sciences - Continuing Education Department

2008 - present  
**Continuing Education Instructor**, Canadian Association of Medical Radiation Technologists

1995 - present  
**Member**, Canadian Association of Medical Radiation Technologists

1995 - present  
**Member**, Ontario Association of Medical Radiation Technologists

Administrative Activities

PROVINCIAL / REGIONAL

College of Medical Radiation Technologists of Ontario

2013 - present  
**Appointed Member**, Discipline Committee

LOCAL

University of Toronto

2011 Jan - present  
**Member**, MRS Program Communication Liaison Committee

2010 - present  
**Member**, Admissions Committee (post-interview)

2009 Oct - present  
**Member**, Policies & Procedures Committee

2009 Oct - present  
**Chair**, Program Review Committee, Faculty of Medicine, Dept of Radiation Oncology, Undergraduate Education

2009 Oct - present  
**Member**, Academic Oversight Committee

2009 Oct - present  
**Member**, Faculty Liaison Committee

2009 Oct - present  
**Member**, Joint Curriculum Committee

2009 Oct - present  
**Member**, MRS Newsletter Committee

2009 Oct - present  
**Member**, MRS Planning Committee

LAST UPDATED: May 2011

EDUCATION:

University Education
1972-1975 Bachelor of Arts (History, English, Political
Science)
Mount Allison University
New Brunswick
2001 Bachelor of Sciences (Radiation Therapy)
Anglia Polytechnic University
Cambridge, U.K.

Medical Education and (Post Graduate Education):
1989 National Certification (CAMRT) – Radiation
Therapy M.R.T.(T)
Nova Scotia Cancer Treatment & Research
Centre, Nova Scotia
1990 American National Certification (A.A.R.T.)-
Radiation Therapy
Buffalo, N.Y.
2004 C.M.D. Certification in Radiation Dosimetry
M.D.C.B. Alb. New Mexico
Medical Education and (Post Graduate Education) con’t:

University of Toronto Faculty of Medicine
Toronto Ontario

Professional Development/ Continuing Education:

1993 Member, Multi-leaf Collimator and Portal Imager Committee.
Princess Margaret Hospital Toronto

1994 Member, Discharge Planning Committee
Princess Margaret Hospital Toronto

1994 Member, Re-engineering Monitoring Committee
Princess Margaret Hospital Toronto

2002 - 2005 Member, Radiation Morbidity Clinic Research Staff
Princess Margaret Hospital Toronto

2003 - 2004 Member, Quality Assurance Monitoring Committee
Princess Margaret Hospital Toronto

2004 – 2006 Chair, Quality Management sub-committee: Patient Education Initiative
Princess Margaret Hospital Toronto

2004 – present Member, Breast Survivorship Research Group
Princess Margaret Hospital Toronto

2005 – 2007… Member, PMH Radiation Therapist Research Committee.
Princess Margaret Hospital Toronto

2005– ongoing Member, PMH Radiation Therapist Journal Club

2005–2007 Member, Communications Sub-committee : Academic Leadership Committee.
Joint PMH DRO/ U of T endeavour.
Professional Development/ Continuing Education:

2006  **Attendance** at OCRN “Fundamentals of Clinical Research Workshop #1”
      Toronto
2006  **Attendance** at “Target Insight 11 Conference: “Strategies for Target Definition to Enhance the Therapeutic Ratio.”
      Toronto
2006-2007  **Member** of CFD Medical Journal Club-
           Facilitator: Dr L. Manchul
           Princess Margaret Hospital      Toronto
2007  **Attendance** at Paediatric Oncology Group of Ontario
      MultiDisciplinary Symposium: “Childhood Cancer. in the Age of Genomics.”
      Toronto
2007  **Attendance** at 2nd Annual Dyslexia &Learning Disability Conference.
      Toronto
2008  **Attendance** at the 5th Annual Toronto Radiation Medicine Conference: “Global Perspectives, Local Outcomes”
      (Kingsbridge Center)  King City
2008  **Attendance** at 2nd Annual Radiation Therapist Research Symposium.
      Toronto
2008  **Attendance** at “Team Facilitation Skills for Health Care Professionals” workshop.
      St John’s Rehabilitation Hospital      Toronto
      Toronto
2009  Attendance at the Target Insight 111 Conference: “ Next Generation Radiation Medicine: “Putting Biology and Technology To Work.”
      Toronto
2009  **Completed:** UHN On-Line Course:“UHN Workplace Code of Ethics.”
      Princess Margaret Hospital      Toronto
Professional Development/ Continuing Education:

2009  Attendance at 11th Annual Wharton/Elia Day Symposium: “Individualized Care for Head and Neck Cancer Patients.” (with the Sullivan Lecturer: Dr Jeff Siewerdsen) Princess Margaret Hospital Toronto

2010  Attendance at the 7th Annual Radiation Therapy Conference: “Inquire, Inspire and Innovate.” Old Mill Toronto

2010  Attendance at “Reflective Practice and Professional Portfolio” workshop. Featuring: David Eddy - Programme Co-ordinator for Postgraduate Radiotherapy & Oncology Courses - Sheffield Hallam University, U.K. Old Mill Toronto

2011  Attendance at the Radiation Therapy Conference- RTi3 “Inquire, Inspire, and Innovate.” Old Mill Toronto

2010-2011  Attendance at several Team1 Head and Neck Planning Seminars; ~Monthly Sessions detailing various considerations related to head and neck IMRT planning. P.M.H. Toronto

2010-2011  Attendance at monthly meetings at the Office of Student Affairs; Medical Sciences Bldg; Various topics covered related to the counselling / advisor role to students in the Medical Radiation Sciences Program. University of Toronto Toronto
SCHOLARSHIPS & AWARDS

1972  History and Biology Prize
      Bridgetown Nova Scotia
1972  Minnie Beatrice Bent University Entrance Scholarship
      Bridgetown Nova Scotia
1972-1975 Mount Allison University Renewable Entrance Scholarship
       Sackville New Brunswick

BIOGRAPHICAL INFORMATION:
Degrees
1975  Bachelor of Arts – Mount Allison University
      Sackville New Brunswick
2001  Bachelor of Sciences – Anglia Polytechnic University
       (Cambridge University) Cambridge England

BIOGRAPHICAL INFORMATION:
Hospital/ Staff Appointments/ Employment:
1989-1999 Radiation Therapist
       Princess Margaret Hospital Toronto
2001-2009 Treatment Specialist/ Dosimetrist (A.I.P.)
       Princess Margaret Hospital Toronto
2004-present Dosimetrist/Treatment Specialist 50/50 (AIP)
       Princess Margaret Hospital Toronto
2004-present Student Counselor/Remedial Counselor
       Medical Radiation Sciences Program
       University of Toronto/ Michener Institute of Applied Health Sciences Toronto
2005-2006 Interim Research Co-ordinator for Soft Tissue Fibrosis Study. P.I. Dr A. Davis Toronto Western Hospital
2006-2007  **Member**: Radiation Therapy Quality Assurance Team  
Princess Margaret Hospital     Toronto

**Academic Appointments**

2004-ongoing  Appointment at level of **Instructor** (Status-only)  
University of Toronto     Toronto

**Professional Affiliations and Activities**

1989 – ongoing  **Member** of the Canadian Association of Medical  
Radiation Technologists. (C.A.M.R.T)
1989 – ongoing  **Member** of the Ontario Association of Medical  
Radiation Technologists. (O.A.M.R.T.)
1990-2007  **Member** of the American Association of Radiologic  
Technologists. (A.A.R.T)
1993-ongoing  **Member** of the newly founded College of Medical  
Radiation Technologists of Ontario. (C.M.R.T.O.)
2006 –present  **Member** of MARCOM (Marketing & Communications)  
Committee;  Ontario Association Medical Radiation Technologists.

**Certifications and Licensures**

**Certificates:**

1989-ongoing  **CPR certification** - Basic Cardiac Life Saving :  
recertification obtained annually.
1989  **National Certification** obtained in Radiation Therapy.
1990  **American Certification** obtained in Radiation  
Therapy.
2004  **American Certification** obtained in Radiation  
Dosimetry. (C.M.D.)

**Licenses:**

1989-ongoing  **Member** of Canadian Association of Medical  
Radiation Technologists – National Licensing Board for  
the practice of Radiation Therapy.

1990-2007 **Member** of the American Association of Radiologic Technologists. (A.A.R.T.)

1993 - present **Member**, College Of Medical Radiation Technologists of Ontario. Provincial Licensing Board for the practice of Radiation Therapy.

2004 - present **Member** of the American College of Medical Dosimetrists. American licensing board for the practice Of Radiation Dosimetry.

**Administration and Committee Appointments:**

**Local/Hospital:**

1993 **Member**, Multi-leaf Collimator and Portal Imager Committee
Princess Margaret Hospital  Toronto

1994 **Member**, Discharge Planning Committee
Princess Margaret Hospital  Toronto

1994 **Member**, Re-engineering Monitoring Committee
Princess Margaret Hospital  Toronto

2002 - 2005 **Member**, Radiation Morbidity Clinic Research Staff
Princess Margaret Hospital  Toronto

**Administration and Committee Appointments (con’t):**

**Local/Hospital**

2003 - 2004 **Member**, Quality Assurance Monitoring Committee
2004 – 2006 Chair, Quality Management sub-committee: Patient Education Initiative.
Princess Margaret Hospital  Toronto

Princess Margaret Hospital  Toronto
2005–2007 Member, Communications Sub-committee: Academic Leadership Committee.
Joint PMH DRO/ U of T endeavour.

Administration and Committee Appointments (con’t):

Provincial:
2006–present Member of MARCOM (Marketing & Communications) Committee: “Recruitment and Retention.”
Ontario Association Medical Radiation Technologists.

ACADEMIC HISTORY:

Research Endeavours:

Anglia Polytechnic University/Cambridge University.

2000  Author: BSc. Research Project – “The Value and Pitfalls of Interviews and Questionnaires as Research Tools.”
Anglia Polytechnic University/Cambridge University.

2001  Author: BSc. Research Project - Case Study:” An Examination of the Perceived and Actual Knowledge Base of a Group of Radiation Therapists at Princess Margaret Hospital, on the Topic of Lymphoedema.”
Anglia Polytechnic University/Cambridge University.

Research Endeavours (con’t):

2008  **Author**: Final Draft: Developed a needs assessment for Medical Radiation Sciences (M.R.S.) Students with regards to their roles and goals as Medical Radiation Sciences Students in the Uof T/ Michener Institute of Applied Sciences Degree Program. Uof T/ Michener Institute Toronto

2009  **Author**: Draft stage – Development of Survey Instrument: Radiation Therapist Understanding of Ethics as Relates to the Teaching & Assessment of Clinical Students.

**PUBLICATIONS:**

**Non-Refereed Publications:**

2006  **Author** of Article for the University of Toronto (UofT) Medical Radiation Sciences Fall Edition Newsletter: “Over-X-Posure.” Article titled: “Who are you going to call, if the going gets tough……The Medical Radiation Sciences Counselors: We’re here to help!”

**Manuscripts in Preparation:**
PRESENTATIONS:

2005  “Fractures Following Radiotherapy + Limb Salvage Surgery for Lower Extremity Soft Tissue Sarcomas: A Comparison of High-Dose and Low-Dose Radiotherapy.” Co- Presenter at the PMH RT Journal Club. Princess Margaret Hospital Toronto

2006: University of Toronto Orientation week Seminar presentation to the Medical Radiation Sciences Students on: The Role of the Medical Radiation Sciences (M.R.S.) Student Counseling Service: “How We Can Help.” University of Toronto Toronto

2006 Introduction to The Medical Radiation Sciences Student Counseling Service. Short Seminar presentation to 1st year clinical Radiation Therapy Students at Princess Margaret Hospital. Toronto

2007 Co-Facilitator/Co-Developer of Lab-based Clinical Scenario/ Simulated Patient Care Session for Didactic- Level Radiation Therapy Students. Michener Institute of Applied Sciences Toronto
2007  Co-Author/Presenter at Seminar presentation to 1st year Radiation Therapy Students: *Clinical Skills: Tips for Success in the Clinical Environment.*
Michener Institute of Applied Sciences  Toronto

2008  Co-Author/Presenter: Seminar for 1st year Radiation Therapy Clinical Students: *Orientation to the Clinical Environment: Tips to Thrive And Not Just Survive!*
Michener Institute of Applied Sciences  Toronto

PRESENTATIONS (con’t):

2009  Co-Author/Presenter at Seminar discussing : The Transition from the Academic to the Clinical Environment: “Steps to Success”.
Michener Institute of Applied Sciences  Toronto

2010  Presenter/Author – Seminar/Lecture: Communication Challenges in Clinic: “It’s Not Just What You Say, But How You Say It Too.” (1 hour presentation to the Nuclear Medicine Students)
Michener Institute of Applied Sciences  Toronto

TEACHING DOSSIER:

Undergraduate Teaching/Courses
Remedial academic and clinical instruction provided to Radiation Therapy students experiencing difficulties in these areas. Remedial clinical training provided through the development of simulated clinical/treatment scenarios and patient care/education interactions. Cultural and ESL issues also addressed in this setting.

TEACHING DOSSIER: con’t:

Undergraduate Teaching/Courses; con’t:

2006 Development of a formal proposal and outline for clinical remedial teaching via a lab-simulated, clinical clinical environment and pilot-study implementation of same with a 1st year clinical Radiation Therapy student.

2006-ongoing Implementation of clinical remedial teaching via a simulated clinical environment, in a lab setting, (at the Michener Institute); targeted to students experiencing difficulty functioning within the team-based clinical environment of Radiation Therapy departments and training centers.

Michener Institute of Applied Sciences Toronto

2008- ongoing “Mock” interviews conducted individually with graduate level Radiation Therapy students, to prepare them for seeking employment in their professional field. Interview tips and questions drawn from personal professional experience and also from data provided by a group of my peers.

<tr>
<td>ACTIVITY</td>
<td>NUMBER OF PEOPLE</td>
<td>NUMBER OF HOURS</td>
</tr>
<tr>
<td>----------</td>
<td>------------------</td>
<td>----------------</td>
</tr>
<tr>
<td>Provided regular assistance to students with clinical training issues related to treatment procedures/set-ups in Radiation Therapy. Had a number of these students participate in simulated scenarios/role plays, designed by myself, to aid in building their problem solving skills and their technical skills.</td>
<td>8</td>
<td>30</td>
</tr>
<tr>
<td>Developed simulated scenarios designed to build communication skills, to assist a Radiation Therapy student dealing with shyness. In latter sessions, invited (with student’s permission) a second staff member, to assist in the scenarios. This was designed to more closely emulate the actual clinic environment, with multiple personalities and stressors.</td>
<td>1</td>
<td>7.5</td>
</tr>
<tr>
<td>Assisted a Radiologic Technology student with ESL issues, to build his communication skills. Role play scenarios enlisted to provide realistic patient and staff situations, thus building the student’s professional and social communication skills.</td>
<td>1</td>
<td>8</td>
</tr>
<tr>
<td>Provided ongoing emotional support to a student facing possible termination from clinical training. Over the course of many appointments, also encouraged the student to see that even if he wasn’t not successful in his program, that this would not constitute a failure in life. Reminded the student of his strengths and discussed other possible options that might make better use of his talents, if he was not successful in his training program. Informed him also, of University and outside services that were available to help him choose another career path, should he elect to do so. Encouraged the student to be realistic about his situation, while at the same time, being supportive of his desires and fears.</td>

</tr>
<tr>
<td>In a lab setting, students (individually) required to interpret documented isocenter shifts correctly, for a variety of patient set-up positions (ie: supine, prone, lateral decubitus, “feet-to-gantry”, and “head to gantry”). Students were also asked to identify when a shift had been performed incorrectly in a number of given examples.</td>
<td>4</td>
<td>4 sessions 1 hr each</td>
</tr>
<tr>
<td>Counseled a student dealing with long-term grief issues about the possible signs and symptoms of depression. Encouraged the student to seek medical assessment for their situation. Offered to provide on-going emotional support for the student, in addition to any medical/psychological interventions that might be introduced.</td>
<td>1</td>
<td>2</td>
</tr>
<tr>
<td>Counseled a student on the process of applying for a “leave of absence” (LOA), including a lengthy discussion of the possible merits and drawbacks of this situation. Aim was to ensure the student had accurate information upon which to make an informed decision whether to initiate the LOA process.</td>
<td>1</td>
<td>1.5</td>

</tr>
</thead>
<tbody>
<tr>
<td>Pinnacle labs with individual student related to parallel pair, four field box, breast tangents, and conformal planning techniques.</td>
<td>1</td>
<td>8 hrs</td>
</tr>
<tr>
<td>Patient communication and patient care labs with and ESL student designed to increase her proficiency in the English language (professional and social communications). Discussion also re non-verbal communication cues.</td>
<td>1</td>
<td>6</td>
</tr>
<tr>
<td>Role play/scenarios: pt care and communication labs with Radiation Therapy students related to “New Patient Teaching” (treatment procedures and side effects).</td>
<td>6</td>
<td>~18.5</td>
</tr>
<tr>
<td>Scenarios presented to various students in clinic designed to develop / hone their critical thinking skills. “Real-life” treatment set-up problems related to students whose task was to trouble shoot the situations and provide solutions.</td>
<td>5</td>
<td>7</td>
</tr>
<tr>
<td>Examples of clinical documentation entries presented to students to: 1) identify any ambiguities: 2) to identify the potential for error(s) that may result from the ambiguities; and 3) to provide their own documentation entries to clarify the pt set-up instructions.</td>
<td>3</td>
<td>3</td>
</tr>
<tr>
<td>Individual mentoring provided to a Radiologic Technology student experiencing great difficulty in her professional communications with departmental staff. Time spent working with student on improving her verbal communication skills, through role play and scenarios.</td>
<td>1</td>
<td>5+</td>
</tr>
<tr>
<td>Patient Care scenarios presented to Radiation Therapy students, requiring them to provide appropriate symptom management. The students were also asked to identify the situations, where it would not be appropriate to proceed to treat the patient without first having the patient seen by the Radiation Oncologist.</td>
<td>8</td>
<td>8</td>

Curriculum Vitae

Name: Laura D’ALIMONTE
Business Address: Odette Cancer Centre
Sunnybrook Health Sciences Centre
2075 Bayview Avenue
Toronto, Ontario M4N 3M5
Business Telephone #: (416) 480-6100 Ext.89638
E-mail Address: laura.dalimonte@sunnybrook.ca
Date of Preparation: August 1, 2014

BIOGRAPHICAL INFORMATION:

EDUCATION:

Degrees
BSc (Biological Sciences), University of Windsor, 2000
BSc (Radiation Sciences), University of Toronto, 2005
MHSc, University of Toronto, 2013

Certifications and Licenses
• MRT(T), College of Medical Radiation Technologists of Ontario (CMRTO), Radiation Therapy, 2005

EMPLOYMENT:

Current Employment:
Sunnybrook Odette Cancer Centre, Radiation Therapist
Appointed: 2006

Odette Cancer Centre, Research Radiation Therapist
Appointed: 2009

Odette Cancer Centre, CSRT Brachytherapy
Appointed: 2012
PROFESSIONAL AFFILIATIONS AND ACTIVITIES:

Professional Associations:
- Canadian Association of Radiation Oncology
- Status Appointment: Clinical Educator at The Michener Institute for Applied Health Sciences
- Status Appointment: Lecturer, Department of Radiation Oncology, University of Toronto
- General Member with the Centre for Interprofessional Education

Administrative Activities:

Local Committees (Odette)
- MRT week: Co-Chair, 2009 & 2010
- GU and Gyne Site Group: Member
- Policy & Procedures Committee: Member
- DRO Professional Education Program: Member
- OCC MyChart™ Committee: Member
- RT Research Interest Group: Member
- Breast Redesign Group: Member
- RTi3 Planning Committee: Member
- Oncology Program Newsletter: Member

National Committees
- Canadian Partnership for Quality Radiotherapy (CPQR) Advisory Group: Member 2011
- CARO Education Committee: Member 2011
- CSRT Community of Practice (CoP): Co-lead 2014
- Gyne Community of Practice (CoP): Member 2014

Peer Review Activities:
- RTi3 Proffered Paper Session Moderator: 2011 & 2013
- 2012 ISRRRT World Congress/CAMRT Annual General Conference Abstract Reviewer: 2012
- Manuscript Reviewer for Health Expectations: 2012

Research Endeavours

In-House Studies

1. To Prep or Not to Prep: That is the Question. Study PI

3. Empowering patients through education: Development of an educational intervention for
endometrial cancer patients undergoing brachytherapy. **Study PI**

4. Psychological impact of daily bowel preparation on prostate patients who receive radiation therapy. **Co-Investigator**

5. An Evaluation of a Clinical Training Program for Volumetric Imaging at the OCC. **Co-Investigator**

6. A Retrospective Review of Patient Outcomes Following a Concurrent Chemotherapy, External Beam Radiation Therapy and High Dose Rate Brachytherapy Treatment Schedule for Cervical Cancer. **Study PI**

7. Whole-gland Salvage HDR Prostate Brachytherapy for Locally Recurrent Prostate Cancer. **Co-Investigator**

8. Empowering patients through education: Development of an educational intervention for cervical cancer patients undergoing brachytherapy. **Study PI**

**Teaching Awards:**

2010  Department of Radiation Oncology, University of Toronto  
Medical Radiation Sciences Program Excellence in Research Supervision Award

2012  Department of Radiation Therapy, Odette Cancer Centre  
Radiation Therapy Research Leadership Award

**Research Awards:**

2012  Sunnybrook’s Third Interprofessional Education and Interprofessional Care Showcase, Sunnybrook Health Sciences Centre  
Third Prize Poster

2012  Sunnybrook’s Third Interprofessional Education and Interprofessional Care Showcase, Sunnybrook Health Sciences Centre  
Top 3 Oral Presentation

**Peer-Reviewed Grants**

2009  Travel Grant  
Sponsor: ASRT November 1-3, 2009  
Amount: $1000.00
2009  Identifying the Challenges and Opportunities faced by Radiation Therapists in Initiating and Developing Research Projects: The Odette Cancer Centre Experience.
Sponsor: PBR Sunnybrook Health Sciences Centre award
Principal Investigator: D’Alimonte L. & Turner A.
Co-Investigator: Fitch M.
Amount: $4,675.00

2010  An Evaluation of Two Immobilization Devices for Prostate Cancer Treatment in the Era of Image Guided Radiation Therapy (IGRT): Does it matter?
Sponsor: PBR Sunnybrook Health Sciences Centre award
Principal Investigator: D’Alimonte L. & Holden L.
Co-Investigators: Liszewski B. & Vesprini D.
Amount: $7,980.00

2011  To Prep or Not To Prep: That is the Question
Sponsor: CARO-ACURA Award
Principal Investigator: D’Alimonte L
Amount: $23,554

2013  Empowering patients through education: Development of an educational intervention for endometrial cancer patients undergoing brachytherapy
Sponsor: SEAC ERC Education Research and Scholarship Grant, Sunnybrook
Principal Investigators: Laura D’Alimonte
Co-Investigators: Dr. Lisa Barbera, Dr. Gillian Thomas, Dr. Ida Ackerman, Dr. Toni Barnes, Dr. Eve-lynne Marchand, Lisa Di Prospero, Tamara Harth Larissa Day, Alison McAndrew
Amount: $6,500

2013  Empowering patients through education: Development of an educational intervention for cervical cancer patients undergoing brachytherapy
Sponsor: Gyne Disease Site Group Award, Sunnybrook
Principal Investigators: Laura D’Alimonte
Co-Investigators: Dr. Lisa Barbera, Dr. Gillian Thomas, Dr. Ida Ackerman, Dr. Toni Barnes, Dr. Eve-lynne Marchand, Lisa Di Prospero, Tamara Harth Larissa Day, Alison McAndrew
Amount: $10,000

2014  Whole gland salvage HDR prostate brachytherapy for locally recurrent prostate cancer
Sponsor: Motorcycle Ride for Dad & CARO-ACURA Grant
Principal Investigators: Hans Chung
Co-Investigators: Andrew Loblaw, Gerard Morton, Laura D’Alimonte, Masoom Haider, Ananth Ravi
Amount: $29,750 & $29,300

Research Supervision

Curriculum Vitae

Krista Dawdy
Clinical Educator/Clinical Coordinator, Radiation Therapy, Edmond Odette Cancer Centre, Sunnybrook Health Sciences

A. Date Curriculum Vitae is Prepared: 2016 February 26

Only includes Activities from July 2015 to July 2016

B. Biographical Information

1. EDUCATION

Degrees
2007 Sep - 2009 Apr BSc, Cambridge Campus, Anglia Ruskin University, United Kingdom

Postgraduate, Research and Specialty Training
2015 Mar Contrast Injection for Radiation Technologists, Michener Institute of Applied Health Sciences
2015 Jan IV Insertion and Maintenance Workshop, Michener Institute of Applied Health Sciences
2013 Dec Designing Learning ADL 129-021, The University of Calgary
2013 Jul 31 Being A Coach Leader, Sunnybrook Leadership Institute
2013 Jul 10 Foundations of Coaching, Sunnybrook Leadership Institute
2013 Apr 25 Instructional Design and Articulate Storyboarding, Sunnybrook Hospital, Office of Technology
2013 Feb 23 Mosaiq Education Day, The Michener Institute for Applied Health Sciences
2013 Jan 18 Best Practice Spotlight Organization, Evidence Based Culture, Registered Nurses’ Association of Ontario
2013 Jan Protecting Your Patients from Injurious Falls, Institute for Healthcare Improvement
2012 Apr Ottawa Model for Smoking Cessation Workshop, Ottawa Heart Institute
2012 Jan 13 - 2012 Jan 18 Best Practice Champion Development and Training, Registered Nurses’ Association of Ontario
2012 Jan 13 - 2012 Jan 18 Best Practice Implementation & Quality Improvement Methods, Registered Nurses’ Association of Ontario
2011 Jan 18 Managing Concurrent Chemoradiation in GI cancers: a Multi-
disciplinary Approach, Odette Cancer Centre, Sunnybrook Hospital
2011
Interprofessional Collaboration in Healthcare, Michener Institute of Applied Health Sciences
2010 Jun 23
Enhancing Cancer Care through Technology, Odette Cancer Centre, Sunnybrook Hospital
2009 Sep 18 - 2009 Sep 19
IMRT Education Course, Princess Margaret Hospital, Toronto, Canada
2009
Clinical Preceptorship Education Course, Princess Margaret Hospital
2007
Oncology Clinical Applications Training, Odette Cancer Centre, Sunnybrook Hospital

Qualifications, Certifications and Licenses
1993 Sep
Radiation Therapy Diploma, Ottawa Regional Cancer Centre

2. EMPLOYMENT

Current Appointments
2012 - present
Clinical Adjunct Professor, The Michener Institute for Applied Health Sciences
2010 - present
Clinical Educator/Clinical Coordinator, Radiation Therapy, Odette Cancer Centre at Sunnybrook Health Sciences Centre
The Clinical Educator is responsible for design, implementation, feedback and evaluation of training workshops that is innovative and integrated with radiation therapy program vision and culture.
The Clinical Coordinator is responsible for supervising and evaluating students in the clinical environment during their clinical practicum. Provides technical and educational support for MRS students during their clinical placement including design, implementation, feedback and evaluation of the new curriculum and learning activities.
2009 - present
Clinical Coordinator, Radiation Therapy, Odette Cancer Centre at Sunnybrook Health Sciences Centre

3. HONOURS AND CAREER AWARDS

Distinctions and Research Awards

NATIONAL
Received
2015
E.I. Hood Award, Joint Congress on Medical Imaging and Radiation Sciences. (Distinction)
4. PROFESSIONAL AFFILIATIONS AND ACTIVITIES

Professional Associations

- 2013 - present  **Member**, General Membership, Centre for Interprofessional Education (CIPE)
- 2013 - present  **Member**, The Canadian Society for Training and Development (CSTD)
- 2010 - present  **Member**, An International Association for Medical Education (AMEE)
- 1993 - present  **Member**, Canadian Association of Medical Radiation Technologists
- 1993 - present  **Member**, Medical Radiation Technologist (Radiation Therapy), College of Medical Radiation Technologists of Ontario (CMRTO)
- 1993 - present  **Member**, Ontario Association of Medical Radiation Sciences

Administrative Activities

LOCAL

**Odette Cancer Centre**
- 2011 - present  **Chair**, Committee on Medical Radiation Technology Professional Recognition
- 2005 - present  **Member**, Quality Management Committee Radiation Program
- 2000 - present  **Member**, Application Specialist Radiation Program

**Sunnybrook Health Sciences Centre**
- 2012 - present  **Member**, Sunnybrook Education Advisory Subcommittee (SEAC) Educator Development
- 2013 - 2015  **Member**, Sunnybrook Interprofessional Conference Planning Committee

Peer Review Activities

**PRESENTATION REVIEWS**

1. EDUCATION

Degrees
2007 – 2010 MSc, Radiation Therapy, Faculty of Health, Social Care & Education, Anglia Ruskin University, Cambridge, United Kingdom. Supervisor: Jon Svensson/ Brian O’Sullivan.
1994 – 1998 Undergraduate Studies, Department of Physiology, University of Toronto, Toronto, Ontario.

Qualifications, Certifications and Licenses
2004 – current Licensed Medical Radiation Technologist (Magnetic Resonance Imaging), College of Medical Radiation Technologists of Ontario, Toronto, Ontario, Canada. [License: 10805]
2001 – 2004 Diploma, Magnetic Resonance Imaging, University of Toronto / The Michener Institute, Toronto, Ontario, Canada.
1999 – current Licensed Medical Radiation Technologist (Radiation Therapy), College of Medical Radiation Technologists of Ontario, Toronto, Ontario, Canada. [License: 10805]
1995 – 1999 Diploma, Radiation Therapy, School of Radiation Therapy, Princess Margaret Hospital, Toronto, Ontario, Canada.

Leadership Courses
2016 Box of Crayons learning workshops that focus on integrating coaching and mentoring. Department of Organization and Employee Development, University Health Network, Toronto, Ontario, Canada
2015 Employee Opinion Deep Dive Training with JUICE-The Power of Conversation. Brady G. Wilson, Department of Organization and Employee Development, University Health Network, Toronto, Ontario, Canada
2. EMPLOYMENT

Current Appointments

2015 – current Radiation Therapy Process Development and Integration Practice Leader, Radiation Medicine Program, Princess Margaret Cancer Centre, Toronto, Ontario, Canada

2012 – current Assistant Professor, Department of Radiation Oncology, University of Toronto, Toronto, Ontario, Canada.

2014 – current Clinical Implementation Lead for the MRgRT Facility, Radiation Medicine Program, Princess Margaret Cancer Centre, Toronto, Ontario, Canada.

2015 – current Regional Sarcoma Radiotherapy Peer Review Quality Assurance Rounds Coordinator, Princess Margaret Cancer Centre, Toronto, Ontario, Canada.

2015 – current MRI research therapist, Radiation Medicine Program, Princess Margaret Hospital, Toronto, Ontario, Canada.

2010 – current Manager of Sarcoma Clinical Radiation Therapy Research, Radiation Medicine Program, Princess Margaret Hospital, Toronto, Ontario, Canada.

1999 – current Radiation therapist, Radiation Medicine Program, Princess Margaret Hospital, Toronto, Ontario, Canada.

Previous Appointments

CLINICAL

2005 – 2006 Planning / treatment radiation therapist combined role (50% / 50% FTE), Radiation Medicine Program, Princess Margaret Hospital, Toronto, Ontario, Canada.

3. HONOURS AND CAREER AWARDS

Distinctions and Research Awards

INTERNATIONAL

Received

2015 Best Poster Award for “A survey assessing immobilisation of limb extremity soft tissue sarcomas in United Kingdom radiotherapy centres”. The British Sarcoma Study Group Annual Meeting, East Midlands Conference Centre, University of Nottingham, UK. February 26th. (Co-Principal Investigator)

2010 ARRO best of ASTRO award for “Phase II Study of Preoperative Intensity Modulated Radiation Therapy for Lower Limb Soft Tissue Sarcoma”. ASTRO Annual Meeting, San Diego, USA.
2009  **ARRO best of ASTRO award** for “The relationship between local recurrence and radiotherapy treatment volume for soft tissue sarcomas treated with external beam radiotherapy and function preservation surgery” ASTRO Annual Meeting, Chicago, USA.

2007  **Outstanding poster presentation.** “Bone fractures following external beam radiotherapy and limb-preservation surgery for extremity soft tissue sarcoma: relationship to irradiated bone length, volume and dose” 13th annual meeting of the Connective Tissue Oncology Society (CTOS), Seattle, USA.

**NATIONAL Received**

2008  **“People’s choice” best podium presentation.** 2nd annual radiation therapist research symposium, Toronto, Ontario, Canada.

2006  **Outstanding podium presentation.** 3rd annual radiation medicine conference, Toronto, Ontario, Canada.

2003  **Highest academic achievement in Physics of magnetic resonance imaging course.** The Michener Institute / University of Toronto, Toronto, Ontario, Canada

**LOCAL Received**

2015  **Outstanding Research Potential Award.** Radiation medicine program, Princess Margaret Cancer Centre, Toronto, Ontario, Canada.

2015  **Top-Ranked Abstract for “inspire” category at the RTi3 Annual Meeting.** Development of Evidence-based Region of Interest Matching Guidelines to Standardize Volumetric Image-Guided Radiation Therapy Practice for Sarcoma, Princess Margaret Cancer Centre, Toronto, Ontario, Canada. (Co-Author)

2012  **Best Guest Lecturer Award.** Master of Health Science in Medical Radiation Sciences, Radiation Oncology, University of Toronto, Toronto, Ontario, Canada

2010  **Most influential research publication.** “Bone Fractures following external beam radiotherapy and limb-preservation surgery for lower extremity soft tissue sarcoma: relationship to irradiated bone length, volume, tumor location and dose”. Radiation medicine program, Princess Margaret Hospital, Toronto, Ontario, Canada.

1996  **Highest achievement in undergraduate psychology.** University of Toronto (PSY 100), Toronto, Ontario, Canada.

**Student/Trainee Awards**

**PROVINCIAL/ REGIONAL Received**

Total Amount: $4500
Total Amount: $3000

Professional Associations

2011 – current Member, Canadian Radiation Research Network
2010 – current Member, European Society of Therapeutic Radiology and Oncology, [Membership Number: E-32878]
2006 – current Member, American Society for Therapeutic Radiology and Oncology, [Membership Number: 35207716]
1999 – current Member, Canadian Association of Medical Radiation Technologists/Ontario Association of Medical Radiation Sciences, [Membership Number: 26574]
1999 – current Member, College of Medical Radiation Technologists of Ontario, [Membership Number: 10805]
Administrative Activities

INTERNATIONAL

*Details*: International, open access journal which brings together technology and patient care in the field of radiation oncology to complement ESTRO’s leading publication, Radiotherapy & Oncology.

2016 – current  **Member**, IAEA Consultants’ meeting to Draft International Training Material for Radiation Therapists (RTTs) in collaboration with ESTRO.

2015 – current  **Member**, AJCC Soft Tissue Sarcoma Head and Neck Disease Team, 8th edition of the American Joint Committee on Cancer manual, International Head and Neck Sarcoma Specialists

REGIONAL & PROVINCIAL

**Musculoskeletal oncology group**

2015 - current  **Sarcoma Delphi Process Group**, Validation of Tier One Sarcoma Quality Indicators Modified Delphi process Group, CCO Clinical Program and Quality Initiatives.  
*Details*: To develop consensus and the inclusion of the 8 indicators in Tier One for the Sarcoma Program.

2016 - current  **CCO Advisory Committee for EVOQ**, Cancer Care Ontario, Princess Margaret Cancer Centre.  
*Details*: CCO and key stakeholders from the regional cancer programs to ensure EVOQ software meets CCO and RCP requirements.

*Details*: Responsible for coordinating and leading Radiotherapy Peer Review QA Rounds. Audience includes Radiation Oncologist Site Group Leaders and other specialized radiation medicine professionals from the designated Specialized Sarcoma Provincial Centers for Radiotherapy Delivery.

2014 – current  **Sarcoma Community of Practice Coordinator**, Cancer Care Ontario Community of Practice Radiation Therapy, CCO, Radiation Therapy Soft Tissue Sarcoma Specialists.  
*Details*: This is an informal group developed with CCO’s support from the RTT CoP to develop and communicate best practices for Sarcoma Care to align with the Provincial Sarcoma Services Plan.

2005 – current  **Radiation Therapy Team Lead**, Interdisciplinary health research team, Musculoskeletal oncology department, Mount Sinai hospital, Surgical and Radiation Oncology professionals.  
*Details*: Responsible for the development / support of an enhanced interdisciplinary collaborative research model.

LOCAL

**Radiation Medicine Program, Princess Margaret Cancer Centre, University Health Network**

2015- current  **Member**, Employee Engagement Survey Deep Dive Team and Training, Department of Organization and Employee Development, University Health Network.

2015- current  **Member**, Radiation Therapist Research Advisory Council, Radiation Medicine Program, Princess Margaret Cancer Centre.

2010 – current  **Manager of Sarcoma Clinical Radiation Therapy Research**, Radiation Medicine Program, Princess Margaret Cancer Centre. Responsible for managing all clinical radiation therapy sarcoma research for the RMP.
2014 – current **Co-Chair**, Magnetic Resonance Guided Radiotherapy Clinical Implementation Group, Radiation medicine program, Princess Margaret Cancer Centre, Radiation medicine professionals. *Details:* Responsible for the coordination and integration of clinical activity in the MRgRT facility.

2015 – current **Member**, Magnetic Resonance Guided Radiotherapy Clinical Implementation TASK Group, Radiation medicine program, Princess Margaret Cancer Centre, MRgRT leadership.

2011 **Member**, Imaging literacy and competency group, Radiation medicine program, Princess Margaret Hospital, Radiation medicine professionals.

2010 – 2012 **Member**, Molecular imaged guided Therapeutics committee (GTx Committee), Radiation medicine program/MaRS, Princess Margaret Hospital, Radiation medicine professionals and Molecular imaging research scientists. *Details:* Representation of the Sarcoma Site Group to promote future collaboration in the pursuit of an image guided surgical suite.

2010 – 2011 **RT Leader**, Sarcoma site group, Radiation Medicine Program, Princess Margaret Hospital, Radiation medicine professionals. *Details:* Assumed responsibility for updating all existing protocols and for developing the framework for the introduction and implementation of two clinical trials to RMP (NIRS and PRODIGI trial).

2008 – 2010 **Member**, MRI research group. Radiation Medicine Program, Princess Margaret Hospital, Radiation medicine professionals.

2007 – current **Member**, Radiation therapist journal club, Radiation Medicine Program, Princess Margaret Hospital, Radiation therapists. *Details:* Lead for the critique of various sarcoma publications.

2007 – 2008 **Member**, Accreditation team, Human Resources Department, University Health Network, Medical professionals. *Details:* Lead for front line employee initiatives within UHN representing RMP.

2007 – 2008 **Member**, Accreditation team, Radiation Medicine Program, Princess Margaret Hospital, Radiation medicine professionals. *Details:* Share the experience of the UHN Human Resources Department Accreditation and was a team member in the organization of RMP accreditation.

2006 – 2007 **RT Leader (First)**, Sarcoma site group, Radiation Medicine Program, Princess Margaret Hospital, Radiation medicine professionals. *Details:* Responsible for developing all initial protocols and procedures for Imaging, Scanning, Planning, and Treatment of Soft Tissue Sarcoma Patients for RMP following organizational restructuring into anatomical site based teams.

2005 – 2006 **Member**, Accreditation team, Human Resources Department, University Health Network, Medical professionals. *Details:* Lead for front line employee initiatives within UHN representing RMP.

1998 – 2003 **Chair**, Image processing committee (Kodac), Radiation medicine program, Princess Margaret Hospital, Radiation medicine professionals. *Details:* Responsible for coordination of the imaging processor team and daily maintenance of the equipment for all imaging in the RMP.

**University of Toronto**

2011 – 2012 **Member**, Target Insights conference committee, Department of radiation oncology, University of Toronto, Radiation medicine professionals.

2011 – current **Member**, Dose accumulation and adaptive radiation therapy workflow group, Department of radiation oncology, University of Toronto, Radiation medicine professionals.

2010 – 2012 **Member**, Image guided radiation therapy course organizing committee, Department of radiation oncology, University of Toronto, Radiation medicine professionals.

2010 – current **Member**, "GTx" tracking and navigation research group, Department of radiation oncology, University of Toronto, Radiation medicine professionals.

2009 – 2010 **Member**, Strategic planning thinking group, Department of radiation oncology, University of Toronto, Radiation medicine professionals.

Co-Investigators: Brian O’Sullivan, Colleen Dickie, Anthony Griffin, David Schultz, Charles Catton, Jay Wunder, Peter Ferguson

Sponsor: Musculoskeletal Oncology Department, Mount Sinai Hospital
Principal Investigator: Brian O’Sullivan
Co-Investigators: Anthony Griffin, Dr. Charles Catton, Christine Hill, Amy Parent, Dr. Peter Chung, Dr. Peter Ferguson, Dr. Jay Wunder
2015 **Principal Investigator:** Online Learning Module for Evidence-Based Radiation Treatment of Soft Tissue Sarcoma. (Prospective Study). UHN REB #: 15-8828
Sponsor: Musculoskeletal Oncology Department, Mount Sinai Hospital
Co-Investigators: Dr. Brian O’Sullivan, Dr. Charles Catton, Nicole Harnett, Christine Hill, Michael Sharpe

2015 **Co-Investigator:** Locally Recurrent or Radiation-Induced Soft Tissue Sarcoma: Outcomes with Re-irradiation and Surgical Excision. REB# 15-0036-C MSH
Principal Investigator: Dr. Peter Ferguson
Co-Investigators: Anthony Griffin, Dr. Charles Catton, Christine Hill, Amy Parent, Dr. Peter Chung, Dr. Jay Wunder, Dr. Brian O’Sullivan

2015 **Co-Investigator:** Intraoperative 3D Imaging and Navigation for Sarcoma Surgical Patients (Prospective Trial). REB# 15-0035-A MSH
Principal Investigator: Dr. Peter Ferguson
Co-Investigators: Anthony Griffin, Dr. Charles Catton, Dr. Peter Chung, Dr. Jay Wunder, Dr. Brian O’Sullivan, Dr. David Jaffray, Dr. Jon Irish, Robert Weersink, Michael Daly

2015 **Co-Investigator:** Oncologic Outcome for Patients with Myxofibrosarcoma. REB# 14-0286-C MSH
Principal Investigator: Dr. Peter Ferguson
Co-Investigators: Anthony Griffin, Dr. Charles Catton, Dr. Peter Chung, Dr. Jay Wunder, Dr. Brian O’Sullivan

2013 – current **Principal Investigator:** Radiotherapy Designed With Evidence-Based Bone Avoidance Objectives Reduces the Risk Of Bone Fracture In The Management Of Extremity Soft Tissue Sarcoma (Chart Review)
Sponsor: Musculoskeletal Oncology Department, Mount Sinai Hospital
Co-Investigators: Anthony Griffin, Dr. Brian O’Sullivan, Dr. Peter Chung, Dr. Charles Catton, Dr. Jay Wunder, Dr. Peter Ferguson, Anna Simeonov, Dr. Rakesh Mohankumar
REB#: 13-0183-C

2012 – current **Principal Investigator:** Examining radiation response on pre and post radiotherapy MRIs and its relation to development of wound complications following surgery for soft tissue sarcomas of the thigh.
Sponsor: Musculoskeletal Oncology Department, Mount Sinai Hospital
Co-Investigators: Anthony Griffin, Dr. Brian O’Sullivan, Dr. Peter Chung, Dr. Charles Catton, Dr. Jay Wunder, Dr. Peter Ferguson, Anna Simeonov, Dr. Rakesh Mohankumar
REB#: 13-0183-C

2012 – 2016 **Co-Principal Investigator:** An International Survey of Limb Extremity Immobilization in Radiation Therapy for Soft Tissue Sarcomas - A Review and Analysis of Current Practice
Sponsor: Weston Park Hospital Cancer Charity and The University of Sheffield
Principal Investigators: Colleen Dickie, James Swinscoe
Co-Investigator: Rob Ireland
REB#: SMBRER275 The University of Sheffield- Academic Unit of Clinical Oncology

2011 – 2014 **Co-Investigator:** Use of High Precision Radiotherapy in the Management of Soft-Tissue Sarcomas.
Sponsor: Radiation Medicine Program, University Health Network
Principal Investigators: Charles Catton, Brian O’Sullivan, Peter Chung, Philip Wong, Colleen Dickie
REB#: 10-0854-CE

Sponsor: Toronto Academic Health Sciences Network (TAHSN)
Principal Investigator: Wey Liang Leong
Co-Investigators: Dr. Ralph DaCosta, Dr. Brian Wilson, Dr. Peter Ferguson, Dr. Jay Wunder, Colleen Dickie
REB#: 05-0048-CE

2011 – current  **Co-Investigator.** Evaluating Bacterial Response During Sarcoma Treatment Using An Optically Tracked, 'Hand-Held' Fluorescent Imaging Device
Sponsor: University Health Network
Principal Investigator: Dr. Peter Ferguson, Dr. Jay Wunder
Co-Investigators: Dr. Ralph DaCosta, Dr. Brian Wilson, Colleen Dickie, Anthony Griffin, Dr. Brian O’Sullivan, Dr. Peter Chung, Dr. Charles Catton, Dr. David Jaffray
REB#: 09-0015-A

2011 – 2014  **Co-Investigator.** Retrospective Study of Volume Changes in Two Pathological Subtypes of Sarcoma using Deformation Image Registration.
Sponsor: University Health Network
Principal Investigator: Dr. Brian O’Sullivan
Co-Investigators: **Colleen Dickie,** Amy Parent, Kara Magierowski
REB#: 07-0106-CE

2008 – 2011  **Co-Investigator.** Clinical and Functional Outcome of Patients with Radiation-induced Soft Tissue Sarcoma (Chart Review)
Sponsor: University Health Network
Principal Investigator: Dr. Brian O’Sullivan
Co-Investigators: **Colleen Dickie,** Soha Riad, Anthony Griffin
REB#: 06-0732-CE

2008 – 2011  **Principal Investigator:** A Retrospective Review of Magnetic Resonance (MRI) Simulation of Lower Extremity Soft Tissue Sarcoma (LE-STS) Patients Treated with Intensity Modulated Radiation Therapy (IMRT) (Chart Review)
Principal Investigator: **Colleen Dickie**
Co-Investigators: Charles Catton, Dr. Brian O’Sullivan, Amy Parent
REB#: 08-0498-CE

2009 – 2010  **Co-Investigator.** Determining the Location of Local Recurrence after External Beam Radiotherapy (EBRT) Combined with Limb-salvage Surgery for Extremity Soft Tissue Sarcoma Patients (LE-STS) (Chart Review)
Sponsor: University Health Network
Principal Investigator: Dr. Brian O’Sullivan
Co-Investigators: **Colleen Dickie,** Amy Parent
REB#: 08-0496-CE

2007 – 2009  **Co-Investigator.** Bone Fractures Following Treatment of Extremity Soft Tissue Sarcoma: Relationship of Radiation Field Size and Radiation Dose to Bone (Chart Review)
Sponsor: University Health Network
Principal Investigator: Dr. Brian O’Sullivan
Co-Investigators: **Colleen Dickie,** Amy Parent, Anthony Griffin
REB#: 05-0083-CE
2. RESEARCH AWARDS

Grants, Contracts and Clinical Trials

PEER-REVIEWED GRANTS

Funded

2015

Principal Investigator. CAMRT Research Grant. Online Learning Module for Evidence-Based Radiation Treatment of Soft Tissue Sarcoma. Co-Investigators: Dr. Charles Catton, Dr. Michael Sharpe, Nicole Harnett, Lynn Nguyen. $5000.00 over one year. REB: #15-8828.

Description: This is a prospective study to assess a Soft Tissue Sarcoma (STS) mobile / electronic learning module that has been developed to disseminate principles of safe, evidence-based practice for image-guided radiotherapy using a pre/post evaluation.

2009 – 2013

Co-Investigator. Evaluation of Near Infrared Point Spectroscopy to Assess Tissue Viability Following Pre-operative Radiation for Extremity Soft Tissue Sarcoma. Sponsor: National Research Council of Canada, Winnipeg Manitoba, University of Toronto, Faculty of Medicine

Principal Investigators: Jay Wunder, Peter Ferguson, Brian O’Sullivan

Co-Investigators: Colleen Dickie, Anthony Griffin, Karen Cross, Joel Fish, Mike Sowa, Rebecca Zhu

Description: This is a phase II study to evaluate the oxy-hemoglobin, deoxy- hemoglobin and micro circulation levels just below the skin surface for patients undergoing preoperative IMRT and limb sparing surgery for lower extremity soft tissue sarcoma. These variables may be related to wound complication rates for this patient population.

2005 – 2009

REB#: 03-0107-C. $228,236 over 3 years.

Description: This is a phase II study to investigate Lower extremity soft tissue sarcoma wound complication rates following preoperative IMRT combined with limb sparing surgery. Secondary outcomes are to measure limb fibrosis, subcutaneous edema, joint stiffness, local recurrence rates, overall survival rates and disease specific survival rates.

D. Publications

1. MOST SIGNIFICANT PUBLICATIONS

Details: This study described the local disease relapse relative to the previous radiotherapy treatment volumes in the largest population of soft tissue sarcoma reported to date. For the 61 local recurrences, we investigated the location relative to the radiotherapy (RT) volumes delivered both pre and post operatively. Other studies have investigated this topic either in the preoperative or postoperative setting. The first comparable study was by Cleator et al. 2001 and included 28 patients who received postoperative RT. The most recent two, Delaney et al., 2010 included 6 patients and Alektiar et al., 2011 included 5 patients that experienced local recurrence. Our paper was cited by the later study (Alektiar et al., 2011) in a podium presentation at the ASTRO annual general meeting (2011), Miami, USA. Most recently this paper was mentioned in a podium presentation and a sarcoma refresher session at the ASTRO annual meeting 2013, Atlanta, USA.

Details: This study received “the most influential research publication” award (2010) from the Radiation medicine program, Princess Margaret Hospital, Toronto, Ontario, Canada. Radiotherapy related parameters associated with radiation induced bone fractures was investigated for soft tissue sarcoma. This is the only study to date that has retrieved dosimetric details that provide dose objectives for bone avoidance in intensity modulated radiotherapy planning. Since this publication, the Radiation Medicine Program has changed their institutional planning policy to incorporate these avoidance objectives in the RT planning process. Most recently this paper was mentioned in podium presentations at the ASTRO annual meeting 2013, ASTRO AGM 2015 and ASTRO AGM 2016.

INVITED LECTURES AND PRESENTATIONS

1. INTERNATIONAL

2017 **Chair.** Session type: Teaching Lecture, High tech or low tech for metastatic disease, how does one decide and what is the cost-benefit? May 6, ESTRO 36, Vienna, Austria

2015 **Chair.** Advances in Breast Cancer Treatment. ESTRO 3rd Forum Annual Meeting, Barcelona.

2014 **Co-Chair Panel Presenter.** ESTRO Session Title: Train the trainers programme: An update. 1 hour session. ESTRO33 Annual Meeting, Vienna, Austria.

2011 **Invited Scholar.** Gray Institute for Radiation Oncology and Biology, University of Oxford, London, UK. 1 hour invited lecture “Sarcoma Research in the Clinical Setting”, then 3 hours of case review and discussion.

2. NATIONAL

2017 **Invited Speaker.** Use of MRI in Radiation Therapy. Radiation Therapy program at the CAMRT/OAMRS Annual General Conference, April 28-30, Ottawa, Canada.

2016 **Invited Speaker.** RTi3 Webinar Feb. 9th 2016. MRI Impact on RTT Practice: the past, present and future of MRI in RT Practice, University of Toronto, Toronto, Ontario

2015 **Invited Speaker.** Target Insights 2015. Informatics for a Rare Disease. University of Toronto, Toronto, Ontario.

2010 **Presenter.** Sarcoma Research in the Radiation Medicine Program. Canadian Association of Medical Radiation Technologists Annual Conference, Quebec, Canada.

2005 **Presenter.** Innovative Immobilization for Conformal Radiation Treatment of Extremity Soft Tissue Sarcoma. Western Canada Conference, Calgary, Canada.

2005 **Presenter.** Refining Sarcoma Immobilization for High Precision Image Guided Intensity Modulated Radiation Therapy. Western Canada Conference, Calgary, Canada.
3. PROVINCIAL/ REGIONAL

2014 Invited Speaker. CCO Provincial Community of Practice Committee Meeting. Sarcoma eLearning Module and discussion of the formation of a Sarcoma Community of Practice.

4. LOCAL

Invited Lectures and Presentations

2016 Guest Lecturer. “Sarcoma Research in Radiotherapy”, Master of Health Science in Medical Radiation Sciences, Radiation Oncology, The University of Toronto, Toronto, Canada.

2016 Invited Speaker. RMP Education Rounds, April. Innovative Sarcoma APP, Radiation Medicine Program, The University of Toronto, Toronto, Canada.

2015 Invited Speaker. Radiation Therapy Lunch and Learn Session. Sarcoma Adaptive Radiotherapy and Informatics on a Rare Disease. Radiation Medicine Program, Princess Margaret Cancer Centre, Toronto, Canada.

2013  **Guest Lecturer.** “Sarcoma Program Overview”, Master of Health Science in Medical Radiation Sciences, Radiation Oncology, The University of Toronto, Toronto, Canada.

2012  **Guest Lecturer.** “Sarcoma Research Paradigm”, Master of Health Science in Medical Radiation Sciences, Radiation Oncology, The University of Toronto, Toronto, Canada.

2011  **Rosen-Daniels Visiting Professorship in Surgical Oncology Translational Research Invited Speaker.** “Sarcoma Research in the Clinical Setting”. Mount Sinai Hospital, Toronto, Canada

2011  **Invited Speaker.** “From the Collamy to the RT 6060 T-Form Extremity Immobilizer”. RTi3 8th Annual Radiation Therapy Conference, Toronto, Canada.

2010  **Invited Speaker.** “MRI applications for Radiation Therapy”, Radiation Therapy Research Rounds at Sunnybrook Health Sciences Center, Toronto, Canada.

2010  **Invited Speaker.** “Sarcoma research, from theory to therapy”. Interdisciplinary Health Research Rounds, Mount Sinai Hospital, Toronto, Canada.

2009  **Invited Speaker- “MRI clinical use”, The Michener Institute and The University of Toronto, Toronto**

2009  **Invited Speaker.** “Volumetric imaging using Cone Beam CT for soft tissue sarcoma radiotherapy treatment”. Ontario Association of Medical Radiation Technologists, Central Education Day, Toronto, Canada

**F. Teaching and Design**

**1. TEACHING**

2009  Supervision, Teaching & Training of Radiation Sciences Program Students for the Princess Margaret Hospital Practical Selectives Course: Sarcoma Research in the radiation therapy department, Princess Margaret Hospital (1.0 hour presentation)

2009  RMP Rounds, “Sarcoma Research in Radiation Therapy, Research Bites”, The Princess Margaret Hospital/ University Health Network and The University of Toronto, Toronto (0.5 hour presentation)
2006  Supervision, Teaching & Training of Radiation Sciences Program Students for the Princess Margaret Hospital Practical Selectives Course: Sarcoma Research in the radiation therapy department, Princess Margaret Hospital  
(1.0 hour presentation)

2. COURSE DESIGN

2011  RT 6060 Extremity Immobilizer implementation: Small group sessions of supervision, teaching, training, monitoring, evaluation of equipment competency as well as feedback to improve performance of radiation therapists for the clinical implementation of the “new collamy” device commercialized through BIONIX radiation therapy for extremity immobilization for radiotherapy treatment. Hands-on practical component. Radiation Medicine Program, Princess Margaret Hospital.  
(20.0 hours of direct interaction and interaction via email)

2011  Couch Extension implementation: Small group sessions of supervision, teaching, training, monitoring, evaluation of equipment competency as well as feedback to improve performance of radiation therapists for the clinical implementation of the Elekta couch extension board for asymmetric patient setups. Protocol written and posted and the intranet. Radiation Medicine Program, Princess Margaret Hospital.  
(10.0 hours of direct interaction and interaction via email)

2011  PRODIGI implementation: Small group sessions of supervision, teaching, training, monitoring, evaluation of equipment competency as well as feedback to improve performance of radiation therapists for the clinical implementation of the handheld imaging device to monitor bacterial load on a patient's skin surface. Radiation Medicine Program, Princess Margaret Hospital.  
(10.0 hours of direct interaction and interaction via email)

2010  NIRS implementation: Small group sessions of supervision, teaching, training, monitoring, evaluation of equipment competency as well as feedback to improve performance of radiation therapists for the clinical implementation of the Near Infrared Spectroscopy system for monitoring oxyhemoglobin, deoxyhemoglobin and microcirculation. Radiation Medicine Program, Princess Margaret Hospital.  
(10.0 hours of direct interaction and interaction via email)

2009  Clinical course content supervisor for the Princess Margaret Hospital Practical Selectives Course (Y. Li, Course Code: RSC 510 Y1): Research in the radiation therapy department, Princess Margaret Hospital / University of Toronto  
(30 hours of educational administration and direct interaction, ongoing monitoring and feedback)

2009  CBCT implementation: Small group sessions of supervision, teaching of when to perform imaging, training, monitoring, evaluation of equipment competency as well as feedback to improve performance of radiation therapists for the clinical implementation of 3 dimensional cone beam CT for image guided IMRT. This technology was introduced as part of the Phase II IMRT study for lower extremity soft tissue sarcoma. Radiation Medicine Program, Princess Margaret Hospital.  
(10.0 hours of direct interaction and interaction via email)

Page 22 of 27  
October, 2011  
CONFIDENTIAL DOCUMENT
2008
OWL implementation: Small group sessions of supervision, teaching, training, monitoring, evaluation of equipment competency as well as feedback to improve performance of radiation therapists for the clinical implementation of the optical localization system for monitoring intrafraction patient motion. Radiation Medicine Program, Princess Margaret Hospital.
(10.0 hours of direct interaction and interaction via email)

2008
Course Design: One week site visit- the Netherland Cancer Institute (NKI). Organized and coordinated all lectures, tours of facilities, activities within RMP and Mount Sinai Hospital for Dr. Rick Haas, (Radiation Oncologist), Anja Anken (Radiation Therapist), and a medical physicist from NKI.
(30 hours of educational administration and direct interaction)

2007
Clinical course content supervisor for the Princess Margaret Hospital Practical Selectives Course (Y. Khan, Course Code: RSC 510 Y1) Research in the radiation therapy department, Princess Margaret Hospital / University of Toronto.
(30 hours of educational administration and direct interaction, on going monitoring and feedback)

2006
Collamy implementation: Small group sessions of supervision, teaching, training, monitoring, evaluation of equipment competency as well as feedback to improve performance of radiation therapists for the clinical implementation of the "collamy" device for extremity immobilization for radiotherapy treatment. Hands-on practical component. Radiation Medicine Program, Princess Margaret Hospital.
(20.0 hours of direct interaction and interaction via email)

Academic Year 2001-2002

CLRT 520/RSP531Y1: 600 hours
Instruct students in clinical environment and conduct clinical competency assessments and behavioral evaluations. Develop, implement and evaluated remedial courses as required.

CLRT 510/RSP530Y1: 600 hours
Instruct students in clinical environment and conduct clinical competency assessments and behavioral evaluations. Develop, implement and evaluated remedial courses as required.

CLRT 410/RSP430Y1: 600 hours
Instruct students in clinical environment and conduct clinical competency assessments and behavioral evaluations. Develop, implement and evaluated remedial courses as required.

RERE510/RSC541Y: 20 hours
Facilitation of clinical research groups and collation of presentation and participation marks
Mentoring of individual students

CLRT 310/RSP350Y1: 300 hours
Instruct students in clinical environment; conduct clinical competency assessments and behavioral evaluations.

IGRD310/RSC320H1: 107 hours
Conducted Imaging Course Labs for radiation sciences program at The Michener Institute.

Academic Year 2002-2003

CLRT 520/RSP531Y1: 600 hours
Instruct students in clinical environment and conduct clinical competency assessments and behavioral evaluations. Develop, implement and evaluated remedial courses as required.

CLRT 510/RSP530Y1: 600 hours
Instruct students in clinical environment and conduct clinical competency assessments and behavioral evaluations. Develop, implement and evaluated remedial courses as required.

CLRT 410/RSP430Y1: 600 hours
Instruct students in clinical environment and conduct clinical competency assessments and behavioral evaluations. Develop, implement and evaluated remedial courses as required.

RERE510/RSC541Y: 20 hours
Facilitation of clinical research groups and collation of presentation and participation marks
Mentoring of individual students

CLRT 310/RSP350Y1: 60 hours
Instruct students in clinical environment; conduct clinical competency assessments and behavioral evaluations.
**Academic Year 2003-2004**

CLRT 520/RSP531Y1: 600 hours  
Instruct students in clinical environment and conduct clinical competency assessments and behavioral evaluations, including remediation

CLRT 510/RSP530Y1: 600 hours  
Instruct students in clinical environment and conduct clinical competency assessments and behavioral evaluations for CLRT 520/RSP531Y1 including remediation courses

CLRT 410/RSP430Y1: 600 hours  
Instruct students in clinical environment and conduct clinical competency assessments and behavioral evaluations

RERE510/RSC541Y: 20 hours  
Facilitation of clinical research groups and collation of presentation and participation marks  
Mentoring of individual students

**Academic Year 2004-2005**

CLRT 250/MRS151H1: 600 hours  
Instruct students in clinical environment and conduct clinical competency assessments and behavioral evaluations, including remediation

CLRT 360/ MRS152H1: 600 hours  
Instruct students in clinical environment and conduct clinical competency assessments and behavioral evaluations for CLRT 520/RSP531Y1 including remediation courses

CLRT 370/ MRS153H1: 600 hours  
Instruct students in clinical environment and conduct clinical competency assessments and behavioral evaluations

PJRD36/MRS176H1: 44 hours  
Facilitation of clinical research groups and collation of presentation and participation marks  
Mentoring of individual students

PJRD36/MRS177H1: 44 hours  
Facilitation of clinical research groups and collation of presentation and participation marks  
Mentoring of individual students

**Academic Year 2005-2006**

CLRT 250/MRS151H1: 600 hours  
Instruct students in clinical environment and conduct clinical competency assessments and behavioral evaluations, including remediation

CLRT 360/ MRS152H1: 600 hours  
Instruct students in clinical environment and conduct clinical competency assessments and behavioral evaluations including remediation courses
CLRT 370/ MRS153H1: 600 hours
Instruct students in clinical environment and conduct clinical competency assessments and behavioral evaluations

PJRD36/MRS176H1: 44 hours
Facilitation of clinical research groups and collation of presentation and participation marks
Mentoring of individual students

PJRD36/MRS177H1: 44 hours
Facilitation of clinical research groups and collation of presentation and participation marks
Mentoring of individual students

Academic Year 2006-2007

CLRT 250/MRS151H1: 600 hours
Instruct students in clinical environment and conduct clinical competency assessments and behavioral evaluations, including remediation

CLRT 360/ MRS152H1: 600 hours
Instruct students in clinical environment and conduct clinical competency assessments and behavioral evaluations including remediation courses

CLRT 370/ MRS153H1: 600 hours
Instruct students in clinical environment and conduct clinical competency assessments and behavioral evaluations

PJRD36/MRS176H1: 44 hours
Facilitation of clinical research groups and collation of presentation and participation marks
Mentoring of individual students

PJRD36/MRS177H1: 44 hours
Facilitation of clinical research groups and collation of presentation and participation marks
Mentoring of individual students

Academic Year 2006-2007

CLRT 250/MRS151Y1: 600 hours
Instruct students in clinical environment and conduct clinical competency assessments and behavioral evaluations, including remediation courses

CLRT 360/ MRS152H1: 600 hours
Instruct students in clinical environment and conduct clinical competency assessments and behavioral evaluations including remediation courses

CLRT 370/ MRS153H1: 600 hours
Instruct students in clinical environment and conduct clinical competency assessments and behavioral evaluations

PJRD36/MRS176H1: 44 hours
Facilitation of clinical research groups and collation of presentation and participation marks
Mentoring of individual students

**PJR36/MRS177H1**: 44 hours
Facilitation of clinical research groups and collation of presentation and participation marks
Mentoring of individual students

**Academic Year 2007-2008**

**CLRT 130/MRS156H1**: 320 hours
Instruct students in clinical environment and conduct clinical competency assessments and behavioral evaluations, including remediation courses

**CLRT 360/MRS152H1**: 600 hours
Instruct students in clinical environment and conduct clinical competency assessments and behavioral evaluations including remediation courses

**CLRT 370/MRS153H1**: 600 hours
Instruct students in clinical environment and conduct clinical competency assessments and behavioral evaluations

**Academic Year 2008-2009**

**CLRT 130/MRS156H1**: 320 hours
Instruct students in clinical environment and conduct clinical competency assessments and behavioral evaluations, including remediation courses

**CLRT 371/MRS152H1**: 600 hours
Instruct students in clinical environment and conduct clinical competency assessments and behavioral evaluations including remediation courses

**CLRT 380/MRS153H1**: 600 hours
Instruct students in clinical environment and conduct clinical competency assessments and behavioral evaluations

**Academic Year 2009-2010**

**CLRT 130/MRS156H1**: 320 hours
Instruct students in clinical environment and conduct clinical competency assessments and behavioral evaluations, including remediation courses

**CLRT 261/MRS241H1**: 120 hours
Instruct in a treatment planning lab setting and conduct clinical competency assessments.

**CLRT 371/MRS152H1**: 600 hours
Instruct students in clinical environment and conduct clinical competency assessments and behavioral evaluations including remediation courses

**CLRT 330/MRS153H1**: 600 hours
Instruct students in clinical environment and conduct clinical competency assessments and behavioral evaluations

**Academic Year 2010-2011**

**CLRT 130/MRS156H1**: 320 hours
Instruct students in clinical environment and conduct clinical competency assessments and behavioral evaluations, including remediation courses

**CLRT 261-MRS241H1**: 60 hours
Instruct in a treatment planning lab setting and conduct clinical competency assessments.

**CLRT 371/ MRS152H1**: 600 hours
Instruct students in clinical environment and conduct clinical competency assessments and behavioral evaluations including remediation courses

**CLRT 380/ MRS153H1**: 600 hours
Instruct students in clinical environment and conduct clinical competency assessments and behavioral evaluations

**Academic Year 2011-2012**

**CLRT 130/MRS156H1**: 320 hours
Instruct students in clinical environment and conduct clinical competency assessments and behavioral evaluations, including remediation courses

**CLRT 261-MRS241H1**: 120 hours
Instruct in a treatment planning lab setting and conduct clinical competency assessments.

**CLRT 371/ MRS152H1**: 600 hours
Instruct students in clinical environment and conduct clinical competency assessments and behavioral evaluations including remediation courses

**CLRT 380/ MRS153H1**: 600 hours
Instruct students in clinical environment and conduct clinical competency assessments and behavioral evaluations

**Academic Year 2012-2013**

**CLRT 130/MRS156H1**: 320 hours
Instruct students in clinical environment and conduct clinical competency assessments and behavioral evaluations, including remediation courses

**CLRT 261-MRS241H1**: 120 hours
Instruct in a treatment planning lab setting and conduct clinical competency assessments.

**CLRT 371/ MRS152H1**: 600 hours
Instruct students in clinical environment and conduct clinical competency assessments and behavioral evaluations including remediation courses

**CLRT 380/ MRS153H1**: 600 hours
Instruct students in clinical environment and conduct clinical competency assessments and behavioral evaluations

**Academic Year 2013-2014**

**CLRT 130/MRS156H1**: 320 hours  
Instruct students in clinical environment and conduct clinical competency assessments and behavioral evaluations, including remediation courses

**CLRT 261-MRS241H1**: 120 hours  
Instruct in a treatment planning lab setting and conduct clinical competency assessments.

**CLRT 371/ MRS152H1**: 600 hours  
Instruct students in clinical environment and conduct clinical competency assessments and behavioral evaluations including remediation courses

**CLRT 380/ MRS153H1**: 600 hours  
Instruct students in clinical environment and conduct clinical competency assessments and behavioral evaluations

**Academic Year 2014-2015**

**CLRT 130/MRS156H1**: 320 hours  
Instruct students in clinical environment and conduct clinical competency assessments and behavioral evaluations, including remediation courses

**CLRT 261-MRS241H1**: 120 hours  
Instruct in a treatment planning lab setting and conduct clinical competency assessments.

**CLRT 371/ MRS242H1**: 600 hours  
Instruct students in clinical environment and conduct clinical competency assessments and behavioral evaluations including remediation courses

**CLRT 380/ MRS153H1**: 600 hours  
Instruct students in clinical environment and conduct clinical competency assessments and behavioral evaluations

**Academic Year 2015-2016**

**CLRT 130/MRS156H1**: 320 hours  
Instruct students in clinical environment and conduct clinical competency assessments and behavioral evaluations, including remediation courses

**CLRT 371/ MRS242H1**: 600 hours  
Instruct students in clinical environment and conduct clinical competency assessments and behavioral evaluations including remediation courses

**CLRT 380/ MRS153H1**: 600 hours  
Instruct students in clinical environment and conduct clinical competency assessments and behavioral evaluations
CURRICULUM VITAE

AUDREY JUSKO FRIEDMAN

Business Telephone Number: (416) 581-8600
E-mail Address: audrey.friedman@rmpuhn.ca

Last Updated: August 2013
EDUCATION

Degrees

McGill University, Montreal, Quebec: M.S.W. 1993
McGill University, Montreal, Quebec: B.S.W. 1992
McGill University, Montreal, Quebec: B.A. (Psychology) 1990
Dawson College/ McGill University, Montreal, Quebec M.R.T.(T) 1974

Diplomas / Certificates

Certificate Critical Incident Stress Debriefing 1993
Advanced Certification Radiation Therapy (ACT) 1986

BIOGRAPHICAL INFORMATION

Director, Patient Education 2011-present
University Health Network

Director, Patient Education and Survivorship 1999-present
Princess Margaret Cancer Centre, University Health Network

Provincial Head Patient Education 2004-present
Cancer Care Ontario

Associate Director, ELLICS: Electronic Living Laboratory for Interdisciplinary Research 2010-present

Consultant: Patient Education 2011-present
Kuwait Cancer Control Center, Kuwait

CEGEP Marie Victoria

Manager: Foyer for Caregivers 1995-1996
CLSC Rene Cassin - Institute of Social Gerontology of Quebec

Clinical Instructor and Field Supervisor 1995-1998
McGill University School of Social Work

Clinical Social Worker/Supervisor 1994-1999
Jewish Family Services of the Baron de Hirsch Institute/Catholic Family Services

Manager Family Services 1990
Beth Zion Synagogue

McGill Department of Radiation Oncology 1984-1986

Radiation Therapist/Field Supervisor 1976-1980
SCHOLARLY ACTIVITIES/COMMITTEE MEMBERSHIPS

National/International

2011-2012  In Our Genes Advisory Committee, Willow Breast Cancer Support Canada
2010-2012  Professional Development Committee, CPEN
2009-2010  Co-Chair Planning Committee, Cancer Patient Education Network-American Association of Cancer Education-European Association of Cancer Education Annual Meeting and Conference
2009-2010  National Survivorship Working Group, Canadian Partnership Against Cancer
2009-2011  Pan-Canadian Guideline Multidisciplinary Expert Panel - Canadian Partnership Against Cancer
2008-2010  Chair, Patient Education, Sub Committee, Rebalance Focus Education Committee Canadian Partnership Against Cancer
2008-2012  Steering Committee, Canadian Psychosocial Oncology Partnership (CPOP)
2007-2011  Rebalance Focus Education Committee, Canadian Partners Against Cancer
2002-2010  National Executive Steering Committee, National Executive Steering Committee, Cancer Patient Education Network of Canada (elected)
2001-Present  Publication Reviewer, Office of Education and Special Initiatives, National Cancer Institute
2001-2009  National Task Force, Canadian Health Network
2001-2010  Research Committee, National Cancer Institute: Cancer Patient Education Network
2007  Course Co-Director, Sharing the Journey: With, Through and Beyond Cancer
2004-2005  Chair, National Cancer Institute’s Cancer Patient Education Network (elected)
2004  Steering Committee Member. Supportive Care Task Force Ontario
2003  Course Co-Director, National Planning Committee, Canadian Cancer Patient Education Network
2003  Policy Advisor, Canadian Association of Provincial Cancer Agencies
2003  Publication Reviewer, AMGEN
2002-2004  Founding Chair, Cancer Patient Education Network of Canada (elected)
2002-2004  Education Steering Committee, Canadian Association Psychosocial Oncology
2002  Course Director, National Planning Committee, First Canadian Cancer Patient Education Network Symposium

Provincial/Regional

2012-2013  CRC Patient Education Expert Panel
2012-Present  Patient Education Indicators Working Group, Cancer Care Ontario
2011-2012  Patient Experience Steering Committee, Cancer Care Ontario
2010-2012  Lead, Patient Experience Navigation Working Group, Cancer Care Ontario
2009-2012  Co-Chair, Registered Nurses Association of Ontario, Patient Education Guideline Committee
2008-2009  Canadian Cancer Society Survivorship Conference Planning Committee
2006-Present  Clinical Leadership Operations Committee, Cancer Care Ontario
2006-2012  Disease Pathway Management Council, Cancer Care Ontario
2006-Present  Program in Evidence-based Care, Disease Site Group/Guideline Development Group, Cancer Care Ontario
2006-2010 Communications and Stakeholder Relations Advisory Board, Cancer Care Ontario
2006-2012 Human Touch Award Panel Member, Cancer Care Ontario
2002-Present Supportive Care Collaborative Network Advisory Committee
2004-Present Chair, Patient Education Committee, Cancer Care Ontario
2004-Present Clinical Council, Cancer Care Ontario
2003-2009 Medical Resource Council, Gilda’s Club
1999-2003 Education Advisory Committee, Cancer Care Ontario
1999-2003 Education Advisory Committee, Cancer Care Ontario Region-Central East

University Health Network (UHN)/Princess Margaret Cancer Centre

2012-Present UHN Patient Portal Steering Committee (Co-Chair)
2012-Present UHN Web Executive Sponsor Committee
2012-Present UHN Annual Research Review Committee
2012-Present UHN Patient Navigation Working Group
2012-Present UHN Patient Experience Steering Committee
2011-Present UHN Education Advisory Committee
2011-Present RMP Education Committee
2011-2012 Kensington Hospice Planning Committee
2011-2012 Toronto Cancer Conference Planning Committee
2010-Present National Cancer Survivors Day Planning Committee
2009-2010 Princess Margaret Conference Planning Committee
2009-2011 Ambulatory Services Redesign, Empowerment Work Stream Lead
2007-Present Senior Operations Committee (ELLICSR)
2007-2012 Patient Portal Working Group
2006-2010 Ambulatory Services Management Council
2005-Present Survivorship Outcomes Subcommittee
2004-Present Breast Cancer Survivorship Program Executive
2003-2005 UHN Diversity and Patient Task Force
2003-2005 UHN Interpretation Services Advisory Committee
2002-2005 Chair, Patient Education Task Force, Curriculum Committee, University Health Network
2003-2011 UHN Patient Education Network Executive
2000-Present Chair, OMH Oncology Patient Education Advisory Committee
1999-Present Member, UHN Leadership Group
1999-Present Member, PMH Management Committee
2007 Course Co-Director, Sharing the Journey: With, Through and Beyond Cancer

ACADEMIC AWARDS & HONOURS

Dave Davis CEPD Research Award, Faculty of Medicine University of Toronto. (Research Award) December 2010
Cancer Patient Education Network Excellence in Patient Education Award, National Cancer Institute, United States. (Distinction) October 2010
Ivan Silver Award for Excellence in Continuing Mental Health Education, Department of Psychiatry, University of Toronto. (Research Award) July 2010
Maximizing your Patient Education Skills. June 2010
KT for Cancer Control in Canada Casebook, Maximizing your Patient Education Skills (Research) June 2010
Survivor Advocate Program Scholarship Award, Biennial Cancer Survivorship Research Conference (Research) June 2010
Cancer Patient Education Network Distinguished Service Award, October 2009
McKesson VIP Award for Innovation (UHN/SIMS: $10,000) (Innovation) September 2007
Cancer Care Ontario Team Innovation Award. (Innovation) November 2006
Cancer Patient Education Network Gold Star Award. (Distinction) October 2003

EXTERNALLY FUNDED RESEARCH ACTIVITIES

Title: The Status of Patient Education in Canada: A Cross Canada Survey
Name of Co-Principal-Investigator: Jusko Friedman A, Jones J, Nyhof-Young J, Catton P.
Agent: PMH Foundation Education Development Grant
Dollar Amount: $5,000
Dates/year(s): 2001

Title: The Impact of SARS on Information Seeking and Psychosocial Functioning of Newly Diagnosed Patients and Their Family Members in the Department of Radiation Oncology at Princess Margaret Hospital
Name of Co-Principal-Investigator: Nyhof-Young J, Jusko Friedman A, Wiljer D, Catton P.
Agent: Department of Radiation Oncology at Princess Margaret Hospital
Dollar Amount: $6,000
Dates/year(s): 2003-2004

Title: PMH Virtual Tour
Name of Co-Principal-investigator: Wiljer D, Nyhof-Young J, Jusko Friedman A, Catton P, Awrey S, Laperriere N.
Agent: Princess Margaret Hospital Foundation
Dollar Amount: $30,000
Dates/years: 2003-2004

Title: Playful Learning: a Paediatric Radiation Multimedia Project
Agent: Princess Margaret Hospital Foundation
Dollar Amount: $70,000
Dates/year(s): 2003-2004

Title: Playful Learning: A Pediatric Radiation Multimedia Project
Agent: BRAIN Child Foundation.
Dollar Amount: $25,000

Title: Playful Learning: a Pediatric Radiation Multimedia Project
Agent: Pediatric Oncology Group of Ontario
Dollar Amount: $100,000
Dates/year(s): 2004–2005

Title: Playful Learning: a Pediatric Radiation Multimedia Project
Agent: Ronald McDonald Children’s Charities
Dollar Amount: $30,000
Dates/year(s): 2004–2005
Title: Sharing the Journey: With, Through and Beyond Cancer  
Principal Applicant: Jones, J.  
Co-Applicants: Jusko Friedman A, Catton P, Rodin G.  
Agent: Canadian Breast Cancer Foundation Opportunities Grant  
Dollar Amount: $22,000  
Dates/year(s): 2007

Title: Advanced Patient Education for Cancer Survivorship APECS  
Name of Principal Investigator: Luke R  
Agent: SSHRC  
Dollar Amount: $142,900  
Dates/year(s): June 2007 - May 2009

Title: Evaluating an Innovative Inter-professional Communication and Patient Education Skills Training Course  
Name of Principal Investigator: Jusko Friedman A, Jones, JM  
Agent: CEPD Research and Development Grant, Faculty of Medicine, University of Toronto  
Dollar Amount: $5,000  
Agent: Cancer Care Ontario  
Dollar Amount: $10,000  
Dates/year(s): January 2009 - September 2009

Title: Oncology Interactive Navigator  
Name of Principal Investigator: Loiselle C  
Name of Local Principal Investigator: D. Wiljer, Jusko Friedman A.  
Agent: Canadian Partnership Against Cancer  
Dollar Amount: $24,052  
Dates/year(s): March 2009 - August 2009

Title: Creating social networks for sustainable symptom control  
Name of Co-Principal Investigators: Urowitz S, Wiljer D  
Name of Co-Investigators: Green E, Jusko Friedman A, Turnbull G, Catton P.  
Agent: Canadian Institutes of Health Research (CIHR) Meetings, Planning and Dissemination Grant  
Dollar Amount: $15,000  
Dates/year(s): 2009

Title: Developing a Conceptual Framework of Patient Mediated Knowledge Translation: Systematic Review Using a Realist Approach  
Funding Agency: Canadian Institutes of Health Research Knowledge Synthesis  
Name of Principal Investigator: Gagliardi A  
Dollar Amount: $99,045  
Dates/year(s): 2009-2010
Title: Maximizing your Patient Education Skills (MPES) Course  
Funding Agency: De Souza Institute  
Name of Co-Principal-Investigators: Jusko Friedman A, Jones JM, Catton P, Sawka C.  
Dollar Amount: $150 000  
Dates/year(s): 2009-2010

Title: Maximizing your Patient Education Skills (MPES) Course  
Funding Agency: De Souza Institute  
Name of Co-Principal-Investigators: Jusko Friedman A, Jones JM, Catton P, Sawka C.  
Dollar Amount: $150 000  
Dates/year(s): 2009-2012

Title: Integrating Self-Management Support in Cancer Care to Optimize Health and Living with Cancer  
Name of Principal Investigator: Howell D  
Agent: Canadian Institutes of Health Research (CIHR)  
Dollar Amount: $ 301,602  
Dates/year(s): 2010 – 2012

Title: Navigating Your Cancer Journey - Improving the Patient Experience  
Names of Co-Principal-Investigators: Jusko Friedman A, Wiljer D, Catton P.  
Names of Co-Investigators: Papadakos J, Urowitz S.  
Agent: PMH Foundation Education Development Grant  
Dollar Amount: $500,000  
Dates/year(s): 2010-2013

Title: Transition to Survivorship: Translating Knowledge Into Action for Testicular and Endometrial Cancer Populations  
Name of Principal Investigator: Jones J, Howell D  
Agent: Canadian Institutes of Health Research (CIHR)  
Dollar Amount: $ 256,581  
Dates/year(s): 01 July 2010 – 31 July 2013

Title: Engaging Survivors to Improve Patient Experiences Throughout the Cancer Journey  
Name of Principal Investigator: Green E  
Agent: Canadian Health Services Research Foundation (CHSRF)  
Dollar Amount: $ 200,000  
Dates/year(s): 15 October 2010 – 15 October 2012
Title: Developing a Rapid Diagnostic Patient Education Program
Name of Co-investigators: Jusko Friedman A, Wiljer D, Catton P
Agent: Gattuso Rapid Diagnostic Centre
Dollar Amount: $250,000
Dates/year(s): 2011 – 2012

Title: Integrating Self-Management Support in Cancer Care to Optimize Health and Living with Cancer
Agent: Canadian Institutes of Health Research.
Name of Principle Investigator: Howell D
Dollar Amount: $301,602.00
Dates/year(s): 2010-2012.

Title: Optimizing Health and Patient Experience of Cancer: Planning for Implementation and Research to Tailor and Evaluate Chronic Disease Self-Management Applied to Cancer
Name of Principle Investigator: Howell D
Name of Principle Decision-Maker Lead: Jusko Friedman A
Agent: Canadian Institutes of Health Research (CIHR)
Dollar Amount: $25,000
Dates/year(s): 2012-2013

Title: Nutrition Health and Wellness – Health eConcierge Survivors with Nutrition Self-Management Skill Building.
Names of Co-Principal-Investigators: Jusko Friedman A, Wiljer D, Urowitz S, Fierini D, Catton P.
Agent: PMH Foundation Education Development Grant
Dollar Amount: $225,000
Dates/year(s): 2012-2014

B. Biographical Information

1. EDUCATION

Degrees

2006 May - 2009 Apr MEd, Master of Education, Higher Ed, Health Prof Ed, OISE/UT, University of Toronto, Toronto, Ontario, Canada
2004 Sep - 2007 Aug BSc, Medical Radiation Sciences, Dept of Medicine, University of Toronto, Toronto, Ontario, Canada
2000 Sep - 2004 Apr BSc, Biological Science (Hons), University of Guelph, Ontario, Canada

Postgraduate, Research and Specialty Training

2010 May Principles of Good Clinical Research Practice, University Health Network, Toronto, Ontario, Canada
2008 Nov - 2009 Apr MRS Clinical Preceptorship Course, University of Toronto, Toronto, Ontario, Canada
2007 Jun Image-Guided Radiation Therapy Education Course, Princess Margaret Hospital, Toronto, Ontario, Canada
2004 Sep - 2007 Aug Advanced Diploma Radiation Therapy, Michener Institute for Applied Health Sciences, Toronto, Ontario, Canada

Qualifications, Certifications and Licenses

2007 Oct - present . Canadian Association of Medical Radiation Technologists, Canada
2007 Oct - present . College of Medical Radiation Technologists of Ontario, Ontario, Canada

2. EMPLOYMENT
Current Appointments

2012 Jun - present  Associate Member, Institute of Medical Science, University of Toronto

2012 May - present  Associate Director - Curriculum, Medical Radiation Sciences Program, Department of Radiation Oncology, University of Toronto, Toronto, Ontario, Canada

2010 Mar - present  Clinical Educator (Status Appointment), Michener Institute for Applied Health Sciences, Toronto, Ontario, Canada

2009 Nov 30 - present  Assistant Professor, Department of Radiation Oncology, University of Toronto, Toronto, Ontario, Canada

2008 Jan - present  Radiation Therapist, Radiation Medicine Program, Princess Margaret Cancer Centre, Toronto, Ontario, Canada

3. PROFESSIONAL AFFILIATIONS AND ACTIVITIES

Professional Associations

2011 - present  Member, International Society of Radiographers & Radiological Technologists

2009 - present  Associate Member, Canadian Association of Radiation Oncology

2005 - present  Member, Canadian Association of Medical Radiation Technologists

2005 - present  Member, Ontario Association of Medical Radiation Technologists

Administrative Activities

NATIONAL

Canadian Association of Medical Radiation Technologists

2015 Jul - present  Advanced Practice Radiation Therapy Certification Committee, Canada.

Canadian Association of Radiation Oncology

2014 May - present  Member, Membership Committee, Canada.

Canadian Partnership for Quality Radiotherapy (CPQR)

2010 - present  Member, Steering Committee, Canada.

2010 - present  Member, Patient Engagement Working Group, Canada.

LOCAL

Radiation Medicine Program, Princess Margaret Cancer Centre

2014 Sep - present  Member, Radiation Therapy Professional Council, Toronto, Ontario, Canada.

2014 Jan - present  Member, Radiation Medicine Program Education Committee, Toronto, Ontario, Canada.
Peer Review Activities

EDITORIAL BOARDS

Editor
2005 - present University of Toronto, MRS “Over-X-Posure” Newsletter

MANUSCRIPT REVIEWS

Reviewer
2014 - present Journal of Medical Imaging and Radiation Sciences

C. Research Funding

1. GRANTS, CONTRACTS AND CLINICAL TRIALS

PEER-REVIEWED GRANTS

FUNDED

This grant will support the universal availability of high quality and safe radiotherapy across Canada through sustainable system performance improvement and the development of consensus-based guidelines and indicators to aid in radiation treatment program development and evaluation.

Nicole Harnett
MRT(T) BSc AC(T) MEd

A. Date Curriculum Vitae is Prepared: 2016 July 28

B. Biographical Information

1. EDUCATION

Degrees
2003 MEd, Health Professional Education, OISE/UT, University of Toronto
1994 BSc, Lakehead University, Thunder Bay, Ontario

Qualifications, Certifications and Licenses
1990 Advanced Certification in Radiation Therapy, Canadian Association of Medical Radiation Technologists
1984 Certification in Radiation Therapy, Canadian Association of Medical Radiation Technologists

2. EMPLOYMENT

Current Appointments
2009 - present Assistant Professor, Radiation Oncology, University of Toronto
2007 - present Associate Member, Institute of Medical Science, University of Toronto
2004 Nov - present Director, Radiation Skills Lab, Radiation Medicine Program, Princess Margaret Hospital
2004 Nov - present Director, Medical Radiation Sciences Graduate Program, Radiation Oncology, University of Toronto
2004 Nov - present Manager, Clinical Specialist Radiation Therapist Project, Cancer Care Ontario

Previous Appointments

HOSPITAL
1994 - 1998 Sep Clinical / Didactic Instructor, School of Radiation Therapy, Toronto-Sunnybrook Regional Cancer Centre
1990 - 1994 Clinical Co-ordinator, Radiation Therapy training program, Northwestern Ontario Regional Cancer Centre
1984 - 1990 Senior/Staff Therapist, Northwestern Ontario Regional Cancer Centre

UNIVERSITY
2002 Sep - 2004 Oct Dean, Diagnostic Imaging and Therapy, Michener Institute for Applied Health Sciences
2001 Sep - 2002 Sep Division Director, Laboratory and Radiation Sciences, Michener Institute for Applied Health
Nicole HARNETT

Sciences

1999 Apr - 2001 Sep
Coordinator, Radiation Therapy Program, Laboratory and Radiation Sciences, Michener Institute for Applied Health Sciences

Project Manager, Development of Radiation Therapy Program, Laboratory and Radiation Sciences, Michener Institute for Applied Health Sciences

UNIVERSITY - RANK
1999 - 2009
Lecturer, Radiation Oncology, University of Toronto

3. HONOURS AND CAREER AWARDS

Distinctions and Research Awards

INTERNATIONAL
Received

2010
Rouse Educational Trust K.C. Clarke Memorial Orator, New Zealand Institute of Medical Radiation Technologists. (Distinction)
Award winner travels to the annual NZIMRT Conference as Keynote Speaker. (Conference cancelled due to earthquake in Christchurch, NZ). Total Amount: 10,000

NATIONAL
Received

2011 Jun
Dr. Petrie Memorial Award, Canadian Association of Medical Radiation Technologists. (Research Award)

2011 Jun
Welch Memorial Lecturer, Canadian Association of Medical Radiation Technologists. (Distinction)
Awarded for the 69th CAMRT Conference: Annual national honour awarded (by nomination and vote) to a Canadian MRT who is deemed to have made significant contributions to the profession over his/her career. Winner travels to and speaks at the CAMRT conference. Total Amount: 3,000

2010
Winner, Radiation Therapy Speaker Competition, Canadian Association of Medical Radiation Technologists. (Research Award)
Annual national award to the best radiation therapy related abstract submitted. Winner travels to and speaks at the ASRT Annual General Meeting as invited speaker. Total Amount: 3,000

Teaching and Education Awards

LOCAL
Received

2009 May
Best Educational Mentor, Radiation Medicine Program, Dept of Radiation Oncology, Faculty of Medicine, Princess Margaret Hospital
4. PROFESSIONAL AFFILIATIONS AND ACTIVITIES

Professional Associations

2007 - present  
Associate Member, Canadian Association of Radiation Oncology

2000 - present  
Member, International Society of Radiographers and Radiological Technologists

1999 - present  
Member, Wilson Centre for Research in Education

1984 - present  
Member, Canadian Association of Medical Radiation Technologists

1984 - present  
Member, College of Medical Radiation Technologists of Ontario

1984 - 2003  
Member, American Registry Radiation Technologies

Administrative Activities

INTERNATIONAL

Canadian Association of Medical Radiation Technologists / International Society of Radiographers and Radiation Therapists

2010 - present  
Conference Chair, Joint 70th CAMRT Annual General Conference / 17th World Congress for the International Society of Radiographers and Radiation Therapists

NATIONAL

Alberta Health

2012  
Consultant
On move to degree preparation for Radiation Therapy.

Atlantic Health Sciences Centre

2005  
Member

BCIT / BC Cancer Agency

2002  
Consultant, Joint Degree / Diploma Program
On development of program.

British Columbia Institute of Technology

2002  
Chair

Canadian Association of Medical Radiation Technologists

2010 - present  
Chair, Advanced Practice for Radiation Therapists Steering Committee

2009 - present  
Member, Continuity of Practice Committee

1995 - 2004  
Member, Council on Education, Advanced Certification (Radiation Therapy)

Canadian Medical Association

2000 - present  
Surveyor, Conjoint Committee for Accreditation in Education

Cancer Care Manitoba and Partner Sites

2001  
Member
Ontario Oncology Advanced Practice Nurse e-Mentorship Program
2007 - 2010 Invited Member, National Steering Committee

PROVINCIAL / REGIONAL
College of Medical Radiation Technologists of Ontario
2012 Consultant
On the potential development of an additional class of registration for advanced practice radiation therapists in Ontario.
2009 Consultant, Interprofessional Collaborative Scope of Practice Working Group
Responding to HPRAC directives regarding changes to regulations.

McMaster University
2007 - 2010 Expert invited panelist, PEPPA Framework, School of Nursing
For preparation of tool kit for use of framework.

Ontario Association of Medical Radiation Technologists
2010 - present Consultant
Preparation of certification process for advanced radiation therapy practice.
2005 Consultant
Preparation of advanced practice project for radiological technologists.
1995 - 1997 Chair, Professional Standards and Practices Committee

Ontario Ministry of Health and Long Term Care
1999 - 2003 Member, Cancer Human Resources Committee

Ontario Radiation Therapy
2003 - present Member, Advanced Practice Steering Committee

University of Toronto / Ryerson University
2011 - present Chair, Collaborative Programming Working Group
To develop collaborative programming between UTDRO and the MSc (Medical Physics) Program at Ryerson University.

LOCAL
University of Toronto
2010 - present Member, Evaluation Subcommittee, Radiation Oncology Residency Program, Faculty of Medicine, Dept of Radiation Oncology, Postgraduate MD
2009 - present Member, Planning Committee, Target Insight Conferences (2009, 2010), Faculty of Medicine, Dept of Radiation Oncology, Continuing Education
2009 - present Chair, MHSc Medical Radiation Sciences Admissions Committee, Faculty of Medicine, Dept of Radiation Oncology, Graduate Education
2009 - present Member, Admissions Committee, Faculty of Medicine, Institute of Medical Science
2007 - present Chair, MHSc Medical Radiation Sciences Program Committee, Faculty of Medicine, Dept of Radiation Oncology, Graduate Education
2006 - present Member, Physics Residency Program Committee, Department of Radiation Oncology (Graduate)
2005 - present Member, Continuing Education Committee, Faculty of Medicine, Dept of Radiation Oncology,
Continuing Education

2005 - present  Member, Academic Leadership Advisory Group, Radiation Therapy, Department of Radiation Oncology
2005 - present  Member, Faculty Council, Faculty of Medicine
2004 - present  Member, Executive Committee, Department of Radiation Oncology
2002 - present  Member, MSC/MHSc Curriculum Development Committee, Faculty of Medicine, Dept of Radiation Oncology, Graduate Education
2000 - present  Member, Radiation Oncology Education Advisory Committee, Department of Radiation Oncology

2012  Member, Planning Committee, UTDRO Research Day, Department of Radiation Oncology (Graduate)
2011  Co-Chair, Target Insight Conference, Faculty of Medicine, Dept of Radiation Oncology, Continuing Education
2011  Member, Communications Committee, Department of Radiation Oncology
2011  Member, Planning Committee, UTDRO Research Day, Department of Radiation Oncology (Graduate)
2009  Member, Planning Committee, UTDRO Research Day, Department of Radiation Oncology (Graduate)
2008 - 2011  Member, Planning Committee, Toronto Radiation Medicine/RTi3 Conferences (2009, 2010), Faculty of Medicine, Dept of Radiation Oncology, Continuing Education
2008 - 2010  Member, Curriculum Committee, Faculty of Medicine, Institute of Medical Science
2004 - 2006  Member, Physics Doctoral Program Development Committee, Department of Radiation Oncology (Graduate)
2003 - 2004  Member, Joint Curriculum Committee, Medical Radiation Sciences, Faculty of Medicine, Dept of Radiation Oncology, Undergraduate MD
2001 - 2004  Member, Medical Radiation Sciences Oversight Committee, Department of Radiation Oncology (Undergraduate)
2001 - 2004  Co-Chair, Joint Curriculum Committee, Medical Radiation Sciences, Faculty of Medicine, Dept of Radiation Oncology, Undergraduate MD
2000 - 2004  Member, Medical Radiation Sciences Planning Committee, Department of Radiation Oncology (Undergraduate)
1999 - 2004  Member, Joint Management Committee, Medical Radiation Sciences, Faculty of Medicine, Dept of Radiation Oncology, Undergraduate MD
1999 - 2001  Member, Joint Curriculum Committee, Medical Radiation Sciences, Faculty of Medicine, Dept of Radiation Oncology, Undergraduate MD
1999 - 2001  Chair, Faculty Liaison Committee, Radiation Therapy Program, Department of Radiation Oncology (Undergraduate)

Peer Review Activities

MANUSCRIPT REVIEWS
Reviewer
2008 - present  Journal of Medical Imaging and Radiation Sciences (CAMRT)
2008 - present  Journal of Radiotherapy in Practice
Other Research and Professional Activities

RESEARCH PROJECT

2003 Mar Principal Author. Examining the reliability and overall utility of a proposed structured interview tool for the selection of radiation therapy students. University of Toronto. Major research project for Master of Education program requirements, OISE. Unpublished.

C. Research Funding

1. GRANTS, CONTRACTS AND CLINICAL TRIALS

PEER-REVIEWED GRANTS

FUNDED

2006 Dec Co-Investigator. The effectiveness of prostate and rectal contouring workshop on precise delineation of prostate and rectum in planning for three-dimensional radiotherapy for prostate cancer (3D-CRT). Canadian Association of Radiation Oncologists (CARO). ACURA Grant. PI: Szumacher, Ewa. 10,000. [Grants]

2006 Jun - 2006 Sep To present at the ISRRRT World Congress III, Denver CO and Advanced Practice Conference, Sheffield UK. Ontario Ministry of Health and Long-Term Care. Individual Travel Grant. 5,000. [Grants]

Ontario Ministry of Health and Long-Term Care. Collaborator(s): P. Catton (Co-investigator). 444,320. [Grants]

2005 Sep  
To present at the Radiotherapy in Practice Conference, Sheffield UK. Ontario Ministry of Health and Long-Term Care. Individual Travel Grant. 3,000. [Grants]

2004 Sep  
Co-Principal Investigator. Onsite visits to Sheffield Hallam University and Lincolnshire Trust, UK. Ontario Ministry of Health and Long-Term Care. Individual Travel Grant. 3,000. [Grants]

2004 May - 2006 Mar

E. Presentations and Special Lectures

1. INTERNATIONAL

Invited Lectures and Presentations
2009 Oct Advanced practice evidence base: build it and they will come. The RANZCR/AIR/FRO/ACPSEM Combined Scientific Meeting. Brisbane, Australia. Presenter(s): Harnett N.

2009 Oct Not “business as usual” – a glance at interprofessionalism in radiation medicine. The RANZCR/AIR/FRO/ACPSEM Combined Scientific Meeting. Brisbane, Australia. Presenter(s): Harnett N.

2007 Sep International Forum on Advanced Practice’ (workshop). International Conference on Advanced Practice in Radiotherapy & Oncology. Sheffield, United Kingdom. Presenter(s): Harnett N, Smoke M.

2007 Sep Keynote Address: “The Questions of Advancing Practice”. International Conference on Advanced Practice in Radiotherapy & Oncology. Sheffield, United Kingdom. Presenter(s): Harnett N.
Presented Abstracts

2006  Rise and Shine: One Departments Effort to Elevate Radiation Therapy Practice. ISRRRT World Congress. Presenter(s): **Harnett N**, Bolderston A, Palmer C.

2006  Role Rehearsal: A Project Examining the Potential for Advanced Practice for Radiation Therapists. ISRRRT World Congress. Presenter(s): **Harnett N**, Bolderston A, Smoke M.

2003  Offering Distance Programs in Allied Health Professions. World Health Congress III. San Juan, Puerto Rico. Presenter(s): **Harnett N**, Cowling C.

2. NATIONAL

Invited Lectures and Presentations

2012 Apr  Putting the “you” in professional “contribution”. Alberta College of Medical Diagnostic and Therapeutic Technologies. Calgary, Alberta. Presenter(s): **Harnett N**.
2011 Jun  Our professional comm-"YOU"-nity. Canadian Association of Medical Radiation Technologists' Welch Memorial Lecture. Saskatoon, Saskatchewan. Presenter(s): Harnett N.

2010 Apr  On your mark: tackling advanced practice. Alberta College of Medical Diagnostic and Therapeutic Technologies. Calgary, Alberta. Presenter(s): Harnett, N.

2010  Advancing practice: Lessons learned from radiation therapy. 68th Annual CAMRT Conference. Quebec City. Presenter(s): Harnett N.

Presented Abstracts

Other Lectures and Presentations

3. PROVINCIAL / REGIONAL

Invited Lectures and Presentations

2011 Dec Developing Advanced Practice in Radiation Therapy: respond, research and report. College of Medical Radiation Technologists of Ontario Annual Education Dinner. Toronto. Presenter(s): Harnett N.

2007 May Radiation Therapy Advanced Practice – How did we get there and where are we now? Ontario Association of Medical Radiation Technologists (OAMRT) Annual General Meeting. Hamilton, Ontario. Presenter(s): Harnett N, Smoke M.

Presented Abstracts

2000 Exposing the reflective process in the radiation therapy curriculum. Ontario Medical Education Network

Other Lectures and Presentations

4. LOCAL

Presented Abstracts

F. Teaching and Design

1. INNOVATIONS AND DEVELOPMENT IN TEACHING AND EDUCATION

2010 - present In-training evaluations, Graduate Education, Faculty of Medicine, Dept of Radiation Oncology, University of Toronto

Harnett N, Ackerman, I. Redesign of in-training evaluations for the radiation oncology residents in UTDRO.

2009 - present Clinical Internship I and II, Graduate Education, Faculty of Medicine, Dept of Radiation Oncology, University of Toronto

Harnett N. Development and implementation of the Clinical Internship I and II courses for the MHScMRS students. Including design of assessment, development of internship experiences with supervisors, mentorship and guidance for both students and supervisors.

2008 - present Clinical Reasoning and Decision Making in Radiotherapy I, II, III, Graduate Education, Faculty of Medicine, Dept of Radiation Oncology, University of Toronto

Harnett N, Catton P. Co-Course Director - Implementation, evaluation and revision of Clinical Reasoning and Decision Making in Radiotherapy I, II, III – a 3-suite course for the MHScMRS program.

2004 - present Graduate Diploma for Medical Physicists, Graduate Education, Faculty of Medicine, Dept of Radiation Oncology, University of Toronto

Catton P, et al. Contribution to curriculum development and preparation for program accreditation for graduate program.
G. Research Supervision

1. PRIMARY OR CO-SUPERVISION

Graduate Education

2. OTHER SUPERVISION

Continuing Education

2008 - present  Julie Blain, Juravinski Cancer Centre.

Other

2008 - present  Lilian Doerwald-Munoz, Juravinski Cancer Centre.
2008 - present  Gregory Fox, Ottawa Civic Cancer Centre.
2008 - present  Lynda Jackson, Kingston Regional Cancer Centre.
2008 - present  Shannon Seed, Ottawa Civic Cancer Centre.
2008 - present  Emily Sinclair, Odette Cancer Centre.
2007 - present  Dale Breen, Odette Cancer Centre.
2007 - present  Biu Chan, Princess Margaret Hospital.
2007 - present  Michelle Lau, Princess Margaret Hospital.
2008 - 2009  Shannon Pearson, Princess Margaret Hospital.
2007 - 2008  Grace Lee, Princess Margaret Hospital.
Curriculum Vitae

JANE HIGGINS (DEROCCHIS)
Lecturer University of Toronto
Research Radiation Therapist
Clinical Radiation Therapist

Date of Last Update: January 4, 2017

Biographical Information

Name: Jane Ann Higgins
Business Address: Radiation Medicine Program, Radiation Therapy
Princess Margaret Hospital
610 University Avenue
Toronto, Ontario
M5G 2M9

Business Telephone #: 416-946-4501
E-mail Address: Jane.Higgins@rmp.uhn.on.ca

ACADEMIC APPOINTMENTS

2003 – 2011  
Instructor
University of Toronto, Toronto, Canada

2011 – Present  
Lecturer
University of Toronto, Toronto, Canada

1. EDUCATION

Degrees
Sept 1994 - July 1997  Radiation Therapist, Bachelor of Science (Honors 2:1), Therapy Radiography, Portsmouth University, ENGLAND, U.K

Postgraduate, Research and Specialty Training

Feb 2009 – April 2009  Integrated Roles – Radiation Treatment Planning
Location – Princess Margaret Hospital, Toronto, Canada

Location – George Brown College, Toronto, Canada

April 2004 – June 2004  RT 800 - Dosimetry and Planning Certificate
Location - Toronto Michener Institute, Toronto, Canada
March 2003 - April 2005  *Certificate in Instructing Adults (CIA)*  
Location - George Brown College, Toronto, Canada

January 2001  *CAMRT Diploma – Radiation Therapy*  
College of Medical Radiation Technologists, Ontario, Canada

**Qualifications, Certifications and Licenses**

**Annual**  
March 2001 – Present  
CPR Re-Certification, Toronto, Ontario

**March 2001 – Present**  
Certificate of Registration, Ontario Association of Medical Radiation Technologists, Toronto, Ontario

**March 2001 – Present**  
Certificate of Registration, College of Medical Radiation Technologists of Ontario, Toronto, Ontario

**March 2001 – Present**  
Certificate of Registration, Canadian Association of Medical Radiation Technologists, Toronto, Ontario

**3. EMPLOYMENT**

**Current Appointments**

March 2015-Present  
**Clinical Planner/Research Radiation Therapist**  
Princess Margaret Cancer Centre, Toronto, Canada

**Previous Appointments**

**March 2014-March 2015**  
**Maternity Leave**

**March 2013-March 2014**  
**Clinical Planner/Research Radiation Therapist**  
Princess Margaret Cancer Centre, Toronto, Canada

**March 2012-March 2013**  
**Maternity Leave**

**Sept 2006 – March 2012**  
**Lung RESEARCH/Clinical Radiation Therapist**  
Princess Margaret Hospital, Toronto, Canada

**Aug 2005 – Sept 2006**  
**Reference Radiation Therapist (Unit 12 - Research CBCT Unit)**  
Princess Margaret Hospital, Toronto, Canada

**July 2003 – Aug 2005**  
**Clinical Coordinator/Instructor**  
UT/TMI Radiation Sciences Program

**May 2003 –July 2003**  
**Radiation Therapist**  
Princess Margaret Hospital, Toronto, Ontario, Canada

**Nov 2002 – May 2003**  
**Clinical Coordinator (Secondment)**  
UT/TMI Radiation Sciences Program  
Princess Margaret Hospital, Canada

**March 2001 – Nov 2002**  
**Radiation Therapist**  
Princess Margaret Hospital, Canada

**June 1999 – March 2001**  
**Senior II Radiation Therapist**  
Christie Hospital (U.K)

**Sept 1997 – June 1999**  
**Radiation Therapist**

Clinical Aspects of Radiation Therapy
PMH, Toronto, Canada
(21 hours per week)

3. GRADUATE EDUCATION

4. UNDERGRADUATE MD

5. POSTGRADUATE MD

6. CONTINUING EDUCATION

7. FACULTY DEVELOPMENT

8. PATIENT AND PUBLIC EDUCATION
J. Creative Professional Activities

1. PROFESSIONAL INNOVATION AND CREATIVE EXCELLENCE

2. CONTRIBUTIONS TO THE DEVELOPMENT OF PROFESSIONAL PRACTICES

Nov 2009  Attended ASTRO Annual Scientific Meeting, Delivered Podium Presentation
Chicago, USA

Sept 2009  Attended CARO Annual Scientific Meeting, Delivered Podium Presentation
Quebec City, Canada

Sept 2009  Attended CARO Annual Scientific Meeting, Delivered IGRT Workshop
Quebec City, Canada

June 2009  Attended Target Insight III Annual Meeting
Next Generation Radiation Medicine: Putting Biology and Technology to Work
Toronto, Ontario, Canada

March 2009  Dosimetry & Planning Module
Completed the Dosimetry and Planning Training Module = Pass.
PMH, Toronto, Ontario

Sept 2008  Attended ASTRO Annual Meeting Poster
Boston, USA

Sept 2008  Attended CARO Annual Scientific Meeting
Delivered Podium Presentation & Poster
Montreal, Canada

Oct 2007  Attended ASTRO Annual Meeting Poster
Los Angeles, CA, USA
Oct 2007  Attended CARO-COMP Annual Scientific Meeting, Podium Presentation
Toronto, Ontario, Canada

April 2007  Attended Kingbridge Conference
Podium Presentation
Toronto, Ontario, Canada

Jan 2007  Attended Elekta Users Meeting
Nice, France

Jan 2006-Present  Faculty Member and Presenter at IGRT courses
PMH, Toronto, Canada

Oct 2005  Completed Image Guided Radiation Therapy (IGRT), Post Graduate Course (2 days)
PMH, Toronto.

Oct 2005  Attended CARO Annual Scientific Meeting
Poster
Victoria, BC, Canada

Oct 2004  Attended ASRTO Annual Meeting
Atlanta, GA, USA

May 2004  Completed Dosimetry and Treatment Planning (RT 800)
Post Graduate Online Course (16 weeks in length)

Sept 2003  Attended Lecture
Healthy Lifestyles in Children with Malignant Diseases,
Pediatric Oncology Group of Ontario (POGO)
Toronto, Canada

March 2003  Attended Lecture
Physics Seminars Series for Radiation Medicine Professional
Treatment Planning-From Manual Technique to Pencil Beam; Distribution Optimization,
PMH, Toronto, Canada

March 2003  Attended Lecture
The Challenges involved when looking after Patients with Bone Metastases
Radiation Medicine Program, PMH, Toronto, Ontario, Canada

March 2003  Development of Staff and Student Training for
IQ Web
PMH, Toronto, Ontario, Canada
March 2003 Attended Lecture
What’s New in Accelerators and Immobilization
Imaging in Radiotherapy: From Fluoroscopy to Functional Imaging

Sept 2002 Attended Lecture
Skill Building in Psychosocial Oncology:
A Multidisciplinary Course, Palliative Care,
PMH Psychosocial Program, Toronto.

Nov 2001 Clinical Teaching Skills Certificate
The Michener Institute for Applied Health Sciences, Toronto
PMH, Toronto, Canada

3. EXEMPLARY PROFESSIONAL PRACTICE
Curriculum Vitae

Lori Holden
Advanced Practice Radiation Therapist

A. Date Curriculum Vitae is Prepared: 2016 February 26

Only includes Activities from July 2015 to July 2016

B. Biographical Information

1. EDUCATION

Degrees
1995 BSc, University of Waterloo

Qualifications, Certifications and Licenses
2006 - present Certified Clinical Research Professional (CCRP) certification, Society of Clinical Research Associates (SoCRA)

2. EMPLOYMENT

Current Appointments
2008 - present Advanced Practice Radiation Therapist – RRRP and BMC, Odette Cancer Centre
2007 - present Faculty Associate Member, Institute of Medical Science, University of Toronto
2005 - present Assistant Professor, Radiation Oncology, University of Toronto
1999 - present MRT(T), Radiation Therapy, Odette Cancer Centre

C. Research Funding

1. GRANTS, CONTRACTS AND CLINICAL TRIALS

NON-PEER-REVIEWED GRANTS
Curriculum Vitae

Shao Hui Sophie Huang
MSc, MRT(T)

A. Date Curriculum Vitae is Prepared: 2016 February 26

Only includes Activities from July 2015 to July 2016

B. Biographical Information

1. EDUCATION

Degrees
1987 - 1990 MD, Nephrology, Shanghai Second Medical University, China
1982 - 1987 MD, Shanghai Second Military Medical University, China
2003 BSc, Radiation Therapy, with Distinction, University of Toronto, Canada

Qualifications, Certifications and Licenses
2003 License, College of Medical Radiation Technologists of Ontario (CMRTO)

2. EMPLOYMENT

Current Appointments
2009 Sep - present Assistant Professor, Radiation Oncology, Faculty of Medicine, University of Toronto
2004 - present Head and Neck Clinical Data Research Therapist, Radiation Medicine Program, Princess Margaret Hospital, Toronto, Ontario
2003 - present Radiation Therapist, Radiation Medicine Program, Princess Margaret Hospital, Toronto, Ontario

3. PROFESSIONAL AFFILIATIONS AND ACTIVITIES

Name: Florencia Siu Moon Jon BSc, MRT(T)

Address: Department of Radiation Therapy
Odette Cancer Center
Sunnybrook Health Sciences Centre
2075 Bayview Avenue
Toronto, Ontario, Canada M4N 3M5
416-480-6100 ext 7543
Email: Florencia.jon@sunnybrook.ca

Title: Research Radiation Therapist
Rapid Response Radiotherapy Program
Staff Radiation Therapist
Department of Radiation Therapy
Odette Cancer Center
Sunnybrook Health Sciences Centre

Education:

2001-2004: Bachelor of Science & Diploma in Radiation Science,
Joint degree/diploma program of University of Toronto and The Michener Institute
Stream of Radiation Therapy

1997-2001: Honour Bachelor of Arts and Sciences, University of Toronto
Majors: Human Biology & Psychology

Membership:

Canadian Association of Medical Radiation Technologists

The College of Medical Radiation Technologists of Ontario

Ontario Association of Radiation Technologists
Publications:

PA = Principal Author; SRA = Senior Responsible Author; CPA = Co-Principal Author; C = Collaborator

Peer-reviewed Publications:

Manuscripts Submitted:

Presentations:

1. What is Interprofessional Clinic? An introduction of Rapid Response Radiotherapy Program and the Bone Metastases Clinic. Presented in Department of Radiation Therapy for 1st year Radiation Therapy Students at Odette Cancer Centre, May 2010

2. An Interprofessional Approach to patient care at the Odette Cancer Centre: Rapid Response Radiotherapy Program (RRRP) and Bone Metastases Clinic (BMC) Sunnybrook 1st annual showcase, Toronto, Ontario, June 2010

3. Dedicated out patient palliative radiotherapy clinics in Canada and abroad + Case reports from RRRP. Presented in Department of Clinical Oncology, University of Hong Kong, Queen Mary Hospital, Hong Kong, September 2010

5. Radiation Technique Lecture. The Michener Institute. To 2nd year radiation therapy student. Toronto, Ontario, November 2010

Teaching Dossier

2008 Laura Tong, third year radiation therapy student, The Michener Institute

2010 Aaron Cumal, 1st year radiation therapy student, The Michener Institute
3 hours clinic time in RRRP

2010 Alvin Liu, 1st year radiation therapy student, The Michener Institute
3 hours clinic time in RRRP

2010 Faiza Hussain, 1st year radiation therapy student, The Michener Institute
3 hours clinic time in RRRP

2010 Hayley Mills, 1st year radiation therapy student, The Michener Institute
3 hours clinic time in RRRP

2010 Kai Ma, 1st year radiation therapy student, The Michener Institute
3 hours clinic time in RRRP

2010 Kathy Yip, 1st year radiation therapy student, The Michener Institute
3 hours clinic time in RRRP

2010 Lily Huang, 1st year radiation therapy student, The Michener Institute
3 hours clinic time in RRRP

2010 Madette Galapin, 1st year radiation therapy student, The Michener Institute
3 hours clinic time in RRRP

2010 Marco Vane, 1st year radiation therapy student, The Michener Institute
3 hours clinic time in RRRP

2010 Michael Hui, 1st year radiation therapy student, The Michener Institute
3 hours clinic time in RRRP

2010 Mikhael Quaasalmy, 1st year radiation therapy student, The Michener Institute
3 hours clinic time in RRRP
2010 Rebecca Reinhart, 1st year radiation therapy student, The Michener Institute
3 hours clinic time in RRRP

2010 Rebekah Shin, 1st year radiation therapy student, The Michener Institute
3 hours clinic time in RRRP

2010 Xun Liu, 1st year radiation therapy student, The Michener Institute
3 hours clinic time in RRRP

2010 Shaelyn Culleton, second year undergraduate student, University of Waterloo.

2010 Janet Nguyen, third year undergraduate student, University of Waterloo

2010 Liang Zeng, second year undergraduate student, University of Waterloo.

2010 Justin Kwong, third year undergraduate student, University of Western Ontario.

2010 Cassandra Uy, third year undergraduate student, McMaster University.

2010 Karrie Wong, first year undergraduate student, McMaster University.

2010 Esther Chan, first year medical student, University of Western Ontario.

2010 Kaitlin Koo, second year undergraduate student, University of Waterloo

1. EDUCATION

Degrees
2007 - present PhD, Health Science, Charles Sturt University, Australia
2003 - 2006 MSc, Radiography, Anglia Ruskin University, United Kingdom
2000 - 2003 BSc, Radiography (Hons), Anglia Ruskin University, United Kingdom
1983 - 1986 Professional Education, Northern Ireland School of Therapeutic Radiography, Belfast, United Kingdom
1976 - 1983 High School Education, Glenlola Collegiate Grammar School, Bangor, United Kingdom

Postgraduate, Research and Specialty Training
2008 Gender and Health core course, University of Toronto, Toronto, Ontario, Canada
2008 Collaborative Program in Women’s Heath (Commence), Women’s College Research Institute, University of Toronto, Toronto, Ontario, Canada
1986 Radiography Diploma, College of Radiographers, United Kingdom

Qualifications, Certifications and Licenses
2002 Certificate of Clinical Teaching, The Michener Institute, Toronto, Ontario, Canada
1998 Certificate of IV Contrast, Toronto Administration, The Michener Institute, Toronto, Ontario, Canada
1998 Certificate of Medical Dosimetry, US Medical Dosimetry Board Certification Board, United States
1992 Certificate of Patient Counselling, Centennial College, Toronto, Ontario, Canada
2. EMPLOYMENT

Current Appointments
2009 - present Clinical Educator Status, Michener Institute for Applied Health Sciences, Toronto, Ontario, Canada
2008 - present Associate Member (restricted), Institute of Medical Science School of Graduate Studies, University of Toronto, Toronto, Ontario, Canada
2006 - present Lecturer, Radiation Oncology, University of Toronto, Toronto, Ontario, Canada
2003 - present Radiation Treatment Planner (integrated role), Princess Margaret Hospital, Toronto, Ontario, Canada

Previous Appointments
HOSPITAL
2007 - 2011 Research Therapist (Adaptive Radiotherapy Planning for Gynaecological Cancer) and Treatment Planner, Princess Margaret Hospital, Toronto, Ontario, Canada
2006 - 2007 Research Therapist and Treatment Planner (Pelvic Lymph Node Radiotherapy) and Treatment Planner, Princess Margaret Hospital, Toronto, Ontario, Canada
2005 - 2006 Planning Image Definition and Contouring Advanced Practice Radiation Therapist role investigator and Treatment Planner, Princess Margaret Hospital, Toronto, Ontario, Canada
2000 - 2003 Radiation Treatment Planning Process Development Leader, Princess Margaret Hospital, Toronto, Ontario, Canada
1995 - 2000 Radiation Treatment Planner, Princess Margaret Hospital, Toronto, Ontario, Canada
1990 - 1995 Radiation Therapist, Treatment / Planning Process Development, Princess Margaret Hospital, Toronto, Ontario, Canada
1988 Feb - 1988 Oct Medical Physics Technician, Department of Nuclear Medicine, St Williams’ Hospital, Rochester, United Kingdom
1988 - 1990 Therapeutic Radiographer, Department of Radioisotopes, London Hospital, Whitechapel, London, United Kingdom
1986 - 1988 Therapeutic Radiographer, Department of Medical Physics, Northern Ireland Radiotherapy Centre, Ireland

3. HONOURS AND CAREER AWARDS

Distinctions and Research Awards

NATIONAL
Received
2007 Scholarship Award, Canadian Association of Medical Radiation Technologists Foundation, Canada. (Distinction)

LOCAL
Received
2007 Professional Development Scholarship, Medical Radiation Sciences, Department of Radiation Oncology, DRO Faculty, University of Toronto, Toronto, Ontario, Canada. (Distinction)
2005 Clinical Research Supervision Award, DRO Faculty, University of Toronto, Toronto, Ontario, Canada. (Distinction)

2005 Research Supervision Award, Radiation Medicine Program, Princess Margaret Hospital, Toronto, Ontario, Canada. (Distinction) (Joint).

2. EMPLOYMENT

Current Appointments

UNIVERSITY - CROSS APPOINTMENT

Status Appointment – Clinical Educator

Previous Appointments

CLINICAL:

[Nov 1983 to Nov 1984] Acting Director of Radiation Therapy, Department of Radiation Therapy, the Saskatchewan Cancer Foundation, Toronto, Allan Blair Memorial Service Regina, Saskatchewan, Canada.

[Nov 1984 to Jul 1986] Assistant Director & Dosimetrist, Department of Radiation Therapy, The Saskatchewan Cancer Foundation, Toronto, Allan Blair Memorial Service Regina, Saskatchewan, Canada

[Nov 1983 - Nov 1984] Radiation Therapist, Department of Radiation Therapy, The Saskatchewan Cancer Foundation, Toronto, Allan Blair Memorial Service Regina, Saskatchewan, Canada

[1977-1983] Senior I and Senior II Radiographer, Department of Radiation Therapy, Northampton General Hospital, Northampton, UK.
Nadiya Makhani

[1974-1977] Senior I and Basic Grade Radiographer. Department of Radiation Therapy, King’s College Hospital and other centers in the UK.

CONSULTING:

(March 2013) **Consult and Teach Dosimetry and Treatment Planning** at the Royal Victoria Hospital (Barrie)
Ongoing consultation via email for any complex treatment planning issues

(Sep 2012 to Oct 2012) **Consult and Teach Dosimetry and Treatment Planning** at the Royal Victoria Hospital (Barrie)

(Dec 2006 to Jan 2007) **Consult and Teach Dosimetry and Treatment Planning** at the Ibn –Zuhr Cancer Centre at the Aga Khan University Hospital in Karachi, Pakistan. Voluntary Service

3. HONOURS AND CAREER AWARDS

PROVINCIAL/ REGIONAL

May 1991

*Percy Ghent Award*
Exhibit presented at OAMRT Conference. Title: Canine Nasopharyngeal Tumors

Teaching Awards:

LOCAL

Oct 1995

*Golden Apple Award* - Awarded by Odette Cancer Centre Radiotherapy department for excellence in Teaching

Oct 1994

*Golden Apple Award* - Awarded by Odette Cancer Centre Radiotherapy department for excellence in Teaching

Oct 1993

*Golden Apple Award* - Awarded by Odette Cancer Centre Radiotherapy department for excellence in Teaching

- Presentation (with Dr. A.Kim): The Evolution of the Treatment of the Whole CNS: From 3D Conformal Techniques to Tomotherapy
  RTi3-8th Annual Radiation Therapy Conference, Toronto, March 2011
- Presentation: “Partial Breast Irradiation using permanent seed implant at Odette Cancer Centre” at RTi3 Conference, March 2010
- Presentation: Radiation Therapy in Karachi, Pakistan, Odette Cancer Centre; Nov 2007
- Presentation: "Dosimetry of Current Breast Techniques used at Toronto Sunnybrook Regional Cancer Centre”, CT SIM Workshop, March 2001
- Presentation: Overview of Current Breast Techniques used at Toronto Sunnybrook Regional Cancer Centre @TSRCC Rounds May 2000
- Presentation: "Stereotactic Planning for AVM's" at Radiation Therapy Continuing Education Rounds, Toronto Sunnybrook Regional Cancer Centre” June 1999
- Presentation: "Selectron O.R. Procedure and Dosimetry" for Radiation Oncology Residents, Toronto Sunnybrook Regional Cancer Centre” October 1999

F. Teaching and Design

Department of Radiation Oncology, Faculty of Medicine, University of Toronto

[2005-present] Course Instructor: Treatment Planning 2. Clinical Treatment Planning Rotation, UT DRO.
Medical Physics Residency Program. University of Toronto

Treatment planning
Conducted various treatment technique labs in Simulator for Radiation Therapists as well as R/T students
Clinical educator for Medical Physics Residents teaching them concepts of treatment planning
Helped Radiation Oncology residents with concepts of treatment planning

[1983 – 1986] Conducted various treatment technique labs in Simulator for Radiation Therapists as well as R/T students at Allan Blair Memorial Clinic, Regina, Saskatchewan
Clinical education with R/T students rotating through treatment planning on concepts of treatment planning.
A. Date Curriculum Vitae is Prepared: 2016 July 12

Only includes Activities from July 1982 to July 2016

B. Biographical Information

1. EDUCATION

Degrees

2000 BSc, Therapeutic Radiography (Hons), Anglia Polytechnic University, United Kingdom

Qualifications, Certifications and Licenses

2015 Nov - present Certified Training and Development Professional, The Institute for Performance and Learning, Toronto, Ontario, Canada, License / Membership #: 31171

2011 - present Stepping Stones Teacher Development Certificate Program, University of Toronto at St. Michael’s Hospital, Ontario, Canada

2009 - present Interprofessional Collaboration Certificate, Michener Institute for Applied Health Sciences, Ontario, Canada

2009 - present MRS Clinical Preceptorship Course Certificate, University of Toronto/The Michener Institute of Applied Health Sciences, Ontario, Canada

1989 Nov - present Advanced Certification, Canadian Association of Medical Radiation Technologist, Ontario, Canada, License / Membership #: 18732

1984 Nov - present College of Medical Radiation Technologists, Ontario, Canada, License / Membership #: 06266

1984 Nov - present Registered Technologist Therapy R.T.(T). Canadian Association of Medical Radiation Technologist, Canada, License / Membership #: 18732

1992 Diploma In Adult Education, Ontario Association of Medical Radiation Technologists

1991 Adult Education-Staff Training and Development Certificate (with High Honours), Seneca College for Applied Arts and Technology

1989 Advanced Certificate in Radiotherapy; A.C.T. Canadian Association of Medical Radiation Technologists

1984 Diploma in Radiotherapy; R.T.T. Canadian Association of Medical Radiation Technologists

1984 M.R.T.(T), College of Medical Radiation Technologists of Ontario
2. EMPLOYMENT

Current Appointments

2012 May - present  Clinical Adjunct Professor, Michener Institute of Applied Health Sciences
2009 - present  Clinical Coordinator (Status Appointment), Michener Institute for Applied Health Sciences
2006 - present  Lecturer, Radiation Oncology, University of Toronto

Previous Appointments

UNIVERSITY

2005 - 2008  Clinical Associate, Michener Institute for Applied Health Sciences
2000 - 2010  Clinical Education Director, Radiation Sciences, Michener Institute for Applied Health Sciences

Responsible to administer the clinical education of Michener students, according to the criteria and standards established and approved by the UT/TMI Medical Radiation Sciences Program, its Advisory Council and the CMA accreditation Guidelines

3. HONOURS AND CAREER AWARDS

Distinctions and Research Awards

NATIONAL

Received

2008  Philips Exhibit Award, Canadian Association of Medical Radiation Technologists. (Distinction)
For Annual General Conference Poster: “An Instructional Strategy to Improve Inter-rater Reliability in the Assessment and Evaluation of Student Clinical Performance” - Carol Gillies, Karen Moline (Co-authors).

1985  Mallinckrodt Award, Canadian Association of Medical Radiation Technologists. (Distinction)
For achieving the highest aggregate mark in the national exams of the CAMRT in radiation therapy.

1983  Bursary, Canadian Cancer Society. (Distinction)

PROVINCIAL / REGIONAL

Received

2009  Professional Recognition Award (for 25 years), Ontario Association of Medical Radiation Technologists. (Distinction)

2008  Certificate of Merit - Percy Ghent Exhibit, Ontario Association of Medical Radiation Technologists. (Distinction)
For Annual General Conference Poster: “An Instructional Strategy to Improve Inter-rater Reliability in the Assessment and Evaluation of Student Clinical Performance” - Carol Gillies, Karen Moline (Co-authors).

1990  Long Service Awards, Cancer Care Ontario. (Distinction)
For 5, 10, 15 Years of Services at the Toronto-Sunnybrook Regional Cancer Centre.
LOCAL
Received

2014 Jul - 2015 Jun  Long Service Award, Sunnybrook Health Sciences Centre, Toronto, Ontario, Canada. (Distinction)
For 30 years of service at the Odette Cancer Centre.

2013 Apr - 2014 Jun  Travel Grant, Centre for Interprofessional Education, University of Toronto, Toronto, Ontario, Canada. (Travel Grant)
competitive call for travel grant to attend Collaborating Across Borders IPE Conference. Total Amount: 500 CAD

2011  “Inspire” Top-Rated Abstract, RTi3 Radiation Oncology Conference. (Distinction)

2010  Long Service Award, Sunnybrook Health Sciences Centre. (Distinction)
For 25 years of service at the Odette Cancer Centre.

2008  Champions of Care Award, Sunnybrook Foundation. (Distinction)

2007  Certificate of Appreciation, Michener Institute for Applied Health Sciences. (Distinction)
Recognizing valuable contributions to student achievements. Presented by fellow clinical coordinators at Faculty Liaison Committee meeting.

2005  Long Service Award, Sunnybrook and Women’s College Health Sciences Centre. (Distinction)
For 20 years of service at the Toronto Sunnybrook Regional Cancer Centre.

1982  Principal's Citation, Honour Crest, Fisher Park High School, Ottawa, Ontario. (Distinction)

Teaching and Education Awards

PROVINCIAL / REGIONAL
Received

2014 Nov  Excellence in Clinical Teaching and Supervision Award (The Crystal Apple Award), Dept of Radiation Oncology, Faculty of Medicine, The Michener Institute for Applied Health Sciences, Toronto, Ontario, Canada. (Undergraduate Education, B. Sc. Specialty: Radiation Therapy)
Excellence in Clinical Teaching and Supervision Award (The Crystal Apple Award)}

LOCAL
Received

2010  Interprofessional Education Award, Dept of Radiation Oncology, Faculty of Medicine, Peters-Boyd Academy (Sunnybrook Health Sciences Centre)

Nominated

2011  PAC and Nursing Education Award, Sunnybrook Health Sciences Centre. (Undergraduate Education)
In recognition of outstanding teaching efforts.
4. PROFESSIONAL AFFILIATIONS AND ACTIVITIES

**Professional Associations**

2015 Jul - present  member, The Institute for Performance and Learning, 31171
2012 - present  General Member, Centre for Interprofessional Education, University of Toronto
1984 Nov - present  member, Canadian Association of Medical Radiation Technologists, 18732
1984 Nov - present  member, Ontario Association of Medical Radiation Sciences, 18732
1984  Canadian Association of Medical Radiation Technologists
1984  College of Medical Radiation Technologists of Ontario, 06266
1984  Ontario Association of Medical Radiation Technologists

**Administrative Activities**

**NATIONAL**

Canadian Association of Medical Radiation Technologists
1999  Reviewer, Essay Awards Competition
1995 - 2000  Marker/ Expert, Advanced Certification Committee

**PROVINCIAL / REGIONAL**

Ontario Association of Medical Radiation Technologists
1994 - 1997  Chair, Diploma in Adult Education
1994 - 1997  Coordinator, Diploma in Adult Education

Ontario Schools of Radiation Therapy
1997 - 2000  Member, Academic Affairs Committee
1997 - 2000  Member, Council Committee
1994 - 1995  Member, Academic Affairs Committee
1994 - 1995  Member, Council Committee

**LOCAL**

Sunnybrook Health Sciences Centre
2012 - present  Member, IPE/IPC Showcase Planning Committee Meeting
2012 - present  Member, IPE/IPC Showcase Planning Committee Meeting, Toronto, Ontario, Canada.
2011 - present  Member, Simulator Sub-Committee, Sunnybrook Education Action Committee, Faculty of Medicine, Dept of Radiation Oncology, Multilevel Education
2015 Jul - 2016 Jul  Interprofessional Education Elective Sub Committee, Toronto, Ontario, Canada.

Toronto-Sunnybrook Regional Cancer Centre
2005 - 2006  Member, Professional Education Leader Committee
2002 - 2010  Member, Radiation Program Education Advisory Committee
1989 - 2001  Member, Faculty Liaison Committee
1989 - 2001  Member, Education Advisory Committee
1989 - 1995  Member, Management Committee, Department of Radiation Therapy
1987 - 1988  Chair, Continuing Education Committee - Radiotherapy Dept
1985 - 1987  **Co-Chair**, Continuing Education Committee

**University of Toronto/The Michener Institute for Applied Health Sciences**

2000 - present  **Member**, Faculty Liaison Committee, Medical Radiation Sciences Program (MRS)
2012 - 2013 Nov  **Chair**, FLC Subcommittee, Toronto, Ontario, Canada.
   *To define indicators for “entry-level”.*
2008  **Secretary**, Faculty Liaison Committee, Medical Radiation Sciences Program (MRS)
2007  **Member**, Clinical Mentor Project
2006 - 2007  **Member**, Clinical Simulation Semester Development Committee
2006 - 2007  **Member**, Clinical Practicum Course Development
2005 - 2007  **Member**, IPE Advisory Council Committee
2004 - 2005  **Secretary**, Faculty Liaison Committee, Medical Radiation Sciences Program (MRS)
2003 - 2006  **Member**, Selectives Working Committee
2001 - 2002  **Member**, Stream Specific Research Review Committee
2000 - 2004  **Member**, Program Advisory Committee, Radiation Sciences Program (MRS)
1998 - 2000  **Member**, Radiation Therapy Program Development Committee
   *Proposed Joint UT/TMI Program for Radiation Therapists.*
1998 - 2000  **Member**, Curriculum Committee
   *Proposed Joint UT/TMI Program for Radiation Therapists.*

**Other Research and Professional Activities**

**RESEARCH PROJECT**

2011 Nov - 2012 Dec  **Co Investigator**. Developing Effective Preceptorship Skills and Support for Radiation Therapists. Collaborator(s): Peacock Marnie, MRT (T), B.Sc. (Hons) **Moline Karen**, MRT (T), A.C.(T.), B.Sc. (Hons) Feuz Carina, MRT (T), B.Sc. (Hons) Tan Kieng, MRT (T), B.Sc. M.Ed.
   *The primary outcome is to develop a customized curriculum addressing the radiation therapy preceptor’s needs for providing preceptorship to students in the Medical Radiation Sciences (MRS) Radiation Therapy program.*

2011 Apr - 2011 Dec  **Co Investigator**. ARCTIC - Appreciating Roles and Collaboration To Improve Care. Collaborator(s): Susan Sutherland, DDS, MSc.
   *Interprofessional Education - to measure change in student’s attitudes and preceptions regarding interprofessional collaboration using the Interdisciplinary Education Perception Scale* (Leutch et al, 1990).

1999  **Principal Author**. The Challenge of Maintaining Competence as a Practicing Radiation Therapist in Ontario. Anglia Polytechnic University. Supervisor(s): Jon Svensson.
   *Research paper submitted in partial fulfillment of the requirements for the degree of Bachelor of Science Honours Radiography (Therapeutic).*

**CONFERENCE REVIEWER FOR PROFFERED PAPERS**

**Review Abstract Submissions for CAMRT annual general conference.**

**PROCESS AND QUALITY IMPROVEMENT INITIATIVE**

The preceptorship pilot was designed to augment the learning experience of radiation therapy students in the planning area by enhancing a learning environment that creates safety, engages the students, and facilitates coaching while providing excellence in care.

**REVIEWER FOR PROFFERED PODIUM AND POSTER PRESENTATIONS**

**C. Research Funding**

**1. GRANTS, CONTRACTS AND CLINICAL TRIALS**

**NON-PEER-REVIEWED GRANTS**

**FUNDED**

2013 Feb - 2013 Nov  **Co-Developer.** ARCTIC - Appreciating Roles and Collaboration to Improve Care - Head and Neck Oncology, Case for UT curriculum. Centre for Interprofessional Education, University of Toronto. Centre for Interprofessional Education. Collaborator(s): Dr. Susan. Sutherland. 500 CAD. [Grants] DVD production of a patient case study for IPE elective at UT.

Clinical and Didactic Integration Program. © Toronto-Sunnybrook Regional Cancer Centre, Ontario Cancer Treatment & Research Foundation, Sunnybrook Medical Centre, University of Waterloo, 1996. Précis: This document is the clinical program for competency assessment of the Diploma, Degree Radiation Therapy Program of the Toronto-Sunnybrook Regional Cancer Centre and the University of Waterloo. It is a competency based formalized clinical learning experience, designed to integrate course instruction with clinical skills. The objectives for each clinical placement, clinical expectations and didactic assignments are identified with clear performance criteria for assessment. Editor.

E. Presentations and Special Lectures

1. INTERNATIONAL

Invited Lectures and Presentations

2015 Sep 7  **Speaking Poster presentation.** The Evolution of A Popular IPE Elective. AMEE - An International Association for Medical Education. Glasgow, Glasgow City, United Kingdom. Presenter(s): Karen Moline, M.R.T.(T.), A.C.(T.), B.Sc.(Hons). Co-Author Susan E. Sutherland DDS MSc.

2014 Sep 16  **collaborator.** Support for MRS radiation therapy preceptors: A needs assessment analysis. ASRT. San Francisco, California, United States. Presenter(s): Kieng Tan (presenter), Carina Feuz, Marnie Peacock, Karen Moline.

2012 Oct 30  **Invited Speaker.** Clinical Teaching: Developing Fundamental Skills to Become a Better Educator in the Clinical Environment. American Society of Radiologic Technologists. Boston, Massachusetts, United States. Presenter(s): Karen Moline, MRT(T), ACT, BSc; Marnie Peacock, BSc ,MRT(T). 60 minute workshop.

2012  **Invited Lecturer.** CLINICAL TEACHER 101: Essential Skills for Clinicians to Become Better Educators Within Their Inter-professional Clinical Practice. Internation Society of Radiographers and Radiological Technologists. Presenter(s): Moline K, Peacock M, McGuffin M, Dawdy K.

2. NATIONAL

Presented Abstracts

2014 Apr 27  **Poster Presentation.** What I need to become a better preceptor. 72nd CAMRT Annual General Conference. Edmonton, Ontario, Canada. Presenter(s): Marnie Peacock, Karen Moline, Kieng Tan, Carina Feuz.

2008 Jun  **An Instructional Strategy to Improve Inter-rater Reliability in the Assessment and Evaluation of Student Clinical Performance (Poster Presentation).** Canadian Association of Medical Radiation Technologists Annual General Conference. Moncton, New Brunswick. Presenter(s): Gillies C, Moline K. Philips Exhibit Award.

F. Teaching and Design

1. INNOVATIONS AND DEVELOPMENT IN TEACHING AND EDUCATION

2015 Jul - 2016 Jun
Team preceptors in planning, Undergraduate Education, Faculty of Medicine, Dept of Radiation Oncology, Sunnybrook HSC, Odette Cancer Centre
recruited volunteer preceptors in radiation planning department to provide guidance and support to radiation therapy students

9 preceptors
11 3yr students each completing 6 weeks in planning
14 1st yr students each completing 2 weeks in planning.

improved clinical experience for radiation therapy students.

2015 Jul - 2016 Jun
IPE Outside the Building, Multilevel Education, Faculty of Medicine, Dept of Radiation Oncology, Sunnybrook HSC
Co-Curriculum developer, work in progress for an elective IPE offering focussing on spiritual and emotional health within the health professions.

2014 Jul 25
Spiritual Care Workshop, Multilevel Education, Faculty of Medicine, Centre for Interprofessional Education, Sunnybrook Health Sciences Centre
2 -2 hour sessions-interactive components including large and small group participation- over a minimum of one week apart
Spiritual Care Workshop for healthcare professionals providing care to cancer patients. Explore patient's and family's reflections on the cancer journey and its impact.

Orange Elective in PIPEs.

2013 Feb
Preceptorship Level 2 Course, Continuing Education, Radiation Therapists, Department of Radiation Oncology, Odette Cancer Centre and Princess Margaret Hospital
Feuz C., Peacock M. Moline K, Tan K, Preceptorship Level 2, for 2 half day sessions.
Created workshop based on Research project based on the results of the needs assessment.

2012
Preceptorship Certificate Course, Continuing Education, Department of Radiation Oncology Moline K, Peacock M. Feuz C. Customized Workshop 1 and Workshop 2, for a one day session specialized to the needs of the Credit Valley Hospital Radiation Therapy Department.
Revised workshop activities, modified format, increased interactivity, relevance.

2011
Clinical Preceptorship Certificate Course, Preceptorship Workshop 1 Moline K, Peacock, M.
Revised workshop activities, updated presentation, increased interactivity, relevance.

2011
Preceptorship Certificate Course, Workshop 2 Feuz C, Moline K.
Revised workshop activities, updated presentation, increased interactivity, relevance.

2011
ARCTIC: Appreciating Roles and Collaboration to Improve Care, Head & Neck Cancer, University of Toronto Moline K, Sutherland S.
Awarded ORANGE status as an IPE elective from PIPES, Office of Interprofessional Education.

2011
Small IPE Group Facilitation Workshop, Sunnybrook Health Sciences Centre Davies R, Jackson L, Moline K, Sutherland S. Collaborated to develop a workshop to train IPE facilitators specifically for our ARCTIC event.

2011
Spiritual Care Workshop (revised), 2 sessions, Odette Cancer Centre Ford B, Moline K.

2011
Developed new Simulator Rotation Guidelines for Clinical Students

2011
Developed and designed new IPE rotation for Skin clinic and competency assessment for skin cancer
2011
Clinical Teaching Skills Workshop 1, Department of Radiation Therapy, Sunnybrook Health Sciences Centre
_Moline K, Peacock M, McGuffin M, Dawdy K._

2011
Clinical Teaching Skills Workshop 2, Department of Radiation Therapy, Sunnybrook Health Sciences Centre

2010
Head & Neck Cancer, Interprofessional Education Event, Sunnybrook Health Sciences Centre
_Moline K, Sutherland S._

2009
Spiritual Care Workshop, 2 sessions, Odette Cancer Centre
_Ford B, Moline K._

2008
Clinical Radiation II and Clinical Radiation III, MRS242H1, MRS243H1, Michener Institute for Applied Health Sciences
Consultant and expert advisor on the development of these courses.

2008
Spiritual Care Workshop, 2 sessions, Odette Cancer Centre
_Cyr D, Moline K, Perusco M._

2007
Clinical Simulation Semester Course (Framework), Simulated Clinical Experience: Radiation Therapy, MRS241H1, Michener Institute for Applied Health Sciences
_Potvin M, Chai M, Moline K, McParland N, Williams A, McArdle S. Curriculum development committee member, University of Toronto._

2004
Evaluation Methods Workshop for Radiation Therapists, Toronto-Sunnybrook Regional Cancer Centre
_Moline K, Gillies C._

2002
Introduction to Clinical Oncology, MRS144H1, Michener Institute for Applied Health Sciences
_Paddon L, Palmer C, Moline K, Spence-Ariemma. Curriculum development committee member._

1999 Jun
Clinical and Didactic Integration Program Student Curriculum, Toronto-Sunnybrook Regional Cancer Centre
_Ali A, Doswell J, Edgerton J, Gillies C, Harnett N, Maier B, Moline K (Editor & Contributing Author)._}

1996
Clinical and Didactic Integration Program®©, University of Waterloo
_Ali A, Doswell J, Edgerton H, Harnett N, Maier B, Moline K (Editor & Contributing Author), Stevenson C. Toronto-Sunnybrook Regional Cancer Centre, Ontario Cancer Treatment & Research Foundation, Sunnybrook Medical Centre._

1994
Orientation Program, University of Waterloo
_Comprehensive Orientation Program for First Year Radiation Therapy Students to meet the CAMRT Curriculum Guide requirements, Toronto Bayview Regional Cancer Centre, School of Radiation Therapy._

1994
Anatomy and Physiology Course, University of Waterloo
_Development of the section on pelvis for the new Sectional Anatomy course, Toronto Bayview Regional Cancer Centre, School of Radiation Therapy._

1994
Paediatric Clinical Program Workshop, Toronto Bayview Regional Cancer Centre
_Moline K, Bolton W, Griffiths A._

1994
Module A: Single Beam Calculations, University of Waterloo
_Treatment Planning Course, Toronto Bayview Regional Cancer Centre, School of Radiation Therapy._

1994
Module B: Multiple Beam Calculations, University of Waterloo
_Treatment Planning Course, Toronto Bayview Regional Cancer Centre, School of Radiation Therapy._

1994
Module C: Wedges, University of Waterloo
_Treatment Planning Course, Toronto Bayview Regional Cancer Centre, School of Radiation Therapy._

1994
Module: Gaps, University of Waterloo
Karen A. MOLINE

_Treatment Planning Course, Toronto Bayview Regional Cancer Centre, School of Radiation Therapy._

1994
Module: Irregular Fields, University of Waterloo
_Treatment Planning Course, Toronto Bayview Regional Cancer Centre, School of Radiation Therapy._

1992
Technique Lab Course, University of Waterloo
_Toronto Bayview Regional Cancer Centre, School of Radiation Therapy_

Innovative Course to provide the student with practical experience to apply treatment planning theory with the radiotherapeutic aspects of the oncology course. For the student to become familiar with the patients position, the technique, the volume and the dose through simulating techniques used to treat disease sites.

1991
Perceptor Program, University of Waterloo
_Toronto Bayview Regional Cancer Centre, School of Radiation Therapy._

1989        Radiographer, Radiation Therapy, Royal Marsden Hospital, Sutton, Surrey, United Kingdom

UNIVERSITY
2003 - 2012  Academic Coordinator, Medical Radiation Sciences Program, Radiation Oncology, University of Toronto

UNIVERSITY - RANK
2002 - 2009  Lecturer, Radiation Oncology, Faculty of Medicine, University of Toronto

3. HONOURS AND CAREER AWARDS

Distinctions and Research Awards

NATIONAL
Received

2010  Certificate of Merit, E.I.Hood Award, Canadian Association of Medical Radiation Technologists. (Distinction)

LOCAL
Received

2009  Educational Leadership, Radiation Medicine Program, Princess Margaret Hospital. (Distinction)
2007  Research Supervision Award, Department of Radiation Oncology, University of Toronto. (Distinction)
2003  Nursing and Professional Services Scholarship, University Health Network. (Distinction)

Teaching and Education Awards

LOCAL
Received

2011  Postgraduate Classroom Teaching, Dept of Radiation Oncology, Faculty of Medicine, University of Toronto. (Postgraduate MD)

Nominated
4. PROFESSIONAL AFFILIATIONS AND ACTIVITIES

Professional Associations

2003 - present Member, Association of Educators in Radiological Sciences, USA
2003 - present Associate member, Canadian Association of Radiation Oncologists
1996 - present Associate member, International Society of Radiographers and Radiological Technologists
1990 - present Member, Canadian Association of Medical Radiation Technologists
1990 - present Member, Ontario Association of Medical Radiation Technologists

Administrative Activities

INTERNATIONAL
Association of Educators in Radiological Sciences
2004 - 2007 Member, Editorial Review Board, United States.
2004 - 2005 Member, Graduate Curriculum Taskforce, Faculty of Medicine, Dept of Radiation Oncology, Graduate Education, United States.

NATIONAL
Canadian Association of Medical Radiation Technologists
2012 Future Technologies Advisory Committee, Faculty of Medicine, Dept of Radiation Oncology

Canadian Association of Radiation Oncologists
2005 - 2010 Member, Education Committee

Canadian Medical Association, Conjoint Accreditation Services
2008 - 2011 Chair, Accreditation Survey
2007 - 2010 Member, Accreditation Survey

PROVINCIAL / REGIONAL
College of Medical Radiation Technologists of Ontario
2010 - present Elected Member, Council
2010 - present Elected Member, Registration Committee
2010 - present Elected Member, Elections Committee
2010 - present Member, Certification and Examination Committee
1999 - 2008 Elected Member, Registration Committee
LOCAL

Medical Physics Residency
2004 - 2007 Member, Residency Program Committee, Faculty of Medicine, Dept of Radiation Oncology, Postgraduate MD

Medical Radiation Sciences Graduate Degree Program
2001 - 2003 Member, Curriculum Sub-Committee, MSc Medical Radiation Sciences Graduate Program, Faculty of Medicine, Dept of Radiation Oncology, Graduate Education

Medical Radiation Sciences Undergraduate Degree Program
2016 – present Member, Joint Medical Radiation Sciences Strategic Executive
2009 - present Member, Joint Curriculum Committee
2008 - present Chair, Academic Oversight Committee
2007 - present Member, Program Advisory Committee
2003 - present Chair, Policies and Procedures Sub-Committee
2003 - 2007 Member, Medical Radiation Sciences Planning Committee
2003 - 2016 Member, Joint Management Committee
2003 - present Chair, Academic Coordinators Committee
2005 - 2009 Chair, Joint Curriculum Committee
2003 - 2007 Member, Academic Oversight Committee
2003 - 2005 Co-Chair, Joint Curriculum Committee
2003 - 2005 Member, Student Assessment Sub-committee
2000 - 2003 Member, Executive, Program Advisory Council
1999 - 2003 Member, Faculty Liaison Committee

Michener Institute for Applied Health Sciences
2008 - 2010 Member, Ethics Review Board

Princess Margaret Hospital
2009 Member, RMP Pandemic Planning Task Force
2002 - 2003 Member, Radiation Therapy Education Committee, Faculty of Medicine, Dept of Radiation Oncology
2002 Member, Curriculum Sub-Committee, RMP Skills Lab Project, Faculty of Medicine, Dept of Radiation Oncology
1999 - 2002 Member, Radiation Medicine Program Education Committee, Faculty of Medicine, Dept of Radiation Oncology

Radiation Oncology Residency Program
2009 - 2012 Member, Curriculum Sub-committee, Faculty of Medicine, Dept of Radiation Oncology, Postgraduate MD

University of Toronto
2013 - 2015 Member, Faculty of Medicine Education Council
2013 - present Member, Hospital- University Education Committee, Faculty of Medicine,
2012 - 2014 Member, Health Sciences Admissions/Recruitment Working Group, Faculty of Medicine,
2011 - 2015 Member, Council of Health Sciences Education Sub-committee, Faculty of Medicine,
2011 - 2014 Member, Implementation Group on Valuing Academic Performance
Cathryne PALMER

2010 - 2011  Member, Task Force on Valuing Academic Performance Phase 2
2009 - present  Member, Health Sciences Committee on Emergency Preparedness

University of Toronto, Department of Radiation Oncology
2004 - present  Member, Executive Committee
2004 - 2012  Chair, Medical Radiation Sciences Academic Leadership
2009 - 2010  Member, 2010 Toronto Radiation Medicine Organizing Committee
2008 - 2009  Member, 2009 Toronto Radiation Medicine Organizing Committee
2006 - 2010  Member, Teaching Effectiveness Committee
2003 - 2004  Member, 2004 Toronto Radiation Medicine Organizing Committee

University of Toronto, Faculty of Medicine
2011 - present  Member, Faculty Council Education Committee,
2009 - present  Member, Steering Committee, Physician Assistant Education Program,
2009 - 2012  Reviewer, Determinants of Community Health 2, Undergraduate MD
2007 - 2012  Member, Interfaculty Curriculum Committee, Centre for Interprofessional Education,

Invited Lectures and Presentations

2013
**Keynote Speaker.** We are at a crossroads! What opportunities will you make of it? Prince Edward Island
Association of Medical Radiation Technologists. Charlottetown, Prince Edward Island, Canada.

2011  From chalkboards to iPads: Teaching across the generations. CARO 25th Annual Scientific Meeting.

2008  Getting Grounded: An Introduction to Qualitative Research. CARO 2008: Targeting the Tumour Microenvironment in Radiation Oncology.

Presented Abstracts

2010  From Chalkboard to Blackboard: Transitioning to an Online Human Physiology Course. Canadian Association of Medical Radiation Technologists Annual General Conference. Quebec City, Quebec. Authors: Palmer C, Kee N, Matthews SG, Perumalla C.

2010  Impact of Key Stakeholders’ Perceptions on Simulation-Enhanced Curriculum Design. Canadian Association of Medical Radiation Technologists Annual General Conference. Quebec City, Quebec. Authors: Palmer C, Cherryman F, Weltz S, Craig R.

3. PROVINCIAL / REGIONAL

Presented Abstracts

2009  Evolving Perceptions of Simulation as a Key Ingredient to Curriculum Success in a Medical Radiation

4. LOCAL

Invited Lectures and Presentations

2007 Helping students with performance difficulties. Radiation Therapy Department, RMP.

2006 Putting qualitative inquiry to work in educational research. Radiotherapy in Practice III.

2005 Putting qualitative inquiry to work in educational research. Advancing Education in the Health Sciences: Sharing our innovations, improving what we do. OMEN Educational Research Symposium.

2004 Getting Ground: An Introduction to Qualitative Research. The Science and Management of Radiation Late Effects Conference. (Continuing Education).

2004 Research: It’s not just about the numbers! An Introduction to Qualitative Research. L&L Sessions, Radiation Therapy Department, RMP.

2001 Work-related Stress Factors Affecting Radiation Therapists, MSc Research Project. L&L Sessions, Radiation Therapy Department, RMP.

1993 Orientation to the Simulator. Radiation Therapy Students. Princess Margaret Hospital.

1993 Introduction to Radiation Therapy. Pharmacy Department. Princess Margaret Hospital.

1993 Introduction to Radiation Therapy. Oncologic Imaging Department. Princess Margaret Hospital.

Presented Abstracts

F. Research Supervision

1. PRIMARY OR CO-SUPERVISION

Undergraduate Education

2007  Primary Supervisor. C. Gillan, Medical Radiation Science. *Radiation therapy students’ teaching expectations of therapists over the course of clinical practicums: a longitudinal study.*

2005  Primary Supervisor. N. Naccarato, Medical Radiation Science. *Differences in radiation therapy staff and students’ perceptions of clinical teaching characteristics.*

2004  Primary Supervisor. M. Chan, Medical Radiation Science. *Investigating the current occupational stress factors of radiation therapists at Princess Margaret Hospital.*

2004  Primary Supervisor. K. Slikowski, Medical Radiation Science. *Is this the right treatment for me: A look at media influence on breast cancer patients.*

2003  Primary Supervisor. W. Li, Medical Radiation Science. *Investigating the effectiveness of reflective journaling for radiation therapy students: A student perspective.*

Date of Last Update: May 2011

EDUCATION:

University Education
1988 Bachelor of Science - Biology major, York University, Toronto, Ontario

Post-Graduate and Medical Training
1993 Diploma in Radiation Therapy, Ontario Cancer Institute/Princess Margaret Hospital School of Radiation Therapy, Toronto, Ontario
1997-1998 Princess Margaret Hospital, Department of Radiation Physics, Preparatory courses in radiation physics and treatment planning theory and application, Toronto, Ontario
2008 Master of MedRadSci. Candidate, Charles Sturt University, Australia

Continuing Education
1999 Seagate Software, Course in Advanced Level Crystal Reports, Toronto, Ontario
2000 Learning Tree International, Course in VBA Programming, Toronto, Ontario
2001 Instructional Skills Workshop, Michener Institute, Toronto, Ontario
2001-2004 Continuing education courses – Medical Ethics, Canadian Health System, Occupational Health and Law for Health Managers, Ryerson University, Toronto, Ontario
2004-2007 Continuing distant education courses – Radiation Therapy Treatment Planning Systems, Diagnostic Imaging for Radiation Therapists, and Brachytherapy Theory, Theory of Treatment Planning Calculations, University of Sydney, Australia
Scholarships and Awards

2010 **Potvin M**, Chai M, Evans M. “Implementation of MOSAIQ for Student Evaluation & Feedback” The Michener Institute for Applied Health Sciences Award for Team Innovation

**BIOGRAPHICAL INFORMATION:**

**Hospital/Staff Appointments**

1993-2001 Radiation Therapist, Princess Margaret Hospital, Toronto, Ontario

**Academic Appointments**

2001-present Instructor, Department of Radiation Oncology, Faculty of Medicine, The University of Toronto (UT), Toronto, Ontario

2001-present Professor, Medical Radiation Sciences Program, The Michener Institute for Applied Health Sciences (TMI), Toronto, Ontario

**Professional Affiliations and Activities**

1993-present Member, Canadian Association of Medical Radiation Technologists/Ontario Association of Medical Radiation Technologists

2008-present Member, American Association of Medical Dosimetrists

2009-2010 Judge, Canadian Association of Medical Radiation Technologists 2009 & 2010 Essay Competitions

**Certifications and Licensures**

1993-present Certificate of Registration, College of Medical Radiation Technologists of Ontario, Toronto, Ontario

2001-present Certificate of Registration, Medical Dosimetrist Certification Board, Mt. Laurel, New Jersey, USA

**Administration and Committee Appointments**

2002–2009 Member, UT Board of Examiners, Medical Radiation Sciences Program

2002-present TMI Academic Appeals Committee

2003-2009 MRS representative, UT Year I IPE Event organizing committee
2004-2006 Chair, Program Review Committee, Radiation Therapy
2004-2006 Member, MRS Academic Oversight
2004-present Member, Joint Curriculum Committee, MRS program
2004-2006 Member, Divisional Curriculum Committee, TMI
2004-2006 Member, MRS Policy and Procedures Committee
2009-present Co-Chair, UT Year I IPE Event organizing committee

Invited Presentations

Potvin M. Radiation Therapy Management using Multi-Access and Crystal Reports. IMPAC Users Group Meeting, American Society for Therapeutic Radiology and Oncology (ASTRO) Annual Conference, Boston, USA. 2000

Potvin M. The implementation and impact of a comprehensive radiotherapy information management system. Ontario Association of Medical Radiation Technologist (OAMRT) Annual Conference, Markham. 2001

Potvin M. Are Degrees a Necessary First Step for Therapy Specialization? Canadian Association of Radiation Oncologist (CARO) Annual Conference, Toronto. 2002

Potvin M, Evans M. Clinical Simulation in Undergraduate Radiation Therapy Education. 7th Annual Radiation Therapy Conference (RTi3), Toronto. 2010

TEACHING AND DESIGN:

Undergraduate Courses Taught (teaching contact hours)

2009-2010 (UT/TMI MRS Program)

- Radiation Science I (RSRT310/MRS142H1) (16 hrs)
- Radiation Science II (RSRT320/MRS145H1) (26 hrs)
- Treatment Planning I (RSRT231/MRS244H1) (71 hrs)
- Treatment Planning II (RSRT241/MRS245H1) (71 hrs)
- Simulated Clinical Experience (CLRT261/MRS241H1) (96 hrs)

2008-2009 (UT/TMI MRS Program)

- Radiation Science I (RSRT310/MRS142H1) (16 hrs)
- Treatment Planning I (RSRT231/MRS244H1) (71 hrs)
- Treatment Planning II (RSRT241/MRS245H1) (71 hrs)
- Simulated Clinical Experience (CLRT261/MRS241H1) (120 hrs)

2007-2008 (UT/TMI MRS Program)

- Treatment Planning (RSRT230/MRS148Y1) (265 hrs)
- Patient Care in Radiation Therapy II (HCRT410/MRS147H1) (51 hrs)

2006-2007 (UT/TMI MRS Program)

- Treatment Planning (RSRT230/MRS148Y1) (265 hrs)
- Comparative Imaging Modalities (IGRT120/MRS167H1) (26 hrs)
- Introduction to Clinical Oncology (ONRT120/MRS144H1) (39 hrs)

2005-2006 (UT/TMI MRS Program)

- Program Liaison, Radiation Therapy (300 equivalent teaching hours)
- Treatment Planning (RSRT230/MRS148Y1) (265 hrs)
Comparative Imaging Modalities (IGRT120/MRS167H1) (26 hrs)

2004-2005 (UT/TMI MRS Program)

Program Liaison, Radiation Therapy (300 equivalent teaching hours)
Treatment Planning (RSRT230/MRS148Y1) (265 hrs)
Comparative Imaging Modalities (IGRT120/MRS167H1) (20 hrs)

2003-2004 (UT/TMI MRS Program)

Treatment Planning (RSRT230/MRS148Y1) (265 hrs)
Comparative Imaging Modalities (IGRD120) (20 hrs)
Introduction to Patient Care (HCRT310/RSP330H1) (43.5 hrs)

2002-2003 (UT/TMI MRS Program)

Treatment Planning (RSRT410) (265 hrs)
Specialized Imaging (IGRD410/RSC430H1) (38 hrs)

2001-2002 (UT/TMI MRS Program)

Treatment Planning (RSRT410) (265 hrs)
Specialized Imaging Modalities (IGRD410/RSC430H1) (48 hrs)

Continuing Education

2004-2005 (TMI)

Introduction to Dosimetry (RT803) – Post graduate on-line course (9 weeks in length)
Dosimetry and Treatment Planning (RT800) – Post graduate on-line course (13 weeks in length)

2003-2004 (TMI)

Dosimetry and Treatment Planning (RT800) – Post graduate on-line course (13 weeks in length)

2002-2003 (TMI)

Dosimetry and Treatment Planning (RT800) – Post graduate on-line course (13 weeks in length)
The Changing Role of Imaging in Radiation Therapy (RT900) – (1 day seminar with laboratory session)

Course Design

2008-2009 (UT/TMI MRS Program)

Developed the course MRS241H1/CLRT261 Simulated Clinical Experience: Radiation Therapy

2007-2008 (UT/TMI MRS Program)

Redesigned the undergraduate radiation therapy treatment planning curriculum (MRS244H1/RSRT231 & MRS244H1/RSRT241)
2006-2007 (UT/TMI MRS Program)

Framework developed for clinical simulation semester for the radiation therapy program

2005-2006 (UT/TMI MRS Program)

Implemented drama therapy program for radiation therapy students with communication difficulties

2004-2005 (TMI)
Redeveloped the treatment planning laboratory course in RSRT230/MRS148Y1 as the result of the implementation of a new treatment planning system (Pinnacle)

Developed the curriculum for the on-line course (RT800) Introduction to Dosimetry. This course was created for the Princess Margaret Hospital for therapists beginning a new rotation in treatment planning

2003-2004 (UT/TMI MRS Program)
Continuing development of the laboratory component for RSRT410 (Treatment Planning)

2002-2003 (UT/TMI MRS Program)
Created the conformal treatment planning module for the continuing education course RT900 (The Changing Role of Imaging in Radiation Therapy)

Assisted in the development of the Dosimetry and Treatment Planning continuing education course (RT800) as well as the technical implementation of Theraplan Plus/Metaframe for remote treatment planning

Created the medical terminology module for the course HCRT310 (Introduction to Patient Care)

2001 (UT/TMI MRS Program)
Developed the digital fluoroscopy and computed radiography labs for IGRD410 (Specialized Imaging Modalities)
Curriculum Vitae

Joe Presutti
B.Sc., M.R.T. (T), Radiation Therapist

A. Date Curriculum Vitae is Prepared: 2016 February 26

Only includes Activities from July 2015 to July 2016

B. Biographical Information

1. EDUCATION

Degrees
1991 Sep - 1995 Apr BSc, Biology minor, Department Of Science, University of Waterloo, Waterloo, Ontario, Canada

Qualifications, Certifications and Licenses
1995 Sep - 1998 Apr Medical Radiation Technologist Accreditation M.R.T.(T), Hamilton School of Radiation Therapy, Hamilton Regional Cancer Center (Juravinski Cancer Centre), Hamilton, Ontario, Canada

2. EMPLOYMENT

Current Appointments
2005 Jun - present Dosimetrist, Department of Radiation Therapy, Odette Cancer Centre, Toronto, Ontario, Canada

Responsible for radical and palliative treatment planning of all treatment sites including:
• Dose distribution production and evaluation for conventional, 3D conformal, IMRT, VMAT, SBRT, Stereotactic and electron techniques
• Calculations, Record and Verify data entry, contouring of normal structures
• Regular quality assurance of colleagues plans
• HDR brachytherapy planning for gynecological, prostate, skin and lung tumours
• Member of the OCC Gyne and GI site group teams
• Problem solving for difficult setups on the simulator and treatment units
3. PROFESSIONAL AFFILIATIONS AND ACTIVITIES

Professional Associations

1998 Mar - present  Medical Radiation Technologist (therapist), College of Medical Radiation Technologists (CMRTO)
Curriculum Vitae

Tara Rosewall
MRT(T)

A. Date Curriculum Vitae is Prepared: 2016 February 26

Only includes Activities from July 2015 to July 2016

B. Biographical Information

1. EDUCATION

Degrees

2007 - present PhD, Health Science, Health Science, Charles Sturt University, Wagga Wagga, New South Wales, Australia
2003 Sep - 2006 Jun MSc, Therapeutic Radiography (with distinction), Health Science, Anglia Ruskin University, Cambridge, Cambridgeshire, United Kingdom
2001 Sep - 2003 Jun BSc, Radiography (Therapeutic), Health Science, Anglia Polytechnic University, Cambridge, Cambridgeshire, United Kingdom

Qualifications, Certifications and Licenses

2011 Jun - present Fellow, Radiation Therapy, Canadian Association of Medical Radiation Technologists, Canada, License / Membership #: 23308
1992 - present Licentiate, Medical Radiation Technology (Therapy), College of Medical Radiation Technologists of Ontario, Toronto, Ontario, Canada, License / Membership #: 09007
1997 - 2003 Certificate of Medical Dosimetry, American Association of Medical Dosimetrists, United States
1987 - 1990 Diploma of the College of Radiographers, Therapeutic Radiography, Southwest School of Radiography, Bristol, Bristol, City of, United Kingdom

2. EMPLOYMENT

Current Appointments

2010 - present Associate Professor, Radiation Oncology, Faculty of Medicine, University of Toronto
2007 - present  Associate Member, Medical Science, Institute of, School of Graduate Studies, University of Toronto
2004 - present  Radiation therapy research and development leader, Radiation Medicine Program, Princess Margaret Hospital, Toronto, Ontario, Canada

3. PROFESSIONAL AFFILIATIONS AND ACTIVITIES

Professional Associations

2011 - present  Member, Canadian Radiation Research Network
2005 - present  Member, European Society of Therapeutic Radiology and Oncology
2004 - present  Associate Member, Canadian Association of Radiation Oncology
1992 Aug - present  Member, Canadian Association of Medical Radiation Technologists, 23308
1992 Aug - present  Member, College of Medical Radiation Technologists of Ontario, 09007
1992 Aug - present  Member, Ontario Association of Medical Radiation Technologists, 23308

Administrative Activities

INTERNATIONAL
University of Toronto, Department of Radiation Oncology
2012 - present  Chair, RTi3 Conference Organizing Committee

NATIONAL
Canadian Association of Radiation Oncology
2011 - present  Member, Annual Scientific Meeting Organizing Committee

PROVINCIAL / REGIONAL
Ontario Association of Medical Radiation Technologists
2007 - present  Chair, ME Wastle Bursary Committee

LOCAL
Princess Margaret Hospital
2012 - present  Member, Research Protocol Review Committee
2005 - present  Member, Radiation Medicine Program Research Committee

Princess Margaret Hospital, Radiation Medicine Program
2012 - present  Member, Radiation Therapist Journal Club

University of Toronto
2011 - present  Member, Teaching Effectiveness Committee, Faculty of Medicine,
Dept of Radiation Oncology

University of Toronto, Department of Radiation Oncology
2005 - present Member, RT Academic Leadership Committee

Peer Review Activities

EDITORIAL BOARDS
Associate Editor
2011 - present Journal of Medical Imaging and Radiation Sciences

MANUSCRIPT REVIEWS
Reviewer
2011 - present Radiation Oncology, North America

Curriculum Vitae
Updated: May 2016

Name:  Emily Rodger Sinclair BSc, MRT (T) MSc (C)
Address:   Department of Radiation Therapy
           Toronto Sunnybrook Regional Cancer Centre
           Sunnybrook Health Sciences Centre
           2075 Bayview Avenue
           Toronto, Ontario, Canada M4N 3M5
           Tel:       (416) 480-5000 # 3469
           Fax:      (416) 480-4672
           Email:  Emily.Sinclair@sunnybrook.ca

Present Position:  Advanced Practice Radiation Therapist

EDUCATION

1970 – 1976  7  O Levels and 5 H Levels
            Knightswood Secondary School, Glasgow, Scotland

1976 – 1979  Diploma of the College of Radiographers (Therapy),
            Glasgow School of Radiotherapeutics and Oncology, Scotland, UK.

1983 – 1985  SHNC in Business Studies
            Banff and Buchan College of Further Education, Fraserburgh, Scotland, UK.

1991  C.P.R. Instructors Course
      Heart and Stroke Foundation of Ontario, Wellesley Hospital, Toronto, Canada

1999  C.P.R. Instructor / Trainer Course
      Heart and Stroke Foundation of Ontario, Toronto, Canada
1993 – 1995    **Bachelor of Science, Radiotherapy**  
Anglia University, England, UK.

2012 – Present    **Masters Degree in Advanced Practice, Radiation Therapy**  
Sheffield, Hallam University, England, UK.
FURTHER EDUCATION COURSES CERTIFICATE LEVEL

1991  Spoken French Level 3,
1992  Preparation for a Supervisory Role, Seneca Management Course.
1992  Counseling Skills in Oncology,
1992  Computer Skills and Word Perfect
1993  Managing Change Successfully, Seneca management Course.
1994  Radiation Therapy Quality Control Course, C.A.M.R.T.
2003  Cochrane Workshop
2003  Applied Research Methods, Ontario Hospital Association
2004  Ovid Training, Sunnybrook Campus
2005  Human Relations, Seneca Ontario Management Development Program
2005-present Leadership Skills Certificate, Seneca College
2006  Human Participants Protection Education for Research Teams, NIH
2008  Informed Consent Course: Writing, Obtaining and Documenting
2008  Clinical Preceptorship Course
2008  Drawing Outside The Lines (Caring for your own feelings as well as your patients)
2009  Clinical Preceptorship part 2
2009  Instructor workshop adult education HSFO
2010  Instructor Trainer qualification HSFO
2011  CAMRT Skin Cancer course
2014  Instructor Trainer re certification with new guidelines HSFC
2013-2015 Leadership courses offered from Sunnybrook
2016  I-Lead Champion Course
EMPLOYMENT HISTORY

1979 – 1982 Grampian Health Board, Aberdeen Royal Infirmary, Scotland
   Position: Therapeutic Radiographer, Student Trainer.

1983 – 1989 Glasgow Health Board, Western Infirmary, Scotland
   Position: Therapeutic Radiographer, Senior 2, Student Instructor,

1990 – 1999 Toronto Bayview Regional Cancer Centre
   Position: Radiation Therapist, Supervision of Radiation Therapy students.

2000 – 2003 Toronto Sunnybrook Regional Cancer Centre (T.S.R.C.C.)
   Position: Resource Radiation Therapist, Michener radiation therapy student supervision and training.

   Position: Palliative Care Radiation Therapist, Research therapist, student supervision and education

2008 -2009 Palliative Care, Odette Cancer Centre,
   Position: Advanced Practice Palliative Care Radiation Therapist
   Clinical Specialist Radiation Therapist (CSRT)

2010- 2012 Odette Cancer Centre,
   Position: Resource Radiation Therapist, Michener radiation therapy student supervision and training.

2012-present Skin Clinic, Odette Cancer Centre,
   Position: Advanced Practice Radiation Therapist for Skin
   Clinical Specialist Radiation Therapist

**MEMBERSHIP:**

**ACADEMIC APPOINTMENT:**

Appointed to the academic rank of Lecturer, at the University of Toronto, Department of Radiation Oncology.

Granted Status Appointment of Clinical Educator for the Michener Institute for applied health sciences.
AWARDS:

Awarded the T.S.R.C.C. Supporter pin for services beyond work to the hospital, peer selected.

Quality Award for the Rapid Response Radiotherapy Program (RRRP) at the Odette Cancer Centre.

Quality and Innovation Awards sponsored by the Cancer Quality Council of Ontario, Cancer Care Ontario and the Canadian Cancer Society.

Nominated for Human Touch Award

Inaugural Joint U of T and China Symposium, Toronto

“Minimally Invasive surgery for Palliative Bone Metastases” Best Clinical Poster Award

TRAINER : EDUCATOR

Instructor/Trainer for the Heart and Stroke Foundation of Ontario. Train all the cancer centre instructors. Organize and train all radiation therapist and nurses and physicians yearly, belonging to the Odette Cancer Centre, in CPR and defibrillation.

Train all students and radiation therapists yearly in the use of oxygen and suctioning equipment.

Train all students and radiation therapists on the use of the crash cart and response carts.

Train staff and students on the use of the defibrillator.

Teach DRO MHSce, MRS, Masters students on palliative radiation therapy (2 Hour session)

Teach Skin Cancer Course, Clinical Oncology, DRO (2 Hour session)

Facilitator for Interprofessional Education, 2012/2013 - U of T, Teamwork in health care

Facilitator for Interprofessional Conflict Resolution, 2015/2016, U of T Health Sciences Students

Conduct Clinical Simulation Sessions with students at the Michener Institute yearly

PEER-REVIEWED GRANTS

2006

Chow E (PI), Veith R, Danjoux C, Barnes E, Tsao M, Barbera L, Ko Y, Sinclair E.

GRANT REVIEWER

2006

Genesis Oncology Trust (New Zealand)

JOURNAL REVIEWER

Tohoku Journal of Experimental Medicine (Japan)

Hindawi Publishing Corp.

PORTFOLIO REVIEWER

Grading on a point system the portfolios of the applicants for the 2009/2010/2012/2013/2014 CSRT pilot project positions.

EDUCATION MATERIALS

Developed a short Palliative Care Self Study program for the CAMRT, published June 2010.

Co-Author book “Advanced Cancer. Pain and Quality of Life”

Co-Author book “Bone and Brain Metastases: Advances in Research and Treatment”

Co-Author book “Research for the Radiation Therapist: From Question to Culture”

RESEARCH INTERESTS:

Palliative radiotherapy and end-of-life care
Survivorship for Cancer Patients
Skin Cancer in a multi racial society
Communication in a busy clinic environment
PUBLICATIONS

PA = Primary Author; Co-PA = Co- Primary Author; C = Collaborator; SRA = Senior Responsible Author

TEACHING DOSSIER

(Clinical and Research Co-Supervisor with Dr. Edward Chow for the students)

2003 Sept- Dec  Nicole Bradley, 2nd year undergraduate student, University of Waterloo. Follow up on patients receiving palliative radiotherapy.

2004 Jan-Apr  Kathy Li, 2nd year undergraduate student, University of Waterloo. Brief Pain Inventory.

2003 - 2004  Maria-Theresa de Borja, 3rd year radiation therapy student, University of Toronto. Correlation among patients and health care professionals in assessing functional status using the Karnofsky and ECOG performance status scales.
   1) Ed Carpen Award for the most outstanding technical or scientific student exhibit at the Ontario Association of Medical Radiation Technologists’ Annual General Conference April 2004.
   3) Canadian Association of Medical Radiation Technologists’ Dr. Marshall Mallet Student Exhibit Award. 2004
   4) University of Toronto Radiation Sciences Program Research Project Award. 2003-2004

2003 - 2004  Michelle Greig, 3rd year radiation therapy student, University of Toronto. Level of concordance between proxy and patient's ratings in Brief Pain Inventory.

2003 - 2004  Leila Makhani, 3rd year undergraduate student, McMaster University. Correlation of pain relief from spinal bone metastases with palliative radiotherapy.

2005-2006  Nicole Bradley, final year undergraduate student, University of Waterloo. Symptom Distress in Patients Attending an Outpatient Palliative Radiotherapy Clinic
   The Best Oral Presentation Award. 15th Annual Ontario Provincial Conference on Palliative and End-of-Life Care. Toronto Ontario, April 2005
2005 Co-op Student of the Year for Faculty of Applied Health Sciences, University of Waterloo
2005 Marion J. Todd Memorial Award, Faculty of Applied Health Sciences, University of Waterloo
External thesis supervisor for the Undergraduate thesis titled: Has the pattern of practice in the prescription of palliative radiotherapy for the treatment of uncomplicated bone metastases changed between 1999 and 2005 at the Rapid Response Radiotherapy Program?
Ontario Graduate Scholarship for 2007

2005-2006
Hannah Chiu, first year undergraduate student, University of Waterloo.
Gender difference in bone metastases
Acceptance to Medical School

2005-2006
Kristin Harris, second year undergraduate student, University of Waterloo.
Gender difference in brain metastases and bone metastases module development
New Investigator Scholarship, 13th Annual Conference of the International Society for Quality of Life Research
Lisbon, Portugal, October 2006.
2006 Marion J Todd Memorial Award, University of Waterloo
2006 Co-op Student of the Year, University of Waterloo
50th Anniversary Co-op Student Award
2006 University Canadian Association for co-operative Education Co-op Student of the year
2006 Emery-Default Award
2006 Education at Work for Ontario Award
2006 RRRP Student of the Year Award

2006
Grace Fan, second year undergraduate student, University of Waterloo.
Update on meta-analysis of bone metastases

2006
Philiz Goh, fourth year undergraduate student, University of Waterloo.
Prostate Bone Metastases.

2006
Sukirtha Tharmalingam, fourth year undergraduate student, University of Waterloo.
Bone metastases module
Patients’ and health care professionals’ perspectives on the most important quality of life issues in bone metastases. Young investigator award.
MASCC/ISOO 18th International Symposium Supportive Care in Cancer, Toronto, Canada, June 2006.

2006
Gabriella Mallia, third year undergraduate student, University of Waterloo.
QOL in brain metastases.
2006    Julie Napolskikh, second year undergraduate student, University of Waterloo. Length of stay in hospice care
         Laura Talbot-Allan Award from the University of Waterloo.

2007    Andrea Kirou-Mauro, first year undergraduate student, McMaster University. Patient/Proxy correlation of ESAS

2008    Amanda Hird, second year undergraduate student, University of Waterloo. Are bone metastases from gastrointestinal cancers equally radiosensitive.

2007    Julie Napolskikh, second year undergraduate student, University of Waterloo.
         Demographic Profile and Utilization Statistics of an inpatient Palliative Care Unit within a Tertiary Setting.

2007    Candi J. Flynn, second year undergraduate student, University of Waterloo. Re- Irradiation Works.

2008    Amanda Hird, third year undergraduate student, University of Waterloo. Determining the incidence of pain flare following palliative radiotherapy, results from three centers.

2008    Philiz Goh, post BSc student, , University of Waterloo.

2008    Andrea Kirou-Mauro, second year undergraduate student, University of Waterloo. Is response to radiotherapy in patients related to the severity of pre treatment pain?

2008    Shaelyn Culleton, second year undergraduate student, University of Waterloo. Improvement in ESAS symptoms following palliative radiation for bone metastases.

2008    Nadia Salvo, third year undergraduate student, University of Waterloo. The role of plain radiographs in the management of bone metastases.

2008    Jennifer Wong, third year undergraduate student, University of Toronto, Symptoms and quality of life in cancer patients with brain metastases following palliative radiotherapy.

2008    Julie Napolskikh, third year undergraduate student, University of Waterloo.

2008    Harleen Bedi, post BSc Student, University of Toronto, Neurosurgical rescue of Bradycardia Induced by Intracerebral Hypertension.
2009 Alice Fitch, post BSc student, ESAS accrual.

2010 Laura D’Allimonte, Research Radiation Therapist, Mentoring, Orthovoltage in the 21st Century.

2012 Teach DRO MHSc, MRS, Masters students on palliative radiation therapy

Teach Skin Cancer Course, Clinical Oncology, DRO (2 Hour session)

Facilitator for Interprofessional Education, 2012 - U of T,

Teamwork in health care facilitator

Conduct Clinical Simulation Sessions with students at the Michener Institute

2013 Teach Skin Cancer Course, Clinical Oncology, DRO (2 Hour session)

Facilitator for Interprofessional Education, 2013 - U of T

2013 Facilitator for Interprofessional Conflict, 2013 – U of T

2014 Mentoring new CSRT for Skin in London Ontario: June Harriman

2014 Mentoring and teaching portfolio development to future CSRT candidates:

Amanda Marrone, Sheila Sze, Carrie Lavergne, etc.

2014 Teach Skin Cancer Course, Clinical Oncology, DRO (2 Hour session)

2014 Conduct Clinical Simulation Sessions with students at the Michener Institute

2014 ONRT410/MRS146H1, Clinical Oncology I, (2 Hour talk)

2015 Conduct Clinical Simulation Sessions with students at the Michener Institute

2015 Teach Skin Cancer Course, Clinical Oncology, DRO (2 Hour session)

2016 Facilitator for Interprofessional Conflict, U of T

STUDENT TRAINING:

Ongoing daily training as required with all Michener Institute and University of Toronto Radiation Therapy students during their clinic rotation.

Teach special situations for palliative surgery combined with radiation therapy.

Instruct students on skin cancer treatment, options, care. (2012 – Present)

Ongoing presentation and manuscript preparation training for all research students and for University of Waterloo co-op students. (2003 – Present)

EXTRAMURAL ACTIVITIES

2003 – present  Pain Preceptorship Program for Pharmaceutical Companies
Manager

2004  Pain Preceptorship Program for Pharmaceutical Companies
Invited Speaker

2004 -2005  The Science and Art of Pain and Symptom Management Conference
Moderator

2004  The Annual Provincial Conference on Palliative and End of life Care
Moderator

2005  Pain Preceptorship Program for Pharmaceutical Companies
Invited Speaker

2006  The Science and Art of Pain and Symptom Management Conference
Invited Speaker

2006  Ontario Palliative Care Association Conference
Facilitator of Complimentary Medicines Interest Group

2006  Pain Preceptorship Program for Pharmaceutical Companies
Invited Speaker

2007  UT/TMI Medical Radiation Science Program
Invited Speaker

2007  Radiation Therapy Research Rounds, TSRCC
Invited Speaker

2007  Pain Preceptorship Program for Pharmaceutical Companies
Invited Speaker

2008  New student in-service, Odette Cancer Centre
Invited Speaker
2008  Grand Rounds, Odette Cancer Centre  
*Invited Speaker*

2008  Pain Preceptorship Program for Pharmaceutical Companies  
*Invited speaker*

2009  Pain Preceptorship Program for Pharmaceutical Companies  
*Invited speaker*

2009  Research Rounds, Odette Cancer Centre  
*Invited speaker*

2009  6 Presentations to update Radiation therapists on the CSRT progress  
*Invited to talk OCC*

2009  CARO  
*Moderator*

2010  UT/TMI Medical Radiation Science Program  
*Invited lecturer*

2010  Radiation Therapy Research Rounds, Odette Cancer Centre  
*Invited speaker*

2011  New research student in-service  
*Invited Speaker*

2011  2 talks to visiting professors on Palliative Radiation Therapy  
*Invited Speaker*

2011  Pain Preceptorship Program (Amgen)  
*Invited Speaker*

2012  Partners in Pain (Purdue)  
*Invited Speaker*

2012  Clinical Rationale and Decision Making Course, Palliative Section, MSc  
*Invited Academic Teacher*

2012  Odette Cancer Center Research Rounds  
*Invited Speaker*

2013  Odette Cancer Center Research Rounds  
*Invited Speaker*
2013 RTi3, Toronto
  Moderator

2013 UT/TMI Medical Radiation Science Program
  Invited lecturer

2014 Interdisciplinary Radiation Oncology Rounds (I.R.O.R.)
  Invited lecturer

2014 Radiation Therapy Research Rounds: Shining a Light on Photodynamic Therapy
  Invited Speaker

2014 Skin cancer for teens- 20 co-op students- 2 hours
  Invited Speaker

2015 Skin cancer for teens- 20 co-op students- 2 hours
  Invited Speaker

2016 Skin cancer for teens- 20 co-op students- 2 hours
  Invited Speaker
Curriculum Vitae

Kieng Tan
MRT(T)

A. Date Curriculum Vitae is Prepared: 2016 February 26

Only includes Activities from July 2015 to July 2016

B. Biographical Information

1. EDUCATION

Degrees
2000 - 2003 MEd, Teaching and Learning, Education, University of Ottawa, Ottawa, Ontario, Canada
1996 - 1998 Diploma in Radiation Therapy, Radiation Therapy, Radiation Oncology, Ontario Schools of Radiation Therapy, Ottawa, Ontario, Canada
1993 - 1996 BSc, Biochemistry, Biochemistry, microbiology and immunology, University of Ottawa, Ottawa, Ontario, Canada

Postgraduate, Research and Specialty Training
2012 Oct 3 - 2012 Nov 29 Teaching 101, Part 1 and 2, Centre for Faculty Development, University of Toronto, Toronto, Ontario, Canada
2012 Oct 4 Role-Modeling: “Monkey See, Monkey Do!” Understanding the Importance of Intentional Role-Modeling, Centre for Faculty Development, University of Toronto, Toronto, Ontario, Canada
2011 Nov - 2011 Nov 5 Facilitating Groups in Interprofessional Education, Centre for Faculty Development, University of Toronto, Toronto, Ontario, Canada
2011 Oct 5 Effective Design and Implementation of Multiple Choice Tests, Centre for Teaching Support and Innovation, University of Toronto, Toronto, Ontario, Canada
2010 Oct Good Clinical Research Practice, Research, University Health Network, Toronto, Ontario, Canada
2009 Feb - 2009 Sep InterProfessional Collaboration Certificate, Continuing Education, The Michener Institute for Applied Health Sciences, Toronto, Ontario, Canada

Qualifications, Certifications and Licenses

1
2003 - present  
RT(T) (ARRT), Radiation Therapy, American Registry of Radiologic Technologists, United States

1999 - present  
R.T.T. Radiation Therapy, Canadian Association of Medical Radiation Technologists, Ottawa, Ontario, Canada

1999 - present  
M.R.T.(T). Radiation Therapy, College of Medical Radiation Technologists of Ontario, Ontario, Canada

2. EMPLOYMENT

Current Appointments

2013 May 1 - present  
Academic Coordinator, Radiation Oncology, Faculty of Medicine, University of Toronto, Toronto, Ontario, Canada

2013 May 1 - present  
Radiation Therapy Education Leader, Radiation Medicine Program, Princess Margaret Cancer Centre, Toronto, Ontario, Canada

2011 - present  
Lecturer, Radiation Oncology, Faculty of Medicine, University of Toronto, Toronto, Ontario, Canada

3. PROFESSIONAL AFFILIATIONS AND ACTIVITIES

Professional Associations

2011 - present  
Associate Member, Canadian Association of Radiation Oncology

2003 - present  
Member, American Registry of Radiologic Technologists

1999 - present  
Member, Canadian Association of Medical Radiation Technologists

1999 - present  
Member, College of Medical Radiation Technologists of Ontario

1999 - present  
Member, Ontario Association of Medical Radiation Technologists

Administrative Activities

NATIONAL

Canadian Association of Medical Radiation Technologists

2011 - present  
Member, Dosimetry Specialty Certificate Committee, Ottawa, Ontario, Canada.

PROVINCIAL / REGIONAL

College of Medical Radiation Technologists of Ontario

2010 - present  
Peer Assessor, Quality Assurance Committee, Ontario, Canada.

LOCAL

Michener Institute for Applied Health Sciences

2013 May 1 - present  
Member, MRS Program Advisory Committee, Faculty of Medicine, Dept of Radiation Oncology, Undergraduate Education, Toronto, Ontario, Canada.
2013 May 1 - present  
**Member**, MRS Joint Curriculum Committee, Faculty of Medicine, Dept of Radiation Oncology, Undergraduate Education, Toronto, Ontario, Canada.

2013 May 1 - present  
**Member**, MRS Planning Committee, Faculty of Medicine, Dept of Radiation Oncology, Undergraduate Education, Toronto, Ontario, Canada.

2013 May 1 - present  
**Member**, MRS Oversight Committee, Faculty of Medicine, Dept of Radiation Oncology, Undergraduate Education, Toronto, Ontario, Canada.

2013 May 1 - present  
**Member**, MRS Policy and Procedures Committee, Faculty of Medicine, Dept of Radiation Oncology, Undergraduate Education, Toronto, Ontario, Canada.

2013 May 1 - present  
**Member**, MRS Recruitment Strategies Committee, Faculty of Medicine, Dept of Radiation Oncology, Undergraduate Education, Toronto, Ontario, Canada.

2013 May 1 - present  
**Member**, MRS Operations Committee, Faculty of Medicine, Dept of Radiation Oncology, Undergraduate Education, Toronto, Ontario, Canada.

2009 - present  
**Member**, New Curriculum Competency Checklist Revision Committee, Toronto, Ontario, Canada.

2008 - present  
**Rater**, Multiple Mini Interview Process, Toronto, Ontario, Canada.

2005 - present  
**Member**, Faculty Liaison Committee, Toronto, Ontario, Canada.

**Princess Margaret Hospital**

2012 - present  
**Chair**, Radiation Therapy Education Committee, Toronto, Ontario, Canada.

2011 - present  
**Member**, Radiation Medicine Program Education Committee, Toronto, Ontario, Canada.

2010 - present  
**Member**, Radiation Therapy Education Newsletter, Rad-U-Cation, Toronto, Ontario, Canada.

**University of Toronto**

2012 - present  
**Member**, InterFaculty Curriculum Committee, Faculty of Medicine, Dept of Radiation Oncology, Undergraduate Education, Toronto, Ontario, Canada.

**University of Toronto, Centre for Interprofessional Education**

2012 - present  
**Member**, Conflict in Interprofessional Life, Faculty of Medicine, Dept of Radiation Oncology, Undergraduate Education, Toronto, Ontario, Canada.

1. EDUCATION

Degrees

1974-1977  Bachelor of Arts Degree (Honours), Sociology. Leeds University, UK.
2011-2013  Masters in Health Sciences, Medical Radiation Sciences. University of Toronto

Qualifications, Certifications and Licenses

Postgraduate Education and Specialty Training.

1984  Certificate in Counseling and Listening Skills. Social Work Department, Leeds Polytechnic University, West Yorkshire, UK.
2012   IPODE (Inter Professional Oncology Distance Education) course Sexual Health in Cancer.
2013   IPODE (Inter Professional Oncology Distance Education) course Sexual Health Counseling in Cancer.
2011-2013 Masters in Health Sciences, Medical Radiation Sciences. University of Toronto
2014   Intensive Sex Therapy Program Guelph University, Ontario, Canada.
2015   Certificate in Motivational Interviewing Skills. OISE, University of Toronto, Ontario, Canada.

Qualifications, Certifications and Licenses
1980-1983 Diploma of the College of Radiographers (Therapeutic). School of Radiography, Cookridge Hospital, Leeds, West Yorkshire, UK.
1992   Licentiate, College of Medical Radiation Technologists of Ontario

2. EMPLOYMENT
Current posts/Appointment
2014-present. CSRT (Clinical Specialist Radiation Therapist) Odette Cancer Centre. Supportive Care and Sexual Health.

Previous posts/Appointment
1986-1990 Senior Radiographer. Riyadh Military Hospital, Saudi Arabia.
1983-1986 Senior Radiographer. Cookridge Hospital, Leeds, West Yorkshire, UK.
3. HONOURS AND CAREER AWARDS

1999  MEMORIAL CUP. CANADIAN ASSOCIATION OF MEDICAL RADIATION TECHNOLOGISTS. (CAMRT). PILOT STUDY TO INVESTIGATE THE TOXICITY OF ALOE VERA GEL IN THE MANAGEMENT OF RADIATION INDUCED SKIN REACTIONS FOR POST-OPERATIVE PRIMARY BREAST CANCER.

2010  Research Leadership Award. Department of Radiation Therapy, Odette Cancer Centre, Toronto, Canada.

2013  Canadian Association of Medical Radiation Technologists.

E.I. Hood Essay Award. “Creating Our Own Knowledge: The Development of Professional Knowledge in Radiation Therapy”

Distinctions and Research Awards

Local.

2009-2010. Angela Turner BAHons.MRT (T) Laura D’Alimonte BSc.MRT (T) Marg Fitch PhD. Identifying the challenges and opportunities faced by radiation therapists in initiating and developing research projects; The Odette Cancer centre experience. Practice Based Research Award, Sunnybrook Health Sciences Centre, Toronto, Ontario. Amount: $1000.

2013-2014. Angela Turner BAHons.MRT (T) MHSc. Sexual Health Issues in Cancer Patients Receiving

Student/Trainee Awards
N/A

4. PROFESSIONAL AFFILIATIONS AND ACTIVITIES

Professional Memberships

1992-current College of Medical Radiation Technologists of Ontario
1992-current Ontario Association of Medical Radiation Technologists.
1992-current Canadian Association of Medical Radiation Technologists
2010-current Canadian Association of Radiation Oncology.

Professional Committee Participation

Local Committees

2015 Enhancing the Oncology Program at Sunnybrook Health Sciences Centre
Strategic Reflection and Adaptation: Core Committee. RT representative Odette Cancer Centre.

2013/14 Member of the Planning Committee IPE/IPC Showcase Sunnybrook Health Sciences Centre.
Toronto, Canada.

2013 –present Member of the Gynecological Site Group Odette Cancer Centre.

2009-present Member of the Policy and Procedures Review Committee. Odette Cancer Centre, Toronto, Ontario.

2009-present Member of the Supportive Care Group. Odette Cancer Centre, Toronto, Ontario.

2010 Member of the Research and Development Needs Group. Joint Initiative Odette Cancer Centre and Princess Margaret Hospital, Toronto, Ontario.

National and Provincial Committees

2015 Member of the Guideline Development Group (GDG) expert panel, The Interventions to Improve Sexual Function and Sexuality for People with Cancer guidelines, Cancer Care Ontario, Toronto, Ontario.

2014 Member of Organizing Committee CARO (Canadian Association of Radiation Oncology) Conference. Outcomes: Clinical and Professional – Success for our Patients and Ourselves.

2013 Member of the Organizing Committee Target Insights Conference. University of Toronto. "Rethinking Particle Therapies."

2004 Member of the organizing committee. WESCAN conference, Victoria, British Columbia.

2000 Member of the Tri-centre Palliative Radiation Oncology Group, Ontario.

1996 Member of the Risk Management committee. Ontario Association of Medical Radiation Technologists, Ontario.

International Committees

2009–present Member of the Breast Radiotherapy Interest Group (BRIG). An international network which shares and develops resources and expertise within a wider professional community for issues related to breast cancer.

Peer Review Activities

EDITORIAL BOARD ACTIVITIES

2014 Editorial Board Member Journal of Medical Imaging and Radiation Sciences, Canada.
MANUSCRIPT REVIEWS
2011-present  Manuscript Reviewer. Journal of Medical Imaging and Radiation Sciences, Canada.

PRESENTATION REVIEWS
Abstract reviewer
2010-present  Abstract Reviewer. Canadian Association of Medical Radiation Technology Annual General Meeting, Quebec City Canada.
2010-present  Abstract Reviewer. RTi3 Conference, Toronto Canada.

2011-present  Manuscript Reviewer. Journal of Medical Imaging and Radiation Sciences, Canada.
2013/2014  Abstract Reviewer IPE/IPC Showcase Sunnybrook Health Sciences Centre Toronto, Ontario.

OTHER
2011  Session Moderator. RTi3 Conference proffered paper session, Canada.
2011  Guest Facilitator. Radiation therapist e-Journal Club, Sheffield Hallam University, UK.

Consultation
N/A.

### Poster Presentations

- The role of the radiation therapist in a palliative care programme. Canadian Association of Radiation Oncology Annual scientific meeting, Quebec City, Canada, 2000.
Identifying the Challenges and Opportunities faced by radiation therapists in initiating and developing research projects. The Odette Cancer Experience. RTi3 Conference, Toronto, Ontario, 2011.

CT Simulation of Patients receiving Radiation Therapy for breast cancer: A Comparison of physician and therapists perceptions of their role in the procedure. RTi3 Conference, Toronto, Ontario, 2011.

Geometric Assessments as an Indicator for Adaptive Planning in Head and Neck Radiotherapy: A Retrospective Study. Canadian Association of Radiation Oncology Annual scientific meeting, Winnipeg, Canada, 2011.

CT Simulation of Patients receiving Radiation Therapy for breast cancer: A Comparison of physician and therapists perceptions of their role in the procedure. Canadian Association of Radiation Oncology annual scientific meeting, Winnipeg, Canada, 2011.

Development of a Clinical Specialist Radiation Therapist (CSRT) Role in Supportive Care and Sexual Health The Odette Cancer Experience Canadian association of Psychosocial Oncology Conference, Montreal, Quebec, Canada. April 2015.

Development of Novel Patient Education Pamphlets: Lessons Learned from a Collaborative Team Based Approach at the Odette Cancer Centre Angela Turner MRT (T) MHSc Lisa Di Prospero MRT (T) MSc, Angela Leahey RN MN, Lisa Barbera MD, Danny Vesprini MD and Janet Ellis MD IPE/IPC Showcase Sunnybrook health Sciences Centre, Toronto, Ontario, Canada. June 2015.
Invited Lectures and Presentations

E. Teaching and Design

Teaching 2009-2015

Journal Club Organizer, presenter & facilitator. Odette Cancer Centre. (1 hour each session)

Validity of skin care protocols followed by women with breast cancer receiving External Radiation.

Environmental Links to Breast Cancer.

Advanced Practice Roles: Therapist Perceptions.

Vaginal Dryness and Beyond: The Sexual Health Needs of Women Diagnosed with Metastatic Breast Cancer

2013-2014. Peer Review Quality Assurance Radiation Therapy Continuing Education Sessions. Radiation Therapy Department, Odette Cancer Centre. (1.5 hours per session).

1. Gynecological Cancer Site.

2. Head and Neck Cancer Site.

Course Design

2003 Author: CAMRT Self study course “Palliative Care in Radiation Therapy. An overview”.

2010 Co-Author: CAMRT Self study course “Palliative Care in Radiation Therapy. An overview” Revised edition.

F. Research Supervision

1. EDUCATION

Degrees
1978  BSc, University of Toronto, Toronto, Ontario

Qualifications, Certifications and Licenses
2008  C.T.I.C. Computed Tomography Imaging Certificate, Canadian Association of Medical
Radiation Technologists, License / Membership #: 016917
2004  P.E.T. Certified Positron Emission Tomography Technologist, Nuclear Medicine Technologist
Certification Board, United States, License / Membership #: S-80557
1997  C.N.M.T. Certified Nuclear Medicine Technologist, Nuclear Medicine Technologist
Certification Board, United States, License / Membership #: 020467
1981  Nuclear Medicine Technology Diploma, Toronto Institute of Medical Technology (T.I.M.T.),
Toronto, Ontario
1981  M.R.T. (N), Medical Radiation Technologist (Nuclear Medicine), The College of Medical
Radiation Technologists of Ontario, License / Membership #: 05493
1981  R.T.N.M. Registered Technologist in Nuclear Medicine, Canadian Association of Medical
Radiation Technologists, License / Membership #: 016917

2. EMPLOYMENT

Current Appointments
2006 - present  Assistant Professor, Radiation Oncology, University of Toronto, Toronto, Ontario
2004 - present  Research Nuclear Medicine/PET Technologist, Radiation Medicine Program, Princess
Margaret Hospital and University Health Network, Toronto, Ontario
PET-CT and SPECT-CT in Radiation Physics

Previous Appointments

HOSPITAL
1984 - 1985  Registered Technologist in Nuclear Medicine, Hadassah Medical Center, Jerusalem, Israel
    On educational leave of absence (8 months) from Mount Sinai Hospital - Toronto
1983 - 2001  Clinical Coordinator/Instructor and Research Technologist, Mount Sinai Hospital, Toronto, Ontario
    Affiliated with The Michener Institute for Applied Health Sciences
1981 - 1983  Registered Technologist in Nuclear Medicine, Division of Nuclear Medicine, Mount Sinai Hospital, Toronto, Ontario

RESEARCH
2003 - 2004  Research Nuclear Medicine Technologist (PET/SPECT) and Investigator, Kelly Services, Molecular Imaging Branch, National Institute of Mental Health, NIH, Bethesda, MD. Bethesda, Maryland
2001 - 2003  Research Nuclear Medicine Technologist (PET/SPECT) and Investigator, Henry M. Jackson Foundation for the Advancement of Military Medicine at the Molecular Imaging Branch, NIMH, NIH, Bethesda, MD.

3. HONOURS AND CAREER AWARDS

Distinctions and Research Awards

INTERNATIONAL
Received

2016  Travel Award, Principal Author, Society of Nuclear Medicine and Molecular Imaging Technologist Section, United States. (Distinction)
    To present an abstract at the Annual Meeting in San Diego, California. Total Amount: 1,000 USD

2013  Best Technologist PET Abstract, Society of Nuclear Medicine and Molecular Imaging. (Research Award)
    Awarded by the Technologist Section of the Society of Nuclear Medicine and Molecular Imaging at the 60th Annual Meeting in Vancouver, BC.

2013  Second Place Prize for a Technologist Oral Paper, Society of Nuclear Medicine and Molecular Imaging. (Research Award)
    Awarded by the Technologist Section of the Society of Nuclear Medicine and Molecular Imaging at the 60th Annual Meeting in Vancouver, BC.

2012  First Place for the Journal of Nuclear Medicine Technology “Best Paper Award for 2011”, Society of Nuclear Medicine and Molecular Imaging. (Research Award)
    Awarded by the Technologist Section of the Society of Nuclear Medicine and Molecular Imaging at the 59th Annual Meeting in Miami, Florida.

2011  Second Place Prize for a Technologist Oral Paper, Society of Nuclear Medicine. (Research Award)
    Awarded by the Technologist Section of the Society of Nuclear Medicine, at the 58th Annual Meeting in San Antonio, Texas.

2010  Nuclear Oncology Council Best Technologist Abstract Award, Society of Nuclear Medicine. (Research Award)
    Awarded at the 57th Annual Meeting in Salt Lake City, Utah.

2010  Second Place Prize for a Technologist Oral Paper, Society of Nuclear Medicine.
(Research Award)
Awarded by the Technologist Section of the Society of Nuclear Medicine, at the 57th Annual Meeting in Salt Lake City, Utah.

2010
**Travel Award**, Society of Nuclear Medicine Technologist Section, United States. (Distinction)
To present an abstract at the 57th Annual Meeting in Salt Lake City, Utah. Total Amount: 1,000 USD

2009
**Third Place Prize for a Technologist Oral paper**, Society of Nuclear Medicine. (Research Award)
Awarded by the Technologist Section of the Society of Nuclear Medicine, at the 56th Annual Meeting in Toronto, Ontario.

2008
**First Place for the Journal of Nuclear Medicine Technology “Best Paper Award for 2007”**, Society of Nuclear Medicine. (Research Award)
Awarded by the Technologist Section of the Society of Nuclear Medicine at the 55th Annual Meeting in New Orleans, Louisiana.

2008
**Third Place Prize for a Technologist Poster**, Society of Nuclear Medicine. (Research Award)
Awarded by the Technologist Section of the Society of Nuclear Medicine, at the 55th Annual Meeting in New Orleans, Louisiana.

2004
**First Place for the Journal of Nuclear Medicine Technology “Outstanding Paper Award for 2003”**, Society of Nuclear Medicine. (Research Award)
Awarded by the Technologist Section of the Society of Nuclear Medicine at the 51st Annual Meeting in Philadelphia, Pennsylvania.

2002
**Second Place Prize for a Technologist Paper on Brain Imaging**, Society of Nuclear Medicine. (Research Award)
Awarded by the Brain Imaging Council of the Society of Nuclear Medicine, at the 49th Annual Meeting in Los Angeles, California.

2000
**First Place Prize for a Technologist Paper on Brain Imaging**, Society of Nuclear Medicine. (Research Award)
Awarded by the Brain Imaging Council of the Society of Nuclear Medicine, at the 47th Annual Meeting in St. Louis, Missouri.

2000
**Second Place for the Journal of Nuclear Medicine Technology “Outstanding Paper Award for 1999”**, Society of Nuclear Medicine. (Research Award)
Awarded by the Technologist Section of the Society of Nuclear Medicine at the 47th Annual Meeting in St. Louis, Missouri.

1999
**First Place Prize for a Technologist Paper on Brain Imaging**, Society of Nuclear Medicine. (Research Award)
Awarded by the Brain Imaging Council of the Society of Nuclear Medicine, at the 46th Annual Meeting in Los Angeles, California.

1998
**Second Place Prize for a Technologist Paper on Brain Imaging**, Society of Nuclear Medicine. (Research Award)
Awarded by the Brain Imaging Council of the Society of Nuclear Medicine, at the 45th Annual Meeting in Toronto, Ontario.

1996
**First Place Prize for a Technologist Paper on Brain Imaging**, Society of Nuclear Medicine. (Research Award)
Awarded by the Brain Imaging Council of the Society of Nuclear Medicine, at the 43rd Annual Meeting in Denver, Colorado.

**LOCAL**

Received

2015
**Exceptional Research Support Award for 2014/15**, Princess Margaret Cancer Centre, Radiation Medicine Program. (Research Award)

2008
**Exceptional Research Support Award**, Princess Margaret Hospital, Toronto, Ontario.
(Research Award)
2000 Outstanding Mentor and Role Model Award, The Joint Department of Medical Imaging; Mount Sinai Hospital and University Health Network, Toronto, Ontario. (Distinction)
1981 Silver Medal Award, Toronto Institute of Medical Technology. (Distinction)
1980 In Vitro Methodology Award, Toronto Institute of Medical Technology. (Distinction)

4. PROFESSIONAL AFFILIATIONS AND ACTIVITIES

Professional Associations
2001 - 2003 Elected Council Member, Brain Imaging Council, Society of Nuclear Medicine

Administrative Activities

INTERNATIONAL
Society of Nuclear Medicine and Molecular Imaging, Technologist Section
2012 - 2014 Member, Strategic Planning Committee, United States.
2012 - 2013 Member, PET PROS Technologist Working Group Committee, United States.

PROVINCIAL / REGIONAL
College of Physicians and Surgeons of Ontario
2010 - present Member, Independent Health Facilities, PET Task Force Committee
Technologist representative from the College of Medical Radiation Technologists of Ontario.

Ontario Association of Medical Radiation Technologists
1987 - 1989 Member, Nuclear Medicine Quality Control Subcommittee

LOCAL
Michener Institute for Applied Health Sciences
2000 Member, Nuclear Medicine Executive Advisory Committee
1995 Chair, Nuclear Medicine Executive Advisory Committee
1994 Vice Chair, Nuclear Medicine Executive Advisory Committee
1993 Member, Nuclear Medicine Executive Advisory Committee

C. Academic Profile

1. RESEARCH STATEMENTS

STATEMENT OF SCHOLARLY AND PROFESSIONAL ACTIVITY.
My scholarly and professional activity is in two areas: (1) clinical imaging using PET-CT for radiotherapy planning and response monitoring and (2) pre-clinical small animal imaging using PET and SPECT-CT at the STTARR Innovation Centre.
In the area of clinical imaging my research has been on the technical aspects of respiratory gated FDG-PET in lung cancer. In the pre-clinical area my research has been on the technical aspects of performing small animal PET and SPECT imaging.

Book Chapters

F. Presentations and Special Lectures

1. INTERNATIONAL

Invited Lectures and Presentations

2013  Invited Lecturer. Small Animal Imaging. Society of Nuclear Medicine and Molecular Imaging, Annual Meeting (Technologist Section), Vancouver, Canada.

2012  Invited Lecturer. PET-CT: A 2-day workshop including 7 lectures. Princess Margaret Hospital-University Health Network and Kuwait Cancer Centre. Kuwait City, Kuwait.

2012  Invited Lecturer. PET-CT in Oncology: Man to Mouse, there and back again. World Congress of the ISSR and CAMRT Annual General Conference, Toronto, Canada.

2010  Invited Lecturer. PET/CT in Oncology: from man to mouse, there and back again. Society of Nuclear Medicine, Annual Meeting(Technologist Section), Salt Lake City, USA.

2009  Invited Lecturer. Technical Aspects of Quantification in Brain PET. Society of Nuclear Medicine, Annual Meeting (Technologist Section), Toronto, Canada.

2008  Invited Lecturer. Brain Imaging SPECT and PET: Technical Factors. Society of Nuclear Medicine, Annual Meeting (Technologist Section), New Orleans, USA.

2006  Invited Lecturer. Technical Aspects of Quantification in Brain PET. Society of Nuclear Medicine, Annual Meeting (Technologist Section), San Diego, USA.

2004  Invited Lecturer. Neuro PET Imaging. Society of Nuclear Medicine Annual Meeting (Technologist Section), Philadelphia, USA.

2003  Invited Lecturer. Applications in PET Brain Imaging. Society of Nuclear Medicine, Annual Meeting (Technologist Section), New Orleans, USA.

Presented Abstracts

2015  Development of a Quantitative PET QA Procedure for Multi-Center Clinical Trials. World Congress on Medical Physics & Biomedical Engineering, Toronto, Canada. Driscoll B, Yeung I, Vines D, Keller H.

2015  Serial 4DCT’s and 4DPET imaging to monitor response for locally-advanced non-small cell lung cancer...

Presented and Published Abstracts

2016 **Presenter.** Respiratory gated hypoxia imaging using 18F-FAZA PET-CT. Society of Nuclear Medicine and Molecular Imaging, Annual Meeting, San Diego, USA.

*Publication Details:*

2016 **Presenter.** Serial 4DCT/4DPET Imaging to Predict and Monitor Response for Locally-Advanced Non-small Cell Lung Cancer Radiotherapy. American Society for Radiation Oncology, Annual Meeting, Boston, USA.

*Publication Details:*

2016 **Presenter.** Respiratory gated FLT and FAZA PET-CT imaging in patients with tumour motion. European Association of Nuclear Medicine, Annual Congress, Barcelona, Spain.

*Publication Details:*

2015 **Presenter.** Effects of respiratory-gated 18F-FAZA PET-CT on hypoxic fraction in patient and phantom. World Molecular Imaging Congress, Annual Meeting, Honolulu, USA.

*Publication Details:*

*Publication Details:*

**2014**

Phase-matched 4DCT for AC in 4D gated PET. Society of Nuclear Medicine and Molecular Imaging, Annual Meeting, St. Louis, USA.

**Publication Details:**

**2014**

**Presenter.** Respiratory gated PET-CT in patients: Is phase-matched attenuation correction more personalized? European Association of Nuclear Medicine, Annual Congress, Gothenburg, Sweden.

**Publication Details:**

**2013**

**Presenter.** Reproducibility of 18F-FAZA PET-CT mouse imaging. Society of Nuclear Medicine and Molecular Imaging, Annual Meeting, Vancouver, Canada.

**Publication Details:**

**2013**

Clinical characterization of hypoxia in pancreatic ductal adenocarcinoma (PDAC) by 18F-FAZA PET and pimonidazole. American Society of Clinical Oncology Annual Meeting, Chicago, USA.

Curriculum Vitae

Hamideh Alasti

A. Date Curriculum Vitae is Prepared: 2016 August 12

B. Biographical Information

Primary Office Department of Radiation Physics
Princess Margaret Hospital (PMH)
University Health Network
610 University Avenue
Toronto, Ontario, Canada
M5G 2M9

Telephone 416 946-4501 Ext. 5262

Email Hamideh.Alasti@rmp.uhn.on.ca

1. EDUCATION

Degrees
1977 - 1979 MSc, Physics, Specialty in Condensed Matter Physics, Massachusetts Institute of Technology, Boston, United States

Postgraduate, Research and Specialty Training
1977 - 1979 Graduate Student, Research on the electronic structure of amorphous chalcogenide glasses by photoluminescence measurement at low temperatures (4.4 K). Research on impurity concentrations in amorphous glasses by infrared absorption spectroscopy. Massachusetts Institute of Technology, United States

Qualifications, Certifications and Licenses
2004 Jul UHN – Rotman School Leadership Development Program, University of Toronto, Toronto, Ontario, Canada
1993 Member, Canadian College of Physicists in Medicine
1991 Member, Diagnostic imaging, American Association of Physicists in Medicine

2. EMPLOYMENT

Current Appointments
2007 - present Safety and Regulatory Officer, Radiation Medicine Program, Princess Margaret Hospital
2003 - present Radiation Protection Officer in Radiation Medicine Program, Princess Margaret Hospital
2000 - present Assistant professor, Radiation Oncology, University of Toronto
1998 - present Senior Physicist, Radiation Medicine Program, Princess Margaret Hospital
Previous Appointments

HOSPITAL
2002 - 2007  Group Leader for Imaging, Radiation Medicine Program, Princess Margaret Hospital
2000 - 2004  Group leader for treatment planning, Radiation Medicine Program, Princess Margaret Hospital
1984 - 1998  Medical Physicist, Radiation Medicine Program, Princess Margaret Hospital

RESEARCH
1975 - 1977  Research Assistant, Material and Energy Research Centre, Tehran, Iran, Islamic Republic Of
Major projects were a) on solar cells, by measuring the electrical conductivity of different compounds at high and low temperatures and b) on ceramics, study of formation kinetics of portland cement by X-ray analysis

UNIVERSITY
1972 - 1973  Teaching Assistant, Physics, University of Houston, Houston, Texas, United States
1969 - 1971  Lecturer in Optics and Thermodynamics, University of Tabriz, Iran, Islamic Republic Of

3. HONOURS AND CAREER AWARDS

Distinctions and Research Awards

INTERNATIONAL
Received
1991  Tuition scholarship, American Association of Physicists in Medicine. (Distinction)
To attend the AAPM summer school in diagnostic imaging Santa Cruze, California, USA.

NATIONAL
Received
1977  Full scholarship, Ministry of Science and Higher Education of IRAN. (Distinction)
For the graduate studies at MIT, Cambridge, USA.

Teaching and Education Awards

LOCAL
Received
2002  Best “Radiation Medicine Program Rounds”, Dept of Radiation Oncology, Faculty of Medicine, Princess Margaret Hospital, Toronto, Ontario

4. PROFESSIONAL AFFILIATIONS AND ACTIVITIES

Professional Associations

1993 - present  Member, Canadian College of Physicists in Medicine (CCPM)
1986 - present  Full member, American Association of Physicists in Medicine (AAPM)
1986 - present  Full member, Canadian Organization of Medical Physicists (COMP)

Administrative Activities

INTERNATIONAL
International Society of Magnetic Resonance (ISMRM)
2003 - present  Member

NATIONAL
CARO
2008 - present  Member, Education Committee

LOCAL
Princess Margaret Hospital
2007 - present  Member, Radiation Safety Committee, RMP, Toronto, Ontario, Canada.
2002 - present  Member, Operations Committee, RMP, Toronto, Ontario, Canada.
2000 - present  Member, Radiation Physics Operations Committee, RMP, Toronto, Ontario, Canada.
2006 - 2007  Member, Sherpa II: Image Guidance Group, RMP, Toronto, Ontario, Canada.
2003 - 2006  Member, External Beam Process Committee, RMP, Toronto, Ontario, Canada.
2003 - 2006  Member, Sherpa I, RMP, Toronto, Ontario, Canada.
2002 - 2007  Member, Radiation Physics Steering Committee, RMP, Toronto, Ontario, Canada.
2002 - 2003  Member, Strategic Committee, Toronto, Ontario, Canada.
2000 - 2003  Member, Continuing Education (CE) Committee, Faculty of Medicine, Dept of Radiation Oncology, Continuing Education
1996 - 1998  Member, Senior Advisory Committee

University of Toronto
2000 - 2006  Member, Education Committee, Faculty of Medicine, Dept of Radiation Oncology

Peer Review Activities

MANUSCRIPT REVIEWS
Reviewer
International Journal of Radiation Oncology, Biology, Physics
Medical Physics Journal
Physics in Medicine and Biology
Radiotherapy and Oncology
C. Academic Profile

1. RESEARCH STATEMENTS

2013 - 2015

High Quality Volume Computerized Tomography.
- this clinical study will determine the inter-observer variability associated with prostate delineation on high quality volume CT images and determine the clinically significant advantage in PTV margin reduction compared to conventional planning CT and MRI planning for patients undergoing radiotherapy for localized prostate cancer. 2013-2015. Principal Investigator.

2013 - 2014

MR Guided Radiotherapy (MRgRT).
- I have led the shielding design calculation for MR Guided Radiotherapy (MRgRT) for both High Dose Rate (HDR) brachytherapy and Linac and have substantial role on integration of MR with HDR and Linac. 2013-2014.

Safety and regularity officer.
I have to assure safe and appropriate practice with respect to the infrastructure, by independent examination and review of practices at RMP and verify conformance to regulatory requirements. My main specific responsibility is to reference and coordinate all interactions between the program and the regulatory bodies such as CNSC, MOL, and MOH.

Imaging.
I have led the following:
- The acceptance, commissioning, education, training and clinical implementation of four CT- Simulators
- The establishment of 4 Dimensional CT imaging (4D-CT)
- The development of Enhanced CT- Simulator imaging protocols for Kidney and Prostate
- The acceptance and clinical implementation of Computerized Radiography imaging system(Lumysis) for use in the simulation and treatment delivery
- The acceptance, commissioning, education, training and clinical implementation of four Simulators
- Pioneered the Enhanced Portal imaging using EPID’s
- The development of MR-Simulator in RT.

Treatment Planning.
I have led:
- The development of treatment planning protocols based on 4D-CT
- The migration from conventional Simulator based planning to CT-Simulator based planning for all treatment sites
- The development and clinical implementation of CADPLAN planning system to migrate from 2D to 3D treatment Planning
- The first Conformal RT at RMP by development and clinical implementation of Escalated Dose Conformal for Carcinoma of Prostate
- The development of dosimetry for Internal gold eye shield in Orthovoltage machine.

Commissioning and Quality Assurance.
a) I have led the development of
- The QA for Imagining systems; Simulators, CT-Simulators, EPID systems, and Orthovoltage machine
- The adjustable collimator system for the Orthovoltage machine
- The dosimetry data book for Orthovoltage
b) I have been actively involved in
- The acceptance and commissioning of Linacs and other treatment machines.

## D. Research Funding

### 1. GRANTS, CONTRACTS AND CLINICAL TRIALS

#### NON-PEER-REVIEWED GRANTS

**FUNDED**

- **2005 Jul - 2006 Jun**

- **2004 Jul - 2006 Jun**

- **2002 Jul - 2007 Jun**

- **2002**
  - **Principal Investigator.** CT image quality evaluation. General Electric Canada. 50,000 CAD. [Grants]

- **2002**
  - **Principal Investigator.** 4D CT imaging. (instrumentation). General Electric Canada. 200,000 CAD. [Grants]

1. EDUCATION

Degrees

2004 Sep - 2009 Apr PhD, Medical Biophysics, Western University, London, Ontario, Canada, Supervisor(s): Kevin Jordan, Ph.D. and Jerry Battista, Ph.D.

2001 Sep - 2004 Aug MSc, Medical Physics option, Physics, Queen’s University at Kingston, Kingston, Ontario, Canada, Supervisor(s): L. John Schreiner, Ph.D.

1994 Sep - 1998 Apr BSc, Medical and Health Physics, Physics and Astronomy, McMaster University, Hamilton, Ontario, Canada

Postgraduate, Research and Specialty Training

2009 May - 2010 Dec Medical Physics Resident, Radiation Oncology, Clinical Physics Residency (CAMPEP-accredited), Department of Medical Physics and Engineering, London Regional Cancer Program, London Health Sciences Centre, London, Ontario, Canada

Qualifications, Certifications and Licenses

2016 July Member of the Canadian College of Physicists in Medicine (MCCPM)

2010 Dec Ontario Peer Review A, Clinical Physics, Cancer Care Ontario and the Ontario Ministry of Health
2. EMPLOYMENT

Current Appointments
2014 Jul - present  Deputy Head and Medical Physicist, Department of Medical Physics, Odette Cancer Centre – Sunnybrook Health Sciences Centre, Toronto, Ontario, Canada
Responsibilities: Assist the Head of Physics with all of the technical, professional and administrative aspects of the external beam radiotherapy component of the medical physics program. Clinical Duties: physics support for external beam procedures, consultation with dosimetrists and physicians, linear accelerator quality assurance and chart checking

Previous Appointments
HOSPITAL
2011 Feb - 2014 Jun  Medical Physicist, Department of Medical Physics, Odette Cancer Centre – Sunnybrook Health Sciences Centre, Toronto, Ontario, Canada
Clinical duties: physics support for external beam and HDR gynae brachytherapy procedures, Stereotactic Radiosurgery (SRS) treatment planning, consultation with dosimetrists and physicians, linear accelerator quality assurance and chart checking, implementation of non-invasive frameless immobilization systems for SRS

1999 Mar - 2003 Jun  Physics Technician, Department of Medical Physics, Cancer Centre of Southeastern Ontario (formally known as the Kingston Regional Cancer Centre) – Kingston General Hospital, Kingston, Ontario, Canada
Clinical duties: coordinated the physics quality assurance program, linear accelerator quality assurance, assisted medical physicists with clinical duties and research

Academic Appointment
June 2015 – present  Assistant Professor, Department of Radiation Oncology, The University of Toronto, Toronto, Ontario, Canada

3. HONOURS AND CAREER AWARDS

Distinctions and Research Awards
NATIONAL
Received
2007 Sep - 2008 Aug  Strategic Training Program (London Regional Cancer Program and Western University), Canadian Institutes of Health Research, London, Ontario, Canada. (Distinction) Total Amount: 26,500 CAD
2006 Sep - 2007 Aug  Strategic Training Program (London Regional Cancer Program and Western University), Canadian Institutes of Health Research, London, Ontario, Canada. (Distinction) Total Amount: 23,600 CAD
PROVINCIAL / REGIONAL

Received

2007 May - 2008 Apr  Ontario Graduate Scholarship, Government of Ontario, Western University, London, Ontario, Canada. (Distinction)
Total Amount: 15,000 CAD

2006 May - 2007 Apr  Ontario Graduate Scholarship in Science and Technology, Government of Ontario, Western University, London, Ontario, Canada. (Distinction)
Total Amount: 15,000 CAD

LOCAL

Received

2010 Jun  Clinical Education Bursary, London Regional Cancer Program, London, Ontario, Canada. (Distinction)
Total Amount: 1,047.86 CAD

2008 Jan  Graduate Thesis Research Award, Western University, London, Ontario, Canada. (Research Award)
Total Amount: 1,500 CAD

2007 May  First Place Oral Presentation – Western Graduate Research Forum, Western University and the Society of Graduate Students, London, Ontario, Canada. (Distinction)
Total Amount: 150 CAD

2006 May - 2007 Apr  Western Graduate Research Scholarship, Western University, London, Ontario, Canada. (Research Award)
Total Amount: 5,556.53 CAD

2006 Mar  First Place Poster Presentation – Victoria Research Laboratories Research Day, Western University and Lawson Health Research Institute, London, Ontario, Canada. (Distinction)
Total Amount: 400 CAD

2005 Sep - 2006 Apr  Western Graduate Research Scholarship, Western University, London, Ontario, Canada. (Research Award)
Total Amount: 4,094 CAD

2004 Sep - 2005 Aug  Special University Scholarship, Western University, London, Ontario, Canada. (Distinction)
Total Amount: 6,105 CAD

2004 Jun  Student Conference Travel Award, Queen’s University at Kingston, Kingston, Ontario, Canada. (Distinction)
Total Amount: 400 CAD

2003 Sep - 2004 Aug  Carl Reinhardt Fellowship, Queen’s University at Kingston, Kingston, Ontario, Canada. (Distinction)
Total Amount: 5,410 CAD

2003 May - 2003 Aug  Carl Reinhardt Fellowship, Queen’s University at Kingston, Kingston, Ontario, Canada. (Distinction)
Total Amount: 3,334 CAD

C. Academic Profile

1. RESEARCH STATEMENTS

My current projects include 1) accurate volumetric measurements of radiation doses using radiochromic gel dosimeters and optical CT scanners, 2) evaluating a non-invasive immobilization technique for stereotactic radiosurgery (SRS) and 3) implementing a photodynamic therapy (PDT) clinical program for treating superficial skin cancer. 1) To assure the quality of advanced 3D radiation cancer treatment planning software and dose delivery hardware, it is important that the spatial distribution of ionizing radiation deposited within the exposed tissues be accurately and precisely mapped out. I am interested in investigating the optimal optical CT scanner light source and geometry for quantitatively reading the dose in 3D that is “written” into a radiochromic gel during a setup that emulates patient treatment conditions. 2) The reliable immobilization and target localization accuracy of frame-based SRS have established the technique as a gold standard, but it is associated with significant disadvantages including stress on the patient, and the need to simulate, plan and treat patients all in the same day. My interest lies in evaluating commercially available non-invasive immobilization systems that overcome frame-based limitations. By doing an inter-comparison of their respective positional accuracies, my research goal is to determine which system offers the highest degree of immobilization and ease of use for SRS patients. 3) One type of PDT is used to destroy non-melanoma superficial skin cancers. Some patients receiving this therapy are ones who have already received conventional treatments and have not had much success. Photosensitive compounds in the form of a topical cream are applied and selectively up taken by the cancerous cells. Subsequent illumination with red light results in lethal cell damage. My research interest lies in better understanding what physical measurements are needed to predict the response of individual patients to PDT and to optimize their treatment. Ultimately the goal will be to increase the clinical utilization of this mode of skin cancer therapy.

1. RESEARCH STATEMENTS

Radiobiology.
Halogenated pyrimidine compounds such as Iodeoxyuridine (IdU) and Bromo-deoxy-uridine (BrdU) can contribute to radiosensitization through their uptake as base substitutions in DNA. The mechanism of this physical process has been examined with regard to both the local Auger electron ejection and photon fluorescence de-excitation modes of the halogens and with regard to two mechanisms of initial excitation: photo-electric effect and Möller scattering. A richer picture of radio-sensitivity is arising in vitro and in vivo as a function of primary radiation and secondary photon and electron spectra at depth in tissue.

Linear Accelerator Modelling.
With the onset of practical tomographic accelerator based conformal treatments, the premium on having available high energy photons for their skin-sparing and penetrability properties is somewhat reduced. For specific treatment scenarios, the beam penumbra can be a more prominent contribution to a treatment plan’s “cost function”. The viability of a supra-orthovoltage/sub-megavoltage – Intermediate Energy Photon Treatment unit (IPET) is being investigated. In addition to a sub-millimeter sharp beam penumbra for small stereotactic like fields, there is a suggestion that spectral properties of such a unit could be well tuned for optimal radiosensitizing potency of certain compounds.

Sub-millimeter Isocentric Characterization of an External Beam RT Unit.
In parallel with the direct investigations above with IPET development, I, along with Dr. Pedro Goldman and an M.Sc. candidate student at Ryerson (Robert Tkaczyk), Drs. Gunther Hartmann and Guernot Echner at Heidelberg, am developing a film-mount phantom in order to map out the isocentric behavior of a general external beam RT unit. This is motivated by IPET development in that sharp beam penumbras offer little added benefit unless supported by similarly precise registration between a planning image set –either to direct imaging at treatment or to a rigid stereotactic co-ordinate system. Similar precision is required in the treatment beams as functions of all collimator, couch, and gantry motions.

Tissue/media inhomogeneity in subsequent stereotactic treatment of surgically embolized arterial-venous malformations.

In a multi-disciplinary team (along with Neurosurgery, Radiation oncology), we are continuing to investigate the effect of tissue embolization media inhomogeneities on the dosimetry of AVM stereotactic radiosurguries. In the context of cranial radiosurgery, the issue of loss of electron equilibrium and its clinical consequence: dose build-up and build-down are usually not considered. We identify an overlooked exception where the non-tissue equivalent surgical embolization media are intimately interlaced with the subsequent radiosurgery target—the AVM nidus.

**C. Academic Profile**

**1. RESEARCH STATEMENTS**

2008 - present Advanced imaging applications for lung cancer therapy. Lung cancer continues to be the leading cause of cancer-related deaths in Canada and worldwide. The current standard of care for locally advanced cancer involves a course of radiation therapy, typically combined with chemotherapy, delivered daily over the course of five to seven weeks. Unfortunately, disease control and survival remain low for these patients. Delivery of higher doses of radiation to lung tumors might improve cure rates; unfortunately, proximity of several organs at risk, such as the spinal cord, the heart, and uninvolved lung tissue, limits the deliverable radiation dose. Fortunately, with recent advances in radiotherapy technology, more precise targeting and monitoring have become available recently and, with them, the anticipation of improved treatment outcomes. One such advance is image-guided radiation therapy (IGRT) using cone-beam CT techniques. IGRT not only has allowed the daily localization of the tumor immediately prior to treatment, it also has quantified tumor motion induced by breathing and determined changes in tumor size, shape, and location (see most significant papers #1 and #4). The detection and elimination of large and frequent tumor localization errors ensures that the tumor receives the prescribed dose of radiation, on a daily basis. Since localization errors can be eliminated, clinicians can consider reducing radiation treatment fields, leading to a reduction of the volume of irradiated organs at risk and thus of toxicity. This provides an opportunity to
increase the radiation dose and hopefully improve control and survival rates without incurring higher rates of toxicity.

Our work with IGRT has demonstrated that, during a course of radiotherapy, not only can localization errors be minimized, tumor volume and location can be monitored. We have demonstrated that a majority of lung cancer patients encounter significant reductions in tumor volume and location. This work has raised questions regarding biological activity and tumor oxygenation. My research group is currently pursuing frequent biological imaging during therapy, using positron emission tomography (PET). PET is a non-invasive volumetric imaging method utilizing radioactive decay physics of positron-emitting radioisotopes. Radioisotopes, such as 18F, are combined with various biologic compounds or molecules (e.g. deoxyglucose) to create a radiotracer that is injected intravenously and is taken up preferentially by tumor cells, where the radioisotope decays. High intensity areas in PET images may indicate areas of high tumor metabolism or of potential hypoxia; both may indicate areas of radioresistance. The combination of PET images with CT images provides a non-invasive and quantitative assessment of the tumor during treatment, and opens the door for adapting therapy to the responsiveness of the tumor. One approach currently under study is a sharp increase of the dose delivered to potentially radioresistant areas of the tumor without introducing additional toxicity.

This research has lead to the publication of fifteen peer-reviewed articles, and the revision of several routine planning and imaging protocols for radiotherapy of lung cancer at the Princess Margaret Hospital. I was invited to present this work both nationally and internationally, either as a visiting professor or as invited faculty for refresher courses. This research has lead also to the development of the IGRT course offered jointly by the Princess Margaret Hospital and the Department of radiation Oncology at the University of Toronto.

2004 - present

Quality and safety in Radiation Therapy.
Radiotherapy is a very powerful and effective approach to cure cancer, but has devastating implication when misused. In recent years, the media has reported radiation therapy incidents with severe detrimental effects on several hundreds of patients, including death, in France, Canada, the United Kingdom, and the United States. Even though incident rates in radiotherapy are low, the public and the World Health Organization has deemed that it was not low enough, and that there is clearly a need to perform radiotherapy in a safer and more efficient way.

Using a comprehensive, process-based approach to radiation oncology, I have performed a one-year audit of quality in the Radiation Medicine Program at the Princess Margaret Hospital. The report that resulted from this audit, shown in my CPA dossier, was used to developed several initiatives to enhance quality and improve safety in radiation therapy. These initiatives have had profound impact in the Radiation Medicine Program. By applying standardization, clinical objectives can be clarified, facilitating data acquisition and analysis that can lead to improvements in terms of safety, efficacy, and efficiency. Such principles have been applied and reported for devices (i.e., IGRT quality control; Most significant publications 2, 3, and 5) as well as processes. I have been invited to several national and international forums, either as invited faculty at international meetings or as a visiting professor, to present many aspects of this work, ranging from quality control programs for radiotherapy devices to error elimination methods. Papers have been also published to describe error understanding and elimination initiatives.

In 2010, I have completed the Faculty of Medicine’s Education Scholars Program; this program allowed me to develop my teaching skills and has prepared me to build curriculum, organize courses, and integrate interactive teaching and simulation as teaching tools. I have since prepared a Quality and Safety Course based on my learnings and expertise. While the outline has been approved, the first course, intended for a multidisciplinary audience, is expected to build an international audience for which there is demand.
2. CREATIVE PROFESSIONAL ACTIVITIES STATEMENT

Radiation therapy cure rates for inoperable or locally-advanced lung cancer have been disappointingly low, either in combination with chemotherapy or on its own. One of the reasons is that radiation dose delivery is hampered by the proximity of lung tumours to several organs at risk, such as uninvolved lung tissue, the spinal cord, and the esophagus; these organs all have limited tolerance to radiation. Fortunately, recent technological advances have allowed the guidance of radiotherapy using on-line CT imaging (IGRT). IGRT allows measuring and reducing geometric uncertainties in the delivery of radiotherapy (i.e., unintentionally missing the tumor during therapy); such uncertainties are commonly handled by treating the tumor with large radiation fields that produce toxicity. By analyzing IGRT data, we were able to demonstrate that geometric inaccuracies are common and can be quite significant; despite the large radiation fields used, the potential for under dosing the tumor is considerable. By ensuring that the tumor is positioned accurately and consistently prior to radiotherapy, IGRT has provided an opportunity to reduce treatment to eventually lead to less toxicity and perhaps improved treatment outcomes. The high precision attained with IGRT gave our team confidence to deliver ablative doses of radiations to small tumors, vastly improving the outcome of inoperable patients that present such tumors. My professional innovations have been instrumental in developing and documenting treatment planning and delivery policies at Princess Margaret Hospital (PMH). Fourteen peer-reviewed papers have been published on the topic, and I am participating in an international consortium that is actively studying the application of ablative doses for early stage lung cancer. Findings from our clinical experience have been integrated into the IGRT course offered by the Accelerated Educational Program developed by the Radiation Medicine Program (RMP) at PMH and the Department of Radiation Oncology Department at the University of Toronto (UT-DRO). My contributions to the development of professional practices include numerous invited presentations, and exemplary professional practice was demonstrated by hosting several visitors to learn from our experience, the direct research supervision of three physics residents, and the integrated teaching of high-precision radiotherapy of the lung into the physics residency program that I direct.

Identifying geometric errors and resolving them is but one aspect of the second theme of the present CPA dossier, which is quality assurance and error elimination in radiation therapy. In recent years, errors in radiation therapy have received a lot of attention, and our field has been actively seeking to implement quality tools and learning systems that have been in use in fields of activity other than medicine for decades. Quality improvement relies on a foundation based on standardization of practice, documentation of procedures, transparency, and the establishment of a just culture. My first year as Physics Quality Assurance Officer was spent auditing the PMH Radiation Medicine Program which led to the production of a report, enclosed in Appendix B, describing recommendations that have profoundly changed the way the RMP operates; this report is frequently highlighted during accreditation and other quality audits. I have been coordinating the production and auditing newly-drafted procedures to describe routine clinical practice; each procedure contains explicit acceptability criteria that help define quality expectations and clearly defines what goals are to be attained by the clinical staff. Another recommended initiative from the report is the monitoring of quality metrics and of incident reports to identify and eliminate potential hazards and improve efficiency of treatment delivery. Two peer-reviewed articles have been published to disseminate the learnings we gleaned from our mistakes. Quality assurance principles have also been applied to the technology employed in radiation therapy, specifically to IGRT technologies. The work towards the resolution of quality and safety problems in radiation therapy has lead to the publication of six peer-reviewed journal articles and two book chapters. Contributions to the development of professional practices include the drafting and revision of national standards for radiotherapy equipment quality control endorsed by the Canadian Association of Provincial Cancer Agencies; these standards are being revised, under my supervision, under the auspices of the Canadian Partnership for Quality Radiotherapy, a joint effort by the Canadian Organization of Medical Physics, the Canadian Association of Radiation Oncology, the Canadian Association of Medical Radiation Technologists, and the Canadian Partnership Against Cancer. I also have chaired the Task group #179 of the American Association of Medical Physicists; an international guideline for quality control for several IGRT devices has been tentatively approved for publication. Exemplary professional practice has been demonstrated by participation in several workshops and several invited talks in international meetings. Again, my expertise with quality improvement and error elimination in radiotherapy has been integrated in both the Radiation Oncology and Radiotherapy Physics Residency Programs at UT-DRO.

Radiotherapy is a safe medical procedure practiced in an interprofessional environment that relies heavily on teamwork and rigorous quality control procedures. Analysis of incident reports from our clinics have shown an incident and near miss rate of 1.4% per course of treatment. While this rate appears low, it remains a far cry from the incident rate observed in the airline industry (0.00002% per flight). Unfortunately, radiation misadministration still occurs, and the potential for devastating outcomes from misadministration persists. High-fidelity simulators have proven essential to reduce the number and severity of incidents in the airline industry. We therefore propose the simulation of radiotherapy errors to enhance error recognition and elimination, and provide multidisciplinary learning for radiotherapy staff and trainees. A number of simulation scenarios, some reproducing incidents and others not, would be created for participants to determine how good humans are at detecting potential hazards and prevent incidents in the clinical environment.

2013 Jul - 2016 Jun  Co-Investigator. Improving quality and patient safety in radiation therapy by integrating multi-disciplinary criteria into an artificial intelligence system. Radiation Medicine (RM) is inherently interprofessional, but the nature of the interprofessional collaboration (IPC) is unique. It is often disparate in time and location, with decisions and handoffs of patient care occurring virtually through asynchronous electronic communications and independent but interdependent tasks.

IPC is increasingly being touted in RM trainee competency profiles, yet it is difficult to teach in the clinical environment. We propose to develop and pilot a high-fidelity simulation experience for RM trainees in radiation oncology, medical physics, and radiation therapy, allowing them to explore professional roles and identities within the team. Through the “Radiation Medicine Simulation in Learning Interprofessional Collaborative Experience (RM SLICE)”, learners will navigate the interprofessional interactions, tasks, and decisions necessary to deliver quality RM care through exploration of a single, complex patient case. Evaluation of learner outcomes can inform future evolution of this simulation initiative.

2012 Mar - 2017 Apr  
This grant will support the universal availability of high quality and safe radiotherapy across Canada through sustainable system performance improvement and the development of consensus-based guidelines and indicators to aid in radiation treatment program development and evaluation.

2011 Jul - 2014 Jul  
The overall goal of this project is to significantly improve the therapeutic efficacy of existing radiation therapy techniques by developing a novel treatment planning paradigm that combines state-of-the-art engineering optimization methods with radiographic and functional imaging data, and that operates within current clinical constraints. Our specific objectives are:

1. To develop an optimization methodology that computationally derives adaptive and robust radiation therapy treatments that are de-sensitized to uncertainties in tumour motion, size and functional activity over the course of treatment.

2. To apply the optimization methodology to clinical patient datasets of respiratory-correlated computed tomography (4DCT), positron-emission tomography (4DPET) and cone beam CT (4DCBCT) images to measure dose escalation potential and develop protocols for efficient clinical application of the methodology.

2009 Jul - 2013 Jun  
Radiation therapy is commonly used, over several daily sessions spanning 6-7 weeks, to treat lung cancer. Radiation can cure cancer, but dose is limited due to potentially life-threatening injury to lung and other normal tissues; because radiation dose is limited, the odds of local recurrence remain high and survival is low. Our team aims at monitoring, using medical imaging, the response of patients undergoing radiation therapy, and to adjust therapy according to the observed changes; this will help doctors treat cancer more effectively while avoiding injury to normal tissues.
E. Publications

1. MOST SIGNIFICANT PUBLICATIONS

Précis: This paper proves, with large statistical power, that geometric misses are frequent in conventional and stereotactic radiotherapy for treatment of lung cancer. Fortunately, volumetric image-guidance is proven to be effective in reducing significantly geometric misses and may lead to reductions in setup margins that, in turn, may facilitate dose escalation for lung cancer. This paper has initiated a major research thrust in our research group, initiating the analysis of serial images to monitor response to radiation therapy with respiratory-correlated CT and PET imaging. This paper has been cited 20 times, according to Scopus.

Précis: This paper presents the first long-term review (over 3 years of data) of the image quality obtained with commercial, kilovoltage cone-beam CT systems for radiation therapy image guidance. While high geometric accuracy is demonstrated, the practical limitations of the image quality, which is lower for cone-beam CT than for conventional CT, are demonstrated and advice is given for users to improve image quality using existing features of such systems.

Précis: This paper presents the first long-term review (over 3 years of data) of the mechanical accuracy of image-guidance technology performance for commercial, kilovoltage cone-beam CT systems. The remarkably high mechanical stability ensures that high geometric accuracy is maintained in the long term, providing confidence that linear medical accelerators can deliver radiotherapy with consistently high precision and accuracy.

Précis: This is the first comprehensive review paper of Quality Assurance tailored for all of the commercially-available image-guidance technologies for radiotherapy at that time. It stressed the importance of excellent geometric precision for successful image guidance, described how to assess image quality, and outlined an approach for starting up an image-guided program. According to Scopus, the paper has been cited 13 times.

_Précis: This paper is one of the first that demonstrated the power of image guidance for high dose, hypofractionated radiotherapy of early stage lung cancers. Selected for Editor’s Choice by Cogent Medicine, it is cited 63 times to support the high geometric accuracy achievable for high precision radiation therapy, and the need for frequent imaging to maintain high accuracy._

2010 QUASAR™ GRID 3D phantom. Licenses #: UHN license #: 2010-0004, Canada. Joint Holder Name(s): Andrei Damyanovich, Matthew Filetti. 
The QUASAR™ GRID 3D Image Distortion Analysis System is designed to evaluate image distortion in 3D magnetic resonance images for stereotactic radiosurgery (SRS). The System is comprised of a phantom and analysis software which work together to produce a 3D map of spatial distortion with submillimeter accuracy throughout a volume of interest. The GRID3D System ensures that MR imaging can support the outstanding geometric precision and dosimetric accuracy of the Leksell Gamma Knife®, including PERFEXION™.

The phantom is an acrylic cube containing a 1 cm 3D grid of channels filled with copper sulfate solution. The region of interest measures 14 x 13 x 11 cm3 in which there are 2002 vertex locations. The vertex
locations are known to within 0.1 mm. The phantom accurately and reproducibly mounts securely to the Leksell® Coordinate Frame G at a known position. It fits within both the Leksell® MR Indicator and Leksell® CT Indicator. http://modusmed.com/quasar_grid3d.php.

*The Penta-Guide phantom is used for the commissioning and daily testing of Image-Guided Radiotherapy (IGRT) systems. The Penta-Guide ensures the accuracy of linac-mounted image guidance systems, including cone beam CT (CBCT), x-ray volumetric imaging (XVI) and on-board imaging (OBI). Using low-density objects to minimize imaging artifacts, the Penta-Guide allows rapid and easy daily testing for 3D cone beam registration, kV and MV system coincidence, kV and MV projection images, Laser and light field coincidence, remote table adjustments. Used by a therapist every morning, testing takes little or no extra time and can be completed during normal daily equipment warm-up procedures. Ideally, one Penta-Guide phantom should be used per linac allowing simultaneous system testing and preventing unnecessary start-up delays.* http://modusmed.com/quasar_pentaguide.php 1100 units sold.

2004 - present

High-precision radiation therapy for lung cancer. Cure rates for inoperable or locally-advanced lung cancer with radiation therapy have been disappointingly low. One of the reasons is that radiation dose delivery is hampered by the proximity of lung tumors to several organs at risk, such as uninvolved lung tissue, the spinal cord, and the esophagus; these organs all have limited tolerance to radiation. Fortunately, recent technological advances have allowed the guidance of radiotherapy using on-line CT imaging (IGRT). IGRT allows measurement and reduction of geometric uncertainties in the delivery of radiotherapy (i.e., unintentionally missing the tumor during therapy); such uncertainties are commonly handled by treating the tumor with large radiation fields that inevitably irradiate organs at risk and increase the likelihood of toxicity. We have demonstrated that large geometric errors occur frequently, but can be corrected accurately and reproducibly with IGRT, thereby providing opportunity to reduce treatment fields and toxicity. Without IGRT, geometric misses go undetected, leading to tumors receiving less radiation dose than intended. Improving the geometric accuracy of radiotherapy using daily IGRT can thus lead to the reduction of treatment field size that, in turn, may reduce toxicity or provide an opportunity to increase tumour dose, without encountering more toxicity than is clinically observed, and perhaps improve cure rates.

Imaging patients prior to every treatment, over the course of five to seven weeks of therapy, allows the detection of changes in the tumour size and location; hopefully, tumours shrink during therapy. Our team has indeed observed that this happens in most patients. Unfortunately, IGRT image quality is insufficient to clearly visualize tumour borders or nodal structures in a large proportion of patients, hindering quantitative monitoring of tumour response to therapy throughout treatment. IGRT can indicate that significant changes do occur, but not precisely or quantitatively in many patients. Such information is crucial in patient management. Imaging may provide early indication of toxicity and provide clinicians opportunities to mitigate these. Images can also indicate whether a patient responds well to treatment or not and provide an opportunity to revise the clinical goal. While IGRT images are of insufficient quality to perform these tasks, diagnostic imaging modalities may.

Our experience with high precision radiotherapy of the lung has stemmed a major research orientation in lung radiotherapy. First, a grant was obtained to acquire and analyse diagnostic quality images of the patient, combining respiratory-correlated CT and PET images, to monitor tumour response during concurrent chemotherapy and radiotherapy for locally-advanced lung cancer patients, and identify image-based metrics to predict response or to identify patients needing adaptation. Planning studies are being performed to identify strategies that might improve the therapeutic ratio for these patients. Another grant was obtained to optimise treatment parameters and identify therapeutic strategies that are robust not only to variations in the breathing patterns of patients, but also to patient-to-patient variability in tumour response.

Fourteen publications and two major grants have been obtained on high precision radiation therapy for lung cancer. Two graduate and nine postgraduate students have been involved in these projects. Twelve invited presentations have been done, on international, national,
Jean-Pierre BISSONNETTE

and local settings. In turn, the clinical practice of image-guided radiotherapy has been radically transformed at Princess Margaret Hospital and elsewhere. Routine treatment protocols have been drafted and are now standard of care, based on the research work (Appendix A). Records of several visitors wishing to learn of our team efforts are also included in Appendix A. The learnings from this work has been instrumental in developing and organizing the long-standing IGRT course, for which there is international demand, to the point that lung-specific courses have been offered.

2003 - present

Quality assurance and error elimination in radiation therapy.

Radiation therapy is a powerful and effective way to cure cancer, but has devastating implications when misused. Under dosing the tumour may lead to recurrence and overdosing normal structures may induce toxicity. In recent years, errors in radiation therapy have received a lot of worldwide media attention. The public’s confidence in this effective modality has been undermined by reported misuses of radiation in Canada, France, the UK, and the USA. Public enquiry into our field has deemed that, while radiotherapy can be considered effective and safe, it is not safe enough. Our field has been actively seeking methods to improve continually not only the safety of radiotherapy, but also the efficacy of delivery. Quality tools and learning systems that have been in use in fields of activity other than medicine are being examined, and the value of application of these tools to our field, ascertained. Quality improvement relies on a foundation based on standardization of practice, documentation of procedures, transparency, and the establishment of a “blame-free” culture. My first year as Physics Quality Assurance Officer was spent auditing the PMH Radiation Medicine Program, in terms of the quality of all acts conducted in the Radiation Medicine Program at Princess Margaret Hospital between decision to treat to the last treatment. This audit has lead to the production of a report, enclosed in Appendix B, describing recommendations that have profoundly changed the way the RMP operates and is frequently highlighted during accreditation and other quality audits. Changes have been made to the infrastructure of the RMP to formally recognize and devote resources to quality and error elimination initiatives. I have been coordinating the production and auditing of all drafted procedures to describe routine clinical practice; each procedure contains explicit acceptability criteria that help define quality expectations and clearly defines what goals are to be attained by the clinical staff. Another recommended initiative from the report is the monitoring of quality metrics and of incident reports to identify and eliminate potential hazards and improve efficiency of treatment delivery.

The same principles have been applied to ensure the safe and efficient implementation of novel practices and technologies at the RMP. Committees, such as the External Beam Process Committee, the Quality Assurance Monitoring Committee, and the SHERPA group have been set to revise and coordinate the necessary verifications and the drafting of protocols when major changes in practice were performed in a safe, transparent, and effective way. Personally, I have applied these principles for drafting the quality control protocols for image-guided radiation therapy (IGRT) devices. This approach, novel in our field, has resulted in my being invited to present this work at several national and international forums, drafting one review article, and chairing a task group for the American Association of Medical Physicists that has recently submitted a report to define standard guidelines for quality control of IGRT equipment; in addition, I have contributed to the design and commercialization of a phantom that has been designed to perform many of these quality control checks efficiently. At the national level, I have been a member of the Steering Committee of the Canadian Partnership for Quality Radiotherapy (C-PQR), a national initiative regrouping all disciplines involved in radiation oncology (i.e., the Canadian Association of Radiation Oncology, the Canadian Organization of Medical Physicists, and Canadian Association of Medical Radiation Technologists, and the Canadian Partnership Against Cancer). Funded by the federal government, the C-PQR is mandated to define, document, and audit quality across Canadian radiation therapy clinics. While I participate in all aspects of the C-PQR Steering Committee, my particular contribution has been to lead the drafting and revision of outdated quality control guidelines for radiotherapy equipment used in Canada. Using a consensual approach, I have implemented a novel method to keep all
quality control documents covering these equipments current and relevant to the practice of all Canadian clinics by initiating a two year review and approval process for each set of guidelines to account for changes in practice and technology. Furthermore, documents are field-tested prior to final endorsement. At this stage, two documents are ready for field-testing, and eight will be posted for external review in January 2012.

A key factor for sustaining successful quality initiatives is education and communication. To this end, I have enrolled in the University of Toronto – Faculty of Medicine Education Scholars Program, where I honed and acquired such as interactive teaching, andragogy, curriculum and course design, evaluation and feedback, qualitative research methods, and educational research based on simulation techniques. These skills have been put to recent use by designing a course on Quality and Safety that will begin in February 2012; the course description and objectives have been approved by the RMP.

Besides the aforementioned report, two peer-reviewed articles have been published to disseminate the knowledge we learned from our mistakes. Quality assurance principles have also been applied to the technology employed in radiation therapy, specifically to IGRT technologies. The work towards the resolution of quality and safety problems in radiation therapy has lead to the publication of six peer-reviewed journal articles and two book chapters. Contributions to the development of professional practices include the drafting and revision of national standards for radiotherapy equipment quality control endorsed by the Canadian Association of Provincial Cancer Agencies (a sample is provided in Appendix B); these standards are being revised, under my supervision, under the auspices of the Canadian Partnership for Quality Radiotherapy, a joint effort by the Canadian Organization of Medical Physics, the Canadian Association of Radiation Oncology, the Canadian Association of Medical Radiation Technologists, and the Canadian Partnership Against Cancer; one new guideline is included in Appendix B. I also have chaired the Task group #179 of the American Association of Medical Physicists; an international guideline for quality control for several IGRT devices has been tentatively approved for publication. Exemplary professional practice has been demonstrated by participation in several workshops and several invited talks in international meetings; recently, I have been visiting and supporting the Kuwait Regional Cancer Centre on a two week visit, mentoring the local staff on quality assurance and error elimination initiatives. Again, my expertise with quality improvement and error elimination in radiotherapy has been integrated in both the Radiation Oncology and Radiotherapy Physics Residency Programs at UT-DRO.

2003 - 2011 Supplementary Documentation (Quality assurance and error elimination in radiation therapy). Six peer-reviewed articles and three book chapters on QA.

2. CONTRIBUTIONS TO THE DEVELOPMENT OF PROFESSIONAL PRACTICES

High-precision radiation therapy for lung cancer (Contributions to the Development of Professional Practice).

Quality Assurance and error elimination in radiation therapy (contributions to the development of professional practice).

3. EXEMPLARY PROFESSIONAL PRACTICE

2012 Jul 1 - 2013 Jun 30 Accelerator-integrated Cone-Beam Systems for Verification Imaging. The Canadian Partnership for Quality Radiotherapy (CPQR) is an alliance among the
national professional organizations involved in the delivery of radiation treatment in Canada: the Canadian Association of Radiation Oncology (CARO), the Canadian Organization of Medical Physicists (COMP), and the Canadian Association of Medical Radiation Technologists (CAMRT), together with the Canadian Partnership Against Cancer (CPAC). The mandate of the CPQR is to support the universal availability of high quality and safe radiotherapy for all Canadians through system performance improvement and the development of consensus-based guidelines and indicators to aid in radiation treatment program development and evaluation.

This document is intended to provide a unified, national quality assurance framework for radiation treatment programs across Canada, and a set of quality indicators for monitoring programmatic performance. It is based on the premise that quality assurance is an essential element of good clinical care, and is intended to foster a culture of continuous quality improvement in radiation treatment programs across Canada. The guidelines and indicators are consistent with government of Canada and CNSC regulatory requirements and the recommendations of the World Health Organization, the American Association of Physicists in Medicine, other international professional organizations, and the Accreditation Canada Qmentum Program for Cancer Care and Oncology Services.

These “Technical Quality Control Guidance for Canadian Radiation Treatment Programs” documents highlight important elements of radiation quality assurance that should be common to all radiation treatment programs in Canada. They are not intended to replace detailed specifications, standard operating procedures or centre-based policies, but rather to support the development and maintenance of a national strategy for radiation treatment quality assurance. The ultimate objective is to assure the highest quality radiation treatment for all Canadians as an integrated element of overall cancer care, and minimize the risk of medical errors and untoward clinical outcomes. Responsibility for implementation of quality assurance programs and monitoring of quality indicators should be taken at the highest operational levels of all cancer treatment organizations and provincial cancer agencies.

These documents are extensively reviewed with the process described below.

Phase I: Planning and Evaluation
This phase includes the identification by QARSAC of documents requiring revision and/or updating based on feedback from the radiation treatment community and/or technical advances. It also includes the recruitment of expert reviewers and the scheduling of review timelines.

Phase II: Environmental Review and Document Revision
This phase consists of a review of existing guidelines, of literature and other evidence available to the reviewer. The reviewer will weigh all new material, consider the appropriateness of its incorporation into the guideline, and make modifications to the guideline as appropriate. Other necessary revisions and updates will also be made by the reviewer at this time.

Phase III: Community Review
This phase consists of a request for feedback on proposed revisions to the existing document by the medical physicist community and the broader radiation treatment community through CPQR and its partner organizations. Comments during this external review process will be solicited for a period of 30 days.

Phase IV: Refinement of TQC Guideline
This phase will be undertaken by QARSAC and the reviewer. It consists of considering feedback provided during the external review period and, if appropriate, integrating the comments into the existing document.

Phase V: External Validation (to be conducted in parallel with Phase VII)
If major changes were made to the existing guideline (e.g.: inclusion of a significant new test or prior deficiency to an existing test was corrected), then volunteer centres will be solicited to validate the new test criteria. The validation process will be circulated to identified Radiation Treatment Centres and will be conducted over a period not to extend beyond 3 months. Criteria for validation will include a combination of standardized questions as well as questions developed by the expert reviewer if needed.

Phase VI: Finalization of the TQC Guideline
This phase consists of considering the validation report prepared by individual centres during the previous phase and integrating changes where appropriate.

Phase VII Internal Review and Approval(to be conducted in parallel with Phase V)
The TQC Guideline under revision will be presented to QARSAC for review and approval. This phase will be repeated following the results of the External Validation review.
Adoption by all cancer programs in Canada is anticipated.

High-precision radiation therapy for lung cancer (exemplary professional practice).

quality assurance and error elimination in radiation therapy (exemplary professional practice).

1. RESEARCH STATEMENTS

Statement of Scholarly and Professional Activity. My scholarly and professional activities fall into three principle areas: (1) the application of quality tools, particularly statistical process control, in radiotherapy; (2) imaging for radiotherapy; and, (3) advanced medical physics practice in head and neck radiotherapy.

A fundamental component of the radiation medicine program is continuous quality improvement. This requires monitoring of the performance of our equipment and systems with statistical process control (SPC) to ensure that performance is within specification with minimal variation. I have applied SPC to the performance of our CT scanners as part of regular quality assurance, and have published on the application of SPC to IMRT dosimetry. As course director of the COMP Winter School of Quality and Safety in Radiation Oncology, I emphasize the application of quality principles in contemporary radiotherapy.

As the physics leader of the Advanced Simulation Program in the Radiation Medicine Program at Princess Margaret Hospital, I have overseen the commissioning of four CT scanners (including a PET-CT and combined SPECT-CT) and an MR-Simulator. My research in this area has been on the use of FDG-PET in head and neck radiotherapy, and serial imaging of lung cancers with FDG-PET.

In the head and neck site group, I have developed a process orientation to treatment planning and delivery that has increased the number of patients receiving IMRT from 10 per year to over 500 per year. Most of my continuing education activities are based on my...
experience in head and neck image-guided IMRT, and this practice extends to being physics
co-chair in national and international clinical trials, and leading the Cancer Care Ontario
Community of Practice for head and neck radiotherapy.

2009-present  Medical Physics, Editorial Board

STATEMENT OF SCHOLARLY ACHIEVEMENT

The focus of my scholarly and professional activity has been on deformable image registration including methods to integrate their use into dose calculations, image guidance, response assessment and developing quality assurance and validation methods. The demands of image registration began in the late 1990’s as multi-modality imaging for radiation treatment planning and image guidance at treatment delivery became increasingly available. Integration of these additional images into the treatment processes requires robust, accurate, and efficient image registration tools. As these imaging modalities developed, the information provided in them lead to the realization that rigid registration was often not sufficient to resolve the complex changes that the soft tissue was undergoing between imaging and treatment sessions.

In 2003, I developed a research program focused on the development of a novel deformable modeling technique using biomechanical models and finite element analysis. The technique, which is substantially different than the widely available deformable image registration algorithms that rely on image intensity, incorporates the biomechanical properties of tissues to model the complex interaction of neighboring tissues and tumors. The application has been tested and validated on a number of anatomical sites including head and neck, lung, breast, esophagus, liver, pancreas, stomach, cervix, prostate, and rectum. The development of this technique has lead to the need to perform validation on its accuracy prior to its integration into clinical practice. In addition to developing validation techniques, I created a deformable registration accuracy consortium, which consists of 23 academic institutions and industry partners throughout the global radiation oncology community. I also serve as a member of the international task group to develop a report on the acceptance of registration algorithms. The success of my biomechanical model-based algorithm has generated interest for collaborations with international academic partners as well as cooperative groups such as the Radiation Therapy Oncology Group (RTOG).

The application of my algorithm has been pursued in therapy applications, specifically focused on radiation therapy. These have included incorporating breathing motion into dose calculations, integrating multi-modality imaging for treatment planning, deformable registration for image guidance, and quantifying treatment response. My research pioneered the investigation of breathing motion and deformation into radiation therapy dose calculations, indicating the necessity for including deformation to achieve the level of accuracy expected for these applications. These discoveries have also raised many questions, such as: which imaging modality, or combination, correctly identifies the tumour boundary? I have developed a research program in correlative pathology (deformable registration between histology and in vivo images) to investigate this issue. To understand the changes in the material properties during fixation, I have also begun to research the application of magnetic resonance elastography (MRE). The MRE research has also enabled an additional research focus on small animal imaging and intervention to evaluate radiation and drug
response, which will improve our understanding of these complex changes for applications in human clinical studies.

As an educator, I have had the opportunity to supervise and mentor several students and post-doctoral fellows, as well as teaching formal classes and continuing education lectures. My current research group consists of 3 graduate students, 3 research assistants, and 2 post-doctoral fellows, which enables a dynamic and interactive learning environment. I have been inspired by my supervisors at the University of Michigan and my mentors here at Princess Margaret Hospital to develop an environment that promotes scholarly achievement, clear presentation of research, and development as an independent researcher. The role of physicists in medicine is expansive, including teaching, research, clinical contribution, and innovation in technology. As a board certified physicist in medicine, I have focused on maintaining close integration with the clinic to enable translation of my research into the clinic. This has lead to several successful translations of my research into the clinic, specifically in prostate and liver, where deformable image registration is currently ensuring that patients are receiving their intended precise treatment.

RESEARCH GRANTS

Currently Funded as Principal Investigator

Brock KK. Investigation of the inclusion of motion and deformation in dose calculations for external beam radiotherapy. Dean’s Fund, University of Toronto. $9,801.40, 2005-2010.

RESEARCH SUPERVISION

Undergraduate

2004 Supervised undergraduate summer research student (P. Wong, creation of deformed image sets from finite element model-based image registration) Awarded the H.E. Johns Studentships in Medical Physics

2005 Supervise undergraduate summer research student (L. Harild, sensitivity of finite element model parameters on deformable image registration) Awarded the H.E. Johns Studentships in Medical Physics

2006 Supervised undergraduate summer student (T. Nguyen, population models of organ deformation and deformation models using limited information)

2008 Supervision of undergraduate summer student (A. Zasowski, validation of deformable registration performance on small animal imaging) Awarded the H.E. Johns Studentships in Medical Physics Submitted abstract to International Conference on Translational Research 2009

Graduate Students

2005 – 2006 Co-supervise medical school summer student (J. Hensel, prostate deformation using finite element modeling) Published manuscript in 2007
Supervision of Masters student (T. Nguyen, population models of organ deformation and deformation models using limited information)
Published conference proceeding in 2008, manuscript in 2009, 2 oral presentations at international meetings

2006 - 2009

Supervision of Masters student (J. Niu, experimental validation of mathematical models to include deformation into dose accumulation in radiotherapy)

2006 - 2009

Supervision of Masters student (M. Velec, deformable dose accumulation of liver cancer patients treated with SBRT)

2009 --

Supervision of Masters student (M. Velec, deformable dose accumulation of liver cancer patients treated with SBRT)

2009 --

Supervision of Doctoral student (T. Nguyen, online modeling of organ motion using limited information)

2010 --

Supervision of Doctoral student (N. Samavati, deformable registration of histology to in vivo imaging)

Post-doctoral Fellows

2003 – 2006

Supervised post-doctoral fellow (SM Kim, deformable image registration using finite element modeling)
Presentation at international meeting in 2005

2008 --

Supervised post-doctoral fellow (R Vlad, correlative pathology for in vivo imaging validation)
Awarded the Campbell Family Research Institute Award in Prostate Cancer

2008 --

Supervised post-doctoral fellow (D McGrath, Magnetic resonance based elastography for evaluating tissue material properties)

Thesis Committees

1. EDUCATION

Degrees
2004 PhD, Medical Physics, Physics, Carleton University, Ottawa, Ontario, Canada
1991 MSc, Medical Physics, Physics, Queen’s University at Kingston, Kingston, Ontario, Canada
1988 BSc, Engineering, Dept of Engineering Physics, Queen’s University at Kingston, Kingston, Ontario, Canada

Postgraduate, Research and Specialty Training
2005 Medical Physics Resident, The Ottawa Hospital Regional Cancer Center, Ottawa, Canada

Qualifications, Certifications and Licenses
2006 - present Canadian College of Physicists in Medicine, Canada

2. EMPLOYMENT

Current Appointments
2009 Feb - present Assistant Professor, Radiation Oncology, Faculty of Medicine, University of Toronto, Toronto, Ontario, Canada
2008 - present Medical Physicist, Department of Medical Physics, Carlo Fidani Peel Regional Cancer Centre, Credit Valley Hospital, Mississauga, Ontario, Canada
2008 - present Radiation Physicist, Radiation Medicine Program, Princess Margaret Hospital, Toronto, Ontario, Canada
Previous Appointments

HOSPITAL
2008 - 2013  Medical Physicist, Carlo Fidani Peel Regional Cancer Centre, Credit Valley Hospital, Mississauga, Ontario, Canada
2005 - 2008  Medical Physicist, Cross Cancer Institute, Edmonton, Alberta, Canada
1999 - 2000  Medical Physicist, Centre hospitalier des vallées de l’outaouais, Gatineau, Quebec, Canada

RESEARCH
1991 - 1994  Research Assistant, Dept of Metallurgy and Materials Science, Queen’s University at Kingston, Kingston, Ontario, Canada

UNIVERSITY
2006 Sep - 2008  Assistant Professor, Oncology, University of Alberta, Edmonton, Alberta, Canada

INDUSTRY
1994 - 1999  Linear Accelerator Engineer, Mevex Corporation, Ottawa, Ontario, Canada

3. HONOURS AND CAREER AWARDS

Distinctions and Research Awards

LOCAL
Received
2003  Professional Scholarship, Canadian Council of Professional Engineers, Ontario, Canada. (Scholarship)
  Total Amount: 7,500 CAD

Teaching and Education Awards

LOCAL
Received
2015  Innovation in Cancer Education, Dept of Radiation Oncology, Faculty of Medicine, Princess Margaret Cancer Centre, Toronto, Ontario, Canada. (Continuing Education)

RESEARCH PROJECT

Radiobiology.
TCP modelling, Cell survival modelling, modelling of hypofractionation.

Linear Accelerator.
MRI integration, Engineering of magnets suitable for MRI imaging but that can also support the operation of a linear accelerator within its magnetic field. Dose deposition in the presence of a magnetic field.

Quality for Radiation Oncology.
Using Quality Industry methods to improve quality and system performance in Radiation Oncology.

INDUSTRY COLLABORATION

2010 - present Sun Nuclear Corporation.
Development of the MRgRT (MR guided Radiotherapy) project with IMRIS (Winnipeg, MB) and Varian (Paolo Alto, CA). Co-development of a safety system for an integrated MRI and radiotherapy environment. Co-development of image guidance and registration system for MR guided radiotherapy. This work included two visits to IMRIS (November, 2010 - to discuss the contractual agreement between IMRIS and UHN) and September, 2011 – to discuss the clinical workflow for the MRgRT system). As well, I participated in weekly meetings and teleconferences with IMRIS and Varian personnel to discuss the overall project development.

2012 Sun Nuclear Corporation, Melbourne, Florida, United States.

2010 Sun Nuclear Corporation, Melbourne, Florida, United States.
Invited by Sun Nuclear Corporation for a visit to discuss improvements to Daily QA3 radiation detector. February 2010.

2010 Sun Nuclear Corporation, Melbourne, Florida, United States.
Invited by Sun Nuclear Corporation for a visit to advise the company on product direction of their product “ATLAS”. March 2010.

C. Academic Profile

1. RESEARCH STATEMENTS

Statement of Scholarly and Professional Activity.
The field of medical physics is currently a crossroad, where education requirements for medical physics graduate students and residents are transitioning from a less formal approach to one where entry into the medical physics field will be controlled by accredited education programs. At the same time, our health care system is being driven to higher efficiencies due to limited financial resources in the health care sector. This presents a unique opportunity for Medical Physicists to contribute more meaningfully in the delivery of health care. I have used my work with the Canadian Organisation of Medical Physicists (COMP) to improve professional practice in medical physics and radiation oncology at the national level through the COMP Winter School. This is a multi-professional conference focussed on safety and quality in radiation oncology. I intend on continuing to work in medical physics professional development at the national level with my continued involvement with COMP (as
president-elect), where I will advocate for better leadership training within the medical physics profession by introducing yet more professionally oriented continuing education courses. Lastly, I also hope to increase the profile of Canadian medical physics on the world stage through the World Congress of Biomedical Engineering and Medical Physics, which will be held in Toronto in 2015 and co-hosted by COMP.

X-ray based imaging, while it has been very useful at advancing the science of radiation oncology, is fundamentally limited due to its poor soft tissue contrast. I have now been involved with two groups that are developing MRI guided radiotherapy, and have worked on both the fundamental problems of technology integration as well as the clinical workflow and clinical integration issues involved in integrating radiotherapy and MRI. My interests in this area have been in radiofrequency interference between the two devices, and magnetic de-coupling of the MRI from linac. My current interests include the surface dose from the in-line systems and the overall safety issues of clinical systems. Introduction of exquisite soft-tissue image guidance in radiotherapy has the potential to fundamentally change fractionation in radiotherapy, where the ability to guide on soft tissues will further reduce volumes irradiated and make way for reduced fractionation schemes and hypofractionation. I am also interested in using my radiobiological modelling experience to further optimise hypofractionation in the MRI-linac systems.

Use of MRI in Radiotherapy.

X-ray based imaging, while it has been very useful at advancing the science of radiation oncology, is fundamentally limited due to its poor soft tissue contrast. I have now been involved with two groups that are developing MRI guided radiotherapy, and have worked on both the fundamental problems of technology integration as well as the clinical workflow and clinical integration issues involved in integrating radiotherapy and MRI. My current interest is to develop optimization tools to improve workflow and procedure accuracy in pelvic brachytherapy (prostate HDR and GYNE HDR). With MRI, the improved imaging leads to an improved ability to discriminate target and at risk tissues, however the penalty is that the current methodology is very inefficient at catheter localization, which leads to inefficient workflows and longer procedure times. The goals of this research are to build implant techniques that will continually optimize the implant despite catheter deflections, which are common in MR guided insertions. As well, we hope to include the pre-existing external beam planning in the overall optimization problem.

Improved use of magnetics in radiotherapy.

I have built a laboratory where we have shown that relatively low magnetic fields (0.25T), which can be produced using resistive magnets, can increase the surface dose of a 60Co beam by a factor of 2.8. Our group believes this effect is due to the focusing effect of the magnetic lens on scattered electrons that are airborne, however we have not yet been able to identify the source of scattered electrons. The purpose of this research is to understand how focusing or de-focusing magnetic fields can be used to either increase surface dose, which could be used as a means to replace bolus, or to reduce surface dose, which would have significant impact on many radiotherapy siting where surface dose still can cause important skin complications after radiotherapy treatment.

Radiosensitivity in a Magnetic Field.

MRI-linac systems are now available for purchase from both Elekta and Viewray. One of the many questions not yet known about these systems is if cell radiosensitivity is affected by a magnetic field. There are several potential mechanisms where a magnetic field may affect cell radiosensitivity, including: i) increased DNA fragment generation in a magnetic field and ii) altered DNA covalent bond structure because of energy level changes due to the magnetic field. Along with colleagues at Princess Margaret, we have built an experiment designed to irradiate V79 Chinese Hamster lung fibroblast cells with a 7T small bore MRI using low dose rate 192Ir seeds. The first experiments are scheduled to start in early June 2016.

H. Teaching and Design

1. INNOVATIONS AND DEVELOPMENT IN TEACHING AND EDUCATION

Simulation software for teaching linear accelerator physics, Faculty of Medicine, Dept of Radiation Oncology

As an aid to teaching Linear Accelerator technology, I developed software that can simulate a simplified service mode of a Varian style linear accelerator. The software takes as inputs common voltages and currents for typical linac components (klystron, electron gun, modulator, etc) and calculates dose rate in a water phantom as well as beam profiles typically measured with a water tank. It has been used 4 times in a teaching environment, and has won numerous teaching innovation awards at Princess Margaret Cancer Center and the University of Toronto. It has been accepted in the finals of the Innovation in Medical Physics Education competition at the AAPM meeting in August 2016. The software is freely available at simaclinac.com.

2013 Mar 4 - 2013 Mar 7 Accelerator Technology Education Course, Faculty of Medicine, Dept of Radiation Oncology, Princess Margaret Cancer Centre

2012 Teaching Innovation at McGill University, Graduate Education, Faculty of Medicine, Dept of Radiation Oncology

A presentation that I did at COMP: [Carlone MC. Compensation of missed fractions without knowledge of radiobiological parameters. Med Phys 36: 4323, 2009] was well received by Michael Evans, who is a Medical Physicist at the McGill University. He asked for my slides, which he now uses in Medical Physics resident teaching at McGill University. This abstract was converted to a publication: [M. Carlone, Compensation Of Missed Fractions Without Knowledge Of Radiobiological Parameters, Medical Dosimetry, Volume 36(4), 429 – 433, 2011]. A letter of support from Michael Evans is available.

2011 Linear Accelerator Technology Course at Princess Margaret, Faculty of Medicine, Dept of Radiation Oncology

I have been the course director for an Accelerator Technology Education Course (ATEC), offered through the Accelerated Education Program at Princess Margaret Cancer Center since 2011. The purpose of this course is to give a basic understanding of the principles of operation of medical linear accelerators at the level of physics residents and beginner accelerator service personnel. The high level objective is to give medical physicists and accelerator service people the communication tools so that they can effectively collaborate on maintaining proper operation of linear accelerators in modern cancer clinics. The course is meant to fill the gap between the theoretical mode of operation of medical linear accelerators that physicists are taught in residencies and the practical skills that accelerator service people are taught at vendor training.

2009 COMP Student Council, Faculty of Medicine, Dept of Radiation Oncology, Canadian Organization of Medical Physicists (COMP)
In 2009, COMP initiated a student council, which has the mandate of providing medical physics students in Canada with a better voice within the Canadian Medical Physics community. As the Chair of COMP’s Science and Education Committee, I provided the resources to start this group, starting with organisational support, providing information to interested students, and organising an election for the inaugural Chair. Two candidates came forward, and both were equally committed and passionate, so I suggested that they become co-chairs of the student council (instead of having an election), which they did. These were Alejandra Rangel and Nadia Octave. I provided support for them, and helped them draft terms of reference, budgets for their annual meeting and helped them create a structure for their committee. The principle achievement for this group was a COMP sponsored exchange for senior Canadian Ph.D. students in Medical Physics; students who are close to obtaining their Ph.D. The travel award is to allow students to travel to the lab of a collaborator, and learn from a different environment. Letters of support are available from both Alejandra Rangel and Nadia Octave.

Canadian Winter School on Quality and Safety, COMP Winter School
I was the founder and course director for the first two years of the COMP Winter School on Quality and Safety in Radiation Oncology. This course was offered for the 7th consecutive time in 2016 with the same essential elements as the original offering. It has been attended by radiation oncology professionals from almost every cancer centre in Canada and has also had attendees from many US centres, Europe, Asia and Australia. The two ideas that this course was built on were (a) that quality and safety in radiation oncology can only be improved by a collaborative effort between all three professional disciplines: physicists, radiation oncologists and radiation therapist; and (b) that important tools for improving quality and safety in radiation oncology could be learned from other fields including process engineering, human factors, system design, medical ethics and law. The courses have featured faculty from across Canada and the United States and include engineers, bioethicists, radiation oncology professionals and lawyers. A driving focus of this course has also to foster a learning environment where open discussion is encouraged such that attendees of the course can learn from each other through multidisciplinary interactions. The course has also been successful in attracting regulators (the CNSC has been a major sponsor), as well as industry and managers of radiation medicine programs.

C. Academic Profile

1. RESEARCH STATEMENTS
2008 - present  Statement of Scholarly and Professional Activity.
Since October 2008, I have been working full time as a medical physicist at the Odette Cancer Centre (OCC). At the OCC, I am the primary resource physicist for patient specific IMRT quality assurance, the Mosaiq RV system and the head and neck (HN) site group. In addition, I have over four years of experience in various aspects of clinical practice including plan checking of 3D conformal, Tomotherapy, IMRT, prostate LDR and prostate HDR as well as machine quality assurance of linear accelerators and CT simulators. I am also part of a physics consult rotation that helps to troubleshoot planning issues, pacemaker dose, time-dose-fractionation calculations and reconstruction of previous dose distributions for patient re-treatments.

The experience gained through daily clinical involvement has lead to 13 different supervised clinical research projects since 2012 for 4th year Ryerson Medical Physics, therapy and summer students. These projects include innovations in adaptive re-planning for pancreatic and HN patients, automated plan check quality assurance of treatment plans and beam...
segments, optimal pass criteria for IMRT QA and in vivo EPID dosimetry. The software and protocols from these projects has often been implemented immediately into our clinic.

Beyond the clinic, I am also actively involved in a number of funded research projects. As part of the OCAIRO consortium, I am the primary investigator for a study investigating adaptive strategies for pancreatic patients using Tomotherapy and daily MVCT imaging. I am also a co-investigator of a CBCF grant with Dr. Greg Czarnota assessing diffuse optical tomography and spectroscopy of breast cancer patients for monitoring early chemotherapeutic response. Finally, my Ph.D. work in interstitial optical monitoring of thermal ablation is currently being evaluated for on-line clinical intervention of prostate cancer patients.

In summary, I believe that my combination of practical clinical insight and active involvement in developmental research will make me a productive asset to the Department of Radiation Oncology (DRO) at the University of Toronto.

1. EDUCATION

Degrees
1993 - 1999 PhD, Mechanical Engineering, Korea Advanced Institute of Science and Technology, Taejon, Korea, Republic Of
1991 - 1993 MSc, Mechanical Engineering, Korea Advanced Institute of Science and Technology, Taejon, Korea, Republic Of
1987 - 1991 BSc, Mechanical Engineering, Hanyang University, Seoul, Korea, Republic Of

Postgraduate, Research and Specialty Training
2002 - 2004 Physics Resident, Princess Margaret Hospital, Toronto, Ontario

Qualifications, Certifications and Licenses
2006 CCPM Certificate, Canadian College of Physics in Medicine

2. EMPLOYMENT

Current Appointments
2006 - present Assistant Professor, Radiation Oncology, University of Toronto, Toronto, Ontario
2004 - present Radiation Physicist, Princess Margaret Hospital, Toronto, Ontario
3. HONOURS AND CAREER AWARDS

Distinctions and Research Awards

NATIONAL
Received

2008  Best Oral Presentation, Co-author, Canadian Organization of Medical Physicists. (Distinction)
For “On-line Dynamic Contrast Enhanced Cone-Beam CT for Measuring Changes in Tumor Perfusion due to Radiation Therapy”, presented at annual meeting.

2004  J.R. Cunningham Award for Excellence in Physics Research, Canadian Organization of Medical Physicists. (Research Award)

LOCAL
Received

2013 Jul - 2014 Jun  Research Productivity, Radiation Medicine Programme. (Research Award)

1991  Honour of Excellency, University of Hanyang, Seoul, Korea, Republic Of. (Distinction)

Teaching and Education Awards

LOCAL
Nominated

2013 Jul - 2014 Jun  UT DRO Education Award, Postgraduate Advocacy & Mentorship, Dept of Radiation Oncology, Faculty of Medicine, Ontario, Canada. (Postgraduate MD)
The awards embody our goal of excellence in Education Programs administered by the Department of Radiation Oncology, University of Toronto and show appreciation for individuals who have contributed and demonstrated exceptional educational abilities.

Student/Trainee Awards

INTERNATIONAL
Received

2014 Aug - 2015 Aug  Best in Physics, Co-supervisor, Awardee Name: Yifang Liu. Dep of MIE, Univ. of Toronto

LOCAL
Received

2013 May  Best Oral Presentation, Co-supervisor, Awardee Name: Yifang Liu. Dep of MIE, Univ. of Toronto

2005 Jul - 2006 Jun  Howard Johns Summer Studentship, Co-supervisor with Ivan Yeung, Awardee Name: Chen, Sam. Princess Margaret Hospital, Toronto, Ontario, Canada

Nominated
2008 Jul - 2009 Jun  Howard Johns Summer Studentship, Supervisor, Awardee Name: Zhang, Angela.  
Princess Margaret Hospital, Toronto, Ontario, Canada  
Virtual simulation of Frame Setup for Gamma Knife.

C. Research Funding

1. GRANTS, CONTRACTS AND CLINICAL TRIALS

PEER-REVIEWED GRANTS

FUNDED

NON-PEER-REVIEWED GRANTS

FUNDED

2014 Nov - 2015 Oct Principal Investigator. Retrospective Planning Study using Multiple Hybrid iso-centres. Collaborator(s): Dr Normand Laperriere Dr Caroline Chung Dr Hodaie Mojgan. [Clinical Trials] The aim of this study is to evaluate the feasibility and usefulness of the new treatment technique, multiple hybrid iso-centres for radiosurgery of trigeminal neuralgia in gamma knife Perfexion.

2008 - 2009  **Co-Investigator.** Retrospective quantitative analysis examining the relationship between bladder volume and radiation induced acute GU toxicity throughout treatment for gynecologic patients. 08-1057-AE. PI: Kelly V. Collaborator(s): Austin J, Rosewell T, Li W, Xie J, Milosevic M, Fyles A. [Clinical Trials]

2006  **Co-Investigator.** Exploring the role of 3T MRI in gamma knife radiosurgery: a pilot study. 06-0427-CE. PI: Menard C. Collaborator(s): Mikulis D, Damyanovich A, Bernstein M, Zhang B. [Clinical Trials]

I. Creative Professional Activities

1. CONTRIBUTIONS TO THE DEVELOPMENT OF PROFESSIONAL PRACTICES

2011 Jul - 2012 Jun Korean Fall Community Forum 2011. The event is dedicated to “Understanding Our Community and Higher Education”. It is jointly organized by the Toronto Korean Families Study (TKFS) and the Korean-Canadian University Professors Forum (KCUPF) with generous support from the Consulate General of The Republic of Korea in Toronto and the Korea Times Daily.
A. Date Curriculum Vitae is Prepared: 2016 August 11

Only includes Activities from January 2011 to August 2016

B. Biographical Information

1. EDUCATION

Degrees
1995           PhD, Physics, University of Hong Kong, Hong Kong
1992           BSc, (First Class Hon.) in Applied Physics, City University, Hong Kong

Postgraduate, Research and Specialty Training
1998 - 2000    Postdoctoral Fellow, McMaster University, Hamilton, Ontario, Canada
1997 - 1998    Postdoctoral Research Assistant, University of Toronto, Toronto, Ontario, Canada
1995 - 1997    Croucher Postdoctoral Research Fellow, Interdisciplinary Research Centre in Superconductivity, University of Cambridge, Cambridge, Cambridgeshire, United Kingdom

Qualifications, Certifications and Licenses
2007 Jul - present    Fellow of the Canadian College of Physicists in Medicine (FCCPM) in Canada, Canadian College of Physicists in Medicine, Canada
2003 Jul - present    Member of the Canadian College of Physicists in Medicine (MCCPM) in Canada, Canadian College of Physicists in Medicine, Canada
2003 Jul - present    Peer Review A certification, Cancer Care Ontario, Ontario, Canada
2003 - present        Chartered Scientist certification, Science Council, United Kingdom
1999 - present        Professional Physicist certification, Canadian Association of Physicists, Canada
1996 - present        Chartered Physicist certification, Institute of Physics, United Kingdom
                        European Register of Physicist certification, European Physical Society

2. EMPLOYMENT

Current Appointments
2006 - present    Assistant Professor, Radiation Oncology, University of Toronto, Toronto, Ontario, Canada
2005 - present    Medical Physicist, Radiation Medicine Program, Princess Margaret Cancer Centre, Toronto, Ontario, Canada
3. HONOURS AND CAREER AWARDS

Distinctions and Research Awards

INTERNATIONAL

Received

2015 Outstanding Reviewer of 2014, American Society for Radiation Oncology. (Distinction)
“Vous are one of a small group who have earned this award by your readiness to review, the timeliness by which you complete the reviews, and by the thoughtful, in-depth, and professional way in which you conduct them. You have come to be relied upon by our editors and, whatever the final decision, our authors will benefit from the comments and observations you make. The journal is only as good as its peer reviewers and we are lucky to have you on our team.”.

2014 Certificate of Excellence in Reviewing, American Society for Radiation Oncology. (Distinction)

2014 Top 25 best referees in the Physics in Medicine and Biology Journal, Institute of Physics (UK). (Distinction)

2012 Outstanding Reviewer of 2012 in the International Journal of Radiation Oncology Biology Physics, American Society for Radiation Oncology. (Distinction)

2012 Outstanding Reviewer of Medical Physics Journal, American Association of Physicists in Medicine. (Distinction)

2011 Top 20 best referees in the Physics in Medicine and Biology Journal, Institute of Physics (UK). (Distinction)

LOCAL

Received

2013 Research Productivity 2013 Award, Princess Margaret Cancer Centre. (Distinction)

2011 Research Productivity 2011 Award, Princess Margaret Cancer Centre. (Distinction)

C. Academic Profile

1. TEACHING PHILOSOPHY

Teaching is my passion. It has always been a most rewarding experience seeing how my students made progress and went on to develop a career of their choice. The cornerstone of my teaching philosophy is to engage students in active, participatory learning, accommodating to their varied learning levels to enhance student achievement. I believe in culturally responsive pedagogy, and my classrooms are inclusive. From teaching, I also gain personal satisfaction from students’ positive feedback, and learn how to improve my own research from the problems the students encountered. My teaching philosophy is developed from my experiences as a learner, a teaching assistant and a teacher.

My lectures are interactive. My students know that I am there to help them to learn, and they have to be serious learners and active participants. I keep good eye contact to the students and respond promptly to their questions. Through interacting with the students I can determine what I shall need to adjust and improve in my presentation, as each student
and each class is different. I have to accommodate my teaching to the students’ varying learning levels to clarify technical and practical material so that deep-learning occurs. I make use of technologies and encourage students to use advanced online tools such as the Google search engine in learning. I teach them how to verify the searched results and identify the best answers. After the lecture, I am always available online to provide prompt feedback to students regarding questions in the lecture via email.

As a Medical Physicist teaching Radiation Science class, in addition to explain advanced technologies, I also make sure my students acquire basic critical thinking and problem solving skills that will be used on a daily basis. When I ask a student to solve a problem, I not only require him/her to do the job, but s/he should think why s/he should do so. For example, when I ask a question in the lecture, every student not only needs to write down his/her answer, but also need to discuss with his/her neighbor the reason. Through peer discussions, they can think carefully why they need to perform the solution. They can also learn communication and critical thinking skills through comparing their results with others. This teaching tactic is especially useful for students who are shy to speak up. An active learning environment will therefore be created and developed, where students feel comfortable to discuss questions and to participate in classroom activities.

For the course content, I included every concept in a broad knowledge structure for Radiation Science, so that the students can understand the big picture of the idea. In the lecture, I teach the students to solve problems by breaking complicated scenarios into simple steps where big ideas are clear. I look for exciting demos and fun facts to explain the complicated algorithm so that students can be kept engaged. For home assignment and examination, I require the students to explain and illustrate their work. They not only need to write down the mathematical equations but also a short paragraph describing how to apply the equations step by step to obtain the result. My students are active learners who are not only learning a course, but also acquire critical skills that will be useful throughout their lives.

2. CREATIVE PROFESSIONAL ACTIVITIES STATEMENT

I completed my Medical Physics Residency training in the London Regional Cancer Centre, London in 2002 and worked in the Grand River Regional Cancer Centre, Kitchener as a Medical Physicist from 2002 to 2005. I then moved to the Princess Margaret Cancer Centre, Toronto as a Medical Physicist in 2005, and was appointed Assistant Professor in the Department of Radiation Oncology at the University of Toronto in 2006. I am a medical researcher in radiation dosimetry and computer calculation. During the early years of my appointment, my interest was mainly in the Monte Carlo simulation on photon and electron beams. My goal was to develop a precise and accurate radiation dose delivery process for cancer patients, so that required dose coverage prescribed by the Radiation Oncologist can be achieved at the tumour target sparing the surrounding normal tissues.

My objectives are to employ Monte Carlo simulations using computer codes such as the EGSnrc and Geant4, to predict radiation dose within highly and small irregular human heterogeneities. The simulations carry out a history-by-history charge particle transport simulation in various materials with different morphologies. Unlike other commercial semi-empirical/analytic dose calculation algorithms such as the pencil beam and convolution/superposition, Monte Carlo simulation is independent of the assumption of electronic equilibrium and therefore provides superb accuracy. Monte Carlo method has been well known (Rogers Phys Med Biol 51:R287, 2006) as a benchmark in predicting dosimetry in a heterogeneous system containing soft tissue, air and bone.

From 2006 to 2016, I led a research program performing Monte Carlo simulations on dosimetric studies. I have published my results with my team members including faculties, graduate and undergraduate students. The objectives of my research program are (1) macroscopic radiation dosimetry (millimeter scale) for radiotherapy; and (2) nanoscopic radiation dosimetry (nanometer scale) for nanoparticle-enhanced radiotherapy. The former produced useful dosimetric results in the kilovoltage cone-beam computed tomography, small-animal irradiation, and heterogeneous correction in dose calculation leading to professional innovations in image-guided radiotherapy and preclinical irradiation. The latter provided dosimetric results based on the photon and electron interactions with the irradiated gold nanoparticle. This establishes the base to configure the best strategy in the novel gold nanoparticle-enhanced radiotherapy.

In carrying out my research program, basing on the above-mentioned objectives, I designed the experiments in radiation dosimetry and computer calculations in Monte Carlo simulations. Once we collected the raw data, I led the team to organize and analyse it. Finally, with contributions from my team, I prepared the related figures, tables and wrote the manuscript/abstract for submission to the International peer-reviewed journal for publication or International meeting for presentation.
My research program resulted in the following impacts:

(1) For my work on the radiation dosimetry in radiotherapy, my group carried out Monte Carlo simulations of kilovoltage photon beam for the image-guided radiotherapy. We used Monte Carlo simulation to calculate the imaging dose due to kilovoltage cone beam computed tomography and included such dose in the prostate radiation treatment plan. We proved that the imaging dose from the cone beam computed tomography would only slightly affect the final dose distribution in the prostate intensity modulated radiotherapy. For the dose calculation of preclinical radiation treatment plan, we developed and published a graphical user interface (DOSCTP) for Monte Carlo treatment planning (Chow et al Med Phys 34:4810, 2012), and a user interface (FFD4D) for four-dimensional computed tomography image voxel-tracking using the free-form model (Markel et al J Phys CS 385:012001, 2012). These graphical user interfaces have been circulated among different universities, research institutes and hospitals in North and South America, Europe and Asia, being tools for Radiation Physics and Medical Dosimetry studies. Apart from the above highlighted works, we carried out Monte Carlo studies on human heterogeneities such as lung and bone, electron backscatter from lead, MOSFET dosimeter, Solid Water, preclinical irradiator design, treatment planning commissioning, photon energy spectra of flattening-filter-free photon beam and so on.

(2) For Monte Carlo simulation on gold nanoparticle irradiated by radiation beams, result of photon beam was published in Leung et al (Med Phys 38:624, 2011) and was selected for the January 2011 issue of Virtual Journal of Biological Physics Research due to its excellence. Moreover, this work was the top 20 most downloaded articles in the Medical Physics Journal (January 2011). In this work, we found that for a cell of typical size, a low energy (35 keV) x-ray generates much more secondary electrons when a gold nanoparticle is present, and will have sufficient range to cause damage in the cell where the nanoparticle is uptaken. There are a lot of related works following our findings and the above paper has been cited over 100 times. Afterwards, we focused on the interaction between the electrons and irradiated gold nanoparticle (Chow et al Phys Med Biol 57:3323, 2012). Comparing to the photon irradiation, electron irradiation was found not better as the yield of secondary electrons per unit mass of gold is less than water. These works provide valuable information in the innovation of gold nanoparticle-enhanced radiotherapy, particularly in the selection of the gold nanoparticle size, shape, concentration, radiation type and energy in radiotherapy.

A number of international peer-reviewed papers were published followed by presentations in the national/international Medical Physics meetings. Impacts of the above works can be reflected by my invitations as senior editor, editor, guest editor and referee in international peer-reviewed journals, reviewers in national/international meetings, reviewers in research grant proposals, speakers of invited seminars and talks, writer or co-writer of book chapters and committee members in the professional organizations. Moreover, I was recognized by some awards such as the top referees in the international journals and research productivity awards. Through these activities, I learned and updated works from other groups to expand my research horizons.

1. MOST SIGNIFICANT PUBLICATIONS

This is the first study of the secondary electron production from a gold nanoparticle irradiated by electron beams using Monte Carlo simulation. We proved that electron beam in the presence of gold nanoparticle does not seem to be better than photons as the yield of secondary electrons per unit mass of gold is less than water. Cited by 27.

This is the first work to study the characteristics of secondary electrons generated by a gold nanoparticle with photons. We found that irradiation of the gold nanoparticle at photon energy of kV range will be more efficient for cell killing. Cited by 109.

G. Teaching and Design

My role, as a teacher, is to facilitate learners in their achievement of the goals they have set in their education. This facilitation includes assisting learners to examine the profession and practice of Medical Physics. In Princess Margaret Cancer Centre, I am actively involved in both course teaching and student supervision.

From 2007 to 2016, I contributed to the Medical Radiation Science Program by teaching the Radiation Science I course (Michener Institute course code: RSRT310 and University of Toronto course code: MRS142H1). There were about 50 - 70 students in the class every year and I taught about half of lectures in the course from every September to December since 2007. The topics include the Structure of Matter and Radiation Types, Photon Beam Characteristics, Radiation Dosimetry, Radiation Therapy Machines and Physics of Radioactivity. This teaching work was challenging because it was a first year undergraduate course. Students taking the course were green and did not have the related Radiation Physics and Science background.

In September and October 2012, I also delivered two lectures in the Radiation Therapy Devices course (Ryerson University course code: BME 704) as an invited lecturer. This course covered the Radiation Producing Equipment, Character of Photon and Electron Radiation Beams, Radiation Dose Functions, Computerized Radiation Treatment Planning and Quality Assurance. This course was for the third or final year undergraduate students who had related Medical Physics knowledge.

For my research supervision, I supervised 6 summer students in the Department of Medical Physics in the Princess Margaret Cancer Centre. I also supervised 13 undergraduate thesis students from the Department of Medical Physics of Ryerson University and 2 undergraduate thesis students from the Division of Engineering Science of University of Toronto. I supervised one Postdoctoral Fellow and one PhD visiting student in the Princess Margaret Cancer Centre. This training of highly qualified persons was very productive: we produced over 27 international peer-reviewed papers and over 65 conference abstracts/papers. Some of my students are now Assistant Professor at University of Gujrat, Pakistan, Medical Physics Resident at Princess Margaret Cancer Centre and PhD/MSc candidates in University of Toronto and
Ryerson University.

I have also given numerous invited lectures and seminars. For example, I was invited by the University of Waterloo (2007), Ontario and Sherbrooke University (2013), Quebec for seminars regarding radiation dose calculation and Monte Carlo simulation on gold nanoparticle, respectively. I also delivered Radiation Physics seminars (2006, 2007, 2010 and 2012), and Radiation Medicine Program round (2016) in Princess Margaret Cancer Centre. I was also invited to be one of the judges in the Sanofi BioGENEisu Challenge Canada in 2012, 2013 and 2014.

The nine-year of teaching in the Medical Radiation Science Program has built a solid relationship and communication between the teaching team and me. I updated my teaching materials constantly to keep pace with the rapid progress of Medical Radiation Science. Moreover, I contributed to the course assignments and examination questions. Similarly, supervising student research for seven years at University of Toronto and Ryerson University, I have maintained a very good relationship with the Division of Engineering Science in University of Toronto and Department of Medical Physics in Ryerson University. My students have produced very good final year projects, which greatly enhance their careers and further studies.

Postdoctoral Research Fellow (PhD)

I. Creative Professional Activities

1. PROFESSIONAL INNOVATION AND CREATIVE EXCELLENCE

2006 - present Monte Carlo Simulation on Radiation Dosimetry for Radiotherapy.

For my Monte Carlo study on radiation dosimetry, I carried out dose calculations using kilovoltage and megavoltage photon beams and megavoltage electron beams. I focused on phantoms and patients with tissue heterogeneities and irregular geometries using the EGSnrc-based Monte Carlo code for dose calculations.

For the kilovoltage photon beams, I studied the heterogeneous correction in skin therapy using the orthovoltage photon beams. I also studied photon backscatter from the lead shield used in the skin therapy. I modeled the kilovoltage cone beam computed tomography source to study the effects of imaging dose and positional uncertainty of patient setup in image-guided radiotherapy. For the preclinical model, I contributed to the small-animal irradiator design and treatment planning using Monte Carlo simulation. I also studied the dose enhancement of bone under the kilovoltage photon beam in preclinical model and human small bone joint.

For the megavoltage photon beams, I studied the dosimetric effect of gold pseudo marker implanted to the prostate. I carried out Monte Carlo study on lung dosimetry with different densities and geometries. Moreover, I used Monte Carlo simulation as benchmark to verify
the performances of other dose calculation algorithms in the presence of irregular heterogeneities. I investigated computer hardware such as cell processor used to increase the Monte Carlo simulation speed, and the photon energy spectra of the flattening-filter-free and flattening-filter photon beams.

For the megavoltage electron beams, I carried out Monte Carlo simulation to study the lateral build up ratio of the electron beam dosimetry. I also studied the peripheral dose outside the electron beams with an applicator, and the effect of electron beam obliquity on lateral build up ratio. Similar to the megavoltage photon beams, Monte Carlo simulation was carried out to study the electron backscatter from the lead and the MOSFET dosimeter in electron therapy. Moreover, I studied the electron backscatter of Solid Water, and electron dosimetry of a small air cavity. I used Monte Carlo simulation to calculate the monitor unit of electron arc radiotherapy.

2006 - present

Monte Carlo Simulation on Gold Nanoparticle.

In radiotherapy, using heavy-atom contrast agent such as gold nanoparticle can deliver a highly conformed radiation dose to the tumour while sparing surrounding critical tissues. Since this agent enhances the contrast of the tumour in medical imaging, the accuracy of radiation beam targeting is increased. The agent also improves the dose absorption in the tumour and cancer cell kill. The application of gold nanoparticle in radiotherapy innovates a novel cancer treatment option called gold nanoparticle-enhanced radiotherapy, which is presently in the preclinical study.

Monte Carlo simulation is used to predict different outcomes of dose enhancement resulting from gold nanoparticles irradiated by photon and electron beams. The Monte Carlo results enable us to discover which scenario would yield the largest cancer cell killing effect. The results would also help to build a nanodosimetric model of nanoparticles which helps to design and develop a new gold nanoparticle contrast agent in cancer treatment.

I used the Geant4 Monte Carlo code to simulate particle transports of gold nanoparticles in
water, and investigated the spatial and energy characteristics of electrons generated when photon and electron beams irradiate a gold nanoparticle. To understand the role of gold nanoparticle in enhancing cell kill, I performed Monte Carlo simulation on a gold nanoparticle. I found that for a cell of typical size, low-energy (35 keV) photons generate much more secondary electrons when a gold nanoparticle is present, and will have sufficient range to cause damage in the cell where the nanoparticle is uptaken. I concluded that the irradiation of gold nanoparticle at lower photon beam energies will be more efficient for cell killing and this is consistent with published results. I also performed Monte Carlo simulation on gold nanoparticle irradiated by electron beams. I found that the secondary electron energy deposition ratio is highest for the smallest nanoparticle of 2 nm diameter in my calculation. I concluded that the addition of gold nanoparticle can increase the secondary electron energy deposition in water, though most of the energy was self-absorbed by the large nanoparticles of 50 and 100 nm. However, electron source with gold nanoparticle does not seem to be better than photon as the yield of secondary electron per unit mass of gold is less than water. Results of Monte Carlo simulation on gold nanoparticle irradiated by photon beams were published (Leung et al Med Phys 38:624, 2011) and selected for the January 2011 issue of Virtual Journal of Biological Physics Research due to its excellence, and was the top 20 most downloaded articles in the Medical Physics Journal (January 2011). This work was also presented in the 2011 Joint American Association of Physicist in Medicine/Canadian Organization of Medical Physics Meeting in Vancouver (Chow et al Med Phys 36:2512, 2009, Leung et al Med Phys 36:2819, 2009, Chithrani et al IJROBP 72:S717, 2008). For Monte Carlo simulation on gold nanoparticle irradiated by electron beams, an oral presentation was given in the International Workshop on Recent Advances in Monte Carlo Techniques in Radiation Therapy, Montreal in 2011. Detailed results were published (Chow et al Phys Med Biol 57:3323, 2012). I was also the co-investigator of the research grant entitled “Engineering gold nanoparticle radiosensitizers for cancer therapy” from the Canadian Institutes of Health Research (2010-2014), and awarded 1 million super-computing hours for the project entitled “Monte Carlo simulation on gold nanoparticle-enhanced radiotherapy” in the SciNet local resource allocation research proposal competition. I was then invited to review a number of research papers related to gold nanoparticle studies in international peer-reviewed journals such as the Physics in Medicine and Biology and Medical Physics. I was also invited as research grant proposal reviewer regarding gold nanoparticle by the Research Foundation Flanders in Belgium in 2011 and 2012. I was invited as the PhD examiner in the Sherbrooke University, Quebec and delivered a seminar entitled “Monte Carlo simulation on gold nanoparticle” there. My work also resulted in some book chapter invitations from the publishers such as Springer International and Elsevier. With my other publications and presentations (e.g, Chow et al Phys Med Biol 58:2003, 2013, Leung and Chow et al Med Phys 38:3643, 2011, Jing and Chow et al Med Phys 40:321, 2013, He and Chow et al Med Phys 43:3674, 2016), my gold nanoparticle study impacted the understanding of the particle interaction on gold nanoparticle. This innovates the development of gold nanoparticle-enhanced radiotherapy optimizing the best strategy in the cancer treatment.

C. Academic Profile

1. RESEARCH STATEMENTS

2010 - present  
Statement of Scholarly and Professional Activity.
As a medical physicist at the Stronach Regional Cancer Centre I lead the imaging and informatics section of the Department of Radiation Physics. In this role, I am responsible for maintaining and reporting on a CT simulator, three on-board imagers and the interconnectivity of the different clinical software applications used in our clinic. I am part of the image-guided radiation therapy group (IGRT) at SRCC, and physics lead for the thorax site group. Research interests and projects focus on the implementation and clinical evaluation of new radiotherapy treatment techniques (VMAT, ABC, SBRT) and advanced image guidance in radiation therapy. My aim is to investigate measures to refine, evaluate and efficiently use these techniques clinically.

1. EDUCATION

Degrees
2001 Oct - 2005 Jan
PhD, Medical Physics Radiotherapy, Institute of Cancer Research, London, United Kingdom,
Supervisor(s): Steve Webb

2000 Sep - 2001 Sep
MSc, Medical Physics Applications (Distinction), Department of Biomedical Engineering,
University College London, London, United Kingdom, Supervisor(s): Gary Royle

MSc, Experimental Physics (Magna cum Laude), Wiskundige/Natuurk.(Math/Physics), State
University of Ghent (Gent or Gand), Belgium

Postgraduate, Research and Specialty Training
2005 - 2007
Medical Physics Clinical Residency, Radiation Physics, Royal Marsden Hospital Foundation
Trust, London, United Kingdom, Supervisor(s): Margaret Bidmead

Qualifications, Certifications and Licenses
2008
Board Certification Clinical Medical Physics, Medical Physics, Institute of Physics and
Engineering in Medicine / Health Professional Council, United Kingdom

2. EMPLOYMENT

Current Appointments
2015 Jun - present
Physics Site Lead CNS (GammaKnife + External Beam Therapy), Radiation Medicine
Program, Princess Margaret Hospital Cancer Centre, Toronto, Ontario, Canada

2014 Jun - present
Assistant Professor (Cross Appointment), Institute of Biomaterials & Biomedical Engineering,
University of Toronto, Toronto, Ontario, Canada
Catherine COOLENS

2014 - present  Affiliated Faculty, Joint Department of Medical Imaging, University Health Network, Toronto, Ontario, Canada
2013 Apr - present  Affiliated Faculty, TECHNA Research Institute, Ontario, Canada
2008 Jun - present  Radiation Physicist, Radiation Medicine Program, Radiation Physics Department, Princess Margaret Hospital, Toronto, Ontario
2010 Apr  Affiliated Faculty, Department of Physics, Ryerson University
2009 May - 2018 Jun  Assistant Professor, Radiation Oncology, University of Toronto

Previous Appointments

CLINICAL
2010 - 2015 May  Physics Site Lead Lymphoma, Radiation Medicine Program, Princess Margaret Hospital Cancer Centre, Toronto, Ontario, Canada
2007 Jul - 2008 Jun  Clinical Research Physicist, Royal Marsden Hospital, London, United Kingdom

3. HONOURS AND CAREER AWARDS

Distinctions and Research Awards

INTERNATIONAL
Received
2015 Oct  ‘Best in Radiomics’ Featured Presentation, 57th ASTRO Annual Meeting, San Antonio, Texas, United States. (Distinction)
2012 Oct  Basic Science Abstract Award, 54th ASTRO Annual Meeting, Boston, Massachusetts, United States. (Distinction, Specialty: Radiation Physics)
Total Amount: 1,000 USD
2010 Jul  ‘Best of Physics’ Abstract, 52nd ASTRO Annual Meeting, San Diego, United States. (Distinction)
Total Amount: 1,000 USD
2005 Jul  Annual Travel Award, IPEM-AAPM. (Distinction)
Total Amount: 2,000 GBP

NATIONAL
Received
Total Amount: 45,000 GBP

Student/Trainee Awards

INTERNATIONAL
Received
2012 May  Summa Cum Laude Merit Award (top 3%), Supervisor, Awardee Name: Sangjune (Laurence) Lee. International Society for Magnetic Resonance in Medicine (ISMRM) Annual Meeting
2011 Jul  “Best in Physics - Poster Discussion”, Supervisor, Awardee Name: John Bracken.
American Association of Physicists in Medicine (AAPM) Annual Meeting, Vancouver, British Columbia
2010 Feb Runner Up Award - “Best Post Graduate Project”, Supervisor, Awardee Name: Wallace Wee. American Association of Medical Instrumentation 2010 Annual Meeting

LOCAL Received
2010 Jan Best Thesis Project Award, Supervisor, Awardee Name: Melanie Pigeon-Peladeau. University of Toronto, Canada Clinical Engineering MSc program, IBBME.
2006 Jan Best MSc Project of the Year, Supervisor, Awardee Name: Joan Coward. University of London - King’s College, United Kingdom Medical Engineering & Physics.

4. PROFESSIONAL AFFILIATIONS AND ACTIVITIES

Professional Associations
2011 - present Member, Radiological Society of North America (RSNA)
2009 - present Member, American Association of Physics in Medicine (AAPM)
2008 - present Member, American Society for Therapeutic Radiology and Oncology (ASTRO)
2008 - present Member, Health Professional Council UK
2004 - present Corp. Member, Institute of Physics and Engineering in Medicine (UK)
2003 - present Member, European Society for Therapeutic Radiology and Oncology (ESTRO)

Administrative Activities

INTERNATIONAL
American Association of Physicists in Medicine (AAPM)
2013 Apr - present Member, Imaging for Treatment Planning Task Group, United States.

National Institute of Health (NIH)
2014 Oct - present Member, Quantitative Imaging Network (QIN), United States.

Quantitative Imaging Biomarker Alliance (QIBA) DCE-MRI Committee
2016 Jun - present Member, Quantification Profile v1.1 (International Guidelines), United States.

Radiological Society of North America (RSNA)
2014 Oct - present Member, Quantitative Imaging Biomarker Alliance (QIBA) CT Committee, United States.

NATIONAL
Canadian Organization for Medical Physics (COMP)
2015 Member, Imaging Committee, Canada.

THESIS PROJECT

2001 Oct - 2005 Jan  

2000 Sep - 2001 Aug  
Graduate Student. The effects of artificial hips on radiotherapy planning. Univ of London - University College London, London, United Kingdom. Supervisor(s): Dr. Peter Childs. Collaborator(s): Royal Marsden Hospital Foundation Trust.

1999 Sep - 2000 Jun  
Graduate Student. Skin dose reconstruction in Interventional Cardiology - Different dosimetric techniques. National Standards Laboratory Benelux, Gent, Belgium. Supervisor(s): Prof. Thierens. Collaborator(s): Dr. Van de Putte, Dr. Verhaegen, Dr. Y Taeymans.
CLINAC COMMISSIONING

2014 Mar - 2014 May  Contributor. Supervise installation and commissioning of Elekta Infinity Accelerator (Unit 8). Princess Margaret Cancer Centre, Toronto, Ontario, Canada.

2006  Contributor. Commissioning of Varian Accelerator Clinac 2100. Royal Marsden Hospital Trust, Toronto, Ontario, Canada.

CLINICAL IMPLEMENTATION

2011 - present  Clinical Lead. Perfusion CT for Treatment Response Assessment using a 320-slice CT scanner. Princess Margaret Hospital, Toronto, Ontario, Canada. Collaborator(s): Dr. Laura Dawson, Dr Cynthia Menard, Dr Caroline Chung, Dr Arjun Saghal.

2011 - 2013  Clinical Lead. Volumetric 4D CT for Tumor Motion Assessment using a 320-slice CT scanner. Princess Margaret Hospital, Toronto, Ontario, Canada. Collaborator(s): Dr. Andrew Hope.

2010 - 2011  Clinical Lead. Implementation of Active Breath Controlled treatment for Mediastinal Radiotherapy of Hodgkin Lymphoma. Princess Margaret Hospital, Toronto, Ontario, Canada. Collaborator(s): Dr. David Hodgson, Dr. Mary Gospodarowicz, Dr. Richard Tsang.

CLINICAL RESEARCH DEVELOPMENT

2012 Apr - 2015 May  Co-Lead. Development of a Multi-Center Clinical Trial Data Archiving and Analysis Platform for Functional Imaging. Princess Margaret Hospital, Canada. Collaborator(s): Dr. David Jaffray, Dr. Ivan Yeung.

2012  Lead. Perfusion Imaging in Patients with Brain or Liver Cancer. Princess Margaret Hospital, Canada. Collaborator(s): Dr. Caroline Chung, Dr. Laura Dawson.

CONSULTANCY

Expert consultancy services on the replacement of the Institute’s educational CT scanner. Provided help with structural design and safety requirements as well as support the RFP selection process for a new scanner.

Review installation and acceptance tests and documentation.
C. Academic Profile

1. RESEARCH STATEMENTS

Statement of Scholarly Achievement.
The focus of my scholarly and professional activity at UofT DRO has been on the
development and validation of quantitative imaging methodologies with the long-term goal of
maximizing its ability to characterize tumor morphology and physiology and to use this tool to
probe tumor prognostic factors and response during therapy. Tumor response to treatment is
viewed as a critical un-used source of data that may be used to adapt treatment and thereby
focus non-standard treatment towards patients likely to benefit. Dynamic contrast-enhanced
(DCE) CT, with high resolution, physiological relevance, and wide-spread clinical
convenience, is a key potential method to gather critical morphological and physiological data
before, during, and after therapy. Since the installation of the 320-slice CT scanner at PMH in
the summer of 2008, I have extensively characterized this technology for implementation into
routine CT simulation as well as for performing ‘true’ 4D CT. Following this, I established
novel quality assurance methods for contrast-enhanced CT imaging and these are currently
being patented and commercialized. In order to truly validate the accuracy of perfusion
kinetics models as applied to DCE CT data, another novel phantom has been developed and
patented that is able to simulate clinically relevant DCE uptake curves within a controlled
setting. The success of this dynamic flow phantom development has generated wide-spread
interest for collaborations with international academic partners (QIBA, QIN) as well as
perfusion CT validation within the province (under OICR IPP) and industry.

Using this phantom, it was then possible to develop a 4D kinetic model that automatically
segments vasculature based on DCE CT data and calculates perfusion parameters for every
individual voxel in the image. The software algorithm has been tested on the controlled flow
phantom and is currently being applied in a number of clinical trials in prostate, brain and
liver cancer patients. This work received a number of awards, including the Best in Physics
abstract at the ASTRO Annual Meeting in 2010 and 2012.

My current interests lie in the validation and use of functional imaging, not only with DCE CT
but also DCE MRI and PET for measurements of IFP and hypoxia as well as perfusion. The
main sites of interest are in brain, cervix and liver cancers, in combinational therapies of
radiation and anti-angiogenic drugs as well as assessment of improved drug delivery.
Phantom developments were extended to dual energy CT for imaging validation and
optimization of functional imaging.

As an educator, I have had the opportunity to supervise and mentor several students and
post-doctoral fellows, as well as act as an examiner and supervisor for the Physics
Residency Program, IBBME thesis committees and Ryerson Radiation Physics Course. My
current research group consists of 2 graduate students and 2 research assistants combined
with temporary multi-level training staff, which enables a dynamic and interactive learning
environment.
D. Research Funding

1. GRANTS, CONTRACTS AND CLINICAL TRIALS

PEER-REVIEWED GRANTS

Funded

2016 Sep - 2017 Sep  **Co-Investigator.** Evaluation of RF Transmit Calibration Options for Quantitative DCE-MRI. RSNA. QIBA Groundwork Project Grant. PI: Nayak, Krishna. Collaborator(s): Sung K,  
**Coolens C,** Bosca R, Kirsch J, Laue H, Chung C, Boss M A. 50,000 USD. [Grants]  
The DCE-MRI task force is in the process of generating a v2.0 DCE-MRI profile that includes the use of parallel imaging and imaging at 3 Tesla (v1.0 covered only 1.5T without parallel imaging). In our literature search, we found significant published evidence that (spatial) inhomogeneity in the transmitted RF (B1+) field resulted in significant bias and variance in quantitative DCE-MRI metrics (e.g. tracer kinetic parameter maps). If unaccounted for, these errors can dominate all other sources of bias and variance. Furthermore, we found that the amount and pattern of inhomogeneity depended on the RF coil geometry, the circuits that drive them, and the vendor-specific pre-scan calibration. The purpose of this groundwork project is to measure and compare the spatial RF transmit inhomogeneity across different scanners, and to compare different methods for RF transmit measurement that can be used to correct data prior to quantitative DCE-MRI analysis.

2016 Apr - 2022 Apr  **Principal Investigator.** Transport modeling for multi-modality contrast-enhanced imaging. Natural Sciences and Engineering Research Council of Canada (NSERC). Discovery Grant. 96,000 CAD. [Grants]

The goals of treatment for brain metastases are shifting to minimize treatment-related complications and maximize functional preservation. Specifically, rising concerns of neurocognitive toxicity following whole brain radiation has led to growing use of radiosurgery (SRS), a focal radiation treatment targeting the visible tumor that is usually delivered in a single session. To ensure accurate immobilization, most patients have been treated with an invasive metal head frame. Patient discomfort from frame placement has motivated the development of a less invasive, frameless immobilization system. The team at Princess Margaret has worked with an industry partner (Elekta) to develop an image-guidance system that incorporates cone-beam computed tomography (CBCT) and infrared (IR) tracking to maintain highly accurate immobilization and radiation delivery with the patient immobilized in a thermoplastic mask that is comparable to treatment in the invasive frame. This jointly developed technology has been commercialized in the form of Elekta’s recently released IconTM treatment system. This collaborative research proposal aims to optimize clinical application of this new treatment technology, evaluate further novel applications to improve patient care and to ensure appropriate access for Canadian cancer patients with brain tumors to optimized radiosurgery treatment.

2015 Apr - 2020 Apr  **“Other User”.** Integrative Systems-Level Imaging (ISLI). Canada for Funding Innovations. CFI ISLI. PI: Jaffray, David A. Collaborator(s): Joshua, Anthony; Jurisica, Igor; Mikulis, David; Milosevic, Michael. 7,766,630 CAD. [Grants]  
Many of the diseases with the greatest impact on the Canadian health care system are united by basic underlying processes: inflammation is a key component in cancer, cardiovascular disease and arthritis, while microvascular perfusion and tissue oxygenation
Catherine COOLENS

impact cancer care and neuroscience studies. An image-based understanding and ability to measure pharmacokinetics and drug delivery will thus impact numerous therapeutic approaches. We are developing tools and methods to non-invasively image and quantify these important determinants of disease and treatment outcomes. Five inter-connected research activities will form the core of the IGDL and use the new and expanded capabilities of the requested facility to advance imaging research: Next-Generation X-ray Technology Development; Image-Guided Therapeutics Development; Image-Based Ex Vivo and Post Mortem Tissue Characterization; Image-Guided Drug Delivery; Quantitative and Radiomic Image Analysis.

The proposed program will leverage published techniques, existing clinical trials at multiple institutions, international collaborations, and a world-class hypoxia research program to guide the development of tools and methods that facilitate the establishment of reproducible, accessible measures of the joint perfusion-hypoxia state of tumors before, during, and after therapy.

2010 May Principal Investigator. 4D perfusion computed tomography. University of Toronto. Dean’s Fund. 10,000 CAD. [Grants]

2010 Apr - 2015 Apr Principal Investigator. Validation framework for 4D perfusion computed tomography. Natural Sciences and Engineering Research Council of Canada (NSERC). Discovery Grant. 100,000 CAD. [Grants]

1. PATENTS

2010 Method and system for managing imaging data. Applied. Patents #: Application/Provisional # US12/954,808, United States.

2. LICENSES

2014 Jul Dynamic Flow Phantom. Granted. United States. This novel phantom was licensed to Shelley Medical Inc. and produces predictable, reproducible and quantifiable time concentration attenuation curves (TCCs), which generate a wide range of realistic input and output functions simulating clinically relevant perfusion TCCs. The ability of this phantom to generate DCE quality assurance protocols with realistic flow provides an excellent framework for the validation of perfusion and kinetic modeling, and enables DCE imaging to be utilized as a quantitative imaging tool to compare scanners within an imaging modality, or across CT, MRI & PET modalities, as well as to compare imaging protocols. The phantom’s ability to reproduce typical input and output enhanced profiles ensures a multimodal ground truth for sensitivity in dynamic contrast enhanced (DCE) imaging.

2011 Contrast Enhancement CT Phantom. Granted. United States. Contrast agent (Iodine) injections lead to a large range of density values in vessels of different size and
orientation. These variables, although important, are not fully tested with current QA techniques. The QUASAR™ Dynamic Contrast Enhanced CT (DCE-CT) system, consisting of a phantom and automated image analysis software, is the only comprehensive product available in the market to quantify and calibrate the CT number linearity for densities applicable to iodine injections. This makes possible the quantification of DCE-CT values independent of scan parameters (mAs, kV), machine, manufacturer, and DCE software. The system is designed with daily, monthly, and annual CT calibration of DCE-CT measurements in mind.

3. DISCLOSURES

G. Presentations and Special Lectures

1. INTERNATIONAL

Invited Lectures and Presentations

Dual-energy CT technology is becoming increasingly available to the medical imaging community. In addition, several models of CT simulators sold for use in radiation therapy departments now feature dual-energy technology. The images provided by dual-energy CT scanners add new information to the radiation treatment planning process; multiple spectral components can be used to separate and identify material composition as well as generate virtual mono-energetic images. In turn, this information could be used to investigate pathologic processes, separate the properties of contrast agents from soft tissues, assess tissue response to therapy, and other applications of therapeutic interest. Additionally, the decomposition of materials in images could directly integrate with and impact the accuracy of dose calculation algorithms. This symposium will explore methods of generating dual-energy CT images, spectral and image analysis algorithms, current and future applications of interest in oncologic imaging, and unique considerations when using dual-energy CT images in the radiation treatment planning process.

2013 Apr Distinguished Speaker. The Clinical Impact Of Volumetric And Helical CT Imaging. Toshiba Medical. Canada. The Toshiba 2013 International CT Symposium was held in Toronto, from April 12-13th. The objective of the meeting was to explore the challenges and clinical impact of volumetric and helical CT imaging, from head to toe. An internationally renowned faculty from various leading hospitals was invited to share best practices related to Toshiba’s state-of-the-art CT systems. The conference was well attended with 190 registrants and 13 renowned speakers.

2012 Jul Visiting Professor. Perfusion Imaging: Is contrast all it takes? Memorial Sloan Kettering Cancer Center. New York, New York, United States. Grand Rounds Invited Speaker to the Departments of Radiation Oncology and Medical Imaging within 2-day visit.

2010 Nov Chair. Treatment Management of IMRT/IGRT/ART. 52nd ASTRO Conference. San Diego, United States.
Session Chair.

2009 Mar Visiting Professor. Stereotactic partial liver irradiation. MAASTRO Center. Maastricht, Netherlands. Two-day visit discussing treatment planning and image guidance issues around liver motion and delivery of stereotactic partial liver irradiation. This included Grand Rounds Seminar to the Department of Radiation Oncology and Imaging.

2006 Apr Invited Speaker. Accuracy of organ motion compensation. McGill University. Montreal, Quebec, Canada. IPEM-AAPM Travel Award Collaborative Visit.

2006 Apr Invited Speaker. Accuracy of organ motion compensation. Princess Margaret Hospital. Toronto, Ontario, Canada. IPEM-AAPM Travel Award Collaborative Visit.

2010 Methodology for visualization and perfusion analysis of 4D dynamic contrast-enhanced CT imaging.

Publication Details:

2010 Methodology for visualization and perfusion analysis of 4D dynamic contrast-enhanced CT imaging.

Publication Details:

2010 Quantification and Validation of DCE-CT using a Novel Dynamic Flow Phantom.

Publication Details:

2010 Volumetric 4D computed tomography with a 320 multi-slice scanner.

Publication Details:

2010 Volumetric 4D computed tomography with a 320 multi-slice scanner.

Publication Details:

2010 Highly conformal partial liver irradiation for chemorefractory Unresectable Colorectal Liver Metastases.

Publication Details:

2010 Novel methodology for Visualization and Analysis of Functional Vasculature for 4D DCE-CT, ASTRO Annual Meeting.

Publication Details:

2010 High resolution imaging of perfused radical nephrectomy specimens.

Publication Details:

2009 Aug Characterisation of a 320-slice CT scanner for perfusion assessment in radiotherapy.

Publication Details:

2009 Effect of motion on high contrast vessel-like objects for volumetric DCE-CT.
**Publication Details:**

2009

**Publication Details:**

2009

VMAT compared with gated highly conformal optimization for dose escalation in partial liver radiotherapy.

**Publication Details:**

2009

Results from a phase I partial liver radiotherapy for patients with unresectable colorectal liver metastases.

**Publication Details:**

2009

Characterisation of a 320-slice volumetric CT scanner for 4D perfusion imaging.

**Publication Details:**

2009

Characterization of a 320-slice CT scanner for perfusion assessment in radiotherapy.

**Publication Details:**

2008

Application of dynamic margins to account for respiration-induced lung tumour motion and its variability.

**Publication Details:**

2008

Volume and motion definition in helical CT, 4DCT and MR imaging in upper gastrointestinal radiotherapy planning.

**Publication Details:**

2008

Assessment of dose escalation in partial liver RT with deformable motion models and biological plan optimisation.

**Publication Details:**
Free breathing liver gated radiotherapy with external markers using MRI derived models of hepatic motion.

**Publication Details:**

Feasibility of free-breathing respiratory gated liver radiotherapy with MRI-derived models.

**Publication Details:**

Comparison of volume and motion definition in helical CT, 4DCT and MR imaging in upper gastro-intestinal radiotherapy.

**Publication Details:**

Image Deformation Recovery using Overlapping Partial Samples (iDROPS): model-based respiratory artefact correction in freebreathing liver MRI.

**Publication Details:**

Effects of Averaging Over Motion and the Resulting Systematic Errors in Radiation Therapy.

**Publication Details:**

Effects of averaging over motion and the resulting systematic errors in radiation therapy.

**Publication Details:**

Feasibility of free-breathing respiratory gated liver radiotherapy with MRI-derived motion models.

**Publication Details:**

A dynamic internal margin model to account for organ motion variability.

**Publication Details:**

Clinical feasibility of a proposed internal margin model to account for variability in respiratory motion in gated radiotherapy delivery.

**Publication Details:**

2005 A study of the complexity, necessary for the delivery of intensity-modulated radiotherapy.

Publication Details:

2004 Susceptibility of IMRT dose distributions to deformable organ motion and the impact of beam smoothing.

Publication Details:

2003 Combinatorial use of conformal and intensity modulated beams in radiotherapy planning.

Publication Details:

2003 Analysis of stochastic noise in intensity-modulated beams.

Publication Details:

H. Research Supervision

1. PRIMARY OR CO-SUPERVISION

Undergraduate Education

Graduate Education

2016 Sep - 2018 Primary Supervisor. MSc. Soroush Ghomashchi, Biomedical Engineering. Supervisee Institution: University of Toronto. Dual Energy CT.

2015 May - 2015 Sep Primary Supervisor. Carly Pellow, Biomedical Engineering. Supervisee Position: Graduate
Summer Student, Supervisee Institution: University of Toronto. DCE-MRI brain perfusion analysis.

2007 Sep - 2009 Apr Co-Supervisor. MSc. Rachel Trimble, Physics, Biomedical Engineering. Supervisee Institution: King’s College London. Characterisation of the Varian aS500 EPID for the Replacement of Radiographic Film in Routine Clinac and IMRT Dosimetry QA, Non-thesis Project.

Undergraduate MD

Postgraduate MD

Postdoctoral Research Fellow (PhD)

Research Associate

2. OTHER SUPERVISION

Graduate Education

Thesis Committee Member

2014 Jul - present  **MSc.** Ana Maria Jaimes Castillo, Pharmaceutical Sciences. Supervisee Position: Graduate student transferring to PhD. *Porphyrin nanoemulsion development for dual CT fluoroscopy imaging.* Supervisor(s): Gang Zhang.

2014 Jul - 2015 Jun  **MHSc Clinical Biomedical Engineering.** Daniel Lin, Mechanical and Industrial Engineering. Supervisor(s): Mohammad Islam.

Thesis Examiner

2014 Jul - 2015 Jun  **PhD.** Navid Samavati, Biomedical Engineering. *Validation of biomechanical deformable registration.* Supervisor(s): Kristy Brock.

Internship Supervisor

2010 - 2011  **MHSc Clinical Biomedical Engineering, IBBME.** Tina Shek. *Perfusion Analysis of 4D Dynamic Contrast-Enhanced CT Imaging.*

Postgraduate MD

Research collaboration

2010 - 2013 Jun  **Joe Barfett, Medical Science.** *Non-thesis Project.* Supervisor(s): David Mikulis.

I. Creative Professional Activities

1. PROFESSIONAL INNOVATION AND CREATIVE EXCELLENCE

2008 - present  Quantitative Imaging for Personalized Treatment Response Assessment. Development of a validation framework multi-center Clinical Trial Data Archiving and Analysis Platform for validation of Quantitative Functional Imaging. This includes protocol standardization, development and testing both within UHN as internationally. Non-invasive imaging for quantification of early treatment response and drug delivery.

2008 - present  Transport modeling.

2. CONTRIBUTIONS TO THE DEVELOPMENT OF PROFESSIONAL PRACTICES

2003 - present  Treatment Optimization and Image-Guided Delivery.
Curriculum Vitae

Timothy Craig
Clinical Physicist

1. EDUCATION

Degrees
1997 - 2002 PhD, Medical Biophysics, Western University, London, Ontario, Canada
1993 - 1997 BSc, Medical Biophysics, Western University, London, Ontario, Canada

Postgraduate, Research and Specialty Training
2002 - 2004 Residency, Clinical Physics, Radiation Therapy Physics Department, Radiation Medicine Program, Princess Margaret Hospital, Toronto, Ontario, Canada

Qualifications, Certifications and Licenses
2007 - present Member, Canadian College of Physicists in Medicine, Canada

2. EMPLOYMENT

Current Appointments
2011 - present Associate (Restricted), Mechanical and Industrial Eng. Graduate Faculty, University of Toronto, Toronto, Ontario, Canada
2006 - present Assistant Professor, Faculty of Medicine, University of Toronto, Toronto, Ontario, Canada
2005 - present Clinical Physicist, Radiation Therapy Physics Department, Radiation Medicine Program, Princess Margaret Hospital, Toronto, Ontario, Canada

Previous Appointments
HOSPITAL
2002 - 2004 Clinical Physics Resident, Radiation Therapy Physics Department, Radiation Medicine Program, Princess Margaret Hospital, Toronto, Ontario, Canada
3. HONOURS AND CAREER AWARDS

Distinctions and Research Awards

LOCAL

Received

2011  Research Productivity 2011/2012 - Radiation Physics, Radiation Medicine Program, Princess Margaret Hospital. (Distinction)

1997  Harold E. Johns Summer Studentship, London Regional Cancer Centre, London, Ontario, Canada. (Distinction)

Teaching and Education Awards

LOCAL

Received

2011  Resident's Award for Excellence in Physics Teaching, Dept of Radiation Oncology, Faculty of Medicine, Department of Radiation Oncology, University of Toronto, Toronto, Ontario, Canada

2010  Professional Development & CME Award, Dept of Radiation Oncology, Faculty of Medicine, Department of Radiation Oncology, University of Toronto, Toronto, Ontario, Canada

4. PROFESSIONAL AFFILIATIONS AND ACTIVITIES

Professional Associations

2006 - present  Associate Member, Canadian Association of Radiation Oncologists

1997 - present  Member, American Association of Physicists in Medicine

1997 - present  Member, Canadian Organization of Medical Physicists

Administrative Activities

INTERNATIONAL

International Conference on the use of Computers in Radiation Therapy

2006 - 2007  Member, Local Organizing Committee

Radiation Therapy Oncology Group

2012 - present  Co-Chair, RTOG 1112 – Randomized Phase III Study of Sorafenib versus Stereotactic Body Radiation Therapy Followed by Sorafenib in Hepatocellular Carcinoma

NATIONAL

Ontario Clinical Oncology Group

2006 - present  Member, Quality Assurance Committee, PROFIT trial, Faculty of Medicine, Dept of Radiation Oncology, Toronto, Ontario, Canada.
PROVINCIAL / REGIONAL

Cancer Care Ontario
2012 - present  Member, Steering committee, Gyne Community of Practice, Faculty of Medicine, Dept of Radiation Oncology, Toronto, Ontario, Canada.

LOCAL

Princess Margaret Hospital
2012 - present  Member, Radiation Oncology Resident Interview Committee (CaRMS), Faculty of Medicine, Dept of Radiation Oncology, Postgraduate MD, Toronto, Ontario, Canada.
2010 - present  Member, Quality Assurance Monitoring Committee, Toronto, Ontario, Canada.

Peer Review Activities

GRANT REVIEWS

External Grant Reviewer
2011  Canadian Radiation Oncology Foundation, Sanofi – Aventis Research Innovation Award (CASARIA)
2010  Prostate Cancer Foundation of Australia, Competitive National Research Support Program

MANUSCRIPT REVIEWS

Reviewer
2010 - present  Clinical Oncology
2008 - present  Physics in Medicine and Biology
2005 - present  Cancer Letters
2004 - present  Radiotherapy and Oncology
2001 - present  International Journal Radiation Oncology Biology Physics

Associate Editor and Reviewer
2002 - present  Medical Physics

PRESENTATION REVIEWS

Abstract reviewer
2007 - present  International Conference on the use of Computers in Radiation Therapy
2006 - present  American Association of Physicists in Medicine Annual Meeting

Postgraduate MD

2011 - 2013

Primary Supervisor. Clinical Fellow. J. King, University of Toronto CAMPEP. Impact of multi-leaf collimator leaf width on volumetric modulated arc therapy plan quality: does the effect depend on the complexity of the planning task?

2010 - 2012

Primary Supervisor. Clinical Fellow. A. Kim, University of Toronto CAMPEP. Predicting dose in the periphery of intensity-modulated radiotherapy treatment fields.

2009 - 2010

Primary Supervisor. Clinical Fellow. A. Ravi, University of Toronto CAMPEP. Image-guided supine cranio-spinal irradiation using kilovoltage radiographs.

Degrees
1998 - 2004 PhD, Medical Biophysics, University of Toronto
1995 - 1997 MSc, Medical Biophysics, University of Toronto
1990 - 1994 BSc, Physics, University of Guelph

Postgraduate, Research and Specialty Training
2004 - 2007 Post-doctoral Fellow, Cardiology/Imaging, University of Toronto

2. EMPLOYMENT

Current Appointments
2011 - present Assistant Professor, Radiation Oncology, University of Toronto
2008 - present Scientific Associate II, Radiation Medicine Program, University Health Network

Previous Appointments
HOSPITAL
2007 - 2008 Research Associate, Imaging Research, Sunnybrook Health Sciences Centre
3. HONOURS AND CAREER AWARDS

Distinctions and Research Awards

INTERNATIONAL

Received

2012 Jan - 2013 Jan  Distinguished Reviewer of MRM, Magnetic Resonance in Medicine. (Distinction)

Recognition for completion of at least 5 reviews within requested time constraints or otherwise provided exceptional service to aid MRM’s peer-review process.

Nominated

2000  Moore Award, International Society for Magnetic Resonance in Medicine. (Research Award)

Finalist – Young Investigator’s Competition.

NATIONAL

Received

1998 - 2002  Research traineeship, Heart and Stroke Foundation of Canada. (Research Award)
1992  Summer Scholarship, Natural Sciences and Engineering Research Council of Canada (NSERC). (Distinction)
1992  Summer Scholarship, Natural Sciences and Engineering Research Council of Canada (NSERC). (Distinction)
1990 - 1993  Post-graduate Scholarship, Natural Sciences and Engineering Research Council of Canada (NSERC). (Distinction)

Nominated

1999  Young Investigator’s Competition (Finalist), Canadian Organization of Medical Physicists. (Research Award)

LOCAL

Received

1990 - 1994  Canada Scholarship, University of Guelph. (Distinction)
1990 - 1994  Open scholarships, University of Toronto. (Distinction)
1990  Physics Entrance Scholarship, University of Guelph. (Distinction)

Nominated

2004  Bigelow Book Prize (Finalist), University of Toronto. (Distinction) Cardiovascular Sciences Collaborative Program.
2003  Bigelow Book Prize (Finalist), University of Toronto. (Distinction) Cardiovascular Sciences Collaborative Program.
4. PROFESSIONAL AFFILIATIONS AND ACTIVITIES

C. Research Funding

1. GRANTS, CONTRACTS AND CLINICAL TRIALS

PEER-REVIEWED GRANTS

Funded

2011 - present
Discovery of biomarkers to guide individualized therapy in patient’s with brain metastasis receiving radiotherapy. Brain Tumor Foundation of Canada. 10-0743-C. PI: Ménard, C. [Clinical Trials]

2008 - present
Fiducial Localization and Individualized Radiotherapy for Prostate Cancer. 08-0271-C. PI: Ménard, C. [Clinical Trials]
Abbott-CARO Uro-Oncologic Radiation Award titled “Multiparametric MRI based evaluation of hypoxia in men with prostate cancer”.

2006 - present
Low-Intermediate Risk Prostate Cancer: Improving Acute Toxicity Outcomes of Radiotherapy with the Integration of Advanced Imaging for Treatment Planning and Guidance. 06-0520-C. PI: Ménard, C. [Clinical Trials]
Abbott-CARO Uro-Oncologic Radiation Award titled: “Advanced Image Guidance Will Improve Toxicity Outcomes for Patients with Prostate Cancer: A Prospective Study”.

2016 Nov - 2017 Nov

2016 Jul - 2017 Jul
To turn a previously approved drug for Alzheimer’s Disease into a MRI contrast agent which could improve brain imaging in general, and have the potential to localize amyloid plaque in clinical MR images.

2015 Jul - 2018 Jun
Co-Principal Investigator. Using magnetic resonance imaging to non-invasively image and quantify kidney fibrosis. CIHR Collaborative Health Research Projects (CHRP). PI: Yuen, Darren. 758,376. [Grants]
The goal of this research is to validate needle-free MRI techniques to measure kidney scarring in both animal models and humans.

2013 Jul - 2014 Jul
Principal Investigator. Development of a novel geometrically robust technique for diffusion tensor MR imaging of the prostate applied to image-guided needle interventions. Canadian Association of Radiation Oncologists (CARO). 15,500 CAD

2013 - 2015

2012 - 2015

2011 - 2012
Co-Principal Investigator. Anti-VEGF therapy in murine brain radionecrosis model.

1. PATENTS

2000 Jul Measurements of Coronary Flow Reserve using MR oximetry. Granted. Patents #: 06094591, United States. Joint Holder Name(s): Merchant N, Wright GA. This patent describes the design of the non-invasive MRI method for measuring coronary venous oxygen saturation using vascular T2, and strategies for estimating coronary flow reserve and myocardial oxygen metabolic rate from the oxygen level measurement. This MRI method is the only non-invasive measurement of coronary venous oxygen levels, and its precision is limited by the precision of the calibrating gold standard methodology, optical oximetry.

The relevance of this technique stems from the intrinsic value of oxygen to viable cardiac muscle. Utilizing Fick’s law, simple integrated expressions yielding coronary flow reserve, oxygen extraction, and oxygen metabolic rate can be derived. Coronary flow reserve has long been regarded as a useful parameter for quantifying the severity of coronary atherosclerosis, while myocardial oxygen metabolic rate is perturbed by aging, ischemic disease, and heart failure.

Qualifications, Certifications and Licenses
1991 Certified, Therapeutic Radiological Physics, American Board of Radiology

2. EMPLOYMENT

Current Appointments
2000 Jan - present Senior Physicist, Department of Radiation Physics, Princess Margaret Hospital, University Health Network, Toronto
Responsibilities (routine and clinical development projects) include: Quality assurance of Varian Clinac 2100 C/Ds, Commissioning of 2 new Clinac 2100C/Ds with dynamic MLCs, aSi portal imager and IMPAC RSTS. Commissioning and clinical implementation of Intensity
modulated radiation therapy (IMRT). Planning and quality assurance of IMRT. Supervision of the entire IMRT program as Radiation Medicine Program IMRT leader. Teaching and training of radiation therapists and radiation physics residents. Various R&D related to IMRT

2000 - present
Assistant Professor, Radiation Oncology, University of Toronto, Toronto

Previous Appointments

HOSPITAL

2002 Jul - 2012 Dec 31
Senior Physicist/ Associate Director, Department of Radiation Physics, Princess Margaret Hospital, University Health Network, Toronto
Responsibilities include:
• All aspects of treatment delivery physics, IMRT implementation/transition to site based initiatives, R&D for IMRT quality assurance and dose verifications
• Supervise staff physicists and Physics Associates
• Supervise Post doctoral fellow and graduate student
• Physics Operations Committee (chair)
• Physics Steering Committee (provide administrative support and strategic input to the head of the department)
• RMP External Beam process Committee (chair)
• RMP operations Committee
• Radiation Treatment Radiation Safety Committee

2002 Jan - 2002 Jun
Acting Head of the Department, Department of Radiation Physics, Princess Margaret Hospital, University Health Network, Toronto

1996 Jan - 1999 Nov
Senior Medical Physicist, Department of Biomedical Physics, King Faisal Specialist Hospital & Research Center

Completed Clinical Projects include: Acceptance testing and commissioning of Clinac 600C, Clinac 2300 C/D. Dosimetry and clinical introduction of TBI, TSET (HDTSe-), Dosimetry of Asymmetric Jaw (Open and Wedge), Dynamic Wedge, RMS-2000 and Portal Vision. Shielding design and dosimetry of special vaginal applicator. Acceptance and clinical introduction of CADPLAN version 3.06.

1995 Jun - 1995 Nov
Medical Physicist, Baptist Hospital of Miami, Miami, Florida
Responsibilities included: all aspects of physics service to radiation oncology, including HDR, conventional brachytherapy, electron intraop, stereotactic radio surgery, quality assurance of treatment machines and radiation safety

1991 Jan - 1995 Jun
Physicist, Department of Clinical Physics, Ontario Cancer Institute/Princess Margaret Hospital
Responsibilities included: treatment planning for complex situation, quality assurance of routine treatment plans, develop treatment planning protocols, projects related to clinical applications, provide support for brachytherapy (remote after loader including Nucletron pulse Dose Rate Unit, stereotactic brain implant), Electronic Portal Imaging (Philips, Varian and Infimed systems), teaching post doctoral trainees and resident’s tutorial class, various clinical development projects. Involved in radiation survey, acceptance and commissioning of a Philips SL25 Linac.

1987 Nov - 1990 Nov
Physicist, Department of Radiation Oncology, Albert Einstein College of Medicine and Montefiore Medical Center, Bronx, New York
Responsibilities included: supervision and quality assurance of treatment planning performed by dosimetrists, brachytherapy including stereotactic brain implant, quality assurance of radiation treatment units, teaching residents and radiotherapy technology students, brachytherapy. Commissioning of a high energy linear accelerator and research projects
Mohammad Khairul ISLAM

related to photon and electron dosimetry.

RESEARCH

1977 - 1980
Research Officer, Bangladesh Scientific and Industrial Research, Institute of Fuel Research and Development, Dhaka, Bangladesh
Responsibilities included: working in the research and development effort in solar energy applications

UNIVERSITY

1984 Sep - 1987 Nov
Graduate Assistant, January for Ph.D. dissertation (Portal Imaging), Department of Radiation Oncology, Shands Teaching Hospital, University of Florida

1980 Aug - 1983 Dec
Graduate Assistant, Physics, University of Florida
Responsibilities included: teaching laboratory and tutorial sessions for undergraduate physics students

UNIVERSITY - RANK

1988 - 1990
Assistant Professor, Radiation Oncology, Albert Einstein College of Medicine

3. HONOURS AND CAREER AWARDS

1. EDUCATION

Degrees
1994 PhD, Medical Biophysics, Western University, London, Ontario
1988 BSc, Physics, University of Alberta, Edmonton, Alberta

Qualifications, Certifications and Licenses
1999 Certification, Radiation Oncology, American Board of Medical Physics

2. EMPLOYMENT

Current Appointments
2015 Oct - present Executive Vice President of Technology & Innovation, University Health Network, Toronto, Ontario, Canada
2015 Jul - present Scientist, Cross-Appointment, Joint Department of Medical Imaging, Toronto, Ontario, Canada
2013 Aug - present Head, Imaging Physics, Universal Health Network, Toronto, Ontario, Canada
2011 Oct - present Director, TECHNA, Institute for the Advancement of Technology for Health, University Health Network, Toronto, Ontario, Canada
2009 - present Professor, Institute of Biomaterials and Biomedical Engineering, University of Toronto, Toronto, Ontario, Canada
2007 - present Professor, Radiation Oncology, University of Toronto, Toronto, Ontario, Canada
2007 - present Professor, Medical Biophysics, University of Toronto, Toronto, Ontario, Canada
2002 - present Orey and Mary Fidani Family Chair in Radiation Physics, Princess Margaret Cancer Centre, Toronto, Ontario, Canada
David Anthony JAFFRAY

2002 - present  Head, Radiation Physics, Princess Margaret Cancer Centre, Toronto, Ontario
2002 - present  Senior Scientist, Ontario Cancer Institute, Toronto, Ontario, Canada

Previous Appointments

HOSPITAL
1993 - 2002  Staff Physicist, Radiation Oncology, William Beaumont Hospital, Royal Oak, Michigan

UNIVERSITY
1997 - 2002  Adjunct Assistant Professor, Department of Physics, Oakland University, Rochester, Michigan

UNIVERSITY - RANK
2002 - 2007  Associate Professor, Radiation Oncology, University of Toronto
2002 - 2007  Associate Professor, Medical Biophysics, University of Toronto

3. HONOURS AND CAREER AWARDS

Distinctions and Research Awards

INTERNATIONAL
Received
2012  Jorge Heller Award, Controlled Release Society, Missouri. (Distinction)

2011  James A. Purdy Lectureship, Washington University in St. Louis, Missouri. (Distinction)

2010  John S. Laughlin Lectureship, Memorial Sloan-Kettering Cancer Center, NY, New York. (Distinction)

2002  Farrington - Daniels Award Best Dosimetry Paper, American Association of Physicists in Medicine. (Distinction)

2001  Sylvia Sorkin Greenfield Best Paper Award, American Association of Physicists in Medicine. (Distinction)

NATIONAL
Received
2014 Jul  Fellow of COMP (FCOMP) Award, Canadian Organization of Medical Physicists, Calgary, Alberta, Canada. (Distinction)

2003  Canada’s Top 40 Under 40 Award, The Caldwell Partners. (Distinction)

2003  Sylvia Fedoruk Award Best Paper in Canadian Medical Physics, Canadian Organization of Medical Physicists. (Distinction)

1986  Summer Studentship, Cross Cancer Institute, Natural Sciences and Engineering Research Council of Canada (NSERC), Alberta Cancer Board, Edmonton, Alberta. (Distinction)
4. PROFESSIONAL AFFILIATIONS AND ACTIVITIES

Professional Associations

2005 - present  Member, American Society for Therapeutic Radiology and Oncology
2005 - present  Member, Canadian Organization of Medical Physicists
2002 - present  Member, Canadian Association of Radiation Oncologists
1988 - present  Member, American Association of Physicists in Medicine

Administrative Activities

INTERNATIONAL

American Association of Physicists in Medicine
2012 Jan - present  Chair, TETAWG (Therapy Emerging Technology Assessment Working Group)
2006 - present  Member, Science Council
2003 - present  Member, Task Group 76, Kilovoltage Image Guided Radiation Therapy
1998 - 2000  Member, Task Group 58 - Electronic Portal Imaging

National Institutes of Health
1999 - present  Reviewer, Center for Scientific Review, (P01, R43, R01, STTR/SBIR)
David Anthony JAFFRAY

NATIONAL

Canadian Institutes of Health Research
2005 - present  **Reviewer**, Medical Physics and Imaging Committee
2003 - present  **Reviewer**

National Cancer Institute of Canada/Clinical Trials Group
2003 - present  **Reviewer**

1998  **Dutch Cancer Society**

MANUSCRIPT REVIEWS
**Reviewer**
1995 - present  **International Journal of Radiation Oncology, Biology and Physics**
Other Research and Professional Activities

COMMUNITY ACTIVITY
Invitation to appear before the House of Commons Standing Committee on Health.

C. Academic Profile

1. RESEARCH STATEMENTS

STATEMENT OF SCHOLARLY ACHIEVEMENT.
1. Contribution to our understanding of the physics factors limiting the performance of megavoltage radiography systems. In the period of 1988-1995, Dr. Jaffray produced 4 papers that covered the scope of physical factors limiting the quality of megavoltage radiographs (as used in portal imaging for radiation therapy). The comprehensive characterization of x-ray source (focal and extra-focal) is a highly cited article that has impacted imaging and treatment planning system design. The development of detailed Monte Carlo and experimental studies on the topics of x-ray scatter and Swank noise are still some of the most comprehensive studies in this area to-date.

2. The development of portal imaging systems for use in radiation therapy. During his Ph.D. studies and during his time as a clinical physicist at William Beaumont Hospital, Dr. Jaffray developed the InfiMED (now Cablon Medical) portal imaging systems and Elekta iView portal imaging systems (software and original hardware design). These are still in use today in an evolved form (over 15 years in use in the community).

3. The development of kilovoltage cone-beam CT for image guided RT arise from the invention of Dr. Jaffray and colleagues (USPTO) while at the William Beaumont Hospital. This work was funded in part by the USAMRMC and NIH. The technology has been licensed to Elekta Oncology systems and cone-beam CT has become the standard for improving the precision and accuracy of radiation therapy throughout the world. There are approaching ~1000 such systems in the field and they are used every day to direct cancer therapy. In addition to developing technology, Dr. Jaffray and his team have been working to advance the practice through publication of results and techniques that rely in image-guidance approaches and technologies. This work has resulted in a sustained demand (>20/year) for invited talks and presentations around the globe on his work. Research in this area is ongoing with several papers and patentable technologies arising each year. The original paper by Dr. Jaffray on this development is one of most highly cited papers in the field of radiation therapy.

4. In addition to his work in image-guided radiation therapy, Dr. Jaffray has led the efforts to establish a comprehensive environment for radiation research at the Princess Margaret Hospital/University Health Network. The STTARR facility represents the state-of-the-art in technology and facility for radiation research in cells and pre-clinical models. This facility opened to the research community in October 2007 and now has over 200 projects operated by over 70 different investigators with research topics ranging from radiation response of normal lung to investigations of novel stroke therapies. The establishment and development of the facility has been a major focus of Dr. Jaffray over the past 5 years and has increased his interest in the topics of biology and nanotechnology.

5. Development of novel contrast agents and sensitzers for radiation therapy. In the interest
of increasing the performance of radiation therapy, Dr. Jaffray has embarked on the
development of nanotechnologies for increase contrast and sensitivity of tumors. The
development of multi-modal contrast agents over the past five years has led to several
technological innovations, as well as, an increased understanding of the nature of
macromolecule transport. The development of a contrast agent with sufficient life-time for
use in image-guidance has been achieved and is being pursued to clinical applications at this
time. In addition, the realization that novel radiosensitizers can be used to increase our
understanding of the physical chemistry of DNA damage, encouraged the pursuit of gold-
nanoparticles for this purpose. The publication of gold nanoparticle sensitization was
acknowledged through the front-cover of the Journal of Radiation Research in 2010.

6. The growing use of image-guided radiation therapy has driven the development of a small-
animal image-guided irradiator. This system was designed by Drs. Jaffray and Hill in
 collaboration with Precision X-ray (CT, USA). These systems have driven research and
development in the design and has resulted in a commercial success (selling 10 systems
thus far). The system continues to be a topic of innovation and has also been the topic of Dr.
Jaffray’s first graduate student in IBBME. Mr. James Stewart is working on the development
of optimization algorithms to drive the robotic elements of the system to enable complex dose
distributions for basic radiobiology studies.

7. A number of other publications (19 peer-reviewed articles in 2011) were produced over the
course of the year. These covered a range of topics in the field of radiation oncology
physics. This work is supported through numerous grants totaling in excess of $2M per year

8. A major focus of Dr. Jaffray’s time in 2011 was the advancement of Techna – The Institute
for the Advancement of Health Technology. This new institute is a collaboration between
UHN and the University of Toronto, with specific alignments with the IBBME. Dr. Jaffray has
raised $10M to expand the faculty in this domain and establish the network that will support a
greater pace of technological advances in healthcare. This program will facilitate the
development of training opportunities for IBBME engineers of both basic and clinical
interests. The institute was launched in November 2011.

D. Research Funding

1. GRANTS, CONTRACTS AND CLINICAL TRIALS

PEER-REVIEWED GRANTS

FUNDED

2015 Jun - 2020 Jun  Principal Investigator. Integrative Systems-Level Imaging (ISLI). Canada Foundation for
Innovation (CFI). Collaborator(s): Joshua A; Jurisica J; Mikulis D; Milosevic M; Murphy K;
Rogalla P; Valliant J; Wilson B; Wouters B. 5,734,904 CAD. [Grants]

Institutes of Health Research (CIHR). Collaborator(s): Boutros P, Coolens C, Dhani N, Fyles
Wouters B, Yeung I. [Grants]

Canadian Cancer Society. PI: Yasufuku K. Collaborator(s): Allen C; Jaffray DA; Weersink R;
Zheng J. 200,000 CAD. [Grants]
2014 Jul - 2019 Jul  **Co-Investigator.** A Research Pipeline for Hypoxia-Directed Precision Cancer Medicine. Terry Fox Research Institute (TFRI). PI: Bristow R; Wouters B. Collaborator(s): **Jaffray DA; Fyles A; Koritzinsky M; Milosevic M; 7,000,000 CAD. [Grants]**

2014 Mar - 2019 Mar  **Principal Investigator.** Advanced Strategies for Image Quality Improvement and Dose Reduction in CT. Natural Sciences and Engineering Research Council of Canada (NSERC). 175,000 CAD. [Grants]

2013 Mar - 2016 Apr  **Principal Investigator.** Improved treatment of cervical cancer through heat-activated delivery of chemoradiosensitizing agents in combination with radiotherapy. Canadian Institutes of Health Research (CIHR). Collaborator(s): Allen C; Milosevic M. 328,486 CAD. [Grants]

2012 Mar - 2016 Apr  **Principal Investigator.** Quantitative Imaging for Personalized Cancer Medicine (ITP-Trials). Ontario Institute for Cancer Research (OICR). Collaborator(s): Bauman G; Caffazo J; Coolens C; Fenster A; Haider M; Keller H; Murphy K; Parraga G; Ward A; Yeung I. 2,373,181 CAD. [Grants]

2011 Apr - 2014 Mar  **Co-Investigator.** ARRT: Adaptive and Robust Radiation Therapy Treatment Planning for Lung Cancer. Natural Sciences and Engineering Research Council of Canada (NSERC). PI: Chan T. Collaborator(s): Bezjak A; Bissonnette JP; Heath EC; Hope AJ; McCann C; Purdie TG; Sharpe MB; Purdie TG; Sharpe MB; 526,246 CAD. [Grants]

2010 Apr - 2017 Mar  **Principal Investigator.** Ontario consortium for adaptive interventions in radiation oncology (OCAIRO). Ontario Research Fund (ORF). Collaborator(s): Aleman D; Battista J; Breen S; Brock K; Caldwell C; Chin L; Cho YB; Clark B; Craig T; Cylger J; Fenster A; Fichtinger G; Islam M; Letourneau D; Mah K; Menard C; Moseley D; Patel R; Peters T; Purdie T; Ravi A; Schreiner J; Taylor M; Wong E. 7,000,000 CAD. [Grants]

2010 Mar - 2015 Apr  **Principal Investigator.** Engineering gold nanoparticle radiosensitizers for cancer therapy.
Canadian Institutes of Health Research (CIHR). Collaborator(s): Allen C, Hill R, Bristow R, Chow J. 710,029 CAD. [Grants]

2010 Jan - 2013 Dec  Co-Principal Investigator. Adaptation of head and neck radiotherapy based on magnetic resonance imaging. Ontario Research Fund (ORF). IMRIS. PI: Breen SL. 360,000 CAD. [Grants]

2009 May - 2012 Jul  Co-Investigator. Prospective study of 4DCT and 4DPET imaging during a course of radical radiotherapy to monitor tumor response and predict treatment outcome for non-small cell lung cancer. National Cancer Institute of Canada (NCIC). PI: Bissonnette JP. Collaborator(s): Bezjak A; Breen S; Freeman M; Hope A; Purdie T; Sun A; Vines D. 285,098 CAD. [Grants]

2008 Apr - 2012 Apr  Co-Principal Investigator. Imaging for clinical trials platform (Cancer Imaging Pipeline Platform). Ontario Institute for Cancer Research (OICR). Collaborator(s): Fenster A. 1,700,000 CAD. [Grants]

2008 Apr - 2012 Apr  Co-Principal Investigator. X-ray and optical probes for next generation detection and diagnosis of cancer (Cancer Imaging Pipeline Platform). Ontario Institute for Cancer Research (OICR). Collaborator(s): Yaffe M. 9,972,000 CAD. [Grants]
2008 Mar - 2011 Feb  **Co-Principal Investigator.** Improved radiation induced lung toxicity prediction with linked pre-clinical/clinical models and biomarkers. National Cancer Institute of Canada (NCIC). Collaborator(s): Hope A, Hill R. 381,099 CAD. [Grants]

2008 Jan - 2012 Dec  **Co-Principal Investigator.** Building the UHN advanced therapeutics research platform. Canada Foundation for Innovation (CFI). Research Hospital Fund. PI: Paige C. 92,255,967 CAD. [Grants]

2008 Jan - 2011 Dec  **Co-Principal Investigator.** Dynamic multi-organ anatomical models for hypofractionated RT design and delivery. National Institutes of Health (NIH) (USA). Collaborator(s): Brock KK. 946,598 USD. [Grants]

2007 Jan - 2012 Dec  **Co-Principal Investigator.** The cardiac regeneration (CARE) project: New therapies for CV. Canadian Institutes of Health Research (CIHR). Collaborator(s): Weisel R. 2,500,000 CAD. [Grants]

2007 Jan - 2011 Jan  **Co-Principal Investigator.** The regenerative medicine project (the REMEDI project). Canadian Institutes of Health Research (CIHR). Collaborator(s): Weisel R. 18,050,000 CAD. [Grants]

2007  **Co-Investigator.** Multi-scalar, multi-modal imaging agent for detection and targeting. Ontario Institute for Cancer Research (OICR). Collaborator(s): Allen C. 80,000 CAD. [Grants]

2007  **Principal Investigator.** Development of a framework to standardize acquisition and analysis of PET images for clinical trials. Ontario Institute for Cancer Research (OICR). 80,000 CAD. [Grants]

2007  **Principal Investigator.** Lung cancer biomarker imaging (IMM-10). Ontario Institute for Cancer Research (OICR). 80,000 CAD. [Grants]

2006 Jan - 2010 Dec  **Principal Investigator.** Spatio-temporal targeting and amplification of radiation response. Canada Foundation for Innovation (CFI). 1,167,954 CAD. [Grants]

2006 - 2009  **Co-Investigator.** On-line perfusion measurement with contrast enhanced cone-beam CT in radiation therapy. Canadian Institutes of Health Research (CIHR). Collaborator(s): Yeung I. 166,087 CAD. [Grants]

*UHN RaySearch corporation research collaboration.*

2006 - 2008  **Principal Investigator.** Development of a multi-modal imaging contrast agent platform. Canadian Institutes of Health Research (CIHR). 1,311,089 CAD. [Grants]

Principal Investigator. A prospective study to evaluate cone-beam CT in the planning of patients for palliative radiotherapy. Elekta Oncology Systems. 87,000 CAD. [Industrial Grants]

Principal Investigator. Stereotactic radiotherapy for primary and metastatic liver cancer. Elekta Oncology Systems. 87,000 CAD. [Industrial Grants]

Principal Investigator. Spatio-temporal targeting and amplification of radiation response (STTARR) innovation centre. Canada Foundation for Innovation (CFI). Ontario Innovation Trust. 9,824,217 CAD. [Grants]

Principal Investigator. Hypoxia program project grant. National Cancer Institute of Canada (NCIC). 660,000 CAD. [Grants]

Co-Investigator. Excellence in radiation research for the 21st century. Canadian Institutes of Health Research (CIHR). Strategic Training Grant. 500,000 CAD. [Grants]

Principal Investigator. Multi-modality contrast agents for image-guided radiation therapy. Premier’s research excellence award (PREA). 137,000 CAD. [Grants]

Principal Investigator. Flat-panel cone-beam CT for image-guided radiotherapy (8R01EB002470-04). National Institutes of Health (NIH) (USA). National Institute for Biomedical Imaging and Bioengineering. 1,079,708 USD. [Grants]
NON-PEER-REVIEWED GRANTS

FUNDED

2014 Apr - 2015 Apr  
**Principal Investigator.** Image-Guided Drug Delivery. Merrimack Pharmaceuticals Inc. 299,570.14 CAD. [Industrial Grants]

2013 Feb - 2014 Feb  
**Principal Investigator.** Image-Guided Drug Delivery. Merrimack Pharmaceuticals Inc. 259,323.16 CAD. [Industrial Grants]

2012 Oct - 2014 Oct  
**Principal Investigator.** Characterization of Tumor Hypoxia Following Chemotherapy. Merrimack Pharmaceuticals Inc. 171,653.96 CAD. [Industrial Grants]

2012 Feb - 2013 Feb  
**Principal Investigator.** Image-Guided Drug Delivery. Merrimack Pharmaceuticals Inc. 260,840.24 CAD. [Industrial Grants]

2011 Feb - 2012 Feb  
**Principal Investigator.** Image-Guided Drug Delivery. Merrimack Pharmaceuticals Inc. 173,392.65 CAD. [Industrial Grants]

2010 Jun - 2013 Jun  
**Co-Principal Investigator.** Pop-Cure. Pfizer Canada Inc. Collaborator(s): Wouters B, Neel B, Shaw P, Dick J, O’Brien C, Hudson T, McPherson J, Milosevic M. 6,001,162 CAD. [Industrial Grants]

2007 Jan - 2010 Jan  
**Co-Principal Investigator.** A pilot prospective study of FDG-PET-CT imaging utility in radiotherapy treatment planning and assessment in all stages and histological types of lung cancer. Philips Medical Systems. Collaborator(s): Sun A. 124,000 CAD. [Industrial Grants]

2007  
**Principal Investigator.** Imaging-enabled liposome platform to adaptively modulate the micro-distribution of targeted therapeutics. Johnson & Johnson (J&J). 80,000 CAD. [Industrial Grants]

2006 May - 2011 May  
**Principal Investigator.** Treatment design and response monitoring in the head and neck using multimodal imaging (Head and Neck). Philips Medical Systems. 1,142,480 CAD. [Industrial Grants]

2006 - 2008  
**Principal Investigator.** Development of auto-segmentation and online planning tools for palliative process. Philips Medical Systems. 174,128 CAD. [Industrial Grants]

2006 - 2008  
**Principal Investigator.** Quantification of deformation response (deformation). Philips Medical Systems. 174,128 CAD. [Industrial Grants]

2005 - 2008  
**Co-Investigator.** Accelerated education program: Image guided radiation therapy. Elekta Oncology Systems. RMP. 1,027,000 CAD. [Industrial Grants]

2003 - 2008  
**Principal Investigator.** An MR-based simulation process for advanced radiation therapy. Varian Oncology Systems. 1,400,000 CAD. [Industrial Grants]

2003 - 2005  
**Principal Investigator.** Flat-panel cone-beam CT on a mobile c-arm. Siemens Medical Systems Inc. SP Division. 310,000 USD. [Industrial Grants]

2002 - 2005  
**Principal Investigator.** On-line guidance technologies for precision radiation therapy. Elekta Oncology Systems. 1,196,600 CAD. [Industrial Grants]

Invited Lectures and Presentations

2014 May 15 Invited Speaker. Imaging - Advances in Clinical Management (Clinical Research). Princess Margaret Cancer Centre Fifth Annual Faculty Retreat. Huntsville, Ontario, Canada.

4. LOCAL

Invited Lectures and Presentations

2015 Dec 10 **Invited Lecturer.** Imaging Technologies. Regenerative Medicine graduate course (MSC7000Y), Toronto General Hospital. Toronto, Ontario, Canada.

2015 Oct 15 **Invited Speaker.** Amsterdam to Vienna. Radiation Medicine Program Rounds, Princess Margaret Cancer Centre. Toronto, Ontario, Canada. Presenter(s): Drs. Mary Gospodarowicz, **David Jaffray**, Danielle Rodin.

2015 Apr 17 **Invited Speaker.** IGRT Technology: How did we get here? Accelerator Technology (ATec) Education Course Webinar, Accelerated Education Program, Princess Margaret Cancer Centre. Toronto, Ontario, Canada.

2015 Mar 26 **Invited Lecturer.** Imaging Technologies. Regenerative Medicine Course Lecture, Training Program in Regenerative Medicine, Toronto General Hospital. Toronto, Ontario, Canada.

2015 Mar 6 **Invited Speaker.** Imaging Quality in CBCT. Liver SBRT IGRT Education Course, Accelerated Education Program, Princess Margaret Cancer Centre. Toronto, Ontario, Canada.

2014 Oct 21 **Invited Speaker.** Cone beam CT Primer. International Society for Pediatric Oncology Meeting. Toronto, Ontario, Canada.

2014 Jun 6 **Invited Speaker.** The RMP Quality and Safety Framework at PMH. Princess Margaret Cancer Centre, Quality & Safety in Radiation Therapy Education Course. Toronto, Ontario, Canada.

2014 Jan 30 **Invited Lecturer.** Imaging Technologies. University of Toronto, Faculty of Medicine, Institute of Medical Science. Toronto, Ontario, Canada. Regenerative Medicine graduate course (MSC7000Y).

2013 Jun 19  **Chair.** MR-guided Radiation Delivery: An Emerging Paradigm. 11th ISRS Congress. Toronto, Ontario, Canada.

2013 Apr 4  The Basics of IGRT: Cone-beam CT Primer. Princess Margaret Cancer Centre, Radiation Medicine Program. Toronto, Ontario, Canada.

2013 Apr 3  The Basics of IGRT: Cone-beam CT Primer. Princess Margaret Cancer Centre, Radiation Medicine Program, Head & Neck IGRT Education Course. Toronto, Ontario, Canada.

2013 Mar 2  **Keynote Speaker.** Future of Radiation Therapy. RTi3 Conference. Toronto, Ontario, Canada.

2013 Mar 2  **Invited Speaker.** Future of Radiation Therapy. RTi3 Conference. Toronto, Ontario, Canada.

2013 Jan 17  Cone-beam CT Primer. Lung IGRT Education Course: The Basics of Lung IGRT. Princess Margaret Cancer Centre, Radiation Medicine Program. Toronto, Ontario, Canada.

2013 Jan 17  Cone-beam CT Primer. Princess Margaret Cancer Centre, Radiation Medicine Program, Lung IGRT Education Course: The Basics of Lung IGRT. Toronto, Ontario, Canada.

2012 May 9  **Invited Speaker.** Personalized Cancer Medicine 101. PMHF’s Professional Advisors Appreciation Luncheon. Toronto, Ontario, Canada.

2012 Apr 18  **Invited Speaker.** Innovation in the Healthcare Setting: Concepts, Examples, and Opportunities. Technology and Engineering in Medicine (STEM), University of Toronto. Toronto, Ontario, Canada.

2012 Apr 12  **Invited Speaker.** Unus pro omnibus, omnes pro uno. RMP Rounds, Princess Margaret Hospital. Toronto, Ontario, Canada.

2012 Jan 26  Techna Institute: Advancing Technologies for Health A New Institute, A New Way of Thinking, A Formula for Healthcare, Innovation and Commercialization. PMH Innovation Rounds, Princess Margaret Hospital. Toronto, Ontario, Canada.

2011 Aug 30  Safety, Quality and Science: Aligning for Progress in RT. RMP Physics Seminar, Princess Margaret Hospital. Toronto, Ontario, Canada.

2010 Apr  Technology and the Research Hospital. GTX Symposium Hart House, University of Toronto. Toronto, Ontario.

2008 Jun  IGRT Cone-Beam CT Primer, IGRT Implementation Strategies, Exploring the Frontiers of Image

2007 Oct    Are We Equipped to Integrate and Support Technology in the RT Setting. The Royal College of Physicians and Surgeons of Canada at the Meeting of the Canadian Association of Radiation Oncology (CARO). Toronto, Canada.

2007 May    IGRT II: Retooling Radiation Therapy. RMP Rounds, Princess Margaret Hospital. Toronto, Ontario.

2006 Nov    The RT Target Problem and PET Imaging. University of Toronto, Faculty of Pharmacy. Toronto, Ontario.

2006 Nov Visiting Professor. The RT Target Problem and PET Imaging. University of Toronto, Faculty of Pharmacy. Toronto, Ontario.

David Anthony JAFFRAY

Children, Grand Rounds. Toronto, Ontario. (Continuing Education).

2006 May  Target Insight: Innovative Strategies for Target Definition to Enhance the Therapeutic Ratio. The STTARR Program. Toronto, Ontario.

2005 May  Everyone is a STTARR. Innovation in Radiation Medicine Rounds, Princess Margaret Hospital. Toronto, Ontario.

2005 Feb  Designing, Assessing, & Guiding Therapy Through Time Course Multimodal Imaging. Proposed University of Toronto Centre for Clinical Technologies and Medical Devices Call for Participation in the Institute of Biomaterials & Biomedical Engineering, University of Toronto (IBBME). Toronto, Ontario.

2001 Aug  Visiting Professor. A system for high-precision radiotherapy of the prostate. Princess Margaret Hospital, University of Toronto. Toronto, Ontario.

### 2004 - 2008

**Co-Supervisor.** MSc. Sean Graham. *Compensators in cone-beam computed tomography.*

**Co-Supervisor.** MSc. Robert Dinniwell. *Delineation of lymphatic structures using USPIO.*

**Co-Supervisor.** MSc. Philip Chan. *Geometric targeting in radiation therapy for cancer of the cervix.*

### 2003 - 2008

**Primary Supervisor.** PhD. Alexandra Rink. *Radiation dosimeter based upon radiation-inducation changes in the optical properties of different media.*

**Co-Supervisor.** MSc. Mirel Palamaru. *Optimization of energy for lung radiosurgery.*

**Co-Supervisor.** MSc. Robert Dinniwell. *Delineation of lymphatic structures using USPIO.*

**Co-Supervisor.** MSc. Philip Chan. *Geometric targeting in radiation therapy for cancer of the cervix.*

### 1999 - 2000

**Primary Supervisor.** MSc. Douglas Drake. *Characterization of a fluoroscopic imaging system for kV and MV radiotherapy.*

**Co-Supervisor.** PhD. Laura J. Pisani. *Limitations of patient set-up precision in external beam radiation therapy.*

### 1997 - 2000

**Primary Supervisor.** MSc. Yan Zhang. *Veiling glare in fluoroscopic portal imaging systems.*

**Co-Supervisor.** MSc. Kamal Chawla. *Fixed pattern noise in fluoroscopic portal imaging systems.*

### Postgraduate MD

**2005 - 2008**

**Co-Supervisor.** Clinical Fellow. Kevin Franks. *Stereotactic radiation therapy of the lung.*

**2003 - 2004**

**Co-Supervisor.** Clinical Fellow. Alan Nichol. *Influence of bowel preparation on the mobility of the prostate.*

**2001 - 2002**

**Primary Supervisor.** Clinical Fellow. Michel Ghilezan. *MR studies of prostate motion.*

**1998 - 2000**

**Primary Supervisor.** Larry Kestin. *Improving the dosimetric coverage of interstitial high-dose-rate breast implants.*

### Postdoctoral Research Fellow (PhD)

**2014 Aug - present**

**Primary Supervisor.** Erik Pearson. *CT reconstruction methods for clinical and pre-clinical applications.*

**2013 Sep - present**

**Primary Supervisor.** Fred Sun. *Nanotechnology based X-Ray devices.*

**2014 May - 2015 Mar**

**Primary Supervisor.** Kimia Ghobadi. *Optimization methods in inverse treatment planning for continuous dose delivery with Perfexion.*

**2013 Dec - 2015 May**

**Primary Supervisor.** Tord Hompland. *Functional MRI for assessing and predicting tumor response to radiation treatment.*

**2003 - 2006**

**Primary Supervisor.** Kristy Brock. *Utilization of MR-derived image sets in radiation therapy and research.*

**2003 - 2006**

**Primary Supervisor.** Harald Keller. *Development of intervention strategies for geometric guidance of field placement.*

**2002 - 2003**

**Primary Supervisor.** AfSaneh Amirabadi. *X-ray scatter in cone-beam CT.*

**2000 - 2001**

**Primary Supervisor.** Carl Rowbottom. *Imageable dosimeters for integral checks of IGRT.*

**1998 - 2000**

**Primary Supervisor.** Jeffrey Siewerdsen. *Flat-panel cone-beam CT.*

**1997 - 1999**

**Co-Supervisor.** Michel Moreau. *Geometric characterization of a medical linear accelerator.*
Curriculum Vitae

Brian Michael Keller
PhD, DABR, FCCPM

A. Date Curriculum Vitae is Prepared: 2016 June

B. Biographical Information

Primary Office: Sunnybrook Health Sciences Centre
Odette Cancer Centre
Department of Medical Physics, Rm TG-284
2075 Bayview Avenue
Toronto, Ontario
CANADA M4N 3M5

Business Telephone #: 416-480-5000 ext. 1094

E-mail Address: Brian.Keller@Sunnybrook.ca

Citizenship: Canadian
1. EDUCATION

Degrees

2009  Ph.D., Radiation Medicine / Medical Physics, University of Toronto, Toronto, Ontario
1994  M.Sc., Radiation Physics, McGill University, Montreal, Quebec
1991  B.Sc., Honours Physics, University of Waterloo, Waterloo, Ontario

Postgraduate, Research and Specialty Training

1994 - 1995  Fellowship in Clinical Radiation Physics, Department of Radiation Oncology, University of Miami, Florida. Supervisor: Joseph Ting
Supervisor: John Schreiner
1981 - 1986  Bluevale Collegiate Institute, Waterloo, Ontario  
SSHGD (Secondary School Honour Graduation Diploma)

Qualifications, Certifications, Licenses

2010 Oct  Peer Review B Credentialing Achieved, Credentialing Committee, Cancer Care Ontario, Ottawa, Ontario
2010  Fellowship (FCCPM), Canadian College of Physicists in Medicine
1998  Diplomate (DABR), American Board of Radiology, United States
2. EMPLOYMENT

Current Appointments

2014 Jul 1 – present  
**Associate Member**, Institute of Medical Sciences, University of Toronto, Toronto, Ontario, Canada  
*Primary Graduate Unit*

2014 Jan – present  
**Senior Staff Physicist**, Dept Medical Physics, Sunnybrook Health Sciences Centre, Odette Cancer Centre, Toronto

2013 Jan – present  
**MRI-Linac Physics Lead**, Clinical Implementation and Projects

2012 Jan – present  
**Education Site Lead**, Physics Residency Program U of T, Dept Medical Physics, Sunnybrook Health Sciences Centre, Odette Cancer Centre, Toronto  
*Medical Physics Residency Training Program*

2010 Jan – present  
**Assistant Professor**, Dept Radiation Oncology, University of Toronto, Toronto, Ontario

Previous Appointments

2013 Jan –2013 Dec  
**Interim Chief**, Department of Medical Physics  
Sunnybrook Health Sciences Centre, Toronto, Canada  
- Responsible for Staff of 40, including 18 PhD Physicists  
- Site Lead for Medical Physics Residency Program  
- Operations / Organization of Workload Structure  
- Implementation of Site-Based Model  
- Managing a Budget of about 6 Million per annum  
- Negotiations with 3 Union Groups  
- HR related issues  
- Purchasing / Procurement for Capital Equipment  
  *MRI Linac, Gamma Knife, Linacs*

2010 Dec – 2012 Dec  
**Senior Staff Physicist** (as per CCO definition of senior physicist), Dept of Medical Physics, Sunnybrook Health Sciences Centre, Odette Cancer Centre, Toronto

**Staff Medical Physicist**, Dept of Medical Physics, Sunnybrook Health Sciences Centre, Odette Cancer Centre, Toronto  
- Development of High Dose Rate Prostate Program (2001)  
- Responsible for QA of Linear Accelerators (2001 - 2012 )
- Patient Radiation Chart QA (2001 - Present)
- Development of Permanent Breast Seed Implant Program and Lead Physicist (2003 - Present)
- High Dose Rate Brachytherapy (2001 - 2012)
- Head of SBRT Lung Program (2009 - 2012)
- Physics Lead, Residency Training Program atOdette Cancer Centre as of 2012
- Physics Lead for Breast Site Group (2011-2012)
- Lead Physicist for Active Breathing Coordinator (ABC) for Motion Management during Breast Radiotherapy (2011 - 2012)

1999 – Sept 2000  **Consultant Medical Physicist**, Radiation Physics, Inc., Miami, Florida, USA
- Instituted first prostate seed implant program in Puerto Rico
- Linacs: Siemens, Varian, GE
- Planning: Pinnacle, CMS Focus

1995 – 1999  **Staff Medical Physicist**, Mount Sinai Comprehensive Cancer Center, Department of Radiation Oncology, Miami Beach, Fl

External Beam: Pinnacle TPS, Varian Linacs, IORT, Superficial unit, Co-60 unit

Brachytherapy: HDR: lung, gyn, sarcomas (150 cases/yr)  
LDR: prostate

- Developed HDR Prostate Program (1997)
- Developed Novel Total Body Irradiation Program (1996)

1994 – 1995  **Gamma Knife Radiosurgery Physicist**, Department of Radiation Oncology, University of Miami, Miami, FL.
- Clinical Implementation of Gamma Knife Treatment Unit
- Planned & Treated 150 patients during first year

**OTHER**

Ionizing Radiation Standards Laboratory
*Co-op work experience*
Electron spin resonance (esr) was used to probe radiation induced changes in alanine pellets. The esr / alanine dosimeter is presently in use as a food irradiation dosimeter. Supervisor: Norman Klassen

1990 April – 1990 Aug  Ottawa General Hospital, Department Physiology, Ottawa  
*Co-op work experience*

- Dosimetry characterization of a Cs-137 small animal irradiator

1989 Sep – 1989 Dec  University of Notre Dame, South Bend, Indiana, USA  
Radiation Laboratory  
*Co-op work experience*

- Radiation Chemistry Research  
- Pulse radiolysis using high energy electron beams to characterize lifetimes of short lived ions and radicals

*Co-op work experience*

- Development of a high energy absorbed dose standard for photons and electrons (eventually TG-51)  
  Supervisor: David Rogers' group

*Co-op work experience*

HIGHLIGHTS OF CLINICAL SERVICE & LEADERSHIP

- Implemented/Lead Gamma Knife Radiosurgery Program (1994)  
- Developed/Lead a Pediatric Total Body Irradiation Program (1996)  
- Developed the first Prostate Seed Implant Program on the island of Puerto Rico: Involved flying to island for first few cases then dosimetry done remotely (1999)  
- Lead physicist for first CT-based HDR Prostate Program in South Florida (1998)  
- In charge of Co-60 teletherapy source replacement (1998)  
- Commissioned Pinnacle Treatment Planning System (1998)  
- Acted as interim Head of Physics in busy Miami clinic for 6 months (1996)  
- Co-developer and Lead medical physicist in Permanent Breast Seed Implant program, the first of its kind. The permanent breast seed implant eliminates 4-6 weeks of external beam radiation in select patients (2004 – present). Have lead
breast seed implant program for past 10 years, through 3 clinical trials, since its inception.

- Lead the development of the HDR prostate program at Sunnybrook in 2001.
- Lead the commissioning team for Siemens Primus linear accelerator (photons and electrons) in 2001 at Sunnybrook.
- Resource physicist (for electronics, therapists) for a number of linacs that I have been responsible for over the past 10 years at Sunnybrook. In general, I have had a minimum of 2 linacs at all times throughout the past 16 years of clinical physics service.
- Lead physicist for SBRT Lung (Ablation) Program at Sunnybrook (2009 – 2012)
- Interim Chief, Department of Medical Physics, Sunnybrook Odette Cancer Centre (Jan 2013 – Dec 2013)

3. HONOURS AND CAREER AWARDS

Distinctions and Research Awards

INTERNATIONAL

Received

2006 Aug  Poster of Special Merit, American Association of Physicists in Medicine, Annual Meeting, Orlando, Florida August 2006 (Distinction)
“First report on a badge survey for family members living with permanent Pd-103 breast seed implant patients”

NATIONAL

Received

2006 Jun  Best Oral Presentation at conference “2nd Place”, Canadian Organization of Medical Physicists Meeting, Saskatoon, Saskatchewan (Distinction)
“Characterization of Intermediate Energy X-Ray Photons (0.2 - 1.0 MeV) for stereotactic radiosurgery: experimental demonstration of reduced radiological penumbra”

PROVINCIAL / REGIONAL

Received
1986  **Ontario Scholar Award**, Ontario, Canada  
*Total Amount = 100*

**LOCAL**  
**Received**

2008  **Doctoral Research Award**, University of Toronto, Faculty of Medicine, Toronto, Ontario, Canada (Research Award)  
*Total Amount = 20,000*

2006  **Alan Wu Poster Competition “Honourable Mention”**, IMS Annual Scientific Day, University of Toronto, Faculty of Medicine, Toronto, Ontario (Distinction)  
*Total Amount = 25*

2006  **Doctoral Research Award**, University of Toronto, Faculty of Medicine, Toronto, Ontario, Canada (Research Award)  
*Total Amount = 20,000*

2005  **Doctoral Research Award**, University of Toronto, Faculty of Medicine, Toronto, Ontario, Canada (Research Award)  
*Total Amount = 20,000*

2005  **Open Fellowship Award**, Institute of Medical Science, University of Toronto, Faculty of Medicine, Ontario, Canada  
*Total Amount = 5000*

**Teaching and Education Awards**

**LOCAL**  
**Received**

2011 Jul – 2012 Jun  **Teaching Award**, Department of Radiation Oncology, Faculty of Medicine, University of Toronto, Dept of Radiation Oncology  
*Excellence in Physics Teaching*

**4. PROFESSIONAL AFFILIATIONS AND ACTIVITIES**

**Professional Associations**

- **Full Member**, Canadian Organization of Medical Physicists (COMP)  
- **Full Member**, American Association of Physicists in Medicine (AAPM)
**Full Member**, International Radiation Physics Society (IRPS)
**Full Member**, American Society for Radiation Oncology (ASTRO)

**Administrative Activities**

**INTERNATIONAL**

2012 – Present  **Member**, Elekta MR-Linac Consortium Group
2013 – Present  **Member**, Quality Assurance Working Group, MR-Linac Consortium
2013 – 2014  **Member**, MRI Working Group, MR-Linac
2014 – Present  **Member**, Breast Tumour Site Group Physics Representative, MR-Linac Consortium

**NATIONAL**

Canadian College of Physicists in Medicine (CCPM)

2011 Mar 12  **Exam Invigilator**, MCCPM exam, Canada
2012 Mar  **Exam Invigilator**, MCCPM exam, Canada
2013 Mar  **Exam Invigilator**, MCCPM exam, Canada

**PROVINCIAL / REGIONAL**

2013  **Member**, Physics Professional Advisory Committee (PPAC)

**LOCAL**

Sunnybrook Odette Cancer Centre

2013  **Member**, Clinical Operations Committee for the Radiation Program
2013  **Member**, Steering Committee for the Radiation Program
2013  **Member**, Selection Committee for Radiation Program Head
2012  **Member**, Odette Strategic Planning Advisory Group
   *Establishing the 5 year plan for the Odette Cancer Program*
2012 - Present  **Member**, Professional Education Program Advisory Committee
   *Established speaker list for monthly rounds*
2011  **Physics representative**, RESPECT Program
   *Monthly meetings*
2011 - Present  **Co-ordinator**, Physics Rounds
2001 – 2003  **Consultant**, Canadian Radiation Oncology Services (CROSS)

**University of Toronto, Department of Radiation Oncology**

2016 Jan  **Member**, Physics Residency Interviews, Hired 1 Physics Resident
2015 Jan  Member, Physics Residency Interviews, Hired 2 Physics Residents
2014 Nov  Member, Physics Residency Interviews, Hired 2 Physics Residents
2013 Nov  Member, Physics Residency Interviews, Hired 1 Physics Resident
2013 June Member, Physics Residency Interviews, Hired 1 Physics Resident
2013 - Present Member, Program Review Committee, Michener Institute
Periodic (typically quarterly) review of students in difficulty and
recommendations to board of examiners.
2013 - Present Member, Executive Committee
2013 - Present Member, Promotions Review Committee, Michener Institute
2011 Member, Informatics for Radiation Oncology / Data Warehouse
2011 – Present Member, Physics Residency Program Committee (PRPC)
Regular meetings and improvements to program
Re-accreditation process in 2013
Candidate selection hiring / interview process
2010 - Present Member, Residency Program Committee (RPC)
2010 Interview Panel Member, CaRMS interviews

University of Toronto, Institute of Medical Science

2016- Judge, Alan Wu Poster Competition
2015 - Judge, Alan Wu Poster Competition

Ryerson University

2014 - Member, Medical Physics Undergraduate Program Advisory
Committee
3 year term commitment

Moderator

2016 Aug MRgRT Session, AAPM Annual Meeting, 2 hour session
2013 Sept Brachytherapy Session: COMP/CARO Annual Meeting,
Montreal, 1.5 hours

Editorial & Peer-Reviewed Manuscript Responsibilities

International Journal of Radiation Oncology Biology Physics

Physics in Medicine and Biology
Radiation Oncology
C. RESEARCH FUNDING

1. GRANTS, CONTRACTS AND CLINICAL TRIALS

Currently funded as Co-Principal Investigator

Jan 2016 - Evaluation of a Linear Accelerator Software (SIMAC) for use in educating physics residents.
Principal Investigators (PI): M Carlone, B Keller, N Harnett, and A McNiven
University of Toronto / Department of Radiation Oncology Seed Funding Grant
Total amount funded = 62,500 over 1 years

2014 March - Elekta Industry Funding / Contract
MRI Linac: Evaluation & Development of the Monaco Treatment Planning System for the Elekta MRI Linac
Elekta Funding
Principal Investigators (PI): B Keller & A Sahgal
Total Amount Funded = 602,500 over 3 years

Currently funded as Co-Investigator

June 2016 - 4D Phantom for MR-guided Radiation therapy
Principal Investigator (PI): Brige Chugh
Co-Investigators: Song W, Keller BM, Soliman A, Stanisz G, Sahgal A.
Total amount funded = 40,000

2014 Jan - High fidelity simulation-based training in radiation therapy: attitudes and behaviors towards safety in radiation therapy.
Ontario Simulation Network
Principal Investigator: Jean-Pierre Bissonnette
Co-Investigators: Keller BM, Catton P, Szumacher, E, Liszewski B, and DiProspero, L.
Total amount funded = 25,000 (one time, non-renewable)
Previously funded as PI

2007 Feb  Development of a Digital Microscopy Imaging System to Analyze Dose Gradients in Radiochromic Films
Canadian Head & Neck Cancer Foundation.
Total Amount: 40,000 (one time, non-renewable)
**Principal Investigator: Keller B**
Co-investigator: Pignol JP

Previously funded as Co-Investigator

University of Toronto / Department of Radiation Oncology
Principal Investigators: Purdie T, Ruschin M, Zhang B
Total amount funded = 62,500 over 1 years (Oct 1 2013 – Sept 30 2014)

2009 Mar  A phase II study of adjuvant permanent breast seed implant (PBSI) for ductal carcinoma in situ (DCIS). Funded by The Canadian Breast Cancer Foundation (CBCF) - Ontario Chapter.
Total amount funded = 448,340 over 3 years (2009-2012)
Principal Investigator: Jean-Philippe Pignol
Co-Investigators: Rakovitch E, Caudrelier JM, Paszat L, **Keller B** and Cygler J.

Total Amount Funded: 297,300 over 3 years (2006-2009)
Principal Investigator: Jean-Philippe Pignol
Co-investigators: Caldwell C, **Keller B**, Beachey D, Reznik A.

2004 Apr  A Phase I/II clinical trial evaluating the safety and the feasibility of Breast Permanent Implant (BPI) using 103-Palladium seeds for partial breast radiation. Funded by The Canadian Breast Cancer Foundation (CBCF) - Ontario Chapter.
Total amount funded = 283,858 over 3 years (2004-2007)
Principal Investigator: Jean Philippe Pignol
Co-Investigators: **Keller B**, Rakovitch E, Benk V, Sankreacha R, Que W.
A Phase I/II Study of single fraction High Dose Rate (HDR) brachytherapy and hypofractionated external beam radiotherapy in intermediate risk carcinoma of the prostate. Funded by The Canadian prostate cancer research initiative (CPCRI).
Total amount funded = 26,404.
Principal Investigator: Gerard Morton
Co-Investigators: Morton G, Loblaw A, Sankreacha R, Keller B.

CLINICAL TRIALS

Keller BM, Lee J, McCann C et al. A prospective trial comparing two breast irradiation techniques in terms of dose to the heart. (July 2014, submitting to ethics for approval and applying for research funding for this trial, aiming for multi-center trial)

Pignol JP, Caudrelier JM, Rakovitch E, Keller B and Cygler J. A phase II study of adjuvant permanent breast seed implant (PBSI) for ductal carcinoma in situ (DCIS) (April 2009 - Present). REB# OCREB 09-012 CBCF

D. Publications

1. PEER-REVIEWED PUBLICATIONS

   (PA = primary author, SRA = senior responsible author, CPA = co-principal author, C = collaborator)

Journal Articles

9. Keller BM, Beachey D and Pignol JP. Experimental measurement of radiological penumbra associated with intermediate energy x-rays (1 MV) and small radiosurgery field sizes. Med Phys 34(10), 3996-4002, 2007. (PA)

Submitted Journal Articles

Abstracts (Peer-Reviewed)

76 Ahmad S, Sarfehnia A, Sahgal A, Keller B. Backscatter dose factors re-evaluated for inhomogeneities in the presence of a 1.5 T magnetic field using the GPUMCD Monte Carlo algorithm. Med Phys 43(6), 3854, 2016.

82. H Nusrat, G Pang, SB Ahmad, B Keller, A Sarfehnia. Towards LET detection: a study on effects of scintillator doping. (Accepted to COMP for 2016)

83. Hahn E, Soliman H, Vesprini D, Bosnic S, Keller BM,McCann C, Makhani N, Lee J. Hypofractionated partial breast irradiation for locally advanced breast cancer in metastatic and medically inoperable patients (Accepted to CARO and ASTRO for 2016).

2. NON-PEER-REVIEWED PUBLICATIONS & GOVERNMENT REPORTS

Articles and Reports

Book Chapters

Patents / Disclosures

A. Presentations and Special Lectures

PRESENTATIONS (PEER-REVIEWED)

1. INTERNATIONAL

2009 Keller et al. Small field intracranial radiosurgery using intermediate energy x-rays (1 MV) to improve dose gradient and homogeneity. American Association of Physicists in Medicine annual meeting, Anaheim, California, July 2009. (Oral)

2006 Keller et al. Intermediate energy x-ray photons (0.2 - 1.0 MeV) for radiosurgery: producing a beam and measurement of radiological penumbra. American Association of Physicists in Medicine annual meeting, Orlando, Florida, August 2006. (Oral)
2006 Keller et al. Characterization of Intermediate Energy X-Ray Photons (0.2 - 1.0 MeV) for stereotactic radiosurgery: experimental demonstration of reduced radiological penumbra. American Association of Physicists in Medicine annual meeting, Orlando, Florida, August 2006. (Oral)

2002 Keller et al. A retrospective study of total treatment time versus prostate gland volume in HDR prostate brachytherapy for two institutes. The American Association of Physicists in Medicine annual meeting, Montreal, Canada 2002.

2. NATIONAL (PEER-REVIEWED)

2006 Keller et al. Intermediate energy x-ray photons (0.2 – 1.0 MeV) for stereotactic radiosurgery applications: demonstration of reduced penumbra. Canadian Brain Tumour Symposium, Winnipeg, Manitoba, May 2006. (Oral)

2006 Keller et al. Characterization of intermediate energy x-ray photons (0.2 - 1.0 MeV) for stereotactic radiosurgery: experimental demonstration of reduced radiological penumbra. Canadian Organization of Medical Physicists annual meeting. Saskatoon, Saskatchewan, June 2006. (Oral)

1993 Keller et al. NMR studies of the Fricke-gelatin dosimeter. The Canadian Organization of Medical Physicists annual meeting, Ottawa, Ontario, May 1993. (Oral)

3. PROVINCIAL / REGIONAL (PEER-REVIEWED)

2001 Keller et al. HDR prostate brachytherapy as a new treatment option at Toronto-Sunnybrook Regional Cancer Centre. 18th Cancer Care Ontario Biennial Research Conference, November 2001. (Oral)

INVITED LECTURES AND PRESENTATIONS

INTERNATIONAL

2015 Dec 5 MRI Linac Current Research and Progress Update. Consortium Meeting, Houston, Texas at MD Anderson, USA

2015 Sep 14 Evaluation of a GPU-Based Monaco Algorithm for use with the MRI Linac. University Medical Centre, Utrecht, The Netherlands.

2013 Oct 30 MRI Linac Research Projects Update. Consortium Meeting, Houston, Texas at MD Anderson, USA

NATIONAL

2009 May 31 Breast Seed Therapy. American Brachytherapy Society Annual Meeting, Toronto, Canada
2009 May 1  *Intermediate energy x-rays for high precision, small field radiation therapy*. National Cancer Institute of Canada grant group meeting hosted by Luc Beualieu, Quebec City, Canada

**LOCAL / REGIONAL**

2015 Nov 11  Monaco and the MRI Linac. Cancer Ablative Therapy (CAT) Program in Action, Department of Radiation Oncology, Sunnybrook Health Sciences Centre, Toronto.

2015 May 22  *The Atlantic Project: Current Status*. Department of Medical Physics, Sunnybrook Odette Cancer Centre, Toronto.

2013 Sept 4  *MR Linac Project Update*. Department of Medical Physics, Sunnybrook Odette Cancer Centre, Toronto.

2011 Dec 19  *Implementation of Active Breathing Coordinator (ABC) for Left Sided Breast Cancer Patients*, Physics Rounds, Department of Medical Physics, Sunnybrook Odette Cancer Centre, Toronto.

2009 Sept 8  *Intermediate energy x-rays (1 MV) for high precision, small field radiosurgery*. Inter-disciplinary Radiation Oncology Rounds, web-cast, Sunnybrook Odette Cancer Centre, Toronto.

**MULTIMEDIA**

**INTERNATIONAL**

2005  HeartBeats episode on the permanent breast seed implant technique for women with early stage breast cancer, Women’s Network.

NATIONAL

LOCAL / REGIONAL

2004 Sep 9  “Breast cancer treatment takes one hour”, The Toronto Star, Ontario, Canada.

B. Research Supervision

Research Supervisor

2015 Sept – April  Stephanie Lim Reinders, BSc candidate  
(co-supervisor with Dr Anthony Kim)  
4th year undergraduate research project, University of Toronto, Department of Physics student  
Research Project: “Treatment planning strategies for hypofractionated breast irradiation in an MRI Linac”

2015 Sept – April  Caryn Geady, BSc candidate  
(co-supervisor with Dr Claire McCann)  
4th year undergraduate research project, Ryerson University Department of Physics student  
Research Project: “Margin determination for hypofractionated partial breast irradiation”

2015 May - Shahad Al-Ward, MSc  
Research Project: Development of a 4D treatment planning methodology for the MRI-Linac. (research assistant position)

2015 Jan - Syed Bilal Ahmad, PhD
Research Project: Validation of the Elekta Monaco TPS System against Geant4, considering magnetic field effects in the Elekta MRI-Linear accelerator (Post Doctoral Position)

2014 Sept - April  
**Stephanie Lim Reinders, BSc candidate**  
4th year undergraduate research project, University of Toronto, Department of Physics student

2014 - 2015  
**Moti Raj Paudel, PhD**  
Validation of a GPU-Based Monte Carlo dose calculation algorithm for use with an Elekta MRI-Linear Accelerator (residency project)

2010 - 2012  
**Anthony Kim, PhD**  
Towards the Clinical Implementation of Volumetric Modulated Arc Therapy for SBRT Lung (residency project)

2009 May  
**Christophe Pignol**  
The development of a teaching DVD for the permanent breast seed implant procedure (undergraduate summer student)

2009 - 2011  
**Ananth Ravi, PhD**  
The use of Cs-131 for a permanent breast seed implant (residency project)  
*Developed into a published manuscript*

2006 - 2008  
**Rick Holly, PhD**  
NMR Properties of Gafchromic EBT radiochromic film and potential use as an absolute dosimeter (residency project)  
*Developed into a published manuscript*

2002 – 2004  
**Michelle Nielsen, MSc**  
MAGIC Polymer Gel Dosimetry using CT as the read-out modality (residency project)

Thesis Reviewed

Xiao Juan Zheng. Dose enhancement on nanoparticle addition using kilovoltage photon beams and megavoltage electron beams in skin therapy: a monte carlo study. Reviewed April 2016 for Ryerson University. 4th year undergraduate research project.
Stephanie Lim-Reinders. Magnetic field dose effects for different radiation beam geometries for patient’s treated with hypofractionated partial breast irradiation. Reviewed April 2016 for University of Toronto, Dept of Physics. 4th year undergraduate research project.

TEACHING DOSSIER

Undergraduate Education

2014 Sept – 2014 Dec  The Michener Institute of Applied Health Sciences
University of Toronto

- Introduction to treatment planning systems (2 hr Lecture)
- Irregular fields (2 hr Lecture)

2013 Sept – 2013 Dec  The Michener Institute of Applied Health Sciences
University of Toronto

- Introduction to treatment planning systems (2 hr Lecture)
- Heterogeneities in Dosimetry (2 hr Lecture)
- Treatment Planning: Combined effects (2 hr Lecture)
- Irregular fields (2 hr Lecture)

Teaching effectiveness scores available upon request
Approximate # students = 50

2012 Sept – 2012 Dec  The Michener Institute of Applied Health Sciences
University of Toronto

- Introduction to treatment planning systems (2 hr Lecture)
- Heterogeneities in Dosimetry (2 hr Lecture)
- Treatment Planning: Combined effects (2 hr Lecture)
- Irregular fields (2 hr Lecture)

Teaching effectiveness scores available upon request
Approximate # students = 50

2011 Sept – 2011 Dec  The Michener Institute of Applied Health Sciences
University of Toronto

- Introduction to treatment planning systems (2 hr Lecture)
- Heterogeneities in Dosimetry (2 hr Lecture)
- Treatment Planning: Combined effects (2 hr Lecture)
- Irregular fields (2 hr Lecture)
Teaching effectiveness scores available upon request
Approximate # students = 50

2010 Nov 30  Ryerson University, Department of Physics
- Radiation therapy and x-ray generators (3 hrs Lecture)

2001 - 2008  The Michener Institute of Applied Health Sciences
              University of Toronto
- Stereotactic Radiosurgery (3 hours/year Lecture)
- Brachytherapy (3 hours/year Lecture up until 2005)

Postgraduate Education

2016  Rotation Supervisor for PGY3 Treatment Planning
      University of Toronto, Department of Radiation Oncology
      Evaluation of PGY3 Residents using POWER

2016  University of Toronto, Department of Radiation Oncology
      Radiation Oncology & Medical Physics Residents
      Applied Physics Course
- Conjunctival Lymphoma, electrons versus photons (1 hr)
- Brachytherapy: Physics Basics Didactic Lecture (1 hr)
- Brachytherapy: Tongue Cancer (1 hr)
- Radiation Protection (1 hr)

2015  Rotation Supervisor for PGY3 Treatment Planning
      University of Toronto, Department of Radiation Oncology
      Evaluation of PGY3 Residents using POWER

2015  University of Toronto, Department of Radiation Oncology
      Radiation Oncology & Medical Physics Residents
      Applied Physics Course
- Conjunctival Lymphoma, electrons versus photons (1 hr)
- Brachytherapy: Physics Basics Didactic Lecture (1 hr)
- Brachytherapy: Tongue Cancer (1 hr)
- Radiation Protection (1 hr)

2015  University of Toronto, Department of Radiation Oncology
      Medical Physics Residency Classroom Tutorial Sessions
- IMRT / VMAT (1.0 hrs)
2014 University of Toronto, Department of Radiation Oncology
Medical Physics Residency Classroom Tutorial Sessions

- Basic Interactions (1.0 hrs)
- Instrumentation (1.5 hrs)
- TBI / IORT / TSEI (1.5 hrs)
- HDR Brachytherapy (1.0 hrs)
- Imaging (1.5 hrs)
- Brachytherapy Basics (1.0 hrs)

2014 University of Toronto, Department of Radiation Oncology
Radiation Oncology & Medical Physics Residents
Applied Physics Course

- Radiation Safety (1 hr)
- Gynaecological Case Study (1 hr)

2013 University of Toronto, Department of Radiation Oncology
Medical Physics Residency Classroom Tutorial Sessions

- Basic Interactions (1.0 hrs)
- Mock Examination for resident Sonier (2 hrs)
- VMAT & IMRT Treatment Planning (1 hr)

2013 University of Toronto, Department of Radiation Oncology
Radiation Oncology & Medical Physics Residents
Applied Physics Course

- Brachytherapy Basics (2 hr)
- Gynecology Case Study (1 hr)

2012 - 2013 Rotation Supervisor for PGY3 Treatment Planning
University of Toronto, Department of Radiation Oncology
Evaluation of PGY3 Residents using POWER

2012 University of Toronto, Department of Radiation Oncology
Radiation Oncology & Medical Physics Residents
Applied Physics Course

- Treating tonsillary cancer (1 hr)
- Treating cervical cancer: external beam and brachy (1 hr)
- Treating tonsillary cancer repeat (1 hr)

2012 University of Toronto, Department of Radiation Oncology
Medical Physics Residency Classroom Tutorial Sessions
- Treatment Planning: field shaping/skin doses/junctions (1 hr)
- Radiation Safety I (1.5 hrs)
- Dose Calculation Algorithms (1.0 hrs)
- Radiation Safety II (1.5 hrs)
- Interpreting Treatment Plan (1.0 hrs)
- Dosimetry Equipment (1.5 hrs)
- Quality Management (2.0 hrs)
- Breast Cancer (1.0 hrs)
- Calibration of external beam treatment units (1.5 hrs)
- Lung Cancer (1.0 hrs)
- Treatment Planning Process (1.5 hrs)
- Single Beam Characteristics – Photons (1.5 hrs)
- Brachytherapy Basics: Isotopes and Equipment (1.0 hrs)

2011
University of Toronto, Department of Radiation Oncology
Radiation Oncology & Medical Physics Residents
Applied Physics Course

- Treating eyelid lymphoma using superficial vs electrons (1 hr)
- Squamous cell carcinoma of the tongue, xrt and brachy (1 hr)
- Treating Lung Carcinoma (double session 2 hrs)
- Lung SBRT (1 hr)
- Brachytherapy Basics (1 hr)

2011
Specialized Radiotherapy Techniques Observer Teaching

- SBRT Lung Program (4 visitors from Credit Valley Hospital to observe technique in August 2011)

2011
University of Toronto, Department of Radiation Oncology
Medical Physics Residency Classroom Tutorial Sessions

- Photon Interactions (1.5 hrs)
- Interactions of electrons with matter (1.5 hrs)
- HDR Brachytherapy and LDR prostate seeds (1.5 hrs)
- Radiosurgery (1.5 hrs)
- Radiation Safety and shielding design (1.5 hrs)
- Dose Calculation Algorithms (1.5 hrs)
- Linacs (1.0 hrs)
- HDR Prostate (1.5 hrs)
- Treatment Planning: Field Junctions & MLC (1.5 hrs) – June/11
- Quality management (1.5 hrs)
- Planning: Beam Arrangements and combination of beams (1.5 hrs)
- Planning: Beam Arrangements and combination of beams (1.0 hrs)
2010
University of Toronto, Department of Radiation Oncology
Radiation Oncology & Medical Physics Residents
Applied Physics Course

- Treating Lung Carcinoma (1 hr)
- Lung SBRT (1 hr)
- Brachytherapy review (1 hr)

2010
University of Toronto, Department of Radiation Oncology
Medical Physics Residency Classroom Tutorial Sessions

- Total body irradiation and total skin electron therapy (1 hr)
- Respiratory motion management & SBRT (1 hr)
- Prostate Cancer (1.5 hrs)
- Lung Cancer (1.5 hrs)
- Head & neck cancer (1.5 hrs)

2009
University of Toronto, Department of Radiation Oncology
Radiation Oncology & Medical Physics Residents
Applied Physics Course

- Treating Lung Carcinoma (2 hrs)
- Treating squamous cell carcinoma of tongue (1 hr)
- Radiosurgery for chondrosarcoma of base of skull (1 hr)

2009
University of Toronto, Department of Radiation Oncology
Medical Physics Residency Classroom Tutorial Sessions

- Single beam characteristics (1.5 hrs)
- Interaction of electrons with matter (1.5 hrs)
- Radiation treatment techniques – Lung Cancer (1.5 hrs)
- Radiation treatment techniques – Pelvis (1 hr)

2005 – 2008
University of Toronto, Department of Radiation Oncology
Medical Physics Residency Classroom Tutorial Sessions

- Imaging I: X-ray, CT, U/S, MRI, PET (1.0 hrs)
- Photons: single beam characteristics (1.0 hrs)
- Electrons: single beam characteristics (1.0 hrs)
- Electron Interactions (1.5 hrs)
- Single Beam Planning (1.0 hrs)
- Single Beam Planning (1.5 hrs)
2007
University of Toronto, Institute of Medical Sciences
MSC1500H - Advanced Radiotherapy and Medical Physics
Monte Carlo Simulation Workshop (3 hrs

2004
University of Toronto, Department of Radiation Oncology
Medical Physics Residency Classroom Tutorial Sessions
(Fall/Winter: 2 hours / every other week)

2003
University of Toronto, Department of Radiation Oncology
Medical Physics Residency Classroom Tutorial Sessions
(Fall/Winter: 2 hours / every other week)

2002 – 2003
University of Toronto, Institute of Medical Sciences
MSC1500H - Advanced Radiotherapy and Medical Physics
Immobilization and Treatment Verification (3 hrs Lecture)

2002
University of Toronto, Department of Radiation Oncology
Medical Physics Residency Classroom Tutorial Sessions
(Fall/Winter: 2 hours / every other week)

STUDENTS SUPERVISED

Primary Supervisor

Medical Physics Residents supervised through 2 year U of T residency

2015 Jan – Present  Shahram Moushaf: medical physics resident (supervisor)

2014 Jan – 2015 Dec  Moti Raj Paudel: medical physics resident (supervisor)
Candidate successfully completed residency

2013 - 2015  Marcus Sonier: medical physics resident (supervisor)
Candidate successfully completed residency

2010 - 2012  Anthony Kim: medical physics resident (supervisor)
Candidate successfully completed residency

2002 – 2004  Michelle Nielsen: medical physics resident (supervisor)
Candidate successfully completed residency.

OTHER
2014  Raphy Jakubovic: Ryerson medical physics PhD student (mentor for clinical experience)

AGGREGATE TEACHING EVALUATIONS

2016 Jan 26  **Oral Examiner**, Physics Residency Program, Year 1 Oral Exam  
University of Toronto, Department of Radiation Oncology  
*Alyaa Elzibak, Shahram Mashouf*

2015 Dec 14  **Oral Examiner**, Physics Residency Program, Final Exam  
University of Toronto, Department of Radiation Oncology  
*Moti Paudel, Tania Karan, Mohammad Rezaee*

2014 Dec 17  **Oral Examiner**, Physics Residency Program, Year 1 Oral Exam  
University of Toronto, Department of Radiation Oncology  
*Moti Paudel, Tania Karan, Mohammad Rezaee*

2014 Aug 27  **Oral Examiner**, Physics Residency Program, Year 1 Oral Exam  
University of Toronto, Department of Radiation Oncology  
*Cindy Tam, Lisa Glass, Manual Rodriguez, Steve Bartolac*

2014 July 7  **Oral Examiner**, Physics Residency Program, Final Exam  
University of Toronto, Department of Radiation Oncology  
*Christine Ren*

2013 Dec 12  **Oral Examiner**, Physics Residency Program, Year 1 Oral Exam  
University of Toronto, Department of Radiation Oncology  
*Marcus Sonier, Congwu Cui*

2012 - 2013  **Rotation Supervisor**, PGY3 Treatment Planning Evaluations  
University of Toronto, Department of Radiation Oncology  
*Evaluation of PGY3 Residents using POWER*  
*Approximately 4-6 Radiation Oncology residents per year*

2013 Aug  **Oral Examiner**, Physics Residency Program, Final Exam  
University of Toronto, Department of Radiation Oncology  
*Jenna King, Niranjan Venugopal, Daron Owen, Theodore Mutanga, Nathan Becker*

2013  **Oral Examiner**, Physics Residency Program, Final Exam  
University of Toronto, Department of Radiation Oncology  
*Ali Fatemi*
2012 Sept  | **Oral Examiner**, Physics Residency Program, Year 1 Oral Exam  
University of Toronto, Department of Radiation Oncology  
*Jenna King, Niranjan Venugopal, Daron Owen*

2012 Dec  | **Oral Examiner**, Physics Residency Program, Final Exam  
University of Toronto, Department of Radiation Oncology  
*Tony Kim*

2011  | **Oral Examiner**, Physics Residency Program, Year 1 Oral Exam  
University of Toronto, Department of Radiation Oncology  
*Tony Kim*

Department of Medical Physics, “MR based Fricke-gelatin dosimetry: uncertainty evaluation and computerised analysis of measured dose distributions”  
*Philippe Belanger*

**PATIENT AND PUBLIC EDUCATION**

2013 Jun  | **Speaker**, Women’s Health Golf Classic, Magna Golf Club,  
Aurora, Ontario  
*Tournament raised 250 000 towards Sunnybrook’s Louise Temerty Breast Cancer Centre*
Curriculum Vitae

Harald Keller
PhD

A. Date Curriculum Vitae is Prepared: 2016 August 12

B. Biographical Information

1. EDUCATION

Degrees
1999 PhD, Medical Physics, Swiss Federal Institute of Technology (ETH), Zurich, Switzerland
1991 MSc, Nuclear Physics, Swiss Federal Institute of Technology (ETH), Zurich, Switzerland

Postgraduate, Research and Specialty Training
1999 - 2000 Postdoctoral Fellow, Department Medical Physics, University of Wisconsin - Madison, Madison, Wisconsin
1996 Masters of Advanced Studies (MAS), Medical Physics, Swiss Federal Institute of Technology (ETH), Zurich, Switzerland

Qualifications, Certifications and Licenses
2011 Certification, Radiation Oncology Physics, Canadian College of Physicists in Medicine
1996 Radiation Safety Officer Diploma, Paul Scherrer Institute, Switzerland

2. EMPLOYMENT

Current Appointments
2011 - present Adjunct Professor, Department of Physics, Ryerson University, Toronto, Ontario
2011 - present Adjunct Member, Yeates School of Graduate Studies, Ryerson University, Toronto, Ontario
2006 - present Assistant Professor, Radiation Oncology, University of Toronto, Toronto, Ontario
2006 - present Physicist, Department Radiation Physics, Princess Margaret Hospital, Toronto, Ontario
Previous Appointments

HOSPITAL
2003 - 2005  Scientific Associate, Department Radiation Physics, Princess Margaret Hospital, Toronto, Ontario

RESEARCH
2000 - 2003  Research Scientist, Tomotherapy Department of Medical Physics, University of Wisconsin-Madison, Madison, Wisconsin
1998 - 1999  Research Associate, Tomotherapy Department of Medical Physics, University of Wisconsin-Madison, Madison, Wisconsin
1992 - 1999  Institute For Biomedical Engineering and Informatics, Swiss Federal Institute of Technology (ETH), Zurich, Switzerland

UNIVERSITY
2005 - 2010  Adjunct Professor, Applied Mathematics, Western University, London, Ontario

3. HONOURS AND CAREER AWARDS

Distinctions and Research Awards

INTERNATIONAL

Received

2013 Jun  Best Technologist abstract for PET, Technologist Best Oral Abstract (2nd place), Co-author, Society of Nuclear Medicine Technologist Section (SNMTS). (Distinction)
   For abstract “Reproducibility of 18F-FAZA PET-CT mouse imaging”, presented at 2013 SNMMI Annual Meeting.

2012 Jun - 2012 Jul  First Place Award, Senior author on paper, Society of Nuclear Medicine Technologist Section (SNMTS). (Distinction)
   For manuscript “Evaluation of Mouse Tail Vein Injections using both Qualitative Assessments and Quantitative Analysis on MicroPET Tail Scans”, JNMT, 2011.

2011  Best Oral Paper Award (2nd place), Society of Nuclear Medicine Technologist Section (SNMTS), San Antonio, Texas. (Distinction)
   For abstract: “MicroPET FDG mouse imaging: Evaluation of 50 consecutive tail vein injections”.

2010  Best Oral Paper and Nuclear Oncology Council Best Technologist Abstract Award (2nd place), Society of Nuclear Medicine Technologist Section (SNMTS). (Distinction)
   For abstract: “Serial FDG PET-CT scans in oncology: A quality assurance study of repeatability of uptake times and blood glucose values”.

2008  1st Place Best Paper Award, Society of Nuclear Medicine Technologist Section (SNMTS). (Distinction)

2008  John S. Laughlin Science Council Research Symposium Award, American Association for Physicists in Medicine. (Distinction)
   For the presentation: Keller H, Hoisak J. “Association of Texture Features to Structure and Function in a Simple Tumor Model and Potential Application to Treatment Response Monitoring using FDG-PET”.

2002  Cum Laude Mention Poster Award, The International Society for Optics and Photonics (SPIE). (Distinction)

1993 Jul - 1999 Jun Author. Investigations on absolute portal dosimetry for the verification of static and dynamic dose delivery in radiotherapy. Swiss Federal Institute of Technology (ETH) Zurich, Zurich, Zürich (de), Switzerland. Supervisor(s): Peter Ruegsegger.

EXAM QUESTION DEVELOPMENT FOR TXIT (IN-TRAINING EXAMINATION FOR RADIATION ONCOLOGY RESIDENTS)
2010 May - 2010 Jun Exam question author for the American College of Radiology (ACR). American College of Radiology (ACR), United States. Develop 10 multiple choice questions in all areas of Medical Physics.

C. Academic Profile

1. RESEARCH STATEMENTS

2015 - present STATEMENT OF SCHOLARLY ACTIVITY 2015.
My main research interest is the investigation of different methods to adapt the treatment to changes that occur in anatomy and/or functional status of the tumor. In particular, I am working on "dose-painting" to alter dose distributions according to functional images (e.g.
PET images) of tumors. In addition, I am working on mathematical models for the optimization of fractionation schedules. To quantitatively monitor response to treatment, consistency of imaging protocols and image processing is crucial. Therefore, I am also interested in the development of calibration procedures and imaging phantoms for static and dynamic imaging systems.

The main educational activities center around the Physics residency program at the University of Toronto, the course “Clinical Radiation Physics and Dosimetry” for the Department Medical Biophysics (course instructor), the course “Advanced Radiotherapy and Medical Physics” for the Institute of Medical Sciences (course coordinator and instructor), and the Course “Fundamentals of Radiation Physics” for the Department of Physics at Ryerson University (course instructor).

2013 - 2015

STATEMENT OF SCHOLARLY ACTIVITY 2013.
My main research interest is the investigation of different methods to adapt the treatment to changes that occur in anatomy and/or functional status of the tumor. In particular, I am working on “dose-painting” to alter dose distributions according to functional images (e.g. PET images) of tumors. In addition, I am working on mathematical models for the optimization of fractionation schedules. To quantitatively monitor response to treatment, consistency of imaging protocols and image processing is crucial. Therefore, I am also interested in the development of calibration procedures and imaging phantoms for static and dynamic imaging systems.

The main educational activities center around the Physics residency program at the University of Toronto, the course “Clinical Radiation Physics and Dosimetry” for the Department Medical Biophysics (course instructor), and the course “Advanced Radiotherapy and Medical Physics” for the Institute of Medical Sciences (course coordinator and instructor).

2010

STATEMENT OF SCHOLARLY ACTIVITY 2010.
The main research activities center around treatment response imaging using PET and a longitudinal clinical study on Non-Hodgkin lymphoma patients. The main educational activities center around the Physics residency program and the course “Clinical Radiation Physics and Dosimetry” for the Department Medical Biophysics, where also Physics resident students are participating.

2009

Main Research Endeavours (in the past 3 years).
Study of geometrical uncertainties in fractionated radiotherapy and their implications on patient setup correction strategies.

Application of methods from control theory to the adaptation of radiation therapy.

Investigation of geometrical and functional “fidelity” of PET imaging.

Quantification of treatment response in longitudinal PET imaging studies.

Phantom-based validation of quantitative imaging: volume quantification in CT imaging and tracer dynamics validation for CT and MR perfusion as well as PET tracer kinetic imaging.

Mathematical optimization of dose-per-fraction schedules.

1. **INNOVATIONS AND DEVELOPMENT IN TEACHING AND EDUCATION**

2011 Sep - 2011 Dec  BME 704: Medical Devices, Undergraduate Education, Faculty of Engineering and Architectural Science, Department of Electrical and Computer Engineering, Biomedical Engineering, Ryerson University

*In the fall of 2011 the Biomedical Engineering Department at Ryerson offered a course BME704 “Radiation Therapy Devices” to their senior undergraduate students. This course was co-coordinated by Dr. Heath, Department of Physics, Ryerson University and Dr. Keller, Department of Radiation Oncology, University of Toronto.*

*The course was attended by 23 BME students from Ryerson University, and 5 MHSc*
students from University of Toronto. It consisted of 33 hours of classroom lectures, 12 hours of tutorials (6 topical tutorials), and 10 hours of lab sessions (5 labs). The lab sessions were a mix of computer-based simulation labs (Monte Carlo transport of radiation, treatment planning, image registration), and hands-on labs (orthovoltage dosimetry). Fostered interactions between biomedical engineers and therapy master’s students.

1. EDUCATION

Degrees
Presented in reverse chronological order

2005-2010 Doctor of Philosophy, Medical Biophysics, University of Toronto, Toronto, Ontario, Canada
Supervisor: Dr. Brian C. Wilson
Thesis: “Quantitative and depth-resolved fluorescence guidance for the resection of glioma”

2002-2004 Master of Applied Science, Mechanical Engineering, University of Waterloo, Waterloo, Ontario, Canada

1997-2002 Bachelor of Applied Science, Mechanical Engineering with Mechatronics Option, University of Waterloo, Waterloo, Ontario, Canada

Postgraduate, Research and Specialty Training

Jan 2011-Nov 2012 Medical Physics Resident, Medical Physics, Sunnybrook Health Sciences Centre/Odette Cancer Centre, Toronto, Ontario, Canada
Supervisor: Dr. Brian Keller

Qualifications, Certifications and Licenses

Dec 2012 Passed Review A Provincial Medical Physics Examination, Medical Physics, Cancer Care Ontario, Toronto, Ontario, Canada

Dec 2012 Passed UT DRO Medical Physics Exit Examination, Medical Physics, University of Toronto Department of Radiation Oncology, Toronto, Ontario, Canada
Continuing Education

Apr 2015   Effective Business Communication and Negotiation, Univ. Toronto Continuing Education
Jul 2014   Monaco Treatment Planning System Training, Elekta LINC Centre in Atlanta, GA
Nov 2011   Accelerator Technology Education Course, Princess Margaret Cancer Centre, Nov. 16-19, 2011
Apr 2011   Image Guided Radiation Therapy Course, Princess Margaret Cancer Centre, Apr. 14-16, 2011

2. EMPLOYMENT

Current Appointments

Dec 2012-Present  Medical Physicist, Medical Physics, Sunnybrook Health Sciences Centre/Odette Cancer Centre, Toronto, Ontario, Canada
May 2015-Present  Assistant Professor, University of Toronto, Department of Radiation Oncology, Toronto, Ontario, Canada

3. HONOURS AND CAREER AWARDS

Distinctions and Research Awards

NATIONAL

Nominated

June 2014  Poster award nomination for the Canadian Organization of Medical Physicists Annual Scientific Meeting 2014

Student/Trainee Awards

Received

May 2007-Apr 2009  Natural Sciences and Engineering Research Council of Canada, Canada Graduate Scholarship D
May 2002-Apr 2004  Natural Sciences and Engineering Research Council of Canada, Postgraduate Scholarship M
May 2002-Apr 2004  Materials and Manufacturing Ontario, Entry to Graduate Studies Award
May 2001-Aug 2001  Natural Sciences and Engineering Research Council of Canada Undergraduate Student Research Award

PROVINCIAL/ REGIONAL

Received

Jan 1999-Apr 1999  Ontario Hydro Undergraduate Scholarship

LOCAL

Received

Sep 2009-Apr 2010  Doctoral Completion Grant
Sep 2009  Dr. J.R. Cunningham Graduate Fellowship
Apr 2002  Sandford Fleming Foundation, Co-operative Proficiency Silver Medal
Anthony KIM

Sep 2001-Apr 2002  University of Waterloo, Faculty of Engineering Upper Year Scholarship
Sep 1997-Apr 1998  University of Waterloo, Faculty of Engineering Entrance Scholarship

Teaching Awards

LOCAL
Received
Dec 2003  University of Waterloo, Teaching Assistant Excellence Award

4. PROFESSIONAL AFFILIATIONS AND ACTIVITIES

Professional Associations

Jan 2011-Present  Full member, Canadian Organization of Medical Physicists
Aug 2011-Present  Union member, Professional Institute of the Public Service of Canada, Mem. #2026256

Peer Review Activities

Mar 2014  Lung SBRT External Review of Southlake Cancer Centre
Sep 2011  Co-Author (with Dr. Julia Skliarenko and Veny Li) of a Learner’s Report for the University of Toronto, Department of Radiation Oncology as part of an External Review of the department.
Sep 2011  Member of a selection committee for the University of Toronto, Department of Radiation Oncology Education Awards, for selection of awards for recognizing clinical supervision, research supervision, mentorship, and leadership excellence within the department.

Other Research and Professional Activities

OTHER ACTIVITY TYPE

Jan-Dec 2012  Chief Medical Physics Resident for the University of Toronto Department of Radiation Oncology
Sep 2010  Panel Member for the debate “Biophotonics Education” at the Optics Within Life Sciences conference in Quebec City, QC

C. Academic Profile

1. RESEARCH STATEMENT

My radiation physics practice includes many areas of research and development. I have been heavily involved with the implementation of volumetric modulated arc therapy (VMAT) at the Odette Cancer Centre. I developed the VMAT treatment planning protocol and physics development for lung stereotactic body radiation treatment (SBRT), the second site to treat with VMAT at our centre. In addition, I developed the quality assurance program and led general VMAT implementation for our large field Synergy MLCi and Agility linear accelerators. Recently, Elekta and OCC have partnered up to implement an MRI linear accelerator hybrid system at our cancer centre. I am involved with implementing Monaco, the Elekta TPS solution for the MRI-linac, for our clinic as well as general developmental work on the MRI-linac project. In addition, I have research interests in the field of biomedical optics and its intersection with radiation oncology. Recently, our group has developed a technique to detect the early onset of radiation-induced erythema, giving a potentially valuable tool for early intervention for severe skin toxicity effects during a radiation therapy course.
My doctoral studies were in the field of biomedical optics, specifically the use of visible light photons to interact with tissue for disease diagnosis. My research was targeted towards improving the detection of intracranial tumor during surgical resection using fluorescence guidance. Many brain tumors recur at the surgical margins, underlining the importance of eliminating residual tumor cells during surgery; however, this must be tempered by the need to preserve normal brain tissue. By accurately identifying residual tumor cell nests during surgery, this enables the surgeon to resect the tumor more completely, with the aim of increasing the patient’s survival. To this end, I have created two novel diagnostic devices for improved intraoperative brain tumor detection. An exciting development is that one of my device prototypes has been deployed in neurosurgical trials and has demonstrated significant improvement compared with state-of-the-art fluorescence imaging over a large spectrum of brain tumor pathologies.

2. TEACHING STATEMENT

I am drawn to the rewards and challenges of teaching. I find it valuable and worthwhile to pass along hard-earned knowledge to inquisitive minds. I strongly believe in kinesthetic learning—that is learning by doing. While I was a medical physics resident, I found that physically performing the machine measurements, designing the radiation treatment plans, and creating quality assurance reports were the best activities to truly understand real-world practice. When I mentor residents and students, I suggest that they take on a small project or a set of tasks to understand a concept. I find that this type of learning is far more rewarding than reading about a topic from a book.

I am regularly involved with teaching our physics trainees during their evaluation sessions as well as during their clinical rotations. In particular, I am involved with training medical physics residents on the physics of treatment planning systems. I am also involved with continuing education within the Odette Cancer Centre. I have created and delivered various practical training sessions on radiation physics—recent training sessions include an introduction to the Monaco TPS, in vivo use of optically stimulated luminescence dosimeters, and machine characteristics of the new Elekta Agility linear accelerators.

G. Research Supervision and Teaching

1. **GRADUATE EDUCATION**

   May-Aug 2010 Mentorship of Marco Brantsch, MSc student from Aalen University, Germany, for his project “Quantitation of PpIX Levels in Primary Brain Tumor Tissue in the Context of Fluorescence Guided Resection.”

2. **UNDERGRADUATE**

   Sep 2015-Current Supervision of Stephanie Lim-Reinders, U of T Physics undergraduate student, for the project “IMRT versus VMAT for organ-at-risk sparing on an MRI-linear accelerator”.

   May-Aug 2014 Supervision of Stephanie Lim-Reinders, U of T Physics undergraduate student, for the project “Adaptive radiation therapy using Elekta ADMIRE deformable registration program”.

   May-Aug 2013 Supervision of Ray Xiao, U of T Engineering Science undergraduate student, for the project “Automated quality assurance for high-dose rate brachytherapy”.

3. **POSTGRADUATE**

   Jan 2013-present Ongoing teaching duties for medical physics resident evaluation sessions, in particular for topics such as VMAT/IMRT, breast cancer treatment, lung cancer treatment, and radiation dosimetry.

4. **CONTINUING EDUCATION**

   Aug 2014 Training sessions at the Odette Cancer Centre for medical physicists on the Monaco TPS

   Nov 2013 Training sessions at the Odette Cancer Centre for radiation therapists, radiation oncologists, and medical physicists entitled “Elekta Synergy with the Agility MLC head”.

   Nov 2012 Training sessions at the Odette Cancer Centre for radiation therapists entitled “Optically Stimulated Luminescence Dosimeters for In Vivo Patient Dosimetry”.

1. EDUCATION

Degrees

2002 – 2007 Ph.D. Medical Biophysics
Dissertation: Fluorescence spectroscopy of ECM remodeling during atherosclerosis
Department of Medical Biophysics, University of Western Ontario, London, ON, Canada.
Supervisors: Dr. Peter Canham and Dr. Alex Lucas

Dissertation: IMRT with Co-60
Department of Applied Physics, Laurentian University, Sudbury, ON, Canada.
Supervisor: Dr. Peter Dunscombe

1996 – 2000 B.Sc. Medical & Health Physics
Department of Medical & Health Physics, McMaster University, Hamilton, ON, Canada.

Postgraduate, Research and Specialty Training

2007 – 2008 Medical Physics Resident, Department of Physics & Engineering, London Regional Cancer
Program, London, ON, Canada. Supervisors: Prof. Jake Van Dyk and Dr. Scott Karnas

Qualifications, Certifications and Licenses

2010 Member, Canadian College of Physicists in Medicine (MCCPM).
2. EMPLOYMENT

Current Appointments

2009-Present  Medical Physicist, Department of Medical Physics, Odette Cancer Centre, Sunnybrook Health Sciences Centre, Toronto, ON, Canada.
Currently the lead physicist for SBRT (sites: bone, prostate, liver, lung, spine, kidney/adrenal and oligomet), RTOG clinical trials and external treatment planning lead. Involved in teaching and training junior physicists, medical physics residents and radiation oncology fellows and supervise a research radiation therapist. Lead physicist for radiation therapy education and training. Secondary responsibilities include treatment planning consults, HDR and the record and verify system (Mosaiq) in addition to daily clinical services.

Previous Appointments

CLINICAL

CAMPEP accredited medical physics residency rotations in treatment planning, external beam dosimetry, radiation protection and brachytherapy. Responsible for a Varian linac, electron commissioning for treatment planning system, commissioning new LDR brachytherapy permanent seed, residency member of the residency committee and evaluated optically stimulated luminescent dosimeters.

2002-2002  Physics Assistant, Department of Medical Physics, Northeastern Ontario Regional Cancer Centre, Sudbury, ON, Canada.
Performed quality assurance checks on radiotherapy equipment and assisted with commissioning of a new linear accelerator and trained new physics assistant.

3. HONOURS AND CAREER AWARDS

Student/Trainee Awards

PROVINCIAL/ REGIONAL

Received

2005-2006  Ontario Graduate Scholarship. Graduate Student, University of Western Ontario, London, ON, Canada. (Specialty: Science & Technology)

2002-2006  Special University Scholarship. Graduate Student, University of Western Ontario, London, ON, Canada. (Specialty: Science & Technology)

2004  CIHR First place poster award for “Best integration of biology in the physical sciences,” University of Western Ontario, London, ON, Canada.

2002-2004  CIHR Strategic Training Fellowship, Graduate Student, University of Western Ontario, London, ON, Canada. (Specialty: Vascular Science)

2000-2002  Northern Research Foundation Scholarship, Graduate Student, Northeastern Regional Cancer Centre, Sudbury, ON, Canada. (Specialty: Medical Physics)

2000-2002  Graduate Fellowship, Graduate Student, Laurentian University, Sudbury, ON, Canada. (Specialty: Applied Physics)
4. PROFESSIONAL AFFILIATIONS AND ACTIVITIES

Professional Associations

2010-2013  Member, American Society for Radiation Oncology

2001-2013  Member, Canadian Organization of Medical Physicists

Administrative Activities

LOCAL

2012-2013  Physics Representative, Planning Review Committee, Odette Cancer Centre, Sunnybrook Health Sciences Centre, Toronto, ON, Canada.  
Evaluation of current efficiencies/inefficiencies and implementation of new planning model for radiation therapists.

PROVINCIAL / REGIONAL

2005-2006  Student Representative, Fellowship Committee, Department of Medical Biophysics, University of Western Ontario, London, ON, Canada.  
Reviewed applications for the Faculty of Medicine fellowship competition, ranked applications based on competition criteria and attended adjudication meeting.

2005-2005  Student Representative, Strategic Planning Task Force, Department of Medical Biophysics, University of Western Ontario, London, ON, Canada.  
Defined goals, measurable objectives and implementation strategy for “Enhancing academic programs” in the Schulich School of Medicine.

2001-2002  Vice-President, Graduate Student Association, Laurentian University, Sudbury, ON, Canada.  
Attended academic committee meetings and promoted the interest and welfare of the GSA members.

Other Research and Professional Activities

2010-2013  Reviewer. GU protocols. Odette Cancer Centre, Sunnybrook Health Sciences Centre, Toronto, ON, Canada.  
Evaluation of the impact of clinical trials on the physics department.

2010-2013  RTOG Physicist. RTOG clinical trials. Odette Cancer Centre, Sunnybrook Health Sciences Centre, Toronto, ON, Canada.  
Accreditation for RTOG (IMRT/VMAT treatment planning)

2010-2013  Protocol Development. Odette Cancer Centre, Sunnybrook Health Sciences Centre, Toronto, ON, Canada.  
Developed treatment planning protocols for liver, adrenal/kidney and pancreas SBRT
C. Academic Profile

1. RESEARCH STATEMENT

My research interests are in stereotactic body radiation therapy treatment. The main topic of my research is evaluating intra-fraction motion across different treatment sites and using various immobilization devices as well as determining the required frequency of CBCT imaging. The goal is to further minimize motion during treatment delivery through a reduction in treatment time as well as to assess the impact of new immobilization devices.

2015-2016

Assistant Professor, Department of Radiation Oncology, University of Toronto, Toronto, ON, Canada.

H. Teaching and Design

1. INNOVATIONS AND DEVELOPMENT IN TEACHING AND EDUCATION

2009-2016 Resident Tutorials, Primary audience: Medical Physics Residents, Odette Cancer Centre, Sunnybrook Health Sciences Centre

Involved in select tutorial sessions on treatment planning and brachytherapy.

2012-2012 Core Faculty Paraspinal IGRT Education Course, Primary audience: Radiation Therapists, Medical Physicists and Radiation Oncologists, UTDRO, Princess Margaret Cancer Centre

Topics presented: 1) Preparing for the future: development of a paraspinal program, 2) The basics of paraspinal IGRT: technical delivery of paraspinal SBRT.

Practical exercises: 1) Technical topics in paraspinal SBRT, 2) Multimodality registration for treatment planning.

2012-2013 Training ABS Fellows, Primary audience: Radiation Oncologists and Medical Physicists, Radiation Oncology Program, Odette Cancer Centre, Sunnybrook Health Sciences Centre

Physics member involved with training fellows in real-time ultrasound guided HDR Brachytherapy for treating intermediate risk prostate cancer using Oncentra TPS. This is a
Renee Korol

one-week intensive training program sponsored by ABS and Nucletron.

2011-2014 Treatment Planning Rotation Supervisor, Primary audience: Medical Physics Residents, Department of Medical Physics, Odette Cancer Centre, Sunnybrook Health Sciences Centre

Teach physics residents the fundamentals of treatment planning principles over a 4 month period annually.

2003-2006 Graduate Teaching Assistant, Primary audience: Undergraduate students, Department of Medical Biophysics, University of Western Ontario

Designed labs and assignments and provided pre-lab lectures, proctored exams and evaluated 4th year biophysics theses.

2003-2006 Graduate Teaching Assistant, Primary audience: Undergraduate students, Department of Medical Sciences, University of Western Ontario

Coordinated lab sessions, designed labs and provided pre-lab lectures.

2000-2002 Graduate Teaching Assistant, Primary audience: Undergraduate students, Department of Applied Physics, Laurentian University

Ran weekly tutorials, supervised labs and marked first-year exams.

2001-2002 Lab Demonstrator, Primary audience: High school and undergraduate students, Department of Applied Physics, Laurentian University

Science Career Day Demonstrator.

I. Research Supervision

1. MULTILEVEL EDUCATION

2013-2014 Supervisor, Marcus Sonier, Medical Physics Resident: Odette Cancer Centre, Sunnybrook Health Sciences Centre. Treatment planning protocol development for adrenal and kidney SBRT. Collaborators: Dr. William Chu and Dr. Patrick Cheung.

2011-2013 Supervisor, Fiona Lochray, Research Radiation Therapist: Odette Cancer Centre, Sunnybrook Health Sciences Centre. Evaluation of patient setup errors in Spine SBRT. Collaborators: Dr. Arjun Sahgal

2012-2013 Mentor, Jenna King, Medical Physics Resident: Odette Cancer Centre, Sunnybrook Health Sciences Centre.

1. EDUCATION

Degrees
1999 Oct - 2003 Dec PhD, Radiation Physics, Physics, University of London, United Kingdom, Supervisor(s): Prof Steve Webb, Dr Maggie Flower and Dr Carl Rowbottom
1998 Sep - 1999 Sep MSc, Medical Physics, Physics, University of Surrey, Guildford, United Kingdom, Supervisor(s): Prof. Nicolas Spyrou
1994 Sep - 1998 May BSc, Physics, McGill University, Montreal, Quebec, Canada

Qualifications, Certifications and Licenses
2007 Clinical Scientist, ACS – Association of Clinical Scientist, HCPC - Health and Care Professions Council, United Kingdom, License / Membership #: CS15510

2. EMPLOYMENT

Current Appointments
2016 Jun - present Adjunct Professor, Physics, Faculty of Science, Ryerson University, Toronto, Ontario, Canada
2014 Nov - present Assistant Professor, Radiation Oncology, Faculty of Medicine, University of Toronto, Toronto, Ontario, Canada
2013 May - present Medical Physicist, Department of Medical Physics, Odette Cancer Centre, Sunnybrook Health Sciences Centre, Toronto, Canada
- CNS site group lead.
- Gamma Knife project lead.
- research and develop new techniques for CNS group.
- present work at meetings and conferences and lecture on courses.
Previous Appointments

HOSPITAL

2008 Nov - 2013 May
Principal Radiotherapy Physicist (specializing in pediatric radiotherapy development), Joint Department of Physics, Royal Marsden NHS Foundation Trust, Sutton, United Kingdom
- research/develop new techniques for radiation physics focusing on pediatric cancers.
- provide expertise in radiation treatment of pediatric cancers.
- work in a multidisciplinary team providing clinical services.
- present work at meetings and conferences and lecture on courses.

2006 Feb - 2008 Oct
Senior Radiotherapy Physicist, Joint Department of Physics, Royal Marsden NHS Foundation Trust, Sutton, United Kingdom
- member of a team responsible for the maintenance, dosimetry and operation of 7 Elekta Linacs, Gulmay kilovoltage unit, CT simulators, Pinnacle treatment planning system and other associated equipment.
- develop/implement new treatment techniques, participate in project work that involves a multidisciplinary team.

2003 Feb - 2004 Nov
Radiotherapy Physicist, Department of Medical Physics, Kent Oncology Centre, Maidstone Hospital, Maidstone, Kent, United Kingdom
- member of a team responsible for the maintenance, dosimetry and operation of 3 Varian treatment units, Cadplan and Pinnacle treatment planning systems and other associated equipment.
- develop and implement new treatment techniques.

3. HONOURS AND CAREER AWARDS

Distinctions and Research Awards

INTERNATIONAL
Received

2010 Sep
IPEM/AAPM Travel Award, Annual Meeting, Institute of Physics and Engineering in Medicine / American Association of Physicists in Medicine, York, United Kingdom. (Distinction)
Funding for the cost of travel to 3 North American Centres (Memorial Sloan Kettering, Proton Center, Florida and Princess Margaret Hospital) to learn and benefit pediatric research and development at my centre. Total Amount: 2,000 GBP

2008 Nov
Young Investigator Award, CTOS Meeting, Connective Tissue Oncology Society (CTOS), London, United Kingdom. (Distinction)
Oral presentation of submitted abstract titled: Soft tissue sarcoma (STS) of the extremity - comparison of conformal post-operative radiotherapy (CRT) and intensity modulated radiotherapy (IMRT). Total Amount: 2,000 USD

NATIONAL
Received

2002 Jun
Travel Bursary, Institute of Physics, London, United Kingdom. (Distinction)
Funding to attend ICCR (International Conference on the Use of Computers in Radiation Therapy), Seoul, South Korea. Total Amount: 200 GBP

LOCAL
Received
2002 Jun  
First Prize Poster - Institute of Cancer Research Conference, Institute of Cancer Research, London, United Kingdom. (Distinction)  
Total Amount: 100 GBP

1999 Dec  
Mayneord Prize, University of Surrey, Guildford, United Kingdom. (Distinction)  
Highest achievement in M.Sc. Medical Physics course. Total Amount: 100 GBP

1999 Sep - 2004 Jan  
EPSRC PhD Funding, Institute of Cancer Research. (Distinction)  
University of London (40 months). Total Amount: 40,000 GBP

4. PROFESSIONAL AFFILIATIONS AND ACTIVITIES

Professional Associations

2013 - present  
Full Member, Canadian Organization of Medical Physicists (COMP)

Provided radiation therapy dose range.

THESIS PROJECT

2014 Jul 1 - 2015 Jun 30  
Comparison of Alzheimer’s disease and control glucose metabolic rates using hierarchical cluster analysis. University of Surrey, Guildford, Surrey, United Kingdom. Supervisor(s): Prof. Nicolas Spyrou.

1999 Oct - 2003 Dec  
Role of multimodality imaging in radiotherapy planning. University of London, Institute of Cancer Research, Sutton, Surrey, United Kingdom. Supervisor(s): Prof Steve Webb, Dr Maggie Flower and Dr Carl Rowbottom.

AUDITS

2011 Jun  
Stereotactic Audit. Charing Cross Hospital. Supervisor(s): Alan Warrington.

2006 - 2009  
National Photon/Electron Audits. Royal Marsden Hospital.

C. Academic Profile

1. RESEARCH STATEMENTS

My current research interest focuses on improving precision and accuracy of central nervous system radiation treatment delivery. I am involved in projects to create an inverse-planning platform and improve the cone-beam computed tomography treatment verification imaging for the Gamma Knife to increase planning and efficiencies in treating multiple targets in the brain. I am also interested in the incorporation of ‘functional’ information into the planning of brain radiation therapy. I have developed the current clinical craniospinal irradiation technique, focusing on reducing the dose to the organs-at-risk and reducing the set-up errors whilst modernizing the existing technique using intensity-modulated radiation methods. I am also interested in spinal stereotactic body radiation therapy using volumetric modulated radiation therapy and incorporating the flattening-filter-free beams in order to increase treatment delivery efficiency. Furthermore, I am interested in the development of efficient methods in detecting plan-and-delivery dose differences on very large (e.g. craniospinal irradiation) and very small (e.g. spinal SBRT) volumes.
D. Research Funding

1. GRANTS, CONTRACTS AND CLINICAL TRIALS

PEER-REVIEWED GRANTS

Funded

2012 Collaborator. Functional MRI for paediatric brain tumour patients receiving radiotherapy. Institute of Cancer Research (CRUK) / Engineering and Physical Sciences Research Council (EPSRC). Cancer Imaging Centre Grant. [Clinical Trials]

2012 UK Physics QA Lead. Primitive neuroectodermal tumour (PNET5) trial. [Clinical Trials]

NON-PEER-REVIEWED GRANTS

Funded

2015 - 2019 Co-Investigator. Incorporation of inverse planning optimization algorithm into Gamma Knife treatment planning system for multi-target radiosurgery. Government of Canada. PI: Sahgal A. Collaborator(s): Lee YK, Ruschin M (Co-Investigators). 300,000 CAD. [Industrial Grants] This grant supports research activity in the development inverse planning optimization algorithm into the currently available treatment planning software. There is no direct budgetary overlap since the specific systems under investigation are not the focus of this grant.

2015 - 2016 Co-Principal Investigator. Investigation of plan quality for spine SBRT and brain SRT using the Monaco treatment planning system. Elekta Oncology Systems. PI: Ruschin M, Lee YK, and Sahgal A. 40,000 CAD. [Industrial Grants] This grant supports research activity in the development and evaluation of a new treatment planning system for radiosurgery of multiple brain metastases and spine metastases. There is no direct budgetary overlap since the specific systems under investigation are not the focus of this grant.

  BSc. Honours Physics, McGill University, 1970
- Post-Graduate and Medical Training
  PhD Solid State Physics, McGill University, 1977
  Resident in Medical Physics, Toronto-Sunnybrook Regional Cancer Centre (now called the Odette Cancer Centre) 1992-1994
- Scholarships and Awards
  Varian Associates Scholarship (1971-1972)

Biographical Information

- Degrees
  1970 Bachelor of Science, McGill University, Honours Physics
  1977 PhD, McGill University, Solid State Physics
- Hospital/Staff Appointments
  Affiliate in the Dept of Radiation Oncology, Sunnybrook Health Sciences Centre
- Academic Appointments
  Lecturer, Department of Radiation Oncology, University of Toronto
- Professional Affiliations and Activities
  Member, Canadian Organization of Medical Physicists
  Member, Canadian College of Physicists in Medicine
  Member, American Association of Physicists in Medicine
- Certifications and Licensures
  Ontario Peer “A” in Medical Physics
  Member, Canadian College of Physicists in Medicine, MCCPM

Statement of Scholarly and Professional Activity

- Clinical Responsibilities
  Medical Physicist in Radiation Therapy at one of the largest cancer treatment centres in North America. General Expertise: (1) computer calculations of radiation dose to tumour; (2) room shielding design for new equipment; (3) commissioning of new equipment. At the moment I lead the Stereotactic Radiosurgery Program at the Odette Cancer Centre and have primary responsibility for the Tomotherapy linear accelerator system. Chart checking and HDR are part of my "rota" duties.
• **Research**
  My principal research effort at the moment is implementing the use of cone-beam technology for aligning patients with small brain lesions. Previously, I was Chair of AAPM Task Group 68, "Intracranial Positioning Systems", which set formalism for assessing stereotactic head frames.

• **Teaching Responsibilities**
  Currently my teaching is mainly limited to training Physics Residents enrolled in the University of Toronto Department of Radiation Oncology CAMPEP-approved program and occasional lectures to students in a post-graduate program.

**Publications**

**Refereed Publications**

Cochrane RW, Hedgcock FT, **Lightstone AW**. Spin Resonance in Alloys of (SnTe)\(_{1-x}\)(MnTe)\(_x\), Can J Phys, 56:68, 1978.

   (iii) Radiation Research (2009-present)
   (iv) ZMedPhys (2010-present)
   (v) Physica Medica (2015-present)

Statement of Scholarly and Professional Activity

Pre-clinical image guided irradiation systems – development and implementation of conformal, image-guided, irradiation systems for small animal pre-clinical experiments. Design of experimental protocols, and training of users.

Outcome analysis for lung and head-and-neck - development of methods for automated extraction of plan and dose-volume data from treatment planning system, software development of tools for data-mining. Deformable image registration and dose accumulation to improve predictions of treatment outcomes based on actual delivered doses.

MacPherson M. July 31-August 4 2011.

2009 Jul Detrimental Dose: A Proposed Metric to Score Incidents in Radiation Therapy. COMP Annual General Meeting. Carlone M and MacPherson MS.

2006 Early Experience with a Clinical TomoTherapy Unit. COMP AGM. Saskatoon. Gerig L, MacPherson MS, Malone S, MacRae R, Carty K, Montgomery L, Fox G, Clark B.

Invited Lectures and Presentations

2009 Oct 2 RapidArc Radiotherapy Technology Clinical Applications. Varian CARO Symposium. Quebec City, Quebec.

3. PROVINCIAL / REGIONAL

Invited Lectures and Presentations

4. LOCAL

Abstracts and Other Papers

Invited Lectures and Presentations

2010 Sep 22 Two Years of Volumetric Modulated Arc Therapy. Credit Valley Hospital, Juravinski Regional Cancer Centre. Hamilton, Ontario.

E. Teaching and Design

1. INNOVATIONS AND DEVELOPMENT IN TEACHING AND EDUCATION

2011 Mar 2 - 2011 Mar 3  Volumetric Modulated Arc Therapy as Accelerated IMRT: Principles, Practice, and Implementation, Continuing Education
Course Director. Metropolitan Hotel, Toronto, ON.

F. Research Supervision

1. UNDERGRADUATE EDUCATION

2009 - 2010  Primary Supervisor, Charmainne Cruje. B. Sc.
2002  Primary Supervisor, Trevor Crljenko, Carlton University. B. Sc., A photogrammetric gated radiotherapy system.
2001  Primary Supervisor, Adam Badeen, Carlton University. B. Sc., Fast Monte Carlo calculations of linac head scatter.
2000  Primary Supervisor, Damien Dery, Carlton University. B. Sc., A CT-based missing tissue compensator system.

2. GRADUATE EDUCATION

2006 - 2008  Primary Supervisor, Jared Strydhorst, Carlton University. MSc, Helical tomotherapy for breast radiotherapy.
2004 - 2006  Co-Supervisor, Cliff Dugal, Carlton University. MSc, Monte Carlo evaluation of linear accelerator shielding design.

3. POSTGRADUATE MD

2011 - present  Primary Supervisor, Theodore Mutanga, CAMPEP resident.
Academic Curriculum Vitae for

Katherine Mah, M.Sc., FCCPM

Name: Katherine Mah

Business Address: Medical Physics, Odette Cancer Centre, Sunnybrook Health Sciences Centre 2075 Bayview Ave., Toronto, Ontario, Canada  M4N 3M5

Business Telephone #: (416) 480-5000 ext. 1091
Business Fax #: (416) 480-6801
E-mail Address: kathy.mah@sunnybrook.ca

Date of Last Update: June, 2011

EDUCATION:

University Education

M.Sc. University of Toronto, Medical Physics 1985

B.Sc. University of Toronto, Physics and Biology Honours Degree 1982

Scholarships and Awards
1. University of Toronto Open Masters Fellowship 1983/84, 1982/83
2. Innis College, University of Toronto Entrance Scholarship 1978/79
3. Reichhold Ltd. Education Scholarship 1978/79
4. J. Keiller MacKay C.I. Award & an Ontario Scholar 1978

BIOGRAPHICAL INFORMATION

_degrees_ M.Sc., B.Sc.

Hospital/Staff Appointments

January 2013 - present  SENIOR PHYSICIST
Odette Cancer Centre, Sunnybrook Health Sciences Centre

Dec 2010 to Dec 2012  ACTING HEAD, Medical Physics, Simcoe Muskoka Regional Cancer Centre, Royal Victoria Hospital, Barrie
**ACTING HEAD, Medical Physics, Odette Cancer Centre, Sunnybrook Health Sciences Centre**

Dec. 2008 - Dec 2012
**DEPUTY HEAD, Medical Physics, Odette Cancer Centre**
(formerly the Toronto-Sunnybrook Regional Cancer Centre)

June 1996 - Nov 2008
**SENIOR PLANNING PHYSICIST**
Toronto-Sunnybrook Regional Cancer Centre

March 1996 – June 1996
**PHYSICIST**
Toronto-Sunnybrook Regional Cancer Centre, Toronto

April 1988 – March 1996
**PHYSICIST**
Princess Margaret Hospital, Toronto, Ontario

Nov 1985 – March 1988
**JUNIOR PHYSICIST**
Princess Margaret Hospital, Toronto, Ontario

**Academic Appointments**

Assistant Professor, University of Toronto, Dept of Radiation Oncology
1998 to present

Adjunct Professor, Ryerson University, Dept of Physics, Jan 2011 to present

**Professional Affiliations**

AAPM: Member of American Association of Physicists in Medicine
COMP: Member of Canadian Organization of Medical Physicists

**Certifications and Licensures**

FCCPM: Fellow of the Canadian College of Physicists in Medicine (1997)

**Administration and Committee Appointments**

2013 to present
Member, Cancer Care Ontario, Lung Community of Practice

2009 to present
Co-Chair, Radiation Oncology Program QA Committee, Odette Cancer Centre

2009 to 2012
Member, Radiation Therapy Steering Committee, Odette Cancer Centre

2009 to present
Member, Incidence Reporting Committee, Cancer Care Ontario
2009 to 2012  Member, Physics Professional Advisory Committee to Cancer Care Ontario

2009 to 2012  Member, Executive Committee, University of Toronto, Department of Radiation Oncology

2010 to 2012  Member, Physics Residency Program Committee, University of Toronto, Department of Radiation Oncology

2009 to 2012  Member, Program Review Committee, The Michener & University of Toronto Medical Radiation Sciences Program

2008 – 2013  Member, Capital Equipment Replacement Committee, Cancer Care Ontario

2007  Member, Organizing Committee, International Conference on Computers in Radiation, Toronto, Ontario, Canada

2006 to 2012  Member, Radiation Therapy Operations Committee, Odette Cancer Centre
2000 – 2005  Member, Continuing Education Committee of the Dept. of Radiation Oncology, University of Toronto

2004  Member, Organizing Committee, Target Insight I, UofT, Dept O of Radiation Oncology, Toronto, Ontario, Canada

1998  Member, American Association of Physicists in Medicine, (AAPM) Radiation Therapy Task Group No. 50. Basic Applications of Multi-Leaf Collimators

STATEMENT OF SCHOLARLY & PROFESSIONAL ACTIVITY:

Research Grants

(A) Previously Funded as Principal Investigator

(B) Previously Funded as Co-Principal Investigator

Caldwell CB, Mah K, Poon I. Automated delineation of targets for radiation treatment of head and neck cancer based on computerized analysis of FDG-PET/CT images. Canadian

(D) Previously Funded as Principal Investigator

Mah K, Caldwell CB, Danjoux, CE. Can 18FDG-PET images provide the 3D extent of lung tumour motion for individualized radiation targeting?. National Cancer Institute, Canada. 2002-2003. $126,000

(E) Previously Funded as Co-Investigator

Caldwell CB, Ung YC, Mah K. Incorporating gamma camera coincidence images in CT-based radiotherapy treatment planning for lung cancer. National Cancer Institute of Canada. 2000. $34,808

Caldwell CB, Mah K, Ung Y, Ehrlich L. Evaluation of fusion of nuclear medicine images with computed tomography images to enhance management of oncology patients. Marconi Medical Systems. 1999-2000. $60,000

PUBLICATIONS:

PEER REVIEWED PUBLICATIONS:

**INVITED STANDARDS PUBLICATION: PEER-REVIEWED**

**NON-PEER REVIEWED PUBLICATIONS:**

BOOK CHAPTERS

PUBLISHED ABSTRACTS

4. M. T. Davidson, S. Blake, D. L. Batchelor, P. Cheung, K. Mah Assessing the role of VMAT relative to IMRT and Helical Tomotherapy In The Management Of Localized, Locally Advanced, and Post-
operative Prostate Cancer. Int J Radiat Oncol Biol Phys June 2010

**Invited Presentations (Extramural only)**

1. Overview of Motion Management Strategies, IMRT insight, On Target, On Track Conference, University of Toronto, Toronto, Ontario May 27, 2011

3. Advances in CT and PET Imaging for Radiation Treatment Planning. Education Course 406 at American Society for Therapeutic Radiation and Oncology (ASTRO), Boston, USA. 2008

4. PET/CT: Basic Principles and Considerations. Ontario Gastrointestinal Multidisciplinary Oncology Conference, Toronto. 2006

5. Advances in CT and PET Imaging for Radiation Treatment Planning. Educational Course 406 at American Society for Therapeutic Radiation and Oncology (ASTRO), Philadelphia, USA. 2006

7. Radiation Oncology Targeting: Can PET/CT help with the what and where?. Grand Rounds-Radiation Oncology at Memorial Sloan Kettering Cancer Centre, New York, USA. 2006
8. Advances in CT and PET Imaging for Radiation Treatment Planning. Educational Course at American Society for Therapeutic Radiation and Oncology (ASTRO), Denver, USA. 2004

9. Target Insight with PET/CT. Philips Medical Systems, Oncology Symposium, Atlanta, USA. 2004

10. The PET/CT at Sunnybrook: Improving Patient Management through the Integration of Functional and Anatomic Imaging. Ontario Association of Medical Radiation Technologists (OAMRT) Education Day, Toronto. 2004

11. PET and Radiation Oncology: Target-in-sight. Toronto Society of Nuclear Medicine, Toronto. 2003

13. Imaging Innovations in Radiation Oncology. 4th RN/RTT Collaborative Conference in Cancer Care, Toronto. 2003

14. PET: The potential role in radiation oncology. 27th Annual Meeting of the American Association of Medical Dosimetrists, Michigan, USA. 2002

15. PETS in the Clinic: The potential role in radiation oncology. Grand Rounds Kingston Regional Cancer Centre, Kingston. 2002

18. The Integration of FDG-PET with CT-Simulation: Impact on Tumour Localization and Dose-Volume Histograms. 7th Annual Marconi Oncology Symposium, Boston, USA. 2000

19. PET Contribution to Radiation Therapy Treatment Planning. Symposium on PET in Oncology, Cross Cancer Institute, Edmonton. 2000

20. QA, Acceptance and Commissioning of a CT-Simulator. AAPM Great Lakes Chapter Meeting, Providence Hospital, Michigan, USA. 2000

21. CT-Simulation Process, Implementation and Operation. AAPM Great Lakes Chapter Meeting, Providence Hospital, Michigan, USA. 2000

22. CT-Simulation Techniques. AAPM Great Lakes Chapter Meeting, Providence Hospital, Michigan, USA. 2000

23. Emerging Technologies in Radiotherapy. 2nd RN/RT Collaborative Conference on Radiotherapy in Cancer Care, Toronto. 2000

26. The reality of virtual simulation. Radiation Program Rounds, Ottawa Regional Cancer Centre, Ottawa. 1999

27. The reality of virtual simulation comes to T-SRCC. Oncology Grand Rounds, Hamilton Regional Cancer Centre, Hamilton. 1998

29. The reality of virtual simulation comes to T-SRCC. Radiation Program Rounds, Princess Margaret Hospital, Toronto. 1998

30. Radiation-induced lung damage: Clinical studies at the Princess Margaret Hospital. University of Michigan, Ann Arbor, USA. 1991

32. Radiation-induced pulmonary damage: Clinical studies at the Princess Margaret Hospital. University of Chicago Medical Center, Chicago, USA. 1987

**PRESENTATIONS AT SCIENTIFIC MEETINGS**

7. Dosimetric Evaluation of Bluk Electron Density Based Treatment Planning in IMRT Head and Neck Patients: Can it be used for MRI-based Planning? The 2010 COMP Meeting, Ottawa, Ontario

11. Remote Radiation Oncology (or a Tale of Two Cities) – The Royal Victoria Hospital and Odette Cancer Centre Experience in Remote Radiation Treatment Deliver (RTD). The 2009 CARO Annual Meeting, Quebec City. 2009

15. Defining the Appropriate PET Intensity Threshold and CT Threshold for Target Delineation in Early Stage Non-small Cell Lung Cancer: A Radiological and Pathological Correlation Study. The Annual Meeting of the American Society of Therapeutic Radiology and Oncology, Boston, USA. 2008

16. Automatic definition of radiation targets using textural characteristics of both Co-registered PET and CT images. The Annual Meeting of the American Society of Therapeutic Radiology and Oncology, Boston, USA. 2008

17. Variability in identification of positive nodes for head and neck cancers: Comparison of CT alone with PET-CT. The Annual Meeting of the American Society of Therapeutic Radiology and Oncology, Boston, USA. 2008

18. Automatic definition of radiation targets using textural characteristics of both Co-registered PET and CT images. The Annual Meeting of the American Association of Physicists in Medicine, Houston, USA. 2008
19. Observer variability in radiotherapy targeting of head and neck tumors: Can PET-CT reduce the variability?. The Annual Meeting of the Society of Nuclear Medicine, New Orleans, USA. 2008

20. FDG PET/CT based feature analysis of head and neck cancer for radiation targeting. The Annual Meeting of the Society of Nuclear Medicine, New Orleans, USA. 2008

21. Radiological-Pathological Correlation (RPC) In Non-Small Cell Lung Cancer (NSCLC): Developing 3-Dimensional (3-D) Methodologies For Examining Radiation Target Volume Delineation. The Joint Scientific Meeting of the Canadian Association of Radiation Oncologists and the Canadian Organization of Medical Physics, Toronto. 2007

22. Variability in Identification of Positive Nodes for Head And Neck Cancers: Comparison Of CT Alone With PET/CT. The Joint Scientific Meeting of the Canadian Association of Radiation Oncologists and the Canadian Organization of Medical Physics, Toronto. 2007

23. Co-registered PET/CT based 3D Texture Classification of Head and Neck Cancer. The Joint Scientific Meeting of the Canadian Association of Radiation Oncologists and the Canadian Organization of Medical Physics, Toronto. 2007

25. Observer Variability in Primary Tumor Localization for Head and Neck Cancers: Can PET-CT reduce the variability? The Multidisciplinary Head & Neck Cancer Symposium, Rancho Mirage, USA. 2007

27. Prospective Evaluation of Pulmonary Toxicity using CT Density, Pulmonary Function and Symptom Assessment. The Annual Meeting of the Canadian Association of Radiation Oncologists, Victoria. 2005

28. Individualized tumor motion from PET for radiation therapy targeting. The 52nd Annual Meeting of the Society of Nuclear Medicine, Toronto. 2005

29. Cost effectiveness of $^{18}F$-FDG PET/CT on radiation therapy for non-small cell lung cancer: A Canadian perspective. The 52nd Annual Meeting of the Society of Nuclear Medicine, Toronto. 2005

31. Can Positron Emission Tomography (PET) Provide Individualized Internal Target Volumes (ITV)? A Physiological Phantom Study and Clinical Validation. The 46th Annual Meeting of the American Society of Therapeutic Radiology and Oncology, Atlanta, USA. 2004
32. Automated Target Definition for Radiation Treatment. The Canadian Organization of Radiation Oncologists, Halifax. 2004

34. Results of a Needs Assessment for Education in Rectal Contouring in Planning of 3DCRT for Prostate Cancer. The 11th International Ottawa Conference on Medical Education, Barcelona, Spain. 2004

35. Performance evaluation of a PET/CT imaging system for radiation oncology treatment simulation. The Canadian Organization of Physicists in Medicine Annual Meeting, Winnipeg. 2004

36. Is Central Necrosis Detected by FDG PET an Adverse Feature in Non-Small Cell Lung Cancer?. The 88th Annual Meeting of the Radiological Society of North America, Chicago, USA. 2002

37. Defining Internal Target Volume (ITV) of Moving Targets: Limitations of Spiral CT and Potential of PET Imaging. The 2nd Annual Meeting of Canadian Association of Radiation Oncologists, Toronto. 2002

38. The Limitations of Spiral CT and the Potential for PET Imaging in Defining the Internal Target Volume of Moving Targets. The 44th Annual Meeting of the American Association of Physicists in Medicine. 2002

41. Interobserver Variation in Contouring Gross Tumour Volume in Carcinoma of the Lung Associated with Pneumonitis and Atelectasis: The Impact of 18FDG-Hybrid PET Fusion. 42nd Annual Meeting of the American Society for Therapeutic Radiology and Oncology, Boston, USA. 2000

42. Fusing 18fluorodeoxyglucose (FDG)-hybrid PET to CT images significantly alters treatment planning in the radical treatment of non-small cell carcinoma of the lung. The 42nd Annual Meeting of the American Society for Therapeutic Radiology and Oncology, Boston, USA. 2000

43. Inter-Observable Variation in Contouring Gross Tumour Volume In Carcinoma Of The Lung: The Impact. The Annual Meeting of the European Society of Radiation Oncology, Istanbul, Turkey. 2000

47. Fusing $^{18}$fluorodeoxyglucose (Fdg)-Hybrid Pet To Ct Images Significantly Alters Treatment Planning In The Radical Treatment Of Non-Small Cell Carcinoma Of The Lung. Presented at the 69th Annual Meeting of the Canadian Association of Radiation Oncologists (CARO), Edmonton. 2000

48. FDG-PET/CT Integration: Impact on Tumour Localization and Dose Volume Histograms in Radiation Therapy. World Congress on Medical Physics and Biomedical Engineering, Chicago, USA. 2000

49. FDG-PCD to CT Fusion: Improved Tumour Localization for Radiotherapy Planning in Lung Carcinoma. The Ontario OCTRF/OMPA Meeting, Lake Couchiching. 1999

50. Image Fusion as an Investigative Tool in Radiation Therapy. The 6th Annual Picker Oncology Symposium, San Antonio, USA. 1999

51. Beyond the conventional: Advanced applications of CT-simulation. The 45th Annual Scientific Meeting of the Canadian Organization of Medical Physicists, Sherbrook. 1999

52. Evaluation of a 3D Treatment Planning system using the AAPM TG23 Test Package. The 44th Annual Scientific Meeting of the Canadian Organization of Medical Physicists, London. 1998

55. Radiation therapy planning of recurrent meningioma using image registration in combination with virtual simulation. The XI International Conference on Medical Physics at the World Congress on Medical Physics and Biomedical Engineering, Nice, France.1997

56. CT-Simulation of Craniospinal Fields in Paediatric Patients: Accurate Planning-Simulation without Distress. The 43rd Annual Scientific Meeting of the Canadian Organization of Medical Physicists, PEI. 1997

57. Experience in Acceptance & Commissioning of a Philips Multileaf Collimator. The Ontario OCTRF/OMPA Meeting, Lake Couchiching. 1993

59. Clinical studies on radiation-induced pulmonary damage at the Princess Margaret Hospital. The 3rd International Conference on Dose, Time and Fractionation in Radiation Oncology. 1988
60. Isoresponse distributions for pulmonary tissues. The 3rd International Conference on Dose, Time and Fractionation in Radiation Oncology. 1988

61. Evaluation of correction factor distributions in thoracic treatment planning. The World Congress on Medical Physics and Biomedical Engineering. 1988

64. Quantitative changes in human lung density following fractionated radiation therapy. The 28th Annual Meeting of the American Association of Physicists in Medicine, Lexington, USA. 1986

65. Isoresponse curves for radiation-induced lung damage. The 28th Annual Meeting of the American Association of Physicists in Medicine, Lexington, USA. 1986

67. CT findings in acute radiation-induced pulmonary damage. The 71st Annual Meeting of the Radiological Society of North America, Chicago, USA. 1985

68. Acute radiation-induced pulmonary damage: Dose response to fractionated radiation therapy. The 27th Annual Meeting of the American Society of Therapeutic Radiology and Oncology, Miami Beach, USA. 1985

70. Dose response data for acute radiation-induced pulmonary damage: Preliminary results. The XIV International Conference on Medical and Biological Engineering and the VII International Conference on Medical Physics, Espoo, Finland. 1985

71. Radiation-induced lung damage, the determination of dose response data. The Wescan Conference on Medical Physics, Thunder Bay. 1985

72. A clinical study to evaluate the dose response of lung tissues to fractionated radiation therapy. The 2nd International Conference on Dose, Time, and Fractionation in Radiation Oncology, Madison, USA. 1984

73. Quantitative measurement of lung density changes following lung irradiation. The 8th International Conference on the Use of Computers in Radiation Therapy, Toronto. 1984

74. Time varying dose due to respiratory motion during radiation therapy of the thorax. The 8th International Conference on the Use of Computers in Radiation Therapy, Toronto. 1984
RESEARCH SUPERVISION; TEACHING; DESIGN:

Undergraduate Courses Taught

Sept 2010 to Dec 2010: Lecture for Michener’s Radiation Sciences RSRT231 Treatment Planning I

Jan 2008 to April 2008: Lecturer for Michener’s Radiation Sciences III: Advanced Planning; University of Toronto’s Dept of Radiation Oncology

Sept 2001 to 2008: Lecturer for Michener’s Radiation Sciences III: Advanced Planning; University of Toronto’s Dept of Radiation Oncology

Postgraduate Courses Taught

1996 to present; also in 1993-94 Applied Physics Course, DRO, one of three physicists responsible for Applied Physics Course. Co-director of the course 2014 to present

2008 to present: Interdisciplinary Rotation for Medical Physics Residents, Odette Cancer Centre, UofT.

2013 to present: Supervisor, Treatment Planning 2 Medical Physics Residents, Odette Cancer Centre, UofT

1996 to 2007: Weekly session with Radiation Oncology Residents during Physics Rotation

1996 to 2007: Weekly session with Medical Physics Residents during Dosimetry Rotation

1986 to 1990: Tutorials with Radiation Oncology Residents in Planning

Medical Physics Resident Supervision

2011-2013 Dr. Niranjan Venugopal (Mentor – Clinical only)
2009-2011 Dr. Huan Yu (Mentor & Research project)
2007-2009 Dr. Alex Karotki (Mentor & Research project)
2004-2006 Dr. Beibei Zhang (Mentor & Research project)
2000-2002 Mr. Matthew Skinner (Mentor & Research project)
1998-1999 Dr. Geordi Pang (Mentor)

Educational Media

1. Virtual Elective in Radiation Oncology (VERO), University of Toronto, Dept of Radiation Oncology; Author of Medical Physics Chapter; In Preparation

3. Co-course supervisor: Radiation Sciences III (Advanced Treatment Planning) for Radiation Therapy Students, Michener Institute and the University of Toronto, Dept. of Radiation Oncology. 2001-2002
4. Organizing Committee, DRO, University of Toronto, for “Target Insight: Innovative strategies to improve target definition in Radiation Oncology” May 4 – 6, 2001, Toronto, Ontario

2015 CURRICULUM VITAE

Contact Information

Name Claire McCann Ph.D., MCCPM
Business Address Department of Medical Physics
Odette Cancer Center
Sunnybrook Health Sciences Center
2075 Bayview Avenue

Toronto ON, Canada, M4N 3M5
Business Telephone 416-480-6100 ext. 1096
Business Fax 416-480-6801
Email Address Claire.McCann@sunnybrook.ca
Date of Preparation August 17, 2016

Education

University Education

2000 Bachelor of Applied Science, Honours
Department of Mechanical Engineering, University of Toronto, CANADA

2002 Master of Health Science
Institute of Biomaterials and Biomedical Engineering (IBBME),
Clinical Engineering Program, University of Toronto, CANADA

2007 Doctor of Philosophy
Department of Medical Biophysics, University of Toronto, CANADA
PhD Supervisor: Dr. M D Sherar

Post-Graduate and Medical Training

2007-2009 Medical Physics Residency (CAMPEP Accredited)
Princess Margaret Hospital, Department of Radiation Oncology,
University of Toronto, CANADA
Continuing Education

2005  Teaching in Higher Education (THE500), University of Toronto
2009  Transport Dangerous Goods Training, Princess Margaret Hospital
2009  Radioactive Spill Training, Princess Margaret Hospital
2009  IGRT Course, Princess Margaret Hospital
2010  Intensity Modulated Radiotherapy – IMRT Insights 2010
2010  Linear Accelerator Service Training Course, Stronach Regional Cancer Center
2011  CCO: Arc Therapy as Accelerated IMRT: Principles, Practice and Implementation

Scholarships and Awards

1999-Present  Golden Key National Honor Society
2000  Natural Sciences and Engineering Research Council (NSERC) Undergraduate Summer Research Scholarship
2000-2001  Ontario Graduate Scholarships in Science and Technology (OGSST)
2001-2002  Natural Sciences and Engineering Research Council (NSERC) PGS-A: Postgraduate Scholarship
2001-2003  Ontario Graduate Scholarship (OGS)
2000-2004  University of Toronto Fellowship Award
2004  International Congress of Hyperthermic Oncology Travel Award
2003-2005  Natural Sciences and Engineering Research Council (NSERC) PGS-B: Postgraduate Scholarship
2005-2007  National Cancer Institute of Canada (NCIC) Terry Fox Foundation Research Studentship Award (Ranking: 1 of 56 applications nationally)
2014  UTDRO Teaching Excellence Award

Hospital/Staff Appointments

Feb 2010-Nov 2010  Medical Physicist  
                  Stronach Regional Cancer Center,  
                  Southlake Regional Health Center, Newmarket, ON
Dec 2010-Present  Medical Physicist  
                  Odette Cancer Center  
                  Sunnybrook Health Sciences Center, Toronto, ON
October 2013-2016  Medical Director OCC Clinical Research  
                  Odette Cancer Center  
                  Sunnybrook Health Sciences Center, Toronto, ON

Academic Appointments

2013-2019  Assistant Professor  
            Department of Radiation Oncology,  
            University of Toronto
2011-2017  Adjunct Professor  
            Department of Physics and Yeates School of Graduate Studies  
            Ryerson University, Toronto, ON
2012-2018  Affiliated Faculty Member  
            The Techna Institute: Institute for the Advancement of technology for Health  
            University Health Network and the University of Toronto
2014-2017  Associate Member  
            Institute of Medical Science, University of Toronto
2013-2019  Affiliate Scientist  
            Sunnybrook Research Institute  
            Physical Scientists Platform of the Odette Cancer Program

Administration and Committee Appointments

2015-2018  Director of Academic Communications, Department of Radiation Oncology,  
            Faculty of Medicine, University of Toronto
2015-2016  Physics Residency Registrar, Department of Radiation Oncology,  
            Faculty of Medicine, University of Toronto
2012-present  Radiation Program Quality Assurance Committee
2013-present  Cancer Committee, Odette Cancer Center, Sunnybrook Health Sciences Center

Professional Affiliations and Activities

Member  Canadian Organization of Medical Physicists (COMP)
Associate Member Canadian Association of Radiation Oncology (CARO)

C McCann
Certifications and Licensures

C McCann
MSc Project: Radiation Enhancement with Gold Nanoparticles and Hyperthermia
Co-Supervisor

2010-2014 P. P., University of Toronto, Institute of Biomaterials and Biomedical Engineering
PhD Project: Novel radiofrequency devices for treatment of bone metastases.
Member of Supervisory Committee

2012-2014 M. A., Ryerson University, Department of Physics and Yeates School of Graduate Studies
MSc Project: Evaluating the Robustness of an IMRT Planning Method for Lung Radiotherapy that Accounts for Intrafraction Motion.
Co-Supervisor

2012-2014 S. A-W., Ryerson University, Department of Physics and Yeates School of Graduate Studies
MSc Project: Clinical Implementation of a Robust Planning Method for Lung Cancer Radiotherapy
Supervisory Committee Member

2012-2013 J. C., Ryerson University, Department of Physics
4th Year Undergraduate Thesis: Achievability Criteria for Head and Neck IMRT Dose Constraints
Co-Supervisor

2013-2014 W.P. Ryerson University, Department of Physics
4th Year Undergraduate Thesis: Development of an Immobilization and Guidance Platform for Breast RFA
Supervisor

2013-2014 P.W. Ryerson University, Department of Physics
4th Year Undergraduate Thesis: Retrospective Planning Study of Heart Sparing in ABC vs. Reverse Decubitus Patients
Supervisor

2013-2014 F.F. Ryerson University, Department of Physics
4th Year Undergraduate Thesis: Characterization of the Electromagnetic Fields of an RFA Coil for Breast and Bone Ablation
Supervisor

Examination Committee Member
2013 C.P., Ryerson University, Department of Physics and Yeates School of Graduate Studies
MSc Defense: A robust 4D treatment planning approach for lung radiotherapy
2015 S. A-W., Ryerson University, Department of Physics and Yeates School of Graduate Studies, MSc Project: Clinical Implementation of a Robust Planning Method for Lung Cancer Radiotherapy

Teaching and Design
2000 Research Associate
University of Toronto, Department of Mechanical and Industrial Engineering

C McCann
Development of Control Systems Laboratories (MIE404: Control System I)

2000-2003  Teaching Assistant
University of Toronto, Department of Mechanical and Industrial Engineering
MIE404: Control System I
MIE100: Dynamics

2011  Dosimetry Education
Odette Cancer Center, Sunnybrook Health Sciences Center
IMRT Lung Planning
IMRT H&N Planning

2011  UTDRO Medical Physics Residency Teaching/Evaluation
Odette Cancer Center, Sunnybrook Health Sciences Center
Radiobiology I
Radiobiology II
Radiation Safety I
Gynae HDR

2012  Dosimetry Education
Odette Cancer Center, Sunnybrook Health Sciences Center
IMRT H&N Planning-Automated H&N Scripts

2012  UTDRO Medical Physics Residency Teaching/Evaluation
Odette Cancer Center, Sunnybrook Health Sciences Center
Treatment Planning (I)
Field Shaping and Junctions
Dose Calculation Algorithms

2012-2013  UTDRO Medical Physics Residency: Redesign/Development of Resident Session Tutorials

2013  UTDRO Medical Physics Residency Mock Exam
Odette Cancer Center, Sunnybrook Health Sciences Center

2013  Lecture: Respiratory Motion in Radiation Therapy
4th yr Radiation Therapy Course
Medical Physics Program, Ryerson University

2013  UTDRO Medical Physics Residency Teaching/Evaluation
Odette Cancer Center, Sunnybrook Health Sciences Center
Breast Cancer: Radiation Treatment Techniques
TBI and TSEI
Brachytherapy Basics
IMRT and IGRT
Radiobiology
LDR Implants
Treatment Planning-Breast
Radiation Physics
Treatment Planning-Head and Neck
Brachytherapy: LDR
2014  UTDRO Medical Physics Residency Teaching/Evaluation  
Odette Cancer Center, Sunnybrook Health Sciences Center  
  Combinations of Beams  
  Radiobiology  
  Brachytherapy Basics  
  Treatment Planning: Breast Radiotherapy  

McCann C. Heart Sparing in Breast Radiotherapy: Techniques at OCC  

2014  UTDRO Teaching Excellence Award  

2015  UTDRO Medical Physics Residency Teaching/Evaluation  
Odette Cancer Center, Sunnybrook Health Sciences Center  
  Breast Cancer: Radiation Treatment Techniques  
  IMRT and IGRT

  Instrumentation  
  Radiobiology  

2016  Medical radiation Sciences, The Michener institute, University of Toronto, Department of Radiation Oncology, Course Title: Radiation Beams and Their Applications  
  13 week full course
Curriculum Vitae

Andrea Leigh McNiven

Business Address:
Radiation Medicine Program
UHN- Princess Margaret Cancer Centre
610 University Avenue, Rm 5-612
Toronto, ON
M5G 2M9

Phone: 416-946-4501 x.4273
Fax: 416-946-4501 x. 4578
E-mail: andrea.mcniven@rmp.uhn.on.ca

Residence: 223-900 Mount Pleasant Road, Toronto, ON, M4P 3J9

1. Date of Preparation: October 12, 2015

BIOGRAPHICAL INFORMATION

1. Education and Certification

2002 BMSc
The University of Western Ontario, Honours Biophysics

2007 PhD
The University of Western Ontario, Medical Biophysics

2009 CAMPEP Medical Physics Residency
University of Toronto, Medical Physics

2010 MCCPM
Member, The Canadian College of Physicists in Medicine

2014-2016 Education Scholars Program
Centre for Faculty Development, University of Toronto
Expected Graduation: September 2016

2. Employment

2009 – Medical Physicist
Radiation Medicine Program, Princess Margaret Cancer Centre, Toronto, ON

2010 - Assistant Professor
University of Toronto, Department of Radiation Oncology
AL McNiven  2 of 10

2014 - Residency Site Coordinator
Princess Margaret Cancer Centre, University of Toronto, Department of Radiation Oncology Medical Physics Residency Program, Toronto, ON

2007 – 2009 Medical Physics Resident,
Princess Margaret Cancer Centre

2002 – 2007 Teaching Assistant, Department of Medical Biophysics,
The University of Western Ontario, London, ON

3. Honours and Awards

National

2004 – 2007 CIHR/UWO Strategic Training Program in Cancer Research and Technology Transfer
2006 J.R. Cunningham Young Investigator Award Finalist, 52nd Annual COMP Meeting
2004 J.R. Cunningham Young Investigator Award Finalist, 50th Annual COMP Meeting

Provincial

2005 – 2007 Ontario Graduate Scholarship
2003 – 2005 Ontario Graduate Scholarship in Science and Technology

Local

2013 Physics Resident’s Choice Award, Best Clinical Teaching
2011 Radiation Medicine Program, Best Physicist Award
2009 J.R. Cunningham Award for Excellence in Academic Research by a Physics Trainee, University of Toronto Department of Oncology Research and Awards Day
2002 – 2003 Special University Scholarship, The University of Western Ontario
1998 – 1999 Merit Entrance Award, The University of Western Ontario
4. Professional Affiliations and Activities

Professional Associations

Member, American Association of Physicists in Medicine
Member, Canadian Organization of Medical Physicists

Other Research and Professional Activities

PRESENTATIONS AND LECTURES

Scientific Presentations and Activities

INTERNATIONAL

1. Papers/Posters/Abstracts

12. McNiven, AL, Davidson, MTM., Sharpe, MB., Purdie, TG. Predicting the deliverability of head and neck IMRT using the modulation complexity score. ASTRO 2010.

1. Papers/Posters/Abstracts

7. McNiven, AL, Davidson, MTM., Sharpe, MB., Purdie, TG. Head and neck IMRT complexity characterization and prediction of deliverability using the modulation complexity score. COMP, 2010.

1. Papers/Posters/Abstracts

2. Invited Presentations

   1. **McNiven, A.** Improving the Accuracy of Ion Chamber Measurements in Small Field Dosimetry, Toronto Sunnybrook Regional Cancer Centre, May 23, 2007.

   4. **McNiven, A.** The accuracy of modeling 3D prostate deformation from ex vivo histology to invivo MRI: A preliminary investigation. Odette Cancer Centre, Toronto, ON, April 21, 2009.

   7. **McNiven, A.** Potential Tools for the Assessment of Treatment Plan Quality: Examples from Head and Neck IMRT. Radiation Medicine Program Rounds, Princess Margaret Hospital. April 7, 2011.

TEACHING AND DESIGN

2002 – 2007  Teaching Assistant, Human and Animal Biomechanics
            3rd Year Undergraduate Course
            Department of Medical Biophysics,
            The University of Western Ontario, London, ON

2009  Co-Lecturer for Physics Review Sessions for PGY1 Radiation Oncology
      Residents, University of Toronto, Department of Radiation Oncology

2009-Current  Moderator for UTDRO Physics Residency Tutorials at PMH

2010  Lecturer, Physics Course for PGY1 Medical Residents
      Two lectures on Radioactivity and Brachytherapy
      University of Toronto, Department of Radiation Oncology

2010  Lecturer, Physics Review for PGY3 Medical Residents
      University of Toronto, Department of Radiation Oncology

2010  Lecturer, Medical Physics Residency, Film Dosimetry (2 h)

2011  Lecturer, Physics Course for PGY1 Medical Residents
      Two lectures on Radioactivity and Brachytherapy
      University of Toronto, Department of Radiation Oncology

2011  Lecturer, Medical Physics Residency, Film Dosimetry (2 h)

2011  Lecturer, Physics Review for PGY3 Medical Residents
      University of Toronto, Department of Radiation Oncology

2012  Lecturer, Physics Course for PGY1 Medical Residents
      Two lectures on Radioactivity and Brachytherapy
      University of Toronto, Department of Radiation Oncology

2013  Lecturer, CANMEDS Scholar for PGY1 Medical Residents
      Two lectures on Radioactivity and Brachytherapy
      University of Toronto, Department of Radiation Oncology

2013  Rotation Supervisor, PGY2 and 3 Medical Residents
      Dosimetry Rotation
      University of Toronto, Department of Radiation Oncology
      Lecturer in Rotation (15 h x 3)

2013  Lecturer, Longitudinal Physics, PGY2 Medical Residents
      Four treatment planning sessions (12 h)
      University of Toronto, Department of Radiation Oncology

2013  Lecturer, Medical Physics Residency
      Film Dosimetry, Plan QC, Treatment Planning (6 h)
2013 Faculty, Head and Neck IGRT Course and IMRT Course
Accelerated Education Program
Princess Margaret Cancer Centre

2013 Faculty, Head and Neck IMRT Course
Kuwait Cancer Centre

2013- Supervisor, Treatment Planning 1 Rotation for Physics Residents
Princess Margaret Cancer Centre

2014 Lecturer, PGY1 Medical Residents
Introduction to Basic Interactions and Introduction to Machines
University of Toronto, Department of Radiation Oncology (3 h)

2014 Rotation Supervisor, PGY2 Radiation Oncology Medical Residents
Dosimetry Rotation
University of Toronto, Department of Radiation Oncology
Lecturer in Rotation (15 h)

2014 Lecturer, Longitudinal Physics, PGY2 Medical Residents
Four treatment planning sessions (12 h)
University of Toronto, Department of Radiation Oncology

2015 Lecturer, Longitudinal Physics, PGY2 Medical Residents
Five treatment planning sessions (15 h)
University of Toronto, Department of Radiation Oncology
Curriculum Vitae

1. EDUCATION

Degrees
1984 - 1989 BMath, Co-op Degree in Applied Mathematics and Computer Science, University of Waterloo, Waterloo, Ontario
1984 Cameron Heights Collegiate Institute, Kitchener, Ontario

Qualifications, Certifications and Licenses
2007 - present Therapeutic Radiologic Physics Certification, American Board of Radiology

2. EMPLOYMENT

Current Appointments
2008 - present Deputy Head, Radiation Therapy Physics, Stronach Regional Cancer Centre at Southlake, Newmarket, Ontario
2007 - present Medical Physicist II, Radiation Medicine Program, Princess Margaret Hospital, Toronto, Ontario
2006 - present Adjunct Associate Professor, Dept of Computational Engineering and Science, Faculty of Engineering, McMaster University
2005 - present Assistant Professor, Radiation Oncology, Faculty of Medicine, University of Toronto
2012 Sep - 2015 Director of Knowledge Translation, Radiation Oncology, Faculty of Medicine, University of Toronto, Ontario, Canada

The Director of Knowledge Translation (KT) for UT-DRO will oversee the development of a comprehensive KT program, comprised of innovative educational products targeting a broad audience, with global impact.
Responsibilities

- Develop an integrated, inter-professional, internationally-renowned KT program for all relevant disciplines, in collaboration with other members of the UT-DRO Executive
- Emphasize an inclusive learning environment; maintain a culture of respect, civility, professionalism, and social responsibility within UT-DRO
- Ensure the KT program abides by all Faculty of Medicine policies including Industry relations, and professionalism
- Oversee the overall coordination, implementation and evaluation of all components of the KT Program, currently comprised of Target Insight, RTi3, UT-DRO Rounds, and Visiting Professorships
- Advise the Chair or Vice-Chair of Academic Affairs, on any issues relevant to the KT Program
- Oversee the financial aspects of the KT Program, develop an operating budget, with a robust long-term business strategy
- Participate as a member of the UT-DRO Executive Committee
- Chair the KT Committee of UT-DRO
- Represent UT-DRO on CE/KT, and any pertinent committees within the Faculty of Medicine
- Collaborate with external groups such as the Faculty of Medicine Continuing Education Professional Development (CEPD) Office, or the Li Ka Shing Knowledge Institute, to partner for mutual success
- Submit reports to the UT-DRO Executive on KT activities within UT-DRO as requested

Previous Appointments

HOSPITAL

2005 - 2007 Medical Physicist I, Radiation Medicine Program, Princess Margaret Hospital, Toronto, Ontario
2002 - 2005 Scientific Associate, Ontario Cancer Institute, Princess Margaret Hospital, Toronto, Ontario

RESEARCH

1998 - 2001 Principal Engineer (Advanced Process Control Development Group), Honeywell Industrial Automation and Control, Phoenix, Arizona
1994 - 1998 Jun Simulation Technology Specialist (Operator Training Simulators), Honeywell Hi-Spec Solutions (formerly SACDA), London, Ontario
1989 Research Assistant, Department of National Defence (DCIEM), Downsview, Ontario

UNIVERSITY

1989 - 1994 Teaching Assistant, University of Western Ontario, London, Ontario

3. HONOURS AND CAREER AWARDS

Distinctions and Research Awards

INTERNATIONAL

Received

2007 Apr Editor’s Choice Award, Cogent Medicine. (Distinction)
For Red Journal Article: “Comparison of localization performance with implanted fiducial markers and cone-beam computed tomography for on-line image-guided radiotherapy of the prostate”. 
4. PROFESSIONAL AFFILIATIONS AND ACTIVITIES

Professional Associations

2005 - present  Full Member, American Association of Physicists in Medicine (AAPM)
2005 - present  Associate Member, American Society of Therapeutic Radiology and Oncology (ASTRO)
2004 - present  Member, Member of Society of Optical Engineers (SPIE)
1994 - present  Member, Society for Industrial and Applied Mathematics (SIAM)
Administrative Activities

INTERNATIONAL
American Association of Physicists in Medicine
2008 Member, TG179 Quality Assurance for IGRT utilizing CT-based technologies
2007 Member, TG161 Research Software for Cone-Beam CT Reconstruction

15th International Conference on the use of Computers in Radiation Therapy
2007 Member, Organizing Committee

LOCAL
Other Organizations
2013 Jan - present Appointments Committee, Faculty of Medicine, Dept of Radiation Oncology, Faculty Development, Toronto, Ontario, Canada.

University of Toronto
2008 - present Member, RMP CE Committee (Chair David Wiljer), Faculty of Medicine, Dept of Radiation Oncology, Continuing Education

Peer Review Activities

MANUSCRIPT REVIEWS
Reviewer
2005 - present Medical Physics
2004 - present Physics in Medicine and Biology

PRESENTATION REVIEWS
Reviewer
2007 International Conference on the Use of Computers in Radiotherapy
Judge
2004 Nov American Association of Physicists in Medicine (AAPM) Great Lakes Chapter, Young Investigator and Image-Guided Therapy Symposium

Board Certifications and Licensure

2016                            American Board of Radiology in Therapeutic Medical Physics

EDUCATION & CLINICAL TRAINING

2013-2015                        Clinical Medical Physics Resident
                                  CAMPEP accredited Therapeutic Radiologic Medical Physics Residency
                                  University of Michigan Health System, Ann Arbor, MI

2009-2012                        PhD, Biomedical Engineering
                                  The University of Western Ontario, London, Canada
                                  Dissertation Title: Quantitative Evaluation of Pulmonary Emphysema Using Magnetic Resonance Imaging and x-ray Computed Tomography
                                  Supervisor: Grace Parraga, PhD

2005-2007                        MSc, Radiation-Medicine Engineering
                                  Shiraz University, Shiraz, Iran
                                  Dissertation Title: Monte Carlo Simulation of the Medical Linear Accelerator Photon Beam Using MCNP4C and EGSnrc
                                  Supervisor: Amin Mosleh-Shirazi, PhD

1999-2004                        BSc, Physics
                                  Shiraz University, Shiraz, Iran
                                  Dissertation Title: Dose Measurements using Thermoluminescence in Interventional Radiology
                                  Supervisor: Simin Mehdizadeh, MSc

Grants:

2016 (May- August) $10,000    Harold E. Johns Studentship to hire a summer student to work on developing frameworks necessary for moving toward MR-guidance in radiation oncology
EMPLOYMENT

Current Appointments

ACADEMIC

May 2016 – Present  Assistant Professor, Department of Radiation Oncology, University of Toronto, Toronto, Ontario, Canada

Research Interests:
- Developing platform for MRI only treatment planning
- Developing simulation techniques to perform MRI only brachytherapy

CLINICAL

Oct. 2015 – Present  Medical Physicist, Odette Cancer Centre, Department of Medical Physics, Sunnybrook Health Sciences Centre, Toronto, Ontario, Canada

Clinical Interests:
- MRI guided radiation therapy
- Brachytherapy
- Adaptive radiation therapy

Previous Appointments

CLINICAL

Mar. 2013 - Aug. 2015  Clinical Medical Physics Resident, Department of Radiation Oncology, University of Michigan, Ann Arbor, Michigan

- Leading the effort to commission a new fetal lead shield
- Participated in commissioning of new monitor unit calculation procedure for TBI
- Participated in commissioning and clinical implementation of MR guided cylinder HDR brachytherapy

TEACHING

Sep. 2013 - Apr. 2014  Teaching Assistant for Physics for Radiation Therapy Technicians, (RTT 431/432), University of Michigan, Ann Arbor, Michigan, USA.

- provided one-on-one guidance on problem solving and evaluations of student work

Jan. 2012 – Apr. 2012  Teaching Assistant for Scientific Communications (BIOMED 9504), University of Western Ontario, London, Canada

- provided one-on-one guidance and evaluations of student work
Jan. 2012 – Apr. 2012  Teaching Assistant for Advanced Research & Knowledge Translation (BIOMED 9650), University of Western Ontario, London, Canada
- provided one-on-one guidance and evaluations of student work

Jan. 2010 - Apr. 2010  Teaching Assistant for Scientific Communications (BIOMED 9504), University of Western Ontario, London, Canada

HONOURS AND AWARDS

2009-2012  Western Graduate Research Scholarship
Awarded to graduate students who are enrolled and have a grade point average of 80% or above.
Institutional – Full tuition

2011-2012  Queen Elizabeth II Graduate Scholarship in Science and Technology (QEIIGSST)
Provincial to cover the stipend

2011  JR Cameron and JR Cunningham Young Investigator competition
Finalist(AAPM/COMP Joint Annual Meeting)

2011  Canadian Thoracic Society (CTS)
First Annual Poster Competition -Finalist

2007  The Highest Ranked Graduate in the Radiation-Medicine Engineering program (MSc) Shiraz University, Shiraz, Iran
Institutional

2006  Best Presentation Award -1st International Human, Life and Radiation Conference (HLR 2006) Rafsanjan University of Medical Science, Rafsanjan, Iran - International

TRAINEE and RESEARCH SUPERVISION

Summer student on Harold E. Johns Studentship 2016 (May- August)
Student Name: Levi Burns
Project title: Investigation of a method for generating synthetic CT models from MRI scans of the pelvis for radiation therapy

Undergraduate 4th year thesis 2010-2011
Student Name: Lauren Villemaire
Thesis title: Pulmonary Tumour Measurements from X-Ray Computed Tomography in One-Two- and Three-dimensions

This project results in the following publication:
PROFESSIONAL MEMBERSHIPS

1. Canadian Organization of Physicists in Medicine (since January 2010)
2. American Association of Physicists in Medicine (since October 2011)

PUBLICATIONS

Peer Reviewed Manuscripts

Published and In Press

4. Soliman AS, Elzibak A, Easton H, Kim JY, Han DY, Safigholi H, Mashouf S, **Owrangi A**, Ravi A and Song WY. Quantitative MRI Assessment of a Novel Direction Modulated Brachytherapy Tandem Applicator for Cervical Cancer at 1.5 Tesla. Accepted for publication in the *Radiother Oncol (in press)*

Non-Peer Reviewed Manuscripts

ABSTRACTS AND PRESENTATIONS

A Oral Presentations

4. **Owrangi A**, Wang JX, O'Riordan E, McCormack DG, Parraga G, The relationship of ultra-short time {\textsuperscript{1}}H magnetic resonance imaging and pulmonary function in chronic obstructive pulmonary disease, Biomedical Engineering Society (BMES) Annual meeting, Austin, TX, USA. 2010

7. Mehdizadeh S, **Owrangi A**, Derakhshan S, Thermoluminescence dosimetry of patients in interventional radiology, The 1\textsuperscript{st} International Human, Life and Radiation Conference Rafsanjan, Iran. 2006

8. Mehdizadeh S, **Owrangi A**, Derakhshan S, Thermoluminescence dosimetry of cardiologist's hands in interventional radiology, The 1\textsuperscript{st} International Human, Life and Radiation Conference Rafsanjan, Iran. 2006

B Poster Presentations

25. **Owrangi A**, Wang JX, Wheatley A, McCormack DG and Parraga G, Quantitative analysis of $^1$H magnetic resonance imaging signal intensity in chronic obstructive pulmonary disease and comparison to $^3$He MRI, Canadian Student Conference on Biomedical Computing and Engineering (CSCBCE), London, ON, Canada. May 2011

CLASSROOM TEACHING

1. GRADUATE EDUCATION
Courses Taught
Co-taught the course (a required course for MBP graduate students) once a year with Drs. Lilge and Kolios (average number of students in the class was ~ 20). Prepared and delivered 10 hour lectures and 1 hour lab tour. Marked assignments (No TAs).

(2) MSC1500H “Advanced Radiotherapy and Medical Physics” (Course coordinator Dr. J. P. Pignol) 2003-2004, 2005-2006
This was a course offered to the graduate students in Institute of Medical Sciences in U of T (average number of students in the class was ~ 15). Prepared and delivered 1 hour lecture in session six: Imaging in Radiation Therapy.

2. POSTGRADUATE EDUCATION
Courses Taught
(1) U of T Radiation Oncology “Applied Physics” course (Course coordinator Dr. Judith Balogh) 2009-2010, 2010-2011, 2011-2012
This was a course offered to the oncology fellows and residents as well as physics residents in DRO, U of T. Prepared
and delivered 1 hour lecture on verification imaging and MU calculation

3. CONTINUING EDUCATION
(1) Physics resident sessions and rotations
2009-present
Participated in the training of 2-3 physics residents per year on average including: In class-room question and answer sessions and one-to-one lectures (on average ~10 h per year).

(2) Radiation Safety training to new physics and engineering staff at Odette Cancer Centre
2009-present
This training is required as a licence condition issued by CNSC. Prepared and delivered 1 hour lecture to every new physics member and a week-long training for every new engineering member.

C. Academic Profile

1. RESEARCH STATEMENTS

2005 Oct - present Description of Research Activity.

The focus of my current research activities has been related to automated processes for radiotherapy treatment planning and quality assurance. We have developed a completely automated treatment planning method for tangential breast intensity modulated radiation therapy (IMRT). The work with automation has garnered both a Princess Margaret Foundation grant and external operating Canadian agency grants. In addition, these research efforts have translated directly into the clinic and IMRT breast planning using automated tools is the standard practice for patient receiving tangential breast irradiation at our institution. We are currently investigating the application of these automated tools to new clinical processes. This includes using robust optimization methods to generate cardiac sparing breast IMRT and to use in-treatment room imaging modalities such as CBCT and MR for on-line and adaptive radiation therapy treatment approaches.

More recently, the research focus has been on developing and disseminating a comprehensive web-based application for treatment planning quality assurance. The system developed includes customized machine learning algorithms to automate many steps in the conventional quality control/quality assurance process. The system is being design for applications in the clinical trial environment and for multi-institutional peer review. An extension of the automated quality assurance work is the development of a highly general automated treatment planning methodology that represents a significant shift in which treatment plans are generated. The goal of the automated planning work is provide the radiation oncologist a treatment that can be reviewed within minutes of target delineation. There is tremendous potential to achieve clinical impact and transform the current radiation therapy process with the research developments being undertaken. The research efforts have been focused on improving standardization and adding efficiencies through the use of automation and big data methods. In addition, the research is building a framework to facilitate translation and knowledge dissemination. In this way, we can have a greater clinical impact and reach more patients with advanced technology to ultimately generate highly personalized cancer care.
2. TEACHING PHILOSOPHY

My teaching philosophy has always focused on understanding clinical and technical processes, emphasizing the importance of quality assurance and safety, using the most appropriate technology and enforcing clinical engagement with the radiation medicine disciplines of radiation oncology and radiation therapy.

3. CREATIVE PROFESSIONAL ACTIVITIES STATEMENT

During the last decade, my contribution to medical physics and more broadly radiation oncology, have spanned both clinical and technical domains. My Creative Professional Activities initially focused on the clinical implementation of stereotactic lung radiation therapy and breast radiation therapy treatment planning. More recently, a fundamental component of my activities have been on more generalized automated processes for radiation treatment planning and radiation therapy quality assurance. The automation has relied on more novel, non-traditional medical physics methodologies such as machine learning and optimization. These activities have also provided me the opportunity to engage in multi-disciplinary collaboration at a clinical, academic, education and research level.

E. Publications

1. MOST SIGNIFICANT PUBLICATIONS

   This is the first paper to describe a completely automated treatment planning solution using cone-beam computed tomography imaging. The paper shows that high quality and robust automated treatment plans can be generated from cone-beam images that are equivalent to plans generating using standard conventional computed tomography. This paper shows the potential for real-time automated adaptive treatment planning.

   The paper described our large-scale clinical implementation of automated planning for breast RT over a three year period (June 2009-Nov 2012) treating more than 1600 patients. The results demonstrated that we could generate automated plans with fewer errors than more manual approaches. In addition, we demonstrate the method has wide clinical applicability and we can transform our research effort into a clinical viable treatment approach.

   The work described in the paper was the retrospective evaluation of a completely automated treatment planning method for tangential breast radiation therapy. This paper demonstrated that automation can be applied to treatment planning for breast and improve the efficiency and quality of IMRT treatment planning without additional cost or resources. This work is the basis for clinical automated treatment planning which have been implemented at our institution.

This paper was one of the first papers using cone-beam computed tomography (CBCT) imaging for image-guidance in lung stereotactic body radiation therapy (SBRT). The paper highlighted the importance of target visualization in lung SBRT and the requirement for repeat imaging during treatment.

One of the first papers detailing a methodology to acquire four-dimensional imaging from cone-beam computed tomography (CBCT) imaging. The paper demonstrated novelty in not only applying CBCT imaging to stereotactic lung radiation therapy but also demonstrating the importance of measuring target motion for patients undergoing this high-dose per fraction treatment.

F. Intellectual Property

1. PATENTS

2. LICENSES

RaySearch Laboratories AB (publ.) has entered into an exclusive license agreement with University Health Network’s Princess Margaret Cancer Centre in Toronto, Canada regarding techniques for automated planning of breast cancer treatments.

The Princess Margaret has for a long time developed and refined a technique for automated planning of intensity modulated radiation therapy (IMRT) for breast cancer patients. The technique emulates the often time-consuming steps that are performed during treatment planning including organ segmentation, beam optimization, IMRT optimization and dose calculation. Therefore, dosimetrists can produce complete clinical treatment plans and automated quality assurance reporting in just a few minutes instead of spending up to several hours on each plan. The Princess Margaret has been using this technology clinically for a number of years and validated these techniques in extensive studies demonstrating considerable time saving and also equivalent or better plan quality compared with standard manual planning.

2008 Apr  Invited Lecturer. Introducing IGRT: A Site-Based Approach. Accelerated Education Program (AEP), Radiation Medicine Program, Princess Margaret Cancer Centre, and Department of Radiation Oncology, Faculty of Medicine, University of Toronto. Toronto, Ontario, Canada. Presenter(s): Purdie TG. Course: Imaged-Guided Radiation Therapy. (Continuing Education).

2008 Apr  Invited Lecturer. Assessing Tumour Motion using 4DCT Demonstration. Accelerated Education Program (AEP), Radiation Medicine Program, Princess Margaret Cancer Centre, and Department of Radiation Oncology, Faculty of Medicine, University of Toronto. Toronto, Ontario, Canada. Presenter(s): Purdie TG. Course: Imaged-Guided Radiation Therapy. (Continuing Education).
2008 Jan  **Invited Lecturer.** IGRT in Lung Cancer. Accelerated Education Program (AEP), Radiation Medicine Program, Princess Margaret Cancer Centre, and Department of Radiation Oncology, Faculty of Medicine, University of Toronto. Toronto, Ontario, Canada. Presenter(s): **Purdie TG.** Course: Imaged-Guided Radiation Therapy. (Continuing Education).

2008 Jan  **Invited Lecturer.** Assessing Tumour Motion using Four Dimensional Computed Tomography (4DCT) Demonstration. Accelerated Education Program (AEP), Radiation Medicine Program, Princess Margaret Cancer Centre, and Department of Radiation Oncology, Faculty of Medicine, University of Toronto. Toronto, Ontario, Canada. Presenter(s): **Purdie TG.** Course: Imaged-Guided Radiation Therapy. (Continuing Education).

2007 Nov  **Invited Lecturer.** IGRT in Lung Cancer. Accelerated Education Program (AEP), Princess Margaret Cancer Centre, Department of Radiation Oncology, Faculty of Medicine, University of Toronto. Toronto, Ontario, Canada. Presenter(s): **Purdie TG.** Course: Imaged-Guided Radiation Therapy. (Continuing Education).

2007 Nov  **Invited Lecturer.** Assessing Tumour Motion using 4DCT Demonstration. Accelerated Education Program (AEP), Princess Margaret Cancer Centre, Department of Radiation Oncology, Faculty of Medicine, University of Toronto. Toronto, Ontario, Canada. Presenter(s): **Purdie TG.** Course: Imaged-Guided Radiation Therapy. (Continuing Education).

2007 Jun  **Invited Lecturer.** Introducing IGRT: A Site-Based Approach. Accelerated Education Program (AEP), Princess Margaret Cancer Centre, Department of Radiation Oncology, Faculty of Medicine, University of Toronto. Toronto, Ontario, Canada. Presenter(s): **Purdie TG.** Course: Image-Guided Radiation Therapy. (Continuing Education).

2007 Jun  **Invited Lecturer.** Assessing Tumour Motion using 4DCT Demonstration. Accelerated Education Program (AEP), Princess Margaret Cancer Centre, Department of Radiation Oncology, Faculty of Medicine, University of Toronto. Toronto, Ontario, Canada. Presenter(s): **Purdie TG.** Course: Image-Guided Radiation Therapy. (Continuing Education).

2007 Mar  **Invited Lecturer.** Introducing IGRT: A Site-Based Approach. Accelerated Education Program (AEP), Princess Margaret Cancer Centre, Department of Radiation Oncology, Faculty of Medicine, University of Toronto. Toronto, Ontario, Canada. Presenter(s): **Purdie TG.** Course: Image-Guided Radiation Therapy. (Continuing Education).

2007 Mar  **Invited Lecturer.** Assessing Tumour Motion using 4DCT Demonstration. Accelerated Education Program (AEP), Princess Margaret Cancer Centre, Department of Radiation Oncology, Faculty of Medicine, University of Toronto. Toronto, Ontario, Canada. Presenter(s): **Purdie TG.** Course: Image-Guided Radiation Therapy. (Continuing Education).

2007 Jan  **Invited Lecturer.** IGRT in Lung Cancer. Accelerated Education Program (AEP), Radiation Medicine Program, Princess Margaret Cancer Centre, and Department of Radiation Oncology, Faculty of Medicine, University of Toronto. Toronto, Ontario, Canada. Presenter(s): **Purdie TG.** Course: Image-guided radiation therapy. (Continuing Education).

2006 Aug  **Invited Lecturer.** Assessing Tumour Motion using Four Dimensional Computed Tomography (4DCT) Demonstration. Accelerated Education Program (AEP), Radiation Medicine Program, Princess Margaret Cancer Centre, and Department of Radiation Oncology, Faculty of Medicine, University of Toronto. Toronto, Ontario, Canada. Presenter(s): **Purdie TG.** Course: Image-guided radiation therapy. (Continuing Education).

2006 Aug  **Invited Lecturer.** IGRT in Lung Cancer. Accelerated Education Program (AEP), Radiation Medicine Program, Princess Margaret Cancer Centre, and Department of Radiation Oncology, Faculty of Medicine, University of Toronto. Toronto, Ontario, Canada. Presenter(s): **Purdie TG.** Course: Image-guided radiation therapy. (Continuing Education).

2006 May  **Invited Lecturer.** IGRT in Lung Cancer. Accelerated Education Program (AEP), Radiation Medicine Program, Princess Margaret Cancer Centre, and Department of Radiation Oncology, Faculty of Medicine, University of Toronto. Toronto, Ontario, Canada. Presenter(s): **Purdie TG.** Course: Image-guided
radiation therapy. (Continuing Education).

2006 May

**Invited Lecturer.** Assessing Tumor Motion using Four Dimensional Computed Tomography (4DCT) Demonstration. Accelerated Education Program (AEP), Radiation Medicine Program, Princess Margaret Cancer Centre, and Department of Radiation Oncology, Faculty of Medicine, University of Toronto. Toronto, Ontario, Canada. Presenter(s): **Purdie TG.** Course: Image-guided radiation therapy. (Continuing Education).

2006 Mar

**Invited Lecturer.** IGRT in Lung Cancer. Accelerated Education Program (AEP), Radiation Medicine Program, Princess Margaret Cancer Centre, and Department of Radiation Oncology, Faculty of Medicine, University of Toronto. Toronto, Ontario, Canada. Presenter(s): **Purdie TG.** Course: Image-guided radiation therapy. (Continuing Education).

2006 Mar

**Invited Lecturer.** Assessing Tumour Motion using Four Dimensional Computed Tomography (4DCT) Demonstration. Accelerated Education Program (AEP), Radiation Medicine Program, Princess Margaret Cancer Centre, and Department of Radiation Oncology, Faculty of Medicine, University of Toronto. Toronto, Ontario, Canada. Presenter(s): **Purdie TG.** Course: Image-guided radiation therapy. (Continuing Education).

2006 Jan

**Invited Lecturer.** IGRT in Lung Cancer. Accelerated Education Program (AEP), Princess Margaret Cancer Centre, Dept. of Radiation Oncology, Faculty of Medicine, University of Toronto. Toronto, Canada. Presenter(s): **Purdie TG.** Course: Image-guided radiation therapy. (Continuing Education).

2006 Jan

**Invited Lecturer.** Assessing Tumour Motion using Four Dimensional Computed Tomography (4DCT) Demonstration. Accelerated Education Program (AEP), Radiation Medicine Program, Princess Margaret Cancer Centre, and Department of Radiation Oncology, Faculty of Medicine, University of Toronto. Toronto, Ontario, Canada. Presenter(s): **Purdie TG.** Course: Image-guided radiation therapy. (Continuing Education).

2005 Dec

**Invited Lecturer.** Cone-Beam Computed Tomography (CBCT) for Lung SBRT. Accelerated Education Program (AEP), Princess Margaret Cancer Centre, Dept. of Radiation Oncology, Faculty of Medicine, University of Toronto. Toronto, Ontario, Canada. Presenter(s): **Purdie TG.** Image-Guided Radiation Therapy Course. (Continuing Education).

2005 Dec

**Invited Lecturer.** IGRT in Lung Cancer. Accelerated Education Program (AEP), Princess Margaret Cancer Centre, Department of Radiation Oncology, Faculty of Medicine, University of Toronto. Toronto, Ontario, Canada. Presenter(s): **Purdie TG.** Image-Guided Radiation Therapy Course. (Continuing Education).

2005 Nov

**Invited Lecturer.** Image-Guided Radiation Therapy (IGRT) in Lung Cancer. Radiation Medicine Program, Princess Margaret Hospital and Department of Radiation Oncology, Faculty of Medicine, University of Toronto. Toronto, Ontario, Canada. Presenter(s): **Purdie TG.** November IGRT Course - Accelerated Education Program. (Continuing Education).

**Other Lectures and Presentations**

2010 Mar

**Speaker.** The New Cancer Therapy: The Convergence of Biology and Technology. Princess Margaret Hospital Foundation Media Partnership Breakfast, Princess Margaret Hospital. Toronto. Presenter(s): **Purdie TG.**

**H. Teaching and Design**

My teaching and education have focused predominately on continued education and clinical supervision of radiation physics residents. Over the last decade I lectured for a number of courses that comprise our Accelerated Education Program (AEP), in addition to contribute to the design of these courses.
I. Research Supervision

1. PRIMARY OR CO-SUPERVISION

Graduate Education

2014 Apr - present  Co-Supervisor. PhD. Habibkhani HK, Mechanical and Industrial Engineering. Supervisee Institution: University of Toronto. Supervisor(s): Dr. Dionne Aleman.

Postdoctoral Research Fellow (PhD)

2012 Jan - present  Primary Supervisor. Chris McIntosh. Supervisee Institution: Princess Margaret Cancer Centre.

Research Associate

Clinical Research Fellow (MD)

2013 May - 2014 Jun  Co-Supervisor. Timothy Lymberiou. Supervisor(s): Dr. Anne Koch.

Other

2010 May - 2010 Aug  
**Primary Supervisor.** Summer Student. Nick Carriere. *Quality metrics for intensity modulated radiation therapy.*

2009 May - 2010 May  
**Co-Supervisor.** Radiation Physics Resident. Daria Comsa. *Volumetric Modulated Arc Therapy (VMAT) for lung stereotactic body radiation therapy.*

2009 May - 2009 Aug  
**Primary Supervisor.** Summer Student. Nick Carriere. *Quality assurance tool for automated analysis of image quality from four-dimensional computed tomography imaging.*

2009 May - 2009 Aug  
**Primary Supervisor.** Summer Student. Allen Wang. *Analysis tool for user compliance with a thoracic nomenclature system for radiation therapy treatment planning.*

2009 Jan - 2010 Jan  
**Primary Supervisor.** Radiation Physics Resident. Andrea McNiven. *Assessment of modulation complexity in intensity modulation radiation therapy treatment plans.*

2008 Jan - 2009 Jan  
**Primary Supervisor.** Research Radiation Therapist. Mohammad Rahman. *Clinical implementation of automated treatment planning tools for tangential breast intensity modulated radiation therapy.*

2007 May - 2007 Aug  
**Primary Supervisor.** Summer Student. Christine Hill. *Retrospective evaluation of automated treatment planning tools for tangential breast intensity modulated radiation therapy.*

2007 Jan - 2008 Jan  

2006 May - 2006 Aug  
**Primary Supervisor.** Summer Student. Emilie Hustaix. *Automated treatment planning quality assurance.*

2. OTHER SUPERVISION

**Thesis Examiner**

2015 Jun  
Mahmoudzadeh H. Completed 2015.

2013 Sep  
Ghobadi K. Supervisor(s): Aleman D. Completed 2013.

2013 Aug  
Li H. Supervisor(s): Chan TCY. Completed 2013.

J. Creative Professional Activities

1. PROFESSIONAL INNOVATION AND CREATIVE EXCELLENCE

2010 - present  
Automated quality assurance and treatment planning for radiation therapy. The focus of my more recent work has been developing and clinically validating automated processes in radiation therapy. One aspect of the automation has been disseminating a comprehensive web-based application for treatment planning quality assurance. The system developed includes customized machine learning algorithms to automate many steps in the conventional quality control/quality assurance process. The system is being designed for applications in the clinical trial environment and for multi-institutional peer review and is funded by a joint NSERC/CIHR grant. An extension of the automated quality assurance work is the development of a highly general automated treatment planning methodology that represents a significant shift to the conventional radiation therapy treatment planning process. The goal of the automated planning work is to provide the radiation oncologist a treatment that can be reviewed within minutes of target delineation. There is tremendous potential to achieve clinical impact and transform the current radiation therapy process with the automated developments being undertaken. These activities have been focused on improving standardization and adding efficiencies through the use of automation and by using big data methods. In addition, the research is building a framework to facilitate translation and knowledge dissemination. In this way, we can have a greater
clinical impact and reach more patients with advanced technology to ultimately generate highly personalized cancer care.

2007 - present
Automated breast radiation therapy treatment planning. For the last eight years my creative professional activities have been related to automated processes for breast radiation therapy treatment planning. Through this work, I developed a completely automated treatment planning method for tangential breast intensity modulated radiation therapy (IMRT). The work with automation has garnered both a Princess Margaret Foundation grant, external operating Canadian breast cancer agency grants and the Inventor of the Year Award from the University Health Network (UHN). In addition, the activities have also produced technologies that have been licensed to RaySearch Laboratories AB, a medical technology company, that develops advanced software solutions for improved radiation therapy of cancer. Also based on this work, the developed automated methods have been used to investigate applications to new clinical processes. This includes applying automated approaches to robust optimization to generate cardiac sparing breast IMRT and to use in-treatment room imaging modalities such as CBCT and MR for on-line and adaptive radiation therapy treatment approaches. These activities have translated directly into the clinic and IMRT breast planning using automated tools is the standard practice for patient receiving tangential breast irradiation at our institution. The work demonstrated that automation can be applied to treatment planning for breast and improve the efficiency and quality of IMRT treatment planning without additional cost or resources. Through our licensing agreement, the automated planning software licensed will be incorporated into the RayStation treatment planning system, which integrates all RaySearch’s advanced treatment planning solutions into a flexible treatment planning system. The licensing agreement will allow the widespread dissemination of the software to benefit all breast cancer patients receiving radiation as part of their cancer management.

2005 - 2010
Clinical Implementation of stereotactic lung radiation therapy.
The initial focus of my creative professional activities focused on stereotactic lung radiation therapy. These activities included starting the lung stereotactic program at our institution by performing the technical credentialing for external review for the first formal North America study of stereotactic lung radiation therapy and implementing cone-beam computed tomography image-guidance. I was also on an international task group report and a Canadian consensus practice guidelines report on lung stereotactic radiation therapy as well. The research activities were some of first to use cone-beam computed tomography imaging for image-guidance in stereotactic lung radiation therapy which has become the standard image-guidance approach. The work highlighted the importance of target visualization and the requirement for repeat imaging during treatment.

2. EXEMPLARY PROFESSIONAL PRACTICE
2005 - present
Collaborative research and education to provide technical support to clinical programs. My clinical, academic, education and research contributions have predominately included the treatment site groups: breast, lung and upper gastro-intestinal. For each of these treatment sites my activities have included both clinical and technical development, education via teaching and continuing education and collaborative research. As the physics site lead for the breast site group and physics clinical development lead for breast, lung and upper gastro-intestinal site groups, I have been involved in the technical advancements of the sites including such technologies as volumetric modulated arc therapy (IMRT), intensity modulated radiation therapy (IMRT), cone-beam computed tomography (CBCT) image guidance, and motion management using four-dimensional computed tomography (4DCT) and active breathing control (ABC). More recently, I have been involved as a committee member in the NCIC Clinical Trials Group (CTG) Quality Assurance Division and the physics lead for the NCIC CTG sponsored
HE.1 liver clinical trial. These contributions, in addition to clinical development and multi-disciplinary research activities, further support my effective collaboration in the clinical, academic, education and research domains.
Curriculum Vitae

Ananth Ravi, Ph.D., MCCPM

A. Date Curriculum Vitae is Prepared: 2015 March

B. Biographical Information

Primary Office
Odette Cancer Centre
2075 Bayview Avenue
Toronto, ON Canada

1. EDUCATION

Degrees
2004-2009 Ph.D. Gamma-ray detector guidance of breast cancer therapy, Medical Biophysics, University of Toronto, Toronto, ON Canada Supervisor: Dr. Curtis B. Caldwell
2000-2004 B.A.Sc Honours Engineering Science, University of Toronto, Toronto, ON Canada

Postgraduate, Research and Specialty Training

2008-2010 Radiation Therapy Medical Physics Residency, Evaluation of $^{131}$Cs for permanent breast seed implantation, University of Toronto, Toronto, Ontario, Canada Supervisors: Dr. Melanie Davidson, Dr. Brian Keller
2. EMPLOYMENT

Current Appointments

2014- Present
Deputy Head of Medical Physics, Medical Physics, Odette Cancer Center, Toronto, ON, Canada
Primarily responsible for the clinical operations of the brachytherapy department, capital projects, mechanical engineering and computing services.

2010- Present
Lead Brachytherapy Medical Physicist, Medical Physics, Odette Cancer Center, Toronto, ON, Canada
Primarily responsible for research initiatives and clinical operations in the genito-urinary, gynaecological, breast and lung brachytherapy programs. Responsible for treatment planning, acquisition, quality assurance and commissioning of all treatment planning systems, treatment delivery and imaging equipment used as part of the Odette Cancer Center brachytherapy program. Successfully advocated on behalf of the centre to acquire a dedicated brachytherapy MRI simulator.

Gynecological Brachytherapy
Responsible for the commissioning and development of novel applicators. Lead physicist in an initiative to implement MRI guided gynecological brachytherapy procedures in the province of Ontario. Introduced a novel stereolithography technique as an alternative to conventional gynaecological moulds.

Genito–Urinary Brachytherapy
Developing techniques for guiding intra–prostatic boost HDR brachytherapy, by coregistering trans-rectal ultrasound images with T2-weighted MRI datasets. Developing novel methods to digitize implanted interstitial catheters efficiently and accurately.

2010- Present
Clinical Medical Physicist, Medical Physics, Odette Cancer Center, Toronto, ON, Canada
Implementation/commissioning of MODUS eQA film–less linear accelerator quality assurance program. Member of chart checking rotation, responsible for routine quality control checks on patient treatment charts for 3D conformal, IMRT and SBRT treatment plans. Member of physicist of the week rotation, responsible for troubleshooting unusual clinical situations that may arise during a week of clinical operation of the entire radiation therapy program.
Lead physicist for gynecological cancer site group, and physics member of genito-urinary and head and neck cancer site groups. Involves multidisciplinary discussion and review of patient cases, and development of new clinical protocols.
Previous Appointments

CONSULTING
2013-2014
Medical Physics Consultant, Jamaica Ministry of Health, Kingston, Jamaica
Assisted in the RFP process for creating two cancer centres and an associated
brachytherapy program. Equipment to be purchased were two linear accelerators, CT
simulator and a HDR remote afterloader.

2010-2011
Medical Physics Consultant, Alaraware, Toronto, ON, Canada
Development of a CNSC application for a novel brachytherapy system to be introduced into
Canada. Tasks included filing CNSC application, verification of radiation safety issues, and
verification of conformance with CNSC standards and requirements.

HOSPITAL
2008-2010
Radiation Therapy Medical Physics Resident, Department of Radiation Oncology,
University of Toronto, Toronto, Ontario, Canada
Acceptance and Commissioning
Participated in the acceptance and commissioning of an Elekta Synergy®
and two Elekta Synergy® S linear accelerators with 6, 10, 18 MV photons and kilovoltage
conebeam CT capabilities, predominantly to be used for intensity modulated radiation therapy
(IMRT).
Commissioned a new Pinnacle beam model for an extended SSD (105 cm) electron beam on
a Siemens Primus linear accelerator.
Instrumental in the acceptance and commissioning of a Philips big bore Brilliance CT
simulator.
Assisted in the commissioning of MRI/CT compatible gynaecological applicators. Performed
commissioning measurements to determine the deliverability of Volumetric Modulated Arc
Therapy (VMAT).
Assisted with migration away from Plato Brachy plan to Oncentra Masterplan.

Quality Assurance
Experienced in the use of all conventional quality assurance equipment, including ion
chambers, diodes and diode arrays, thermoluminescent dosimeters, and radiographic film.
Perform routine monthly quality control tests on Siemens, Elekta linear accelerators.
Have performed annual quality control, including the procedures described in TG-51 for
clinical reference dosimetry.
Performed quarterly quality assurance for an HDR afterloader after a 192Ir source change.
Primary responsibility for developing protocols to migrate film based daily and monthly quality
assurance tests to the electronic portal imaging system.

Treatment Planning and Dosimetry
Have received training in 3D conformal, IMRT, Tomotherapy, brachytherapy, and stereotactic
radiosurgery/radiotherapy. Have observed and participated in all steps of the radiation
treatment process, from simulation to final treatment delivery, which involved collaboration
with radiation therapists, dosimetrists, medical physicists, physics associates, and radiation
oncologists.
3. HONOURS AND CAREER AWARDS

Distinctions and Research Awards

INTERNATIONAL

Received
2007 IEEE Student travel award, Student Presenter, IEEE medical imaging, San Diego, California, USA, travel bursary
Presented research on a novel gamma camera system to intra-operatively localize in 3D brachytherapy seeds implanted during permanent breast seed implantation procedures.
Award Value: 2,000 USD

NATIONAL

Received
2000-2004 University of Toronto National Scholar, Undergraduate student, University of Toronto, Toronto, Ontario, Canada
Awarded to only ten students nationwide covering all undergraduate training expenses.
Award Value: 50,000 CAD

2000-2004 Department of Applied Sciences Entrance Scholarship, Undergraduate student, University of Toronto, Ontario, Canada
Awarded to the top 5% in terms of GPA of the freshmen class of 2000.
Award Value: 1,500 CAD

2000 Achievement in Vocal Carnatic Classical Music, Performer, Thamil Isai Kalaamanram, Toronto, Ontario, Canada
Stood in first place among 200 performers during musical competition.

PROVINCIAL/REGIONAL

Received
2002-2004 Harold E. Johns Summer Studentship, Toronto Sunnybrook Regional Cancer Centre, Toronto, Ontario, Canada
Awarded to students interested in pursuing clinical physics in radiation oncology.
Award Value: 9,000 CAD per summer term

LOCAL

Received
2005-2006 Medical Biophysics Research Excellence Award, University of Toronto, Toronto, Ontario, Canada
Award covering tuition expenses for the year.
Award Value: $18,000
4. PROFESSIONAL ASSOCIATIONS

2012 – Present  Member, Canadian College of Physicists in Medicine (Radiation Oncology)
2010 – Present  Member, Canadian Organisation of Medical Physicists, 52358
2010 – Present  Member, American Society of Radiation Oncology Corresponding, 35241357

5. ADMINISTRATIVE ACTIVITIES

REGIONAL & PROVINCIAL

2013- Present  MedicalPhysicist, HDR Brachytherapy Imaging Committee, Cancer Care Ontario, Decide appropriate imaging systems for brachytherapy in the province of Ontario
2011- Present  Member, Gynecology Community of Practice Group, Cancer Care Ontario Develop key goals for community based practice for gynecological radiation therapy.
2011- Present  Working Group Lead, Imaging for Cervix Brachytherapy, Gynecology Community of Practice Group, Cancer Care Ontario Develop strategies to improve access to CT/MRI imaging

LOCAL

2010 – Present  Physics Lead, Brachytherapy Steering Committee, Odette Cancer Centre Responsible for discussing monthly issues related to the delivery of brachytherapy.
2010- Present  Brachytherapy Physics Lead, Capital Equipment Replacement Committee, Odette Cancer Centre Responsible for directing the strategy of major equipment replacement for brachytherapy.
2010- Present  Brachytherapy Physics Lead, Quality Assurance Committee, Odette Cancer Centre Entire radiation therapy program wide quality assurance program.
2008-2010  Member, Department of Radiation Oncology Residency Planning Committee, University of Toronto

Peer Review Activities

GRANT REVIEWS

Reviewer
2011 - 2011  MITACS Grant review, reviewed 1 grant

PAPER REVIEWS

Reviewer
2013 - Present  Brachytherapy
2014 – Present  Medical Physics
2014 – Present  International Journal of Radiation Oncology Biology Physics
C. Academic History

1. RESEARCH STATEMENTS

2004-2008 Novel uses of gamma-ray detecting technology in the image guidance of breast cancer therapy.

2008-2010 Investigating the potential of $^{131}$Cs brachytherapy sources for permanent breast seed implantation.

2010-present Intra-operative histological margin evaluation using a novel beta particle detector Image guided brachytherapy for gynecological, genitor-urinary, and breast carcinomas

2. RESEARCH AWARDS

Grants, Contracts and Clinical Trials

PEER-REVIEWED GRANTS

Funded

2011-2013 Pilot Study of Focal Salvage HDR Prostate Brachytherapy
Sponsor: ACURA granting agency
Principal Investigator: Hans Chung
Co-Investigators: Andrew Loblaw, Gerard Morton, Masoom Haider (Diagnostic Imaging), Ananth Ravi (Physics)
Amount: 40,750 CAD

2014 - 2015 Prostate Specific Quality of Life and Health Preference Values of patients undergoing Two StereoTactic Ablative Adaptive Radiotherapy Treatments for Localized Prostate Cancer (2STAR).
Sponsor: Abbvie-ACURA.
Amount: 30,000 CAD.
Phase 2 study.

2014 - 2015 Prostate Specific Quality of Life and Health Preference Values of patients undergoing Two StereoTactic Ablative Adaptive Radiotherapy Treatments for Localized Prostate Cancer (2STAR).
Sponsor: Ride For Dad, Huronia Chapter.
Amount: 19,943.27 CAD.
Phase 2 study.

Sponsor: Abbvie-ACURA.
Amount: 15,000 CAD.
Phase 2 study.

2011-2017 Electromagnetic tracking for improving image guidance during brachytherapy
Sponsor: OCAIRO
Principal Investigator: Ravi A
Co-Investigators: Morton G, Krueker J
Amount: 140,000 CAD
Sponsor: CCO-CINO
Principal Investigator: Ravi A
Co-Investigators: Caldwell C, Reznik A
Amount: 35 000 CAD

2013-2015 Single fraction HDR prostatic boost in the context of pelvic lymph node SABR (5 fractions) for high risk prostate cancer
Sponsor: Prostate Cancer Canada
Principal Investigator: Loblaw A, Musunuru B
Amount: 159 650 CAD

NON-PEER-REVIEWED GRANTS [Presented in reverse chronological order]
Funded

2011-2017 High-Dose-Rate Prostate Brachytherapy Planning & guidance
Sponsor: Philips Industry grant. Philips Medical Systems
Principal Investigator: Ravi A
Co-Investigators: Morton G, Krueker J
Amount: 94 000 CAD

2010-2012 A novel positron detecting image guidance system for breast conserving surgery
Sponsor: TSRCC PET/CT internal grant. Odette Cancer Center
Principal Investigator: Ravi A
Co-Investigators: Caldwell C
Amount: 20 000 CAD

2015-2017 Magnetic Occult Lesion Localization
Sponsor: Sunnybrook Alternate Funding Plan
Principal Investigators: 98 000 CAD

Fall 2009 Lab Demonstrator, Radiation Biology and Radiation Protection, Michner Institute

Fall 2008 Lab Demonstrator, Foundations of Physics (1st yr. general sciences course), University of Toronto

Spring 2007 Lab Demonstrator, Foundations of Physics (1st yr. general sciences course), University of Toronto

Fall 2007 Lab Demonstrator, Foundations of Physics (1st yr. general sciences course), University of Toronto

Spring 2007 Lab Demonstrator, Physics Laboratory (2nd yr. engineering science course), University of Toronto

Fall 2006 Lab Demonstrator, Physics Laboratory (2nd yr. engineering science course), University of Toronto
J. Research Supervision

1. UNDERGRADUATE EDUCATION

2012 – present
Supervisor, John Dillon, HE Johns summer student. *Robust treatment planning algorithm that account for permanent seed misplacement in prostate LDR brachytherapy.*

2011 – 2012
Supervisor, John Dillon, HE Johns summer student. *Novel beta probe detector for image guidance of breast conserving surgery*

2010 – 2011
Supervisor, John Dillon, 4th Year undergraduate thesis. Investigating the properties of avalanche photo-diodes for detecting beta particles

2. GRADUATE EDUCATION

2014 -

2012 - 2013
Supervisor. Alexandru-Mihai Nicolae. Radiation Therapy Research Project. PTV Margin analysis for SBRT Boost for Intermediate Risk Prostate Adenocarcinoma. Mr. Nicolae has been accepted for an oral presentation at the 2013 RTi3 conference.

2010 - 2011
Supervisor. Graham Smith. Radiation Therapy Research Project. Feasibility study of using deformable registration to improve the efficiency in adaptive radiation therapy treatment planning. Mr. Smith won the award for research excellence that year the the RTi3 conference.

3. POSTGRADUATE

2011 - present
CURRICULUM VITAE

Name: Alexandra Rink

Business Address: Radiation Medicine Program
UHN – Princess Margaret Cancer Centre
610 University Ave., Rm. 5-914,
Toronto, Ontario, Canada
M5G 2M9

Business Telephone: 416-946-4501 Ext. 4924
FAX: 416-946-6566
E-mail Address: Alexandra.Rink@rmp.uhn.on.ca

Last Update: September 12, 2016

EDUCATION & TRAINING

Leadership and Management Training

05.2013 – 05.2016 Leadership Essentials Certificate, University of Toronto School of Continuing Studies, Toronto, Ontario, Canada
09.2014 – 05.2015 UHN-Rotman Leadership Development Program, University Health Network and Rotman School of Management, University of Toronto, Toronto, Ontario, Canada
09.2013 - 06.2016 UHN Lead Up Leadership Development Program, University Health Network, Toronto, Ontario, Canada

Post-Graduate Training

01.2010 – 03.2012 Clinical Physics Fellow, University of Toronto/Princess Margaret Hospital, Toronto, Ontario, Canada
01.2008 - 12.2009 Physics Residency Program (CAMPEP accredited), University of Toronto, Toronto, Ontario, Canada

Graduate Education

01.2003 - 12.2007 Ph.D., Medical Biophysics, University of Toronto, Toronto, Ontario, Canada

Undergraduate Education

09.1998 – 12.2002 Bachelor of Science, Honours, Chemical Physics, University of Guelph, Guelph, Ontario, Canada
Scholarships and Awards

2007        J.R. Cunningham Young Investigator Award (2nd place), CARO-COMP 2007
2005-2007   Terry Fox Foundation Research Studentship Award through the National Cancer Institute of Canada
2005-2006   Scace Graduate Fellowship in Prostate Cancer Research
2001-2001   NSERC Undergraduate Student Research Award
2000        NSERC Industrial Undergraduate Student Research Award
2000        Copernicus Physics Scholarship, Department of Physics, University of Guelph
1999-1999   Departmental Scholarship Summer Placement, Department of Physics, University of Guelph
1998-2002   Honours Physics Scholarship, Department of Physics, University of Guelph
1998        Silver Jubilee Award, Mon Sheong Foundation
1998        Padgett Business Services Award

BIOGRAPHICAL INFORMATION:

Certification and Licensures

08.2011     Certified by the Canadian College of Physicists in Medicine (CCPM)

Hospital Employment

04.2013 – present **Brachytherapy Lead Physicist, Radiation Physics, Princess Margaret Cancer Centre**, Toronto, Ontario, Canada
  - Supervise other Brachytherapy Physicists on day-to-day basis
  - Provide leadership in development and implementation of new techniques
  - Oversee commissioning of new applicators, treatment planning techniques, and other software as required
  - Maintain a Brachytherapy QA program by reviewing and updating protocols, as required
  - Lead selection of equipment and software for Brachytherapy
  - Support Brachytherapy operations through treatment planning and QA in HDR gynae, prostate, lung and esophagus treatments, and in permanent seed prostate treatments.
  - Act as Rotation Supervisor for Physics Residents undergoing Brachytherapy Clinical rotation
  - Participate in teaching and training Brachytherapy physics to Radiation Oncology and Physics residents during didactic sessions and practice labs
- Ensure adequate clinical support by scheduling staffing levels throughout the year.
- Chair bi-weekly Brachytherapy Operations and Brachy Physics meetings

04.2012 – 03.2013  **Radiation Physicist, Radiation Physics, Princess Margaret Hospital, Toronto, Ontario, Canada**

**Position:**
- Monitoring of assigned LINAC (Varian) performance on daily and monthly QA tests; annual QA and calibration
- Physics support for permanent seed prostate implant program, including seed calibration QA, chart checking pre- and post-implant, intra-operative planning, OR support, update of clinical protocols
- Physics support for HDR gynaecological and prostate brachytherapy, including QA of Nucletron microSelectron on daily, quarterly and annual basis, chart checking, planning (Oncentra MasterPlan), update of clinical and safety protocols
- Physics support for Team 3
- Research in the field of MR-guided HDR brachytherapy for prostate patients and MR-compatible *in vivo* real-time radiation dosimetry
- Lead on establishing HDR QA compliance program to be integrated with the external beam QA compliance program
- Lead commissioning project for HDR MRgRT

05.2003 – 12.2007  **Quality Assurance Technician, Accelerator Services, Princess Margaret Hospital, Toronto, Ontario, Canada**

- QA of Elekta and Varian LINACs (daily safety and beam QA, monthly QA)

**Academic Appointment**

09.2012 – current  **Assistant Professor, Department of Radiation Oncology, University of Toronto, Toronto, Ontario, Canada**

11.2012 – current  **Affiliated Faculty, Techna Institute for the Advancement of Technology for Health, Toronto, Ontario, Canada**

**Academic Employment**

2002  **Undergraduate Teacher’s Assistant, Physics Department, University of Guelph, Guelph, Ontario, Canada**
Other Employment

2002 **Summer Assistant**, *Chemistry Section, Centre of Forensic Sciences*, Toronto, Ontario, Canada

2001 **Assistant**, *NMR Centre, University of Guelph*, Guelph, Ontario, Canada

2001 **Research Assistant**, *Physics Department, University of Guelph*, Guelph, Ontario, Canada

2000 **Junior Analytical Technician**, *Torcan Chemical Ltd.*, Aurora, Ontario, Canada

2000 **Research Assistant**, *Sudbury Neutrino Observatory*, Sudbury, Ontario, Canada

1999 **Student Services Assistant**, *Physics Department, University of Guelph*, Guelph, Ontario, Canada

1999 **Research Assistant**, *Physics Department, University of Guelph*, Guelph, Ontario, Canada

1997-1999 **Telephone Interviewer**, *Canadian View Point*, Richmond Hill, Ontario, Canada

Professional Affiliations

2015-present American Brachytherapy Society

2004-present Canadian Organization of Medical Physicists

2003-present American Association of Physicists in Medicine

Commercialization Activities

Patents

2014 Co-Inventor - *Fiber Optic Radiochromic Dosimeter Probe And Method To Make The Same*, Canadian Patent 2,803,827 (granted April 8, 2014)

2011 Co-Inventor - *Fiber Optic Radiochromic Dosimeter Probe And Method To Make The Same*, PCT application, PCT/IB2011/053006 (filed 07.06.2011)

Peer-Review Responsibilities

2009-present Medical Physics
2008-present Australasian Physical & Engineering Sciences in Medicine
2008-present Journal of Applied Clinical Medical Physics
2006-present Physics in Medicine and Biology
2006-present Applied Radiation and Isotopes

Non Peer-Reviewed Publications

PRESENTATIONS

Invited Presentations

2016  A. Rink: In-Room Image Based Verification Using Fluoroscopy, World Congress of Brachytherapy, San Francisco, USA

2014  A. Rink: Development of Real-Time in vivo Dosimeters Using Radiochromic Material and Optical Fibers, GEC-ESTRO Seminar on Online Treatment Verification for Brachytherapy, Brussels, Belgium

2006  A. Rink: Developments in Optical Ionizing Radiation Dosimetry in Radiotherapy, All Indian Institute of Medical Sciences, New Delhi, India

Proffered Presentations

2016  A. Rink, et al., Intra-Fraction Volumetric Changes and Dosimetric Impact in MR-Guided Prostate HDR Brachytherapy, World Congress of Brachytherapy, San Francisco, USA (poster)

2016  A. Rink, et al., Intra-Fraction Volumetric Changes and Dosimetric Impact in MR-Guided Prostate HDR Brachytherapy, 4th MR in Radiotherapy Symposium, Ann Arbor, USA (oral presentation)

2015  A. Rink, A. Croteau, S. Caron, O. Mermut, D.A. Jaffray: Real-Time In Vivo Dosimeters Using LiPCDA and Optical Fibers, Annual Meeting of the American Association of Physicists in Medicine, Anaheim, USA (poster)

2012  S. Caron, A. Croteau, A. Rink, D. Jaffray, O. Mermut: Selecting the Appropriate Splitter for a Reflective Optical Fiber Dosimeter Probe, Photonics North 2012, Montreal, Canada (oral presentation)

of Photo-Optical Instrumentation Engineers, European Conferences on Biomedical Optics, Munich, Germany (oral presentation)

2010  A. Croteau, S. Caron, F. Roy-Moisson, **A. Rink**, D. Jaffray, O. Mermut: Real-Time Optical Fiber Dosimeter Probe, Biophotonics Week meeting, Quebec, QC (oral presentation)

2009  **A. Rink**, M. Ruschin, D.A. Jaffray, P.E. Lindsay: Investigation of Discrepancy in Reports on GafChromic EBT Energy Dependence, American Association of Physicists in Medicine, Anaheim, CA, USA (moderated poster)

2007  **A. Rink**, A. Vitkin, D. Jaffray: A mathematical model of radiochromic film response to ionizing radiation, Canadian Association of Radiation Oncology and Canadian Organization of Medical Physicists Annual Scientific Meeting, Toronto, Canada (Young Investigators Symposium, J.R. Cunningham Young Investigator Award, 2nd place)
2007  **A. Rink, A. Vitkin, D. Jaffray:** Mathematical model of radiochromic film response to ionizing radiation, European Society on Therapeutic Radiology and Oncology 9th Biennial Meeting on Physics and Radiation Technology for Clinical Radiotherapy, Barcelona, Spain, (oral presentation)

2007  **A. Rink, A. Vitkin, D. Jaffray:** Real-Time Point-Based *in vivo* Dosimetry Using Radiochromic Materials and Remote Optical Fiber System, American Association of Physicists in Medicine Annual Meeting, Minneapolis, MN, USA (poster)

2006  **A. Rink, A. Vitkin, D. Jaffray:** Comparison of Change in Optical Density Between Three Radiochromic Films Due to 100 CGy Dose-To-Water Delivered by X-Rays in the 75 KVp to 18 MV Range, American Association of Physicists in Medicine Annual Meeting, Orlando, FL, USA (poster)

2006  **A. Rink, A. Vitkin, D. Jaffray:** Characterization and Real-Time Measurements of Optical Density with GafChromic EBT film, American Association of Physicists in Medicine Annual Meeting, Orlando, FL, USA (poster)

2006  **A. Rink, A. Vitkin, D. Jaffray:** Characterization and Real-Time Measurements of Optical Density with GafChromic EBT film, Canadian Organization of Medical Physicists Annual Scientific Meeting, Saskatoon, Canada (poster)

2004  **A. Rink, A. Vitkin, D. Jaffray:** Fast Kinetics Change of Radiochromic Film in Point-Based Ionizing Radiation Dosimetry System, American Association of Physicists in Medicine Annual Meeting, Pittsburgh, USA (oral presentation)
TEACHING DOSSIER:

Undergraduate Courses Taught (as TA)

2002
- PHYS1020: Introductory Physics
- PHYS1070: Introductory Physics for the Life Sciences I
- PHYS1080: Physics for the Life Sciences II
- PHYS1130: Physics with Applications I

Department of Physics, University of Guelph, Guelph, ON
Total hours of teaching: 140

Graduate and Post-Graduate Lectures

2016
- Brachytherapy Planning Lab (3-hour hands on training course)
2013
- Brachytherapy Introduction (two 3-hour didactic courses)
2013
- Brachytherapy Planning Lab (two 3-hour hands on training courses)
2013
- Dosimetry and QA in Brachytherapy (3-hour didactic course)
2012
- Intro to Physics Part 1 and 2 (6 hours didactic course)
2008-2009
- Physics Residency Tutorial lectures (alternating with other residents, 12 sessions)
2009
- Excellence in Radiation Research for the 21st Century (EIRR21) Lecture on Role of Medical Physicists (one session)
2009
- PGY1 Radiation Physics for Radiation Oncologists (3 review sessions)

Research Supervision

2013
- University of Waterloo Co-op student (project involved dynamic range extension for LiPCDA optical dosimetry probes)
2008
- Summer student (co-supervision on a project involving Optimization of a Computation Algorithm Predicting Response of Radiographic Material to Ionizing Radiation in Real-Time)

Physics Residency Clinical Rotation Supervision

2013-2016
- Six (6) physics residents, each at 12 week rotation

1. EDUCATION

Degrees

2006 PhD, Medical Radiation Physics, Lunds Universitet, Sweden
2002 MSc, Medical Biophysics, University of Toronto
1998 BSc, Medical and Health Physics, McMaster University

Postgraduate, Research and Specialty Training

2009 - 2010 Residency, Medical Physics, Princess Margaret Hospital, Toronto, Canada

Qualifications, Certifications and Licenses

2011 Aug - present Member of Canadian College of Physicists in Medicine (MCCPM), Canadian College of Physicists in Medicine, Canada

2. EMPLOYMENT

Current Appointments

2012 - present Medical Physicist, Department of Medical Physics, Odette Cancer Centre, Toronto, Ontario
2011 - present Assistant Professor, Radiation Oncology, University of Toronto, Toronto, Ontario

Previous Appointments

CLINICAL
2010 - 2012 Medical Physicist, Radiation Medicine Program, Princess Margaret Hospital, Toronto, Ontario, Canada
3. PROFESSIONAL AFFILIATIONS AND ACTIVITIES

Administrative Activities

LOCAL

University of Toronto

2012 May 1 - 2013 May 1  Council Member, DRO Executive Committee, Faculty of Medicine, Dept of Radiation Oncology, Ontario, Canada.

Peer Review Activities

MANUSCRIPT REVIEWS

Reviewer

2007 - present  International Journal of Radiation Oncology Biology Physics
2003 - present  Medical Physics

C. Academic Profile

1. RESEARCH STATEMENTS

2012 Jan 30 - present  Treatment of brain metastases. This research involves implementation of effective methods for delivering fractionated radiosurgery for brain metastases using techniques such as VMAT and Perfexion.

2012 Jan 30 - present  Development of dual-energy imaging for online image-guided radiotherapy.

2012 Jan 30 - present  Radiation oncology database development. This area involves developing tools for tracking patient outcomes as well as the complete patient treatment plan in a consolidated and easily accessible database. Applications for this database include, but are not limited to, clinical trials, process monitoring/improvement, and automated quality assurance.

2007 Sep 1 - 2012 Jan 30  Fractionate Gamma Knife Perfexion Program. Development and implementation of fractionated radiotherapy on gamma knife Perfexion. This involved designing protocols and clinical workflows, as well as quantifying geometric setup accuracy and dose delivery performance.

D. Research Funding

EDUCATION and APPOINTMENTS

PRESENT APPOINTMENTS:
Assistant Professor, Department of Radiation Oncology, Faculty of Medicine, University of Toronto, Toronto, Ontario
Adjunct Professor, Department of Oncology, Faculty of Medicine, McGill University, Montreal, Quebec
Adjunct Professor, Department of Physics, Faculty of Science, Ryerson University, Toronto, Ontario
Medical Physicist, Sunnybrook Health Sciences Centre, Toronto, Ontario
Affiliate Scientist, Sunnybrook Research Institute, Toronto, Ontario
Associate Member, Medical Physics Unit, McGill University, Montreal, Quebec

Professional Membership:
Member, Canadian College of Physicists in Medicine (CCPM)
Member, Canadian Organization of Medical Physicists (COMP)
Member, American Association of Physicists in Medicine (AAPM)
Member, Ontario Association of Medical Physicists (OAMP)
(Old) Member, L’Association Québécoise des Physicien(ne)s médicaux du Cliniques (AQPMC)

Updated June 2016
Previous Appointments

Adjunct Professor, Jan 2014-Jun 2017
Department of Physics, Faculty of Science, Ryerson University, Toronto, Ontario

Adjunct Professor, Oct 2013-Oct 2016
Department of Oncology, Faculty of Medicine, McGill University, Montreal, Quebec

Assistant Professor, Sep 2012-Sep 2013*
Department of Oncology, Faculty of Medicine, McGill University, Montreal, Quebec

Medical Physicist, Sep 2012-Aug 2013*
McGill University Health Centre (MUHC), Montreal, Quebec

Faculty Lecturer, Sep 2012-Sep 2013*
Medical Physics Unit, McGill University, Montreal, Quebec

Member, Sep 2012-Aug 2013*
Medical Physics Unit, McGill University, Montreal, Quebec

*Resigned from position due to departure.
HONOURS, AWARDS, and GRANTS

2016
Med Phys Impact Paper
On water calorimetry article

McGill Dobson Cup
Awarded to best startup $15000 05/2016

2015
NSERC ENGAGE Grant $25000 12/2015
Matched funding from Synaptive Medical $14682 12/2015

H.E. Johns CCPM Travel Award $2250 05/2015

J. R. Cunningham Young Investigator 3rd place 06/2015
(By my MSc Student, James Renaud)
IUPESM World Congress, International Organization for Medical Physics (IOMP)

2014
Sylvia Fedoruk Prize 07/2014
Best Paper of the year on a subject falling within the field of medical physics.
Awarded to “Development of a graphite probe calorimeter for absolute clinical dosimetry”

Reginald Fessenden Prize in Science Innovation, McGill ($3500) 08/2014
(By my MSc Student, James Renaud)

H.E. Johns Student Award Support Fund $8150 04/2014
Funding to employ an Undergrad Student for Summer Research

R&D grant, Sun Nuclear Corporation $46000 04/2014
(for work in Graphite Probe Calorimeter, over 2 years)

2013
NSERC Discovery Grant $160000 04/2013
Research Grant (over 5 years)

2012
Student Travel Award  ($1000)  09/2012
(By my MSc Student, James Renaud)
Council on Ionizing Radiation Measurements and Standards (CIRMS)

J. R. Cunningham Young Investigator 3rd place  ($200)  07/2012
(By my MSc Student, James Renaud)
Canadian Organization of Medical Physicists (COMP)

MedTech Challenge, Finalist  ($1000)  07/2012
(By my MSc Student, James Renaud)

2010
COMP Best Poster Presentation Award 1st place  $300  06/2010
Canadian Organization of Medical Physicists (COMP)

2009
COMP Oral Presentation Award  Nominated
Canadian Organization of Medical Physicists (COMP)

2008
Canadian Institutes of Health Research
Doctoral Research Award (over 3 years)  $66000  05/2008

COMP Oral Presentation Award  $200  06/2008
Canadian Organization of Medical Physicists (COMP)

2007
ACMP Young Investigator Award, 1st place  $250 (US)  05/2007
American College of Medical Physicists

Graduate Student Accomplishment Award  $1000 (US)  05/2007
American College of Medical Physicists

MUHC Research Institute Student Award  $7500  09/2007
McGill University Health Centre

Figure from article selected for front cover image of Medical Physics  N/A  09/2007

Student Travel Award  $1000 (US)  05/2007
Council on Ionizing Radiation Measurements and Standards (CIRMS)

2006

Updated June 2016
J. R. Cunningham Young Investigator Award, 1st place  
Canadian Organization of Medical Physicists  $500  06/2006

J. R. Cameron Young Investigator Award, 1st place  
American Association of Physicists in Medicine  $300 (US)  08/2006

AAPM Travel Grant  
American Association of Physicists in Medicine  $250 (US)  06/2006

Alma Mater Student Travel Grant  
McGill University  $750  06/2006

**Prior to 2005**

Dean’s Honour List  
University of British Columbia  2000-04

Major Entrance Scholarship  
University of British Columbia  $20000  09/2000

Bronze Academic Medal Of Excellence  
Governor General of Canada, Canadian Honour (www.gg.ca)  05/2000
Patents

US 14/403,416, “Method And System For Calorimetry And Clinical Dosimetry”

CA 2,913,350, “Method and System for Calorimetry Probe”

EP 13796823.6, “Method And System For Calorimetry And Clinical Dosimetry”
PEER-REVIEWED PUBLICATIONS

2016

M. R. Paudel, A. Kim, A. Sarfehnia, S. Ahmad, D. J. Beachey, A. Sahgal, B. Keller, *Experimental evaluation of a commercial GPU-based Monte Carlo dose calculation algorithm in Monaco TPS* (Accepted with Revisions Required)

G. Aldosary, H. Safigholi, W. Song, J. Seuntjens, A. Sarfehnia, *Influence of ionization chamber wall material on polarity correction and collection efficiency in continuous and pulsed beams*, physica medica (Under review )

2015

2014

2013

2011

A. Alexander, E. Soisson, T. Hijal, A. Sarfehnia, J. Seuntjens, *Comparison of modulated electron radiotherapy to conventional electron boost irradiation and volumetric modulated photon arc therapy for treatment of tumour bed boost in breast cancer*, Radiother Oncol, 100 (2), 253-258

2010

2007

OTHER SCIENTIFIC PUBLICATIONS / BOOKS

2016
“Precision Radiation Oncology” by Rutgers University Press, Edited by Sharad Goyal, MD
Chapter XX: Current State of the Art in Intra-cranian Stereotactic Radiosurgery Technology: Accuracy, Precision, and Clinical Impact by M. Ruschin, A. Sahgal, A. Sarfehnia, etc.

POSTER PRESENTATIONS

2016
AAPM (American Association of Physicists in Medicine):

H. Nusrat, G. Pang, A. Sarfehnia, *Evaluation of plastic scintillator light output for various lead doping concentrations: Towards LET detection*

M. Wronski, S. Ahmad, A. Sarfehnia, A. Sahgal, B. Keller, *Dosimetric Effects of Irradiation Through a Bilateral Hip Prosthesis in a MRI Linac*

CRPA (Canadian Radiation Protection Association)

H. Nusrat, A. Sarfehnia, *Varying the stopping power dependence on plastic scintillator response via mechanical doping*

ASTRO

Ruschin, *A universal predictive model for dose fall-off in MLC-based stereotactic brain radiosurgery*

2015

AAPM

A Fatemi-Ardekani, M Wronski, A Kim, G Stanisz, A Sarfehnia, B Keller, *Geometric Distortion at 3T in a Commercial 4D MRI-Compatible Phantom*

H Nusrat, G Pang, S Ahmad, B Keller, A Sarfehnia *Using Light Output From Doped Plastic Scintillators to Resolve the Linear Energy Transfer Spectrum of Clinical Electron Beams*

H Nusrat, G Pang, P Au, A Sarfehnia *Towards the Mechanical Doping of Plastic Scintillators*

N Entezari, J Renaud, D Ly, A Sarfehnia *Design of a Water Calorimeter for Dual Use in An Integrated MRI-Linac and Gamma-Knife*

M. Paudel, A. Kim, D. Beachey, S. Ahmad, A. Sarfehnia, A. Sahgal, B. Keller *Experimental Evaluation of a Commercial GPU-Based Monte Carlo Dose Calculation Algorithm*

S Ahmad, A Sarfehnia, M Paudel, A Sahgal, S Hissoiny, B Keller *07/2014*
Comparison of a Commercial MRI-Linear Accelerator Based Monte Carlo Dose Calculation Algorithm and Geant4

2014

PTCOG 06/2014
Shanghai, China
First direct comparison between a graphite calorimeter and a water calorimeter in a 60 MeV proton beam

AAPM 07/2014
Austin, TX
Determination of kQ,Q0-factors from water and graphite calorimetry in a 60 MeV proton beam

ESTRO 04/2014
Vienna, Austria
J Renaud, A Sarfehnia, K Marchant, M McEwen, C Ross, J Seuntjens,
Experimental determination of megavoltage electron beam k’R50 factors using water calorimetry

COMP 07/2014
Banff, Alberta
J Renaud, S Rossomme, A Sarfehnia, S. Vynckier, J Seuntjens,
A water calorimeter for low-energy carbon ions and other short-range aprticle beams

CIRMS 03/2014
Gaithersburg, MD
Development of calorimeters for primary dosimetry in hadron-therapy

2013

COMP/CARO 09/2013
Montreal, Quebec
G. Aldosary, J. Seuntjens, A. Sarfehnia
Effect of ionization chamber wall material on collection efficiency and polarity effect in pulsed beams

AAPM
Indianapolis, Indiana
G. Aldosary, J. Seuntjens, A. Sarfehnia
Change of Ionization Chamber Correction Factors (Ppol, Pion, Kwall) With Walls of Different Materials in Continuous and Pulsed Beams

AAPM
Indianapolis, Indiana
G. Aldosary, J. Seuntjens, A. Sarfehnia
Influence of chamber wall material on ionization chamber absorbed dose energy response: a numerical and experimental study

AAPM
Indianapolis, Indiana
G. Twork, A. Sarfehnia
Evaluation of the dose-rate dependency of GAFCHROMIC® EBT3

2012

CIRMS
Gaithersburg, MD
J. Renaud, D. Marchington, J. Seuntjens, A. Sarfehnia,
Developing a Graphite Probe Calorimeter for Accurate Clinical Dosimetry, 21st Annual CIRMS Meeting

Canadian Organization of Medical Physicists (COMP)
Halifax, Nova Scotia
M. Serban, R. Ruo, A. Sarfehnia, W. Parker, M. Evans
Commissioning of the Varian ECLIPSE eMC algorithm for clinical electron treatment planning

2011

International Workshop on Recent Advances in Monte Carlo
Techniques for Radiation Therapy
Montreal, Quebec
A. Alexander, E. Soisson, T. Hijal, A. Sarfehnia, J. Seuntjens
Plan comparison of modulated electron radiotherapy to conventional electron boost irradiation and volumetric modulated photon arc therapy for treatment of tumour bed boost in breast cancer
Canadian Association of Radiation Oncologists (CARO) 09/2011
Winnipeg, Manitoba
M. Azoulay, A. Sarfehnia, C. Maietta, C. Lambert, N. Kopec, M. David, T. Hijal
The accuracy of ultrasound compared to computed tomography in the planning of the tumor bed boost in breast cancer

European CanCer Organization Annual Meeting (ECCO) 09/2011
Stockholm, Sweden
M. Azoulay, A. Sarfehnia, C. Maietta, C. Lambert, N. Kopec, M. David, T. Hijal
The accuracy of ultrasound in planning of the tumour bed boost in breast cancer (2nd author)

Joint Meeting American Association of Physicists in Medicine (AAPM) and Canadian Organization of Medical Physicists (COMP) 08/2011
Vancouver, British Columbia
A. Alexander, E. Soisson, A. Sarfehnia, T. Hijal, F. Deblois, J. Seuntjens
The Development of Intensity and Energy Modulated Electron Radiotherapy; An Alternative to Photon Volumetric Modulated Arc Therapy

Joint Meeting American Association of Physicists in Medicine (AAPM) and Canadian Organization of Medical Physicists (COMP) 08/2011
Vancouver, British Columbia
S. Aldelaijan, H. Mohammed, N. Tomic, L-H Liang, F. Deblois, A. Sarfehnia, W. Abdel-Rahaman, J. Seuntjens, S. Devic
Radiochromic Film Based Dosimetry System for Ir-192 Brachytherapy Sources

Association of Radiation Oncologists (CARO) 08/2011
Vancouver, British Columbia
S. Aldelaijan, H. Mohammed, N. Tomic, L-H Liang, F. Deblois, A. Sarfehnia, W. Abdel-Rahaman, J. Seuntjens, S. Devic
Radiochromic Film Based Dosimetry System for Ir-192 Brachytherapy Sources (6th author)

Canadian Organization of Medical Physicists (COMP) 06/2010
Ottawa, Ontario
A. Sarfehnia, and J. Seuntjens
A novel water calorimetry-based dosimetry standard for direct measurement of absolute absorbed dose in scanning proton beam delivery.

Updated June 2016
American Association of Physicists in Medicine (AAPM) 07/2010
Philadelphia, Pennsylvania
A. Sarfehnia, I. Kawrakow, J. Seuntjens
Evaluating AAPM TG-43 in-water HDR 192Ir brachytherapy reference dosimetry: A comparison study. {Moderated Poster}

American Association of Physicists in Medicine (AAPM) 07/2010
Philadelphia, Pennsylvania
Direct measurement of absolute absorbed dose in scanning proton beams based on water calorimetry. {Moderated Poster}

Canadian Association of Radiation Oncologists (CARO) 09/2010
Vancouver, British Columbia
A. Dal Pra, A. Sarfehnia, H. Patrocinio, F. Cury
Inter-observer variability using ultrasound-based image guidance of the prostate.

2007

Gaithersburg, Maryland
A. Sarfehnia, K. Stewart, J. Seuntjens
Numerical and Experimental Feasibility Study of ¹⁹²Ir HDR Brachytherapy Water Calorimetry.

2005

American Association of Physicists in Medicine (AAPM) 08/2006
Seattle, Washington
K. Jabbari, A. Sarfehnia, E. Podgorsak, J. Seuntjens
Feasibility study of orthogonal bremsstrahlung beam for improved radiation therapy imaging.

Updated June 2016
ORAL PRESENTATIONS (First Author)
(* indicates invited presentation)

2015

AAPM SAM SESSIONS *
Anaheim, California
“Absorbed dose standards for brachytherapy” sub-session under SAM session entitled: “Reference Dosimetry for Beam Modalities Other Than MV Photons”

MUHC Weekly Seminar *
McGill University Health Center, Montreal, Quebec
Dosimetry in MRI-Linac

2014

Elekta MRL User Meeting *
Utrecht Medical Sciences Centre, Utrecht, Netherlands
Criteria for Accurate Matching of Linear Accelerators

Elekta MRL User Meeting *
Utrecht Medical Sciences Centre, Utrecht, Netherlands
A Novel Small-Size Clinical Dose Meter

2013

Sunnybrook Physics Seminar
Sunnybrook Health Sciences Centre, Toronto, Ontario
Innovations in Calorimetry at McGill: Towards a clinical dose detector

2011

MUHC Radiation Oncology Therapist Seminar Series*
McGill University Health Center, Montreal, Quebec
Heterotopic Bone Formation: Evolution of treatment technique and verification at McGill.

American Association of Physicists in Medicine (AAPM)
And Canadian Organization of Medical Physicists (COMP)
Vancouver, British Columbia, Canada
Monte Carlo Optimized Composition and Structure of a Novel Energy-Independent Radiochromic Film

International Workshop on Recent Advances in Monte Carlo
Techniques for Radiation Therapy
Montreal, Quebec
*Monte Carlo optimized absorbed dose energy response of a novel energy-independent radiochromic film*

McGill University Outreach Lecture*
Redpath Museum, Montreal, Quebec
*Radiation as a weapon of mass benefaction*

McGill University Health Centers Friday Morning Seminars
Montreal, Quebec
*A decade worth of water calorimetry measurements at McGill.*

2010

Applications and Quality Assurance in Medical Radiation Dosimetry (IDOS)
Vienna, Austria
*Primary water calorimetry for clinical electron beams, scanned proton beams, and $^{192}\text{Ir}$ brachytherapy*

2009

Association québécoise des physician(ne)s médicaux cliniques (AQPMC)
Québec City, Quebec
*A robust water calorimeter-based technique to determine absorbed dose from high dose rate brachytherapy sources.*

Canadian Organization of Medical Physicists (COMP)
Victoria, British Columbia
*Realizing absorbed dose directly for HDR $^{192}\text{Ir}$ brachytherapy: Water Calorimetry and comparison to ion chamber, Gafchromic film, and TG-43*

American Association of Physicists in Medicine (AAPM)
Anaheim, California
*Towards an absorbed dose-based calibration for Ir-$^{192}$ brachytherapy dosimetry--development of a primary standard water calorimeter.*
Particle Therapy Co-Operative Group (PTCOG)  
48th Annual Meeting  
(presented by Ben Clasie)  
Heidelberg, Germany  
*Towards a water calorimetry-based standard for active scanning proton dosimetry*

McGill University Health Centers Friday Noon Seminars  
Montreal, Quebec  
*Water calorimetry-based radiation dosimetry in HDR $^{192}$Ir brachytherapy and proton therapy*

2008

McGill Radiation Oncology Annual Retreat*  
Montreal, Quebec  
*A Novel Absorbed Dose to Water Standard for HDR Ir-192 Brachytherapy.*

Canadian Organization of Medical Physicists (COMP)  
54th Annual Meeting,  
Quebec City, Quebec  
*A Novel HDR Ir-192 Brachytherapy Water Calorimeter Standard.*

American Association of Physicists in Medicine (AAPM)  
50th Annual Meeting  
Houston, Texas  
*Development of a Novel Absorbed Dose to Water Calorimeter-Based Standard for HDR Ir-192 Brachytherapy.*

McGill University Friday Morning Series  
34th Annual Series  
Montreal, Quebec  
*Realizing absorbed dose directly for high dose-rate brachytherapy: design and testing of a high-accuracy water calorimeter*

University of Wisconsin *  
(presented by Jan Seuntjens)  
Madison, Wisconsin  
*Novel Absolute Dosimetry Techniques for Accurate Absorbed Dose to Water Determination in $^{192}$Ir HDR Brachytherapy.*
2007

Journée scientifique de Association Québécoise des Physicien(ne)s Médicaux Cliniques Montreal, Quebec
Use of orthogonal bremsstrahlung beams from low atomic number targets for imaging in radiotherapy.

American College of Medical Physicists (ACMP) MAY 28, 2007
24th Annual Meeting, ACMP Young Investigator Symposium Baltimore, Maryland
High Contrast Imaging With Orthogonal Bremsstrahlung Beams: A Novel Technique

American Association of Physicists in Medicine (AAPM) JUL 26, 2007
49th Annual Meeting Minneapolis, Minnesota
Numerical feasibility study of a novel absorbed dose to water calorimeter-based standard for Ir-192 HDR brachytherapy.

McGill University Friday Morning Series SEP 21, 2007
33rd Annual Series Montreal Quebec
Novel Absolute Dosimetry Techniques for Accurate Absorbed Dose to Water Determination in 192Ir HDR Brachytherapy.

Council on Ionizing Radiation Measurements and Standards (CIRMS) OCT 22, 2007
16th Annual Meeting Gaithersburg, Maryland
Numerical and Experimental Feasibility Study of 192Ir HDR Brachytherapy Water Calorimetry.

BC Cancer Agency* DEC 14, 2007
Vancouver, British Columbia
Water calorimetry-based absorbed dose to water standard for 192Ir HDR brachytherapy: Numerical and experimental feasibility study.

BC Cancer Agency* DEC 14, 2007
Vancouver, British Columbia

*High contrast imaging with orthogonal bremsstrahlung beams: A novel technique.*

**2006**

McGill University Friday Morning Series  
32\textsuperscript{nd} Annual Series  
Montreal, Quebec  
*Novel Techniques of High Contrast Imaging in Radiation Therapy*

Canadian Organization of Medical Physicists (COMP)  
52\textsuperscript{nd} Annual Meeting, J. R. Cunningham Young Investigator Symposium  
Saskatoon, Saskatchewan  
*Radiation quality in high contrast imaging with orthogonal bremsstrahlung beams*

American Association of Physicists in Medicine (AAPM)  
48\textsuperscript{th} Annual Meeting, J. R. Cameron Young Investigator Symposium  
Orlando, Florida  
*High Contrast Imaging Using Orthogonal Bremsstrahlung Beams: An Experimental Study of Radiation Quality,*

**2004**

University of British Columbia  
Physics and Astronomy Seminars  
Vancouver, British Columbia  
*Applications of intensity modulated radiation therapy and a critical study of the Victoria phantom.*

Updated June 2016
ORAL PRESENTATIONS (By Students)

McGill
Waterloo
Ryerson
University of Toronto
TEACHING EXPERIENCE

Ryerson Medical Physics
  • Instructor: Radiation Therapy (BP8104), Graduate course 2013-present
    o Instructor for Part I of the course + Lab Coordinator/Instructor
  • Instructor: Radiation Therapy (PCS407), 1 lecture 2013-present

McGill Medical Physics Unit Teaching Activities:
  • Instructor: Applied Dosimetry (MDPH 602) 2012
  • Instructor and Coordinator: Lab. in Radiation Physics (MDPH 603) 2012
  • Teaching Assistant: Lab. in Radiation Physics (MDPH 603) 2010-2012
    o TG-51 reference dosimetry; IMRT planning; 3D Planning; Machine QA; Small field dosimetry
  • Teaching Assistant: Lab. in Diag. Radiol. & Nuc. Med. (MDPH 608) 2007-2010
    o CT laboratory

McGill Radiation Oncology, Radiology, & Dawson Radiation Therapy Teaching Activities:
  • Instructor: Dawson Dosimetry I (142-BWF-03) 2012
  • Instructor: Radiology Resident (Physics of x-ray generation, 2 lectures) 08/2010

McGill Education Department, Integrated Sciences Division 09/2007-12/2007
  • Instructor and Coordinator: Lab. in General Sciences (EDE 270)

Curriculum Vitae

Michael Bryan Sharpe
PhD, DABMP

A. Date Curriculum Vitae is Prepared: 2016 August 26

B. Biographical Information

Primary Office: Radiation Medicine Program
UHN-Princess Margaret Cancer Centre
610 University Avenue, Rm 5-962
Toronto, Ontario, Canada
MSG 2M9

Telephone: 416 946 4501 Ext. 5025
Fax: 416 946 6566
Email: michael.sharpe@rmp.unh.on.ca

1. EDUCATION

Degrees
1997 PhD, Medical Biophysics, Western University, London, Ontario, Canada
1987 BSc, Physics, Western University, London, Ontario, Canada

Qualifications, Certifications and Licenses
2000 Certification, American Board of Medical Physics (ABMP)

2. EMPLOYMENT

Current Appointments
2010 - present Radiation Physics Quality Lead, Radiation Treatment Program, Cancer Care Ontario, Ontario, Canada
2010 - present Associate Professor, Mechanical and Industrial Eng. University of Toronto, Toronto, Ontario, Canada
2009 - present Associate Professor, Radiation Oncology, University of Toronto, Toronto, Ontario, Canada
2007 - present Associate Head of Radiation Physics, Princess Margaret Hospital, Toronto, Ontario, Canada
2007 - present Associate Professor (Adjunct), School of Computational Engineering and Science, McMaster University, Toronto, Ontario, Canada

Previous Appointments
HOSPITAL
2002 - 2007 Senior Physicist, Princess Margaret Hospital, Toronto, Ontario, Canada
3. HONOURS AND CAREER AWARDS

Distinctions and Research Awards

INTERNATIONAL

Received

2013 Jul

The Editor in Chief Award of Excellence, AAPM, Journal of Applied Clinical Medical Physics. (Distinction)
For Outstanding General Medical Physics Article in 2012.

2005

Top Scientific Abstracts, American Society for Therapeutic Radiology and Oncology.
(Distinction)
Plenary Presentation.

1994

Helax Award. (Distinction)

NATIONAL

Received

2005

Basic Science Travel Grant, American Society for Therapeutic Radiology and Oncology.
(Research Award)
Senior Investigator, 47th Annual Meeting, October 16-20th, 2005.

2003

Helax Award, Canadian Association of Radiation Oncologists. (Distinction)

PROVINCIAL / REGIONAL

Received

2007

Innovation Team Award, Canadian Cancer Society, Cancer Care Ontario, and Cancer Quality Council of Ontario. (Distinction)
Award Co-recipient - Cancer Care Ontario and Cancer Quality Council of Ontario, in partnership with the Canadian Cancer Society: Quality and Innovation Awards, recognizing Web Publishing’s innovative electronic management of the review and approval process for Radiation Therapy Treatment Planning.

1986

The Harold E. Johns Summer Scholarship. (Distinction, Specialty: Medical Physics)
LOCAL
Received
2009 Inventor of the Year, University Health Network. (Distinction)
2008 Best Rounds - Chief's Choice, Radiation Medicine Program, Princess Margaret Hospital. (Distinction)
2005 Best Rounds - Chief's Choice, Radiation Medicine Program, Princess Margaret Hospital. (Distinction)
1992 - 1994 Graduate Scholarship, Western University. (Distinction)
1989 Strik-Couprie Inch prize. (Distinction, Specialty: Radiobiology)

Teaching and Education Awards

NATIONAL
Received
2004 Teaching Recognition Award, Radiation Medicine Program, Princess Margaret Hospital, Dept of Radiation Oncology, Faculty of Medicine, Canadian Association of Radiation Oncologists

LOCAL
Received
2011 Teaching Recognition Award, Dept of Radiation Oncology, Faculty of Medicine, Radiation Medicine Program, Princess Margaret Hospital
Distinguished Service in Continuing Education (IMRT).
2011 Teaching Recognition Award, Dept of Radiation Oncology, Faculty of Medicine, Radiation Medicine Program, Princess Margaret Hospital
Highest Teaching Effectiveness Score in Continuing Education (honorable mention).

4. PROFESSIONAL AFFILIATIONS AND ACTIVITIES

Professional Associations

2010 Member, American Society for Quality
2005 Member, American Society for Therapeutic Radiology and Oncology
2005 Member, Canadian Association of Radiation Oncology
1990 Member, Canadian Organization of Medical Physicists
1989 Member, American Association of Physicists in Medicine

Administrative Activities

INTERNATIONAL
15th International Conference on the use of Computers in Radiotherapy
Michael Bryan SHARPE

2010 Abstract Reviewer, Amsterdam, Netherlands.

15th International Meeting on the Use of Computers in Radiation Therapy
2007 Scientific Co-Chair, Organizing Committee

American Association of Physicists in Medicine
1998 - present Abstract Reviewer
2005 - 2009 Member, Imaging for Treatment Verification Work Group
2005 Reviewer and Judge, Young Investigator’s Symposium Annual Meeting
2003 Reviewer and Judge, Young Investigator’s Symposium Annual Meeting
2002 - 2009 Member, Task Group 74
Head scatter measurements and modelling.
2001 - 2004 Member, Subcommittee on Intensity Modulated Radiation Therapy
1998 - 2003 Member, Task Group 65
Tissue inhomogeneity corrections for photon beam dose calculations.

American Society for Radiation Oncology (ASTRO)
2009 - present Abstract Reviewer, Chicago, Illinois, United States.
Annual Meeting.

Institute of Cancer Research
2006 - present Member, Section of Clinical Trials-Data Monitoring and Ethics Committee, Sutton, United Kingdom.
IMPORT (Intensity Modulated and Partial Organ RadioTherapy) High and Low Trials.

Testicular Cancer Resource Centre
2000 Member, Medical Advisory Board
an Internet resource for patient information and support.

World Congress on Medical Physics and Biomedical Engineering - Sponsorship Co-Chair

NATIONAL
Canadian Association of Radiation Oncologists
2003 Abstract Reviewer

Canadian Association of Radiation Oncology
2007 - present Abstract Reviewer
Annual Meeting.
2006 Member, National Radiation Therapy Equipment Survey

Canadian Organization of Medical Physicists
2005 Reviewer and Judge, Young Investigator’s Symposium Annual Meeting

Canadian Partnership for Quality Radiotherapy (CPQR)
2010 - present Member, Advisory Panel
PROVINCIAL / REGIONAL

Cancer Care Ontario

2012  Program Chair, Provincial Radiation Treatment Program Radiation- Winter Physics Symposium on imaging for high-precision radiotherapy

2011  Program Chair, Provincial Radiation Treatment Program Radiation - Winter Physics Symposium on Rotational IMRT

2010  Program Chair, Provincial Radiation Treatment Program Radiation - Winter Physics Symposium on IMRT

2010  Technical Reviewer, Technical Evaluation Team

For process to establish vendors of record for radiation treatment machines for the Province of Ontario.

2008 - 2010  Member, Program in Evidence-Based Care - Expert Panel on IMRT Indications

2006 - 2008  Member, South Lake Regional Cancer Centre- Radiation Equipment Selection Committee

2006 - 2008  Member, Program in Evidence-Based Care - Expert Panel on IMRT Professional Organization and Standards

Western University

LOCAL

Cancer Care Ontario

2012 - present  Proton Therapy Advisory Group, Co-Chair of Advisory Group reviewing current status of particle therapy and developing recommendations for the Province of Ontario, Toronto, Ontario, Canada.

Princess Margaret Hospital

2011 - present  Member, Radiation Medicine Program - RMP Information and Data Committee

2002 - present  Member, Radiation Medicine Program -- Clinical Processes (External Beam) Committee

2002 - present  Member, Radiation Medicine Program --- Physics Steering Committee

2008  Member, PMH 50th Anniversary Conference Organizing Committee

2007 - 2011  Member, Radiation Medicine Program - Research Committee

2002 - 2008  Member, Radiation Medicine Program - Clinical Operations Committee

University Health Network

2011 - present  Member, Oncology Program – Clinical Delegation to Kuwait Cancer Control Center, Shuwaikh Health Area, Kuwait City, Kuwait.

University of Toronto

2008 - present  Member, Continuing Education Committee, Faculty of Medicine, Dept of Radiation Oncology, Continuing Education

2013  Target Insight Symposium, Program Committee Co-Chair, Toronto, Ontario, Canada.

2012  Member, Target Insight Symposium, Program Committee

2011  Member, Target Insight Symposium, Program Committee

2010  Program Co-Chair, IMRT Insight Symposium

2007  Member, Medical Radiation Sciences, Physics Advisory Board
C. Academic Profile

1. RESEARCH STATEMENTS

GENERAL.
Ionizing radiation is a proven therapeutic agent for the local and regional control of many forms of cancer. In the last decade, technological advances have challenged radiation therapy conventions by creating opportunities to tailor, or “personalize” new high-precision strategies. These strategies exploit exquisite medical imaging, innovations in computer-aided treatment planning, and automation to control treatment delivery. Advances in computing, engineered control systems, physics, and mathematics have created opportunities to improve the control of disease, to reduce toxicity, and to reduce the financial burden of cancer therapy.

My scholarly interests have focused on advancing practice through the development, validation, and application of radiotherapy and imaging technologies. My early experience highlighted the need to span the distance between clinical medicine and the physics/engineering sciences in order to optimize technology adoption. Technological progress requires attention to the perceptions and skills of practitioners, as well as to the devices and systems that support patient care. I have helped to develop effective clinical implementation strategies, continuing education programs, and robust processes that lead to increased safety and treatment quality. By collaborating, publishing, participating in expert panels, industry collaboration, and continuing education forums, I have converted technical knowledge and academic activity into clinical skills and practice guidelines.
D. Research Funding

1. GRANTS, CONTRACTS AND CLINICAL TRIALS

PEER-REVIEWED GRANTS

Funded

2012 - 2015  **Co-Investigator.** Robust Breast Radiation Treatment Planning to Improve Efficiency and Reduce Treatment Related Cardiac Toxicity. Canadian Breast Cancer Foundation (CBCF). PI: Purdie TG. Collaborator(s): Purdie TG, Chan TC, **Sharpe MB**, Brock KK, Dinniwell R, Fyles A. 380,186 CAD. [Grants]

Collaborator(s): Brock KK, Jaffray DA, Dawson LA. 355,091. [Grants]

NON-PEER-REVIEWED GRANTS

FUNDED
2008 - 2012

E. Publications

1. MOST SIGNIFICANT PUBLICATIONS

2. PEER-REVIEWED PUBLICATIONS

1. EDUCATION

Degrees
1990 - 1993 PhD, Medical Physics, Physics, McGill University, Montreal, Quebec, Canada. Supervisor: Dr EB Podgorsak.
1988 – 1990 MSc, Medical Physics, Physics, McGill University, Montreal, Quebec, Canada. Supervisor: Dr EB Podgorsak.
1984 – 1988 BSc, Honours Physics, Physics, McGill University, Montreal, Quebec, Canada.

Postgraduate, Research and Specialty Training
1993 - 1994 Physics Resident, Department of Medical Physics, Toronto Sunnybrook Regional Cancer Centre, Toronto, Ontario Canada. Supervisor(s): Dr. B Faddegon.

Qualifications, Certifications and Licenses
1999 Fellow, Radiation Oncology Physics, Canadian College of Physicists in Medicine, Ottawa, Ontario Canada.
1996 Member, Radiation Oncology Physics, Canadian College of Physicists in Medicine, Ottawa, Ontario, Canada.

2. EMPLOYMENT

Current Appointments
2006 to present Chief, Medical Physics, Durham Regional Cancer Centre, Lakeridge Health, Oshawa, Ontario, Canada.

Responsible for clinical, administration and radiation safety matters for the achievement of
the goals and strategic direction of the Medical Physics function of the DRCC in keeping with the vision, mission, values and strategic objectives of Lakeridge Health and Cancer Care Ontario. Budgetary accountability for $3 million in operating funds and $28 million in major capital equipment. Supervision of 17.5 FTE direct report staff. Accountability for quality, safety and operational performance targets set internally and by Cancer Care Ontario.

Previous Appointments

CLINICAL
1999-2006 Senior Medical Physicist, Toronto-Sunnybrook Regional Cancer Centre. Sunnybrook Health Sciences Centre, Toronto, Ontario, Canada.

Operational responsibility for all technical matters related to treatment plan preparation and the operation of treatment planning computers. Responsibility for quality assurance program for the treatment planning process.

Commissioning of Siemens and Philips linear accelerators; Theraplan Plus 3D treatment planning system; Leader of Breast Technical Site Team; Resource physicist for dosimetry; General treatment planning physics support.

UNIVERSITY
2009-present Assistant Professor, Department of Radiation Oncology, University of Toronto, Toronto, Ontario, Canada
2002-2006 Assistant Professor, Institute of Medical Sciences, University of Toronto, Toronto, Ontario, Canada.
1998-2006 Assistant Professor, Department of Radiation Oncology, University of Toronto, Toronto, Ontario, Canada.

UNIVERSITY – CROSS APPOINTMENT
2000-2006 Assistant Professor Department of Medical Biophysics, University of Toronto, Toronto, Ontario, Canada.

3. HONOURS AND CAREER AWARDS

NATIONAL
Received

2016 Fellow of COMP, Canadian Organization of Medical Physics, Ottawa, Ontario, Canada. Honourary Award.

4. PROFESSIONAL AFFILIATIONS AND ACTIVITIES

Professional Associations

[Presented in reverse chronological order]
1989 - present Member, American Association of Physicists in Medicine (AAPM). 3225.
1990 – present Member, Canadian Organization of Medical Physicists (COMP).
2003 – present  Associate Member, Canadian Association of Radiation Oncologists (CARO).

**Administrative Activities**

**NATIONAL**

2002 – 2006  Chief Examiner, Canadian College of Physicists in Medicine, Canada.  
*Chief Examiner for national college for certification of Medical Physicists. Organized and oversaw examination process.*

1999 - 2002  Board Member, Canadian College of Physicists in Medicine, Canada.  
*Participated in national certification process of Medical Physicists and in the activities of the College.*

**PROVINCIAL / REGIONAL**

2015 – present  Chair of Radiation Safety Officers Community of Practice for Cancer Care Ontario, Toronto, Ontario, Canada.  
*Group exists to exchange best practices in radiation safety across Ontario Cancer Centres.*

2011 – present  Member, Cancer Care Ontario Provincial Radiation Treatment Program Committee, Toronto, Ontario, Canada.  
*Medical Physics representative on provincial program group for quality radiation treatment services.*

2011 – 2014  Chair, Physics Professional Advisory Committee of Cancer Care Ontario, Toronto, Ontario, Canada.  
*Committee of Chiefs of Physics across Ontario Cancer Centres.*

2006 – present  Member, Physics Professional Advisory Committee of Cancer Care Ontario, Toronto, Ontario, Canada.  
*Committee of Chiefs of Physics across Ontario Cancer Centres.*

**LOCAL**

2009 - present  Site Coordinator, Medical Physics Residency Program, Department of Radiation Oncology, University of Toronto, Toronto, Ontario, Canada.  
*Coordinator for Durham Regional Cancer Centre/Lakeridge Health as affiliated site for UofT Medical Physics Residency program.*

**Peer Review Activities**

**MANUSCRIPT REVIEWS**

2004 – 2006  Radiotherapy and Oncology, Number of Reviews: 2

2004 – 2008  Journal of Applied Clinical Medical Physics, Number of Reviews: 2

2001 – 2010  International Journal of Radiation Oncology, Biology, Physics, Number of Reviews: 12

3. CREATIVE PROFESSIONAL ACTIVITIES STATEMENT

I believe that by combining the facets of scholarly interest, professional activities and leadership, I can continue to make an impact on the field of Medical Physics.

D. Research Funding

1. GRANTS, CONTRACTS AND CLINICAL TRIALS

PEER-REVIEWED GRANTS

FUNDDED

Trial to assess the impact of an e-learning tool on understanding of linear accelerator servicing.

Evaluation of IMRT for pelvic nodal irradiation.

Clinical trial to assess skin toxicity for a new radiation treatment technique.

Project to incorporate digital fluoroscopy into CT simulation for radiation therapy patients.
1999 - 2000  
*Use of CT density to assess bone density for breast cancer patients.*

1999 - 2000  
*Use of CT density to assess bone density for breast cancer patients.*

**NON-PEER-REVIEWED GRANTS**

**FUNDED**

2002 - 2003  
*Evaluation of planning target volumes for prostate cancer with on line imaging and hypofractionation.*

1997 - 1998  
**Investigator.** Optimizing locoregional radiation therapy with the use of electron arc therapy in post-mastectomy breast cancer patients. Sunnybrook Trust for Medical Research. Principal Investigator: Ung, Yee. Collaborators: **Sixel KE**, Ege G. $27,500, cash. 
*Planning study to evaluate the use of electron arc therapy for radiation of breast cancer patients.*

1. INTERNATIONAL

Invited Lectures and Presentations
2004 Presenter. CT Simulation. Delaware Valley Chapter of the American Association of Physicists in Medicine Symposium: Image-Guided Radiation Therapy, Philadelphia, PA, USA. Presenter: Sixel, K

2000 Presenter. CT simulation: clinical techniques, Great Lakes Chapter of the American Association of Physicists in Medicine symposium: CT Sim – What you need to know before you give up your conventional simulator, Novi, Michigan. USA. Presenter: Sixel, K

2000 Presenter. CT simulation: process and clinical implementation, Great Lakes Chapter of the American Association of Physicists in Medicine symposium: CT Sim – What you need to know before you give up your conventional simulator, Novi, Michigan. USA. Presenter: Sixel, K

1999 Presenter. CT simulation: What the physicist needs to know. 16th Annual Meeting, Workshop and Refresher Courses, American College of Medical Physics (ACMP), Aspen, Colorado, USA. Presenter: Sixel, K

1998 Presenter. Advanced uses of AcQSim – the Toronto-Sunnybrook experience. Fifth annual Picker oncology symposium, Phoenix, Arizona. USA. Presenter: Sixel, K

2. NATIONAL

Invited Lectures and Presentations
2003 Presenter. The Rocky Road to IMRT: The Physics Perspective. CARO IMRT Workshop. Annual
meeting of the Canadian Association of Radiation Oncology (CARO), Montreal. Quebec. Presenter: Sixel, K

2001 Presenter. Multi-modality image based treatment planning. Keynote address, WesCan (Western Canada) 2001 annual meeting, New Westminster. BC. Presenter: Sixel, K

2001 Presenter Quantification and reduction of planning target volume in lung cancer treatment. Medical Physics Unit Seminar Series, McGill University, Montreal, Quebec. Presenter: Sixel, K

2001 Presenter Quantification and reduction of planning target volume in lung cancer treatment. Medical Physics Unit Seminar Series, McGill University, Montreal, Quebec. Presenter: Sixel, K

2001 Presenter Cancer services in Ontario. Department of Medical Physics Seminar Series, Montreal General Hospital, Montreal. Quebec. Presenter: Sixel, K

3. PROVINCIAL/ REGIONAL

Invited Lectures and Presentations

2003 Presenter. The Rocky Road to IMRT: The Physics Perspective. CARO IMRT Workshop. Annual meeting of the Canadian Association of Radiation Oncology (CARO), Montreal. Quebec. Presenter: Sixel, K

2002 Presenter. CT simulation of TSRCC breast techniques. 2nd Annual CCO CT SIMposium, Toronto Ontario. Presenter: Sixel, K

1998 Presenter. 3D treatment planning systems. 62nd Annual General Conference of the Ontario Association of Medical Radiation Technologists (OAMRT), Port Severn, Ontario. Presenter: Sixel, K

4. LOCAL

Invited Lectures and Presentations

1996 Presenter. An isocentric four field breast irradiation technique using four independent jaws, Translating physics into clinical practice. Department of Radiation Oncology, University of Toronto Continuing Medical Education Course, Toronto. Presenter: Sixel, K
H. Teaching and Design

NA

I. Research Supervision

1. MULTILEVEL EDUCATION

3. GRADUATE EDUCATION

5. POSTGRADUATE (MEDICAL PHYSICS RESIDENTS)

J. Creative Professional Activities

NA
CURRICULUM VITAE
William Y. Song, PhD, DABR

A. Date Curriculum Vitae is Prepared
July 28, 2016

B. Biographical Information
Primary Office
Head; Dept. of Medical Physics
Scientist; Sunnybrook Research Institute
Associate Professor; Dept. of Radiation Oncology

Odette Cancer Centre, Sunnybrook Health Sciences Centre, University of Toronto
2075 Bayview Ave., T Wing, Rm. TG 217
Toronto, ON, M4N 3M5
CANADA
P. 416-480-6100 x.87181 / F. 416-480-6801
Email: william.song@sunnybrook.ca

1. EDUCATION

Degrees (3)
1996-2001 BSc
Physics
University of Calgary, Calgary, Alberta, Canada
2001-2003 MSc
Medical Physics
University of Calgary, Calgary, Alberta, Canada
Supervisor(s): Dr. Peter Dunscombe
2003-2006 PhD
Medical Biophysics
University of Western Ontario, London, Ontario, Canada
Supervisor(s): Dr. Jake Van Dyk, Dr. Jerry Battista

Postgraduate, Research, and Specialty Training (1)
2006-2008 Residency, Medical Physics (CAMPEP-Accredited)
Department of Radiation Oncology
University of Florida, Gainesville, Florida, USA

Qualifications, Certifications, and Licenses (1)
2010-2020 Diplomat, American Board of Radiology (ABR)
Therapeutic Radiologic Physics, ID:P5066
2. EMPLOYMENT

Current Appointments (7)

2014-Present  
**Head**  
Department of Medical Physics, Odette Cancer Centre, Sunnybrook Health Sciences Centre, Toronto, Canada  
-Responsible for overseeing 70+ staff and students in the department (50+ regular-payroll staff & 20+ researchers and students)

2014-Present  
**Scientist**  
Sunnybrook Research Institute (SRI), Sunnybrook Health Sciences Centre, Toronto, Canada

2014-Present  
**Associate Professor**  
Department of Radiation Oncology, University of Toronto, Toronto, Canada

2014-Present  
**Adjunct Faculty**  
Institute of Biomaterials and Biomedical Engineering (IBBME), University of Toronto

2014-Present  
**Adjunct Faculty**  
Institute of Medical Sciences (IMS), University of Toronto

2015-Present  
**Adjunct Faculty**  
Department of Mechanical and Industrial Engineering, University of Toronto

2015-Present  
**Adjunct Faculty**  
Department of Physics, Ryerson University, Toronto, Canada

Previous Appointments (6)

2008-2012  
**Assistant Professor**  
Department of Radiation Medicine and Applied Sciences, University of California San Diego

2009-2014  
**Adjunct Faculty**  
Department of Physics, San Diego State University

2012-2014  
**Associate Professor**  
-Accelerated Promotion: Typically takes 6 years, accomplished in 3.8 years  
Department of Radiation Medicine and Applied Sciences, University of California San Diego

2012-2014  
**Chief of Physics in IGRT and Motion Management Technologies**  
Department of Radiation Medicine and Applied Sciences, University of California San Diego

2012-2014  
**Chief of Physics in GI Tumors**  
Department of Radiation Medicine and Applied Sciences, University of California San Diego

2013-2014  
**Co-Director**  
Research Arm, Department of Radiation Medicine and Applied Sciences,
3. HONOURS AND CAREER AWARDS

2001 May MSc Graduate Research Scholarship (GRS), $2,000 one time, Departmental Award for Academic Excellence. University of Calgary.

2003 Jan-2003 Aug Alberta Cancer Board (ACB) Graduate Scholarship, $12,000 over 2 academic terms, Institutional Award for Academic Excellence. University of Calgary.

2003 Province of Alberta Graduate Scholarship, $2,000 one time, Provincial Award for best three MSc students in the Department for Academic Excellence. University of Calgary.

2003 Faculty of Graduate Studies Scholarship, $500 one time, Institutional Award for Academic Excellence. University of Calgary.

2003 Honorable Mention Abstract – Annual Canadian Organization of Medical Physics (COMP) conference held in Edmonton, Alberta, National Award for Research Excellence. University of Calgary.

2004 May-2005 Apr Ontario Graduate Scholarship in Science and Technology (OGSST), $15,000/year, Provincial Award for Academic Excellence. University of Western Ontario.

2004 Young Investigators’ Symposium (YIS), 3rd place, Annual Canadian Organization of Medical Physics (COMP) conference held in Winnipeg, Manitoba, National Award for Research Excellence. University of Western Ontario.

2005 May-2006 Apr Ontario Graduate Scholarship (OGS), $15,000/year, Provincial Award for Academic Excellence. University of Western Ontario.

2005 May-2006 Apr Western Graduate Research Scholarship (WGRS), $1,500/year, Departmental Award for OGS winners. University of Western Ontario.

2005 Chosen as the CIHR strategic training program PhD trainee to represent the London Regional Cancer Program to give oral presentation at the National CIHR/NCIC meeting in Mont Tremblant, Quebec. University of Western Ontario.

4. PROFESSIONAL AFFILIATIONS AND ACTIVITIES

Professional Associations (8)

2001-Present Member Canadian Organization of Medical Physicists (COMP)

2007-Present Member American Association of Physicists in Medicine (AAPM)

2007-Present Member Korean-American Medical Physicists in North America (KAMPiNA)

2008-2014 Member Southern California Chapter, American Association of Physicists in Medicine (SCC-AAPM)

2009-Present Member American Society of Therapeutic Radiology and Oncology (ASTRO)

2010-2011 Member Radiological Society of North America (RSNA)

2012-2014 Member Korean Scientists and Engineers Association (KSEA)

2012-2014 Member European Society for Radiotherapy & Oncology (ESTRO)

Journal Reviewer (19)

2006-Present Reviewer International Journal of Radiation Oncology, Biology, and Physics

2006-Present Reviewer Medical Physics

2008-Present Reviewer Radiotherapy and Oncology

2009-Present Reviewer Journal of Applied Clinical Medical Physics

2009-Present Reviewer Physics in Medicine and Biology

2010-Present Reviewer Practical Radiation Oncology

2010-Present Reviewer Sensors

2012-Present Reviewer IEEE Biomedical Engineering
2012-Present  
**Reviewer**  
Technology in Cancer Research and Treatment

2012-Present  
**Reviewer**  
Journal of X-Ray Science and Technology

2012-Present  
**Reviewer**  
Transactions on Biomedical Engineering

2012-Present  
**Reviewer**  
International Journal of Physical Sciences

2012-Present  
**Reviewer**  
Oncology

2014-Present  
**Reviewer**  
Physica Medica

2014-Present  
**Reviewer**  
Journal of Contemporary Brachytherapy

2014-Present  
**Reviewer**  
Journal of the Korean Physical Society

2016-Present  
**Reviewer**  
BioMedical Engineering OnLine (BMEO)

2016-Present  
**Reviewer**  
Review of Scientific Instruments

2016-Present  
**Reviewer**  
Biomedical Physics & Engineering Express

**Associate Editor (1)**

2013-Present  
**Associate Editor**  
Member of Board of Associate Editors

**Medical Physics**

**Meeting Abstract Reviewer (5)**

2012-Present  
**Abstract Reviewer**  
Annual Meeting, American Society of Therapeutic Radiology and Oncology (ASTRO)

2012-Present  
**Abstracts Reviewer**  
Annual Meeting, American Association of Physicists in Medicine (AAPM)

2015  
**Abstracts Reviewer**  
Annual Meeting, World Congress on Medical Physics and Biomedical Engineering, Toronto, ON, Canada

2016  
**Abstracts Reviewer**  
14th Annual Meeting, Imaging Network of Ontario (ImNO), Toronto, ON, Canada

2016  
**Abstracts Reviewer**  
Annual Meeting, World Congress of Brachytherapy, San Francisco, CA

**C. Academic Profile**

1. **RESEARCH INTERESTS**
2001-Present  Adaptive radiation therapy
2008-Present  Image guided radiation therapy, cone beam CT, image reconstruction, 4DCT, motion management
2010-Present  Intensity modulated brachytherapy, direction modulated brachytherapy, image guided brachytherapy, MRI guided brachytherapy

D. Research Funding

1. GRANTS, CONTRACTS, AND CLINICAL TRIALS

Peer Reviewed Grants (6)

2011 May-2012 Mar  Principal Investigator - Development of novel 4D imaging framework for liver cancer radiation therapy. Clinical and Translational Research Institute (CTRI) – Pilot Innovative Technology Grant. $40,000 USD.
2010 Jun-2011 May  Collaborator - Four-dimensional liver imaging verification for external-beam radiotherapy (4D-LIVER): Phase I study. Varian Medical Systems Inc. Research Grant. $82,941 USD.
2012 Jul-2013 Mar  Principal Investigator - Novel system development of intra-cavitary brachytherapy for cancer treatment. Collaborative Research Opportunities Program (CRO), San Diego Super Computer Center (SDSC) mini-proposal to advance SDSC research and funding opportunities. $20,000 USD.
2013 Feb-2014 Jan  Principal Investigator - Novel System Development of Intra-Cavitary Brachytherapy for Cancer Treatment. CRO Program at San Diego Supercomputer Center (Award Number: CRO04). 200,000 CPU hours.

Non Peer Reviewed Grants (7)

2008 Nov-2011 Oct  Principal Investigator - Dynamic modulated brachytherapy (DMBT) system design for breast, GYN, and rectal cancers. UCSD Faculty Startup Grant. $75,000 USD.
2011 Mar-2012 Feb  Principal Investigator - Development of general 4DCT based treatment planning techniques. Catholic University of Korea Research Institute Collaborative Grant. $40,000 USD.
E. Publications

1. FIVE-MOST SIGNIFICANT PUBLICATIONS

2) Park JC, Song B, Kim JS, Park SH, Kim HK, Liu Z, Suh T, **Song WY**. Fast compressed sensing-based CBCT reconstruction using Barzilai-Borwein formulation for application to on-line IGRT. *Med Phys* 2012;39(3):1207-1217. **Senior Corresponding Author.**

3) Webster M, Devic S, Vuong T, Han D, Park JC, Scanderbeg D, Lawson J, Song B, Watkins WT, Pawlicki T, **Song WY**. Dynamic modulated brachytherapy (DMBT) for rectal cancer. *Med Phys* 2013;40(1):011718. **Senior Corresponding Author.**

4) Park JC, Kim JS, Park SH, Liu Z, Song B, **Song WY**. Motion-map constrained image reconstruction (MCIR): Application to four-dimensional cone-beam computed tomography. *Med Phys* 2013;40(12):121710. **Senior Corresponding Author.**

5) Han D, Webster MJ, Scanderbeg D, Yashar C, Choi D, Song B, Devic S, Ravi A, **Song WY**. Direction Modulated Brachytherapy (DMBT) for HDR Treatment of Cervical Cancer (I): Theoretical Design. *Int J Radiat Oncol Biol Phys* 2014;89(3):666-673. **Senior Corresponding Author.**

2. PEER REVIEWED PUBLICATIONS

**Journal Articles (52)**

1) **Song WY** and Dunscombe P. EUD based margin selection in the presence of set-up uncertainties. *Med Phys* 2004;31(4):849-859. **Principal Author.**

12) Watkins WT, Li R, Lewis J, Park JC, Sandhu A, Jiang SB, **Song WY**. Patient-specific motion artifacts in 4DCT. *Med Phys* 2010;37(6):2855-2861. **Senior Corresponding Author.**

13) Youn HB, Kim JS, Cho MK, Jang SY, **Song WY**, Kim HK. Optimizing imaging conditions in digital tomosynthesis for image-guided radiation therapy. *Prog Med Phys* 2010;21(3):281-290. **Co Author.**

2015

G. Presentations and Special Lectures

Invited Lectures and Presentations (46)

2005
Invited Speaker
Title: IGRT of prostate cancer: The state of the art
Department of Oncology
London Regional Cancer Program, London Health Sciences Centre
University of Western Ontario, Canada

2006
Invited Speaker
Title: IGRT of prostate cancer
Department of Radiation Oncology
University of Florida, Gainesville, FL

2007
Invited Speaker
Title: CBCT daily dose during IGRT
Department of Radiation Oncology
University of California San Diego, San Diego, CA

2008
Invited Speaker
Title: University of Florida Clinical Program
Department of Radiation Oncology
University of California San Diego, San Diego, CA

2008
Invited Speaker
Title: University of Florida Clinical Program
Department of Nuclear and Quantum Engineering
Korea Advanced Institute of Science and Technology (KAIST), S. Korea

2008
Invited Speaker
Title: University of Florida Clinical Program
Department of Radiation Oncology
Kyung Buk University, S. Korea

2009
Invited Speaker
Title: Radiation Oncology Physics: Current State-of-the-Art
Department of Physics
2009

**Invited Speaker**
Title: Radiation Oncology Physics: The Current State of the Art
Department of Radiologic Sciences
Korea National University, S. Korea

**Invited Speaker**
Title: CBCT Technology for IGRT: Present and Future
Department of Radiation Oncology
Sam Sung Medical Center, S. Korea

**Invited Speaker**
Title: Image-guided radiation therapy
Department of Radiology
University of California San Diego, San Diego, CA

**Invited Symposia Speaker**
Title: Cone-Beam CT in radiotherapy
Annual Meeting, Anaheim, CA
Radiotherapy Service Engineer Association (RSEA)

**Invited Speaker**
Title: Computer Applications in Radiation Therapy
Department of Computer Science and Engineering
University of California San Diego, San Diego, CA

**Invited Speaker**
Title: Physics and engineering of image-guided radiation therapy
Department of Mechanical Engineering
Pusan National University, S. Korea

**Invited Speaker**
Title: Image guided radiation therapy of prostate cancer
Department of Radiation Oncology
Asan Medical Center, S. Korea

2010

**Invited Speaker**
Title: Current state of the art in cancer radiation therapy
Department of Physics
California State University Los Angeles, Los Angeles, CA

**Invited Symposia Speaker**
Title: Respiratory signal reconstruction from fiducial markers for 4D image guidance of liver SBRT
Annual Meeting, Philadelphia, PA
KSMP-KAMPiNA Joint Meeting

**Invited Speaker**
Title: Optimizing SBRT planning and delivery
Annual Meeting, Seoul, S. Korea
The International Symposium on Medical Physics
20th Anniversary KSMP Annual Meeting

**Invited Symposia Speaker**
Title: Dynamic Modulated Brachytherapy
Annual Meeting, Seoul, S. Korea
The International Symposium on Medical Physics
20th Anniversary KSMP Annual Meeting

2010
Invited Speaker
Title: The State of the Art in Cancer Radiation Therapy
Department of Aerospace Engineering
Korea Advanced Institute of Science and Technology (KAIST), S. Korea

2011
Invited Symposia Speaker
Title: Dynamic Modulated Brachytherapy (DMBT)
Annual Winter Meeting, Los Angeles, CA
Southern California Chapter American Association of Physicists in Medicine (SCC-AAPM)

2011
Invited Symposia Speaker & Joint Organizing Chair
Title: Physics of Liver SBRT
1st AMC–UCSD Joint SBRT Symposium
Asan Medical Center, S. Korea

2011
Invited Speaker
Title: Past, Present, and Future of Radiation Oncology
Department of Radiologic Sciences
Korea National University, S. Korea

2011
Invited Speaker
Title: Dynamic Modulated Brachytherapy: Concept, Design, and Applications
Department of Radiation Oncology
McGill University, Montreal, Canada

2011
Invited Speaker
Title: IGRT, SBRT, and DMBT: state-of-the-art updates
Department of Radiation Oncology
Seoul National University, S. Korea

2012
Keynote Speaker
Title: Electron beam MU calculations
Symposium on Physics of MU Calculations
Juntendo University, Tokyo, Japan

2012
Invited Symposia Speaker
Title: Dynamic Modulated Brachytherapy of Rectal, Breast, and GYN Cancers
Workshop: Integration of new radiation technologies in the multi-modality treatment approaches in cancer therapy
McGill University, Montreal, Canada

2012
Invited Symposia Speaker
Title: TrueBeam: Clinical experience at UCSD
Workshop: Integration of new radiation technologies in the multi-modality treatment approaches in cancer therapy
McGill University, Montreal, Canada

2013
Invited Speaker
Title: 4D Motion Management & SBRT Planning
Workshop: Implementing SBRT in communal setting
Pacific Cancer Institute, Wailuku, HI

2013
Invited Symposia Speaker
Title: Dynamic Modulated Brachytherapy for Cancer Treatment
The 23rd KSEA Southern California Regional Conference, Carlsbad, CA

2013
Invited Symposia Speaker
Title: IGRT QA
The QA & Dosimetry Symposium: Exploring the future of QA and Dosimetry
Sun Nuclear Corporation, Orlando, FL

2013
Invited Speaker
Title: IGRT, SBRT, and DMBT
Department of Physics Seminar Series
San Diego State University, San Diego, CA

2013
Invited Speaker (On-Line)
Title: 4D Motion Management & SBRT Planning
Department of Radiation Oncology
Hospital Sirio Libanes, Brazil

2013
Invited Speaker
Title: 4D Motion Management in RT
Continuing Education (CE) Seminar Series, Moores Cancer Center
University of California San Diego, San Diego, CA

2013
Invited Speaker
Title: Dynamic Modulated Brachytherapy (DMBT)
Department of Radiation Oncology
University of Iowa, Iowa City, IA

2013
Invited Speaker
Title: Medical Physics: The Next 10 Years
Department of Radiation Oncology, Sunnybrook Health Sciences Centre
University of Toronto, Toronto, Canada

2013
Invited Speaker
Title: IGRT, SBRT, and 4D Motion Management
Workshop: ProKnife SRS/SBRT
Scripps Proton Therapy Center, San Diego, CA

2013
Invited Speaker
Title: Use of Imaging and New Opportunities in External-Beam RT & Brachytherapy
Department of Radiation Oncology, Sunnybrook Health Sciences Centre
University of Toronto, Toronto, Canada

2014
Invited Speaker (3)
Title (1): SBRT Planning with 4D Imaging
Title (2): IGRT Technology and Workflow with 4D Motion Management
Title (3): CBCT in RT: Technical Review
Workshop: Advanced Radiation Techniques – Planning & Delivery (IMRT, IGRT, VMAT, and SBRT)
Postgraduate Institute of Medical Education & Research, Chandigarh, India

2014
Invited Speaker
Title: Direction Modulated Brachytherapy (DMBT)
Oncology Grand Rounds
University of Western Ontario, London, Canada

2014
Invited Speaker
Title: Direction Modulated Brachytherapy (DMBT)
Department of Radiation Oncology
University of Washington, Seattle, WA

2014
Invited Speaker
Title: Direction Modulated Brachytherapy
Institute of Biomaterials and Biomedical Engineering (IBBME) Grand Rounds
University of Toronto, Toronto, Canada

2015
Invited Speaker
Title: Direction Modulated Brachytherapy (DMBT)
3rd World Rectal Conference on Organ Preserving Perspectives
McGill University, Montreal, Canada

2015
Invited Speaker
Title: OncoSpace at Sunnybrook
1st OncoSpace Consortium
Johns Hopkins University, Baltimore, USA

2016
Invited Speaker
Title: Applicator development for intraluminal techniques: Role of shielding
Educational Symposium - GI Tract
ABS-World Congress of Brachytherapy Annual Meeting, San Francisco, CA, USA

Session Chair/Moderator (3)

2014
Session Chair, Annual Meeting, American Association of Physicists in Medicine (AAPM), Austin, USA

2015
Session Chair, Annual Meeting, World Congress on Medical Physics and Biomedical Engineering, Toronto, Canada

2015
Session Chair, Annual Meeting, American Association of Physicists in Medicine (AAPM), Anaheim, USA

2016
Session Chair, Annual Meeting, American Association of Physicists in Medicine (AAPM), Washington DC, USA

H. Teaching and Design

2010-2012
Director, Resident Seminar Series
Department of Radiation Medicine and Applied Sciences
University of California San Diego

2011-2014
Instructor
Physics Didactic Course (CAMPEP-Accredited)
Department of Radiation Medicine and Applied Sciences
University of California San Diego

2011-2014
Instructor
Learning Center – SBRT Course
WILLIAM Y. SONG, PHD, DABR

Department of Radiation Medicine and Applied Sciences
University of California San Diego

2011-2014
Instructor
PHYS 298 – Directed Study in Physics
Department of Physics,
University of California San Diego

2012
Instructor
PHYS 670A - Physics of Radiation Therapy (CAMPEP-Accredited)
Department of Physics,
San Diego State University

2013-2014
Instructor
PHYS 797 – Directed Study in Physics (CAMPEP-Accredited)
Department of Physics,
San Diego State University

2013-2014
Advisor
QI-Calit2 Summer Undergraduate Research Scholarship in Bioengineering
University of California San Diego

2013
Instructor
Workshop – 4D Motion Management & SBRT Planning
Pacific Cancer Institute, Wailuku, HI

2014
Instructor
Workshop – 4D Motion Management & SBRT Planning
Post Graduate Institute of Medical Education and Research, Chandigarh, India

2013
Instructor
ECE 187 – Introduction to Biomedical Imaging & Sensing
Department of Electrical & Computer Engineering,
University of California San Diego

I. Research Supervision

Undergraduate Students (3)

2013 Jun-2013 Aug
Primary Supervisor, Christopher Yang
2013 UCSD Calit2 Summer Undergraduate Research Scholarship Winner,
Bioengineering, University of California San Diego
Project: Influence of dose rates on survival in respiratory-induced mobile liver tumor cells during stereotactic body radiation therapy

2013 Jun-2013 Aug
Primary Supervisor, Dong Jin Ko
2013 UCSD Calit2 Summer Undergraduate Research Scholarship Winner,
Mechanical Engineering, Kumoh National Institute of Technology (KfT) Summer Exchange Program with UCSD
Project: Influence of dose rates on survival in respiratory-induced mobile liver tumor cells during stereotactic body radiation therapy
2015 May-2015 Aug  **Primary Supervisor**, Youn Hwan Kim  
Summer Research Student  
University of Waterloo, Waterloo  
Project: MRI, CT, and US image quality assessment and compatibility testing of a novel DMBT tandem applicator for cervical cancer brachytherapy

**Graduate Students (22)**

2009 Jan-2010 Jun  **Primary Supervisor**, Tyler Watkins  
Research Fellow  
Radiation Medicine and Applied Sciences, University of California San Diego  
Project: 4DCT uncertainties in lung cancer target definition

2009 Oct-2013 May  **Primary Supervisor**, Chunjoo Park  
PhD Thesis Research  
Electrical and Computer Engineering, University of California San Diego  
Project: CBCT image reconstruction using iterative algorithms

2009 Jun-2011 Jun  **Primary Supervisor**, Ammar Durghalli  
MSc Thesis Research  
Medical Physics, San Diego State University  
Project: Four-dimensional treatment planning of lung cancer using Demons & optical flow deformable image registration algorithms

2009 Oct-2012 May  **Primary Supervisor**, Kevin Kauweloa  
MSc Thesis Research  
Medical Physics, San Diego State University  
Project: Profile of moving tumors in free-breathing CBCT

2010 May-2014 May  **Primary Supervisor**, Matt Webster  
PhD Thesis Research  
Medical Physics, University of California San Diego  
Project: Development of a robotics-guided dynamic modulated brachytherapy (DMBT) system for rectal, breast cancers

2011 Sep-2015 Jun  **Primary Supervisor**, Dae Yup Han  
PhD Thesis Research  
Electrical and Computer Engineering, University of California San Diego  
Project: Development of direction modulated brachytherapy (DMBT) system for GYN cancers

2011 Feb-2012 Mar  **Primary Supervisor**, Brian Loughery  
MSc Thesis Research  
Medical Physics, San Diego State University  
Project: Deformable image registration algorithms for CT-CBCT registration

2011 Apr-2012 Apr  **Primary Supervisor**, Angelo Bergamo  
Research Fellow  
Medical Physics, San Diego State University  
Project: Utility of 4DPETCT for mobile tumors
2012 Mar-2013 Apr  **Joint Primary Supervisor**, Chelsea Pearson  
MSc Thesis Research  
Medical Physics, San Diego State University  
Project: Accuracy of surface tracking system for Brain SRS

2012 Apr-2013 May  **Primary Supervisor**, Jonathan Casey  
MSc Thesis Research  
Medical Physics, San Diego State University  
Project: CAPRI applicator-based rectal HDR treatment

2012 Sep-2013 Dec  **Primary Supervisor**, Eddie Marshall  
MSc Thesis Research  
Medical Physics, San Diego State University  
Project: Audiovisual system design and setup for patient guidance during 4DCT simulation of dynamic tumors

2012 Oct-2013 Feb  **Primary Supervisor**, Trey Slauter  
MSc Thesis Research  
Medical Physics, San Diego State University  
Project: Evaluation of the efficacy of audiovisual system in 4DCT image quality

2013 Jul-2013 Aug  **Primary Supervisor**, Chad Nakagawa  
Research Fellow  
Radiation Medicine and Applied Sciences, University of California San Diego  
Project: Literature survey of radiation dose rate dependence on general cell survival

2014 Oct-Present  **Primary Supervisor**, Elodie Rachel Mok Tsze Chung  
MSc Thesis Research  
Industrial Engineering, University of Toronto  
Project: Development of optimization framework for direction modulated brachytherapy (DMBT)

2015 Jan-Present  **Primary Supervisor**, Habib Safigholi  
Post Doctoral Fellow  
Medical Biophysics, University of Toronto  
Project: Designing optimal brachytherapy applicators

2015 Jan-2015 Feb  **Primary Supervisor**, Nelly Kager  
Research Fellow  
Medical Physics, Sunnybrook Health Sciences Centre  
Project: Impact of DMBT brachytherapy tandem applicator on CT image quality

2015 Feb-Present  **Primary Supervisor**, Abraam Soliman  
Post Doctoral Fellow  
Sunnybrook Research Institute, Sunnybrook Health Sciences Centre, Toronto  
Project: Translation of MRI simulation into clinical brachytherapy workflow

2015 Apr-Present  **Joint Primary Supervisor**, Masoud Hashemi  
Post Doctoral Fellow  
Sunnybrook Research Institute, Sunnybrook Health Sciences Centre, Toronto  
Project: GPU-accelerated iterative CBCT reconstruction for image guided and frameless radiosurgery using the GammaKnife Perfexion system
2015 Sep-Present  **Primary Supervisor**, Christopher Huynh
MSc Thesis Research
Medical Physics, Ryerson University, Toronto
Project: CBCT image reconstruction using iterative algorithms for GammaKnife brain SRS treatment guidance

2015 Sep-Present  **Primary Supervisor**, Julia Pearse
MSc Thesis Research
Medical Physics, Ryerson University, Toronto
Project: Direction modulated brachytherapy concept applicator design for image guided vaginal cuff brachytherapy

2015 Sep-Present  **Primary Supervisor**, Reyhaneh Nosrati
PhD Thesis Research
Medical Physics, Ryerson University, Toronto
Project: Development of MRI-only workflow for permanent prostate seed implantation brachytherapy

2016 Jan-Present  **Primary Supervisor**, Amani Shaaer
PhD Thesis Research
Medical Physics, Ryerson University, Toronto
Project: Direction modulated brachytherapy concept application in image guided cervical cancer brachytherapy

**External MSc/PhD Thesis Committee Memberships (5)**

2013 Mar  **External Committee**, Tyler Watkins
PhD Thesis External Committee Member
Thesis: Optimization of Radiation Therapy in Time-Dependent Anatomy
Virginia Commonwealth University, Richmond, VA, USA

2014 Aug  **External Committee**, Amani Shaaer
MSc Thesis External Committee Member
Thesis: Image Quality and Dose of an Accelerator-Integrated kV CBCT Systems
Laurentian University, Sudbury, ON, Canada

2015 Apr  **External Committee**, Kevin Kauweloa
PhD Thesis External Committee Member
Thesis: Practical aspects and applications of the three-dimensional biological effective dose in multi-phase radiotherapy treatment plans
The University of Texas Health Science Center at San Antonio, TX, USA

2015 Jul  **External Committee**, Angelo Bergamo
PhD Thesis External Committee Member
Thesis: Possibilities and implications of biological dose evaluation
The University of Texas Health Science Center at San Antonio, TX, USA

2016 Jul  **External Committee**, Ilma Xhaferlliari
PhD Thesis External Committee Member
Thesis: Optimizing respiratory gated intensity modulated radiation therapy planning and delivery of early-stage non-small cell lung cancer
The University of Western Ontario, London, ON, Canada

J. Professional Activities

2009 Aug-2013 Dec Secretary of Academic Affairs
Korean American Medical Physicists in North America (KAMPiNA)

2010 Jun-2013 Oct Academic Member
University of California San Diego
Academic Senate Committee: Human Exposure Review Committee (HERC), a sub-committee of Radiation Safety and Surveillance Committee (RSSC)

2011 Sep-2014 Apr Young Generation (YG) Director
San Diego Chapter
Korean Scientists and Engineers Association (KSEA)

2011-2012 Chair
MC2 Research Award Committee
Korean American Medical Physicists in North America (KAMPiNA)

2012 Aug-2014 Apr Member
National Scholarship Committee
Korean Scientists and Engineers Association (KSEA)

2012-2013 Member
Vendor Relations and Product Usability Subcommittee, Brachytherapy Devices Subgroup
American Association of Physicists in Medicine (AAPM)

2012 Oct-Present Member
Placement Services Subcommittee
American Association of Physicists in Medicine (AAPM)

2013 Member
Organizing Committee for the Norm Bailey Awards Meeting
Southern California Chapter, AAPM

2013-2014 Co-Chair, Research Committee
Department of Radiation Medicine and Applied Sciences
University of California San Diego

2013-2014 Member, Merits and Promotions Committee
Department of Radiation Medicine and Applied Sciences
University of California San Diego

2013-2015 Member, Emerging Technology Monitoring Subcommittee
American Society of Therapeutic Radiology and Oncology (ASTRO)

2013-2014 Member, Faculty Recruitment Search Committee
Department of Radiation Medicine and Applied Sciences
University of California San Diego

2013-2014 Member, UCSD Academic Senate
University of California San Diego

Curriculum Vitae

Teodor Stanescu
PhD, MCCPM

A. Date Curriculum Vitae is Prepared: 2013 July 9

B. Biographical Information

Primary Office
Princess Margaret Hospital
Radiation Medicine Program
Radiation Physics
Toronto, Ontario, Canada
M5G 2M9

Telephone 416-946-4501 ext. 5071
Fax 416-946-6566
Email teodor.stanescu@rmp.uhn.on.ca

1. EDUCATION

Degrees
2008 PhD, Medical Physics, University of Alberta, Edmonton, Alberta, Canada
2004 MSc, Medical Physics, University of Alberta, Edmonton, Alberta, Canada
1999 BSc, Nuclear Physics, University of Bucharest, Romania

Postgraduate, Research and Specialty Training
2011 Entrepreneurship 101, MaRS Discovery District, Toronto, Ontario
2011 IDEA MRI pulse sequence design, Siemens, Toronto, Ontario
2009 The Fundamentals of a Business Plan, TEC Edmonton, Edmonton, Alberta
2008 - 2010 Residency, Medical Physics, Department of Oncology, University of Alberta
2008 Science and Society Business Basics Workshop, THECIS The Centre For Innovation Studies, Banff, Alberta

2. EMPLOYMENT

Current Appointments
2012 Jan - present Scientist, Techna Institute, University Health Network & University of Toronto, Toronto, Ontario, Canada
2010 - present Radiation Physicist, Princess Margaret Hospital, Toronto, Ontario
2010 - present Assistant Professor, Radiation Oncology, University of Toronto, Toronto, Ontario
Teodor STANESCU

Previous Appointments

CLINICAL
2008 - 2010 Associate Medical Physicist, Medical Physics, Cross Cancer Institute, Edmonton, Alberta
2004 - 2008 Physicist Assistant, Medical Physics, Cross Cancer Institute, Edmonton, Alberta

3. HONOURS AND CAREER AWARDS

Distinctions and Research Awards

INTERNATIONAL
Nominated
2011 Young Scientists ESTRO Poster Session, ESTRO meeting, European Society for Therapeutic Radiology and Oncology (ESTRO). (Research Award)
2002 Young Investigator Competition, AAPM & COMP Joint Meeting. (Research Award)

NATIONAL
Received
2009 Sylvia Fedoruk Prize, Co-author, Canadian Organization of Medical Physicists (COMP). (Research Award)
For best paper in medical physics.

Nominated
2007 Young Investigator Paper Competition, CARO & COMP Joint Meeting. (Research Award)

LOCAL
Received
2005 J. Gordon Kaplan Graduate Student Award, University of Alberta. (Distinction)
2002 Louise Imrie Graduate Student Award, University of Alberta. (Distinction)
2000 - 2003 Graduate Teaching Assistantship, University of Alberta. (Distinction)
2000 - 2001 Graduate Intern Tuition Supplement, University of Alberta. (Distinction)
1994 - 1999 Study Scholarship, University of Bucharest, Romania. (Distinction)

4. PROFESSIONAL AFFILIATIONS AND ACTIVITIES

Professional Associations

Member, American Association of Physicists in Medicine (AAPM)
Member, Canadian College of Medical Physicists (MCCPM)
Member, Canadian Organization of Medical Physicists (COMP)
Teodor STANESCU

Administrative Activities

NATIONAL

Canadian Organization of Medical Physicists (COMP)

Member, COMP Communication Committee

Peer Review Activities

MANUSCRIPT REVIEWS

Reviewer

Physics in Medicine and Biology
Medical Physics
Journal of Physics D: Applied Physics
International Journal of Radiation Oncology Biology Physics
Journal of Applied Clinical Medical Physics
Journal of Physics A: Mathematical and Theoretical

C. Research Funding

1. GRANTS, CONTRACTS AND CLINICAL TRIALS

PEER-REVIEWED GRANTS

FUNDED

NON-PEER-REVIEWED GRANTS

FUNDED

D. Publications

1. PEER-REVIEWED PUBLICATIONS

Journal Articles

Abstracts

Conference Publications

2. SUBMITTED PUBLICATIONS

Journal Articles

E. Patents and Copyrights

- Patient alignment in MRI guided radiation therapy, Patent, Applied
- Radiotherapy system integrating a radiation source with a magnetic resonance imaging apparatus, Patent, Provisional application in preparation

F. Presentations and Special Lectures

1. INTERNATIONAL

Abstracts and Other Papers

2012 MRigRT: characterization of the composite MR image distortion field associated with organ motion. European Society for Therapeutic Radiology and Oncology (ESTRO). Barcelona, Spain. Stanescu T, Jaffray D.

2012 Development of a 4D-MRI technique for MRgRT. American Association of Physicists in Medicine (AAPM), Annual Scientific Meeting. Charlotte, North Carolina. Stanescu T, Tadic T, Moseley D, Jaffray D.

2011 Quantification of MR image susceptibility distortions for IGRT. European Society for Therapeutic Radiology and Oncology (ESTRO) 11th Biennial Meeting. London, United Kingdom. Stanescu T, Wachowicz K, Jaffray DJ.

Invited Lectures and Presentations

2012 MRgRT: characterization of the composite MR image distortion field associated with organ motion. European Society for Therapeutic Radiology and Oncology (ESTRO). Barcelona, Spain. Stanescu T, Jaffray D.

2012 Development of a 4D-MRI technique for MRgRT. American Association of Physicists in Medicine (AAPM), Annual Scientific Meeting. Charlotte, North Carolina. Stanescu T, Tadic T, Moseley D, Jaffray D.

2011 Quantification of MR image susceptibility distortions for IGRT. European Society for Therapeutic Radiology and Oncology (ESTRO) 11th Biennial Meeting. London, United Kingdom. Stanescu T, Wachowicz K, Jaffray DJ.

Media Appearances

2012 Interview, Radio Romania International.

2. NATIONAL

Abstracts and Other Papers

2007 Comparison of 1.5 T versus 3 T MRI of Brain for Target Delineation in Glioblastoma Multiforme (GBM) patients. Canadian Association of Radiation Oncology – Canadian Organization of Medical Physicists (CARO-COMP), Joint Annual Scientific Meeting. Toronto, Ontario. Pervez N, Al-Dhaibani N, Stanescu T,
Teodor STANESCU

Fallone BG.

2006 Investigation of a 3D MR Distortion Correction Protocol. Canadian Organization of Medical Physicists (COMP), Annual Scientific Meeting. Saskatoon, Saskatchewan. Stanescu T, Jans HS, Fallone BG.

Invited Lectures and Presentations

2006 Investigation of a 3D MR Distortion Correction Protocol. Canadian Organization of Medical Physicists (COMP), Annual Scientific Meeting. Saskatoon, Saskatchewan. Stanescu T, Jans HS, Fallone BG.

Invited Lectures and Presentations

Degrees

1994/12 - 1996/5 Post-doctorate, Clinical Physics Residency, (Radiation Oncology Specialty), Ontario Cancer Institute
Degree Status: Completed
Thesis Title: Clinical Physics Residency (Radiation Oncology Specialty)
Areas of Research: Optics and Photonics
Research Disciplines: Physics
Fields of Application: Industrial Manufacturing and Production

1990/9 - 1994/11 Doctorate, (Medical) Physics, McMaster University
Degree Status: Completed
Thesis Title: Biophysical Studies of Pulsed Photothermal Radiometry in Tissues
Areas of Research: Optics and Photonics
Research Disciplines: Physics
Supervisors: Dr. Brian Wilson
Fields of Application: Industrial Manufacturing and Production

Degree Status: Completed
Thesis Title: Laser Characterization of semi and superconductor materials.
Areas of Research: Laser
Research Disciplines: Physics
Supervisors: Dr. Andreas Mandelis
Fields of Application: Industrial Manufacturing and Production
1981/9 - 1985/5
Bachelor's, B.A.Sc. Engineering Physics, Queen's University at Kingston
Degree Status: Completed
Thesis Title: Solar Energy Conversion via an MHD Generator.
Areas of Research: Laser
Research Disciplines: Physics
Fields of Application: Industrial Manufacturing and Production

Credits

2011/5
P01 Site Visitor and External Advisor, UBC / BCCA Molecular Imaging program, Vancouver, BC

2011/1
Conference Chair, European Conferences on Biomedical Optics (ECBO), Novel Biomedical Techniques & Applications, Munich

2011/1
Site Visitor, NIH P41 Program - Laser Biomedical Research Center, MIT, Boston

2010/1
Site Visitor, Dutch Health R&D Council ZonMW, the Hague

2009/7
SPIE and OSA International Visiting Lecturer, Optical Society of America and Society of Photo-Optical Instrumentation Engineers

2009/1
Visiting Professorship, Department of Physics, University of Cyprus, Nicosia
Biomedical Engineering / Biophotonics

2009/1
Travelling Lecturer Program, Optical Society of America (OSA - Washington, DC)
Ukraine, New Zealand

2008/1
NIH Study Section Member (NCI, NIBIB, NIDDK), ~25 panels since 2003, National Institutes of Health
NCI/NIBIB/NIDDK/NCRR (RO1, R21/R33, SBIR/STTR)

2008/1
Topical Editor, Optics Letters (OSA-Washington, DC)
Biomedical Optics - topical editor since 2007

2007/1
Guest Editor, Journal of Applied Physics (AIP - College Park, MD)
Special Issue on Biophysics (Fall, 2008)

Fields of Application: Biomedical Aspects of Human Health
Areas of Research: Optics and Photonics
Research Disciplines: Optometry

2007/1
The Intl Society for Optical Engineering, SPIE - Visiting Lecturer
Brazil, Russia, Mexico, Taiwan, Cyprus, Germany

Fields of Application: Biomedical Aspects of Human Health
Areas of Research: Optics and Photonics
Research Disciplines: Optometry

2007/1
CIHR Medical Physics & Imaging, Panel Member (2007-present), Canadian Institutes of Health Research
Panel Member, Natural Sciences and Engineering Research Council of Canada
Global Partnerships Program
Fields of Application: Biomedical Aspects of Human Health
Areas of Research: Optics and Photonics
Research Disciplines: Physics

5th International Photonics Summer School, Instituto Nacional de Astrofísica, Óptica y Electrónica
Guest Faculty
Fields of Application: Biomedical Aspects of Human Health
Areas of Research: Optics and Photonics
Research Disciplines: Physics

Annual Site Visitor and Panellist, Center for Integration of Medicine & Innovative Technology (CIMIT), Boston, MA
Annual Site Visitor

CCPM Medical Physics Board Certification (2000 - present), Canadian College of Physicists in Medicine
Radiation Oncology Physics

Conf on Biomedical Optics, Saratov
Guest Faculty, SFM
Fields of Application: Industrial Manufacturing and Production
Areas of Research: Optics and Photonics
Research Disciplines: Physics

CePOF Biophotonics Summer School, Universidade de Sao Paolo
Guest Faculty
Fields of Application: Pathogenesis and Treatment of Diseases
Areas of Research: Optics and Photonics
Research Disciplines: Physics

Task group member on Future of Radiation Medicine, Ministry of Health, Ontario
Radiation Oncology Physics
Fields of Application: Pathogenesis and Treatment of Diseases
Areas of Research: Laser
Research Disciplines: Radiology

Centennial Scholarship, McMaster University
Biophotonics
Fields of Application: Biomedical Aspects of Human Health
Areas of Research: Optics and Photonics
Research Disciplines: Physics

Recognitions

Princess Margaret Cancer Centre
Prize / Award
2012/1 Fellow
Society for Photo-optical Instrumentation Engineers (SPIE)
Distinction

2012/1 Fellow of SPIE and OSA
Optical Society of America and Society of Photo-Optical Instrumentation Engineers
Distinction

2011/11 Conference Chair
European Conferences on Biomedical Optics (ECBO), Novel Biomedical Techniques &
Applications, Munich
Distinction

2011/8 Site Visitor
NIH P41 Program - Laser Biomedical, Research Center, MIT, Boston, United States
Distinction

2010/11 Site Visitor
Dutch Health R&D Council ZonMw, the Hague, Netherlands
Distinction

2009/3 Visiting Professorship
Department of Physics, University of Cyprus, Nicosia, Cyprus
Distinction

2009/1 Conference Chair: Novel Biophotonic Techniques and Applications, Munich, Germany
European Conference on Biomedical Optics ECBO
Distinction

2008/8 Medical Physics & Imaging Panel
Canadian Institutes of Health Research
Distinction

2008/5 Study Section Member, ~25 panels since 2003
National Institutes of Health, United States
Distinction

2008/2 Topical Editor
Optics Letters (OSA-Washington, DC), United States
Distinction

2007/10 The Intl Society for Optical Engineering
SPIE - Visiting Lecturer, United States
Distinction

2007/9 - 2007/10 Conf on Biomedical Optics
Saratov, Russia
Distinction

2007/4 Visiting Lecturer
Society for Photo-optical Instrumentation Engineers (SPIE), Bellingham, USA
Distinction

2007/4 - 2007/5 CePOF Biophotonics Summer School
Universidade de Sao Paolo, Brazil
Distinction

2007/3 Guest Editor
Journal of Applied Physics (AIP - College mark, MD), United States
Distinction
Canadian College of Physicists in Medicine
Distinction

2005/1  5th International Photonics Summer School
Instituto Nacional de Astrofísica, Óptica y Electrónica, Mexico
Distinction

2004/2  Site Reviewer
Center for Integration of Medicine & Innovative Technologies (Boston, MA), United States
Distinction

2003/4 - 2008/4  Premier's Research Excellence Award
Province of Ontario
Prize / Award

2002/10 - 2003/10  Task group member on Future of Radiation Medicine (Ontario)
Ministry of Health, Ontario, Canada
Distinction

1992/3 - 1994/3  Steve Fonyo Ph.D. Studentship - 36,000 (Canadian dollar)
National Cancer Institute of Canada
Prize / Award

User Profile

Engaged in Clinical Research?: No
Research Interests: Biophysics; radiology/radiation biology/nuclear medicine; bioengineering; instrumentation; oncology; photonics; lasers; photobiology
Fields of Application: Biomedical Aspects of Human Health, Pathogenesis and Treatment of Diseases
Disciplines Trained In: Biomedical Engineering and Biochemical Engineering, Physics
Technological Applications: Medical equipment, Radiology / Imaging, Research equipment
Areas of Research: Cancer Diagnosis and Detection, Laser, Optics and Photonics, Radiotherapy
Research Specialization Keywords: biophotonics, functional imaging, medical physics, optical biophysics, optical coherence imaging, optical fiber sensors, optical polarization, photo-thermal therapy, radiation biophysics, radiation therapy
Research Disciplines: Biomedical Engineering and Biochemical Engineering, Physics, Radiology

Employment

Research Disciplines: Physics
Areas of Research: X-Rays
Fields of Application: Biomedical Aspects of Human Health

2007/4  Full Professor
Medical Biophysics & Radiation Oncology, University of Toronto, University of Toronto

2004/6  Senior Scientist
Ontario Cancer Institute

1997/1  Radiation Physicist
Princess Margaret Cancer Centre
2002/6 - 2007/4  Associate Professor  
Medical Biophysics & Radiation Oncology, University of Toronto, University of Toronto

1996/1 - 2004/6  Staff Scientist  
Ontario Cancer Institute

1997/3 - 2002/9  Director  
Radiation Physics Residency Program, Princess Margaret Cancer Centre

1998/1 - 2002/5  Assistant Professor  
Radiation Oncology, University of Toronto, University of Toronto

1994/1 - 1996/12  Resident  
Princess Margaret Cancer Centre

1990/1 - 1994/12  Visiting Researcher  
Massachusetts General Hospital

1985/1 - 1988/12  Scientist  
Xerox Research Centre of Canada

Affiliations
The primary affiliation is denoted by (*)

(*) 2004/6  Senior Scientist, University Health Network

Research Funding History

Awarded [n=5]

2012/11 - 2017/11  Principal Investigator  
Polarimetric Mueller Matrix Imaging in Multiply Scattering Inhomogeneous Birefringent Media

Funding Sources:
2012/11 - 2017/11  Natural Sciences and Engineering Research Council of Canada (NSERC)  
Discovery Grant (Individual)  
Total Funding - 204,000 (Canadian dollar)  
Funding Competitive?: Yes

2013/7 - 2017/7  Principal Investigator  
Development of Novel Optical Coherence Tomography Technologies for Personalized Cancer Medicine

Funding Sources:
2013/7 - 2017/7  Ministry of Education and Science, Russian Federation  
Leading Scientist Mega-Grant  
Total Funding - 3,000,000 (United States dollar)  
Funding Competitive?: Yes

Co-investigator: Gladkova, Natalia; Zagaynova, Elena

2012/5 - 2017/5  Principal Investigator  
Spectroscopic and Textural Optical Coherence Tomography for Structural and Functional Monitoring of Radiation Therapy Effects

Funding Sources:
2012/9 - 2017/9  Canadian Institutes of Health Research (CIHR)  
Operating Grant  
Total Funding - 500,960 (Canadian dollar)  
Funding Competitive?: Yes
Co-investigator: DaCosta, Ralph; Flueraru, Costel

2009/9 - 2012/8  Principal Investigator
Optical Coherence Tomographic Imaging for Monitoring Radiotherapy Complications in the Colon and Rectum

**Funding Sources:**
- 2009/9 - 2012/8  Natural Sciences and Engineering Research Council of Canada (NSERC)
-  Operating Grant Collaborative Health Research Program (CHRP)
-  Total Funding: 457,486 (Canadian dollar)
-  Funding Competitive?: Yes

Co-investigator: Bizheva, Kostadinka; Levin, Wilfred; Yang, Victor

2009/7 - 2012/7  Co-investigator
The Photo-acoustic Radar: Photo-thermo-acoustic Scanning Tomography (PHAST) for Early Assessment of Breast Cancer

**Funding Sources:**
- 2009/7 - 2012/7  Natural Sciences and Engineering Research Council of Canada (NSERC)
-  Operating Grant - Collaborative Health Research Program (CHRP)
-  Total Funding: 407,316 (Canadian dollar)
-  Funding Competitive?: Yes

Principal Investigator: MANDELIS, Andreas

**Completed [n=23]**

2007/4 - 2012/4  Principal Investigator
Spectral Turbid Polarimetry in Birefringent Multiply Scattering Chiral Media

**Project Description:** This research develops experimental and theoretical tools using polarized light to study random disordered media such as biological tissues with structural (birefringent) anisotropy, with potential applications to detection of chiral molecules such as glucose.

**Research Disciplines:** Physics

**Areas of Research:** Laser

**Fields of Application:** Biomedical Aspects of Human Health

**Funding Sources:**
- 2007/4 - 2012/4  Natural Sciences and Engineering Research Council of Canada (NSERC)
-  Operating Grant
-  Total Funding: 203,270 (Canadian dollar)
-  Funding Competitive?: Yes

2007/4 - 2012/3  Co-investigator
CIHR Team in Occlusive Vascular Disease

**Project Description:** The goal is to apply a variety of medical imaging technologies for characterization and intravascular therapeutic guidance of chronic total occlusions (CTO). If successful, patients with cardiovascular CTOs won't have to undergo open-heart bypass surgery, but may be treated with percutaneous angioplastic techniques.

**Research Disciplines:** Physics

**Areas of Research:** Laser

**Fields of Application:** Biomedical Aspects of Human Health
Funding Sources:
2007/4 - 2012/3 Canadian Institutes of Health Research (CIHR)
Operating (team) Grant
Total Funding - 6,809,920 (Canadian dollar)
Funding Competitive?: Yes

Principal Investigator : WRIGHT, Graham

2009/2 - 2012/1 Co-investigator
Probing the Temporal Dynamics of Tumor Cell Kill and Vascular Damage in Radiation Therapy using Optical Molecular Imaging Techniques
Project Description: The goal is the development of radiation therapy techniques for investigating tumor and vascular damage.
Research Disciplines: Radiology
Areas of Research: Optics and Photonics
Fields of Application: Pathogenesis and Treatment of Diseases
Funding Sources:
2009/2 - 2012/1 Canadian Institutes of Health Research (CIHR)
Operating Grant
Total Funding - 351,000 (Canadian dollar)
Funding Competitive?: Yes

Principal Investigator : DACOSTA, Ralph

2007/1 - 2011/12 Co-investigator
Facility for Advanced Bioacoustophotonics
Project Description: This facility will advance novel optical and acousto/electro-optical approaches for oncologic and microfluidic applications.
Research Disciplines: Optometry
Areas of Research: Optical Components, Optical Fibre
Fields of Application: Biomedical Aspects of Human Health
Funding Sources:
2007/1 - 2011/12 Canada Foundation for Innovation (CFI)
Infrastructure
Total Funding - 1,682,421 (Canadian dollar)
Funding Competitive?: Yes

Principal Investigator : MANDELIS, Andreas

2007/1 - 2010/12 Co-investigator
The Regenerative Medicine Project (REMDI)
Funding Sources:
2007/1 - 2010/12 Canada Foundation for Innovation (CFI)
Infrastructure
Total Funding - 7,200,000 (Canadian dollar)
Funding Competitive?: Yes

Principal Investigator : WEISEL, Richard

2005/3 - 2010/3 Principal Investigator
Endoscopic Doppler Optical Coherence Tomography for Gastrointestinal Imaging
Project Description: The goal is to measure and quantify simultaneous blood flow and microstructure of gastrointestinal tissues during human endoscopy. Research projects include incorporation of MEMS devices into a Doppler OCT system at the endoscope tip, and clinical studies in Barrett’s Esophagus patients.
Research Disciplines: Physics
Areas of Research: Laser
Fields of Application: Biomedical Aspects of Human Health

**Funding Sources:**

2005/3 - 2010/3  
Canadian Institutes of Health Research (CIHR)  
Operating Grant  
Total Funding - 575,500 (Canadian dollar)  
Funding Competitive?: Yes

### 2007/1 - 2010/1  
**Principal Investigator**

Optical Monitoring and Control of Focal Laser Thermal Therapy of Prostate Cancer

**Project Description:** The goal is to develop feedback control, based on interstitial optical measurements, for optimization, delivery, and verification of focal interstitial laser thermal therapy of prostate cancer.

**Research Disciplines:** Physics

**Areas of Research:** Prostate Cancer

**Fields of Application:** Pathogenesis and Treatment of Diseases

### 2003/4 - 2008/4  
**Principal Investigator**

Towards Cellular and Microvascular Subsurface Tissue Imaging Using Optical Coherence Tomography

**Project Description:** This research improves the science and engineering of optical coherence tomography (OCT), in order to increase its spatial and flow resolutions for in-vivo biomedical imaging.

**Research Disciplines:** Physics

**Areas of Research:** Laser

**Fields of Application:** Biomedical Aspects of Human Health

**Funding Sources:**

2003/4 - 2008/4  
Government of Ontario (Ottawa, ON)  
Operating Grant - Premier's Research Excellence Award  
Total Funding - 150,000 (Canadian dollar)  
Funding Competitive?: Yes

### 2005/5 - 2007/9  
**Principal Investigator**

Development and Applications of in vivo Doppler Optical Coherence Tomography

**Project Description:** The goal is core technology development of Doppler OCT and proof-of-principle demonstrations in interstitial, intravascular and ophthalmic scenarios.

**Research Disciplines:** Physics

**Areas of Research:** Optics and Photonics

**Fields of Application:** Biomedical Aspects of Human Health

**Funding Sources:**

2005/5 - 2007/9  
Ontario Center of Excellence (OCE)  
Operating Grant  
Total Funding - 200,000 (Canadian dollar)  
Funding Competitive?: Yes

### 2006/6 - 2007/6  
**Co-investigator**

Shared Spectroscopy Instrumentation for Biophotonics Research and Beyond

**Project Description:** This money will be used to purchase state-of-the-art absorption spectrometer / fluorimeter, with further in-house developments to enable enhanced polarimetry/integrating sphere measurements suitable for tissue optics.
Research Disciplines: Physics
Areas of Research: Laser
Fields of Application: Pathogenesis and Treatment of Diseases

Funding Sources:
2006/6 - 2007/6 Natural Sciences and Engineering Research Council of Canada (NSERC)
   Equipment Grant
   Total Funding - 65,000 (Canadian dollar)
   Funding Competitive?: Yes

Principal Investigator : LILGE, Lothar

2001/1 - 2006/12 Ontario Consortium for Image Guided Therapy and Surgery
Co-investigator
Project Description: The research goal of this large provincial consortium, with a
significant national/international industry matching component (33%), is to integrate novel
technological approaches into the current and upcoming therapeutic interventions.

Research Disciplines: Biology and Related Sciences
Areas of Research: Optics and Photonics
Fields of Application: Biomedical Aspects of Human Health

Funding Sources:
2001/1 - 2006/12 Ontario Research Development Challenge Fund (ORDCF)
   Operating (team) Grant
   Total Funding - 16,000,000 (Canadian dollar)
   Funding Competitive?: Yes

Principal Investigator : SHERAR, Michael

2002/4 - 2006/3 Spectral Polarization Studies in Multiply Scattering Chiral Media
Principal Investigator
Project Description: This research develops experimental and theoretical tools using
polarized light to study random disordered media such as biological tissues, with potential
applications to detection of chiral molecules such as glucose.

Research Disciplines: Physics
Areas of Research: Laser
Fields of Application: Pathogenesis and Treatment of Diseases

Funding Sources:
2002/4 - 2006/3 Natural Sciences and Engineering Research Council of Canada (NSERC)
   Operating Grant
   Total Funding - 145,600 (Canadian dollar)

Principal Investigator : Vitkin, Alex

2003/1 - 2005/12 Optical Monitoring and Control of Thermal Therapy for Recurrent Prostate Cancer
Co-investigator
Project Description: The goal is to develop feedback control, based on interstitial optical
measurements, for optimization, delivery, and verification of focal interstitial laser thermal
therapy of prostate cancer.

Research Disciplines: Physics
Areas of Research: Optics and Photonics
Fields of Application: Biomedical Aspects of Human Health
Funding Sources:
2003/1 - 2005/12 National Cancer Institute of Canada (NCIC)
Operating Grant
Total Funding - 225,500 (Canadian dollar)

Principal Investigator: WHELAN, W.M.; Vitkin, Alex

2003/12 - 2005/12
Broadband Tunable Optical Source for Biomedical Imaging using Optical Coherence Tomography
Project Description: The goal is to develop a practical, tunable broadband CW optical source for high-resolution OCT imaging.
Research Disciplines: Physics
Areas of Research: Laser
Fields of Application: Biomedical Aspects of Human Health

Funding Sources:
2003/12 - 2005/12 Natural Sciences and Engineering Research Council of Canada (NSERC)
Operating Grant - Collaborative Health Research Program
Total Funding - 336,000 (Canadian dollar)

Principal Investigator: TIEDJE, T; Vitkin, Alex

2002/4 - 2005/3
Optical Monitoring and Control of Thermal Therapy for Recurrent Prostate Cancer
Project Description: The goal is the development of a monitoring technology (based on interstitial optical measurements) and control strategy (based on fuzzy logic controller) to optimize the delivery of thermal therapy in prostate.
Research Disciplines: Physics
Areas of Research: Prostate Cancer
Fields of Application: Pathogenesis and Treatment of Diseases

Funding Sources:
2002/4 - 2005/3 National Cancer Institute of Canada (NCIC)
Operating Grant
Total Funding - 286,419 (Canadian dollar)

Principal Investigator: WHELAN, W.M.; Vitkin, Alex

2003/4 - 2005/3
Technologies and Applications for in-vivo Optical Diagnostics: Surgical Fluorescence Guidance and Endoscopic Optical Coherence Tomography
Project Description: Develop technologies and application for in vivo optical diagnosis, use of fluorescence guidance and endoscopic optical tomography in surgery.
Research Disciplines: Physics
Areas of Research: Optics and Photonics
Fields of Application: Pathogenesis and Treatment of Diseases

Funding Sources:
2003/4 - 2005/3 Ontario Center of Excellence (OCE)
Operating Grant
Total Funding - 239,200 (Canadian dollar)

Principal Investigator: WILSON, Brian C.; Vitkin, Alex

2001/4 - 2004/3
Optical Coherence Microscopy for in-vivo Skin and Endoscopic Gastrointestinal Imaging

Principal Investigator
Project Description: The goal of this work was to build a clinical OCT imaging system and perform dermatological and GI endoscopic studies, for disease characterization and treatment response monitoring.

Research Disciplines: Physics

Areas of Research: X-Rays

Fields of Application: Pathogenesis and Treatment of Diseases

Principal Investigator: Vitkin, Alex

**Co-investigator**

**2002/4 - 2004/3**

Opto-Acoustic Imaging in Turbid Biological Media

Project Description: This work deals with the biomedical applications of frequency-domain photo-acoustic imaging, specifically technique development to enable detection of deep-seated tumours and to monitor treatment progression.

Research Disciplines: Physics

Areas of Research: Laser

Fields of Application: Pathogenesis and Treatment of Diseases

**Funding Sources:**

Principal Investigator: MANDELIS, Andreas; Vitkin, Alex

**Co-investigator**

**2001/4 - 2003/3**

Technologies and Applications for in-vivo Clinical Diagnostics

Project Description: The goal of this research is to bring several biophotonics technologies into the clinic, focussing on the development of fluorescence, Raman, and optical coherence tomography endoscopic systems for GI studies.

Research Disciplines: Physics

Areas of Research: Cancer Diagnosis and Detection

Fields of Application: Pathogenesis and Treatment of Diseases

Principal Investigator: WILSON, Brian C.; Vitkin, Alex

**Co-investigator**

**2002/1 - 2002/12**

Facility for Fundamental Biophysics Research and Development of Minimally Invasive Therapies

Project Description: This facility will house state-of-the-art technologies to monitor, guide, and control cancer thermal therapies such as opto-acoustic imager, interstitial fluence/radiance monitoring system, and fuzzy logic controller.

Research Disciplines: Physics

Areas of Research: Cancer Diagnosis and Detection

Fields of Application: Pathogenesis and Treatment of Diseases
Funding Sources:
2002/1 - 2002/12  Canada Foundation for Innovation (CFI)
Infrastructure Grant
Total Funding - 612,416 (Canadian dollar)

Principal Investigator : WHELAN, W.M.; Vitkin, Alex

1999/4 - 2001/3
Treatment Optimization and Control of Interstitial Thermal Therapy for Prostate Cancer
Co-investigator

Project Description: The goal of this work was to compare and optimize the different modalities for interstitial thermal coagulation, including laser, microwave, and ultrasound applicators.

Research Disciplines: Radiology
Areas of Research: Prostate Cancer
Fields of Application: Pathogenesis and Treatment of Diseases

Funding Sources:
1999/4 - 2001/3  National Cancer Institute of Canada (NCIC)
Operating Grant
Total Funding - 305,500 (Canadian dollar)

Principal Investigator : SHERAR, M.D.; Vitkin, Alex

1997/4 - 2001/3
Optical Polarization Studies in Multiply Scattering Chiral Media
Principal Investigator

Project Description: This research aims to understand the fundamental physics and biophysics of polarized light interaction with scattering media with and/or without chiral molecules such as glucose.

Research Disciplines: Physics
Areas of Research: Optics and Photonics
Fields of Application: Biomedical Aspects of Human Health

Funding Sources:
1997/4 - 2001/3  Natural Sciences and Engineering Research Council of Canada (NSERC)
Operating Grant
Total Funding - 92,400 (Canadian dollar)

Principal Investigator : Vitkin, Alex

2000/1 - 2000/12
High-Resolution Optical Coherence Microscopy System
Principal Investigator

Project Description: The goal of this work was to design, build, and characterize the biomedical performance of a high-resolution, multiple-channel optical coherence tomography (OCT) system suitable for subsurface tissue imaging.

Research Disciplines: Physics
Areas of Research: Optics and Photonics
Fields of Application: Biomedical Aspects of Human Health

Funding Sources:
2000/1 - 2000/12  Natural Sciences and Engineering Research Council of Canada (NSERC)
Equipment Grant
Total Funding - 106,692 (Canadian dollar)

Principal Investigator : Vitkin, Alex
Early Diagnosis and Targeted Therapies of Lung Cancer

Project Description: The goals of this project grant are to discover novel, lung-cancer-specific biomarkers and novel therapeutic targets, while simultaneously developing noninvasive early diagnostic tools and targeted therapies to impact on the lung cancer burden.

Research Disciplines: Radiology

Areas of Research: Lung Cancer

Fields of Application: Industrial Manufacturing and Production

Funding Sources:

2010/2 - 2013/1 National Cancer Institute of Canada (NCIC)
Operating (team) Grant
Total Funding - 4,411,930 (Canadian dollar)
Funding Competitive?: Yes

Principal Applicant : TSAO, Ming

Biophysical Studies of Microwave-, Ultrasound-, and Laser-induced Thermal Lesions: Application to Minimally Invasive Thermal Therapy

Project Description: The goal of this grant was to investigate the biophysics of thermal lesion formation as induced by different energy sources.

Research Disciplines: Physics

Areas of Research: Laser

Fields of Application: Biomedical Aspects of Human Health

Funding Sources:

1996/4 - 1999/3 National Cancer Institute of Canada (NCIC)
Operating Grant
Total Funding - 157,500 (Canadian dollar)

Principal Investigator : SHERAR, M.D.; Vitkin, Alex

Optical Coherence Reflectometry Development for Gastrointestinal Endoscopic Imaging

Project Description: The goal of this work was to design a bench-top free space OCT imaging system.

Research Disciplines: Physics

Areas of Research: Laser

Fields of Application: Biomedical Aspects of Human Health

Funding Sources:

1998/1 - 1998/12 University of Toronto
Connaught New Staff Matching Grants
Total Funding - 30,000 (Canadian dollar)
Principal Investigator : Vitkin, Alex

1992/1 - 1994/1, Fellowship

**Funding Sources:**

- 1992/1 - 1994/1 National Cancer Institute of Canada
- Steve Fonyo Ph.D. Studentship
- Total Funding - 36,000

1990/1 - 1992/1, Fellowship

**Funding Sources:**

- 1990/1 - 1992/1 NSERC
- Post Graduate
- Total Funding - 32,000

1988/1 - 1989/1, Fellowship

**Funding Sources:**

- 1988/1 - 1989/1 Ontario Laser & Lightwave Research Centre
- Total Funding - 30,000

---

**Student/Postdoctoral Supervision**

**Master’s Thesis [n=7]**

**Co-Supervisor** Burgess, Laura (In Progress) , University of Toronto
- Student Degree Start Date: 2012/9
- Project Description: OCT imaging of oral cancer PDT treatments
- Present Position: MSc Student

**Co-Supervisor** Lloyd, Brendan (Completed) , Odette Cancer Centre
- Student Degree Start Date: 2005/9
- Student Degree Received Date: 2008/1
- Project Description: Optical fiber sensors for laser thermal therapy monitoring
- Present Position: Research Associate

**Principal Supervisor** Sarah Forward (In Progress) , University of Toronto
- Student Degree Start Date: 2015/9
- Thesis/Project Title: “Tissue polarimetry for fast in-vivo tissue measurements”
- Present Position: MSc Student

**Principal Supervisor** Weatherbee, Andrew (In Progress) , University of Toronto
- Student Degree Start Date: 2012/9
- Thesis/Project Title: “M-mode OCT for blood viscosity quantification and glucose monitoring”
- Project Description: M-mode OCT for blood viscosity quantification and glucose monitoring
- Present Position: MSc Student

**Principal Supervisor** Lindenmaier, Andras (In Progress) , University of Toronto
- Student Degree Start Date: 2011/9
- Thesis/Project Title: Spectroscopic and textural optical coherence tomography for early radiobiological effects detection in irradiated tissues
- Project Description: Spectroscopic and textural optical coherence tomography for early radiobiological effects detection in irradiated tissues
- Present Position: MSc Student
2010/9 - 2012/8
Leigh Conroy (Completed), University of Toronto
Principal Supervisor
Thesis/Project Title: Shedding light on radiotherapy: optical coherence and fluorescence monitoring of early radiobiological vascular effects in irradiated tissues
Present Position: Graduated

2008/9 - 2010/8
Archambault-Wallenburg, Marika (Completed), McGill University
Principal Supervisor
Student Degree Start Date: 2008/9
Student Degree Received Date: 2010/9
Thesis/Project Title: Turbid polarimetry and 2nd harmonic generation microscopy for measuring tissue anisotropy
Project Description: Turbid polarimetry and 2nd harmonic generation microscopy for measuring tissue anisotropy
Present Position: PhD

Doctorate [n=14]
Ashraf, Sumara (In Progress)
Principal Supervisor
Student Degree Start Date: 2013/9
Project Description: Speckle-variance OCT for viscosity contrast enhancement and glucose quantification

Damodaran, Vani (Completed)
Principal Supervisor
Student Degree Start Date: 2012/9
Student Degree Received Date: 2013/3
Project Description: Microvascular analysis of OCT images from late radiation toxicity patients

Ullah, Hafeez (Completed), Islamabad, Pakistan
Principal Supervisor
Student Degree Start Date: 2010/9
Student Degree Received Date: 2011/3
Project Description: Speckle-variance OCT for viscosity-based contrast enhancement and tissue microvascular imaging
Present Position: PhD Student

Ahmad, Manzoor (Completed), Islamabad, Pakistan
Principal Supervisor
Student Degree Start Date: 2010/9
Student Degree Received Date: 2011/3
Project Description: Refractive index profiles of multiply scattering media: effects on polarimetric investigations of tissue
Present Position: PhD Student

Munce, Nigel (Completed), McMaster University
Principal Supervisor
Student Degree Start Date: 2002/1
Student Degree Received Date: 2009/1
Project Description: OCT and MR for vascular imaging
Present Position: Medical School

Demidov, Valentin (In Progress), University of Toronto
Principal Supervisor
Student Degree Start Date: 2013/9
Thesis/Project Title: “Vascular OCT for radiotherapeutic quantification”
Project Description: Vascular OCT for radiotherapeutic quantification
Present Position: PhD Student

Gribble, Adam (In Progress), University of Toronto
Principal Supervisor
Student Degree Start Date: 2012/9
Thesis/Project Title: “Tissue polarimetry for extracellular matrix anisotropy measurements”
Project Description: Tissue polarimetry for extracellular matrix anisotropy measurements.
Present Position: PhD Student

1999/9 - 2008/8

Chin, Lee (Completed) , Odette Cancer Centre
Student Degree Start Date: 1999/9
Student Degree Received Date: 2008/10
Thesis/Project Title: "Optical fluence and radiance measurements for prostate laser photo-coagulation: treatment monitoring and control"
Project Description: Optical fluence measurements for prostate laser photo-coagulation: treatment monitoring and control
Present Position: Radiation Physicist, Odette Cancer Centre, Toronto

Post-doctorate [n=8]

Principally Sponsored: Yu (George) Liu, (Completed), Gen Photonics Corp
Student Degree Start Date: 2006/3
Student Degree Received Date: 2008/1
Project Description: Development of a frequency-swept Doppler OCT system for bioimaging
Present Position: Scientist

Principally Sponsored: Jafari Shapoorabadi Reza (Completed), Tehran University
Student Degree Start Date: 2004/9
Student Degree Received Date: 2005/9
Project Description: MEMS/Doppler OCT tip design
Present Position: Faculty

Principally Sponsored: Mao Linda (Completed), NRC, Ottawa
Student Degree Start Date: 2003/9
Student Degree Received Date: 2006/8
Project Description: Optical fiber sensors and probes for interstitial Doppler OCT
Present Position: Research Scientist

Principally Sponsored: Qi Bing (Completed), U of Toronto
Student Degree Start Date: 2002/9
Student Degree Received Date: 2004/3
Project Description: High-resolution Optical Coherence Tomography (OCT) system: MEMS-enabled dynamic focus tracking
Present Position: Junior Faculty

Principally Sponsored: Katz Sharon (Completed), U of Windsor
Student Degree Start Date: 1999/9
Student Degree Received Date: 2001/8
Project Description: OCT characteristics in model systems: spheroid and cell suspension studies
Present Position: Junior Faculty

2015/6

Mitsuro Sugita (In Progress), University of Toronto
Student Degree Start Date: 2015/8
Thesis/Project Title: "OCT speckle statistics, flow and Brownian motion parameters"
Present Position: Postdoctoral Fellow

2007/10

Ghosh, Nirmalya (Completed), University of Toronto
Student Degree Start Date: 2007/1
Student Degree Received Date: 2010/1
Thesis/Project Title: "Mueller matrix polarimetry in bulk biological tissues"
Project Description: Mueller matrix decomposition for extracting intrinsic biophysical parameters from tissue polarimetry
Present Position: Professor, Calcutta, India
2002/9 - 2004/8
Principal Supervisor
Cote, Daniel (Completed), University of Toronto
Student Degree Start Date: 2002/9
Student Degree Received Date: 2004/9
Thesis/Project Title: "Modeling and measurements of polarized light propagation in turbid media"
Project Description: Modeling and measurements of polarized light propagation in turbid media
Present Position: Associate Professor, University of Laval (Canada Research Chair)

Level Not Specified [n=8]
- 2007/2
Principal Supervisor
Guo, Xin Xin (Completed)
Student Degree Start Date: 2005/9
Student Degree Received Date: 2007/2
Thesis/Project Title: Optical polarization effects in biomedicine-measuring scattered light effects for tissue characterization
Areas of Research: Laser
Research Disciplines: Physics
Fields of Application: Industrial Manufacturing and Production
Co-Supervisor
Lloyd, Brendan (In Progress)
Student Degree Start Date: 2005/9
Thesis/Project Title: Optical fiber sensors for laser thermal therapy monitoring
Areas of Research: Laser
Research Disciplines: Physics
Fields of Application: Industrial Manufacturing and Production
Principal Supervisor
Mariampillai, Adrian (In Progress)
Student Degree Start Date: 2005/9
Thesis/Project Title: Frequency domain Doppler optical coherence tomography for bioimaging
Areas of Research: Laser
Research Disciplines: Physics
Fields of Application: Industrial Manufacturing and Production
- 2005/9
Principal Supervisor
Shapoorabadi, Reza Jafari (Completed)
Student Degree Start Date: 2004/9
Student Degree Received Date: 2005/9
Thesis/Project Title: MEMS/Doppler OCT tip design
Areas of Research: Laser
Research Disciplines: Physics
Fields of Application: Industrial Manufacturing and Production
Co-Supervisor  Rink, Alexandra (In Progress)
Student Degree Start Date: 2003/1
Thesis/Project Title: Radiation dosimeters using fiber optic read-out
Project Funding Sources: National Cancer Institute of Canada (NCIC)
Areas of Research: Laser
Research Disciplines: Physics
Fields of Application: Industrial Manufacturing and Production

Principal Supervisor  Spirou Gloria (Completed), Detroit, USA
Student Degree Start Date: 2002/9
Student Degree Received Date: 2005/9
Project Description: Monitoring changes in tissue opto-acoustic properties during and following thermal therapies
Present Position: Medical Physicist

Principal Supervisor  Gordon Maggie (Completed), Ottawa
Student Degree Start Date: 1999/9
Student Degree Received Date: 2004/9
Project Description: OCT and Doppler OCT: compensation methods for high-resolution imaging, treatment monitoring of radiation therapy
Present Position: Medical Student

Co-Supervisor  Iizuka Megumi (Completed), U of Toronto
Student Degree Start Date: 1996/9
Student Degree Received Date: 1998/6
Project Description: Optical & thermal modelling for laser thermo-therapy
Present Position: MSc student

Presentations

1. (2014). Diagnostic Photomedicine: Light for Biomedical Uses. National University of Ireland, Galway, Ireland
   Main Audience: Researcher
   Invited?: Yes

   Main Audience: Researcher
   Invited?: Yes

3. (2014). Plenary address. OSA Europe Annual Congress, Prague, Czech Republic
   Main Audience: Researcher
   Invited?: Yes

   Main Audience: Researcher
   Invited?: Yes

   International Symposium on Topical Problems in Biophotonics, Nizhny Novgorod, Russian Federation
   Main Audience: Researcher
   Invited?: Yes
Main Audience: Researcher

1. EDUCATION

Degrees
1988 - 1994 PhD, Chemical Physics, Chemistry, University of Toronto, Supervisor(s): Dr. S.C. Wallace
1984 - 1988 BSc, Chemistry, Western University

Postgraduate, Research and Specialty Training
2009 - 2011 Resident, Physics, Clinical Physics Residency Program, Department of Radiation Oncology, University of Toronto

Qualifications, Certifications and Licenses
2012 - present Member (CCPM certification), Radiation Oncology, Canadian College of Physicists in Medicine, Montreal, Canada

2. EMPLOYMENT

Current Appointments
2012 - present Affiliated Faculty, Techna Institute, University Health Network, Toronto
2008 - present Adjunct Professor, Department of Physics, Ryerson University, Toronto, Ontario

Previous Appointments
RESEARCH
2004 - 2006 Director of Operations, Laboratory for Applied Biophotonics, Ontario Cancer Institute, University Health Network
Robert A. WEERSINK

2002 - 2004  Director of Operations, Biophotonics Facility, Photonics Research Ontario, Ontario Cancer Institute
1997 - 2002  Senior Staff Scientist, Biophotonics Facility, Photonics Research Ontario, Ontario Cancer Institute
1996 - 1998  Research Associate/Lab Manager, Department of Medical Biophysics, Hamilton Regional Cancer Centre, Hamilton

3. HONOURS AND CAREER AWARDS

Distinctions and Research Awards

NATIONAL

Received

1988 - 1993  Postgraduate Scholarship, Natural Sciences and Engineering Research Council of Canada (NSERC). (Distinction)
1987  Summer Research Award, Natural Research Council, Steacie Institute. (Research Award)

LOCAL

Received

2010  J.R. Cunningham Award for Academic Excellence in Research by a Physics Trainee, Department of Radiation Oncology, University of Toronto. (Research Award)

4. PROFESSIONAL AFFILIATIONS AND ACTIVITIES

Professional Associations

2011 - present  Member, Canadian Organization of Physics in Medicine

Peer Review Activities

C. Academic Profile

1. RESEARCH STATEMENTS

2010 - present Integration of non-volumetric spatially localized information with volumetric imaging. Radiological imaging is the primary dataset used in planning and guiding procedures in image-guided surgery, radiation therapy and interventional radiology, providing exact spatial information of disease location. Non-volumetric information, such as endoscopy and pathology also provide important clinical information that is typically disconnected from the spatial mapping provided by the radiological imaging. We are developing methods of spatially mapping and integrating this non-volumetric information with the standard radiological imaging as an aid in image-guided surgery and radiation treatment planning and response monitoring.

2009 - present Integrating Functional Optical Imaging with a Small Animal Imaging Irradiation Device. We have integrated optical imaging with an existing image-guided small animal irradiator system, for the acquisition of planar and tomographic optical data. This integration enables accurate registration of high resolution anatomical imaging provided by the on-board cone-beam computed tomography and functional imaging provided by the optical imaging. The registration provides improved targeting of the radiation treatment and offers longitudinal tracking of tumor response of small animal models treated using the system. Future developments include the addition of fluorescence imaging and inter-fraction response monitoring using the optical imaging.

2001 - present Treatment Planning and Response monitoring of locally ablative therapies. Focal treatments localized to a visible tumour site through image-guided procedures have been developed for indications varying from prostate (photothermal and photodynamic), liver (radio frequency ablation) and lung (photothermal and radiofrequency). Successful application of these therapies requires improved methods of treatment planning (to ensure accurate targeting of the target volume) and response monitoring (to ensure complete treatment). We have been developing advanced methods of treatment planning for these therapies, using techniques and approaches applied in radiation therapy. We have developed image-guided delivery methods for prostate (using ultrasound and MRI) and lung (based on CT imaging and co-registered endoscopic navigation). We are also developing optically-based methods for response monitoring in these indications, including the use of diffuse optical tomography and photoacoustic methods.
D. Research Funding

1. GRANTS, CONTRACTS AND CLINICAL TRIALS

PEER-REVIEWED GRANTS

FUNDED

NON-PEER-REVIEWED GRANTS

FUNDED

2006 - 2008  Whole mouth illumination device for periodontal PDT. Pharos, Guelph, ON. [Industrial Grants]

2005  Specification tests on prototype device for treating acne bacteria. Pharos, Guelph, ON. [Industrial Grants]

1999 - 2000  Prototyping of next generation research instrument. Fona Canada ULC. [Industrial Grants]

1. EDUCATION

Degrees
1993 PhD, Medical Biophysics, Western University, Canada
1988 MSc, Physics, The University of Manitoba, Canada
1985 BSc, (Hon), Geophysics, The University of Manitoba, Canada

Postgraduate, Research and Specialty Training
1993 Jul - 1995 Nov Clinical Physics/ Medical Physics Residency, Princess Margaret Hospital

Qualifications, Certifications and Licenses
2012 Jul Fellowship, Canadian College of Physicists in Medicine
2007 Certificate, UNH-Rotman Leadership Program, University of Toronto, Canada
2006 Jun - 2012 Jul Membership, Canadian College of Physicists in Medicine
1996 Feb Ontario Medical Physicist Peer Review A passed, Cancer Care Ontario, Ontario, Canada

2. EMPLOYMENT

Current Appointments
2010 - present Associate Head, Princess Margaret Cancer Centre, Toronto
2010 - present Radiation Safety Officer, Stronach Regional Cancer Centre
2008 - present Head of Medical Physics, Dept of Medical Physics, Stronach Regional Cancer Centre
-Led a team of physic to commission and maintain the a new radiation therapy facility (Stronach Regional Cancer Centre or SRCC) at Southlake Regional Health Centre
Newmarket

2007 - present  Adjunct Professor, Department of Physics, Ryerson University, Canada
1998 - present  Assistant Professor, Radiation Oncology, University of Toronto, Canada

Previous Appointments

HOSPITAL

2006 - 2010  Senior Physicist, Dept of Radiation Physics, Princess Margaret Hospital, Toronto
2000 - 2008  Lead Physicist, Brachytherapy Program, Radiation Medicine Program, Princess Margaret Hospital, Toronto
   - Led a team of 7 professionals (including 3 physicists, 5 therapists, and 2 physics associate)
   in the Brachytherapy program which includes LDR, HDR, PDR, Prostate Implants, Eye Plaque Implants Treatment and Intravascular Brachytherapy

1999 - 2000  Brachytherapy Physics Group Leader, Dept. of Radiation Physics, Princess Margaret Hospital, Toronto
   - Led a team of 3 physicists in the Brachytherapy program which includes LDR, HDR, PDR, Prostate Implants and Eye Plaque Implants Treatment

1996 - 1999  Staff Physicist, Dept. of Clinical Physics, Princess Margaret Hospital, Toronto
   - In charge of the three electronic portal imaging units. They are Philips, Varian and Infimed, 1995-1999.

UNIVERSITY

1991 - 1993  Computer Application Tutor (part-time), Computer Based Learning Centre, Western University
1988 - 1993  Teaching Assistant (part-time), Dept. of Physics, Western University
1985 - 1988  Teaching Assistant (part-time), Physics, The University of Manitoba
1983 - 1984  Research Assistant (part-time), Geological Sciences, The University of Manitoba
1983        Research Assistant, Geological Sciences, The University of Manitoba

OTHER

1985  Summer Student Geophysicist, Texaco Canada, Calgary
1984  Summer Student Geophysicist, Texaco Canada, Calgary

3. HONOURS AND CAREER AWARDS

Distinctions and Research Awards

INTERNATIONAL

Received

2007 Jul  The John S. Laughlin Science Council Research Symposium Presentation, American Association of Medical Physicists. (Distinction)
2000 May  Clifford C. Snyder Research Award, Plastic Surgery Research Council Annual Meeting, Seattle, Washington. (Research Award)
   (O'Donovan D.A et al.).
2000 May  The Shenaq International Research Award, Plastic Surgery Research Council Annual Meeting, Seattle, Washington. (Research Award)
   (O'Donovan D.A et al.).
1984 - 1985  Scholarship, Society of Exploration Geophysicist. (Distinction)
4. PROFESSIONAL AFFILIATIONS AND ACTIVITIES

Professional Associations

2006 - present  American Association of Physicists in Medicine
2005 - present  American Brachytherapy Society
1990 - present  Canadian Organization of Medical Physicists
1989 - 2001  American Association of Physicists in Medicine

Administrative Activities

NATIONAL

Canadian Organization of Medical Physicists
2001 - 2006  Member, Communications Committee
1994  Member, Annual Meeting, Local Organizing Committee
PROVINCIAL / REGIONAL

Cancer Care Ontario
2013 Nov - present Capital Replacement Evaluation Committee, Ontario, Canada.
2009 Sep - present Provincial Physics Advisory Committee, Ontario, Canada.
1997 Member, Biennial Cancer Research Conference, Medical Physics Session Organizing Committee

LOCAL

Dept of Radiation Oncology, University of Toronto
2012 Jan 1 - present Physics Residency Committee, Faculty of Medicine, Dept of Radiation Oncology, Toronto, Ontario, Canada.

Princess Margaret Hospital
2007 - present Member, Radiation Physics Leadership Committee, Radiation Medicine Program
2007 - 2010 Member, Radiation Physics Operation Committee, RMP
2003 - 2007 Member, Radiation Physics Steering Committee, RMP
2002 - 2005 Member, Radiation Physics Operation Committee, RMP
2000 - 2008 Member, Radiation Safety – Radiation Treatment Committee
2000 - 2008 Member, Brachytherapy Radiation Safety Committee, RMP
2000 - 2002 Member, Radiation Physics Management Committee, RMP
1999 - 2000 Member, LDR Purchase Committee, RMP
1998 - 1999 Member, Research Planning Committee, Radiation Services
1998 - 1999 Member, CT Simulator Search Committee, RMP
1997 Member, Strategic Planning Research Committee, Radiation Services

Stronach Regional Cancer Centre
2008 - present Member, RMP Steering Committee

University of Toronto
2006 May - 2008 Oct Member, Advisory Committee for Andrea Para, M.Sc. Candidate
2003 Mar - 2005 Sep Member, Advisory Committee for Aimee Langan, M.Sc. Candidate

1. GRANTS, CONTRACTS AND CLINICAL TRIALS

PEER-REVIEWED GRANTS

FUNDED

2009  Principal Investigator. Equipment Funding. Ontario Institute for Cancer Research. 7,500 CAD. [Grants]
2008 - 2010  **Co-Principal Investigator.** Tumor Perfusion Assessment Tool. Ontario Institute for Cancer Research. Clinical Trials Platform. 262,300 CAD. [Grants]
*Co-Principal Investigator of subproject.*

2008 - 2009  **Principal Investigator.** Dynamic Contrast Enhanced Breast CBCT. Ontario Institute for Cancer Research. 1 mm Challenge. 25,000 CAD. [Grants]
*Principal Investigator of subproject.*

*PI of Project 4 - $605,150.*

2002 - 2005  **Co-Investigator.** Flat-Panel Cone-Beam CT for Image-Guided Radiotherapy. National Institutes of Health (NIH) (USA). 575,000 USD. [Grants]

2002 - 2004  **Co-Investigator.** To Investigate The Role Of MR Spectroscopy In Prostate Brachytherapy In Terms Of Optimization Of Implant Planning And Follow-Up Of Prostate Cancer Resolution Over Time. Canadian Association of Radiation Oncologists (CARO). ACURA. 26,000 CAD. [Grants]

**NON-PEER-REVIEWED GRANTS**

**Funded**

2007  **Principal Investigator.** Dynamic Contrast Enhanced Cone-Beam CT Imaging for the Breast. Princess Margaret Hospital Foundation (The). Weekend Walkers Breast Cancer Innovation Fund Grant. 72,250. [Grants]

2006 - 2007  **Co-Investigator.** Study of edema and dosimetry post prostate brachytherapy with stranded seeds. BrachySciences (USA). 55,000. [Grants]

2002 - 2004  American College of Surgeons Oncology Group. Z0070. [Clinical Trials]
*Radiation Physicist.*

2001 - 2004  **Principal Investigator.** Intraoperative Dosimetry System for Prostate Seed Implant. Amersham Health Corp. 60,000. [Grants]
*Amount awarded for subproject “Functional CT Development” – Principle Investigator of this subproject.*

2000 - 2002  Radiation Therapy Oncology Group. P0019. [Clinical Trials]
*Radiation Physicist.*

1996 - 1998  Collaborative Ocular Melanoma Study. [Clinical Trials]
*Radiation Physicist.*

Book Chapters

E. Presentations and Special Lectures

1. INTERNATIONAL

Invited Lectures and Presentations

2012 Aug 3  Invited Speaker. Evolving Technologies in Radiation Therapy. Department of Physics, Chinese University of Hong Kong. Hong Kong.

2008 May  Session Moderator. World Congress of Brachytherapy. Boston.

2007 Jan 4  Functional CT in Cancer Therapies. Tuen Mun Hospital. Hong Kong.
2007 Jan 2  LDR Prostate Brachytherapy Program at Princess Margaret Hospital. Queen Elizabeth Hospital. Hong Kong.

Presented Abstracts

2007 Jul  The John S. Laughlin-Science Council Research Symposium, 49th Annual Meeting of the AAPM. Minneapolis, United States.

2. NATIONAL

Invited Lectures and Presentations

Presented Abstracts

3. PROVINCIAL / REGIONAL

Invited Lectures and Presentations

Presented Abstracts

2012 Hypoxia Imaging in Cervix Carcinoma with PET-FAZA. ImNO. Ivan Yeung, Sunmo Kim, Nicolas Gonzalez, David Green, Doug Vines, Stephen Breen, David Jaffray and Michael Milosevic.

4. LOCAL

Invited Lectures and Presentations

2006 May Imaging Hypoxia- Functional CT. Target Insight II Symposium, Dept of Radiation Oncology, University of Toronto. Toronto.

Presented Abstracts

F. Research Supervision

1. PRIMARY OR CO-SUPERVISION

Postdoctoral Research Fellow (PhD)

2007 May - 2010 Mar
Primary Supervisor. Q. Tang.
2007 May - 2009 Sep
Primary Supervisor. R. Clarkson.
2005 Sep - 2007 Aug
Primary Supervisor. B. Qian.
2005 Jan - 2005 Oct
Primary Supervisor. S. Zhang.
2002 Oct - 2007 Aug
Primary Supervisor. B. Lim.
2002 Oct - 2004 Sep
Primary Supervisor. D. Chen.
2000 Oct - 2003 Mar
Primary Supervisor. J. Darko.
1999 Oct - 2000 Aug
Primary Supervisor. V. Zeman.
1999 May - 2000 Jun
Primary Supervisor. T. S. Koh.

Other
2008 May - 2008 Aug
Primary Supervisor. Mariam Syed.
2007 Jun - 2007 Aug
Primary Supervisor. Sam Chen.
2007 May - 2007 Aug
Primary Supervisor. Jonathan Zhao.
2007 May - 2007 Jul
Primary Supervisor. Martin Esche.
2006 Jun - 2006 Aug
Primary Supervisor. Martin Esche.
2006 May - 2007 Aug
Primary Supervisor. Wendy Lin.
2006 May - 2006 Aug
Primary Supervisor. Sam Chen.
2005 Jul - 2005 Aug
Primary Supervisor. B. Lee.
2005 Jun - 2005 Aug
Primary Supervisor. Sam Chen.
2004 May - 2004 Aug
Primary Supervisor. Angela Ng.
2003 May - 2003 Aug
Primary Supervisor. Badrinath Narayan.
2000 May - 2000 Dec
Primary Supervisor. Thao Tran.
1999 Jan - 1999 Apr
Primary Supervisor. G. Sanmugasuntharam.
1998 Sep - 1998 Dec
Primary Supervisor. David Chorney.

1. EDUCATION

Degrees
Sep.1997 – July,2001 Ph.D, Medical Physics, Tuebingen University, Germany/Sichuan University, China
Supervisor(s): Prof. Dr. Fridjof Nuesslin & Prof. Zhengming. Luo

Postgraduate, Research and Specialty Training
Supervisor(s): Dr. Norman Klassen & Dr. Dave Rogers

Qualifications, Certifications and Licenses
Certifications: CCPM

2. EMPLOYMENT

Current Appointments
Nov. 2006– Medical Physicist, the Credit Valley Hospital and Trillium Health Center, Mississauga, ON Canada

Previous Appointments
May 2004– Nov.2006 Clinical Physicist resident, PMH, UHN, Toronto, ON Canada
Dec 2003– May 2004 Research Associate, National Research Council of Canada, Ottawa, Canada
3. HONOURS AND CAREER AWARDS

Student/Trainee Awards

Dec 2001 – Dec 2003 NSERC postdoc. fellowship, Canada
Mar. 1999 – Mar. 2001 fortuene scholarship, Germany

Professional Associations

July 2002 – AAPM full member #22923
July 2010 – COMP member

Peer Review Activities

MANUSCRIPT REVIEWS

2011– Journal of Applied clinical Medical Physics
2009– Radiotherapy and Oncology
2008– Journal of Medical Dosimetry

C. Academic History

1. RESEARCH STATEMENTS

Dec. 2010 – Rectal toxicity control in GU treatment planning and delivery
Sept. 2009 – Automation of VMAT treatment planning and systematic quality control
July 2004 – IMRT and IGRT
Dec. 2001 – Radiation dosimetry

2. RESEARCH AWARDS

GRANTS IN APPLICATION PROCESS

Varian Research collaboration grants: Systematic quality control in treatment planning using dose-volume review program
Principal investigator: Grace Zeng, Collaborators: Miller MacPherson, Xia Wu, Tom McGowan,

Current Appointments
2010 - present Assistant Professor, Radiation Oncology, Faculty of Medicine, University of Toronto, Toronto, Ontario, Canada
2009 - present Staff Physicist - Treatment Planning Lead, Radiation Medicine Program, Stronach Regional Cancer Centre, Newmarket, Ontario, Canada
2006 - present Staff Physicist, Radiation Medicine Program, Radiation Physics Department, Princess Margaret Hospital, Toronto, Ontario, Canada
3. HONOURS AND CAREER AWARDS

Distinctions and Research Awards

INTERNATIONAL
Received

2010  
One of the 10 finalists in the best paper competition (Roberts prize), Physics in Medicine and Biology Journal, Canada. (Distinction)

2010  
Physics in Medicine and Biology highlights of 2010, Canada. (Distinction)  
(selected for presentation of outstanding new research, receipt of the highest praise from the journal's international referees and the highest number of downloads).

PROVINCIAL / REGIONAL
Received

2001 - 2003  
Ontario Graduate Scholarship (OGS), Canada. (Distinction)

2000 - 2001  
Ontario Graduate Scholarship in Science and Technology (OGSST), Canada. (Distinction)

1999 - 2000  
Ontario Graduate Scholarship (OGS), Canada. (Distinction)

LOCAL
Received

2007  
Best People Award, Physicist Category, Radiation Medicine Program, Princess Margaret Hospital, Canada. (Distinction)

2005  
J. R. Cunningham Award for Academic Excellence in Research by a Physics Trainee, Department of Radiation Oncology, University of Toronto, Canada. (Distinction)

2000  
Best Oral Presentation award, Electrical and Computer Engineering Mini Symposium (ECEMS), Canada. (Distinction)

1998 - 2000  
International Graduate Student Scholarship (IGSS), Western University, Ontario, Canada. (Distinction)

1998  
Best Poster award, Electrical and Computer Engineering Mini Symposium (ECEMS), Canada. (Distinction)

1997 - 1998  
Special University Scholarship (SUS), Western University, Canada. (Distinction)

1995  
People's Scholarship, Shanghai Jiao Tong University, China. (Distinction)

1993  
People's Scholarship, Shanghai Jiao Tong University, China. (Distinction)

Teaching and Education Awards

LOCAL
Received

1998  
Best Teaching Assistant award, second place, Dept of Radiation Oncology, Faculty of Medicine, Department of Electrical and Computer Engineering, The University of Western Ontario, Canada

Nominated
Student/Trainee Awards

INTERNATIONAL

Received

2000 - 2002 Student Stipend. International Society for Magnetic Resonance in Medicine (ISMRM), Canada

4. PROFESSIONAL AFFILIATIONS AND ACTIVITIES

Professional Associations

2016 - present Associate Member, Canadian Association of Radiation Oncology
2012 Jul - present Corresponding Member, American Society for Radiation Oncology, 135190753
2006 - present Member, International Society of Magnetic Resonance in Medicine
2005 - present Member, American Association of Physicists in Medicine
2005 - present Member, Canadian Organization of Medical Physicists
2000 - 2003 Student Member, International Society for Magnetic Resonance in Medicine
1997 - 2003 Student Member, The Institute of Electrical and Electronics Engineering, Inc. (IEEE)

C. Research Funding

1. GRANTS, CONTRACTS AND CLINICAL TRIALS

PEER-REVIEWED GRANTS

Funded
2015 Oct - 2016 Oct Principal Investigator. Adaptive Radiotherapy in Head and Neck Cancer: Personalizing Therapy in the HPV Era for Enhanced Response and Reduced Toxicity. Radiation Medicine Program, Princess Margaret Cancer Centre. RMP Adaptive Radiotherapy IDEAS Grant Application. Collaborator(s): Lindsay, Patricia; McNiven, Andrea; Bissonnette, Jean-Pierre; Waldron, John; Chan. Biu. 49,745 CAD. [Grants]

2013 Oct - 2014 Oct Co-Principal Investigator. PROSPECTIVE COLLECTION OF TOLERANCE OUTCOMES IN WOMEN RECEIVING BREAST CANCER RADIOThERAPY: A MULTl-INSTITUTIONAL INITIATIVE. University of Toronto Department of Radiation Oncology. UTDRO Seed Funding Initiative. 410002151. PI: Ruschin, Mark; Purdie, Tom. Collaborator(s): Vesprini, Danny; Pignol, Jean-Philippe; McCann, Claire; Fyles, Anthony; Fenkell, Louis. 61,000 CAD. [Grants]

The goal of the present proposal is to develop, implement and validate an efficient computer-based process to collect outcomes data for all patients receiving adjuvant breast IMRT at all three institutions within UT-DRO. Under REB approval, these data will be incorporated into an existing mathematical learning framework to develop a preliminary model of RT-induced toxicity. Moreover, this process will serve as the source of a future grant application to perform a large-scale multi-institutional prospective study to develop a predictive model for
acute, and eventually late, toxicity.

Education:

1967 - 1970 Postdoctoral Research Fellow with Dr. R.S. Bush. Physics Division, Ontario Cancer Institute, and Department of Medical Biophysics, University of Toronto, Toronto, Ontario, Canada.

Scholarships and Awards:

2002 John Yuhas Award; (for Distinguished Research in Radiation Biology), Dept of Radiation Oncology, University of Pennsylvania, Philadelphia, PA.
2006 Robert Kallman Memorial Lectureship. Dept. of Radiation Oncology, Stanford University School of Medicine, Stanford, CA.
2007 National Cancer Institute of Canada’s Robert L. Noble Prize, Sponsored by the Canadian Cancer Society (for Outstanding Achievements in Cancer Research)
2009 2009 Failla Award and Lectureship from the Radiation Research Society
2010 Outstanding Research Award – 12th International Tumor Microenvironment Workshop, Toronto, ON
2010 Award for Excellence - International Conference on Radiation Biology, Nanotechnology, Imaging, Stem Cell Research and Radiation Oncology, Chennai, India.
2011 HS Kaplan Distinguished Scientist Award, International Association for Radiation Research.
2013 RS Bush Memorial Lecturer, Dept of Radiation Oncology, Univ of Toronto. Toronto, ON.
Biographical Information:

Degrees

Hospital Staff Appointments:

1973 Senior Scientific Research Assistant, Biophysics Department, Institute for Cancer Research, Clifton Avenue, Belmont, Sutton, Surrey, England.
1973 - 2012 Senior Scientific Staff, Ontario Cancer Institute, Princess Margaret Cancer Centre.
2013 – present Senior Scientist Emeritus, Ontario Cancer Institute, Princess Margaret Cancer Centre.

Academic Appointments:

1973 - 1979 Assistant Professor, Department of Medical Biophysics, University of Toronto.
1979 - 1987 Associate Professor, Department of Medical Biophysics, University of Toronto.
1987 – 2015 Professor, Department of Medical Biophysics, University of Toronto.
1995 – 2015 Professor (cross-appointed), Department of Radiation Oncology, University of Toronto.
2015- present Professor Emeritus, Depts of Medical Biophysics and Radiation Oncology, University of Toronto.

Professional Affiliations

1967 - 1993 Member British Institute of Radiology
1969 - present Member Radiation Research Society
1987 - 2009 Member Metastasis Research Society
1988 - present Member American Association for Cancer Research
1997 - present Member European Society for Therapeutic Radiology and Oncology
2000 – present Member American Society for Therapeutic Radiology and Oncology
2005 – present Member Canadian Association of Radiation Oncologists
Administration and Committee Appointments:

Local committees

1986 - 1998 Animal Care Committee
1989 - 1995 Chair - Research Move Planning Committee
1989 - 1995 Graduate Secretary, Dept of Medical Biophysics, Univ of Toronto.
1992 – 2002 Member, DMBP Student Affairs Committee
1997 – 2002 Graduate Secretary, DMBP, University of Toronto.
1999 - 2000 HIPACT Program Planning Committee
2000 - 2002 Advanced Diagnostics Centre Planning Committee
2001 - present Member: Human Tissue Committee
2002 - 2005 Chair- Common Equipment Committee
2003 – present Co- chair, Animal Care Committee
2007 – 2008 Member, DMBP Executive Committee.

National and International committees

1995 Consultant to Imutec Corporation.
1998 - present Member Evaluation Committee, Aventis (formerly Connaught) Student Biotechnology Competition
1999 – 2005 Member - Finance Committee, Radiation Research Society
1999 - 2004 Member - External Advisory Committee for NIH/NCI program grant to Dr J Williams, Johns Hopkins Univ., Baltimore, MD USA.
2002 - 2005 Chair- Finance Committee, Radiation Research Society
2004 - present Member – External Advisory Committee, NIH Breast Cancer spore Grant, Dr. Lyerly, Duke University, durham, NC< USA.
2005 - 2008 Secretary- Treasurer, Radiation Research Society.
2005 - 2007 Member NCRP committee 1-15 on Radiation Safety in NASA Lunar Missions
2005 Acting Chair, CIHR CPT Grant Panel
2005 - 2009 Member Board of ASTRO- Chair Research Council
2007 - 2008 Member Panel E. Biophysics, Imaging and Radiobiology, NCIC
2007 – 2014 Member – External Advisory Committee for NIH/NCI program grant to Dr Giaccia, Stanford University Medical School, Stanford, CA USA.
2008- 2013 Member of Advisory Board – Molecular Radiation Therapeutics Branch / Radiation Research Program, NCI/NIH Bethesda, MA
2010-2015 Chair – External Advisory Committee NIH/NIAID CMCR U19 program grant to Dr J Williams University of Rochester, Rochester NY USA.

EDITORIAL BOARDS:
2007 – present Editorial Board – Tumour Microenvironment
2008 – 2009 Guest Editor, Seminars in Radiation Oncology, Stem Cells and the radiation treatment of cancer

NATIONAL / INTERNATIONAL
1998 - present Member - Evaluation Committee, Aventis (formerly Connaught) Student Biotechnology Competition
1999 - present Member - Finance Committee, Radiation Research Society
2004 – 2008 Secretary-Treasurer, Radiation Research Society
2004 – 2009 Member – External Advisory Committee, NIH Breast Cancer Spore Grant, Dr. Lyerly, Duke University, Durham, NC, USA
2005 - 2009 Member Board of ASTRO- Chair Research Council
2008 - present Member of Advisory Board – Molecular Radiation Therapeutics Branch / Radiation Research Program, NCI/NIH Bethesda, MA

ONTARIO CANCER INSTITUTE / PRINCESS MARGARET HOSPITAL:
2001 - 2008 Member: Human Tissue Committee
2003 – present Co- chair, Animal Care Committee
2006 – 2009 Member – CREDIT Advisory Committee
2014 – 2015 Member, Appointments Committee, OCI.

GRANT REVIEW PANELS:
1989 1993 Member NIH- DRG (US) Radiation Study Section.
1998 - 2000 Joint Chair- NCIC Grant Review Panel E.
2000 -2001 Member - NCIC Grant Review Panel E.
2000 Ad hoc member NIH-DRG (US) Special Study Section.
2008 Member - NCIC Grants Panel E.
2000-2010 Member: College of Reviewers of the Canada Research Chairs program
2003-2004 Acting Chair: CPT panel, CIHR
EXTERNAL GRANT REVIEWER:

Alberta Heritage Fund
American Cancer Society, U.S.A.
British Columbia Health Research Council
Canadian Institutes of Health Research
Canadian Cancer Society Research Institute
Cancer Research Society
Cancer Research United Kingdom
Manitoba Health Research Council
Medical Research Council of Canada
National Institute of Health/National Cancer Institute, U.S.A.
National Cancer Institute of Canada
NATO Scientific Exchange Program
Ottawa General Hospital Research Board
Quebec Lung Association
Stichting-Koningin Wilhelmina Fonds, Netherlands
Swiss National Science Foundation, Switzerland

RESEARCH AWARDS:

Active Grants: (Principal Investigator)

Previous Grants: (Co-Principal Investigator)

1974 - 1977 National Cancer Institute of Canada (NCIC) Block grant to Physics Division of Ontario Cancer Institute: my section "Radiobiology and Tumour Biology"
1977 - 1980 National Cancer Institute of Canada (NCIC) Block grant to Physics Division of Ontario Cancer Institute: my section "Radiobiology and Tumour Biology"
1980 - 1983 National Cancer Institute of Canada (NCIC) Block grant to Physics Division of Ontario Cancer Institute: my section "Radiobiology and Tumour Biology"
1981 - 1983 Medical Research Council of Canada (MRC) "Studies of metastatic ability of tumour cells" $31,500/year
1983 - 1986 Medical Research Council of Canada (MRC) "Studies of metastatic ability of tumour cells" $40,000/year
1983 - 1986 National Cancer Institute of Canada (NCIC) Block grant to Physics Division of Ontario Cancer Institute: my section "Radiobiology and Tumour Biology"
1986 - 1988 Medical Research Council of Canada (MRC) "Studies of metastatic ability of
tumour cells" $55,775/year

1986 - 1991 National Cancer Institute of Canada (NCIC) Block grant to Physics Division of Ontario Cancer Institute: my section "Radiobiology and Tumour Biology" $108,000/year

1988 - 1991 Medical Research Council of Canada (MRC) "Studies of metastatic ability of tumour cells" $61,533/year

1991 - 1995 Medical Research Council of Canada (MRC) "Studies of metastatic ability of tumour cells" $79,717/year

1991 - 1995 National Cancer Institute of Canada (NCIC) Coordinator, Terry Fox Programme Project Grant "Experimental Radiotherapeutics and Hyperthermia". Total award $491,381/year of which $211,277/year was for my own research

1995 - 1996 National Cancer Institute of Canada (NCIC) "Measuring Hypoxia in Tumours" $74,635

1996 -1997 Department of Radiation Oncology, Agnico Eagle Fund - Start-up funds: "Studies of the radiosensitivity of human fibroblasts" $40,000/year.

1996 - 1999 National Cancer Institute of Canada (NCIC) Coordinator - Terry Fox Programme Project Grant "Measuring Hypoxia in Tumours: Experimental and Clinical Studies" $412,600/year

1999 - 2004 National Cancer Institute of Canada (NCIC) Co-ordinator - Terry Fox Programme Project Grant A Hypoxia in Tumours: Clinical and Experimental Studies, $627,973 1st year.

2004-2009 National Cancer Institute of Canada (NCIC) Co-ordinator - Terry Fox Programme Project Grant A Hypoxia in Tumours: Clinical and Experimental Studies, $627,973 1st year.

2005-2010 Canadian Institutes of Health Research (CIHR) “Radiation-Induced Lung Damage: Volume-effects & Mitigation” P.I. (co-applicants Drs W-C Yeh/I W Yeung/J Van Dyk) $69,530/per year

2005-2010 National Institute of Allergy and Infectious Diseases (NIAID) Centers for Medical Measures against Radiation “Mitigating and Treating the Effects of Radiation in Lung Tissue” Co-applicant on Project 4 Program Grant with
2005-2010  Dr. W-C Yeh (PI-Dr. J. Moulder) $1,259,165/per year
National Institute of Allergy and Infectious Diseases (NIAID)
Centers for Medical Measures against Radiation “Assessing Skin Exposure by Measuring DNA Damage in Skin Cells” Co-applicant on Project 5 Program Grant with Dr. R G Bristow – other members are US based (PI-Dr. P. Okunieff) $1,240,210/per year

2008-2011  National Cancer Institute of Canada (NCIC) Co-Applicant with Andrew Hope, “Improved radiation induced lung toxicity prediction with linked pre-clinical/clinical models and biomarkers” $430,913/yr

2009-2012 Canadian Institutes of Health Research (CIHR) Ralph Da Costa, Canadian Institutes of Health Research “Probing the Temporal Dynamics of Tumor Cell Kill and Vascular Damage in Radiation Therapy using Optical Molecular Techniques” Co-applicant, $145,200/yr.

2009-2012  Ralph Da Costa, Ontario Cancer Research Network “Probing the Temporal Dynamics of Tumor Cell Kill and Vascular Damage in Radiation Therapy using Optical Molecular Techniques” Co-applicant $350,000. total

2009-2014  Bradly Wouters, National Cancer Institute of Canada “Terry Fox Project Grant Hypoxia in Tumours: Clinical and Experimental Studies” Co-applicant $4,986,535. Total

Previous Grants: (Co-Principal Investigator)

1986 - 1988  Ontario Ministry of Colleges and Universities, University Research Initiative Fund - "Bacteriocin - targeted drugs for cancer therapy" (Co-applicant with Dr. H. Farkas-Himsley) $78,500/year of which $31,000/year was for my part of the studies.

1987 - 1989  Medical Research Council of Canada (MRC) "Development of local deep-heating techniques using strongly-focussed ultrasound" (Co-applicant with Dr. J.W. Hunt) $65,000/year

1989 - 1991  Medical Research Council of Canada (MRC) "Basic Studies of Hyperthermia" (Co-applicant with Dr. J.W. Hunt) $73,380/year

1990 - 1992  Medical Research Council of Canada (MRC) "Hyperthermia with Vascular Occlusion" (Co-applicant with Drs. Liu, Hunt and Levin) $30,100/year

1992 - 1996  Medical Research Council of Canada (MRC) "Dose Time and Volume Effects in Radiation-Induced Lung Damage" (Co-applicant with Dr. J. Van Dyk) $67,000/year

1997 - 2000  Medical Research Council of Canada (MRC) "Studies of the radiosensitivity of fibroblasts from patients with unusual radiation reactions" (Co-applicant with Dr. J. Waldron) $76,200/year.

1998- 2001  Medical Research Council of Canada (MRC) "Dose Time and Volume Effects in Radiation-Induced Lung Damage" (Co-applicant with Dr. J. Van Dyk) $81,500/year.

2003-2006 Canadian Institutes of Health Research (CIHR) New Measures for Quantifying Soft Tissue Fibrosis Co-applicant with Drs. A Davis (principal applicant), R. Bell, B O’Sullivan, P. Lee.

PHARMACEUTICAL COMPANIES:

1993 - 1995 Apotex Corporation "Studies of the radiosensitizing properties of 5-Bromo-3 Cyclocytidine" $48,000/year.

1997 - 1998 Faulding Canada Inc - Testing the radiosensitizing properties of catalase. $18,000/year.

2001-2002 Lorus Therapeutics: _ Testing of the radiosensitizing properties of certain drugs. $18000

PATENTS:

REFEREED ARTICLES:

127. Haughland HK, Vukovic V, Pintilie M, Fyles AW, Milosevic M, Hill RP, Hedley DW

207. Dal Pra A, Milosevic M, Hill R, Wouters B, Warde P, Bristow RG. Hypoxia,

NON REFEREED PUBLICATIONS:

BOOKS AND/OR CHAPTERS IN BOOKS:

BOOKS EDITED:
   Chapter 1, Hill, R.P., Tannock, I.F. Cancer as a Cellular Disease
   Chapter 10, Hill, R.P. Metastasis
   Chapter 15, Hill, R.P. Cellular Basis of Radiotherapy
   Chapter 16, Hill, R.P. Experimental Radiotherapy
   Chapter 21, Hill, R.P., Hunt, J.W. Hyperthermia
   Chapter 1, Hill, R.P., Tannock, I.F. Cancer as a Cellular Disease
Chapter 11, Hill, R.P. Metastasis
Chapter 15, Hill, R.P. Cellular Basis of Radiotherapy
Chapter 16, Hill, R.P. Experimental Radiotherapy
Chapter 20, Hill, R.P. Hyperthermia and Photodynamic Therapy

   Chapter 1, Hill, R.P., Tannock, I.F. Cancer as a Cellular Disease
   Chapter 8, Okey, A.B., Harper, B.A., Grant, D.M., and Hill, R.P. Chemical and Radiation Carcinogenesis
   Chapter 10, Chambers, A.F., Hill, R.P. Tumour Progression and Metastasis
   Chapter 13, Bristow, R.S., Hill, R.P. Cellular Basis of Radiotherapy
   Chapter 14, Wong, C.S., Hill, R.P. Experimental Radiotherapy

   Chapter 1, Harrington L., Bristow R.G., Hill, R.P., Tannock, I.F. Cancer as a Cellular Disease
   Chapter 11, Khokha R., Voura E., Hill, R.P. Tumour Progression and Metastasis: Cellular, Molecular and Environmental Factors
   Chapter 13, Bristow, R.S., Hill, R.P. Molecular and Cellular Basis of Radiotherapy
   Chapter 14, Hill, R.P., Bristow R.G. The Scientific Basis of Experimental Radiotherapy

   Chapter 1, Harrington L., Bristow R.G., Hill, R.P., Tannock, I.F. Cancer as a Cellular Disease
   Chapter 10, Shao Y.W, Khokha R., Hill, R.P. Tumour Progression and Metastasis.
   Chapter 15, Harding S.M, Hill, R.P., Bristow, R.S. Molecular and Cellular Basis of Radiotherapy
   Chapter 14, Hill, R.P., Bristow R.G. Tumor and Normal Tissue Response to Radiotherapy

*POSTERS AND ABSTRACTS NOT INCLUDED*

SCHOLARLY WORK AND CREATIVE PROFESSIONAL ACTIVITY:

INVITED LECTURES (1995 - present):

1995

- Invited speaker in the workshop on "Polarographic measurements of tissue pO₂", Radiation Research Society Meeting, San José, April, 1995.

1996
- Invited speaker - New Zealand Society of Oncology Jubilee Meeting, Auckland New Zealand, February, 1996.
- Chairperson of the workshop "Predictive Assays: Measuring Multiple Parameters on the Same Tumor", 44th Annual Meeting of the Radiation Research Society, April, 1996.
- Invited speaker in panel discussion on "Locally Advanced Cervix Carcinoma - Innovation in Combined Modality Therapy", 38th Annual Meeting of the American Society for Therapeutic Radiology and Oncology, Los Angeles, CA, October, 1996.

1997
- Member of organizing committee and speaker: International Workshop on "The Tumor Microenvironment: An important paradigm in cancer etiology and treatment." Martha's Vineyard, MA. May 1997.

1998
- Invited speaker Rad Res Soc workshop on A Tumor hypoxia: Markers, Microenvironment and Gene Expression@ Louisville Kentucky April 1998.

1999
- Speaker at Univ of Toronto Dept of Radiation Oncology Continuing Education Course - A Future Directions in Radiation Oncology@ Toronto May 1999.
- Speaker at AACR Special Conference - A Molecular Aspects of Metastases@ Snowmass Colorado Sept 1999.
- Invited Speaker - Conference - A Prediction of Tumour Response to Therapy: Molecular Markers and the Tumour Microenvironment@ Montreal, Quebec Oct 1999.

2000
- Member of Organizing Committee and Invited Speaker - International Conference on Translational Research and Pre-Clinical Strategies in Radio-Oncology 2000. Lugano, Switzerland. March, 2000.
- Invited Speaker - Grand Rounds, Henry Ford Hospital A The Tumour Microenvironment and Metastasis, Detroit, MI, April 2000.
- Invited Speaker - Radiation Research Society Symposium on AHypoxia and Gene Expression, Radiation Research 2000, Albuquerque, New Mexico, April, 2000
• Invited Speaker NCI/NIH workshop A Modifying normal tissue damage post irradiation, Bethesda MD, Sept 6-8th 2000.

2001
• Co-Chair /Organizer, Radiation Research Society Symposium on Tumor Hypoxia, San Juan, Puerto Rico, April 2001.
• Invited Speaker, “7th International Meeting of the Tumor Microenvironment”, Atlanta, Georgia. April 2001.

2002
• “Oxic stress in tumor progression and metastasis” 1st Annual Conference on Redox Modulators in Cancer Therapy (RMCT), Maui. Hawaii, USA Jan 2002
  Conference postponed in wake of 9/11.
• “The importance of microenvironment on tumor therapy” 6th International Wolfsberg Meeting on Molecular Radiation Biology/Oncology. Ermatingen, Switzerland. June 2002
• “Repopulation and hypoxia/reoxygenation” Int. Symposium on Repopulation during Radiotherapy: Biological Basis, Clinical Significance and Interventions. Dresden, Germany, September 2002
• Yuhas Memorial Lecture, “Radiation-induced damage in lung tissue: in and out of the treatment field.” University of Pennsylvania Medical Center, Dept of Radiation Oncology. Pennsylvania USA, Oct 2002
• Invited participant NCI/NIH workshop on “Testing drugs in combination with Radiation” “ Washington, DC, USA, Nov 2002

2003
• “Individualizing Cancer Treatment; Biomarkers for normal tissue response” “ 2nd International Conference on Translational Research in Radiation Oncology, Lugano Switzerland, 2003.
• “The tumour microenvironment and tumour progression” North Eastern Ontario Regional Cancer Centre, Sudbury Ontario, May 2003.
• “DNA damage in lung fibroblasts following irradiation in vivo” Workshop on Radiobiology applied to therapy, Nijmegen, The Netherlands, June 2003.

2004
• Invited mentor, grant writing workshop, AACR meeting, Orlando, Florida, March 2004
• Invited speaker, Workshop on “Hypoxia Imaging Techniques”. Phoenix, Arizona, April 2004
• Invited Speaker, LENT V conference on Adverse effects of Cancer Treatment, Rochester, NY May 2004
• Invited Participant, 8th International Wolfsberg Meeting on Molecular radiobiology/Oncology. Ermatingen, Switzerland, June 2004.
• Invited speaker, Canadian Association of Radiation Oncology, Halifax, Nova Scotia, Sept 2004

2005
• Invited chair “Role of endothelial cells in tumor response to irradiation” Gordon Conference on Radiotherapy, Ventura, California. Feb 2005
• Invited Speaker; NIH Metastasis Group, Bethesda MY, USA Feb, 2005.
• Invited Mentor, grant writing workshop, AACR meeting, Anaheim CA, USA April 2005
• Invited Speaker, University of Toronto, Dept of Radiation Oncology “The multidisciplinary management of radiation therapy induced acute effects, King City, Ontario, April 2005.
• Invited Lecturer, University of Maryland, Dept of Radiation Oncology, “Radiation Biology Refresher Course for Residents in Radiation Oncology”. Baltimore, Maryland, USA, April 2005.
• Invited lecturer: Cross Cancer Institute, Western Radiobiology Review Course, Edmonton, Alberta May 2005.
• Invited Reviewer, NIH Grant Panel, Washington, USA, May 2005.
• Invited Chair, CIHR CPT Grants Panel, Ottawa, September 2005.
- U19 Grant Retreat, Rochester, USA, October 2005.
- Invited Speaker, RSNA Oncology Panel, Chicago, November 2005.
- Invited Speaker; 3rd International Conference on Translational Research and preclinical strategies in Radiation Oncology. Lugano, Switzerland, March 2006.
- Invited Speaker, CMCR meeting, Rochester NY. March 2006.
- Invited Mentor, grant writing workshop, AACR meeting, Washington, DC, USA April 2006.
- Invited Speaker, ASTRO/RRS annual meeting, Philadelphia PA, November, 2006.
- Invited Speaker, 5th international LOWRAD meeting and 8th meeting of the Indian Society for Radiation Biology, Varanasi, India, November, 2006.
- Invited Speaker, Breast Cancer Symposium, Milan, Italy Dec 2006.
- Invited Consultant on Preparation of CRP on radiobiological studies of normal tissue effects in the 1-10 Sv range and higher, relevant to nuclear accidents and other radiation incidents in conjunction with Ka &n H. Vienna, Austria. May 2007.

2008

- Invited speaker – CMCR Animal Models Meeting San Antonia TX, Jan 2008
- Invited speaker – RTOG Course in Stem Cells, San Diego CA, Jan 2008
- Invited participant – Gordon Conference on Radiation Oncology, Ventura CA, Jan 2008
- Invited speaker – OICR Retreat, Alliston, ONT, Feb 2008
- Invited speaker – CBARMFI Spring Retreat, Pittsford NY, Mar 2008
- Invited speaker – CENTRII Spring Retreat, Milwaukee WS, Apr 2008
- Invited speaker – AACR meeting, San Diego CA, Apr 2008
- Invited speaker – FOREM meeting, Madison WS, Apr 2008
- Invited speaker – Biodosimetry meeting, Bethesda MD, May 2008
- Invited speaker – Field’s Institute symposium Toronto, ONT, July 2008
- Invited participant – CMCR Lung Focus group meeting, Baltimore, MD, July 2008
- Invited speaker - VICBC Workshop on Mathematical and Quantitative Biology, Toronto, ONT, Aug 2008
- Invited speaker – CARO Annual meeting, Montreal PQ, Sept 2008
- Invited speaker – ESTRO Annual meeting, Goteborg, Sweden, Sept 2008
- Invited speaker – ASTRO/RRS Annual meeting, Boston MA, Sept 2008
- Joint organizer and Chair – OCI 50th Anniversary, Toronto, ONT, Oct 2008

2009

- Invited Chair: MBP 50th Anniversary Mtg. Toronto Ont May 2009
- Invited Speaker: Geneva Pk MBP conference, Lake Couchiching, Ont Oct 2009
- Invited Speaker: Radiation Research Society Meeting Savannah GA Oct 2009
- Failla Lecturer: Radiation Research Society Meeting Savannah GA Oct 2009

2010

- Invited Speaker and Chair - “Oncology at the Limits” Cape Town, South Africa January
- Invited Speaker - Radiation Lung Meeting Bethesda, MA , April
- Invited Speaker - Tumour Microenvironment Meeting , Toronto, ON May
- Invited Speaker - Terry Fox Research Institute, Annual Scientific Meeting, Vancouver, BC May
- Invited Speaker - Medical Scan Workshop , Ottawa, ON May
- Invited Speaker - OICR Cancer Stem Cell Program Toronto, ON May
- Invited Speaker - Countermeasures Development for Radiation Induced Skin Injury, Bethesda, MA June
- Participant - Center for Biophysical Assessment & Risk Management Following Irradiation Retreat, Rochester NY  July
- Invited Speaker - Manitoba Institute of Cell Biology, Cancer Care Manitoba  MAN Aug
- External PhD examiner - Mehgan Azad, University of Manitoba, Winnipeg, MAN. Aug.
- Invited Speaker - 3rd International Meeting of Investigative Pathology, San Paulo Brazil Aug.
- Invited Speaker - Molecular Bases of Radiation Resistance of Human Cancers, Bethesda, MA  Sept
- Invited Speaker - Radiation Research Society Annual Meeting, Maui, Hawaii Sept/Oct
- U of Toronto Dept of Medical BioPhysics Annual Meeting Geneva Park, ON Oct
- Poster presenter - ASTRO Annual Mtg  San Diego, CA Oct/Nov
- International Conference on Radiation Biology – Nanotechnology, Imaging and Stem Cell Research in Radiation Oncology, Chennai, INDIA Nov (Overseas member program committee; Invited symposium organizer and speaker – unable to attend)

2011
- Invited speaker - “Tumour hypoxia, radiation response and metastasis: a perspective and recent progress” McGill Annual Oncology training program meeting, Montreal, PQ March
- 3 poster presentations (with trainees) - American Association for Cancer Research (AACR), Orlando, FL April
- Invited Participant - Adrian Begg and Bert van der Kogel Farewell Conference, Radboud University Nijmegen Medical Centre, Nijmegen, The Netherlands April
- Invited Participant - Poster, 11th Annual Wolfsberg Mtg., Ermatigen, Switzerland June
- Invited Speaker - “Radiation-Induced Inflammatory Responses in Lung and Skin” NIH Clinical Radiotherapy Group, Bethesda, MD Aug
- Invited Speaker - “The varied faces of hypoxia in cancer: from radiation resistance to metastasis to stem cell niche” H.S. Kaplan Memorial lecture, ICRR (International Congress of Radiation Research), Warsaw, Poland Aug
- Invited Speaker – “Why is dosimetry important: Biological Framework?NIH Workshop on Radiation Dosimetry”, Rockville MD Sept
- Invited Speaker – “Progression in cervix cancers: Role of the microenvironment” Ontario Veterinary College. Guelph ON Nov
- Invited Discussant – “Optimum animal tumor models for obtaining preclinical data” NCI Clinical Trials Workshop Rockville MD Dec

2012
- Invited Participant - Workshop on Mathematical Oncology IV: Integrative Cancer Biology. Fields Institute, Toronto, March.
- Two Poster presentations - AACR Mtg. Chicago, IL April.
- Invited Speaker - University of Waterloo, Waterloo ON. April
- Invited Speaker – Hamilton ON April.
- Invited Speaker - ESTRO Mtg. Barcelona Spain May.
- Invited Speaker - MOBS Mtg. Niagara Falls ON. July.
• Invited Speaker - Henry Ford Hospital, Detroit MI USA. Aug.
• Invited Speaker - SNO Mtg Washington DC USA. Nov.

2013
• Invited Speaker – SMART Symposium on small animal irradiators, Maastrict, Netherlands Mar.
• Invited Speaker – Target Insight Course, Toronto, May.
• Invited Speaker – Univ of Toronto Dept of Radiation Oncology, Annual Mtg, Toronto, May
• Invited Speaker – 13th International Wolfsberg Mtg, Ermatigen, Switzerland. June.
• External PhD examiner. Annika Foehrenbacker, University of Auckland, Auckland, New Zealand, Aug.
• Invited Speaker - Mtg on Tumor Stem Cells, Dresden, Germany, Sept.
• Invited Speaker - Dept of Medical Biophysics staff/student retreat, Rama, ON, Oct
• Invited Participant – poster. Canadian Cancer Conference, Toronto, ON, Nov.

2014
• Invited Speaker – ESTRO Mtg. Vienna, Austria, Mar
• Invited Speaker – Maths Oncology Workshop, Toronto, ON, Mar.
• Invited Participant – TFRI Annual Mtg, Montreal, PQ. May.
• Invited Speaker – Small animal radiotherapy (SMART 2), Vancouver, BC, August.

2015
• Invited Speaker – AACR Rad Onc Think Tank, Fort Myers, USA, Jan.
• Invited Speaker – 3rd ESTRO Forum, Barcelaona Spain, April.
• Invited Speaker – 15th ICRR, Kyoto, Japan, May.
• Invited Speaker - BIGART 2015, Aarhus, Denmark, June.

2016
• Invited speaker – ICRR HHE-2016, Mumbai, India Feb
• Invited speaker - 3rd SMART Symposium, Ghent, Belgium Mar

MASTER STUDENTS SUPERVISED:
1973 - 1974 D.S. Siemann (jointly with Dr. M. Bronskill), The relationship between mouse arterial partial pressure of oxygen (PaO₂) and the effectiveness of
localized tumour irradiation.

1978 - 1981  P. Munro (jointly with Dr. J.W. Hunt), Hyperthermia induced by ultrasound: Rationale and experimental development.

1982 - 1986  S.D. Young, Quantitation of the unstable expression of a metastatic phenotype in murine tumour cells.

1988 - 1991  X. Li, Microenvironmental influences on the response of tumour cells to hyperthermia.

2000- 2002  M.Sc. T. Kalliomaki, Hypoxia and tumor progression

2000- 2002  M.Sc. L. Zhang, Hypoxia and apoptosis

1998- 2000  R.Cairns, Role of Hypoxia in metastasis formation

2002 - 2004  A. Langan, Radiation-induced inflammatory response in lung

2005 – 2008  A. Para, Mitigating the effects of fractionated irradiation on lung tissue

2008 – 2011  Eric Leung, PMH Residency Program

DOCTORAL STUDENTS SUPERVISED:

1999 – 2007 P Subarsky. Changes in gene expression in hypoxic tumours
2002 - 2007 Z Li. Hypoxia and apoptosis

POST-DOCTORAL FELLOWS SUPERVISED:

2002- 2004 J. Akudugu. Radiosensitivity and tissue fibrosis
2004 –2007 S J Lunt. Role of IFP in tumor progression and metastasis
2006-2007 L Zhang: Hypoxia, apoptosis and metastasis
2006 - 2007 C. Laurent: pH and radiation effects in tumours
2007 – 2014 A. Zaidi: Mitigation of radiation induced lung damage in mice
2007 – 2011 J. Mahmood: Mitigation of radiation induced lung damage in rats
2007 – 2013 T. Marie-Egyptienne; Hypoxia and stem cells
2008 - 2011 T Kalliomaki: Role of IFP and hypoxia in tumour progression

SUMMER STUDENTS SUPERVISED (since 1990)

HIGH SCHOOL STUDENTS SUPERVISED (Co-op program)

1996-1997  Agnes Von Hagen, Northern Secondary School, Toronto
1998-1999  Jesse Olmstead, Ontario Science School, Toronto
1999     Magdalena Lysenko, Father Henry Carr Secondary School, Toronto
2002     Emma Cole, Northern Secondary School
2002     Nicola Carey, Tonbridge School, UK

MENTORING

2007-2012  Dr Andrew Hope  Assistance with grant applications & general discussions
2008-2013  Dr Ralph DaCosta  Assistance with grant applications & general discussions
2008-2013  Dr Gelareh Zadeh  Senior Advisor for CIHR clinical fellowship – Meetings and assistance with grant applications and publications
2009-2012  Dr Devika Chithrani  Meetings and assistance with grant applications and publications.
2014-2016  Dr Scott Bratman  Assistance with grant applications & general discussions

TEACHING (1990 - present):

GRADUATE COURSES:

1981-1990  Oncology course (MBP 1018) - organized jointly with Dr. I.F. Tannock. Course had 2 sections, a Clinical Section and a Basic Science Section. The former section was designed for graduate students. The latter section was in segments and designed for residents training in Oncology and graduate students.
1981-present  Radiobiology Course for residents training in Radiation Oncology. Department of Radiation Oncology, University of Toronto.
1987-1995  Invited Lecturer - Osler Institute Radiation Oncology Boards Review Course: Radiobiology Section. Louisville, KY.
1990     Invited Lecturer - Surgical Oncology Teaching course in "Tumor Biology", Canadian Federation of Royal Colleges of Medicine Meeting, Edmonton, Alberta.
1990-1992  Tutor in Advanced Cell Biology course -Department of Medical Biophysics, University of Toronto.
1991     Radiobiology Course to Residents, Aukland, New Zealand
1991-1998  Individual lecture on radiation biology and radiation therapy in Cancer Biology seminar series for residents - University of Toronto
1992-1994  Coordinator for Advanced Cell Biology course - Department of Medical Biophysics, University of Toronto.
1994-1998  Invited Lecturer - Oncology Course, The Ohio State University, Columbus, Ohio.
2001-present  Radiobiology Course for Radiation Oncology Residents, University of Toronto.
2002-2012  Individual lecture on “Metastasis” in Advanced Cell Biology Course, Medical Biophysics, University of Toronto.
2008-present  MOBS course – Lectures on 1) Mechanism of Metastasis and 2) Cancer stem cells in solid tumours. Niagara on the Lake, ONT.
2008  Lecturer: ESTRO Course on Cancer stem cells, Goteborg, Sweden.
2008  Lecturer: ISMRME Course - Tumour Biology for Imagers, Toronto, ONT.

1. EDUCATION

Postgraduate, Research and Specialty Training

2001 Chief Resident, Department of Radiation Oncology, University of Toronto

Qualifications, Certifications and Licenses

2002 F.R.C.P.C. Radiation Oncology, Royal College of Physicians, Canada
1997 Licentiate (L.M.C.C.), Medical Council of Canada

2. EMPLOYMENT

Current Appointments

2014 Apr 9 - present Leader, Breast Radiation Oncology Site Group, Princess Margaret Cancer Centre
2014 - present Affiliate Scientist, Ontario Cancer Institute, University Health Network, Toronto, Ontario
2007 - present Assistant Professor, School of Graduate Studies, Medical Biophysics, University of Toronto, Toronto, Ontario
2004 - present Scientist, Division of Signaling Biology, Ontario Cancer Institute, Toronto, Ontario
2002 - present Assistant Professor, Radiation Oncology, University of Toronto, Toronto, Ontario
2002 - present Clinician Scientist, Radiation Medicine Program, Princess Margaret Hospital, Toronto, Ontario

Previous Appointments

HOSPITAL

2014 Jan 6 - 2014 Apr 8 Interim Leader, Breast Radiation Oncology Site Group, Princess Margaret Cancer Centre
2004 - 2013 Scientist, Signalling Biology, Ontario Cancer Institute, University Health Network, Toronto, Ontario
Christine Anne KOCH

UNIVERSITY
2004 - 2007 Associate Member, School of Graduate Studies, Medical Biophysics, University of Toronto, Toronto, Ontario

3. HONOURS AND CAREER AWARDS

Distinctions and Research Awards

NATIONAL

Received

2004 Young Investigator/Travel Award, 8th International Workshop on Radiation Damage to DNA, Banff, Alberta. (Research Award)

1998 - 1999 Postdoctoral Fellowship, Leukemia Research Fund of Canada. (Research Award)

1987 - 1991 Postgraduate Scholarship Studentship Award, Medical Research Council of Canada. (Distinction)

1986 Chemical Institute of Canada Silver Medal, McGill University, Montreal, Quebec. (Distinction)

1986 Summer Undergraduate Research Award, Natural Sciences and Engineering Research Council of Canada (NSERC). (Research Award)

LOCAL

Received

2013 - present Leader, Regenerative Medicine Program, Radiation Medicine Program, Princess Margaret Cancer Centre. (Distinction)

1999 W.J. Simpson Award, University of Toronto. (Research Award)
For academic excellence in research by a resident, Department of Radiation Oncology.

1998 - 1999 Charles H. Best Postdoctoral Fellowship, University of Toronto. (Research Award)

1998 Chisholm Memorial Fellowship, University of Toronto. (Research Award)
For postgraduate research.

1998 Starr Medal, University of Toronto. (Research Award)
For outstanding scholarship and postgraduate research.

1998 Third prize, University of Toronto. (Research Award)
For Radiation Oncology resident research presentation.

1994 Ivan H. Smith Memorial Studentship (Adult Oncology), University of Toronto. (Distinction)

1992 T Holder Academic Excellence Award, University of Toronto. (Distinction)
For academic excellence of a varsity athlete.

1990 - 1991 Graduate Fellowship, University of Toronto. (Research Award)
Trinity College.

1987 - 1991 Junior Fellowship, University of Toronto. (Research Award)
Massey College.

1986 Moe J. Polisuk Memorial Prize, McGill University, Montreal, Quebec. (Distinction)
For academic excellence in biochemistry.

1984 - 1987 J.W. McConnell Scholarship, McGill University, Montreal, Quebec. (Distinction)
For outstanding academic merit combined with leadership and participation in community affairs, student government or athletics.

1984 - 1987 University Scholar, McGill University, Montreal, Quebec. (Distinction)

1984 Outstanding Academic Achievement Award for Varsity Athlete, John Abbott College, Montreal, Quebec. (Distinction)
Nominated

2013  **Gerald Kirsh Humanitarian Award**, Princess Margaret Cancer Centre. (Distinction) *(twice).*

**Student/Trainee Awards**

**LOCAL**

**Received**

2009 May  **First Prize for Best Abstract (PhD students)**, Awardee Name: Kellie Jacks. University of Toronto  
*Department of Medical Biophysics Annual Research Day - May 15, 2009.*

2009 May  **First Prize for Best Poster Presentation**, Awardee Name: Kellie Jacks. University of Toronto  
*Department of Medical Biophysics Annual Research Day - May 15, 2009.*

2006 May  **First Prize for Best Poster Presentation**, Awardee Name: Kellie Jacks. University of Toronto  
*Department of Medical Biophysics Annual Research Day - May 18, 2006.*

2006 May  **Second Prize for Best Poster Presentation**, Awardee Name: Chloe Macrae. University of Toronto  
*Department of Medical Biophysics Annual Research Day - May 18, 2006.*

**4. PROFESSIONAL AFFILIATIONS AND ACTIVITIES**

**Professional Associations**

- 2014 - present  American Society for Radiation Oncology (ASTRO)
- 2013 - present  American Society for Biochemistry and Molecular Biology (ASBMB)
- 2010 - present  **Member**, International Radiogenomic Consortium
- 2008 - present  American Association for Cancer Research (AACR)
- 1996 - present  Canadian Association of Radiation Oncologists (CARO)

**Administrative Activities**

**NATIONAL**

**Canadian Association of Radiation Oncologists**

- 2003 - present  **Member**, Translational Research Advisory Group

**Canadian Institutes of Health Research**

- 2013 - present  **Member and co-leader**, Canadian Cancer Strategic Training in Health Research Working Group
- 2012 Aug 1 - present  **Co-Director**, The Terry Fox Foundation Strategic Training Initiative for Excellence in Radiation Research for the 21st Century (EIRR21)
- 2009 May - present  **Reviewer**, Peer Review Committee, Cancer Biology and Therapeutics  
*Invited member.*
Christine Anne KOCH

PROVINCIAL / REGIONAL
Ontario Cancer Institute
2011 - present  Member, Equipment Committee
2008  Coordinator, Signaling Biology Retreat

LOCAL
Dept. of Radiation Oncology, University of Toronto
2009 Jan 26  Examiner, PGY4 and PGY5 Planning Exam

Princess Margaret Hospital
2013 - present  Leader, Regenerative Medicine Research, Radiation Medicine Program
2006 - present  Member, Tumor Bank Committee (Breast Site Group)
2006 - present  Member, RMP Research Committee
2014 - 2017  Secretary, Partnership Executive, Radiation Medicine Program
2009 - 2010  Secretary, Partnership Executive, Radiation Medicine Program
2005 - 2006  Member, Conference Organizing Committee

University Health Network
2013 - present  Princess Margaret Hospital/UHN Site PI, MA-33 clinical trial
2012  Radiation Oncology representative, Immediate breast reconstruction working group
2012  Chair, UHN Breast Cancer Research Day, PMH/UHN

University of Toronto
2013 - present  Member, Clinician-Scientist working group, UT-DRO representative
2014 May 10  Session Moderator, Department of Radiation Oncology Annual Research Day
2014 Feb 28  Member, UT-DRO Strategic Planning Education Workshop
2014 Feb 20  Member, UT-DRO Strategic Planning Research Workshop
2012 Dec 6  Examiner, PGY4 Preparatory Exam
Dept. of Radiation Oncology.
2012 Jun 14  Reviewer, James Lepock Memorial Symposium, Department of Medical Biophysics
2012 Feb  Examiner, PGY4 Preparatory Exam
Dr. L. Kahn, Dept. of Radiation Oncology.
2011 Apr 29  Examiner, OSCE PGY2
Dept. of Radiation Oncology.
2011 Feb 24  Examiner, PGY4 and PGY5 Planning Exam
Dept. of Radiation Oncology.
2010  Chair, Dept. Medical Biophysics Annual Retreat, Geneva Park, Ontario.
2009 Jan 26  Examiner, PGY4 and PGY5 Planning Exam
Dept. of Radiation Oncology.
2009  Reviewer, Department of Radiation Oncology Annual Research Day
2005 - 2006  Reviewer, Department of Radiation Oncology Annual Research Day
2002  Reviewer, Department of Medical Biophysics Annual Research Day
2002  Member, CaRMS Interview Team for Radiation Oncology
2001 - 2002  Member, Medical Education Committee, Faculty of Medicine, Dept of Radiation Oncology
2000  Member, Search Committee for Radiation Oncology Chair
**Peer Review Activities**

**GRANT REVIEWS**

**External Grant Reviewer**
- 2012 Oct: CCSRI, Innovation Grants

**Internal Grant Reviewer**
- 2011 May: Nova Scotia Health Research Foundation
- 2013 Jul: Cancer Research UK
- 2013 Jul: University of Toronto, Grant Miller Cancer research grant competition

**MANUSCRIPT REVIEWS**

**Reviewer**
- Future Oncology
- International Journal of Radiation Biology
- International Journal of Radiation Oncology, Biology, Physics
- Journal of Biochemistry and Biophysical Methods
- Molecular and Cellular Biology
- Molecular Cell Research
- Mutation Research

**PRESENTATION REVIEWS**

**Reviewer**
- 2011 Jun 2: University of Toronto, MSc presentations, Dept. Medical Biophysics Research Day

**Other Research and Professional Activities**

**RESEARCH PROJECT**
- **2005**: McLaughlin Centre for Molecular Medicine Project: Enhancing the Teaching of Molecular Medicine. University of Toronto. 
  *A University of Toronto/Stanford University Collaborative Project. Member of the Molecular Medicine Working Group, Basic Sciences Sector.*

**COURSE CONTENT DEVELOPMENT**
- **2013 Sep - 2014 May**: Developer and co-director. IMS module. Dept. Institute of Medical Sciences (IMS), University of Toronto. 
  *"Trans-disciplinary and Translational Research in Oncology and Radiation Medicine".*

**COURSES TAUGHT**
- **2014 Jan - 2014 Apr**: Course coordinator. Frontiers of Radiation Medicine Research (MSC-1501H). Dept. Institute of Medical Sciences (IMS), University of Toronto.
- **2014**: MBP 1018Y: Oncology. Dept. Medical Biophysics, University of Toronto. 
  *Lecture: “PARP inhibitors and PAR signaling: from molecular actions to clinical relevance”.*
- **2013**: MBP 1018Y: Oncology. Dept. Medical Biophysics, University of Toronto. 
  *Lecture: “Breast Cancer oncogenesis and new targets”.*
- **2012 Jan - 2012 Apr**: Course coordinator. Frontiers of Radiation Medicine Research (MSC-1501H). Dept. Institute of Medical Sciences (IMS), University of Toronto.
C. Academic Profile

1. RESEARCH STATEMENTS

Research Endeavors.
My laboratory has a strong research focus in the area of DNA damage signaling and repair, with particular emphasis on the mammalian nonhomologous end joining (NHEJ) DNA double-strand break repair pathway. Our specific research interests include the utilization of proteomic approaches to identify novel NHEJ components involved in the molecular response to ionizing radiation-induced DNA damage, and examination of DNA damage signaling pathways in breast cancer.

D. Research Funding

1. GRANTS, CONTRACTS AND CLINICAL TRIALS

PEER-REVIEWED GRANTS

FUNDED

This peer-reviewed award provides personal salary support for research to offset clinical activity. $85,000 annually for 3 years.

2010 - 2013  Principal Investigator. Characterization of APLF (C2orf13) in DNA double-strand break repair and in the maintenance of genome stability. Canadian Institutes of Health Research
Christine Anne KOCH

(CIHR). Collaborator(s): Dr. M. Ikura. [Grants]
$108,000 per yr.

2004 - 2009  Principal Investigator. Functional characterization of Xrcc4 phosphorylation in nonhomologous end joining. University of Toronto. Dean’s Fund, Faculty of Medicine. 7,950 CAD. [Grants]

Principal Investigator. A Randomized Phase III study of Radiation Doses and Fractionation Schedules for Ductal Carcinoma in Situ (DCIS) of the Breast. NCIC-CTG. Ma-33. [Clinical Trials]

Aarhus University Hospital, Denmark.

German Cancer Research Centre, Heidelberg.

PM Site Co-Investigator. Neo-adjuvant Locally Advanced Breast Cancer Monitoring Study. [Clinical Trials]

Breast Site Co-Investigator. A Phase II STudy on the Toxicity and Efficacy of a Normal Tissue Tolerance Adapted, 5 Fraction Stereotactic Body Radiation Therapy (SBRT) Regimen, for Extra-Cranial Oligometastases. [Clinical Trials]
2. SALARY SUPPORT AND OTHER FUNDING

Personal Salary Support

Trainee Salary Support

2014 - present Regenerative Medicine Program research (0.25 FTE). Trainee Name: Grace Lee. CSRT, RMP.

E. Publications

1. PEER-REVIEWED PUBLICATIONS

Journal Articles

**Letters to Editor**

**In Preparation**

**Journal Articles, Multicenter Study, Randomized Controlled Trial**

F. Presentations and Special Lectures

1. INTERNATIONAL

Invited Lectures and Presentations

2014 53BP1 facilitates the ATM-dependent phosphorylation of APLF in the DNA damage response (Poster presentation). AACR Annual Meeting. San Diego, California. Fenton AF, Tran D, Koch CA.

Christine Anne KOCH

1990  Binding of tyrosine phosphorylated proteins to the Src homology domains of GAP and Crk. Sixth Annual Meeting on Oncogenes. Frederick, Maryland. Anderson D, Koch CA, Pawson T.

1988  The phosphotransfer motif and autoregulation within the kinase domain of p130gag-fps. Fourth Annual Meeting on Oncogenes. Frederick, Maryland. Moran MF, Koch CA, Pawson T.

2. NATIONAL

Invited Lectures and Presentations

2014 Aug  Role of the 53BP1-APLF interaction in the DNA damage response. CARO meeting. St. John’s, Newfoundland and Labrador, Canada. Tran D, Koch CA.

2009 Jul  Role of APLF in DNA repair and DNA damage signaling. Department of Biochemistry, University of Alberta. Edmonton, Alberta.

2008 Apr  Genetic polymorphisms and radiation sensitivity in breast cancer patients. CBCRA Reasons for Hope
CONFIDENTIAL DOCUMENT

Christine Anne KOCH

1999  Regulation of Ras Signaling – Biological Implications (Poster presentation). CARO Annual Meeting. Montreal, Quebec. Koch CA, de Hoog C, Fan WT, Moran MF.

3. PROVINCIAL / REGIONAL

Invited Lectures and Presentations

4. LOCAL

Invited Lectures and Presentations

2008 Feb  Panelist. Women as Clinician Scientists: An interactive discussion panel. Clinician Investigator Program,
Research training program accredited by the Royal College of Physicians and Surgeons of Canada, University of Toronto, Toronto, Ontario.

2007 Jan The Role of a Novel FHA-containing Protein in the Nonhomologous End-Joining Pathway. Signaling Biology Divisional Retreat, Hart House, University of Toronto (Oral Presentation). Macrae C, Koch A.

2007 Jan Investigating CK2β regulation of S1PL. Signaling Biology Divisional Retreat, Hart House, University of Toronto (Oral Presentation). Jacks K, Koch A.

2004 Nov Regulation of mammalian DNA double-strand break repair (Poster presentation). University of Toronto Medical Biophysics Open House, Ontario Cancer Institute. Koch CA.

Presented Abstracts

G. Research Supervision

1. PRIMARY OR CO-SUPERVISION

Undergraduate Education

2014 Primary Supervisor. Summer Student. Mariah Colussi, University of Toronto 2nd year student, EIRR21 Program Coordinator.

2013 Primary Supervisor. Summer Student. Nora Emad, University of Toronto Dept Pharmacy, Data manager for ARLEC.

2011 Primary Supervisor. Summer Student. Anne Simpson-Porco. Awards: Medical Biophysics Studentship Award.

2011 Primary Supervisor. Summer Student. Hanbert Chen, University of Toronto Medical School Summer Research Studentship.

2006  Primary Supervisor. Summer Student. Laura Gilbert. Awards: Medical Biophysics Studentship Award.

Graduate Education

Undergraduate MD

2014 Jan  Primary Supervisor. 4th Year Medical Student. Mary Hanna. Supervisee Institution: University of Ottawa.
2013 Jul  Primary Supervisor. MSc MBP, Observship. Jenny Hong.
2013 Jul  Primary Supervisor. Summer student, Observership. Margaret Irwin.
2012 Feb  Primary Supervisor. 3rd Year Medical Student. Shlok Gupta.
2010 Jul  Primary Supervisor. 3rd Year Medical Student. Elizabeth Yeboah.
2010 Feb - 2010 Mar  Primary Supervisor. 4th Year Medical Student. Hyder-Al Attar.
2009 Nov  Primary Supervisor. 4th Year Medical Student. Vikram Velker. Supervisee Institution: Western University. Awards: Ivan Smith Award.
2009 Jun  Primary Supervisor. 2nd Year Medical Student. Nafisha Lalani.
2009 May  Primary Supervisor. Medical Student. Andrea Walsh. Supervisee Institution: Saba University School of Medicine.
2009 Jan  Primary Supervisor. 4th Year Medical Student. Huy Nguyen. Supervisee Institution: Ross University.

Postgraduate MD

Christine Anne KOCH

2013 Jan  Primary Supervisor. PGY4 Radiation Oncology Resident. Fatimah Alfaraj.
2012 Apr - 2012 Jun  Primary Supervisor. PGY5 Radiation Oncology Resident. Fazilat Mohammed.
2009 Jun  Primary Supervisor. PGY5 Radiation Oncology Resident. Iwa Kong.
2009 May  Primary Supervisor. PGY5 Radiation Oncology Resident. Sara Rauth.
2009 Apr - 2009 May  Primary Supervisor. Surgical Oncology Fellow, Radiation Oncology Rotation. Eran Sharon.
2009 Apr  Primary Supervisor. Staff Radiation Oncologist from Egypt, Observership. Soha Atallah.
2009 Mar  Primary Supervisor. PGY5 Radiation Oncology Resident. Louis Fenkell.
2009 Jan  Primary Supervisor. PGY2 Radiation Oncology Resident. Meredith Giuliani.

Postdoctoral Research Fellow (PhD)
2011 - 2012  Primary Supervisor. Dr. Yu-Jen Chen.
2010 - 2014  Co-Supervisor. Dr. Sunggeon Ko. Collaborator(s): Dr. M. Ikura.
2007 - 2008  Primary Supervisor. Dr. Samuel Lacoche.

Clinical Research Fellow (MD)

Other
2014 - present  Primary Supervisor. Grace Lee, CSRT/RMP, Regenerative Medicine Program, and QuickStart Program expansion.
2008 - 2012  Primary Supervisor. MSc. Lily Meng, Research Technician II.

2. OTHER SUPERVISION

Graduate Education

Thesis Committee Member
2013 - present  MSc candidate. Kiran Beera. Supervisor(s): Dr. Brian Nieman.
2007 - 2014 May  PhD. Hartland Jackson. TIMPs in Mammary Stem Cell Homeostasis and Breast Cancer Progression. Supervisor(s): Dr. R. Khokha.
2007 - 2010  MSc. Le Zheng. Structural and Biophysical Studies of the Role of Stromal Interaction
Molecules STIM1 and STIM2 in Initiating Store-operated Calcium Entry. Supervisor(s): Dr. M. Ikura.

2007 - 2009  
**MSc.** Miranda Tomenson. *A functional role for PDCD4 in oral squamous cell carcinoma.* Supervisor(s): Dr. S. Kamel-Reid.

2006 - 2010  
**PhD.** Emma Ito. *High-throughput screening for novel anti-cancer radiosensitizers for head and neck cancer.* Supervisor(s): Dr. FF Liu.

2005 - 2008  
**MSc.** Ramya Kumareswaran. *Hypoxia mediated genetic instability and DNA double strand break sensing.* Supervisor(s): Dr. R. Bristow.

**Thesis Examiner**

2014 Sep  
**PhD.** Meghan Larin, Pharmacology and Toxicology. *TIMPs in Mammary Stem Cell Homeostasis and Breast Cancer Progression.* Supervisor(s): Dr. Peter McPherson.

2014 May  
**PhD.** Hartland Jackson. *TIMPs in Mammary Stem Cell Homeostasis and Breast Cancer Progression.* Supervisor(s): Dr. Rama Khokha.

2014 Mar  
**PhD.** Jeff Bruce. *The role of microRNAs in human nasopharyngeal carcinoma.* Supervisor(s): Dr. FF Liu.

2013 Aug  
**PhD.** Amanda Fenton. Supervisor(s): Dr. A. Koch.

2012 Sep  
**MSc.** Diana Train. Supervisor(s): Dr. A. Koch.

2011 Jan  
**MSc.** Purnata Shirodkar. Supervisor(s): Dr. A. Koch.

2010 Aug  
**PhD.** Kellie Jacks.

2010 Jul  
**PhD.** Emma Ito. Supervisor(s): Dr. Fei-Fei Liu.

2010 Mar  
**MSc.** Le Zheng. Supervisor(s): Dr. M. Ikura.

2009 Aug  
**MSc.** Miranda Tomenson. Supervisor(s): Dr. S. Kamel-Reid.

2009 Jun  
**MSc.** Kelly Thickett. *Downregulation of cohesion activity prior to anaphase onset.* Supervisor(s): Dr. B. Lavoie.

2009 Jan  
**MSc.** Ahmad Zaheen. *AID Constrains Germinal Center Size by Rendering B cells Susceptible to Apoptosis.* Supervisor(s): Dr. Alberto Martin.

2008 Aug  
**MSc.** Ramya Kumareswaran. Supervisor(s): Dr. R. Bristow.

2008 Jun  
**PhD.** Niket Shah. Supervisor(s): Dr. David Rose.

2008 Jan  
**MSc.** Chloe Macrae.

2006  
**MSc.** Kristy Bailey. Supervisor(s): Dr. K. Vallis.

**Qualifying/Reclass Examiner**

2010 Sep  
**PhD.** Xianon Wang. Supervisor(s): Dr. B. Neel.

2009 Jun  
**PhD.** Amanda Fenton.

2009 May  
**PhD.** Shaliny Ramachandran. Supervisor(s): Dr. Alberto Martin.

2008 Sep  
**PhD.** Dr. Neesha Dhani. Supervisor(s): Dr. David Hedley.

2008 Jul  
**PhD.** Hartland Jackson. Supervisor(s): Dr. Rama Khokha.

2008 Apr  
**PhD.** Apurva Shirodkar. Supervisor(s): Dr. Philip Marsden.

**Chair for PhD Defense**

2013 Sep  

2010 Jul  
**PhD.** Diana Choi. *Erythropoietin Signaling in Pancreatic Cells in Homeostasis and in Models of Type 1 and Type 2 Diabetes.* Supervisor(s): Dr. Minna Woo.

**MSc Oral Exam**

2012 Jun  
**MSc.** Nathalie Moatti. *Identification and characterization of small molecule inhibitors of polynucleotide kinase 3’-phosphatase.* Supervisor(s): Dr. Daniel Durocher.
CURRICULUM VITAE

Name: Marianne Koritzinsky
E-mail: mkoritzi@uhnresearch.ca

Education
2003: PhD in Biophysics (Doctor Scientarium), Institute of Physics, University of Oslo
1996: MSc in Biophysics (Sivilingeniør), Norwegian University of Science and Technology, Faculty of Physics, Informatics and Mathematics.

Academic appointments
2015 – present: Member, Institute of Medical Science, University of Toronto
2008 – present: Assistant Professor, Department of Radiation Oncology, University of Toronto
2010 – 2015: Associate member, Institute of Medical Science, University of Toronto

Work Experience
2014 – present: Scientist
Princess Margaret Cancer Centre, University Health Network
2008 – 2014: Scientific Associate IV
Princess Margaret Cancer Centre, University Health Network
2003 – 2007: Postdoctoral fellow / Researcher
Maastricht Radiation Oncology, University Hospital Maastricht (azM)
2000: Visiting Scientist – McGill University, Department of Biochemistry
Prof. Nahum Sonenberg Laboratory
1999 – 2003: Graduate Student
University of Oslo, Institute of Physics and University Hospital Maastricht (azM), Maastricht Radiation Oncology
1996 – 1999: Department engineer
The Norwegian Cancer Society, The Norwegian Radium Hospital

Teaching
2016 – present: “Radiobiology and DNA Repair”, Medical BioPhysics, University of Toronto, topic coordinator
2013 – present: “Student seminars in translational research” MSC1010Y/1011Y, Institute of Medical Science, University of Toronto. Facilitator.
2010 – present: “Clinical decision making”, Institute of Medical Sciences, University of Toronto. Guest lecturer.
2007 - present: ESTRO teaching course “Basic Clinical Radiobiology”. International week intensive. Faculty.
2011 “Cancer Biology and Radioresistance” guest lecturer in EIRR21 Program.
2011 “Optical, thermal and radiation biophysics”, Molecular Biophysics, University of Toronto. Guest lecturer.
2010 “Radiobiology”, Institute of Medical Sciences, University of Toronto. Project facilitator.

Supervision - current
Postdocs: Dr. Michael Cohen 2015-present
Dr. Luana Schito 2013-present
Graduate students: Christine Strelchuk, University of Toronto 2016-present
Marmendia Meester, University of Toronto 2015-present
Medical Students: Diana Sun, University of Toronto - MD 2015-present
Undergraduate: Michael Xie, University of Toronto 2015-present

Supervision - graduated trainees (28):

Postdocs:  
Dr. ManTek Yeung 2014-2015  
Dr. Fiana Levitin 2012-2015

Medical students:  
Hala Muaddi, University of Toronto 2012-2013

MSc students:  
Erik Mollen, University of Maastricht 2015-2016  
Amy Wong, University of Toronto 2013-2015  
Sanjana Chowdhury, University of Toronto 2012-2014  
Manlio Fusciello, Maastricht University 2013-2014  
Ryan Rumantir, University of Toronto 2011-2013  
Vanessa Zannelia, University of Toronto 2010-2012

Selim Chaib, Maastricht University 2012  
Anne van Brussel, Maastricht University 2011

Susan Hilgendorf, Maastricht University 2010-2011  
Anna Hagenkort, Maastricht University 2010  
Yvette Paulis, Maastricht University 2007-2008  
Hilda Mujcic, Maastricht University 2007

Undergraduate students:  
Chantal van Heugten, Zuyd Hogeschool 2015-2016  
Parth Vora, High School 2014-2016  
Wenqiao Jia, University of Toronto 2015  
Pranathi Ari, University of Toronto 2014  
Eric Yung, University of Toronto 2013-2014  
Brandon Sit, University of Toronto 2012  
Paul Zamiara, University of Toronto 2011-2012  
Melanie Kalbfleisch, University of Toronto 2011

Co-supervisor, postdocs:  
Twan van den Beucken, Ontario Cancer Institute 2008-2013  
Mei Ding, Ontario Cancer Institute 2010-2013

Co-supervisor, PhD students:  
Hilda Mujcic, Maastricht University 2008-2013  
Twan van den Beucken, Maastricht University 2004-2008  
Michael Magagnin, Maastricht University 2004-2008

Membership in organisations
2002 – present: American Association for Cancer Research (AACR)
2001 – present: European Society for Therapeutic Radiology and Oncology (ESTRO)
2000 – present: Radiation Research Society (RRS)
2006 – 2011: The RNA Society

Conference Organization:
2011 – present: Chair, Clinical and Experimental Research in Radiation Oncology (CERRO) – yearly
2012 - present: Department of Radiation Oncology (UT) research day, scientific committee – yearly
2016: 35th ESTRO, Abstract Review Committee
2015: 15th International Wolfsberg Meeting on Molecular Radiation Biology/Oncology, scientific committee
2014: 5th TFRI, organizing committee
2014: 33rd ESTRO, scientific committee
2013: 17th ECCO / 38th ESMO / 32nd ESTRO, scientific committee
2013: 13th International Wolfsberg Meeting on Molecular Radiation Biology/Oncology, scientific committee
2012: 104th AACR, program committee
2008: 27th ESTRO, program committee
Academic Committees:

2012 – present **Co-Director**, STARS21 training program (formerly Excellence in Radiation Research for the 21st Century (EIRR21) training program) TFRI-co-funded ~300K CAD/year.

2014 – present Member, Institute of Medical Science (University of Toronto) Graduate Admissions Committee

2014 – present Member, Project Advisory Committee, Ms. Michelle Mayer, University of Toronto

2015 – present Member, Project Advisory Committee, Dr. Magali Lecavalier-Barsoum, University of Toronto

2016 – present Member, Project Advisory Committee, Vinayak Bhandari, University of Toronto

2016 – present Member, Project Advisory Committee, Samir Barghout, University of Toronto

2016 – present Member, Project Advisory Committee, Mariusz Shrestha, University of Toronto

2016 – present **Co-Chair**, Princess Margaret Cancer Centre Animal Care Committee

2014 – 2016 Member, Princess Margaret Cancer Centre Animal Care Committee

2016: Internal Appraiser and examiner, MSc exam of Ms. Fatima Jessa, University of Toronto

2015: Examiner, MSc exam of Seo Jung Hong, University of Toronto

2015: Examiner, MSc exam of Karolyn Au, University of Toronto

2015: Examiner, MSc exam of Matthew Wu, University of Toronto

2015: Chair, PhD transfer exam of Dr. Xiao Zhao, University of Toronto

2014: Chair, MSc exam of Ms. Laura Finkelberg, University of Toronto

2014: Participant, UT DRO Education Strategic Planning Workshop

2014: Participant, UT DRO Strategic Planning Committee Workshop

2014: Chair, PhD transfer exam of Mr Matkar, University of Toronto

2012: External examiner PhD of Ms Roe, University of Oslo

2012: External examiner PhD transfer exam of Ms Maeda, University of Toronto

2013: External examiner PhD transfer exam of Ms Kazazian, University of Toronto

Academic Editor for scientific journals:

PLoS ONE

Grant and award reviews:

- 2016: Radiation Medicine Program, Radiogenomics competition
- 2016: Kom op tegen Kanker (Flemish Cancer Society)
- 2015: IMS Scientific Day poster award
- 2012-2016: CCSRI Innovation panel Imaging and Technology Development (6x)
- 2014: Chief Scientific Office (Scotland)
- 2014: Breast Cancer Campaign (UK)
- 2014: IMS Scientific Day poster award
- 2014: Cancer Research UK
- 2013: IMS Summer Undergraduate Scientific day oral presentation award
- 2012: IMS Scientific Day poster award
- 2012: IMS Laidlaw manuscript award
- 2012: SGS Vanier Awards committee
- 2012: Prostate Cancer UK Project Grant
- 2012: KWF (Dutch Cancer Society) Operating Grant
- 2012: OGS adjudication panel
- 2012: NVRB conference poster award
- 2012: EIRR21 Research Day poster award
- 2011-2012: IMS Summer Undergraduate Scientific Day Poster award (2x)
- 2005: Wolfsberg conference poster award

Reviewer for scientific journals:

Acta Oncologica
American Journal of Pathology
Breast Cancer Research
Cancer Chemotherapy and Pharmacology
Cancer Research
Major Awards and Grants:

2016: Cancer Research Society (CRS), 120K CAD to support “The role of Peroxiredoxin 4 (PDRX4) as a novel target in pancreatic cancer”. Principal Investigator.

2016: Michael Fry Award, Radiation Research Society. “The Michael Fry Award is to recognize an individual early in his/her career who has made extraordinary contributions to the field of radiation research.

2015: Terry Fox Research Institute Training Grant, 300K CAD to support “Excellence in Radiation Research for the 21st Century”. Co-Director.

2015: Canadian Cancer Society Research Institute (CCSRI) Innovation Grant, 200K CAD to support “Regulation of extracellular protein expression in hypoxia through ER-localized protein folding”. Principal Investigator.

2014: University of Toronto Department of Radiation Oncology Seed grant, 50K CAD to support “Metformin with neoadjuvant chemoradiation to improve pathologic responses in rectal cancer: a phase I-II trial.”. Co-Principal Investigator.

2014: Canadian Institutes of Health Research, 100K CAD to support “Targeting hypoxia in cancer through the UPR”. Co-applicant.

2014: Terry Fox Foundation New Frontiers Project Program Grant, 6.7M CAD to support “A research pipeline for hypoxia-directed precision medicine”. Principal Investigator of Project 1 “Regulation of Protein Folding in the Hypoxic Tumor Microenvironment” with 900K CAD share.

2013: Prostate Cancer Canada Team Grant Competition, 5M CAD to support “Lineage Plasticity and Treatment-Resistant Prostate Cancer”. Co-Investigator with 150K CAD share.

2011: Terry Fox Foundation New Investigator Award, 450K CAD to support “The impact of hypoxia on the maturation of extracellular proteins that regulate tumor metabolism and microenvironment”. Principal Investigator.

2009: Canadian Institutes of Health Research, 1M CAD to support “Adaptation to hypoxia in cancer through the unfolded protein response”. Co-applicant.

2009: Canadian Cancer Society Research Institute – Terry Fox Foundation, 5M CAD to support the program “Hypoxia in tumours: clinical and experimental studies”. Co-Principal Investigator.

2007: ESTRO-VARIANT-Juliana-Denekamp Research Award “Young scientists (junior radiobiologists/radiotherapists) who already at a very early stage in their career have demonstrated excellence and passion for biologically driven cancer research relevant for radiation oncology, and who show promise to assume a scientific leadership role in this field in the future.”

2005: VENI grant awarded by the Netherlands Organization for Scientific Research (NWO). “Provides excellent, talented, creative researchers the opportunity to conduct their own research programme independently and promote talented researchers to enter and remain...
committed to the scientific profession.” 200K Euro to support “The role of integrated stress response in determining tolerance to cycling oxygen”. Principal Investigator.

2000: Visiting scientist award from The Norwegian Research Council to facilitate 6 months research at McGill University

Other awards

2007: Keystone Symposia Scholarship to attend Translational Regulatory Mechanisms, Coeur d'Alene, Idaho, USA
2003: Travel award to 12th International Conference of Radiation Research, Brisbane, Australia
2003: EDRO fellowship to attend the 2nd ESTRO Workshop on Biology in Radiation Oncology, Bergen, The Netherlands
2002: Travel award by NVRB from the Klaas Breur fond for the 49th Annual Radiation Research Meeting, USA
2001: Travel award to The Tumor Microenvironment and Its Impact on Cancer Therapies; 7th International Workshop, Atlanta, USA
2001: Travel award for the 48th Annual Meeting of the Radiation Research Society, San Jose, USA
1998: Wolfsberg Poster Award at the 2nd International Wolfsberg Meeting on Molecular Radiation Biology/Oncology, Ermatigen, Switzerland, 1998

Invited lectures at international venues

2016: 62nd Annual International Meeting of the Radiation Research Society, USA. Award lecture.
2016: 4th International Agean Conference on Tumor Microenvironment and Cellular Stress, Rhodes, Greece.
2016: Clinical and Experimental Research in Radiation Oncology 31, Les Menuires, France.
2015: FASEB Conference, Saxtons River, USA. “Regulation of UPR in FH deficient cells”
2015: 3rd Oxford Institute for Radiation Oncology Symposium, Oxford, UK. “Role of fumarate hydratase (FH) in hypoxia tolerance and cell cycle regulation”
2015: 3rd ESTRO Forum, Barcelona, Spain. “Career development – working smarter”
2015: Clinical and Experimental Research in Radiation Oncology 30, Les Menuires, France. “Hypoxia response in pseudohypoxic cells”
2014: 3rd International Agean Conference on Tumor Microenvironment and Cellular Stress, Mykonos, Greece. “Regulation of protein folding in the tumor microenvironment”
2014: Clinical and Experimental Research in Radiation Oncology 28, Les Menuires, France. “Requirements for oxygen in the endoplasmic reticulum”
2013: 2nd Canadian Cancer Research Conference, Toronto, Canada. “Regulation of protein folding in the hypoxic tumor microenvironment”
2013: FASEB Conference, Saxtons River, USA. “Maturation of ER cargo in the tumor microenvironment”
2013: Clinical and Experimental Research in Radiation Oncology 27, Les Menuires, France. “Reprogramming metabolism with metformin improves tumor oxygenation and radiation response”
2012: International Conference on Translational Research in Radiation Oncology, Geneva, Switzerland. “Oxygen sensing mechanisms as a therapeutic target”
2012: Clinical and Experimental Research in Radiation Oncology 26, Les Menuires, France. “A pharmacological approach to mitigating tumor hypoxia”
2010: 56th Annual Meeting of the Radiation Research Society, USA. “Mechanisms of adaptation to hypoxia and their relevance in cancer”
2010: Clinical and Experimental Research in Radiation Oncology 25, Les Menuires, France. “Regulation of miRNA during hypoxia”

2008: 27th ESTRO Meeting, Sweden. “Getting your paper published; Tricks of the trade”

2007: Clinical and Experimental Research in Radiation Oncology 22, Les Menuires, France. “Regulation of protein folding during hypoxia”

2007: 10th International Wolfsberg Meeting on Molecular Radiation Biology/Oncology, Switzerland; Award lecture “Regulation of mRNA translation during hypoxia”

2007: 13th International Conference of Radiation Research, San Fransisco, USA. “Regulation of protein folding during hypoxia”

2005: Clinical and Experimental Research in Radiation Oncology 20, Les Menuires, France. “Gene specific regulation during hypoxia through multiple mechanisms of translational control”

2004: Clinical and Experimental Research in Radiation Oncology 19, Les Menuires, France. “Regulation of gene expression during hypoxia through mRNA translation”

2003: 13th International Wolfsberg Meeting on Molecular Radiation Biology/Oncology, Ermatigen, Switzerland. “Gene-specific regulation of mRNA translation during hypoxia”

2002: 12th Annual Meeting of the European Society for Therapeutic Radiology and Oncology, Prague, Czech Republic. “New genomic tools in cancer diagnosis, prognosis and treatment”

2002: Gray Laboratory Cancer Research Trust, Mount Vernon Hospital, Middlesex, UK. “Mechanisms of hypoxia-induced inhibition of translation”

2002: 3rd International Wolfsberg Meeting on Molecular Radiation Biology/Oncology, Ermatigen, Switzerland. “Hypoxia-induced down-regulation of protein synthesis through the eukaryotic initiation factors eIF4E and eIF2-α”

2001: Clinical and Experimental Research in Radiation Oncology 16, Les Menuires, France. “Regulation of protein translation during hypoxic conditions”

Oral (proffered) presentations at international meetings

2013: 13th International Wolfsberg Meeting on Molecular Radiation Biology/Oncology, Switzerland. “Metabolic reprogramming by metformin increases tumor oxygenation and radiation response”

2011: Canadian Cancer Research Conference, Toronto, Canada. “Hypoxia inhibits disulphide bond formation and protein folding in the endoplasmic reticulum”

2010: Tumor Microenvironment Workshop, Toronto, Canada. “Hypoxia inhibits disulfide bond formation and protein folding in the endoplasmic reticulum”

2009: Metabolism and Cancer (AACR meeting), La Jolla, USA. “The unfolded protein response protects cells during hypoxia through preservation of autophagic capacity.”

2008: 27th annual meeting of ESTRO, Gothenburg, Sweden. “Hypoxia inhibits disulfide bond formation and protein folding in the endoplasmic reticulum”

2005: 5th International Wolfsberg Meeting on Molecular Radiation Biology/Oncology, Ermatigen, Switzerland. “Gene-specific regulation of mRNA translation during hypoxia”

2002: 3rd International Wolfsberg Meeting on Molecular Radiation Biology/Oncology, Ermatigen, Switzerland. “Hypoxia-induced down-regulation of protein synthesis through the eukaryotic initiation factors eIF4E and eIF2-α”

2001: 48th Annual Meeting of the Radiation Research Society, San Juan, USA. “Regulation of protein translation during hypoxic conditions”

2001: Tumor Microenvironment Workshop, Atlanta, USA. “Regulation of protein translation during hypoxic conditions”

1999: Tumour Microenvironment Workshop, Belfast, Northern-Ireland. “Radiation survival of synchronized cells following prolonged hypoxia”

Poster presentations at international meetings (presenting author only)

2011: 12th International Wolfsberg Meeting on Molecular Radiation Biology/Oncology, Switzerland. “AMPK regulates metabolism and survival in response to ionizing radiation”
2010: 56th Annual Meeting of the Radiation Research Society, USA. “Hypoxia inhibits disulfide bond formation and protein folding in the endoplasmic reticulum”.

2008: Keystone Symposia: Translational Regulatory Mechanisms, USA. “Hypoxia inhibits protein folding in the endoplasmic reticulum (ER)”

2007: 10th International Wolfsberg Meeting on Molecular Radiation Biology/Oncology, Switzerland.

2004: Oxygen sensing in physiology, pathology and development, USA

2003: 12th International Conference of Radiation Research, Australia

2002: 49th Annual Meeting of the Radiation Research Society, USA

2002: 93rd Annual Meeting of the American Association for Cancer Research, USA

2001: 1st ESTRO workshop on biology in radiation oncology, Denmark

2000: 2nd International Wolfsberg Meeting on Molecular Radiation Biology/Oncology, Switzerland

2000: 47th Annual Meeting of the Radiation Research Society, USA

1999: 11th International Meeting of Radiation Research, Ireland

1998: 1st International Wolfsberg Meeting on Molecular Radiation Biology/Oncology, Switzerland

Book chapters:

Publications (*Corresponding author):

Levitin F, Meester M, Wong A, Koritzinsky M*. Selective oxygen-independent disulfide bond formation promotes VEGF secretion in hypoxia. Submitted

17. Cojocari D, Vellanki R, Sit B, Uehling D, Koritzinsky M, Wouters BG. New small molecule inhibitors of UPR activation demonstrate that PERK, but not IRE1α signaling is essential for promoting adaptation and survival to hypoxia. Radiotherapy and Oncology 2013, Sep;108(3):541-7.

Curriculum Vitae

Rosanna Macri

A. Date of Curriculum Vitae

April 3, 2012.

B. Biographical Information

Contact

Office Address: Ontario Shores Centre for Mental Health Sciences 700 Gordon Street, Whitby, ON L1N 5S9 Tel: (905) 668-5881 x 6779 Cell: (905) 242-2504 Toll Free: 1-800-341-6323 x6779 Mailing Address: 210 Victoria Street, Unit 2803 Toronto, Ontario Tel: (905) 668-5881 x 6779 M5B 2R3

1. Education

Degrees

2010 Master of Health Science (Bioethics), Institute of Medical Science, University of Toronto

2000-2003 Bachelor of Science (Radiation Sciences), Faculty of Medicine, University of Toronto

1998-2000 Bachelor of Science Program (Human Biology and Ecology), University of Toronto

Fellowships and Internships

2011 Senior Ethics Fellow, Toronto East General Hospital, Toronto, Ontario

2010-2011 Academic Fellow in Clinical and Organizational Ethics, University of Toronto Joint Centre for Bioethics

2009 Bioethics Practicum, Bloorview Kids Rehab, Toronto, Ontario

Certificates and Diplomas

2011 Tutorial for the McMaster University Chart Review.
2010  **Ethics in Healthcare**, Ontario Hospital Association, Toronto, Ontario
2008  **Clinical Ethics Summer Institute**, Theme: Building a Foundation for Effective Ethics Programs, Hamilton Health Sciences.
2008  **Introductory Tutorial** for the Tri-Council Policy Statement: Ethical Conduct for Research Involving Humans (on-line)
2007  **Introduction to Bioethics Course** (distance education course), Provincial Health Ethics Network (PHEN), Red Deer, Alberta
1998  **Bilingual Certificate (French)**, Loretto Abbey of Toronto

2.  Employment Experience

**Current Appointments**

2011-present  **Bioethicist**, Ontario Shores Centre for Mental Health Sciences, Whitby, Ontario
2012-  **Course Co-Director**, MSC3008Y Applied Learning in Bioethics (Practicum), MHSc in Bioethics Program, Institute of Medical Science, University of Toronto (anticipated start July 2012)

**Previous Appointments**

2011  **Senior Ethics Fellow**, Toronto East General Hospital, Toronto, Ontario
2010-2011  **Academic Fellow in Clinical and Organizational Ethics**, University of Toronto Joint Centre for Bioethics
2006-2010  **Medical Radiation Therapy Technologist**, Odette Cancer Centre, Sunnybrook Health Sciences Centre, Toronto, Ontario
2007-2010  **First Aid and CPR Instructor**, Heart and Stroke Foundation, Toronto, Ontario
2003-2007  **First Aid and CPR Instructor**, Canadian Red Cross, Toronto, Ontario
2006-2007  **Medical Radiation Therapy Technologist**, Durham Evening Clinic, Odette Cancer Centre, Sunnybrook Health Sciences Centre, Toronto, Ontario
Rosanna Macri

2006  **Medical Radiation Therapy Technologist**, Hammersmith and Charring Cross Hospital, London, England

2005  **Medical Radiation Therapy Technologist**, Mount Vernon Hospital, London, England

2005  **Medical Radiation Therapy Technologist**, Royal Derbyshire Infirmary, Derby, England

2004-2005  **Medical Radiation Therapy Technologist**, Durham Evening Clinic, Odette Cancer Centre, Sunnybrook Health Sciences Centre, Toronto, Ontario

2003-2005  **Medical Radiation Therapy Technologist**, Odette Cancer Centre, Sunnybrook Health Sciences Centre, Toronto, Ontario

3. Professional Affiliations & Activities

2012-present  **Board of Directors**, St. Clair West Services for Seniors, Toronto, Ontario

2010-present  **Radiation Research Ethics Consultant**, Canadian Radiation Research Network, Toronto, Ontario

2010  **Invited Member**, Ontario Health Technology Advisory Committee (OHTAC), Societal and Ethical Values Sub-Committee

2010  **Member**, Expert Panel (Celiac Disease), Medical Advisory Secretariat, Ontario Ministry of Health and Long-Term Care.

2008-present  **Member**, Joint Centre for Bioethics, University of Toronto, Ontario

2008-present  **Member**, Radiation Therapist Editorial Review Board, American Society of Radiologic Technologists (ASRT), Albuquerque, New Mexico

2006-2010  **Ethics Education Facilitator for Oncology**, Odette Cancer Centre, Sunnybrook Health Sciences Centre, Toronto, Ontario

University Committees

2010-present  **Member**, Clinical, Organizational, and Research Ethics (CORE) Network, University of Toronto Joint Centre for Bioethics

2010-present  **Member**, Research Ethics and Education Working Group, University of Toronto Joint Centre for Bioethics

2010-present  **Member**, Bioethics Professionalization Working Group, University of Toronto Joint Centre for Bioethics
2010-2011  **Member**, CORE Network Consult Documentation Task Force, University of Toronto Joint Centre for Bioethics

**Hospital/Community Committees**

2011-present  **Member**, Research Ethics Board, Ontario Shores Centre for Mental Health Sciences, Whitby, Ontario

2011-present  **Member**, Medical Advisory Council, Ontario Shores Centre for Mental Health Sciences, Whitby, Ontario

2011-present  **Member**, Academic Council, Ontario Shores Centre for Mental Health Sciences, Whitby, Ontario

2011-present  **Member**, Accreditation Steering Committee, Ontario Shores Centre for Mental Health Sciences, Whitby, Ontario

2011-present  **Member**, Integrated Programs and Services Committee, Ontario Shores Centre for Mental Health Sciences, Whitby, Ontario

2011-present  **Member**, Interprofessional Practice Advisory Committee, Ontario Shores Centre for Mental Health Sciences, Whitby, Ontario

2011-present  **Member**, Difficult to Discharge Committee, Ontario Shores Centre for Mental Health Sciences, Whitby, Ontario

2011  **Member**, Clinical Ethics Committee, Baycrest, Toronto, Ontario

2011  **Member**, Sexuality Committee, Baycrest, Toronto, Ontario

2010-2011  **Member**, Ethics Committee, Villa Colombo, Toronto, Ontario

2010-2011  **Member**, Community Ethics Network Steering Committee, Community Care Access Centre, Toronto Central

2010  **Member**, End-of-Life Steering Committee, Humber River Regional Hospital, Toronto, Ontario

2010  **Member**, Ethics Committee, Leisure World, Norfinch, Toronto, Ontario

2010  **Member**, Accreditation Senior Leadership Committee, Humber River Regional Hospital, Toronto, Ontario

2009-2010  **Co-Chair**, Ethics Advisory Group, Odette Cancer Centre, Sunnybrook Health Sciences Centre, Toronto, Ontario
2009  **Member**, Planning Committee, Community Ethics Network Fall Workshop, Theme: Defining and Enhancing Ethical Standards in Community Practice, Sunnybrook, Vaughan Estate, Toronto, Ontario

2009  **Co-Coordinator**, End of Life Policy Rollout, Odette Cancer Centre, Sunnybrook Health Sciences Centre, Toronto, Ontario

2007  **Golden Apple Nominee for Exceptional Student Teaching**, Odette Cancer Centre, Sunnybrook Health Sciences Centre, Toronto, Ontario

2004-2008  **Member**, Hospital Ethics Committee, Sunnybrook Health Sciences Centre, Toronto, Ontario

2003-2005  **Member**, Radiation Therapy Research Committee, Odette Cancer Centre, Sunnybrook Health Sciences Centre, Toronto, Ontario

2003-2005  **Member**, CPR Executive Committee, Odette Cancer Centre, Sunnybrook Health Sciences Centre, Toronto, Ontario

4. **Professional Associations/Licenses**

**International**

2007-present  American Society of Radiologic Technologists

2005-2006  Health Professions Council, UK

2003-present  The American Registry of Radiologic Technologists

**National**

2011-present  Canadian Bioethics Society

2003-2009  Canadian Association of Medical Radiation Technologists

**Provincial**

2003-present  The College of Medical Radiation Technologists of Ontario

2003-2009  Ontario Association of Medical Radiation Technologists

5. **Other Research and Professional Activities**

**Critical Appraisal**

2010  Guideline for Palliative Sedation Therapy in Canada. Toronto, Ontario

**Resource Development**

2012  Invited Guest Participation, Allocating Injectable Narcotics During a Period of Undersupply, Draft Criteria. Fraser Health Ethics Services, Surrey, British Columbia
C. Publications

Peer-Reviewed

Manuscripts in Preparation or Submitted for Peer-Review

1. **Macri R,** Mistry N. To friend or not to friend, that is the question…or is it? Submitted to *CMAJ.*

Non-Peer-Reviewed

1. Parke B, **Macri R.** Quotidian ethics: Bioethics beyond hospital walls. Preventative ethics: Educating the community. *JCB Voice*; University of Toronto, Joint Centre for Bioethics, Toronto, Ontario, Feb 2011; 16 (6).

D. Presentations and Special Lectures

1. **INTERNATIONAL**

**Papers/Posters/Abstracts**

2. **NATIONAL**

**Papers/Posters/Abstracts**

3. **PROVINCIAL**

**Papers/Posters/Abstracts**

2010  **Macri R**, Burnett J. Strengthening the Wheel: From a Single Program Spoke to an Interdisciplinary Team. IPE/IPC Showcase, Sunnybrook Health Sciences Centre, Toronto, Ontario.

**Invited Lectures and Presentations**

2011  **Macri R**. The Modern Use of Social Media in Health Care: A Discussion of the Role of the HCP. CCU Rounds. The Hospital for Sick Children, Toronto, Ontario.

2011  **Macri R**. Social Media and Professional Boundaries: Drawing the Line Between HCP and BFF. Informatics Rounds. The Hospital for Sick Children, Toronto, Ontario; April 2011.

2010  Parke B, **Macri R**. The Ethics About the Right to Refuse Treatment. Mental Health Grand Rounds. Humber River Regional Hospital, Toronto, Ontario.

**E. Teaching and Design**

**University Lectures**

2012  **Macri R.** Eldercare and Ethics. Medical Radiation Sciences Program, University of Toronto.

2012  **Macri R.** Ethics and Mental Health. Medical Radiation Sciences Program, University of Toronto.

2012  Wagner F, **Macri R.** Ethics and the Interprofessional Health Care Team. Interprofessional Education Series. University of Toronto; January 2012-March 2012.

2011  Mistry N, **Macri R, Zlotnik Shaul R.** To ‘friend’ or not to ‘friend’, that is the question. PeRLS Lecture Series. Hospital for Sick Children, Toronto, Ontario.

2011  **Macri R.** Internet forums and HTA: An exploration of social media as a tool for public engagement. JCB Bioethics Seminar, University of Toronto; May 2011.

2011  **Macri R.** Eldercare and Ethics. Medical Radiation Sciences Program, University of Toronto; March 2011.

2011  Wagner F, **Macri R.** Ethics and the Interprofessional Health Care Team: The practice and teaching of core competencies for ethical decision-making. Wilfred Laurier University, The Lyle S. Hallman Faculty of Social Work, Waterloo, Ontario; March 2011.

CURRICULUM VITAE

Howard Brian Michaels

BUSINESS ADDRESS: Department of Radiation Physics
University Health Network / Princess Margaret Hospital
610 University Avenue
Toronto, Ontario
M5G 2M9

Gamma Knife Centre / Toronto Western Hospital
399 Bathurst Street
Toronto, Ontario
M5T 2S8
phone: (416)-603-5800  ext 3444
FAX: (416)-603-5155
e-mail: Howard.Michaels@rmpuhn.on.ca

DATE UPDATED: 9 June 2009

EDUCATION:

DEGREES:

1971  B.A.Sc. (Honours)  Engineering Science  University of Toronto
1973  M.Sc.  Medical Biophysics  University of Toronto
1976  Ph.D.  Medical Biophysics  University of Toronto

SCHOLARSHIPS AND FELLOWSHIPS:

1967  Ontario Scholarship
1967  University of Toronto New College Admission Scholarship
1967  University of Toronto Engineering Alumni Admission Scholarship
1971-1972  Medical Research Council of Canada Studentship
1972-1973  Medical Research Council of Canada Studentship
1973-1974  Medical Research Council of Canada Studentship
1974-1975  Medical Research Council of Canada Studentship
1975-1976  National Cancer Institute of Canada: K.M. Hunter Fellowship
**ADVANCED / SPECIALIZED TRAINING:**

1982  Atomic Energy of Canada (AECL) Theraplan radiation therapy computerized treatment planning system training course and certification (Toronto, Ontario)

1984  Atomic Energy of Canada (AECL) Therac-25 medical linear accelerator service course (Kanata, Ontario)

1995-1998  Radionics/RSA stereotactic radiosurgery system training courses and certification:

  1995  XKnife® system (Boston, USA)
  1995  Computer system and UNIX (Boston, USA)
  1996  XKnife-3® treatment planning software (Boston, USA)
  1996  ImageFusion® software (Boston, USA)
  1998  XPlan® treatment planning software (Boston, USA)

2005-2007  Elekta Leksell Gamma Knife stereotactic radiosurgery system training courses and certification:

  2005  GammaKnife system (Cleveland, USA)
  2005  GammaPlan treatment planning software (Cleveland, USA)
  2007  GammaKnife Perfexion technical training (Stockholm, Sweden)

**HONOURS AND AWARDS:**

1969-1971  Elected to Faculty Council, University of Toronto Faculty of Applied Science and Engineering

1970  Delegate to Congress of Canadian Engineering Students (Quebec City)

1971  Second Mile Engineer Award, University of Toronto Faculty of Applied Science and Engineering

1971  Honours Designation Conferred with Bachelor’s Degree

1973-1975  Elected Chairman of Graduate Students’ Association, Department of Medical Biophysics, University of Toronto

1974  5th International Congress of Radiation Research Travel Award (Seattle, U.S.A.)

1976  Radiation Research Society Travel Award (San Francisco, U.S.A.)

1978  Radiation Research Society Young Scientist Award

1979  6th International Congress of Radiation Research Travel Award (Tokyo, Japan)

1983  7th International Congress of Radiation Research Travel Award (Amsterdam, Netherlands)

1984  Selected for inclusion (biographical listing) in Who’s Who in Frontiers of Science and Technology
1985   Selected for inclusion (biographical listing) in Who’s Who in Frontiers of Science and Technology, 2nd edition
1987   8th International Congress of Radiation Research Travel Award (Edinburgh, Scotland)

EXPERIENCE:

HOSPITAL APPOINTMENTS:

1976-1978   Research Fellow in Radiation Medicine, Massachusetts General Hospital, Boston, Massachusetts
1978-1981   Assistant Radiation Biophysicist, Department of Radiation Medicine, Massachusetts General Hospital, Boston, Massachusetts
1978-1981   Physicist, Intraoperative Radiotherapy Program, Department of Radiation Medicine, Massachusetts General Hospital, Boston, Massachusetts
1979-1981   Radiobiologist, Radiosensitizer Clinical Trial, Department of Radiation Medicine, Massachusetts General Hospital, Boston, Massachusetts
1981-1990   Chief Physicist, Ontario Cancer Treatment and Research Foundation Toronto-Bayview Regional Cancer Centre, Toronto, Ontario
1981-1990   Director, Division of Medical Physics, Ontario Cancer Treatment and Research Foundation Toronto-Bayview Regional Cancer Centre, Sunnybrook Medical Centre, University of Toronto, Toronto, Ontario
1982-1990   Radiation Safety Officer, Ontario Cancer Treatment and Research Foundation Toronto-Bayview Regional Cancer Centre, Toronto, Ontario
1987-1990   Scientific Staff, Department of Radiological Sciences, Sunnybrook Medical Centre, University of Toronto, Toronto, Ontario
1987-1990   Scientific Staff, Department of Oncology, Sunnybrook Medical Centre, University of Toronto, Toronto, Ontario
1994-1996   Coordinator, Radiation Decommissioning, Ontario Cancer Institute / Princess Margaret Hospital, Toronto, Ontario
1994-1999   Physicist and Program Coordinator, Stereotactic Radiosurgery and Stereotactic Radiotherapy Program, Radiation Services Division, Ontario Cancer Institute / Princess Margaret Hospital, Toronto, Ontario
1994-1998  Physicist, Department of Clinical Physics, Ontario Cancer Institute / Princess Margaret Hospital, Toronto, Ontario
1995-1996  Team Leader, Radiation Services Clinical Research and Development, Princess Margaret Hospital, Toronto, Ontario
1998-2000  Senior Physicist, Department of Clinical Physics, Ontario Cancer Institute / Princess Margaret Hospital, Toronto, Ontario
2000-present  Senior Physicist, Department of Radiation Physics, Ontario Cancer Institute / Princess Margaret Hospital, Toronto, Ontario
2002-present  Senior Physicist, Stereotactic Radiosurgery and Radiotherapy Program, Radiation Medicine Program, Princess Margaret Hospital / University Health Network, Toronto, Ontario
2003-2005  Lead Physicist, Central Nervous System (CNS) Site Group, Princess Margaret Hospital / University Health Network, Toronto, Ontario
2003-2005  Back-up Lead Physicist, Eye Site Group, Princess Margaret Hospital / University Health Network, Toronto, Ontario
2005-2007  Back-up Lead Physicist, GammaKnife Site Group, Princess Margaret Hospital / Toronto Western Hospital / University Health Network, Toronto, Ontario
2005-present  Treatment Planning and Quality Assurance Physicist, GammaKnife Team, Princess Margaret Hospital / Toronto Western Hospital / University Health Network, Toronto, Ontario
2007-present  Radiation Safety Officer Designate, GammaKnife Facility, Toronto Western Hospital / University Health Network, Toronto, Ontario
2007-2008  Lead Physicist, GammaKnife Site Group, Princess Margaret Hospital / Toronto Western Hospital / University Health Network, Toronto, Ontario

**ACADEMIC APPOINTMENTS:**

1969  Summer Research Student, Ontario Cancer Institute, Toronto, Ontario
1969-1971  Research Student (undergraduate), Ontario Cancer Institute, Toronto, Ontario
1970  Summer Research Student, Ontario Cancer Institute, Toronto, Ontario
1971-1974  Laboratory Demonstrator, Department of Physics, University of Toronto, Toronto, Ontario
1974-1975  Tutor, Department of Physics, University of Toronto, Toronto, Ontario
1976  Post-doctoral Fellow, Physics Division, Ontario Cancer Institute, Toronto, Ontario
1976-1979  Research Fellow in Radiation Therapy, Harvard Medical School, Harvard University, Boston, Massachusetts
1979-1981  Assistant Professor of Radiation Therapy (Radiation Biophysics), Harvard Medical School, Harvard University, Boston, Massachusetts
1982-1992 Assistant Professor, Department of Radiology, Faculty of Medicine, University of Toronto, Toronto, Ontario
1982-1990 Assistant Professor, Department of Medical Biophysics, School of Graduate Studies, University of Toronto, Toronto, Ontario
1982-present Assistant Professor, Department of Medical Biophysics, Faculty of Medicine, University of Toronto, Toronto, Ontario
1988-1992 Adjunct Professor, Department of Physics, University of Waterloo, Waterloo, Ontario
1992-1999 Assistant Professor, Institute of Biomedical Engineering, University of Toronto, Toronto, Ontario
1993-1995 Special Lecturer, Department of Chemical Engineering and Applied Chemistry, University of Toronto, Toronto, Ontario
1994-present Associate Member, Department of Medical Biophysics, School of Graduate Studies, University of Toronto, Toronto, Ontario
1998-present Assistant Professor, Department of Radiation Oncology, Faculty of Medicine, University of Toronto, Toronto, Ontario
1999-present Assistant Professor, Institute of Biomaterials and Biomedical Engineering, University of Toronto, Toronto, Ontario

MEMBERSHIP IN SOCIETIES:

1967-1971 Engineering Institute of Canada
1973-present Radiation Research Society
1974-1992 Canadian Association of Physicists, Division of Medical and Biological Physics
1976-present Association of Professional Engineers of the Province of Ontario
1977-present American Association of Physicists in Medicine
1980-1981 Committee on Basic Science Practice, New England Society for Radiation Oncology
1982-1987 Ad Hoc Subcommittee on Society Journal, Radiation Research Society
1990-present Canadian Organization of Medical Physicists

LICENCE / CERTIFICATION:

1976-present Registered Professional Engineer (P. Eng.) Association of Professional Engineers of the Province of Ontario (P.Eng. # 3517220)
UNIVERSITY AND HOSPITAL COMMITTEE EXPERIENCE:

University of Toronto (U of T)

1969-1971 Member, Faculty Council, Faculty of Applied Science and Engineering
1969-1971 Member, Decanal Committee to Restructure Faculty Council, Faculty of Applied Science and Engineering
1969-1971 Member of Executive, Engineering Institute of Canada Students’ Association
1969-1971 Chairman, Campus Technical Council, Engineering Institute of Canada Students’ Association
1970 Member, Committee for Delegation to Congress of Canadian Engineering Students (Quebec City)
1971 Member, Committee for Delegation to Congress of Canadian Engineering Students (Ottawa)
1973-1975 Chairman, Graduate Students’ Association, Department of Medical Biophysics
1983-1990 Member of graduate student M.Sc. and Ph.D. examination committees, Department of Medical Biophysics
1987-1990 Member, Cooperative Research in Ovary Group (CROG) (U of T + TBRCC + SMC)
1989 Member, Selection Committee, Second Mile Engineer Award, Faculty of Applied Science and Engineering
1989 Member, Use of Human Subjects in Research (Ethics Review) Committee, Faculty of Medicine
1996 Member, Selection Committee, Second Mile Engineer Award, Faculty of Applied Science and Engineering

Toronto-Bayview Regional Cancer Centre (TBRCC)

1981-1990 Member, Department Heads Committee
1981-1990 Member, Planning Committee
1981-1990 Member, Combined Radiation Oncology, Medical Physics, and Radiotherapy Committee
1981-1990 Member of various Search Committees (Department Heads, Physicians, Physicists)
1982-1983 Member, Patient Orientation Committee
1983-1990 Chairman, Research Committee
1984-1995 Member, Joint Task Group: TBRCC Research Space (TBRCC + SMC)
1984-1985 Member, Working Sub-Committee, Joint Task Group: TBRCC Research Space (TBRCC + SMC)
1984 Member, Radiotherapy Working Group
1984-1990  Member, Joint Oncology Committee (TBRCC + SMC)
1985-1990  Member, Space Use Committee
1986-1990  Member, Safety Committee
1987-1990  Member, Cooperative Research in Ovary Group (CROG)
            (U of T + TBRCC + SMC)
1988-1989  Member, Planning Committee for New Treatment Planning and
           Simulator Facilities
1988-1990  Member, Education Advisory Committee, School of Radiotherapy
           Technology
1988-1990  Member, Faculty Liaison Committee, School of Radiotherapy
           Technology
1989-1990  Member, Radiation Services Committee

**Sunnybrook Medical Centre (SMC)**

1983-1990  Member, NMR Imaging Committee
1983-1984  Member, Radiation Safety Group
1984-1985  Member, Joint Task Group: TBRCC Research Space (TBRCC + SMC)
1984-1985  Member, Working Sub-Committee, Joint Task Group: TBRCC
           Research Space (TBRCC + SMC)
1984-1990  Member, Joint Oncology Committee (TBRCC + SMC)
1987-1989  Member, Planning Committee for New SMC Research Building
           (Reichmann Research Building)
1987-1990  Member, Cooperative Research in Ovary Group (CROG)
           (U of T + TBRCC + SMC)

**Ontario Cancer Treatment and Research Foundation (OCTRF)**

1983  Member, Program Committee, 1983 OCTRF Couchiching Conference
1984  Member, Search Committee for Chief Physicist, Ottawa Regional
      Cancer Centre
1985-1987  Member, Ad Hoc Committee to Inquire into the Safety of the
           Therac-25 Linear Accelerator
1985-1990  Member, Committee for the Selection of Radiation Therapy
           Equipment

**Ontario Cancer Institute / Princess Margaret Hospital (OCI/PMH)**

1994-1996  Member, Task Group on Radiation Decommissioning
1994-1996  Member, Task Group on Radiation Safety Training for OCI/PMH
           Research Staff
1994-1995  Member, Task Group on Laboratory Decommissioning
1994-1996  Member, OCI/PMH Global Hospital Decommissioning Planning Committee
1994-1999  Member, Stereotactic Radiosurgery Implementation Group
1994-1999  Member, Terry Fox Program Project Research Group: Measuring Hypoxia in Tumours: Experimental and Clinical Studies
1995-1996  Member, Radiation Services Re-engineering Implementation Working Group
1995-1996  Member, Radiation Services Team Leaders Group
1995-1996  Member, Radiation Services Policies, Procedures and Protocols Committee
1996-1997  Member, Radiation Services CNS (Central Nervous System) Site Group Accreditation Team
1997-1998  Member, Radiation Services Strategic Planning Discussion Group
1997-1998  Chairman, Radiation Services Clinical Physics Strategic Planning Committee
1998-present  Member, Radiation Medicine Program CNS (Central Nervous System) Site Group
1998-present  Member, Radiation Medicine Program Pediatric Site Group
1998-1999  Member, Radiation Medicine Program Senior Advisory Committee
1998-1999  Member, Radiation Medicine Program Research Committee
2002  Member, Radiation Medicine Program Education Group Strategic Planning Committee
2003-present  Member, Radiation Medicine Program Eye Site Group
2004-2009  Member, Quality Investigation Consultants (QUINCy) Team, Radiation Medicine Program Quality Assurance Monitoring Committee
2007-present  Member, External Beam Radiation Safety Group

REFEREE FOR RESEARCH GRANT APPLICATIONS:

1982-1990  Ontario Cancer Treatment and Research Foundation
1988-present  Medical Research Council of Canada / Canadian Institutes of Health Research
1994-1999  Medical Research Council of Canada University - Industry Program

REFEREE FOR MANUSCRIPTS / PAPERS FOR JOURNALS:

1979-present  Radiation Research
1983-present  International Journal of Radiation Oncology, Biology and Physics
1984-present  International Journal of Radiation Biology
1984-present  Cancer
1986-present  Medical Physics
RESEARCH:

MAJOR RESEARCH INTERESTS: SIGNIFICANT EXPERIENCE:

1. Radiation sensitization by oxygen, and chemical radiosensitizers and radioprotectors of hypoxic mammalian cells
2. Chemical modifiers of radiation damage
3. Detection and measurement of hypoxia in tumours
4. Radiation biology as applied to cancer radiotherapy
5. Radiation chemistry
6. Clinical use of radiosensitizers in radiotherapy
7. Medical radiation physics of radiotherapy and nuclear medicine
8. Intraoperative radiation therapy
9. Stereotactic radiosurgery and stereotactic radiotherapy
10. Radiolabelled monoclonal antibodies for cancer treatment
11. Clinical trials in oncology

OTHER RESEARCH INTERESTS:

1. Radiobiological mechanisms in photodynamic therapy
2. Biological effects of non-ionizing electromagnetic radiation: low frequency electric and magnetic fields
3. Biomedical engineering
4. Cross-disciplinary science: astronomy, geology, meteorology, engineering
5. History and philosophy of science and technology
6. Scientific fraud
7. Ethics in medicine and biomedical research

RESEARCH SUPPORT / GRANTS:

1976-1979  Research Associate: Fast Time Processes in Cancer Radiobiology
National Cancer Institute (United States): Research Grant #CA-18614
ER Epp, Principal Investigator

1979-1983  Co-investigator: Radiation Sensitization Applied to Cancer Radiobiology
National Cancer Institute (United States): Research Grant #CA-18614
ER Epp, Principal Investigator

1981-1984  Co-investigator: Intraoperative Radiotherapy
National Cancer Institute (United States): Research Grant
#N01-CM-17481
W.U.Shipley, Principal Investigator
1990  
Principal Investigator: The Density Scaling Method for Dosimetry of Radiolabelled Antibody Treatment for Cancer  
Ontario Centre for Large Scale Computation at the University of Toronto / Cray Canada: Research Grant  
M. Woo, Co-investigator  
[$22,000/yr]

1993  
Senior Research Associate: The Clinical Significance of Vapour Detection from Living Tissues and Organs  
Institute of Biomedical Engineering, University of Toronto / Scintrex: Research Contract  
H. Kunov and A. Dolan, Co-principal Investigators  
[$45,000]

1996-1999  
Group Member: Measuring Hypoxia in Tumours: Experimental and Clinical Studies  
National Cancer Institute of Canada: Terry Fox Program Project Research Grant #006867  
R.P. Hill, Principal Investigator  
[$1,259,853 / 3 years]

NON-REFEREED PUBLICATIONS:

5. Leung PMK, Michaels HB: Technical Report: Radioactivity Decommissioning of the Princess Margaret Hospital [submitted to the Atomic Energy Control Board of Canada]. Ontario Cancer Institute / Princess Margaret Hospital, Toronto, Ontario, 244 pages (1996)

PUBLISHED ABSTRACTS:

2. Michaels HB, Hunt JW: Reaction of oxygen with polynucleotides following attack by hydroxyl radicals. At the 5th International Congress of Radiation Research, Seattle, 1974 (Radiat Rsch 59, 192, 1974)

10. Michaels HB, Ling CC, Epp ER, Peterson EC: Radiosensitization of mammalian cells irradiated at ultra-high dose rates in the simultaneous presence of a hypoxic cell sensitizer and a low level of oxygen. At the 6th International Congress of Radiation Research, Tokyo, 1979
11. Ling CC, Michaels HB, Epp ER, Peterson EC: Interaction of misonidazole and low concentrations of oxygen in the radiosensitization of cultured CHO cells. At the 6th International Congress of Radiation Research, Tokyo, 1979

20. **Michaels HB**: Effects of nitroaromatic radiosensitizers on radiolytic oxygen depletion in mammalian cells and in aqueous solution. At the 7th International Congress of Radiation Research, Amsterdam, 1983

22. **Michaels HB**: Increased radiosensitivity of aerobic mammalian cells following pre-incubation with misonidazole in hypoxia. At the Conference on Chemical Modifiers of Cancer Treatment, Banff, Alberta, 1983

23. Rauth AM, McClelland RA, **Michaels HB**, Battistella R: The oxygen dependence of the reduction of nitroimidazoles in a radiolytic model system. At the Conference on Chemical Modifiers of Cancer Treatment, Banff, Alberta, 1983

26. **Michaels HB**: Radiolytic depletion of oxygen in aqueous solutions. At the 33rd Annual Meeting of the Radiation Research Society, Los Angeles, 1985

27. **Michaels HB**: Oxygen depletion in irradiated aqueous solutions containing electron affinic hypoxic cell radiosensitizers. At the Conference on Chemical Modifiers of Cancer Treatment, Clearwater, 1985

28. **Michaels HB**: Radiolytic oxygen depletion in solutions of nitroaromatic radiosensitizers: Effect of electron affinity. At the 34th Annual Meeting of the Radiation Research Society, Las Vegas, 1986

29. Siwek RA, O’Brien P, Leung P, **Michaels H**: Shielding effects of Selectron applicator and pellets on isodose distributions. At the 4th International Selectron Users Meeting, Vancouver, 1986
30. **Michaels HB**: Oxygen depletion and peroxide formation in irradiated solutions and mammalian cells. At the 8th International Congress of Radiation Research, Edinburgh, 1987

34. Leung PMK, **Michaels HB**: Radioactivity decommissioning of a large treatment and research facility. At the 42nd Annual Meeting of the Canadian Organization of Medical Physicists, Vancouver, 1996 (Med Phys 23, 806, 1996)

44. Laperriere NJ, Sahgal A, Millar BA, Michaels H, Jaywant S, Chan H, Heon E and Gallie B: Focal stereotactic radiotherapy for macular/peripapillary retinoblastoma. At the 15th International Society for Genetic Eye Disease / 12th International Retinoblastoma Symposium / 12th International Congress of Ocular Oncology, Whistler, 2005

57. Van Prooijen M, Michaels HB, Cho YB and Galbraith DM: Comparison of TG-21 and TG-51 calibrations of a Gamma Knife Unit. At the 14th International Meeting of the Leksell Gamma Knife Society, Quebec City, 2008

58. Schwartz M, Tsao M and Michaels H: A possible strategy for radiosurgery of large (>15 cc) arteriovenous malformations (AVMs). At the Canadian Radiosurgery Society Meeting, St. John’s, 2009

OTHER PUBLICATIONS:

PRESENTATIONS:

INVITED PRESENTATIONS:

2. “Kinetics of oxygen diffusion and radiosensitization in mammalian cells irradiated by single and double pulses of high intensity electrons”. At the Ontario Cancer Institute, Toronto, Ontario, 1977

3. “Rationale of hypoxic cell sensitizers in radiotherapy” (Refresher Session). At the New England Society for Radiation Oncology Winter Meeting, Newton, Massachusetts, 1979

4. “Radiation sensitization of mammalian cells at ultrahigh dose rates”. At Tufts University - New England Medical Centre, Boston, Massachusetts, 1979

5. “In vitro studies with radiosensitizers”. At the Ontario Cancer Treatment and Research Foundation Hamilton Clinic, Hamilton, Ontario, 1980

6. “Exploring the time scale of radiosensitization”. At the International Conference on Oxygen and Oxy-Radicals in Chemistry and Biology, Austin, Texas, 1980

7. “Experiments on radiosensitization and hypoxic cell toxicity of misonidazole in CHO cells”. At the Ontario Cancer Institute, Toronto, Ontario, 1980

8. “Ultrasound dose rate (10^{11} \text{ rad/s}) irradiation and sensitization of mammalian cells”. At Harvard Medical School / Massachusetts Institute of Technology, Boston, Massachusetts, 1981

9. “Irradiation of mammalian cells at ultrahigh dose rates”. At Massachusetts General Hospital, Boston, Massachusetts, 1981

10. “Intraoperative radiotherapy”. At Princess Margaret Hospital, Toronto, Ontario, 1981

11. “Radiation hardware”. At the First Oncology Clinical Day, Toronto-Bayview Clinic and Sunnybrook Medical Centre, Toronto, Ontario, 1982

13. “Radiation chemistry in radiobiology”. At Massachusetts General Hospital / Harvard Medical School, Boston, Massachusetts, 1982

18. “Radiation in our environment: science and public perception”. At the Institute of Biomedical Engineering, University of Toronto, Toronto, Ontario, 1992

20. “The stereotactic radiosurgery and stereotactic radiotherapy program at Princess Margaret Hospital”. At the Ontario Cancer Institute / Princess Margaret Hospital School of Radiation Therapy Technology, Toronto, Ontario, 1996

21. “Stereotactic radiosurgery and radiotherapy for brain tumours”. At the Institute of Biomedical Engineering, University of Toronto, Toronto, Ontario, 1996

22. “Stereotactic radiosurgery: Anatomical and physiological considerations”. At the Department of Physiology, Theoretical Graduate Division, University of Toronto, 1997

23. “Med Physconsiderations for stereotactic radiosurgery and radiotherapy”. At the Department of Physics, Carleton University, Ottawa, Ontario, 1998

CONFERENCE / CHAIRMANSHIP EXPERIENCE:

1969-1971 Chairman, Campus Technical Council, Engineering Institute of Canada Students’ Association, University of Toronto

1973-1975 Chairman, Graduate Students’ Association, Department of Medical Biophysics, University of Toronto
1974  Co-chairman of session, 5th International Congress of Radiation Research, Seattle, Washington
1983  Co-chairman of session and member of program committee, 9th Clinical Cancer Research Conference of the Ontario Cancer Treatment and Research Foundation, Geneva Park, Lake Couchiching, Ontario
1983  Panellist, “All About Radiation” information program, Sunnybrook Medical Centre, Toronto, Ontario
1983-1990  Chairman, Research Committee, Toronto-Bayview Regional Cancer Centre
1984  Chairman, Ontario Cancer Treatment and Research Foundation Physicists’ Meeting, 23rd Clinical Conference of the Ontario
1995  Chairman of session, 43rd Annual Meeting of the Radiation Research Society, San Jose, California
1996  Organizer and Chairman, Joint Meeting of Ontario Cancer Institute / Princess Margaret Hospital Department of Med Phys and University of Toronto Institute of Biomedical Engineering
1997-1998  Chairman, Radiation Services Clinical Physics Strategic Planning Committee, Princess Margaret Hospital

RESEARCH SUPERVISION:

UNDERGRADUATE STUDENT SUPERVISION:

Arts and Science Program
McMaster University, Hamilton, Ontario
Thesis title:  Level of Patient Exposure to Ionizing Radiation During Neurointerventional Procedures and Risk of Tumorogenesis After Neurointerventional Procedures

GRADUATE STUDENTS:

1998-1999  Lindsay Auld  M.H.Sc.
Institute of Biomaterials and Biomedical Engineering
University of Toronto
Thesis title:  Dose Verification in Stereotactic Radiosurgery
EXPERIENCE AS AN EXAMINER:

1981-1990  Examiner on Medical Physicist ‘Peer Review A’ and ‘Peer Review B’ examination panels, Ontario Cancer Treatment and Research Foundation
1983-1990  Examiner on graduate student M.Sc. and Ph.D. examination committees, Department of Medical Biophysics, University of Toronto
1988-1990  Examiner, School of Radiotherapy Technology, Toronto-Bayview Regional Cancer Centre
1989  Member, Use of Human Subjects in Research (Ethics Review) Committee, Faculty of Medicine, University of Toronto
1998  External Examiner for Ph.D. thesis examination, Department of Physics, Faculty of Graduate Studies and Research, Carleton University, Ottawa, Ontario
2003-present  Examiner on Medical Physicist Resident ‘Peer Review A’ examination panels, Princess Margaret Hospital
2003-present  Examiner on graduate student M.H.Sc. examination committees, Institute of Biomaterials and Biomedical Engineering, University of Toronto
2008-present  External Examiner for 4th-year engineering students cooperative program work reports, Department of Mechanical and Mechatronic Engineering, Faculty of Engineering, University of Waterloo, Waterloo, Ontario

TEACHING EXPERIENCE:

ACADEMIC / SUPERVISORY COMMITTEES:

1977-1978  Supervisor of summer research students, Department of Radiation Medicine, Massachusetts General Hospital
1983-1989  Supervisor of summer research students, Division of Medical Physics, Toronto-Bayview Regional Cancer Centre and Physics Division, Ontario Cancer Institute
1983-1990  Member of graduate student supervisory and examination committees, Department of Medical Biophysics, University of Toronto
1988-1990  Member of Education Advisory Committee, School of Radiotherapy Technology, Toronto-Bayview Regional Cancer Centre
1988-1990  Member of Faculty Liaison Committee, School of Radiotherapy Technology, Toronto-Bayview Regional Cancer Centre
1994-1995  Supervisor of summer research students, Department of Medical Biophysics, University of Toronto, and Department of Clinical Physics, Ontario Cancer Institute
1994-1995  Member of curriculum development and implementation committee for course Radiation Safety in the Laboratory, Ontario Cancer Institute / Princess Margaret Hospital

LECTURES AND COURSES:

1977-1980  Lectures on radiation chemistry, radiation biology and radiation sensitizers and protectors, for graduate course Cell and Tissue Radiation Biology, Harvard Medical School
1977-1980  Lectures on radiation chemistry and radiation biology to residents, Department of Radiation Medicine, Massachusetts General Hospital
1979   Invited Lecture “Rationale of hypoxic cell sensitizers in radiotherapy” (Refresher Session), at New England Society for Radiation Oncology Winter Meeting, Newton, Massachusetts
1982   Invited Lecture “Radiation chemistry in radiobiology”, Harvard Medical School
1985-1989  Lectures on radiation biology and radiotherapy physics to radiation therapy technologists in Advanced Certification Program, Toronto-Bayview Regional Cancer Centre
1988-1989  Lectures on basic physics, radiation physics, radiation biology, radiotherapy physics, radiation safety and protection, to radiation therapy technologists/students, School of Radiotherapy Technology, Toronto-Bayview Regional Cancer Centre
1993-2004  Lectures on radiation therapy and nuclear medicine, for graduate course Clinical Engineering Instrumentation, Institute of Biomaterials and Biomedical Engineering, University of Toronto
1993-1994  Lectures on nuclear physics, radiation physics, radiation chemistry, radiation biology and radiological health physics, for graduate course Basic Applied Nuclear Processes, Department of Chemical Engineering and Applied Chemistry, University of Toronto
1994-1995  Lectures on sources of radiation in the environment, radiation physics, radiation chemistry, radiation biology, radiation measurement and dosimetry, and radiological health physics, for graduate course Ionizing Radiation in the Environment, Department of Chemical Engineering and Applied Chemistry, University of Toronto
1994-1995  Lectures on sources of radiation in the environment, radiation physics, radiation chemistry, radiation biology, radiation measurement and dosimetry, radiological health physics, and radiation protection, for course Radiation Safety in the Laboratory, Ontario Cancer Institute / Princess Margaret Hospital
1996-2005 Lectures and detailed intensive training of Radiation Therapy staff
(radiotherapy technologists/therapists and others) in theory,
applications, and clinical practice of stereotactic radiosurgery
and stereotactic radiotherapy, Ontario Cancer Institute /
Princess Margaret Hospital

2002-present Lectures on special techniques in external-beam radiotherapy, stereotactic
radiosurgery and radiotherapy, radiation measurement and protection,
for course Radiation Physics for Radiation Oncology Residents,
Department of Radiation Oncology, University of Toronto

2003-present Lectures on radiation safety in radiation therapy research and radiation
safety for new brachytherapy procedures, for course Advanced
Radiotherapy and Medical Physics, Institute of Medical Science /
Department of Radiation Oncology, University of Toronto

2003-2004 Lectures on structure of matter, types of radiation, interactions of radiation
with matter, photon beam characteristics, physics and mathematics of
radioactivity, for undergraduate course Radiation Science 1: Ionizing
Radiation and Its Interaction with Matter, Faculty of Medicine,
University of Toronto / Michener Institute for Applied Health Sciences

2007-present Lectures on treatment planning techniques for stereotactic radiosurgery
and radiotherapy, for course Radiation Physics, Physics Residency
Program, Department of Radiation Oncology, University of Toronto
A. Date Curriculum Vitae is Prepared: 2016 August 3

1. EDUCATION

Degrees
1992 Sep - 2004 Nov PhD, Medieval Studies, University of Toronto
1991 Sep - 1992 Nov MA, Medieval Studies, University of Toronto
1987 Sep - 1990 Nov BA, McGill University

Qualifications, Certifications and Licenses
2015 Nov Collaborative Institutional Training Initiative (CITI) / Good Clinical Practice (GCP), Centre for Addiction and Mental Health, Toronto, Ontario, Canada
2015 Jun Advanced Health Leadership Program, Rotman School of Management, University of Toronto, Toronto, Ontario, Canada
2014 Mar Tri-Council Policy Statement: Ethical Conduct for Research Involving Humans Course on Research Ethics (TCPS 2: CORE), Panel on Research Ethics on Navigating the ethics of human research, Toronto, Ontario, Canada
2009 Jul Best Practices in Clinical Research, UHN
2004 Jul Rotman Leadership Development Program, University Health Network, Toronto, Ontario, Canada

2. EMPLOYMENT

Current Appointments
2013 Feb - present Associate Professor, Psychiatry, Faculty of Medicine, University of Toronto
2012 Sep - present Senior Director, Transformational Education and Academic Advancement, Centre for
Addition and Mental Health, University of Toronto

2012 Jul - present  Associate Professor, Radiation Oncology, Faculty of Medicine, University of Toronto
2012 Jul - present  Associate Professor, Health Policy, Management and Evaluation, Faculty of Medicine, University of Toronto
2015 Apr 1 - 2018 Apr 1  Managing Course Director, Trillium Health Partners, Ontario, Canada

*Medical Psychiatry Collaborative Care Certificate (MP3C Program) is being created as a program to build capacity and accelerate the speed of adoption of collaborative care across the MPA and the province of Ontario.*

Previous Appointments

HOSPITAL

2009 Nov - 2012 Sep  Co-Director, Communications and Knowledge Transfer, TECHNA Institute, University Health Network, Toronto, Ontario
2009 Apr - 2012 Sep  Associate Director, ELLICSR, Princess Margaret Cancer Program, University Health Network, Toronto, Ontario
2005 Jun - 2012 Sep  Director, Knowledge Management and Innovation, Oncology Education/Radiation Medicine Program, Princess Margaret Hospital, University Health Network, Toronto, Ontario
2002 Mar - 2004 May  Manager, Educational Informatics, Princess Margaret Hospital, University Health Network, Toronto, Ontario

RESEARCH

2013 May 1 - 2014 Aug 31  Adjunct Faculty, Interfaculty Program in Public Health, The Western Centre for Public Health and Family Medicine, Western University, London, Ontario, Canada
1995 Sep - 1996 Jun  Research Assistant for James Farge, Michael M. Sheehan, CSB, University of Toronto Press
1991 Sep - 2000 Aug  Senior Researcher for the Periphyseon Project, University of Toronto, Quebec, Canada
1989 May - 1991 May  Research Assistant for Professor Paul Piehler, McGill University

UNIVERSITY

2012 Jan - 2012 Sep  Director, Strategy & Implementation, Continuing Education & Professional Development, University of Toronto
1998 Aug - 1998 Dec  Teaching Assistant for PhD Latin at CMS, Centre for Medieval Studies, University of Toronto
*Instructed Latin at the graduate level, conducted small tutorial groups, set and marked quizzes, taught two plenary sessions*
1997 Jan - 1997 May  Teaching Assistant for PhD Latin, Centre for Medieval Studies, University of Toronto
*Instructed Latin at the graduate level, conducted small tutorial groups, set and marked quizzes*
1996 Jan - 1996 May  Teaching Assistant for MA Latin, Centre for Medieval Studies, University of Toronto
*Instructed Latin at the graduate level, conducted small tutorial groups, set and marked quizzes*
1995 Sep - 1998 Jul  Latin Instructor (September), Centre for Medieval Studies, University of Toronto

UNIVERSITY - CROSS APPOINTMENT

2009 Jul - 2012 Jul  Assistant Professor, Health Policy, Management and Evaluation, Faculty of Medicine, University of Toronto
2007 Jul - 2012 Jul  Associate Member, Institute of Medical Science, Faculty of Medicine, University of Toronto

UNIVERSITY - RANK

2004 Jul - 2012 Sep  Assistant Professor, Radiation Oncology, Faculty of Medicine, University of Toronto
3. HONOURS AND CAREER AWARDS

Distinctions and Research Awards

INTERNATIONAL

Received

2013 Sep  
**Best Poster Award (1st Place),** American Association for Cancer Education. (Distinction)

2013 Sep  
**Fellow of the American Association for Cancer Education,** American Association for Cancer Education. (Distinction)

2011 Apr  
**Outstanding Paper Award,** International Association for the Development of Information Society (IADIS). (Distinction)

2010 Sep  
**R. Davilene Carter Presidential Prize for Best Paper (1st Place),** American Association for Cancer Education (AACE) International Cancer Education Conference. (Distinction)

2009 Oct  
**R. Davilene Carter Presidential Prize for Best Paper (2nd Place),** American Association for Cancer Education (AACE) International Cancer Education Conference. (Distinction)

2007 Oct  
**Gold Star Award,** American Cancer Patient Education Network (CPEN). (Distinction)

For outstanding service and excellence in developing electronic based solutions for patient education.

2007 Sep  
**VIP Award for Innovation,** McKesson. (Distinction)

To Shared Information Management Services (SIMS) Partnership and to Oncology Education, University Health Network for their work on InfoWell, an innovative personal health record. Leads: David Wiljer and Selina Brudnicki. Total Amount: 10,000 CAD

NATIONAL

Received

2012 Jun  
**E.I. Hood Award,** Canadian Association of Medical Radiation Technologists. (Distinction)

1995 Sep - 1996 Sep  
**Doctoral Fellowship,** Social Sciences and Humanities Research Council of Canada (SSHRC). (Research Award)

Total Amount: 14,000 CAD

PROVINCIAL / REGIONAL

Received

2006 Nov  
**Minister’s Innovation Award,** Ministry of Health and Long Term Care (MOHLTC). (Distinction)
David WILJER

Health Care Expo, granted to Princess Margaret Hospital, University Health Network for their work on Getting Results, an innovative personal health record for hematology patients.
Leads: David Wiljer, Mark Minden, Janice Stewart, Cindy Murray, Sima Bogomilsky, and Selina Brudnicki.

2006 Nov

**Team Innovation Award**, Cancer Care Ontario. (Distinction)
To Oncology Education at Princess Margaret Hospital / University Health Network for outstanding innovation and service in developing an innovative patient education program.
Program Leads: Pamela Catton, Audrey Friedman, David Wiljer.

1996 Sep - 1997 Aug

**Ontario Graduate Scholarship**, Government of Ontario. (Research Award)
Total Amount: 12,000 CAD

LOCAL

Received

2016 May

**Best Oral Presentation in the eHealth category for IHPME Research Day**, University of Toronto, Toronto, Ontario, Canada. (Research Award)
Presentation Title: Should mHealth apps answer to the RCT? A review of the appropriateness of mHealth clinical trial methodology.
Authors: Quynh Pham, David Wiljer, Joseph A Cafazzo.

2015 Mar

**Best Faculty poster for the Donald Wasylenki Education Day**, University of Toronto, Toronto, Ontario, Canada. (poster)
For poster titled: A Pilot Survey to Assess Mental Health Teaching Professionals’ Attitudes toward Involving Patients in Education
Carmen Wiebe, Sophie Soklaridis; David Wiljer; Karen MacCon; Sacha Agrawal; michael-jane.levitan, Sandra Cunning; Dana-Lea Thompson.

2015 Feb

**Best Poster Presentation in International Health at Medical Student Research Day**, Collaborator, University of Toronto, Toronto, Ontario, Canada. (Poster)
Best poster for Perceptions and Experiences of Perinatal Metal Disorders in Rural North Vietnamese Communities.
Authors: Abrams, D., Nguyen, L.T., Murphy, J., Younji, L., Wiljer, D.

2014 Feb

**Best Faculty Poster Award - Donald Wasylenki Education Day 2014**, University of Toronto, Toronto, Ontario, Canada. (Poster)
Best Faculty poster: David Wiljer, Co-applicants: Sandra Cunning, Andrew Johnson, Michael-Jane Levitan, Karen McCon. “The multi-faceted role of clients and families in medical education”.

2012 Jun

**Building recipie and understanding nutrition for cancer-survivor health (BRUNCH)**, University Health Network Allied Health Research Day - Best poster by an experienced researcher. (Distinction)

2012 Jun

**Dr. Petrie Memorial Award**, Canadian Association of Medical Radiation Technologists. (Distinction)
Barriers to accessing radiation therapy in Canada: a systemic review.

2011 May - 2012 May

**Research Leadership Award**, Radiation Medicine Program, Princess Margaret Hospital. (Distinction)

1998 Sep - 1999 Aug

**Colin Robert Chase Award**, University of Toronto. (Distinction)
Graduate student award. Total Amount: 2,500 CAD

1994 Sep

**Open Fellowship**, University of Toronto. (Research Award)
Total Amount: 4,500 CAD
Teaching and Education Awards

LOCAL
Received
2011 May  Radiation Medicine Program Education Mentorship Award, Dept of Radiation Oncology, Faculty of Medicine, Princess Margaret / University Health Network. (Multilevel Education) For mentorship to undergraduate and graduate students.

Student/Trainee Awards

NATIONAL
Received
2010 Sep - 2011 Aug  Master’s Award: Frederick Banting and Charles Best Canada Graduate Scholarships, Supervisor, Awardee Name: Moeinedin F M. Canadian Institutes for Healthcare Research (CIHR) Improving Transition of Care Among Cancer Patients, General Practitioners, and Oncologists through the Electronic Means of Communication. Total Amount: 17,500 CAD

4. PROFESSIONAL AFFILIATIONS AND ACTIVITIES

Professional Associations

2016 May - present  Cross-Appointed Researcher, The Wilson Centre
2012 Jan - present  Member, Association for Medical Education in Europe (AMEE)
2011 - present  Member, Society for Academic Continuing Medical Education (SACME)
2004 - present  Member, American Association of Cancer Education (AACE)
2004 - present  Member, Canadian Association of Radiation Oncology
2004 - present  Member, Cancer Patient Education Network (CPEN) Canada
2004 - present  Member, Cancer Patient Education Network (CPEN) US
2011 - 2013  Member, International Association for Development of Information Society (IADIS)
2004 - 2008  Member, Canada’s Health Informatics Association, COACH
1999  Member, Canadian Patristic Society
1998  Member, American Academy of Religion
2016 Apr  Member, The Wilson Centre

2011 - 2012 President Elect, American Association of Cancer Education (AACE), United States.
2010 Sep - 2011 Sep Vice President, American Association of Cancer Education (AACE), United States.
2010 - 2014 Oct Member, AACE Executive Council, United States.
2010 - 2011 Member, 2011 International Cancer Education Conference Planning Committee
2009 - 2012 Member, Web Development Committee
2008 - 2010 Treasurer
2007 - 2008 Member at Large, Executive Council
2007 - 2008 Chair, Finance Committee

American Cancer Patient Education Network (CPEN)
2003 - 2006 Co-Chair, Electronics Committee

Mayo Clinic/Society of Academic Continuing Medical Education (SACME)
2008 Member, Continuing Medical Education Consensus Committee, Continuing Education

National Cancer Institute
2009 - 2012 Co-Chair, United States of America Cancer Education Task Force

NATIONAL
Canadian Committee for Patient Access to Electronic Health Records (CCPAEHR)
2005 - 2009 Founding Chair

Canadian Partnership Against Cancer (CPAC)
2008 - 2009 Portal Evaluation Lead

Cancer Patient Education Network (CPEN)
2004 - 2007 Member, Steering Committee
2003 Co-Chair, Canada Conference Planning Committee

Centre for Addiction and Mental Health
2013 Aug - present Member, Portico National Editorial Board, Toronto, Ontario, Canada.

Oncology Advanced Practice Nursing (APN)
2008 - 2009 Member, National Steering Committee
For the e-Mentorship Program, a national initiative supported by the Canadian Partnership Against Cancer.

The Association of Faculties of Medicine of Canada
2016 Feb - present AFMC Research Subcommittee, Canada.

PROVINCIAL / REGIONAL
Canadian Urological Association
2010 - 2011 Conference Co-Chair, Fostering Partnership, Genitourinary (GU) Cancer Survivorship Meeting, Toronto.
Cancer Care Ontario

2009  
**Chair**, E-Resource Working Group, Ontario Oncology Nursing Mentorship Program  
*A provincial initiative supported by Cancer Care Ontario.*

2009  
**Member**, Knowledge Transfer and Integration of Knowledge Working Group, Ontario Oncology Nursing Mentorship Program  
*A provincial initiative supported by Cancer Care Ontario.*

2007 - 2009  
**Team Leader**, Electronic Infrastructure, Advanced Practice Nursing (APN) eMentorship Project  
*A provincial initiative supported by Cancer Care Ontario.*

Cancer Quality Council of Ontario

2009  
**Member**, Review Committee 4th Annual Quality and Innovation Awards  
*Supported by Cancer Care Ontario and the Canadian Cancer Society.*

Centre for Addiction and Mental Health

2013 Mar - present  
**Member**, Provincial Council, Toronto, Ontario, Canada.

Knowledge Integration for Better Healthcare

2010  
**Co-Chair**, Insight Meeting, Toronto.

Ministry of Labour & Ministry of Health and Long-Term Care

2016 Jan - present  
Communication and Knowledge Translation Working Group, Ontario, Canada.

Ontario Ministry of Health and Long Term Care (MOHLTC)

2008  
**Infrastructure Lead**, De Souza Institute  
*A provincial oncology nursing initiative supported by MOHLTC.*

University of Toronto

2010 - 2012  
**Member**, Conference Planning Committee  
*Radiation Therapy: Inquire, Inspire, Innovate (RTi3), annual radiation therapy conference hosted by the Department of Radiation Oncology.*

2009 - 2012  
**Member**, Target Insight Planning Committee  
*Annual radiation medicine conference hosted by the Department of Radiation Oncology.*

C. Academic Profile

1. RESEARCH STATEMENTS

Statement of Scholarly and Professional Activity.
This research program is focused on transforming the patient experience in cancer care by empowering the individuals, the organizations and the communities through education and knowledge exchange. The scholarly and professional activities are clustered around three major themes:

1) Utilizing new technologies and innovations to promote the exchange of information from health providers to providers and patients and from patient to patients. In particular the research focuses on the role of personal health information as a vehicle for the dissemination of tailored health information that supports self-managed care.

2) Fostering innovative health professional and continuing education that is designed to transform the patient experience. In particular, this research focuses on the use of new technologies that bridge the barriers of time and geography, as well as the traditional silos of health disciplines.

3) Measuring organizational change and assessing the impact of innovation and new practices on health behaviours and health outcomes.

The research has had two main focal points: 1) examining new technologies to enhance the patient experience and 2) investigating and assessing new technologies for effective knowledge exchange for health care professionals.

The framework for the research on the patient experience is based on the Wagner Model of Chronic Care. Within this framework, this research platform specifically examines the role that technologies can play in establishing productive interactions within the cancer care system. There are four focal points or pathways that have been identified for this activation process. The first is the clinical encounter itself, the second is the provision of general information, the third is the provision of personal health information and finally the access to the experiences of others, experiential or social learning.

While the research platform encompasses all four pathways, the focus to date has been on two particular pathways: 1) access to personal health information (PHI) and 2) the use of social networking (SN) applications to promote the exchange of experiential information. The PHI pathway story has evolved greatly over the past decade. Through the work of this research platform, we have developed a framework for understanding how this pathway works as well as the role that access to real-time PHI has on the patient experience and the clinical practice. The focus on real-time PHI allows for the investigation of the role of access to PHI in self-managed care. The experiential pathway has been examined through the development and study of social networking applications. A social networking platform has been developed and the role of real-time chat as a mechanism for distance-based clinical teaching and education has been assessed.
From the health professional perspective, the primary focus has been on investigating the role of effective knowledge transfer in accelerating the adoption of new technologies to enhance cancer care and cancer control. A number of conceptual frameworks and models have been utilized to guide this work, including the Lau framework for evaluating eHealth technologies, the Technology Acceptance model and Rogers’s Diffusion of Innovation model. In addition, the research has focused on the role of inter-professional practice and education on technology adoption.

D. Research Funding

1. GRANTS, CONTRACTS AND CLINICAL TRIALS

PEER-REVIEWED GRANTS

FUNDED

2015 Oct - 2019 Oct Principal Investigator. ThoughtSpot: Enhancing self-efficacy for help-seeking among transition-aged youth in postsecondary settings with mental health and/or substance use concerns using crowd-sourced online and mobile technologies. Canadian Institutes of Health Research. Oper Grant:eHealth Innov Partnership Program(eHIPP)-Youth&Ad. Collaborator(s): Ms. A. Abi-Jaoude Ms. G. Chaim Dr. K. Cleverley Prof. G. Eysenbach Dr. J. Henderson Dr. J. Hoch Dr. W. Isaranuwatchai Dr. H. Jiang Dr. M. Law Dr. A. Levinson Ms. J. Robb Dr. A. Voineskos. 749,980 CAD. [Grants]

Mon repère-santé is a project that will map culturally and linguistically appropriate services related to mental health and addiction across Ontario and share the information through a mobile application, text-messaging service and website. This project seeks to empower Francophone youth in grades 9 to 12 in Ontario to find the services that meet their needs through using technologies that they have literally at hand.

2012 Oct - 2016 Sep Co-Investigator. A randomized controlled trial of an online support group sexual distress due to gynecologic cancer. Canadian Institutes of Health Research (CIHR). Ovarian Cancer Canada. PI: Classen, Catherine Clara. Collaborator(s): Ferguson, Sarah, Barbera, Lisa; Brotto, Lori; Carter, Jeanne; Chivers, Meredith; Koval, John; Robinson, John; Urowitz, Sarah; Wiljer, David. 637,056 CAD. [Grants]

End of Grant Knowledge Supplement.

Partnership in Health System Improvement, meeting planning and dissemination grant.

David WILJER

Research Community Development Funding Program Workshop.

NON-PEER-REVIEWED GRANTS

FUNDED

2015 Jul - present  Principal Investigator. Youth Education Program. Slaight Centre. Education. 320,000. [Grants]

2015 - present  Principal Investigator. Personalized Patient Education Program. CAMH Foundation. Etherington Funding. 300,000. [Grants]

Projects include Digital initiatives, Family engagement, Patient- and Family-as-Teacher, Quality improvement/patient safety.

Next Steps: What’s next? Meeting the information needs of our patients, serving transition-aged youth and implementing a strategy to engage families.

2015 - present  Co-Principal Investigator. MP3C. MPA/THP. PI: Wiljer, D. 860,000 CAD. [Grants]

2016 Jan - 2017 Aug **Principal Investigator.** Working on CIHR funded project on ThoughtSpot: Enhancing self-efficacy for help-seeking among transition-aged youth in postsecondary settings with mental health and/or substance use concerns using crowd-sourced online and mobile technologies. University of Toronto, Faculty of Medicine. CREMS Research Scholar Program. Collaborator(s): Yunlin Xue (Student). 7,500 CAD. [Grants]

2015 - 2020 **Co-Principal Investigator.** Simulation Centre (MPA). CAMH Foundation. PI: Nirula, L. Collaborator(s): Wiljer, D. 2,000,000. [Grants] *development of simulation projects to support MPA.*

2015 - 2018 **Co-Principal Investigator.** Well at Work. CAMH Foundation. PI: Nirula, L. 850,000 CAD. [Grants] *to develop well at work program with a mandate to help transform the workplace.*

2011 Jul - 2015 Jun **Principal Investigator.** Quality Care: Innovating with Confidence for Tomorrow’s Radiation Therapy. Varian Canada Inc. Collaborator(s): Wiljer D, Catton P, Jaffray D, Harnett N, Montgomery F, Gospodarowicz M. 1,000,000 CAD. [Industrial Grants]

2011 Jul - 2012 Jun **Principal Investigator.** Testicular Cancer Survivorship Follow-up Care. Princess Margaret Testicular Site Group. Collaborator(s): Wiljer D, Bender J, Gospodarowicz M. 8,000 CAD. [Grants]

2010 Jul - 2013 Jun **Co-Principal Investigator.** Navigating your cancer journey: Improving the patient experience. Anonymous Donor. Collaborator(s): Wiljer D, Friedman A, Catton P. 500,000 CAD. [Contracts]

2010 Jul - 2011 Jun **Principal Investigator.** The patient experience and the diagnostic phase of the cancer journey: Phase II. Cancer Care Ontario. Collaborator(s): Wiljer D, Urowitz S, Moeinedin M. 64,916 CAD. [Grants]

2009 Jan - 2009 Dec **Co-Principal Investigator.** Oncology interactive navigator: A pilot study. Canadian

Princess Margaret Hospital Foundation and UHN Health Chair.

Co-Principal Investigator. Caring voices. Klick Communications. Princess Margaret Hospital Foundation (The). Collaborator(s): Catton P, Wiljer D. 120,000 CAD. [Grants]

This study is supported by non-peer reviewed funding provided by the National Cancer Institutes of Canada (NCIC).

Principal Investigator. PMH virtual tour. Princess Margaret Hospital Foundation (The). Collaborator(s): Wiljer D, Nyhof-Young J, Friedman A, Catton P. 30,000 CAD. [Grants]

2003 Jul - 2004 Jun

2003 Jul - 2004 Jun
**Co-Investigator.** The impact of SARS on information seeking and psychosocial functioning of newly diagnosed patients and their family members. Princess Margaret Hospital. Department of Radiation Oncology. Collaborator(s): Nyhof-Young J, Friedman A, Wiljer D, Catton P. 6,000 CAD. [Grants]

### E. Publications

#### 1. MOST SIGNIFICANT PUBLICATIONS

   As part of a much larger research program that represents a multi-institutional study, this paper suggests the important impact that online support groups can have for women with sexual dysfunction after treatment for a gynaecological cancer. In addition, it is one of the first studies to explore the use of multiple online strategies including forums and chat to provide support. This study helped to demonstrate that women benefited from the anonymity of an online support group and still obtained the required social support. This feasibility study is being developed into a RTC and will lead to the development of clinical interventions that will assist with the potentially devastating sequelae of gynaecologic cancers. In addition, it has helped to bring attention to issues that have not been well studied or clinically supported. This paper has been recognized for its contribution to the field of cancer education by the American Association of Cancer Education.

   This paper contributes significantly to the literature in the field of personal access to health information by demonstrating the positive impact that access to personal health information has on patients and suggests that real time access to certain types of personal health information does not negatively impact on patient anxiety levels. In addition, this paper reports that patients feel empowered and better prepared to interact with their health care professionals with access to this type of health information.

   This paper demonstrated a novel approach to providing patients with the information they need to guide them through the cancer experience. It demonstrated that a clinically led, reflective process has an important impact on patient self-efficacy and patient’s ability to identify the services that they required throughout the cancer journey. This study has provided important guidance in the development of this clinical intervention and was recognized for its contribution to cancer education by the American Association of Cancer Education.

This paper examined the state of electronic health records across Canada, demonstrating that adoption had not only been slow, but also very fragmented from an organizational perspective. Financial issues and clinician buy-in were identified as two of the major barriers to adoption. In addition, the study informed a group of national experts developing a framework for providing access to health information.

This paper presents a seminal framework for the implementation of accessible health records online. The work is built on the engagement of national and international experts from across North America and lays a solid groundwork for ensuring that education and organizational change are integral components of patient accessible health records.

2009

Self-Managed access to personalized healthcare through automated generation of tailored health educational materials from electronic health records. Association for the Advancement of Artificial Intelligence (AAAI). Washington, United States. Authors: DiMarco C, Wiljer D, Hovy E. Published Proceedings.

2008 Oct

2008 Sep 4

2008

2007 Patient access to the electronic health record. The Electronic Patient Record (TEPR) Conference. Dallas, United States. Presenter(s): Wiljer D.

2007 UCH Audio Conference speaker/presentation. Patient access to electronic medical records: Health System Shares Lessons Learned. Health Information Portability and Accountability Act (HIPAA) Compliance Alert. Presenter(s): Wiljer D.

2006 From Policy to Practice: Assessing the impact of staging policies for stage across Canada. International Union for Cancer Control (UICC) World Cancer Congress. Washington, United States. Authors: Wiljer D, Brierley J, Logan H.

2006.

2005  

2005  

2005  

2004 Oct 14  

2004 Oct 14  

2004  
Off the record: Providing malignant haematology patients access to their electronic health record to promote patient-centered care. 4th World Conference for Cancer Organizations, International Union for Cancer Control. Dublin, Ireland. Authors: Wiljer D, Bogomilsky S, Catton P, Murray C, Stewart J, Minden M.

2004  

2004  
One size doesn’t fit all: Using a systematic search tool to tailor information to individual needs. Cancer Culture and Literacy Conference. Tampa, United States. Authors: Jusko Friedman A, Arbuckle M, Nyhof-Young J, Wiljer D, Catton P. Poster presentation.

2004  

2004  

2004

Other Lectures and Presentations

2006 Patients and providers, partners in learning: An organizational strategy for improving patient teaching. AACE. San Diego, United States. Authors: Friedman A, Wiljer D, Wright I. (Continuing Education).

Peer Reviewed Proceedings

Other Presentations

2. NATIONAL

Invited Lectures and Presentations

2012 May  Invited Speaker. Personal Health Information: Empowering Patients One Record at a Time. PHR Research Symposium. Montreal, Quebec, Canada. Presenter(s): Wiljer D.

2009 Empowering the Health System: A New Information Paradigm. eHealth Summit. Montebello, Quebec.

Presented Abstracts

2016 Sep 22 Presenter. Collaborative Care: Our Social Responsibility. Canadian Psychiatric Association (CPA) Conference. Toronto, Ontario, Canada. Presenter(s): Kljenak, D, Geist, R., Wiljer, D.

2016 Apr 16 Presenter. Facilitating the Integration of Quality Improvement (QI) and Continuing Professional Development (CPD) at both the Hospital and Departmental Levels within the Discipline of Psychiatry.

2015 Apr  

2012  
Thyroid cancer survivors supportive care needs. A cross-sectional survey. 82nd Annual Meeting of the American Thyroid Association. Quebec City, Quebec, Canada. Authors: Bender J, Wiljer D, Sawka A, Alkazaz N. Brierley J.

2011 May 30  

2011 May 4  

2010  
Survivorship empowerment model for integrated cancer care (SEMICC). Canadian Partnership Against Cancer Symposium. Montreal, Quebec. Authors: Catton P, Jusko Friedman A, Secord S, Urowitz S, Wiljer D.

2010  

2010  

2010  

2010  

2009  
Empowering the Health System: a new information paradigm. 9th Annual e-Health Summit. Montebello, Quebec. Presenter(s): Wiljer D.

2009  

2009  

2009  
Supporting access: Understanding the needs of patients receiving personal health information. GOPUBLIC – Global Leadership Forum for Cancer Control. Ottawa, Ontario. Authors: Wiljer D, Urowitz S, Leonard K, Aputu E, Quartey N.

2009  

2006 Sep The role of the virtual coach in learning radiation treatment planning. Canadian Association of Radiation Oncology (CARO) 2006. Calgary, Alberta. Authors: Rauth S, **Wiljer D**, Palmer C, Kane G.

Gospodarowicz.

2006  
Caring to the end of Life: How information professionals contributed to developing an outline tailored palliative care resource for patients, caregivers and health care professionals. Canadian Health Libraries Association. Vancouver, British Columbia. Authors: Arbuckle M, Wiljer D, Jones E, Friedman A, Catton P.

Other Lectures and Presentations

3. PROVINCIAL / REGIONAL

Invited Lectures and Presentations

The Engaged & Empowered Patient: Innovative Paradigms for the Health Information Technologies. Waterloo Institute for Health Informatics Research (WIHIR) Research Seminar, University of Waterloo.

From Information to Action: a New Paradigm for Chronic Disease Management (CDM). Insight: Information Technology Within LHINs. Toronto, Ontario.

E platforms and Resources. eMentorship National Steering Committee Meeting. Toronto, Ontario.

Getting Results: Giving Haematology Patients Access to Their EHR. OHA Wait Times Strategy Minister’s Innovation Award Winners. Toronto, Ontario. Invited to present.

Tailored Resource for Patient-Centred Care Moving Beyond a One Size Fits All Approach. William Osler Hospital. Toronto, Ontario.

Presented Abstracts

Other Lectures and Presentations

The engaged & empowered patient: innovative paradigms for the health information technologies. WIHIR Research Seminar, Waterloo Institute for Health Informatics Research. Waterloo, Ontario. Presenter(s):
David WILJER

Wiljer D. (Continuing Education).

Peer Reviewed Proceedings

4. LOCAL

Invited Lectures and Presentations

2015 Dec 1 Invited Speaker. Co-creating and crowd-sourcing educational approaches and online solutions with transition aged youth. CAMH Slaight Family Centre for Youth in Transition Conference / Education Day. Toronto, Ontario, Canada. Presenter(s): Wiljer, D.

2015 Oct 7 Invited Moderator. Is Self Employment Right for You? by Ari Cohen from RISE. 3rd annual Mindfest, University of Toronto, Department of Psychiatry. Toronto, Ontario, Canada. Presenter(s): Wiljer, D.

2013 Dec 3 Presenter. Defining Interprofessional Teaching Competencies at a Large Mental Health Teaching Hospital. Presenter(s): Wiljer D, Pottinger A, Soklaridis S, Nirula L. Poster presented at IME/CFD/CHSE Summit on Faculty Development.

2012 May Invited Speaker. Learning From Failure. Centre for Innovation in Complex Care, Innovation Rounds. Toronto, Ontario, Canada. Presenter(s): Wiljer D.

2007 From Electronic Health Record (EHR) to Personal Health Record (PHR): How Do we Get There? Canada Health InfoWay. Toronto, Ontario.

Presented Abstracts

2016 Jan 26 Presenter. Innovation through student engagement. CAMH Education Achieve Week. Toronto, Ontario, Canada. Presenter(s): Wiljer D., Johnson, A., Abi-Joude, A.

2013 Dec Defining interprofessional teaching competencies at a large mental health teaching hospital. Integrated Medical Education Summit on Faculty Development. Toronto, Ontario, Canada. Presenter(s): Nirula L, Pottinger A, Soklaridis S, Wiljer D, Silver I.

2012 May **Presenter.** Princess Margaret Online. Princess Margaret Cancer Centre, Innovation Rounds. Toronto, Ontario, Canada. Presenter(s): Wiljer D and Willson D.

2003 “It was an added burden”: Understanding the patient response to efforts to isolate and contain SARS at Princess Margaret Hospital. SARS commission. Toronto, Ontario. Authors: Nyhof-Young J, Friedman A, Wiljer D, Catton P. Podium presentation to the public hearings of the SARS commission.

**Presenter.** A ‘Top 5’ Education Paradigm? Uof T Department of Radiation Oncology Rounds. Toronto, Ontario, Canada. Presenter(s): Wiljer D, Catton P.

**Other Lectures and Presentations**

2010 Reviewer Recognition Certificate. Office of Continuing Education and Professional Development, Faculty

Other Presentations

G. Teaching and Design

1. INNOVATIONS AND DEVELOPMENT IN TEACHING AND EDUCATION

2012 Jul - 2012 Aug Summer Series - A Road Map for Global Health (2011-2016), Continuing Education, Faculty of Medicine, Dept of Radiation Oncology
Designed and organized a Summer rounds series devoted to exploring Global Health.

2012 Jan - 2012 Jul Innovation Rounds, Continuing Education, Faculty of Medicine, Dept of Radiation Oncology
Designed and organized a rounds series devoted to exploring a wide rage of cancer innovations in the clinical setting.

2011 Jul - 2011 Aug Summer Series - UT DRO Summer of Science Series, Continuing Education, Faculty of Medicine, Dept of Radiation Oncology
Designed and organized a Summer rounds series devoted to Science.

2011 Jan - 2011 Dec Innovation Rounds, Continuing Education, Faculty of Medicine, Dept of Radiation Oncology
Wiljer D, Director, Knowledge Management & Innovation
Designed and organized a rounds series devoted to exploring a wide range of cancer innovations in the clinical setting

24-Nov-11 Dante Morra, Navigating the Perfect Storm through Innovation An Introduction to the Centre for innovation in Complex Care

27-Oct-11 Timothy Chan, Brendan Eagan, Engineering an optimized ambulatory clinic schedule at Princess Margaret Hospital

22-Sep-11 Maria Tassone, Frances Hoy, Creating a generative future – Stories of innovation through collaboration

28-Jul-11 Eilidh Giraudy, Terri Stuart-McEwan, The waiting is over: Rapid diagnostic assessment programs in cancer at UHN

23-Jun-11 Ralph S. DaCosta, Innovations in biophotonics at UHN: Advancing basic
research and clinical

26-May-11 Madeline Li, Alyssa Macedo, DART at PMH: Taking distress out of distress screening translation in oncology

28-Apr-11 Lisa Barbera, Kim Pearson, Martha Wyatt, What’s function got to do with it?

24-Mar-11 Bruce R. Thomadsen, Quality in Brachytherapy

24-Feb-11 Lyle J. Palmer, The Ontario Health Study: Enabling revolutionary and translational science

2010 Jul - 2010 Sep
Summer Series - Innovating with Confidence: Advancing Quality, Safe Care (Course Director), Continuing Education, Faculty of Medicine, Dept of Radiation Oncology
Designed and organized a Summer Rounds series devoted to exploring notions of quality and safety from a multi-disciplinary perspective

02-Sep-10 David Jaffray/Jean-Pierre Bissonnette Life at the Bleeding Edge: Can We Build a System to Innovate with Confidence?
26-Aug-10 Ted Reesor/Tony Teti Lessons from Aviation
19-Aug-10 Bryce Taylor The Surgical Check List: Implementing the Impossible
12-Aug-10 Steve Pevere/Brenda Kenefick Lean in Healthcare – It’s All About the Patient Journey
05-Aug-10 Kerry Bowman Ethical Considerations in Quality and Safety
29-Jul-10 Jeffrey Hoch Not Everything Worth Doing is Worth Doing Well: The Opportunity Cost of Perfect
22-Jul-10 Kaveth Shojania Patient Safety and Medical Error in Radiation Oncology
15-Jul-10 Edward Etchells Making Patients Safer.

2010 Jan - 2010 Dec
Innovation Rounds, Continuing Education, Faculty of Medicine, Dept of Radiation Oncology
Wiljer D, Director, Knowledge Management & Innovation
Designed and organized a Rounds series devoted to exploring a wide range of cancer innovations in the clinical setting

16-Dec-10 Mary Gospodarowicz, Sarah Downey, The Kuwait Adventure

25-Nov-10 Danny Nashman, Lue-Ann Swanson, What if PMH were more like the Four Season? Taking the Service We Provide to the Next Level

28-Oct-10 Vishal Kukreti, Rachel White, Safer Chemotherapy Administration? High Fidelity Usability Testing of Barcoding Technology

23-Sep-10 Elizabeth Abraham, Grace Eagan, Caring Across the Language Barrier at PMH Leveraging Technology to Reach More LEP Patients Through Remote Interpretation

22-Jul-10 Arjun Sahgal, Spine Stereotactic Body Radiotherapy Minimal Access Spine Surgery: Pushing the Limits of our Technology and Co-operation

27-May-10 Sarah Downey, Brenda Kenefick, Steve Pevere, Lean in Healthcare, It’s all about the patient’s journey.

2010 - 2010 Aug
Evaluation Methods for Health Informatics. Graduate Education, Faculty of Medicine, Inst of Health Policy, Mgmt & Evaluation, University of Toronto

2009 Jan - 2009 Dec
Innovation Rounds, Continuing Education, Faculty of Medicine, Dept of Radiation Oncology
Wiljer D, Director, Knowledge Management & Innovation
Designed and organized a Rounds series devoted to exploring a wide range of cancer innovations in the clinical setting

17-Dec-09 Dr. R. A. Badwe, Tata Memorial Centre and Cancer Tata Memorial Centre in India

26-Nov-11 Anna Greenberg, Introducing Cancer View Canada

22-Oct-09 Sandy Buchman, Toronto Regional Cancer Program Primary Care and the Care Program; A Partnership for Patients

24-Sep-09 Sarah Downey, Michael Caesar, Neil Fleschner, John Kuruvilla, “Lean on Me”: A Transformational Journey Begins

23-Jul-09 Dr. Michael Gardam, Medical Director IPAC, UHN Airing our dirty laundry: public reporting of infection rates

25-Jun-09 Audrey Friedman, Director, Patient Education and Survivorship, Patient Education@PMH: an Innovative Journey

23-Apr-09 Edward Rubinstein, More Than Talkin’ Trash: Greening @UHN

26-Mar-09 Linda Rabeneck Launching Ontario’s Colorectal Cancer Screening Program

26-Feb-09 Azizunissa Irumnaz, Anne Eisenhauer Ontario Translational Research Network, Translational Research – Sounds good!! Wh.

2005 - 2007 eHealth for Clinical Practice: A Selective Course Developed for the Radiation Science Program, Undergraduate MD, Faculty of Medicine, Dept of Radiation Oncology, Michener and the University of Toronto

H. Research Supervision

1. PRIMARY OR CO-SUPERVISION

Undergraduate Education

2010 Co-Supervisor. Emily Lovrics. Reviewing tools and metrics for measuring Inter-professional practice.

2010 Primary Supervisor. Matthew To. Understanding the needs of testicular cancer survivors.

2004 Primary Supervisor. David Neligan. Information and Education in the New Clinical
2004  **Primary Supervisor.** Amanda Schwartz. *Information and Education in the New Clinical Encounter.*

2004  **Primary Supervisor.** Ben Roffey. *Information and Education in the New Clinical Encounter.*

### Graduate Education

2013 Sep - 2019 Sep  **Primary Supervisor.** Alaina Cyr, Health Policy, Management and Evaluation. *An ethnographic exploration of healing on Twitter.*

2010  **Primary Supervisor.** Emma Apatu. *Qualitative research understanding patient perceptions on InfoWell.*

2009 - 2010  **Primary Supervisor.** MSc. Marjan Fatima Moeinedin. *Improving transition of care among cancer patients, general practitioner, and oncologist through the electronic means of communication.* Collaborator(s): Kevin Leonard (Committee Chairperson), Julie Gilbert (Committee Member).

### Undergraduate MD

2010  **Primary Supervisor.** Melanie Maurus. *Understanding patient and provider perceptions of barriers to accessing radiation therapy treatments.*

2010  **Primary Supervisor.** Alex Goytiso. *Understanding patient and provider perceptions of barriers to accessing radiation therapy treatments.*

2010  **Primary Supervisor.** Jasdeep Badwal. *Creating online referral systems.*

2009  **Primary Supervisor.** Jasdeep Badwal. *Creating online referral systems.*

### Other

2013 Sep - 2014 Aug  **Primary Supervisor.** Laurie Manwell. Supervisee Position: Fellow, Social Aetiology of Mental Illness.

2013 Jul - 2014 Jun  **Primary Supervisor.** Carmen Wiebe. Supervisee Position: Fellow, Education Scholars Program.
2. OTHER SUPERVISION

Graduate Education

Thesis Committee Member

2009 - 2010  **Master of Public Health.** Emma Jane Isobel Apatu, Rollins School of Public Health, Emory University. *A drive through web 2.0: an exploration of driving safety promotion on Facebook.* Collaborator(s): Melissa Aplerin (Committee Chairperson), Kathleen Miner (Committee Member). Completed 2010.

Thesis Examiner

Practicum Primary Supervisor

2016 May - 2016 Sep  **Master of Health Informatics.** Nicole van Heerwaarden. Supervisee Institution: University of Toronto. *eHIPP grant: thoughtshpot project, Non-thesis Project.*

Undergraduate MD

Agency Research Supervisor

2008 - 2009  Erica Frasca. *Survivorship Empowerment Model for Integrated Coordinated Care (DOCH Study).*

2006 - 2007  David Holt. *The Virtual Tour. (DOCH Study).*

2002 - 2003  Susan Krajewski. *Needs Assessment of Pediatric Radiation Therapy Patients (DOCH Study).*

Primary Practicum Supervisor

2016 Jan - 2017 Jul  **Year 1.** Yunlin Xue. Supervisee Institution: University of Toronto. *eHIPP grant: thoughtshpot project.*

I. Creative Professional Activities

1. PROFESSIONAL INNOVATION AND CREATIVE EXCELLENCE

CURRICULUM VITAE

Bradly G Wouters, PhD

PROFESSIONAL ADDRESS:
Princess Margaret Cancer Centre
Princess Margaret Cancer Research Tower
101 College St  Rm 12 - 314
Toronto, ON    M5G 1L7
Tel.: (416) 581-7840
E-mail: bwouters@uhnresearch.ca

PRIMARY APPOINTMENTS
2016-present  Executive Vice President, Science and Research, University Health Network
2014-2016     Director of Research (Interim), Princess Margaret Cancer Centre,
               University Health Network, Toronto, ON
2008-present  Senior Scientist, Princess Margaret Cancer Centre, University Health Network, Director,
               Hypoxia and Microenvironment Program, Toronto, ON

OTHER ACADEMIC APPOINTMENTS:
2016-present  Pohang University of Science and Technology (POSTECH)
               Division of Integrative Biosciences and Biotechnology
               Faculty member (non-tenured track), Gyeongbuk, Korea
2010-present  University of Toronto, Department of Radiation Oncology
               Associate Chair, Graduate Studies, Toronto, ON
2008-present  University of Toronto, Department of Radiation Oncology,
               Professor, Toronto, ON
2008-present  University of Toronto, Department of Medical Biophysics,
               Professor (cross-appointed), Toronto, ON
2008-present  Ontario Institute for Cancer Research (OICR),
               Senior Investigator Program, Toronto, ON
2008-present  University of Toronto, Department of Radiation Oncology,
               Director of Radiation Biology, Toronto, ON
2008-present  Maastricht University, Molecular Radiation Biology
               Professor (10%), Maastricht, The Netherlands

Past appointments:
2005-2008     Maastricht Radiation Oncology Laboratory, azM/University of Maastricht
               Professor /Head Scientist, Maastricht, The Netherlands
2001-2005     Maastricht Radiation Oncology Laboratory, azM/University of Maastricht
               Associate Professor/Head Scientist, Maastricht, The Netherlands
1999-2001     Research Institute, Ottawa General Hospital
               Associate Research Scientist (Cross-appointed), Ottawa, ON
1999-2001     University of Ottawa, Faculty of Medicine, Dept of Radiology
               Assistant Professor, Ottawa, ON
1998- 2001   Centre for Cancer Therapeutics, Ottawa Regional Cancer Centre
               Career Scientist, Ottawa, ON
TRAINING AND EDUCATION:

1996-1998 Stanford University School of Medicine, Dept of Radiation Oncology
  Post-doctoral fellow in Radiation Oncology with Dr. J. Martin Brown
1992-1996 University of British Columbia, Dept of Medical Biophysics, BC Cancer Research Centre, Vancouver, BC,
  Ph.D. in Physics, Department of Medical Biophysics, Supervisor: Dr. Lloyd D. Skarsgard
1991-1992 University of British Columbia, BC Cancer Research Centre,
  Physics M.Sc. candidate, Supervisor: Dr. Lloyd D. Skarsgard - After 1 year of study, required qualifications were met to proceed directly to the Ph.D. program.
1987-1991 University of Saskatchewan, Saskatoon, SK,
  Bachelor of Engineering Physics (cum laude)

AWARDS:

**Major personal awards:**

2013 Senior Investigator Award, Ontario Institute for Cancer Research - Renewal – 5 year award
2011 ESTRO Klaas Breur Gold Medal Award – the highest honour that can be conferred on an ESTRO (European Society of Radiother Oncol) member, awarded in recognition of a major contribution made by the winner to European Radiotherapy
2008 Michael Fry Research Award, Radiation Research Society – awarded to a single society member each year who has made extraordinary contributions to the field of radiation research
2008 Senior Investigator Award, Ontario Institute for Cancer Research – 5 year award
2000 Scholar of the Medical Research Council of Canada (Assistant Professor) – 5year award
2000 Premier’s Research Excellence Award (PREA) – Government of Ontario
1999 Polanyi Prize in Medicine – Government of Ontario
1998 Junior Fellow of the National Cancer Institute of Canada – 1 Year Renewal
1996 Junior Fellow of the National Cancer Institute of Canada – 2 Year PDF
1993 Natural Sciences and Engineering Research Council Postgraduate Scholarship (2 years)
1991 Natural Sciences and Engineering Research Council Postgraduate Scholarship (2 years)
1987 University of Saskatchewan College of Engineers Book Prize (top entering student)
1987 Governor General’s award (Bronze medal)

**Other personal awards:**

2012 Cummings Education Leadership Award – University of Toronto
2011 Excellence in Research Leadership Award - University of Toronto
2006 Invited Visiting Professor, Dept of Radiation Oncology, University of Toronto
1999 Radiation Research Society, Travel Award, 11th ICRR Meeting, Dublin, IR
1998 AACR-Genetics Institute Travel Award- 1998 AACR Annual Meeting, New Orleans,
1995 Junior Scientist Travel Award, 9th Int. Conference on Chemical Modifiers, Oxford, UK
1995 BCCA Travel Award, 9th Int. Conference on Chemical Modifiers, Oxford, UK
1995 Junior Scientist Travel Award, 10th ICRR, Wurzburg, Germany
1995 UBC Travel Award, 10th International Congress of Radiation Research, Wurzburg, Germany
1994 BCCA Travel Award, 42nd Annual Meeting, RRS, Nashville, Tennessee
1993 Radiation Research Society Travel Award, 41st Annual Meeting RRS, Dallas, Texas
1991 Faculty of Graduate Studies, NSERC top-up award, University of B.C.
1991 Graduated from Engineering Physics, with Great Distinction, University of Saskatchewan
1990  University of Saskatchewan Undergraduate Scholarship (Engineering Physics- 4th year)
1989  NSERC Undergraduate Student Research Award
1989  University of Saskatchewan Undergraduate Scholarship (Engineering Physics- 3rd year)
1988  University of Saskatchewan Undergraduate Scholarship (Engineering Physics- 2nd year)
1987  Valedictorian Scholarship (Top graduate at High School Graduation)

PEER-REVIEW / MEMBERSHIPS / COMMITTEES

Peer review: granting agencies:

2016  Member of review panel - CCSRI Impact Grant 2017
2016  Member of review panel – Cancer Research UK Review of Oxford Cancer Centre
2015  Member of review panel - Cancer Research UK’s quinquennial review (QQR) of Professor Ruth Muschel of the Oxford Institute of Radiation Oncology
2014-2016  Canadian Cancer Society Research Institute Impact Grant Committee
2014-2016  Member of the review panel, Alberta Cancer Foundation Transformative Program Comprehensive Research Plan
2014  Committee Member - CIHR Peer Review Committee
2012  External review (site visit) CRUK Molecular Imaging Center Oxford Gray Institute
2012  Wellcome Trust Review
2010 – 2014  Scientific Officer, CIHR, Cancer Biology & Therapeutics Panel
2011  External referee CRUK/MRC, Quinquennial Review of Oxford Gray Institute
2009 – 2011  Member of review panel – CCSRI Panel E
2008 – 2010  Member of review panel – CIHR Cancer Biology & Therapeutics Panel
2010  Member of LOI review panel – CCSRI Team Grant: Terry Fox New Frontiers Program in Cancer
2003 – Present  External Grant Referee, Dutch Science Organisation (NWO)
2002 – Present  External Grant Referee, Dutch Cancer Society (KWF)
2010  External Grant Referee – A*STAR Biomedical Research Council (BMRC)
2007 – 2008  Site Visit Review Committee – CRUK London Research Institute
2006 – 2008  Member of the Science Funding Committee - Cancer Research UK (CRUK)
2005  External Grant Referee – Austria Science Foundation
2004  External Grant Referee – Swiss Cancer Foundation
2003  External Grant Referee, Association for International Cancer Research (AICR)
2000  External Grant Referee, Medical Research Council of Canada
2000  Member of review panel, Molecular Biology A, Canadian Cancer Research Society

International standing committees:

2011 – present Chair, Radiobiology Committee, European Society for Radiother Oncol, (ESTRO)
2011 – present Member, Science Council, European Society for Radiother Oncol (ESTRO)
2013 – present Member, American Society for Therapeutic Radiation Oncology (ASTRO), Science Advisory Committee
2011 – 2013 Member, American Society for Therapeutic Radiation Oncology (ASTRO) Radiobiology Committee
2011 - 2012 Associate Editor, ASTRO Radiation and Cancer Biology (RBC) Practice Examination and Study Guide
2009 – 2012 Chair, Education and Training Committee, Radiation Research Society
2001 – 2003 Co-Chairman, Tissue-bank group European Organisation for Research and Treatment of Cancer (EORTC) Translational Research Committee

Scientific Committees/Advisory Boards:

2016 Scientific Advisory Board (SAB) of the Cancer Research Institute of Northern Alberta (CRINA) at the University of Alberta.
2015 Organizer and Chair National Cancer Institute (NCI) “The Future of Radiobiology Workshop”
2015 Member of the Board of Directors, Princess Margaret Cancer Foundation (PMCF)
2015 Member of the Board of Directors, Centre for Commercialization of Antibodies and Biologics (CCAB)
2015 Organizing Committee, 14th International Wolfsberg Meeting, Molecular Radiation Biology/Oncology, Wolfsberg, Germany
2015 Chair, International Symposium of Tumor Control by Radiation: Recent Progress in Targeting Hypoxic Tumor Cells: From Bench to Clinic, 15th International Congress of Radiation Research (ICRR), Kyoto, Japan
2015 Scientific Program Committee, European Society for Radiation Oncology (ESTRO) 33, Barcelona, Spain
2015 Organizing Committee, 14th International Wolfsberg Meeting, Molecular Radiation Biology/Oncology, Wolfsberg, Germany
2015 Chair, International Symposium of Tumor Control by Radiation: Recent Progress in Targeting Hypoxic Tumor Cells: From Bench to Clinic, 15th International Congress of Radiation Research (ICRR), Kyoto, Japan
2015 Committee member, Technology, Development and Commercialization (TDC) Strategic Planning Committee, Toronto, ON
2014 Scientific Program Committee, 18th ECCO – 40th ESMO European Cancer Congress (ECC) Expert - Innovation in Radiation Oncology Track
2013 28th Working Party on Clinical and Experimental Research in Radiation Oncology (CERRO), Les Menuires, France
2013  Scientific Program Committee, European Society for Therapeutic Radiology and Oncology (ESTRO) Planning Meeting, Brussels, Belgium
2013  Scientific Program Committee, European Society for Therapeutic Radiology and Oncology (ESTRO) Forum, Geneva, Switzerland
2013  17th ECCO – 38th ESMO – 32 ESTRO European Cancer Congress, Amsterdam, Scientific Advisory Committee
2013  Scientific Program Committee, European Society for Radiation Oncology (ESTRO) 33, Brussels, Belgium
2013  2nd International Conference on Tumor Microenvironment and Cellular Stress: Signaling, Metabolism, Imaging and Therapeutic Targets, Corfu Greece
2012  Scientific Program Committee, European Society for Radiation Oncology ESTRO 31, Barcelona, Spain
2012  Scientific Program Committee, European Society for Therapeutic Radiology and Oncology (ESTRO) Abstract Meeting, Brussels, Belgium
2012  Scientific Program Committee, European Society for Therapeutic Radiology and Oncology (ESTRO) Strategy Meeting, Portugal, Spain
2012  Scientific Program Committee, ICTR International Conference on Translational Research in Radiation Oncology, Geneva, Switzerland
2012  Scientific Committee, 4th Symposium on Novel Targeting Drugs and Radiotherapy: From the Bench to the Clinic, Toulouse, France
2012  Scientific Committee, 13th International Wolfsberg Meeting on Molecular Radiation Biology, Wolfsberg, Germany
2012  Scientific Program Committee, ESTRO 31, Geneva, Switzerland
2011  Track Expert in Basic Science, Multidisciplinary Cancer Congress (ECCO), Stockholm
2011  Associate Editor, ASTRO Radiation and Cancer Biology (RBC) Practice Examination and Study Guide
2011  Scientific Program Committee, 3B Forum: Benchtop to Bedside and Back Program Committee, ASTRO, Atlanta, Georgia
2011  Scientific Committee, 12th International Wolfsberg Meeting on Molecular Radiation Biology,
2010  Chair, Tumour metabolism as a new target, ESTRO 29, Annual Meeting, European Society for Therapeutic Radiology and Oncology, Barcelona, Spain
2010  Scientific Committee, ESTRO 29, Annual Meeting, European Society for Therapeutic Radiology and Oncology, Barcelona, Spain
2010  Scientific Program Committee, Radiation Research Society (RRS) Maui, Hawaii
2009  Scientific Program Committee, 4th International Congress on Translational Research, Geneva, Switzerland
2009  Scientific Program Committee, 55th Annual Meeting of the Radiation Research Society Savannah
2009  Scientific Program Committee, 11th International Wolfsberg Meeting on Molecular Radiation Biology/Oncology
2008  Scientific Program Committee 54th Annual Meeting of the Radiation Research Society, Boston
2008  Scientific Program Committee, ESTRO 27, Annual Meeting, European Society for Therapeutic Radiology and Oncology, Gothenberg, Sweden
2007  Scientific Program Committee, 13th International Congress of Radiation Research, San Francisco
2007  Scientific Program Committee, 10th International Wolfsberg Meeting on Molecular Radiation Biology/Oncology
2006  Scientific Program Committee, 53rd Annual Meeting of the Radiation Research Society, Philadelphia,
2006  Scientific Program Committee 3rd International Congress on Translational Research, Lugano Switzerland
2006  Scientific Program Committee ESTRO 25, Annual Meeting, European Society for Therapeutic Radiology and Oncology, Leipzig
2005  Scientific Program Committee 9th International Wolfsberg Meeting on Molecular Radiation Biology/Oncology
2004  Scientific Program Committee ESTRO 23, Annual Meeting, European Society for Therapeutic Radiology and Oncology, Amsterdam
2004  Scientific Program Committee 8th International Wolfsberg Meeting on Molecular Radiation Biology/Oncology
2003  Scientific Program Committee 2nd ESTRO Radiobiology Meeting, Nijmegen
2002  Scientific Program Committee 6th International Wolfsberg Meeting on Molecular Radiation Biology/Oncology
2002  Scientific Program Committee ESTRO 21, Annual Meeting, European Society for Therapeutic Radiology and Oncology, Prague
2002  Scientific Program Committee 6th EORCT/AACR/NCI Symposium: Molecular Targets and Cancer Therapeutics, Frankfurt

Local committees:

Executive Committees:

2016 - present  Executive Committee, Princess Margaret Cancer Committee
2015 – present  Director, Princess Margaret Cancer Foundation (PMCF) Board of Directors
2014 – present  Executive Committee, Research Council Executive (RCE), University Health Network
2014 – present  Executive Committee, Cancer Stem Cell (CSC) Program, Ontario Institutes for Cancer Research (OICR)
2012 – present  Executive Appointments Committee, Ontario Cancer Institute (OCI)
2010 – present  Executive Committee, Princess Margaret Cancer Centre, University Health Network
2010 – present  Executive Committee, Research Council on Oncology (RCO), University Health Network
2010 – present  Executive Committee, University of Toronto, Department of Medical Biophysics (MBP)
2009 – present  Executive Committee, University of Toronto, Department of Radiation Oncology

Other Local Committees

2015 – present  Member, Radiation Medicine Program (RMP/UTDRO) Education Committee
2015 – present  Member, Donnelly Princes Margaret Screening Centre (DPSC) Committee
2015 – present  Advanced Research Cores & Facilities (ARCF) Committee
2015 – present  Leadership Board of Directors, Princess Margaret Cancer Centre (PMCC) Innovation Accelerator Fund Committee
2015 – present  Laboratory Task Force member, Ontario-wide Cancer Targeted Nucleic Acid Evaluation (OCTANE)
2015 – present  Bioinformatics Task Force member, Ontario-wide Cancer Targeted Nucleic Acid Evaluation (OCTANE)
2015 – present  Member, Orsino Cell Processing Laboratory Committee
2015 – present  Member, Cancer Genomics Program (CGP) Operational Committee
2015 – present  Member, Medical BioPhysics (MBP) U of Toronto Curriculum Committee
2015 – present  Member, Cancer Genomics Program Committee
2015 – present  Member, RMP Research Committee, University of Toronto, Department of Radiation Oncology
2015 – present  Member, PM Tumour Immunotherapy Program (TIP) Committee
2015 – present  Member, Cancer Informatics Committee
2015 – present  Member, Personalized Cancer Medicine (PCM) Cabinet Committee
2014 – present  Member, Strategic Planning Committee, Road map to 2017, University of Toronto, Department of Radiation Oncology
2014 – present  Member, Ontario Cancer Institute (OCI) Programs Committee
2014 – present  Member, Brain Tumour Program Committee, Princess Margaret Cancer Centre
2014 – present  Member, Continuing Education (CE) Committee, University of Toronto, Department of Radiation Oncology
2013 – present  Member, Toronto Antibody NewCo Committee
2013 – present  Member, Princess Margaret Genomics Centre Advisory Board
2013 – present  Member, Cancer Informatics Steering Committee, University of Toronto Department of Radiation Oncology
2013 – present  Member, Planning Committee, Personalizing Cancer Medicine Conferences 2014 and 2015
2013 – present  Member, Promotions Committee, University of Toronto Department of Radiation Oncology
2013 – present  Member, Curriculum Committee, University of Toronto Department of Medical Biophysics
2012 – present  Member, Admissions Committee, University of Toronto Medical Biophysics Department
2011 – present  Member, Website Committee, Princess Margaret Hospital Foundation
2011 – present  Member, program Advisory Committee (PAC), University of Toronto, - Excellence in Radiation Oncology for the 21st century CIHR training program (EIRR21)
2010 – present  Member, Tissue Committee, OCI Gynecology
2010 – 2013 Member, Teaching Effectiveness Committee, University of Toronto, Department of Radiation Oncology
2010  Member, UHN Strategic Planning Committee, “Research Hospital of the Future” / Genomics, University Health Network
2010  Member, Pancreatic Cancer Think Tank, Ontario Institute for Cancer Research (OICR)
2009 – 2010  Member, Strategy Committee, University of Toronto, Department of Radiation Oncology
2008 – 2009  Member, Strategy Committee, Ontario Cancer Institute
2003 – 2008  Member, Education committee, Research Masters in the department of life sciences, Maastricht University
2001 – 2008  Member, Strategy Committee, GROW Department of Oncology, Maastricht University
2001 – 2008  Clinical trials Committee, Maastricht Radiation Oncology
2003 – 2005  Member, Strategy workgroup, MUCH workgroup ZKO2 Oncology, Academic Hospital Maastricht
2001 – 2003  Member, Users committee, Transgenic and knockout mouse facility, Maastricht University
2001 – 2005  Member, Users committee Maastricht centre for proteomics, Maastricht University
1998 – 2000  Member, Library committee- Ottawa Hospital Research Institute

Associations/Societies
2011 - present  Member of the American Society for Therapeutic Radiology and Oncology (ASTRO)
2001 – present  Member of the European Society for Therapeutic Radiology and Oncology (ESTRO)
1997 – present  Member of the American Association for Cancer Research (AACR)
1997 – present  Member of the American Association for the Advancement of Science (AAAS)
1992 – present  Member of the Radiation Research Society (RRS)

Editorial boards

2012 - present  Associate Senior Editor Biology – International Journal of Radiation Oncology, Biology, Physics
2012 – present  Member, Editorial Board Tumor Microenvironment and Therapy Editorial Advisory Board
2011 – present  Review Editor, Frontiers in Molecular and Cellular Oncology
2008 – present  Associate Editor, Biology, International Journal of Radiation Biology (IJRB)
2011 – present  Associate Senior Editor, International Journal of Radiation Oncology, Biology, Physics
2010 – present  Member - Editorial Board, BMC Cancer
2010 – present  Associate Editor, Radiation Research
2007 – present  Member – Editorial board for the Journal Radiotherapy Oncology

Disclosures

1. Antibodies against PTPRJ and their uses. Status: In Process
2. Targeting Lipophagy as a Mechanism to Treat Cancer UHN 2015-048 Status: Disclosed Filing Date: 2015-04-10
3. Identification of hypoxic cells using an organotellurium tag compatible with mass cytometry UHN 2015-037 Status: Disclosed Filing Date: 2015-04-02
GRANTS:

**Active:**

**Agency:** Canadian Institutes of Health Research (CIHR) – Project Scheme
**Title:** Hypoxic regulation of DICER influences metastasis, stemness, tumour regrowth and reveals new opportunities for therapy
**Term:** 2016 - 2021
**Role:** Nominated Principal Applicant, Co-Applicants Paul Boutros, Richard Hill, Michael Milosevic
**Amount:** $750,000

**Agency:** Canadian Institutes of Health Research (CIHR) – Project Scheme
**Title:** A novel 3D tissue-engineered platform to identify novel therapy targets in head and neck squamous cell carcinoma
**Term:** 2016 - 2019
**Role:** Co-Applicant, Nominated Principal Applicant Alison McGuigan, Other Co-Applicant Laurie Ailles
**Amount:** $325,000

**Agency:** Canadian Institutes of Health Research (CIHR – CHRP)
**Title:** A tissue-engineered tumour to probe signatures of therapy resistance niches resulting from hypoxia and stromal-tumor cell interactions
**Term:** 2016 - 2019
**Role:** Principal Investigator with Alison McGuigan, Co-Applicant Laurie Ailles, Knowledge User Jeanne Magram
**Amount:** $415,600 total

**Agency:** Canadian Cancer Society Research Institute (CCSRI)
**Title:** Analysis of the tumour microenvironment
**Term:** 2016 - 2019
**Role:** Co PI with Mark Nitz, Collaborators: David Hedley and Cameron Koch
**Amount:** $450,000 (Wouters total $270,000)

**Agency:** Ontario Institutes for Cancer Research (OICR)
**Title:** PanCuRx Theme 2: Early Translation
**Term:** 2015 - 2017
**Role:** Principal Investigator, Co-Investigators Benjamin Haibe-Kains, David Hedley, Malcolm Moore, Senthil Muthuswamy, Michael Roehrl
**Amount:** $330,200

**Agency:** Canadian Institutes of Health Research (CIHR) OOGP
**Title:** Targeting hypoxia in pancreatic cancer through the unfolded protein response
**Term:** 2015 - 2019
**Role:** Principal Investigator, Co-Applicants Benjamin Haibe-Kains, Marianne Koritzinsky, Senthil Muthuswamy, David Hedley
**Amount:** $738,505

**Agency:** Ministry of Research and Innovation - Ontario Research Fund (ORF)-Research Excellence competition
**Title:** A comprehensive antibody platform for targeting tumour heterogeneity
**Term:** 2015-2020
Role: Co-Investigator (with Sachdev Sidhu and Ben Neel))  
Amount: $72,000 over 5 years $14,400 per year  
Agency: **Canadian Institutes of Health Research (CIHR)**  
Title: Image-based quantitative assessment of tumor hypoxia  
Term: 2015 - 2020  
Role: Co-PI with David Jaffray (Principal Investigator)  
Amount: $1,923,621  

Agency: **Canadian Cancer Society Research Institute (CCSRI)**  
Title: Targeting lactate and pyruvate transport in tumours  
Term: 2014 - 2016  
Role: Principal Investigator  
Amount: $200,000.00  

Agency: **Terry Fox New Frontiers Program Project Grant (TFRI)**  
Title: A Research Pipeline for Hypoxia-Directed Precision Cancer Medicine  
Term: 2014 - 2019  
Role: Co Lead PI with Robert Bristow  
Total amount: $6,688,974.00  
Amount: $1,009,114.00 (Wouters Project 2 only)  

Agency: **Canadian Cancer Society Research Institute (CCSRI) Innovation Grant**  
Title: Mass cytometry probes to evaluate tumour hypoxia  
Term: 2014-2016  
Role: Principle Applicant with Mark Nitz  
Amount: $199,500.00  

Agency: **Prostate Cancer Canada (PCC)**  
Title: Tumour Cell Plasticity in Treatment-Resistant Prostate Cancer  
Term: 2013-2018  
Role: Co-Applicant, Ralph Butyan PI  
Amount: Project 3 - Total $1,057,420.00  

Agency: **Ontario Institutes for Cancer Research (OICR) Cancer Stem Cell Program**  
Title: The influence of hypoxia on epigenetic regulation of gene expression and stemness in cancer  
Term: 2012 - 2016  
Role: Principal Investigator  
Amount: $600,000  

**Previous:**  
Agency: **Canadian Institutes of Health Research (CIHR)**  
Title: Role of PTP1B in Her2+ breast cancer  
Term: 2010-2015  
Role: Co-applicant, Ben Neel PI  
Amount: $870,050  

Agency: **Coalition to Cure Prostate Cancer (CCPC)**  
Title: A randomized pilot study of the effect of Metformin in patients undergoing active surveillance for prostate cancer.  
Term: 2012 - 2015  
Role: Co-Applicant, Anthony Joshua PI
Amount: $225,000
Agency: Canadian Institutes of Health Research (CIHR)
Title: Excellence in Radiation Research Training Grant
Term: 2009-2015
Role: Co-Applicant, Fei Fei Liu PI
Amount: $1,950,000

Agency: Princess Margaret Cancer Foundation (PMCF) Large Scale Collaborative Grant
Title: Harnessing Next Gen Data for HNC Therapy
Term: 2013-2015
Role: Principle Applicant with Fei Fei Liu
Amount: $100,000.00

Agency: Canadian Institutes of Health Research (CIHR)
Title: Targeting hypoxia in pancreatic cancer through the unfolded protein response
Term: 2014 - 2015
Role: Principal Investigator
Amount: $100000.00

Agency: Canadian Institutes of Health Research (CIHR)
Title: Hypoxia: Effects on Tumour Response and Progression in Cervix Cancers
Term: 2010-2014
Role: Co-applicant, Richard Hill PI
Amount: $700,068

Agency: Ontario Research Fund – Global Leadership in Genomics & Life Sciences (ORF-GL2)
Title: Functional genomics of solid tumors for discovery & development of new biologics and biomarkers
Term: 2010 – 2014
Role: Co Lead PI with Ben Neel
Amount: $10,109,310

Agency: Canadian Institutes of Health Research (CIHR)
Title: Adaptation to hypoxia in cancer through UPR
Term: 2009-2014
Role: Principal Investigator
Amount: $845,045

Agency: Ontario Institutes for Cancer Research (OICR)
Title: MicroRNA and mRNA Expression Profiling to Predict Outcome and Characterize the Cervix Cancer Microenvironment
Term: 2011 - 2014
Role: Co-applicant, Fei Fei Liu and Anthony Fyles PI’s
Amount: $634,407

Agency: Terry Fox New Frontiers Program Project Grant (TFRI)
Title: Hypoxia in Tumours: Clinical and Experimental Studies
Term: 2009-2014
Role: Co Lead PI with Robert Bristow
Total amount: $4,986,535 $1,228,750 (Wouters Project 3 only)

Agency: National Institutes of Health (NIH)
Title: NIH training grant – Radiation Research Society – SIT (Scholars in Training) travel grant
Grant #: R13CA141926

TALKS AND PRESENTATIONS

2016

2. 4th International Conference on Tumor Microenvironment and Cellular Stress: Signaling, Metabolism, Imaging and Therapeutic Targets, Session Chair, Stress resistance & cancer I: Targeting organelle-specific stress responses, Rhodes, Greece, June 2016
3. 4th International Conference on Tumor Microenvironment and Cellular Stress: Signaling, Metabolism, Imaging and Therapeutic Targets, Session speaker, Stress resistance & cancer II: ER stress and the Unfolded Protein Response, The unfolded protein response promotes tolerance to hypoxia through maintenance of mitochondrial and ER homeostasis through ULK1
Rhodes, Greece, June 2016
4. Determinants of hypoxia and its importance in tumors, Martin Brown Retirement Symposium, Palo Alto, CA May 2016
5. Grand Rounds, Universitätssklinik für Radioonkologie, Universitätssklinikum Tübingen, Targeting phenotypic diversity in tumors, Tübingen, Germany, March 2016.
6. The role of ULK1 in hypoxia tolerance, Conference on Clinical and Experimental Research in Radiation Oncology (CERRO), Le Menieures, France, Jan 2016
7. Tackling phenotypic diversity to increase cures, E. Vander Schueren Award Lecture, International Conference on Translational Research in Radiation Oncology, Physics for Health in Europe (ICTR-PHE 2016), Geneva, Switzerland, Feb 2016
9. Targeting phenotypic diversity in tumors, University Hospital and Faculty of Medicine Eberhard Karls University Tübingen, Grand Rounds, Tuebingen, Germany, Mar 2016.
11. Targeting metabolic and hypoxia induced phenotypic diversity in cancer, Madison School of Medicine and Public Health, Madison, WI, Apr 2016

2015

1. Development of a new marker for assessing oxygen dynamics, Conference on Clinical and Experimental Research in Radiation Oncology (CERRO), Le Menieures, France, Jan 2015
2. Understanding the determinants of hypoxia and its importance in tumours, RMP Rounds, Department of Radiation Oncology, University of Toronto, Radiation Medicine Program, Princess Margaret Cancer Centre, Toronto, Feb 2015
3. The need for biology in future radiation oncology, Symposium – Future in Radiation Oncology: Uncertainties and Economics, ESTRO 33, Barcelona, Spain, April 2015
4. Radiation Oncology will be an integrated component of curative precision medicine, ESTRO 33, Barcelona, Spain, April 2015
5. Meet the Professor, ESTRO 33, Barcelona, Spain, April 2015
9. Keynote Speaker, Therapeutic Approaches to Tumor Hypoxia, Integrating Radiobiology with Medical Physics (IBPRO), Detroit, MI, May 2015
11. Therapeutic challenges and opportunities arising from phenotypic diversity in tumours, 29th Canadian Association of Radiation Oncology (CARO) Annual Scientific meeting, Kelowna, BC, Sept 2015
13. Regulation of phenotypic diversity through oxygen sensitive signaling pathways, 17TH Cancer Biology Research Center (CBRC) Biennial Meeting, Tel Aviv, Israel, Nov 2015

2014
1. Hypoxic regulation of epigenetic state controls stemness and metastasis in breast cancer, Keystone Symposium, Breckenridge, CO, USA, Jan 2014
2. Functional genomics of head and neck cancer, Conference on Clinical and Experimental Research in Radiation Oncology (CERRO), Le Menieures, France, January 2014
6. The rationale for targeting hypoxia, past, present, and future, ESTRO 33, Vienna, April 2014
7. Biological considerations in particle radiotherapy, Target Insight VIII, Toronto, Canada May 2014
8. UPR activation and its importance during hypoxia, National Cancer Institute (NCI), Maryland, USA, June 2014
10. Detection and therapeutics: Epigenetic regulation of DICER and miRNA biogenesis during hypoxia promotes stem cell phenotypes in breast cancer, Terry Fox Ontario Node Symposium, Toronto, December 2014

2013
1. Identifying new targets in head and neck cancer, 28th Clinical and Experimental Research in Radiation Oncology (CERRO) Meeting, Les Menuires, France, Jan 2013
2. The UPR promotes hypoxia tolerance through mitigation of ROS, Oxidants and Anti-Oxidants in Cancer Genesis and Treatment, Banbury Center, Cold Spring Harbor Laboratory, Cold Spring Harbor, NY, February 2013
3. LAMP3 mediates hypoxia induced metastasis downstream of the UPR, 4th Annual Metoxia Meeting, Munich, Germany, March 2013
4. Epigenetic regulation of DICER by hypoxia promotes metastasis and stemness, 2nd European Society for Radiation Oncology (ESTRO) Forum 2013, Switzerland, April 2013
5. Microenvironment-gene interactions drive phenotypic diversity and poor outcome, Terry Fox Research Institute (TFRI) 4th Annual Scientific Meeting, Ottawa ON, May 2013
10. The basis and importance of UPR activation during hypoxia, 2nd International Conference on Tumor Microenvironment and Cellular Stress: Signaling, Metabolism, Imaging and Therapeutic Targets, Corfu, Greece, Sept 2013

2012
1. Functional Genomics of Hypoxia, Conference on Clinical and Experimental Research in Radiation Oncology (CERRO), Le Menieures, France, January, 2012
3. Biological responses to tumor hypoxia and their potential as therapeutic targets, Workshop on Mathematical Oncology IV: Integrative Cancer Biology, Fields Institute and University of Waterloo, University of Toronto, Ontario, Canada, March 2012
4. Biological responses to tumor hypoxia and their potential as therapeutic targets, Meet the expert session, American Association for Cancer Research (AACR) 2012 Annual Meeting, Chicago, April, 2012
5. The Biology of Hypofractionated Radiotherapy, Target Insight VI - Forging the hypofractionation Frontier:SBRT, HDR Brachytherapy and Beyond, Toronto, ON, Canada, May 2012
6. Novel mechanisms of oxygen sensing and adaptation to hypoxic stress, European Society for Radiotherapy and Oncology Annual Meeting (ESTRO-31), Barcelona, Spain, May 2012
8. Pattern of UPR- and mTOR responsive genes as markers of hypoxia-mediated treatment resistance: Possible new targets. Metastatic tumours facilitated by hypoxic tumour microenvironment (METOXIA) Annual Meeting, Bratislava, Slovakia, June 2012
9. Even more reasons to be interested in hypoxia, University of Toronto Department of Radiation Oncology (UTDRO) Grand Rounds, Toronto, ON, Canada, June 2012
10. Evening plenary lecture : Functional genomic approaches to novel target discovery in radiotherapy 4th Symposium on Novel Targeting Drugs and Radiotherapy: From the Bench to the Clinic, European Society for Radiotherapy and Oncology (ESTRO) Toulouse, France, Sept 2012
11. Epigenetic regulation of DICER during hypoxia promotes metastasis and stemness through suppression of miR200 1st International Conference on Tumor Microenvironment and Cellular Stress: Signaling, Metabolism, Imaging and Therapeutic Targets, Crete, Greece, Oct 2012

2011
1. The Influence of hypoxia on the epigenome, CERRO 26th Working Party on Clinical and Experimental Research in Radiation Oncology, Le Menuires, France, Jan 2011
2. Unfolded Protein Response: Part 1, IRE-1 Biology Ontario Institute for Cancer Research (OICR) Annual Scientific Meeting, Alliston, ON, Feb 2011
3. Addressing the Challenges of Tumor Heterogeneity, Sunnybrook Health Sciences, Radiation Oncology Research Grand Rounds, Toronto, ON, Mar 2011
4. Mechanisms of hypoxia tolerance, Adrian Begg and Bert van der Kogel Farewell Conference, Radboud University Nijmegen Medical Centre, Nijmegen, The Netherlands, April 2011
5. Tumor microenvironment: Hypoxia and metabolism, American Association of Cancer Research (AACR), Orlando, FLA, April 2011
6. From Genomics to Individualized Treatment, European Society for Radiotherapy and Oncology (ESTRO) Anniversary Conference: Three Decades of Innovation and Cancer Care, London, UK, May 2011
8. New Directions in Cancer Research and Treatment, Princess Margaret Hospital Foundation, Toronto, Aug 2011
9. Effects of hypoxia on the epigenome, International Congress of Radiation Research (ICRR), Warsaw Poland, Aug 2011
10. The UPR promotes hypoxia tolerance through the UPR and metabolic control, International Congress of Radiation Research (ICRR), Warsaw, Poland, Aug 2011
11. The importance of tumor heterogeneity, MBP 2011 Summer Student Seminar Series, Toronto, ON, Aug 2011
12. The challenge of tumor heterogeneity, Awardee Lecture, European Society for Radiotherapy and Oncology (ESTRO), Klaas Breur Gold Medal Award, Stockholm, Sweden, Sept 2011
13. Novel responses to hypoxia and their potential as therapeutic targets, Auckland Cancer Society Research Centre, University of Auckland, Auckland, NZ, Oct 2011

2010
2. Translational control of cell phenotype in the hypoxic tumor microenvironment, American Association of Cancer Research AACR, Special Conference entitled Protein Translation and Cancer, San Diego, CA, February 2010
3. Tumor microenvironment and cellular adaptation: Opportunities for imaging, European Association of Nuclear Medicine and the European Society for Therapeutic Radiology and Oncology (ESTRO), 1st Annual Molecular Imaging in Radiation Oncology (MIRO) Conference, Brussels, Belgium, March 2010
4. The POPCURE program in colorectal cancer. Pfizer Ontario Medical Team Meeting, Mississauga, ON, April 2010
5. The UPR protects hypoxic cells and promotes tumour radioresistance through autophagy, Tumour Microenvironment Meeting, Toronto, ON, May 2010
6. Hypoxia and Autophagy, OCI Annual Retreat, Huntsville, ON, May 2010
7. Regulation of autophagy during hypoxia by the unfolded protein response, ESTRO 3rd Annual Symposium, Novel targeting drugs and Radiotherapy from Bench to Clinic, Plenary speaker, Toulouse, France, June 2010
8. Hypoxia and cellular metabolism, Metoxia Annual General Assembly Meeting, Norway, June 2010
9. Targeting autophagy sensitizes tumours to irradiation by reducing hypoxia, ESTRO 29, Annual Meeting, European Society for Therapeutic Radiology and Oncology, Barcelona, Sept 2010
10. Mechanisms of adaptation to hypoxia and their relevance in cancer, ESTRO 29, Annual Meeting, European Society for Therapeutic Radiology and Oncology, Barcelona, Sept 2010
WOUTERS_BRADLY – CV

June 2016

11. Hypoxia and metabolism as potential targets, 9th meeting of the European Association for Neurooncology (EANo), Maastricht, The Netherlands, Sept 2010
14. The Importance of Tumor Heterogeneity, Department of Medical Biophysics Annual Retreat, Geneva Park, ON, Oct 2010
15. Targeting Autophagy Sensitizes Tumours to Irradiation by Reducing Hypoxia, 52nd Annual Meeting, American Society for Radiation Oncology (ASTRO), San Diego, CA, Oct/Nov 2010
16. Addressing the Challenges of Tumor Heterogeneity, RMP Grand Rounds, Department of Radiation Oncology, University of Toronto / Radiation Medicine Program, Princess Margaret Hospital, Toronto, CA, Nov 2010

2009

1. Autophagy promotes cell survival in the hypoxic tumor microenvironment” CERRO France, Jan 2009
2. Hypoxia, UPR and mTOR, Euroxy, Copenhagen, Denmark, Jan 2009
3. The UPR protects hypoxic cells in the tumor microenvironment through autophagy, 2nd Workshop On: Radiation and Multidrug Resistance Mediated via the Tumor Microenvironment, Dresden Germany, Feb 2009
4. The unfolded protein response protects against hypoxia induced endoplasmic reticulum stress by regulation of autophagy , Fourth International Conference on Translational Research and Pre-Clinical Strategies in Radiation Oncology (ICTR), Geneva, Switzerland, March 2009
5. The unfolded protein response protects against hypoxia induced endoplasmic reticulum stress by regulation of autophagy , NVRB, The Netherlands, April 2009
6. Understanding what feeds a tumor, “Back to the future”, Behind the Scenes, Princess Margaret Foundation, Toronto, ON, April 2009
7. Tackling Tumor Heterogeneity, Princess Margaret Hospital Foundation Board of Directors, Toronto, ON, April 2009
8. The UPR protects against hypoxia induced ER stress through autophagy, OCI Applied Molecular Oncology (AMO) Annual Divisional retreat, Building Bridges between the AMO and Cell Signaling Divisions, Toronto, ON, May 2009
9. Activation and Importance of the UPR during hypoxia, Department of Cell Biology Seminar Series, University of Alberta, Edmonton, May 2009
11. Hypoxia Signaling Pathways, Metoxia subgroup meeting, Models for the study of Hypoxia Induced Metastasis, Stockholm, Sweden, May 2009
12. Adaptation to the hypoxic microenvironment in cancer, DMOH/RMP Grand Rounds, Toronto, June 2009
14. The UPR protects against hypoxia induced ER stress through autophagy, Molecular and Cellular Biology Seminar Series, Sunnybrook Research Institute, Toronto, June 2009
15. The UPR protects against hypoxia induced ER stress through autophagy, The 11th International Wolfsberg Meeting on Molecular Radiation Biology/Oncology, Wolfsberg, Germany, June 2009
16. The UPR protects against hypoxia induced ER stress through autophagy, Novartis Institute for Biomedical Research, Cambridge MA, July 2009
17. Xenograft treatment with CA9 inhibitors, Metoxia Annual General Assembly Meeting, Manchester, UK, Sept 2009
19. The UPR protects against hypoxia induced ER stress through autophagy, UHN Public Symposium, Shanghai, China, Oct 2009
20. The UPR protects against hypoxia induced ER stress through autophagy, Southern Alberta Cancer Research Institute, University of Calgary Seminar Series, Calgary, Nov 2009
21. Discovery, characterization and exploitation of hypoxic signaling pathways in tumors, Department of Radiation Oncology, Maastricht, NL, Dec 2009

2008

1. Hypoxia inhibits disulfide bond formation and protein folding in the endoplasmic reticulum (ER), Keystone Meeting: Molecular, Cellular, Physiological, and Pathogenic Responses to Hypoxia, Vancouver, January 2008
2. The role of ER stress and the unfolded protein response in response to hypoxia, Paterson Institute Seminar Series, University of Manchester, Manchester, UK, March 2008
5. Cellular adaptation to Hypoxia, Applied Molecular Oncology Retreat, Ontario Cancer Institute, Toronto, May 2008
6. Tumor Microenvironment Heterogeneity: Opportunities for imaging and therapy, Ontario Cancer Institute Retreat, Toronto, May 2008
7. Is the Microenvironment of Tumors Important? Summer of Science Rounds Series, Princess Margaret Hospital, Toronto, August 2008
8. Targeting translational control pathways in hypoxic cells sensitizes tumors to irradiation, ESTRO Annual Meeting, Gothenburg, Sweden, Sept 2008
10. Adaptation to hypoxia through activation of the unfolded protein response, Breast Cancer Research Rounds, Campbell Family Breast Cancer Research Institute, Toronto, Dec 2008

2007

1. The multifaceted cellular response to the tumor microenvironment and its exploitation for imaging and targeted cancer therapy, Ontario Cancer Institute, Invited Lecture, Toronto, Jan 2007
2. The How to (dose) paint by numbers, European Society for Therapeutic Radiology and Oncology, Les Menuires, France, Jan 2007
4. Activation and influence of translational control pathways in hypoxic tumors, University of Madison Radiation Oncology Department, Invited Lecture, Madison, WI, August 2007

2006

1. The influence of mRNA translation on hypoxia regulated gene expression and tumor growth, European Society for Therapeutic Radiology and Oncology, Les Menuires, France, January 2006
4. Control of the hypoxic response through regulation of mRNA translation, Invited Lecture at the 3rd International Conference on Translational Research and Pre-Clinical Strategies in Radio-Oncology (ICTR), Lugano, March 2006
5. Contributions of mRNA translational control to the hypoxia response, Lecture as Invited Visiting Professor, Department of Radiation Oncology, Princess Margaret Hospital, Toronto ON, April 2006
6. Regulation of mRNA translation and its impact on gene expression and tumor growth, Lecture as Invited Visiting Professor, Department of Radiation Oncology, Princess Margaret Hospital, Toronto ON, April 2006
7. Translational Research in Radiation Oncology, Lecture as Invited Visiting Professor, Department of Radiation Oncology, Princess Margaret Hospital, Toronto ON, April 2006
8. Polyubiquitination of PCNA protects against TLS induced mutations, Invited Lecture DNA Repair Group, Karlsruhe Germany, August 2006
9. EGFR and Radiotherapy, Invited Discussant at the Presidential Highlights session, 25th Annual European Society for Therapeutic Radiology and Oncology (ESTRO) meeting, Leipzig Germany, October 2006
10. Biobanks in Radiation Oncology, 25th Annual European Society for Therapeutic Radiology and Oncology (ESTRO) meeting, Leipzig Germany, October 2006
11. The potential therapeutic gain of redistributing dose to hypoxic regions using dose-painting: a modeling study, 25th Annual European Society for Therapeutic Radiology and Oncology (ESTRO) meeting, Leipzig Germany, October 2006

2005

1. Polyubiquitination of PCNA protects against DNA damage induced mutation – European Society for Therapeutic Radiology and Oncology, Les Menuires, France, January 2005
2. Polyubiquitination of PCNA protects against DNA damage induced mutation, Gordon Conference on Radiation Oncology, Ventura California, January, 2005
3. Regulation of the hypoxic response through changes in mRNA translation, Department of Radiation Oncology, University of Nijmegen, Nijmegen NL, April 2005
4. Regulation of the hypoxic response through changes in mRNA translation, Department of Radiation Oncology, MD Anderson Cancer Center, Houston Texas, May 2005
5. Regulation of the hypoxic response through changes in mRNA translation, Netherlands Cancer Institute (NKI), Amsterdam NL, May 2005
6. Polyubiquitination of PCNA protects against DNA damage induced mutation, University of Saskatchewan Department of Microbiology, Saskatoon SK, July 2005
7. Towards realistic biological models of oxygenation for dose-painting algorithms, Plan Beyond Imaging - Exploring New Paradigms in Planning and Treatment, An educational symposium by Siemens Medical in association with the AAPM annual meeting, Seattle Washington, July 2005

2004

1. The role of ubiquitin in the bypass of polymerase blocking DNA lesions CERRO meeting – European Society for Therapeutic Radiology and Oncology, Les Menuires, France, January 2004
2. The role of novel ubiquitin chains in the resolution of stalled replication forks, Department of Radiation Oncology University of Essen, Essen Germany, February 2004
3. Control of gene expression by hypoxia, 26th German Cancer Congress, Berlin, Germany, February 2004
4. Molecular mechanisms of oxygen sensing and hypoxia tolerance, DoHad symposium on Hypoxia, Maastricht NL, June 2004
5. Biological Mechanisms of Hypoxia Tolerance, 23rd Annual European Society for Therapeutic Radiology and Oncology (ESTRO) meeting, Amsterdam, Oct 2004

2003

1. Ubiquitin and the resolution of stalled replication forks CERRO meeting – European Society for Therapeutic Radiology and Oncology, Les Menuires, France, January, 2003
2. Regulation of gene expression via changes in mRNA translation, University of Pennsylvania, Philadelphia PN, February 2003
3. Regulation of gene expression during hypoxia via changes in mRNA translation, Netherlands Radiobiological Society Annual Meeting, Leiden The Netherlands, February 2003
4. Regulation of protein expression during hypoxia, Second International Conference on Translational Research and Pre-Clinical Strategies in Radio-Oncology, Lugano Switzerland, March 2003
5. Exploiting Biological Response to Hypoxia, ESTRO biology workshop, Nijmegen The Netherlands, June 2003
6. Exploiting biological responses to hypoxia, Symposium Speaker, 12th International Congress of Radiation Research, Brisbane Australia, Aug 2003
7. Translational Research in Radiation Oncology, Symposium Speaker, The European Cancer Conference, Federation of European Cancer Societies, Ecco 12, Copenhagen, Denmark, September 2003
8. Regulation of gene expression during hypoxia via changes in mRNA translation, Institut Gustave Roussy Department of Radiation Oncology, Paris France, December 2003

2002

2. The role of ubiquitin in DNA repair and cancer, Dresden University, Dresden, Germany, Feb 2002
3. Tumor hypoxia, expression profiling and clinical prognosis: Establishment of a tissue bank for functional genomic analysis in a randomized clinical trial setting, EORTC translational research meeting, Brussels, Mar 2002
6. The role of ubiquitin in DNA repair and cancer, Rotterdam University, Netherlands, June 2002
7. Control of gene expression during hypoxia, Symposium speaker and chair, 32nd Annual Meeting of the European Society for Radiation Biology, Liege, Belgium Aug 2002
8. Regulation of gene expression during hypoxia, Symposium on Interactions between the microenvironment, normal cells and tumor cells, European Society for Therapeutic Radiology and Oncology 21st Annual Meeting, Prague, Czech Republic, Sept 2002

2001

1. The role of the RAD6 postreplication repair pathway in mammalian cells, CERRO meeting – European Society for Therapeutic Radiology and Oncology, Les Menuires, France, March 2001
2. Measurements of cell survival at very low radiation doses: Challenges and surprises, Kongsvold, Norway, March 2001
3. Exploiting the tumor microenvironment, ESTRO biology workshop, Aarhus Denmark, May 2001
4. Radiation and hypoxia-phase I/II trials, Target Insight: Innovative Strategies to Improve Target Definition in Radiation Oncology, Toronto, May 2001
5. Hypoxia regulated gene expression, University of Liege, Belgium, June 2001

2000

1. The importance of intermediate hypoxia in human tumours, CERRO meeting – European Society for Therapeutic Radiology and Oncology, Les Menuires, France, January 2000
2. The RAD6 post-replication repair pathway mediates the response of mammalian cells to DNA damage, International 4th Wolfsburg Meeting on Molecular Radiation Biology/Oncology 2000, Wolfsburg, Switzerland, June 2000
1999

1. The tumour microenvironment reveals a role for p21 in radiotherapy, International Workshop: The Tumour Microenvironment, Belfast, Northern Ireland, July 1999
2. The RAD6 post-replication repair pathway mediates the response of mammalian cells to DNA damage, Prediction of Tumor Response to Therapy: Molecular Markers and the Microenvironment, Montreal, October 1999

1998

1. In Vivo Sensitization of Tumors Following Disruption of p21waf1 occurs via a p53 and apoptosis independent mechanism (presented in a symposium at the 89th Annual Meeting, American Association for Cancer Research, New Orleans, Louisiana, March 1998

1997

1995

1. Factors Affecting the Hypersensitive Radiation Response in Human Tumour Cell Lines, Workshop 09 - Radioresistance Induced by Low Doses: Is it Real), 43rd Annual Meeting, Radiation Research Society, San Jose, California, April 1995

1994

1. Substructure in the Radiation Response of Mammalian Cells, Canadian Cancer Society Awards Announcement Breakfast, Vancouver, B.C., April 1994

1993

1. Enhancement at Low Doses of Radiation in Human Tumour Cell Lines by Two Hypoxic Radiosensitizers: Effects on $\alpha$ and $\beta$ in the Linear Quadratic Model, 41st Annual Meeting, Radiation Research Society, Dallas, Texas, March 1993

ACADEMIC ACTIVITIES

Student supervision
Current:

Postdoctoral fellows:

- 09/13 – present: Stefano Marastoni, University of Parma
- 09/13 – present: Sergio Rey, visiting scientist Italy
- 09/13 – present: Luana Schito, visiting scientist Italy
- 08/12 – present: Sujeeve Jegananthan, Princess Margaret Cancer Centre
- 11/11 – present: Maria Kondratyev, Ontario Cancer Institute
- 11/15 – present: Michael Cohen, Princess Margaret Cancer Center

Graduate students:

PhD Stream:

- 04/12 - present: Ron Wu – University of Toronto, Medical Biophysics
- 03/09 – present: Elizabeth Koch – University of Toronto, Medical Biophysics
- 08/09 – present: Dan Cojocari – University of Toronto

MSc Stream:

- 01/15 – present: Pedro Boasquevisque - University of Toronto, MBP / Fac of Med Int’l
- 01/16 to present: Ji Zhang - University of Toronto, Medical Biophysics

Graduate Student Supervisory Committee:

- Arushi Jaiswal - University of Toronto, Medical Biophysics
- Ryan Elliott - University of Toronto, Institute of Biomaterials and Biomedical Engineering
- Osman Mahumud – University of Toronto, Medical Biophysics
- Darrin Gao – University of Toronto, Medical Biophysics
- Osman Mahumud – University of Toronto, Medical Biophysics
- Elizabeth Huyn - University of Toronto, Medical Biophysics
- Yulong Sun - University of Toronto, Medical Biophysics
- Darren Rodenhizer – University of Toronto, Medical Biophysics
- Corey Lourenco – University of Toronto, Medical Biophysics
- James Stewart - University of Toronto, Medical Biophysics
- Zsuzsa Buchwald - University of Toronto, Medical Biophysics
- Ali Fateh Hassanabad - University of Toronto, Medical Biophysics
- Yedan Chan - University of Toronto, Medical Biophysics
- Rania Chehade - University of Toronto, Medical Biophysics
- Rosemary Yu - University of Toronto, Medical Biophysics
- Yan Wu - University of Toronto, Medical Biophysics
- Andras Lindenmaier – University of Toronto, Medical Biophysics
- Steve Bartolac - University of Toronto, Medical Biophysics
- Erin Stewart - University of Toronto, Medical Biophysics
- Robert Bahn – University of Toronto, Medical Biophysics
- Arun Chandrakumar – University of Toronto, Medical Biophysics
- Florence Wu - University of Toronto, Medical Biophysics
- Jan Zak, University of Toronto, Institute of Medical Science
- Bozhena Livck, University of Toronto, Institute of Medical Science
- Ali Fatehi - University of Toronto, Medical Biophysics
- Ken Tse– University of Toronto, Medical Biophysics
- Isaac Harris– University of Toronto, Medical Biophysics
James Tran – University of Toronto, Medical Biophysics
Eric Leung – University of Toronto, Medical Biophysics
Michelle Lenarduzzi– University of Toronto, Medical Biophysics
Jas Sagger– University of Toronto, Medical Biophysics

Student Oral Exams
Mojdeh Shakiba
Stephanie Oliveri
Diana Merino
Kevin Chan
Daniel Markel
Noufissa Kabli
Monica Clifford
Isaac Harris

Past supervision:

Postdoctoral fellows (past):

10/08 – 11/15 Anthony Joshua, Ontario Cancer Institute
02/08 – 01/15 Twan van den Beucken, Ontario Cancer Institute
04/12 – 08/15 Fiana Levitin, Princess Margaret Cancer Centre
06/13 – 07/15 Sue Li, Princess Margaret Cancer Centre
11/11 – 2014 Yi Wang, Ontario Cancer Institute
03/10 – 11/13 Mei Ding, Ontario Cancer Institute
02/11 – 06/12 Javier Menendez, Ontario Cancer Institute
05/09 – 2010 Fahima Khan, Ontario Cancer Institute
12/05 – 2010 Kasper Rouschop, University of Maastricht
08/09 – 07/10 Wissam Assaily, Ontario Cancer Institute
12/05 – 01/08 Jan Theys, University of Maastricht
04/03 – 01/08 Marianne Koritzinsky, University of Maastricht
01/01 – 01/08 Roland Chiu, University of Ottawa, University of Maastricht
02/05– 06/07 Renaud Seigneuric, University of Maastricht
11/03 – 05/05 Lin Weng, University of Maastricht
10/00 – 01/01 Jan Brun, University of Ottawa.
11/00 – 01/01 Jamie St. Louis, University of Ottawa

PhD students (past):

02/08 – 06/13 Hilda Mujcic – Maastricht University
09/05 – 08/11 Maud Starmans – Maastricht University
04/05 – 2011 Chantal Ramaekers, Ontario Cancer Institute, University of Maastricht
03/04 – 02/10 Ludwig Dubois, University of Maastricht
01/02 – 10/09 Sherry Weppler, University of Maastricht
01/02 – 03/09 Asferd Mengesha, University of Maastricht
10/03 – 02/08 Michael Magagnin, University of Maastricht
08/03 – 02/08 Twan van den Beucken, University of Maastricht
01/01 – 12/05 Ludy Lutgens, University of Maastricht
02/03 – 12/04 Gudio Lammering, University of Maastricht

MSc students (past):

08/11 – 07/13 Ryan Rumantir – University of Toronto
05/10 – 11/12 Vanessa Zannella – University of Toronto
